Irving, Sir Henry, was originally named **John Henry Brodribb**, but assumed his present name by royal patent. He was born at Keinton, Glastonbury, 1838, and was educated at Dr. Pinches' school in George Yard, Lombard Street, London. His first appearance on the stage was at the Sunderland theatre in '56, and he afterwards played at Edinburgh, London, Glasgow, Manchester, Liverpool, and elsewhere. His first great success was made in the spring of '70 as Digby Grant in the comedy "Two Roses." In '71 he first appeared at the Lyceum in "The Bells," and then after a series of successes in "Charles I.," "Eugene Aram," and "Richelieu," came that famous representation of "Hamlet" in '74, which created such a sensation, and finally gave him his pre-eminent position on the stage. "Macbeth," "Othello," Tennyson's "Queen Mary," "Richard III.,"

and "The Lyons Mail," followed in '75, '76 and '77; and then, in December '78, he took over the sole management of the Lyceum, and opened with "Hamlet" again. In "Othello" afterwards he alternated the characters of Othello and Iago with the late Mr. Edwin Booth, and produced and in conjunction with Miss Ellen Terry played in "The Merchant of Venice," "Much Ado about Nothing," "The Cup," "Twelfth Night," "Faust," "The Dead Heart" ('89), "Ravenswood" ('90), "The Corsican Brothers" ('91), "Henry VIII." ('92), Tennyson's "Becket" ('93), "King Arthur" ('95), "Cymbeline" ('96), "Madame Sans-Gêne" ('97), and "Peter the Great" ('98). The interest in the last play was greatly increased by the fact that the author was Mr. Lawrence Irving, the great actor's son. In '83 he first visited America, and the experiment answered so well that the visit was repeated in '84, '88, '93, and '95. In '95 Sir Henry was knighted.

Isle of Man. Lies in the Irish Channel, equidistant from England, Scotland, and Ireland. **Area**, 220 sq. m.; **pop.** 55,608. **Divisions** are 6 sheadings and 17 parishes. The principal towns are Douglas, Castletown, Ramsey, and Peel. **Castletown** is the ancient capital, but **Douglas** (pop. 15,719) is the chief town and the seat of government. **Physical aspect** mountainous, well watered, and exhibiting lovely scenery. There are peculiar breeds of ponies, cattle, cats, etc. **Government** is "home rule" under a Lieutenant-Governor, who, with Council and House of Keys of 24 members, makes up the Tynwald Court. Acts, after assent of the Crown, must be proclaimed on Tynwald Hill. **Industries** are farming, fishing, mining of lead, copper, iron, zinc, and reception of tourists. The land is in a high state of cultivation. Railways exist between the various towns. The Manx people are a distinct Celtic nationality. Their language and old customs are rapidly disappearing. See **BRITISH EMPIRE** and **DIPLOMATIC.**

Italian Dependencies. See **COLONIES, ETC., OF EUROPEAN POWERS, ERYTHREA, and MASSOWAH.**

ITALY.

Italy is governed by Humbert I., the second constitutional king, who succeeded King Victor Emmanuel in 1878. The legislative authority is exercised by the King in conjunction with a Senate of about 375 members (composed of the Princes of the royal house who are of age, and of members nominated by the King, who have rendered eminent services to the country, are upwards of forty years of age, and pay taxes to an annual amount of £120); and a Chamber of 508 Deputies, elected by conditional universal suffrage for a period of five years. Citizens over 21 who pay direct taxes to the amount of about 20 lire, professors, soldiers who have served under arms for 2 years, and others are all qualified to vote. Senators and deputies are unpaid, but travel free. For the purposes of local government the country is divided into 69 provinces administered by provincial councils, and subdivided into 8261 communes. Each commune is presided over by a syndic (who in the larger communes is elected, in the smaller appointed by the King), and has besides a communal council and a municipal council. Agriculture is the occupation of about

one-third of the population, wheat, maize and other grains being largely produced. Wine, silk, and oil, are among the other products. The Roman Catholic is the nominal State religion, and the religion of the vast majority of the people; but after the Pope was deprived of the temporal power the Government passed many acts so framed as to make the civil government supreme, and to secure complete freedom for all creeds. The officials of the Church are appointed by the Pope, but the royal assent is necessary in the case either of a bishop or an archbishop. (See separate articles POPE and ROMAN CATHOLIC CHURCH.) Elementary education is compulsory between the ages of six and nine in most parts of the country, but the law is not rigorously enforced. There are about 50,000 public primary schools, with scholars numbering in all about 2,550,000.—**Area**, 110,646 sq. m.; **pop.** 31,667,946. **Revenue**, '98-9, £65,211,336; **expenditure**, £64,373,492; **public debt**, '99, £515,975,270; **imports**, '98, £56,671,165; **exports**, £48,927,276. See COLONIES, ETC., OF EUROPEAN POWERS, DIPLOMATIC, FOREIGN ARMIES AND FOREIGN NAVIES.

Political Parties. The peculiarity of Italian political parties at the present time is that there cannot be said to be any definite and permanent parties. There are various groups which are continually changing; but they have no fixed principles. Formerly there was a **Right** and a **Left**, the former being the party of Cavour, the monarchical and Conservative party, and the latter consisting of the followers of Mazzini, the Liberal and democratic if not Republican party. These two parties, however, have since split up into many different combinations. Signor Giolitti in '92 succeeded the Marquis di Rudini, who took office when Signor Crispi, after a long tenure of power, resigned in '91. In '94 Signor Giolitti was defeated, and the disastrous state of the country's finances led to the recall of Signor Crispi by the unanimous wish of the nation. In spite of fierce attacks upon his policy and private life, he remained in office during the year, and at the general election in '95 his supporters numbered 349, while the Opposition of all shades, Conservatives, Radicals, and Socialists, could not muster more than 159 members. The disasters which overtook the Italian forces in Erythrea (*q.v.*), in the early part of '96, however, brought about his downfall. He was succeeded by the Marquis di Rudini, who found himself to a large extent dependent upon the support of the extreme and revolutionary Radicals led by the late Signor Cavallotti. A General Election in March '97 left things very much as before, except that the Radicals, Republicans, and Socialists noticeably gained ground, and therefore strengthened their influence over the Marquis di Rudini. This influence became even greater when Signor Zanardelli and two other Radicals were given places in the Ministry (Dec. '97). In May '98, after the riots which broke out all over the country, the Marquis di Rudini re-formed his Administration again, but could not obtain a majority in the Chamber, and General Pelloux

succeeded him with a Liberal Ministry, including adherents of Giolitti, Zanardelli and Crispi, June 29th, '98. General Pelloux, in turn, was compelled to resign in May '99, and formed a new Administration, consisting, for most part, of Conservatives, a curious change which was loudly condemned by the Liberals. Baron Sonnino, though not in the Ministry, lent it his support.

History, '99. The Anglo-French agreement as to the Central Soudan and the Nile Valley, come to in **March**, occasioned some anxiety in Italy, which, looking upon Tripoli as destined in time to come into Italian occupation, saw with alarm the possibility that all the trade routes through the hinterland to Central Africa would be cut off by France. Admiral Canevaro, however, stated (**April** 24th) that both France and Great Britain had given the Government assurances that they had no designs on Tripoli, and that they would do nothing to interfere with the trade routes between Tripoli and Central Africa. The Chamber was far from being content with this; and further criticism on the abortive attempt to obtain a Chinese settlement in Sammun Bay (see **CHINA**), and on the Government's financial proposals, led to General Pelloux's resignation (**May** 3rd). He was commissioned to form a new Ministry, and with the help of Baron Sonnino and the Marquis Visconti Venosta, who took the Ministry of Foreign Affairs, he at length succeeded (14th). An International Electricity Exhibition, in celebration of the Volta centenary, was opened at Como by the King (20th). After a long wrangle in the Chamber, in which the Socialists distinguished themselves by their violent obstruction, the Public Safety Bill, introduced by the Government in February, and dealing with public meetings and the powers of the police in regard to them, with the powers of the police to dissolve associations compromising social order, with the penalties to be imposed upon newspapers for "offences of public action," and with strikes of public servants, etc., was published as a Royal decree (June 23rd). It was intended to ratify the measure by getting a vote of approval of the decree from the Chamber; but the disgraceful violence of the Socialist Deputies, who actually assaulted Baron Sonnino, led to the suspension of the sitting (30th), and then to the closing of the Session by Royal decree. The Silk and Electrical Exhibition at Como was destroyed by fire (July 9th). The Public Safety Act came into force (20th). Several Socialist Deputies were, it was said, to be charged with having upset and removed the voting urns in the Chamber on June 30th, and so obstructed the working of Parliament. The decree summoning Parliament was, however, issued (Oct. 27th); and as Parliamentary immunity is granted to Deputies from the time of such publication, it was held that the prosecution must fall through.

Italy, King of. See HUBERT I.

Ivory Coast Settlements. A portion of the colony of French Guinea (*q.v.*).

J

Jamaica. The largest of the British West India Islands, lying 90 miles south of Cuba. Its length is 144 miles, and its greatest width 49 miles. **Area** 4207 sq. miles. The island is mountainous, and a range of hills, known as the Blue Mountains, runs from east to west, rising to 7060 feet in one place. **Turk's and Caicos Islands** have been annexed to the colony, and Grand and Little Cayman are also dependencies. Their total area is about 224 sq. miles. **Capital, Kingston**, pop. 48,500, with Spanish Town (the old capital) of next importance. The principal ports are Port Royal (harbour of Kingston), Montego Bay, and Falmouth. **Exports:** sugar, rum, pineapples and various fruits, coffee, and dyewoods. The Government includes a Governor, a Legislative Assembly of 29 members, 5 official, 10 nominated by the Crown, and 14 elected, and a consultative Privy Council. **Total population** of Jamaica and dependencies, 718,368. For Ministry, etc., see **DIPLOMATIC**; and for statistics see **BRITISH EMPIRE** (table).—**History**, '99. The financial outlook of the colony was seen in **January** to be very serious, and it was estimated that at the end of March the deficit would be £172,000. A Bill to consolidate the Tariff laws, and fix a new scale of import duties so as to yield a permanent revenue of £350,000 per annum, was accordingly introduced; but this met with opposition from the elected members of the Legislature. Ultimately the Government added four to the number of nominated members of the Council (**March** 22nd) in order to carry the Bill, and the first reading was passed (**April** 5th). Popular protests were made, and an agitation for the recall of the Governor was commenced, and the extra members added to the Council were withdrawn (11th), the elected members pledging themselves to assist the Government with the measure, which ultimately became law, with slight modifications (**May** 18th). A reciprocity treaty was concluded with the United States (**July** 1st) by which a reduction of 22½ per cent. upon sugar, and 20 per cent. upon oranges and other fruits, entering American ports was granted in return for certain reductions of import duties on American products. A report upon the finances of the island, by Sir David Barbour, was published (26th), attributing the depression to the low prices prevailing for all the products of the island, and to the cessation of labour on the large works now completed. Under the Colonial Loans Act, '99, advances of £65,000 for public works, £150,000 to cover the deficit in the general revenue account, £110,000 for the completion of the railway, £88,000 for interest on railway debentures, and £40,000 for waterworks, were made to the Colony by the Imperial Government. The Secretary of the Colonies in **September** directed that in pursuance of Sir David Barbour's report an income-tax, increased stamp duties, and an increased land-tax should be imposed, in order to raise the necessary increase of revenue. He also directed the Governor to appoint a full number of nominated members of the Legislature, and keep them appointed, and also to use the power given him by the Constitution to declare measures and votes to be of paramount im-

portance when they are so considered by the Government. He further stated that the Colonial Office would in future exercise control over the finances of the colony.

James, Henry, was b. in America 1843, his father being Henry James, Esq., a well-known philosophical writer. Began the study of law, but ultimately attached himself to literature. His novels, which deal largely with American life and character, are very popular. "Princess Casamassima" ('87) fully sustained his reputation, differing from most of his others by its study of English life. Mr. James has been for many years a resident in England. His recent works, "The Reverberator," "Partial Portraits," "The Tragic Muse," "The American," a play produced at the Opera Comique (Sept. '91), "The Lesson of the Master" ('92), "The Real Thing" ('93), "Terminations" ('95), "Embarrassments," "The Other House" ('96), "The Spoils of Poynton," "What Maisie Knew" ('97), and "The Turn of the Screw" ('98), have all been successful.

James of Hereford, Lord. See under **PEERS**.

James, Rev. Dr. H. A., Head Master of Rugby, was b. at Kirkdale in Lancashire. He was educated at Abergavenny and Lincoln College, Oxford, taking a first-class in Classical Mods. '65, his B.A. with a first-class in Litteræ Humaniores '67, his M.A., St. John's College, '70, the degree of B.D. in '74, and of D.D. in '95. He was President of the Oxford Union Society in '70. He was ordained deacon '70, and priest '72. He obtained a Fellowship at St. John's College, Oxford, which he held '69-87 (being elected Honorary Fellow in '95), was tutor '71-2, assistant master at Marlborough College '72-5, head master of Rossall School '75-86, and Principal of Cheltenham College '89-95. In March '95 he was appointed to succeed Dr. Percival as head master of Rugby. From '86 to '89 he was Dean of St. Asaph, and then was appointed chaplain to the Bishop of St. Asaph.

Jameson, Leander Starr, the leader of the famous Raid on the Transvaal in '95, was b. in Edinburgh, 1853. He is a son of the late Mr. R. W. Jameson, Writer to the Signet, and was educated at London University. He took his degree as M.B. and B.Sc. in '75, and M.D. in '77. Having become associated with Mr. Rhodes in the development of South Africa, he was appointed Administrator of Rhodesia in '91, and held the position with distinction till the Raid on the Transvaal, in Dec. '95, when he was defeated at Krugersdorp. He was afterwards given up to the Imperial authorities, and in May '96 tried and sentenced to ten months' imprisonment. After seven months, however, he was released owing to ill-health. In '97 he returned to Rhodesia, and assisted in the development of the country, though not in an official capacity. He was said to be in Ladysmith in Oct. '99, but afterwards returned to England. He was made a C.B. in '94.

JAPAN.

Japan is an empire adjacent to China—from which it is separated by the Eastern Sea and the Straits of Korea—consisting of the archipelago

of Nippon, which includes four large islands, Yesso, Honshiu, Kiushiu, and Shikoku, together with Formosa and the Pescadores, ceded by China in '95, and nearly 4000 smaller islands. Its area is about 147,655 sq. m., and the population 42,708,264, not including Formosa (area 13,500 sq. m., pop. 2,000,000) and the Pescadores (area 49 sq. m.; pop. 45,000). Its history is almost as ancient as that of China, the present Mikado, Mutsu Hito (*q.v.*), being the representative of a dynasty which claims to have possessed the throne since B.C. 660. The country was, prior to '89, an absolute monarchy, but in that year a new constitution was promulgated. In the Emperor are vested the executive power with the advice of his ministers, and the legislative power with the consent of the Diet. The Diet is composed of a House of Peers and a House of Representatives. The House of Peers numbers about 300, and consists of (a) Peers elected for life, including: (1) male members of the Imperial family above 20 years of age; (2) princes and marquises above 25 years of age; (3) persons nominated by the Emperor for State services or for their learning; and (b) Peers elected for 7 years, including: (1) counts, viscounts, and barons above 25, to the number of one-fifth of each order, elected by the respective orders; (2) persons elected indirectly by the residents in the various districts who pay the highest taxes. In the House of Representatives there are 300 members, elected for 4 years by male citizens over 25 paying national taxes of 15 yen per annum who have resided in their districts for one year at least. Each member is paid about 800 yen (£150) for each session. For local administration the country is divided into 46 districts, each with a governor and an elected assembly. The districts are subdivided into cities and counties. In religious matters absolute freedom is allowed, subject to the preservation of peace and order. The chief forms of religion, however, are Shintoism and Buddhism. Elementary education is compulsory. There are about 27,000 elementary schools, and 3,700,000 pupils, while high schools and technical schools are rapidly increasing in number. There are about 1,300,000,000 tons of workable coal in the empire, one-half of which was found in Yesso, which island also contains large deposits of sulphur. The land is largely held by peasant proprietors, and the chief products are rice and cereals, tea, sugar, and silk, while manufacturers are improving and increasing. By treaties concluded with Great Britain and other European Powers in '94, the right of the Japanese to frame their own Customs policy was acknowledged, though provisional arrangements were made for a period of twelve years. It was also agreed that foreign jurisdiction in the treaty ports should be abolished at the end of five years—*i.e.* in '99—and in return Japan agreed to throw all the country open to British traders, instead of only the treaty ports. Revenue, '98, £25,503,961; expenditure, £24,052,000; imports, '98, £28,304,743; exports, £16,920,694; foreign debt, '97, £43,725,000; internal debt, '97, £41,875,000. Of the total trade of £45,250,000, nearly £17,500,000 is with Great Britain, America coming next with nearly £9,000,000. For Ministry see DIPLOMACY; for Army and Navy see FOREIGN ARMIES and FOREIGN NAVIES.

Political Parties.—When the new consti-

tution came into force and the Diet assembled in 1890, the Government was constituted mainly of statesmen drawn from two great clans, the Satsuma and Choshin clans. But the representatives elected to the Diet consisted for the most part of men drawn from two other and rival clans—the Hizen clan under Count Okuma, and the Tosa clan under Count Itagaki. Count Okuma formed and led the Progressive party, and Count Itagaki the Liberal party, both of which advocated the principle of party government, though they would not combine to secure it. This the Government would not accept, and so they were continually being defeated in the House, which they as often dissolved. Eventually the Government tried a coalition in '95 with the Liberals, the Marquis Ito being Premier; and then for a time, especially during the war with China, the Opposition was quiescent. But after the war, difficulties again manifested themselves, and in '97 Count Matsukata formed an administration with the aid of the Progressives. In January '98 the Marquis Ito returned to power, but this time he attempted no coalition, and in June he was defeated and the House was dissolved. At this juncture the Liberals and Progressives at last joined their forces, and the Marquis Ito at once resigned, and advised the Emperor to accept the principle of party government and to summon Counts Okuma and Itagaki to form a Ministry. This he did, and the new Ministry was accordingly formed with Count Okuma as Premier. The Liberals and Progressives combined commanded about 200 votes in the House, out of 300. The experiment, however, failed, and the Marquis Yamagata formed a Cabinet, independent of parties, in Nov. '98.

History. '99.—Count Matsukata, the Finance Minister, in his Budget statement, estimated the expenditure for the year at 226,344,700 yen, and the revenue at only 188,738,400 yen, showing a deficit of over 37½ million yen. To meet this he proposed an increase of the land-tax and the tax on *saké*, or rice beer, the national beverage; also amendments of the income and registration taxes. These, he thought, would give an immediate increase of nearly 34 million yen, and of nearly 45 million yen the next year. The deficit caused during the first year he proposed to take from the Chinese war indemnity. The revised treaties came into operation (July 17th), and the country was thrown open to European traders. France and Austria, however, retained their consular jurisdiction till Aug. 4th. On the last day of June the Emperor issued a rescript referring to this event as giving him heartfelt gratification, and enjoining on his subjects, "in compliance with the great policy of opening the country, to unite with one heart to associate cordially with the peoples from afar." He charged his Ministers and officials to "observe the utmost circumspection in the management of affairs, to the end that subjects and strangers alike may enjoy equal privileges and advantages." Ordinances were afterwards issued declaring that all religions would be given equal treatment and equal protection, and the chief Buddhist priests were exhorted to warn subordinates against any attempt to oppose Christianity by forcible methods. The *Times* correspondent at Seoul, writing on Sept. 23rd, pointed out that Japan had a vital interest, both strategical and commercial, in

Korea, as furnishing her both with a market and with a means of entrance into China, the principal market for her manufactures. He foreshadowed a struggle at some time, sooner or later, between Japan and Russia for the possession of Korea.

Japan, Emperor of. See MUTSU HITO.

Java. An island of the Asiatic Archipelago, the chief seat of Dutch power in the East Indies. Capital, **Batavia**, 500,000. Other chief towns, Samarang and Sourabaya. Exports: coffee, sugar, tea, rice, indigo, pepper, tobacco, etc. Divided, with the adjacent island of Madura, into 22 Residencies, each administered by a Resident and his subordinates under the Governor-General of Dutch East India. Land is government property, except in the west, and is let on hereditary lease. Most of the coffee plantations are directly under Government management, the natives cultivating coffee instead of paying taxes. The authorities take the whole of the produce at the fixed price of 15 florins (£1 5s.) for every picul (133½ lb.). This system still obtains in part, but a poll tax of one florin is also imposed on the natives. Area of Java and Madura 59,554 sq. m.; pop. about 25,500,000. See EAST INDIA, DUTCH, and DIPLOMATIC.

Jebb, Professor M.P. See under COMMONS.

Jersey. One of the Channel Islands (*q.v.*).

Jeune, Right Hon. Sir Francis Henry, K.C.B., is the eldest son of a former Bishop of Peterborough, and was b. in 1843. Ed. at Harrow, elected to a scholarship at Balliol Coll., Oxford, where he obtained 1st Class in Classical Mods. '63, and 1st class in *Lit. Hum.* two years later. He also was successful in obtaining the Stanhope prize in '63, and the Arnold prize in '67. Fellow of Hertford Coll. '74, Hon. Fellow '82. He was called to the bar of the Inner Temple '68, and took silk in '88. In connection with the civil action of the Tichborne claimant he acted as junior counsel. In ecclesiastical law he long enjoyed a considerable reputation, and appeared in the Lincoln case in '90. Succeeded Lord Hannen, in Jan. '91, as Judge of the Probate, Divorce, and Admiralty Division. Was knighted on his accession to the judicial bench. On the decease of Sir C. P. Butt, in '92, Sir Francis succeeded him as President of the Probate Division, and was made a Privy Councillor. He was afterwards appointed Judge-Advocate-General, and was made K.C.B. in '97 for services in that office. Lady Jeune has long been an energetic philanthropist, and, with Sir Francis, has occupied a noteworthy position in the social life of London. She published "Lesser Questions," a volume of essays, in '94. Address: Arlington Manor, Newbury.

Jews. The numbers of Jews in the various countries of Europe, according to the "Jewish Year Book" are as follows: Russia, 4,500,000; Austria-Hungary, 1,860,000; Germany, 567,000; Roumania, 300,000; Turkey, (about) 120,000; Holland, 97,000; France, 72,000; Great Britain and Ireland, 150,000; Italy, 50,000; Switzerland, 9000; Servia, 4652; Greece, 5792; Denmark, 4000; Sweden and Norway, 4300. Total in Europe, about 7,750,000. Outside Europe no satisfactory enumeration is possible, but it is probable that Asia contains 300,000; Africa, 350,000; the Americas, 942,000; and Australia, 15,000. There are probably about 17,000,000

Jews in existence at the present date, and of late years the number living in Palestine has noticeably increased. The Jewish colonies in the Holy Land are flourishing, and the Jews are returning to the land of their ancestors as tillers of the soil. It was estimated in '99 that there were 40,000 Jews in the country. A movement for founding a Jewish State in Palestine has been started by Dr. Theodor Herzl, of Vienna. The number of Jews in London is estimated at 65,000, and in other parts of Great Britain and Ireland at 85,000. Until very recently Jews were restricted in their rights throughout the world; and those of eastern Europe, Africa, and the East still labour under many disabilities, which it is the object of the "Alliance Israelite" of Paris, and of similar societies in Germany, Austria, and England (Anglo-Jewish Association, 85, London Wall, E.C.), to remove. The persecution of the Jews in Russia has become less acute, but the overcrowding within the pale of Jewish settlement (owing to expulsions from other parts of Russia) causes a high rate of mortality, beyond all previous modern experience among Jews. In England, full emancipation was granted to the Jews in '58. They possess a special Jewish Board of Guardians (Middlesex Street, Bishopsgate), which provides for indigent Jews, and expended £45,523 in relief during '97 to 4366 applicants, a large orphan asylum at West Norwood, in addition to many other charities, and there are Jewish wards in several hospitals. There are six large Jewish elementary schools in London, the principal being the Jews' Free School, Bell Lane, Spitalfields, the largest and one of the most successful elementary schools in the world. Similar schools and charities are connected with the principal provincial congregations. The most important are those of Liverpool, Manchester, Birmingham, Leeds, Glasgow, Newcastle, Hull, and Sheffield. The spiritual wants of Jews are provided for in the East-End by a number of *hebras* or minor congregations, which have been united (Federation of Synagogues); while fourteen of the larger synagogues are organised by the United Synagogue (2, Charlotte Street, Portland Place, W.). Ministers for these are trained at the Jews' College (Tavistock House, Tavistock Square), which has a very extensive library of works dealing with Jewish subjects. Another library specially noteworthy for Hebrew MSS. is situated at the Beth Hamidrash (St. James' Place, E.C.), where the sittings of the Beth Din, or ecclesiastical tribunal, are held, at which points of Jewish law are decided. Ecclesiastical matters are under the control of the Chief Rabbi, Dr. Hermann Adler (*q.v.*). The mandates of the Chief Rabbi are only binding on the so-called Orthodox Jews, while there are "Reform" congregations at Upper Berkeley Street, London, Manchester and Bradford. There has been a marked *rapprochement* of recent years between these two bodies. There are, besides, some 3000 Spanish and Portuguese Jews (*Sephardim*) in London, who are under the spiritual charge of the Rev. Dr. Gaster and whose ritual slightly differs from that of the more numerous German and Polish Jews (*Ashkenazim*). As a religious term "Jew" has nowadays the very vaguest connotation, ranging from the superstition of the Chassidim of Russia and Galicia to the advanced agnosticism of the Society of Ethical Culture in New York. Jews

have some special enactments connected with the form and registration of their marriages, modifications of the Factory Acts to suit their Sabbath, etc. These, and other matters likely to affect them, are looked after by the **Jewish Board of Deputies** (29, Finsbury Circus; Secretary, Charles H. L. Emanuel, M.A.). The chief Jewish weekly is *The Jewish Chronicle* (2, Finsbury Square, E.C. : Publisher, Asher I. Myers).

Jibutl. See FRENCH SOMALILAND.

Joachim, Joseph, the distinguished violinist, was born near Presburg, in Hungary, in 1831. Already famous as a youthful prodigy, he went to Leipzig in '43, to the Conservatoire previously founded by Mendelssohn, who saw his genius and encouraged him. He first came to London in '44, and has since annually visited us. He has been principal violinist of the **Monday and Saturday Popular Concerts** from their very commencement. In '69 he became the head of the newly developed Academy of Music at Berlin. He has written several works for his instrument and the orchestra, the chief being the Hungarian Concerto. The University of Cambridge conferred on him the degree of Mus. Doc. in '77 and he was afterwards given the Hon. D.C.L. of Oxford. In celebration of the fiftieth anniversary of his first appearance in public, Herr Joachim was, on March 17th, '89, presented with a magnificent violin purchased by subscribers to a fund of which the Duke of Edinburgh was President.

Johnston, Sir Henry H., K.C.B., Commissioner of the Uganda Protectorate, was born in London, June 12th, 1858, and educated at Stockwell Grammar School and King's College, London. After studying painting for some time at the Royal Academy he travelled a good deal, especially in Africa, and was made British Vice-Consul in the Cameroons in '85. Thence he was transferred to the Niger coast and to Portuguese East Africa. He took a leading part in the expedition to Lakes Nyassa and Tanganyika which resulted in the founding of the British Central Africa Protectorate, of which he was appointed Commissioner and Consul-General in '91. His record there was an excellent one. He was appointed Consul-General of Tunis in '97, and in '99 succeeded Mr. Berkeley in the Uganda Protectorate.

JOINT STOCK COMPANIES.

A Parliamentary return is annually issued giving full particulars as to all joint stock companies. It denotes whether the companies are limited or unlimited, and also the number of shareholders in each of the said companies at the date of the last return, and whether still in operation or being wound up; the total number having their registered offices in the city of London, or within five miles of the General Post Office; and the total number and the paid-up capital of all registered companies which are believed to be carrying on business at the present time. This return can be obtained from Messrs. Eyre & Spottiswoode, East Harding Street, E.C., and 32, Abingdon Street, Westminster. The following table shows the recent progress of the joint stock company movement:—

DATE.	TOTAL.	
	No. of Cos.	Paid up Capital.
1887 . . .	11,001	£611,430,371
1888 . . .	11,968	671,870,184
1889 . . .	13,323	775,139,533
1890 . . .	14,873	891,504,112
1891 . . .	16,173	989,283,634
1892 . . .	17,555	1,013,119,350
1893 . . .	18,361	1,035,029,835
1894 . . .	19,430	1,062,733,821
1895 . . .	21,223	1,145,402,993
1896 . . .	23,728	1,285,042,021
1897 . . .	25,267	1,383,593,162

During the year ending Dec. 31st, '97, there were registered in England 4750 companies, 147 in Ireland and 332 in Scotland, or a total of 5229, of which 5148 were new companies with limited liability, 8 were old limited companies, 1 was old unlimited, 65 were limited by guarantee, and 7 were mutual. The nominal capital of the 5229 companies registered during the year was £291,117,559.

Jones, Henry Arthur, the dramatist, was b. Sept. 20th, 1851, at Grandborough, Bucks. His early dramatic attempts included "Only Round the Corner," "A Clerical Error," "His Wife," and "A Bed of Roses." In Nov. '82 Mr. Wilson Barrett produced "**The Silver King**" at the Princess's Theatre, and this greatly increased Mr. Jones's reputation. "Breaking a Butterfly" and "Chatterton" ('84), "Saints and Sinners," "Hoodman Blind," "The Lord Harry," "The Noble Vagabond," "Hard Hit," and "Heart of Hearts," which followed, testify to the energy with which he prosecuted his dramatic labours. "Wealth," at the Haymarket in April '89, was followed by "**The Middleman**" (Aug. '89). A play of daring originality, called "**Judah**" ('90), and "**The Dancing Girl**" ('91), added greatly to the estimation in which he was held. In Nov. '92 "The Crusaders" was produced at the Avenue Theatre; "The Tempter," Mr. Jones's first essay in blank verse, at the Haymarket in '93, "The Masqueraders" at the St. James's, and "The Case of Rebellious Susan" at the Criterion in '94, "The Triumph of the Philistines" at the St. James's in '95, "Michael and his Lost Angel" at the Lyceum, and "The Rogue's Comedy" at the Garrick in '96, "The Physician" and "The Liars" at the Criterion in '97, "The Manœuvres of Jane" at the Haymarket in Oct. '98, "Carnac Sahib" at Her Majesty's in April '99. A book on "The Renaissance of the Drama" was published by him during '95, and nearly all his plays are published in book form. Address: Townshend House, North Gate, Regent's Park.

Joubert, Petrus Jacobus, Commander-in-Chief of the Boer army, was b. about 1831. It was by him that Sir George Pomeroy Colley was defeated at Majuba Hill during the war of '81-2. In '93, and again in '98, General Joubert stood for the Presidency of the Transvaal Republic, but was easily defeated by President Kruger. The surrender of Dr. Jameson in '96 was mainly due to him. He is an able general and military tactician, believing in his men "lying low" and concealing themselves behind any form of natural shelter available, and relying on their marksmanship to keep the enemy at a respectful distance. But he is a

humane man, as his treatment of prisoners and the wounded, and his message to Sir George White, after the disaster at Ladysmith, offering "safe conduct" to doctors and ambulance to remove the British wounded, show.

Journalists, The Institute of, was established on March 9th, 1889, by conversion of the National Association of Journalists, a professional society founded in '84, and incorporated by royal charter in March '90. The Charter, by which journalism is formally constituted one of the professions, directs and declares that the members of the Institute "shall for ever hereafter be, by virtue of these presents, one body politic and corporate." The objects of the Institute include the devising of examination or other practical tests for candidates for membership; "the promotion of whatever may tend to the elevation of the status and the improvement of the qualifications of all members of the journalistic profession"; ascertainment, and where necessary amendment, of the law and practice affecting the discharge by journalists of their professional duties, and the promotion by all reasonable means of the interests of journalists and journalism. Care has been exercised in drawing up the constitution of the Institute to guard against the possibility of its operating at any future time in such a way as to exclude from the work of the newspaper press any honest and capable service, from whatsoever source it may come; and the decentralisation of authority which attends the system of organisation by branches (called "Districts" and "Sub-districts") is regarded as an efficient safeguard against that possibility. Although the central office and committee rooms are in London, there is no fixed or localised centre of authority; the council meetings and the annual conference both being movable, and held from time to time in the chief towns throughout the country. At the date of conversion into the Institute there were about 1200 members, since increased to over 3300, organised in 54 districts and sub-districts, and including nearly all the well-known journalists of London and the provinces (including Scotland and Ireland), and all the most distinguished foreign correspondents. The Charter, moreover, confers upon the Institute power to affiliate branches in India and the colonies and in foreign countries. The annual conference in '99 was held in St. George's Hall, Liverpool. Sir James Henderson, M.A., was elected President for '99-1900. The Vice-Presidents are: Mr. A. W. à Beckett, F.J.I., London; Mr. Walter Biggs, Manchester; Mr. W. S. Cameron, F.J.I., Leeds; Mr. Sam S. Campion, J.P., F.J.I., Northampton; Mr. F. W. Dimbleby, J.P., F.J.I., Richmond; Mr. J. W. Duncan, Aberdeen; Mr. Samuel J. Fisher, F.J.I., London; Mr. J. P. Hayden, M.P., Mullingar; Mr. J. S. Macartney, B.A., Dublin; Mr. Joseph Mason, Liverpool; Mr. C. H. Mate, F.J.I., Bournemouth; Mr. George Norman, Cheltenham; Mr. Charles Slaughter, F.J.I., Reading; Mr. H. W. Strong, Oxford; Mr. Joseph Watson, F.J.I., London. Hon. Treasurer, Mr. Frank Lloyd. Legal Advisers, Mr. J. R. Fisher, B.A., Hon. Counsel; and Sir Albert K. Rolit, M.P., Hon. Solicitor; Mr. L. Basil Thomas, Solicitor. Auditors, Mr. Arthur J. Cook and Mr. J. H. Warden. Hon. Secretaries, Mr. G. H. Kynaston and Mr. A. W. à Beckett, Secretary of the

Institute, Herbert Cornish. Central Office, 78, Fleet St., London, E.C.

Judges. The following is a list of judges of the Supreme Court of Judicature:—Lord High Chancellor: Lord Halsbury. **Lords of Appeal in Ordinary:** Lord Macnaghten, Lord Morris, Lord Davey, Lord Robertson. **Court of Appeal:** The Lord Chancellor, Lord Russell (Lord Chief Justice of England), Sir N. Lindley (Master of the Rolls), Sir F. H. Jeune (President of the Probate Division), Sir A. L. Smith, Sir J. Rigby, Sir R. Romer, Sir R. H. Collins, and Sir R. Vaughan Williams. **Chancery Division:** Lord Chancellor, Sir F. North, Sir J. Stirling, Sir A. Kekewich, Sir E. W. Byrne, Sir H. H. Cozens Hardy, and Sir G. Farwell. **Queen's Bench Division:** Lord Russell, Sir J. C. Mathew, Sir J. C. Day, Sir A. Wills, Sir W. Grantham, Sir J. C. Lawrence, Sir R. S. Wright, Sir G. Bruce, Sir W. R. Kennedy, Sir E. Ridley, Sir J. C. Bigham, Sir C. J. Darling, Sir A. M. Channell, Sir W. G. F. Phillimore, Bart., and Sir T. T. Bucknill. **Probate, Divorce and Admiralty Division:** Sir F. H. Jeune (President), and Sir J. G. Barnes. **Court of Arches:** Sir Arthur Charles. **Consistory Court:** Mr. T. H. Tristram, D.C.L. **Bankruptcy Court:** Sir R. S. Wright. **Railway and Canal Commission:** Mr. Justice Wright, Lord Trayner, Mr. Justice Murphy, Sir F. Peel, and Viscount Cobham.

Judicial Separation. The law and practice of judicial separation is founded on that of the old ecclesiastical courts. It was in their power to determine all matrimonial causes, to grant a divorce *a mensâ et thoro*, releasing the husband and wife from the duty of cohabitation, but preventing them both from marrying again. By the "Matrimonial Causes Act, 1857," it was provided that such divorces should no more be granted, but that in every case in which a decree might have been made for a divorce *a mensâ et thoro*, a decree might thenceforwards be made for a judicial separation. A decree for judicial separation may be obtained either by the husband or by the wife on the ground of adultery or cruelty, or desertion without cause for two years or upwards, or non-compliance with an order for the restitution of conjugal rights. The court has power to order such alimony for the wife, and to make such provision for the custody, maintenance, and education of the children of the marriage, as it may think proper; and can give the custody to the guilty party if for the benefit of the children. The separation may be ended at any moment by the deliberate consent of the parties separated to a renewal of cohabitation. What is equivalent to a judicial separation can now be granted to a wife only by magistrates in petty sessions in many cases, by virtue of the Summary Jurisdiction Act, '95, but alimony under this Act is restricted to £2 a week. The relief may be granted to any married woman whose husband shall have been convicted summarily of an aggravated assault upon her, or whose husband shall have been convicted of an assault upon her and sentenced to pay a fine of more than five pounds or to a term of imprisonment exceeding two months, or whose husband shall have deserted her, or having been guilty of persistent cruelty to her, or willful neglect to provide reasonable maintenance for her or her infant children, shall by such cruelty or neglect have caused her to leave and live separately and apart from him. The court that can grant the separation is

a court of summary jurisdiction acting within the district in which any such conviction has taken place, or in which the cause of complaint shall have arisen, or in case of conviction on indictment the convicting court. The court, besides granting what is in effect a judicial separation, may make provision that the legal custody of any children of the marriage, while under the age of sixteen years, be committed to the wife, and that the husband shall pay to the applicant personally, or for her use to any officer of the court or third person on her behalf, such weekly sum not exceeding two pounds as the court shall, having regard to the means both of the husband and wife, consider reasonable. The court may also provide for payment by the applicant or the husband, or both of them, of the costs of the court and such reasonable costs of either of the parties as the court may think fit. No orders can be made under this Act on the application of a married woman if it is proved that such married woman has committed an

act of adultery: unless the husband has condoned, or connived at, or by his wilful neglect or misconduct condoned to such act of adultery. The order may be varied from time to time on the application of the husband or wife and the allowance increased or diminished, and the order shall be discharged if the woman upon whose application it was made voluntarily resumes cohabitation with her husband, or commits an act of adultery. The payment of any sum of money directed to be paid by an order under the Act may be enforced in the same manner as the payment of money is enforced under an order of affiliation—that is, by warrant issued for the arrest of the husband by the magistrates of the district in which the woman resides. The magistrates may refuse to deal with any case that they think would be more fittingly dealt with by the Divorce Court, and there is an appeal to the Divorce Court. See DIVORCE and RESTITUTION OF CONJUGAL RIGHTS.

Jute. See TRADE, '99.

K

Kaiser Wilhelm's Land. See NEW GUINEA.
Kashmir (N.-W. India). One of the native states of India. **Area** about 81,000 sq. m.; **pop.** about 2,500,000. The large majority of the population are Mahomedans. According to a report published in Nov. '99, an electric railway is to be built between Tummu and Srinagar, a distance of about 180 miles. The current will be generated by water-power from the Chenab river, the quantity available being estimated at 100 horse-power. For Resident see DIPLOMATIC.

Keewatin. A Canadian district under the jurisdiction of the Government of Manitoba. It adjoins that province on the north between the 95th and 100th meridians W. long., and extends northwards; Hudson Bay forms partly its eastern boundary. **Area** about 280,000 sq. miles; **pop.** about 5000 Indians and whites. Its mineral wealth is great, including copper and silver. See MANITOBA.

Kekewich, Sir George, Secretary to the Education Department, Whitehall, is 3rd son of the late Mr. Samuel Trehawke Kekewich, M.P., and younger brother of Mr. Justice Kekewich, one of the judges of the Chancery Division. Born 1842; educated at Eton and Oxford (Balliol), where he took a first-class in Classical Mods. and second in *Lit. Hum.* Appointed an examiner to the Education Department '67, senior examiner '71, and secretary '90, and has since been created a K.C.B. In '97 he was made an honorary D.C.L. of Durham.

Kelvin, Lord. See under PEERAGE.

Kew Gardens. First formed as a Botanic Garden by the Princess Augusta of Saxe-Gotha, Dowager Princess of Wales, in 1759. Treasury Committee to consider the management appointed 1838; report presented '40; gardens transferred to Commissioners of Woods and Forests '40. Botanic Garden opened to the public free '41; Arboretum '47. Palm-house built '48; Temperate house '62-69; Jodrell Laboratory for research '76; North (Picture) Gallery

'82. The Gardens are in close connection with the Colonial Office, and serve as an advanced horticultural school, in which special attention is given to the training of gardeners for colonial service. Some sixty men trained at Kew are now officially employed in different parts of the Empire. **Open free** to the public every weekday from noon, and on Sunday from 1 p.m. Chief attractions: conservatories, museums, flower gardens, and collections of trees and shrubs. **Director,** Sir W. T. Thiselton-Dyer, K.C.M.G., C.I.E., F.R.S.

Kew Observatory, Old Deer Park, Richmond, Surrey. **Superintendent,** C. Chree, Sc.D., F.R.S. Was built by George III., in preparation for the transit of Venus in 1769, to serve as a substitute for an older observatory connected with Kew Palace—associated historically with the discovery of aberration and nutation—which had fallen into disrepair. In 1843, the Government having determined to discontinue its maintenance, the building was handed over to the British Association for the Advancement of Science, under the title of the Kew Observatory. The connection between the British Association and the Kew Observatory lasted until '71. Mr. J. P. Gassiot, chairman of the Kew committee, then made the munificent offer to give an endowment of £10,000 if the Royal Society would nominate a committee who should have entire control over the management of the observatory, subject to the condition that magnetic and meteorological observations should be continued in perpetuity. This offer was accepted, and the use of the Kew Observatory was granted by Her Majesty at a nominal rent to the Royal Society. It possesses a valuable collection of verifying apparatus and standard instruments, many of which have been purchased by grants made by the Royal Society and the British Association. In addition to its observational work in magnetism, electricity and meteorology, the observatory has attained a high reputation

at home and abroad for the trustworthiness of its verifications and for its many services to experimenters. It is subsidised as the central station of the Meteorological Office for their system of self-recording observations; it serves as a place where new instruments intended for other observatories can be tested beforehand, as a school where intending observers can be practically trained, and as an experimental laboratory where the efficiency of new designs of meteorological instruments may be thoroughly tried. A large number of thermometers, barometers, magnetic instruments, sextants, watches, chronometers, telescopes, and a variety of other forms of apparatus, are tested annually, suitable fees being charged to defray the cost of the examination. At the end of '99 the observatory was incorporated with the **National Physical Laboratory** (*q.v.*).

K.G. See **GARTER, ORDER OF THE.**

Khiva. A state in Central Asia lying to the south of the Sea of Aral, and bounded on the east by the Oxus and on the south and west by Transcaspiia. It has been subject to Russia for about two hundred years, but in '72 it became definitely a Russian vassal state. The reigning Khan is Seyd Mahomed Rahim, who succeeded in '65. The inhabitants are Mahomedan Sunnis. **Area**, 22,320 sq. m.; **pop.** 700,000. The chief products are silk and cotton. See **TURKESSTAN.**

Kiao-Chau, Germany's new possession in the province of Shantung, was occupied by her in Nov. '97, and formally ceded to her on a 99 years' lease by China in Jan. '98. The territory conceded with the town stretches about 160 miles along the coast, and a neutral zone surrounds the district and the bay. Area of the protectorate (exclusive of the bay) about 120 sq. miles; **pop.** about 60,000. A dock is being built, and the place is to be made a fortified coaling station, though for commercial purposes the port is to be declared free. Railways are being constructed inland to Tsi-nan-fu and Ichow. The protectorate is administered under the German navy department by a governor. See **CHINA** (map).

Kimberley. The name of the capital town of the province of Griqualand West, in Cape Colony, which town is the centre of the diamond diggings. On the outbreak of war with the Transvaal it was at once invested by the Boers, and Mr. Cecil Rhodes was one of those who were shut up in the town. But it made a gallant resistance and was (Nov. 28th) on the point of being relieved by Lord Methuen. See **CAPE COLONY** and **TRANSVAAL.** Also the name of a gold district of Western Australia. See **GOLD FIELDS** and **PRODUCTION.**

King of Arms. See **GARTER KING OF ARMS.**

King's College, London. Established by royal charter Aug. 14th, 1829, opened '31; charter annulled by Act of Parliament May 19th, '82, and College re-incorporated for the purpose of "giving instruction in literature, science, and the doctrines and duties of Christianity, as the same are inculcated by the Church of England." The visitor is the Archbishop of Canterbury, and among the **perpetual governors** are the Lord Chancellor, the Home Secretary, the Lord Mayor of London, and the Lord Chief Justice of England. The Council also comprises twenty-four elected members. There are eight **faculties** and **departments** in the College—viz., theology, literature, science, engineer-

ing, medicine, ladies', civil service, and the school. To students who have acquired a certain degree of proficiency it grants, under authority of its Act of Parliament, the diploma of "Associate of King's College," to which is attached the privilege of free admission to all the classes in the department from which they have been elected, as also the use of the college libraries and museums. Under the **conscience clause**, adopted by the Council in '96, students in all faculties, except theology, may claim, on conscientious grounds, exemption from attendance at chapel and at religious instruction, nor does such exemption debar them from any associateship, scholarship, prize, or other privilege of the College. The associates of the **theological department** in Holy Orders wear a distinctive *hood*—viz., black poplin, edged on the outside with a quarter of an inch, and on the inside with one inch, of mauve silk. The **ladies' department** is conducted in Kensington Square; certificates of proficiency are granted on passing the examinations, after a regular attendance of three or more terms. The students of the **evening classes**, which are held in each faculty, from October to March and from April to June, receive certificates. The **civil service department**, to which is attached the Strand School, prepares for the excise, customs, post office, the navy, and other examinations; women are also prepared. The whole college is under the supervision of the **Principal**, Rev. Dr. Archibald Robertson. Students are either matriculated or non-matriculated. The former are required to attend the full prescribed course in each faculty, and are eligible for the Associateship; the latter attend only such classes as they may select. In the term preceding the annual report issued in May '99, there were 102 students in theology (53 matriculated), 206 in arts and laws (50 matriculated), 475 in science and engineering (84 matriculated), 151 in medicine (105 matriculated), also 381 ladies. In addition to the above 1315 students, 1100 attended the lectures on Banking, 1642 were in the Civil Service classes, 228 boys attended the school, now removed to Wimbledon-Common: total under education, 4285.

Kingston, Rt. Hon. Charles Cameron, P.C., Q.C., D.C.L., Premier and Attorney-General of South Australia. He was b. at Adelaide Oct. 22nd, 1850, and is the youngest son of the late Sir George Strickland Kingston, who was for nearly twenty years Speaker of the South Australian House of Assembly. Educated at the Adelaide Educational Institution. On leaving school he was articled to Mr. (now the Rt. Hon.) Samuel James Way, Lieut.-Governor and Chief Justice of the Province, admitted to the bar '73, and appointed Q.C. '89. In '81 he was returned for West Adelaide, which he has represented ever since, having been five times re-elected. He has been Attorney-General three times, and once Chief Secretary. He formed the present Administration in June '93. He is an advanced Liberal in politics, and has carried the extension of the franchise to women, the establishment of the State Bank of South Australia, factory legislation, passed a scheme of industrial conciliation, and introduced the progressive system into land and income taxation and death duties. He has consistently advocated Australian federation, and was chosen President of the National Australasian Federal

Convention which sat in Adelaide, Sydney, and Melbourne in '97-8, and which framed the Bill to establish the Commonwealth of Australia. Mr. Kingston visited England with the other colonial premiers on the occasion of Her Majesty's Diamond Jubilee, June '97. Address: Adelaide, South Australia.

Kipling, Rudyard, was b. in Bombay 1865, and is the son of Mr. G. Lockwood Kipling, C.I.E. He was educated in England, and in '82 he went out to India and joined the staff of the *Civil and Military Gazette*, Lahore, for which paper his earlier tales were written. He has depicted Anglo-Indian and military life in "Soldiers Three," "Black and White," "Plain Tales from the Hills," "Story of the Gadsbys," "Life's Handicap," etc. "The Naulakha," published in '91, and written in collaboration with Wolcott Balestier, is not of such high merit as the work that is all his own. "Many Inventions," a collection of stories, appeared during '93, and a good deal of verse in various magazines. In '94 "The Jungle Book" was published, followed in '95 by "The Second Jungle Book." His first book of verse, "Barrack Room Ballads," appeared in '92, and in '96 another volume, "The Seven Seas." In '97 he published "Captains Courageous," in '98 "The Day's Work," and in '99 "Stalky & Co." A severe illness led to a remarkable manifestation of world-wide sympathy with him in the early part of '99. Later in the year he published two poems, one on the Transvaal crisis, and the other on behalf of the fund for the dependants of soldiers sent to fight in South Africa.

Kitchener of Khartoum, Lord. See under **PEERS**.

Klondike. See **NORTH-WEST TERRITORIES**.

KNIGHTS.

In modern days knighthoods are conferred as a mark of the Sovereign's esteem, or as a reward for services of any kind, military or civil. They are bestowed by the Sovereign, or the Lord Lieutenant of Ireland as representing her, or by letters patent. The Royal Orders of Knighthood are: the Garter, the Thistle, St. Patrick, the Bath, St. Michael and St. George, Star of India, the Indian Empire, and the Victorian Order (see respective headings). Knights not belonging to any of these orders are termed knights bachelors. See **ADDRESS, FORMS OF**.

The knighthoods conferred and promotions made Nov. '98-Nov. '99, are as follows. The office or rank given after several of the names was that held at the time the dignity was conferred, and some changes in this respect may have taken place since.

Knox, Sir Ralph Henry, K.C.B., Permanent Under-Secretary for War, is a son of the late Robert Knox, Esq., at one time editor of the *Morning Herald*. He was b. 1836, and ed. at Trinity College, Dublin, entering the War Office in '56. He was Accountant-General '82-'95, Assistant Financial Secretary '95-'97, and has since '97 been Permanent Under-Secretary. In '95 he was made K.C.B. He claimed for the War Office during '99 that, by the rapid mobilisation of the troops ordered for service

in South Africa, it had refuted many of the criticisms on its methods, and that the short service system, in particular, was justified by the splendid response of the Reserves. Address: 1, Trouville Road, Clapham Park, S.W.

KOREA.

A country embracing the peninsula lying between the Yellow Sea and the Sea of Japan, under Li Hi, who succeeded to the throne in 1864, and assumed the title of Emperor in '97. The existing dynasty was founded in 1392. Area about 82,000 sq. m., and population estimated at about 10,550,000. Capital, Seoul, pop. 220,000. Until '94 China was the suzerain of Korea, and directed her foreign policy. But so many abuses prevailed under this system, that in June '94 Japan stepped in and proposed various reforms, which it was suggested should be jointly carried out by China and Japan. China refused this offer, and eventually hostilities commenced, with the result that the Chinese were driven out of Korea, and a treaty of alliance with Japan was signed in Aug. '94. On the conclusion of the war in '95, China relinquished her suzerainty, and the independence of Korea was acknowledged. Affairs remained in a very disturbed condition, however, during '95. Japan professed to desire to leave the country as soon as the Korean Government could maintain order, but troops were stationed there to protect the Japanese Consulates and subjects. These were afterwards withdrawn, save for a small Embassy guard and detachment to protect the Japanese settlements at Seoul, Fusan, and Gensan. The influence of Russia later on seemed to be in the ascendant, but only for a time, the Japanese having too firm a hold in the country to be easily shaken off. There are small detachments of Russian troops, however, for the protection of the Russian Legation and Consulate. There is a Cabinet consisting of eight Ministers, whose acts must be ratified by the Emperor. For local administration the country is divided into 13 provinces, and these are further divided into 339 districts. The Chief Commissioner of Customs is a British subject, and though there was an attempt to replace him by a Russian in '97, it failed. Very little is known of the interior, either as to the people or the nature of the soil; but rice, millet, cotton, hemp, tobacco, and many fruits are grown on the fertile territory skirting the sea, and the people are similar in their habits and customs to the Chinese on the neighbouring mainland. The country is now being opened up in various directions by railways. The foreign commerce is carried on at the three **Treaty Ports** of Chemulpo, Fusan, and Yuensan, the bulk of the trade being with Japan. See CHINA (map). —**History.** '99. The unfinished Seoul and Chemulpo Railway was with the consent of the Government taken over finally by Japan in **January**, and was completed to the Han river, over which a long bridge is being built. During the year a contract was also signed between the Korean Government and a Japanese syndicate for a railway between Seoul and Fusan. It is to be of the same gauge as the Seoul-Chemulpo line, 4 ft. 8½ in., will be about 300 miles long, and cost about two millions sterling. In **July** it was reported that an electric railway,

running through the main thoroughfare of Seoul, and in all six or seven miles in length, had been laid by a native syndicate. The Cabinet was dismissed, and two of the Ministers were banished (**March** 23rd). Abnormally dry weather in the spring produced a famine, and much disturbance took place amongst the starving populace in the country districts. In the capital some of the wilder members of the Progressive party took it into their heads during **June** to try and remove their leading opponents by blowing them up with dynamite and other explosives. Towards the end of the year there were reports of coming trouble between Japan and Russia, both of whom have a vital interest in the country, and the *Times* correspondent at Seoul declared that to preserve autonomy in Korea, or rather to prevent it from being absorbed by Russia, Japan would certainly fight.

Krüger, Stephanus Johannes Paul, President of the South African Republic, was b. near Colesberg, Cape Colony, on October 10th, 1825. When he was about nine years old he took part in the Great Trek over the Vaal, and is one of the few survivors of that time. While still young he was appointed a field cornet, and afterwards was chosen to command the Boer forces. He entered upon the more active portion of his public career when he was chosen a member of the Executive Council of the Transvaal in '72, President Burgers being then at the head of affairs. Though he held an official position during the British administration of the country after Majuba, he was one of the leaders of the rebellion which ended in the Convention of '81. In '82 he was elected President for the first time. In '83 he was re-elected for five years, and in '88, after a contest with General Joubert, he was again chosen as President. Since then he has been twice re-elected, the last time in '98. See TRANSVAAL.

Krypton is the name given to the constituent of atmospheric air which Professor Ramsay, F.R.S., discovered in '98. Its spectrum is characterised by two very brilliant lines. Krypton forms a fifth constituent of the atmosphere, but is present in very minute quantities. It belongs to the helium series.

Kurdistan. A country of 50,000 sq. m. in Asiatic Turkey, situated on the Persian frontier, and adjacent to Armenia.

Kushk-Merv Railway. See **ENGINEERING.**

Kyrle Society, The, owes its origin to Miss Miranda Hill, who called attention to the dull, commonplace lives of the poor, and suggested means to enliven and beautify their lives. In 1877 the Society was started. Its work is apportioned between four branches, each of which is regulated by a sub-committee, the superintendence of the whole being taken by the executive committee. The work of the branches is, first, to decorate workmen's clubs, hospitals, etc.; second, to preserve open spaces; third, to give music and entertainments to the poor; and fourth, to provide them with literature. **Hon. Secretaries**, Miss Lilian James and C. W. Empson, Esq. **Office**, 49, Manchester Street, W. There are provincial societies at Birmingham, Cheltenham, Dublin, Edinburgh, Glasgow, Leicester, Liverpool, and Nottingham.

LABOUR MOVEMENT, '99.

The Trades Union Congress.

The thirty-second Annual Congress was held at Plymouth, Sept. 4th to 9th. Mr. W. J. Vernon, of the Typographical Association, being president. The attendance was not quite so large as in '98. The following table, from the *Labour Gazette* for September, shows the number of delegates :—

Only 147 out of more than 1200 trades organisations sent delegates; but these were mainly the larger societies, and represented 1,120,164 out of a total membership of about 1,600,000. The falling off in attendance, as compared with last year, was largely due to the exclusion from the Congress of the Amalgamated Society of Engineers for non-compliance with the decision of arbitrators appointed by the Parliamentary Committee for the arrangement of disputes between trade unions. There were fewer delegates from the building trades,

NOTE.—Societies forming parts or branches of a general federation or amalgamation are not counted in this table as separate organisations.

but a larger number of members represented; there was also an increase in the number of miners represented, though the Durham Miners' Association was not represented.

The printed programme contained 82 resolutions (with many amendments) arranged in 16 sections. The number was reduced, at the suggestion of the Standing Orders Committee, by consolidating kindred proposals and amendments. Resolutions were passed upon the following subjects, among others:—the grievances of Government employees; the right of trade unions to deposit their funds to an unrestricted amount in Post Office and Trustee Savings Banks; compulsory weighing in trades paid by weight; eight hours bills for miners and for certain other trades; the representation of labour in Parliament; amendment of the Workmen's Compensation Act, the Factory and Workshops Acts, the Merchandise Marks Act and the Truck Acts; the better housing of the people; restriction of Sunday trading;

juvenile labour; the administration and amendment of the "Fair Wages" Resolution of the House of Commons; municipal bakeries; public education; co-operative production; regulation of hours for shop assistants; persons in charge, and inspection of boilers and engines; appointment of practical inspectors; and old-age pensions. Delegates were present from the Co-operative Union and the United States National Federation of Labour; and two representatives were appointed to attend the Conference of the American Federation of Labour in December '99. Representatives of the following organisations were elected to form the **Parliamentary Committee**:—Amalgamated Railway Servants, Miners' Federation of Great Britain, National Society of Amalgamated Brassworkers, Gas Workers and General Labourers' Society, Boiler Makers and Iron Shipbuilders' Society, London Society of Compositors, Associated Shipwrights, Bargebuilders' Society, National Boot and Shoe Operatives, Amalgamated Card

and Blowing Room Operatives, Northern Counties Weavers' Association, Amalgamated Society of Carpenters and Joiners. The balance sheet showed a total income of £3271 8s. 8d. (including a balance from previous year of £1210 11s. 6d.), and an expenditure of £1973 os. 4d., leaving a balance in hand of £1298 8s. 4d. The next Congress will be held at Huddersfield in 1900.

Federation of Trades Unions.

In pursuance of a resolution passed at the Trades Union Congress in '98, a special Congress was held at Manchester, Jan. 24th to 26th, '99, to discuss proposals for a Federation of Trades Unions. There were present 288 delegates, representing 93 organisations, with an aggregate membership of 986,495. The scheme brought before the Congress had been drawn up by a Committee appointed by the Birmingham Trades' Union Congress in '97; it contained 40 rules to 35, of which 95 amendments were submitted. The Congress finally resolved to form a Federation to be called the **General Federation of Trades Unions**. They further decided that "The objects shall be to uphold the rights of combination of Labour; to improve in every direction the general position and status of the workers by the inauguration of a policy that shall secure to them the power to determine the economic and social condition under which they shall work and live; to secure unity of action amongst all Societies forming the Federation; to promote industrial peace, and by all amicable means, such as conciliation, mediation, references, or by the establishment of Permanent Boards, to prevent strikes or lock-outs between employers and workmen, or disputes between Trades or Organisations; where differences do occur, to assist in their settlement by just and equitable methods; to establish a fund for mutual assistance and support, and for carrying out the foregoing objects." The Parliamentary Committee was constituted a Provisional Committee of Management.

Trade Disputes.

The Cotton Spinning Trades.—In January '99 an application was made by the Operative Spinners to the Federation of Master Cotton Spinners' Associations for an advance of 5 per cent. in wages. As it was shown that, by the Brooklands Agreement made, in '93, when wages were reduced, the first subsequent rise in wages was limited to the amount then taken off—7d. in the pound—the operatives altered their demand to 7d. in the pound, and gave notices that they would cease work on March 25th. On March 20th a conference was held at Manchester, and on the 27th the employers consented to give the advance, and the operatives agreed to the following resolution:—"That in consideration of the advance being given on March 27th, we undertake to seriously consider any proposals which may be submitted for the purpose of trying to arrive at some agreement by which wages shall be governed by the state of trade, and to submit such proposals to our members." The advance affected about 75,000 operatives.

The Building Trades.—In January '99 a dispute arose out of an attempt by the National Association of Operative Plasterers to compel foremen plasterers to join the society; and three London firms were struck. The Central

Association of Master Builders of London contended that these strikes were a breach of the terms of settlement of the dispute in the London building trade in '96, according to which six days' notice was to be given of the intention to strike. The matter was referred to the National Association of Master Builders of Great Britain and Ireland, who called upon the Operative Plasterers to abstain from the attempt to coerce foremen or superintendents to join the National Association of Operative Plasterers, and also to abstain from certain other practices to which the Master Builders objected. The Operative Plasterers consented to abstain from coercing foremen and superintendents not working as plasterers; and as to the other practices they denied the existence of some of them, but claimed that they had a right to practise others. The Master Builders, considering that the attitude of the Operative Plasterers implied a determination to persist in practices complained of, declared a **lock-out** which took effect on March 6th in 56 districts out of 143. Negotiations went on and conferences were held from time to time, until May 30th, when a conference was held at which rules were drawn up to the effect that the Plasterers' Association would take no steps to coerce foremen or superintendents; that no employer should engage more apprentices than equal in number to one-fourth of their journeymen plasterers; that no boycotting or black-listing should take place on the part of the National Association of Operative Plasterers, where the firms adhere to the rules mutually agreed upon; that joint committees be established in the different districts for the demarcation of work; and that, in the event of any dispute, the district officials of the N.A.O.P. should send notice to the local association of Master Builders who should state whether the master in question is a member of that body, and if he is, the N.A.O.P. should not sanction a strike until six days after notice given. These rules were accepted by the N.A.O.P., and work was resumed. In the meantime, the National Association of Master Builders had asked the various trade unions in the building trades for an assurance that they had no sympathy with the plasterers and would not support them. A number of these trade unions met in conference, and a resolution was passed signifying the readiness of these trade unions to meet the Master Builders in open conference. The Master Builders consented to meet the Operatives in conference; but a strong feeling had developed among the Employers' Associations in some districts, especially in Yorkshire, in favour of a general lock-out of the building trades; and in several places the lock-out actually took place, but did not affect more than 2500 operatives altogether. A preliminary meeting of representatives of the trade unions and of the National Association of Master Builders took place in June, to arrange a basis of discussion for a general conference; but no basis was agreed to, and on that account the proposed conference was adjourned. A week later, the representatives of the trade unions concerned again met and drew up terms to form a basis of conference. These proposals were discussed at a conference of representatives of the trade unions and of the Master Builders, on July 27th. After some discussion, in the course of which several amendments were agreed to, the further consideration of the

proposals was adjourned. The same conference discussed the situation in the building trades in Yorkshire, but no definite understanding was arrived at. Subsequently, it was decided that these questions should be dealt with locally in the towns affected.

Miscellaneous.

Use of Phosphorus in Matches.—Reports of Professor Thorpe, Professor Oliver, and Dr. Cunningham to the Home Secretary, on manufacture of lucifer matches, were published in a Blue Book in May '99. Professor Thorpe reported that no satisfactory substitute for phosphorus had yet been found; that red phosphorus alone conferred immunity from phosphorus necrosis; that the risk of manufacturing "strike-anywhere" matches with red phosphorus and chlorate of potash commingled would enormously outweigh the evil caused by phosphorus necrosis; and that the total prohibition of use of ordinary phosphorus is impossible without international co-operation. He recommended, as remedial measures, proper medical inspection of factories and operatives, efficient ventilation, and proper lavatory and vestuary accommodation. Professor Oliver reported that it was premature to forbid the use of white phosphorus in Great Britain and Ireland; and offered a number of recommendations as to precautions to be taken in the manufacture of matches. Dr. Cunningham reported that the yellow phosphorus match trade did not appear to him to present any exceptional dangers to the workpeople, which could not be met by proper precautions.

Lead Compounds in Pottery.—Professor Thorpe presented a report, in May '99, to the Home Secretary, on the employment of lead compounds in the manufacture of pottery. He reported that the greater amount of the ware in question could be glazed without lead; that where lead must be used it should be in the form of a fritted double silicate; that the use of raw lead should be absolutely prohibited; and that young persons and women should be excluded from employment where lead-glaze is used, and the adult males subjected to systematic medical inspection.

Labrador. A great peninsula on the east coast of British North America, lying between the Gulf of St. Lawrence and Hudson Bay. From Cape Chidley (Hudson's Strait) to Blanc Sablon (Strait of Belle Isle), including the basin of the Hamilton, it belongs to Newfoundland, the remainder of the peninsula forming part of Quebec and the North-West Territories. The area is about 200,000 sq. miles, and the pop. about 5000. See BRITISH EMPIRE (table) and NEWFOUNDLAND.

Labuan. An island and British Crown colony, situated in a bay on the north-west coast of Borneo. Its area is 31 sq. m.; pop. about 5853. The port and town is Victoria Harbour. There are only about three score of Europeans resident, the population being composed mainly of Malays. By an arrangement between Her Majesty's Government and the British North Borneo Company, the island has been administered since '89 by the officers of the company. The rainfall in Labuan is extraordinary, being 108 in. during the year. Extensive beds of coal exist in the island, and nearly 50,000 tons a year are raised. For financial statistics see BRITISH EMPIRE (table).

Lacrosse, '99. The home of this game is Canada, but since its introduction into this country some twenty years ago it has made fair head-way, especially during the last year or two, and round London it is played much more frequently than it used to be. The ruling bodies are the South of England Association (instituted in '82; hon. secretary, Mr. F. B. O. Hawes, 1, Wellington Chambers, Buckingham Gate, London, S.W.), and North of England Association (formed in '80; hon. secretary, Mr. G. H. Nield, 17, Piccadilly, Manchester). The supreme body is the English Union, formed in '92, which governs all international matters, including the laws of the game, etc., the Executive Council being appointed by the committees of both associations, and meeting annually at Birmingham. The principal matches resulted as follows:—The South of England Flag Competition was won by West London, the North of England by Stockport; these clubs played for the Championship of England, and in this match Stockport won. England beat Ireland, North beat South; the Senior Cup was won by Surbiton, from West London. Surbiton won all their matches of the season with the exception of one drawn game, a very successful record.

Ladies' Clubs. See CLUBS.

Ladrones. See CAROLINE ISLANDS.

Lady Margaret Hall. See WOMEN, HIGHER EDUCATION OF.

Lagos. A British colony on the Slave Coast, West Africa. Consists of Lagos, town and island, on the coast of the Bight of Benin, 150 miles east of the Gold Coast, together with a strip of land along the coast that reaches from Porto Novo, a French station on the west, to the mouth of the Benue river. It is bounded on the west by French Guinea and Dahomey, and on the east by the Niger Coast Protectorate. The Niger Convention, drawn up by the Anglo-French Commission sitting at Paris, and signed June 15th, '98, settled the boundaries of the *hinterland* of the colony. Starting from the dividing line on the 9th parallel, between Dahomey and Lagos, the line of delimitation runs in a northerly direction to Boria, and thence bends in a north-easterly curve towards the Niger, passing to the west of Gbani, Ashigere, and Dokala, till it reaches a point on the Niger ten miles to the north of Ilo. The Borgu country was thus left to Great Britain and Nikki to France. The town of Lagos is the largest on the West African coast, and has a population of 35,000. Area, including the protectorate inland, but not Yoruba, 1500 sq. m.; pop. about 100,000. The Governor is assisted by an Executive and a Legislative Council, the latter including four unofficial members. The colony is one of great importance, for it contains the only safe harbour along a thousand miles of coast, and commands all the main routes to the interior, which includes the populous Yoruba country, with an area of about 18,500 sq. miles, and a pop. of about 3,000,000. Much has been done of late to open up this country to British commerce, and a new rubber industry is being actively developed. The chief exports are palm oil and kernels, and rubber. Under the Colonial Loans Act, '99, an advance of £792,500 was made by the Imperial Government for the railway from Lagos to Abeokuta and Ibadan, the sum being needed for constructing the line from Abeokuta to

Ibadan and surveying an extension to the Niger. It is probable that when the Niger Territories are taken over by the Imperial Government in 1900, the boundaries and coastline of Lagos will be extended towards the north and east. See BRITISH EMPIRE and NIGERIA (map).

Landlord and Tenant. The relation of landlord and tenant is created wherever a person having an estate in land grants to another person in consideration of a rent a lesser estate in this land. Thus, when a freeholder lets his land to a farmer for a term of years, he becomes landlord and the farmer becomes tenant. **Tenancies** are of many kinds; and the most usual are a tenancy for a term of years, a tenancy from year to year, a tenancy at will, and a tenancy on sufferance. A **tenant for a term of years** is a leaseholder; and if the term be longer than three years the lease must be by deed, although, where no deed has been executed, evidence is admissible to prove that there has been an agreement for a lease. Where there is a lease in proper form the tenant is secured in his possession so long as he pays his rent, and at the expiry of his term he is supposed to give up possession without the formality of a notice to quit. Formerly a breach of any of the covenants contained in the lease was enough to void it; but now a breach may usually be compensated by a money payment. A **tenancy from year to year** arises when land is let from year to year, or when it is let without any express stipulation to that effect, but with the reservation of a yearly rent, or when the tenant holds over after the expiration of his term and pays rent for so doing. This tenancy cannot be terminated by either party otherwise than by giving a half-year's notice; so that if this notice be not given before the expiration of the first half-year, another year is added to the tenancy, and so on. A tenancy from year to year may be created by word of mouth, and a verbal notice to quit is valid, although it is always desirable, as a precaution, to give written notice. A **tenancy at will** is a tenancy terminable at the pleasure of either party. The Courts are reluctant to construe any tenancy as a tenancy at will unless there is an express agreement to that effect. But this agreement need not be in writing. A **tenancy by sufferance** is little more than the fact of possession. It occurs when a tenancy of a higher kind, such as a tenancy from year to year, has expired, and the tenant remains in possession without either hindrance or sanction from the landlord. Tenancy by sufferance cannot be created by the will of the parties, but only by legal construction. If the landlord accept rent from the tenant by sufferance, he immediately creates, according to circumstances, a tenancy at will or from year to year. A tenant under a lease or from year to year may sub-let unless expressly restricted from so doing, but a tenant at will or on sufferance cannot do so. For the **recovery of rent** in arrear the landlord has, beside the other remedies of a creditor, the remedy of distress. He may, by his bailiff holding a certificate under the Law of Distress Amendment Act, '88, take possession of so much of his tenant's chattels upon the holding as by their sale will produce a sum sufficient to discharge the arrears. He must distrain at one time for the whole of that which is due. No arrears of rent can be recovered by distress but

within six years of their becoming due. After five days have elapsed from the seizure of the goods they may be sold, first having been valued by two sworn appraisers if so required by the tenant or owner of the goods, and the surplus, if any, must be repaid to the tenant. If the distress was unlawful the tenant has an action of replevin. It is a general rule that whatever is affixed to the freehold goes with the freehold; and this rule with its exceptions gives rise to a large part of the law of landlord and tenant. **Fixtures** made by the tenant may be subdivided into three classes: (1) fixtures for purposes of trade, (2) fixtures for ornament or convenience, and (3) fixtures for agricultural purposes. As regards (1) trade fixtures, like machinery, furnaces, brewing vats, salt-pans, etc., these may be removed by the tenant who has set them up, in every case in which their removal occasions no material injury to the freehold. (2) Fixtures for ornament or convenience, like window-blinds, marble chimney-pieces or kitchen ranges. These also, if set up by the tenant, may be removed by him, provided always that in removing them he does little or no damage. (3) Fixtures for agricultural purposes. The law relating to these is chiefly contained in the Agricultural Holdings Acts. Somewhat analogous to fixtures are **emblements**—that is to say, crops resulting from the tenant's cultivation which at the expiration of his tenancy are still uncut and growing. The general rule with respect to these is that the cultivator has the right, after such expiration, to enter on the land to reap and to carry away the produce of his labour. If he die before the harvest, such crops fall into his personal estate, and his executor or administrator succeeds to the rights which he had. Where a tenant from year to year holds of a landlord who has only a life estate, and the landlord dies in the course of the current year, the tenant is entitled to occupy the holding until the year has expired, and the new landlord is entitled to a proportionable part of the year's rent. The **non-payment of rent** does not affect the **validity of a notice to terminate a tenancy**. Thus, a notice given on March 25th to take effect on Sept. 29th is good, even though the rent due on March 25th may not have been paid. See LAW, '99.

Land Nationalisation. For an exhaustive article upon this subject, dealing with it under the following heads—growth of the movement, the legal argument, the change from tenure to ownership, and how to nationalise the land—see eds. '93 and '94. See also next article, and LAND RESTORATION LEAGUE.

Land Nationalisation Society. This Society was established in the spring of '81, and is the oldest of the British societies which have for their object the abolition of the present system of private ownership of land and the establishment of a general system of public land ownership. During the sixteen years of its existence it has carried on a continual system of agitation and education, and its membership and influence have steadily grown. It was the first among the advanced societies to use travelling lecture vans in the country during the summer months, and during the winter season its lecturers are pretty constantly at work addressing indoor meetings. This Society is especially responsible for the proposal which is making headway that local representative authorities should be vested with large compulsory powers

to acquire land (at a fair valuation) and hold it in such quantities as may be demanded by their constituents. In this way the Society believes the system of landlordism can be justly and surely abolished. **President**, Prof. Alfred Russel Wallace, D.C.L., LL.D., F.R.G.S. (Oxon); **Treasurer**, Alex. W. Payne, F.C.A.; **Hon. Secretary**, H. G. Moberly; **Secretary**, Joseph Hyder. **Offices**, 432, West Strand, London, W.C.

Land Registry. The Land Transfer Act '97, which came generally into operation on Jan. 1st, '98, consists of four parts. Part I. creates a **real representative** in whom real property is to become vested on the death of the owner. This real representative is to be the personal representative. In other words, realty as well as personality will now vest in the executor, or, in case of intestacy, the administrator, instead of vesting at once in the devisee or heir-at-law; though no change is made in the statute governing the distribution of the assets of an intestate, the law of primogeniture standing as it stood before. Part II. amends the **Land Transfer Act of '75** in certain particulars. This Act, one of Lord Cairns' amending an older statute of Lord Westbury, established a Land Registry with a Registrar, and gave a power of creating district registries, if necessary, where the owner of freehold land, or of leasehold for an unexpired term of at least 21 years, could register his title; and he would after registration receive a land certificate or copy of the registered lease, which would represent the property which had been registered. Transactions regarding the property would then be entered in the register, and endorsed on the certificate or registered lease, which would be delivered by the vendor to the purchaser on the completion of the purchase. The system being optional has not been largely availed of; the **object of the Act** is to make it compulsory, though its provisions to that end in Part III. of the statute can only be brought into operation in this wise:—Her Majesty may by Order in Council declare, as respects any county or part of a county mentioned in the order, that on and after a specified day registration of title to land is to be compulsory on sale, and thereupon a person shall not under any conveyance of a sale executed on or after the specified day acquire the legal estate in any freehold land in that county or part of a county, unless or until he is registered as proprietor of the land. Lastly comes the **question of fees**: they are set out in a schedule to the Act as follows, and will save, it is said, as much as four-fifths of the charges now subsisting. "The following fees shall be paid in districts where registration of title is compulsory, and shall include all necessary surveying, mapping, and scrivenerly, and the preparation, issue, endorsement, or deposit, as the case may be, of a land certificate, office copy, registered lease, or certificate of charge; discharges of incumbrances, the registration of any necessary cautions, inhibitions or restrictions, the filing of auxiliary documents (if any), and all other necessary costs of and incidental to the completion of each registration or transaction, whether under one or under several titles. For possessory registration, and for transfers, charges, and transfers of charges for valuable consideration:—Not exceeding £1000, *1s. 6d.* for every £25 or part of £25; exceeding £1000 and not exceeding £3000, £3

for the first £1000, and *1s.* for every £25 or part of £25 over £1000; exceeding £3000 and not exceeding £10,000, £7 for the first £3000, and *1s.* for every £50 or part of £50 over £3000; exceeding £10,000, £14 for the first £10,000, and *1s.* for every £100 or part of £100, up to a maximum of £25 for £32,000. For transmissions and transfers not for value, notices of leases, and rectification of the register, and land:—one quarter of the above fees, according to the capital value of the interest dealt with, with a minimum of *1s.* and a maximum of £5. No fees to be charged for inspection of the register." Part IV. contains miscellaneous provisions. It may be added that a section of the Act imposes a penalty upon any unqualified person who either directly or indirectly, for or in expectation of gain, draws or prepares any instrument in relation to the transfer or registration of land. Part II. of the Act came into operation in the County of London early in '99, and cannot be extended beyond London for three years. The area within which the system of land transfer by registration of title is to be effectively established comprises the whole of the County of London north of the Thames, except the City and North Woolwich. The effect of the order in the area to which it applies is to introduce registration of title on all ordinary sales of freeholds, and on all sales of leaseholds having 40 or more years still to run, or two or more lives still to fall in, and on grants of leases or underleases for like periods. A lease and a reversionary lease will be deemed in most cases to create one continuous term. Registration does not apply to a lease created for mortgage purposes, or containing an absolute prohibition against alienation. The usual procedure is for the applicant or his solicitor to attend at the Registry with the deed, and a copy thereof for filing, written on stout paper foolscap size, both sides, with inner margins, and copy of the plan (if any) and certified as correct, shortly after the execution. The land is then identified on the large-scale (5 ft. to the mile) ordnance map kept at the registry for the purpose, and the draft entries for the register are prepared, and settled with the applicant, in the course of half an hour. The Land Certificate, together with the Deed, marked with notice of the registration, are sent to the applicant or his solicitor, as soon as ready, by registered post. Considerable facilities are afforded by the rules for the registration of **Absolute Titles**, cost being ascertainable in all cases before the application begins. The Registrar is empowered to accept a good holding title. The **Land Registry** is at 34, Lincoln's Inn Fields. Office hours: Registration 11 to 3; other business 10 to 4. Saturdays, closed at 2. The staff of the Registry includes: Land Titles Commissioner, Robert Hallett Holt; Chief Assistant Registrar, Charles Fortesque Brickdale; Examiners of Titles, the Conveyancing Counsel of the Chancery Division and Frederick Stallard, Bethune Horsbrugh, Edward Hume, Wilfred Brinton, William Seymour Eastwood, and Thomas R. Colquhoun Dill; Chief Clerk, George Abbott; Solicitor Clerk, George Irving Holt. The other departments are the Compulsory Registration of Title Department, the Scrivenery Department, the Land Charges, Registration, and Searches Department, the Survey and Map Department, and the Middlesex Deeds Department at 33, Lincoln's Inn Fields.

Land Restoration League, English. This League was founded, under the name of the Land Reform Union, in April '93, "to advance the principles laid down by Henry George in 'Progress and Poverty' for the restoration of the land to the people." At the first annual meeting (May '84) the name of the Society was changed to "English Land Restoration League." The League has always advocated the taxation of land values, and has offered a strenuous resistance to every proposal "for buying out Irish or other landlords at the expense or under the guarantee of the rate-payers, or for creating a new class of landlords under the name of peasant proprietors." On the same grounds it has always opposed the enfranchisement of leaseholds. Since '91 a large part of the work of the League has been carried on in the country districts by means of its "Red Vans," a guarantee fund of £1000 a year being available, during the first five years, for their support. The lecturers of the League collect information on land and labour questions, which is edited and published in an annual "Red Van Report," illustrated. Nearly a score of counties in the southern, eastern, and midland counties have been visited, village by village, by the Vans, which have taken part in over 3500 meetings during the six years ended '98. Since the passing of the Local Government Act, '94, the League has devoted special attention to Parish Councils. During the summer of '99 a special outdoor lecturing campaign has been carried on in the West Riding of Yorkshire in favour of the taxation of land values. An important memorandum was recently issued on the Improvements and Housing Policy of the London County Council. The League is now devoting its attention to lantern lectures on the Land Question. Office, 376 and 377, Strand, London, W.C. Gen. Sec., Frederick Verinder; Hon. Treasurer, Rev. Stewart D. Headlam, M.L.S.B.

Land Tax. The land tax in England and Wales is an apportioned tax. It is not charged at the same rate in the pound over the whole country, but each parish is liable to contribute a fixed annual quota. The parochial quotas were fixed permanently and made perpetual in 1798 by the Act 38 Geo. III. c. 60, but subject to redemption. The land tax quota payable is required by law to be raised in each parish by a new assessment yearly and from year to year at an equal rate on the annual value of all lands and tenements, etc., which have not been exonerated from land tax (42 Geo. III. c. 116, s. 180). Such lands and tenements are to be charged "with as much equality and indifference as is possible by a pound rate" (38 Geo. III. c. 5, s. 4). Formerly the maximum rate of land tax chargeable was 4s. in the pound (42 Geo. III. c. 116, s. 180). Now, by the provisions of the Finance Act, '96, s. 31, the amount assessed may not exceed the amount which would be produced by a rate of 1s. in the pound on the "annual value." For the purposes of section 31 of that Act "annual value" is the annual value as assessed under Schedule A in the Income Tax Act, '42, and if an assessment so made on a parish is insufficient to raise the amount of the parish quota the difference has to be written off as irrecoverable. The assessment of the land tax rests exclusively with the Land Tax Commissioners for each Division, and any complaint against a land tax assessment on the ground of

inequality or incorrectness must be by way of appeal to them. Notices as to when appeals will be heard are annually fixed early in the financial year to the church door in each parish. The collectors of land tax are required, upon the application of any person who may think himself over-rated, to permit such person, or his proper representative, to inspect the duplicates of assessment at all reasonable times in the day, without payment of fee. Every person intending to appeal is required to give notice of his intention in writing to one or more of the assessors. Appeals once heard and determined by the Commissioners are final. If an owner in possession of the rents and profits of any lands, etc., in any financial year, before payment of the land tax assessed on such lands, etc., produces to the collector of land tax a certificate from the surveyor of taxes (1) that he has been allowed in that year a total exemption from income tax by reason of his income not exceeding £160, the land tax assessed on such lands, etc., will not be collected; or (2) that he has been allowed in that year an abatement of income tax by reason of his income not exceeding £400, one-half of the land tax assessed on such lands, etc., will not be collected. Any person having an estate or interest in lands and tenements (except tenants at rack rent, or holding under the Crown) may contract for the redemption of the land tax charged thereon. By the Finance Act '96 the consideration for the redemption has been fixed at thirty times the amount of the tax. Information as to redemption may be obtained from the clerk to the Commissioners of Taxes for the division in which the land tax desired to be redeemed is assessed, or (by letter) from the Registrar of Land Tax, Inland Revenue Office, Somerset House, London, W.C.

Land Transfer Act, '97. See LAND REGISTRY.

Lang, Andrew, M.A., LL.D., was b. at Selkirk, 1844, and educated at Edinburgh Academy, St. Andrews University, and Balliol College, where he graduated first class in classics. Elected a Fellow of Merton, '68. He has for some time been on the literary staff of the *Daily News*, and is a well-known contributor to periodical literature. The monthly article "At the Sign of the Ship," in *Longman's Magazine*, is his work. His "Ballads and Lyrics of Old France," and "Ballads in Blue China," '81, brought him into prominent notice. His subsequent works, especially "Helen of Troy," "Rhymes à la Mode," and "Custom, Ritual, and Myth," increased his reputation. He is joint translator, with Prof. Butcher, of the "Odyssey," and with Mr. Myers and Mr. Leaf of the "Iliad." In '88 he was appointed Gifford Lecturer on Natural Religion at St. Andrews University, and delivered his inaugural address Jan. 17th, '89. Recent works of his include "The Gold of Fairnilee," "Lost Leaders" (leading articles which had appeared in the *Daily News*), "Prince Prigio," "The Life of Lord Idlesleigh," "The World's Desire" (in collaboration with Mr. Rider Haggard), "Essays in Little," "Angling Sketches," "Homer and the Epic," "Ban and Arrière Ban," "A Monk of Fife" (a novel), "Life of John Gibson Lockhart," "Pickle the Spy," a history of the obscure years of Prince Charles, "Modern Mythology," "The Book of Dreams and Ghosts," and "The Making of

Religion." Mr. Lang has also edited a charming series of "Fairy Tales" in five books, a "Blue Poetry Book," and two books of "True Stories," all for children. Address: 1, Marloes Road, W.

Lansdowne, Marquis of. See under PEERAGE.

Lasker, Emanuel, chess champion of the world, was born in Berlinchen, Prussia, Dec. 24th, 1868. He inherited his great abilities at the game to some extent, and at the beginning of the decade took a high place at a chess tournament at Berlin, where he defeated some of the leading masters. In '92 he visited England and won the London Tournament, and in '93 defeated Mr. Blackburne, the well-known English expert, by 6 games to love, 4 games being drawn. In the great New York Tournament of '93 he won his games with all the thirteen leading players, including Mr. Steinitz, the then champion of the world. He has since won the tournaments held at St. Petersburg, '95, and Nuremberg, '96, and the International Tournament at London in '99. Matches with Mr. Steinitz were won by Mr. Lasker by 10 games to 5 in '94, and by 10 games to 2 in '96. He is the author of "Common Sense in Chess" and various essays on the Geometrical Calculus and other mathematical subjects.

Laurier, Sir Wilfrid, G.C.M.G., the first French-Canadian Premier of the Dominion, was b. at St. Lin, 1841, and educated for the bar. Called in '64, he at once began to show his great ability, and rose rapidly in his profession. He embarked on his political career in '71, when he was elected as a Liberal to the Quebec Provincial Assembly; and here, too, his eloquence and ability at once brought him to the front. In '74 he was elected to the Federal Assembly, and his high personal character, his undoubted loyalty and attachment to the connection of the colony with Great Britain, together with his great oratorical powers, which have earned for him the title "Silver-tongued Laurier," soon gave him high rank in the Liberal party. From the first he advocated a policy of free trade, so far as the revenue requirements of the country would allow; and, although a Catholic, his spirited resistance to the attempted dictation of the Roman Catholic hierarchy in regard to the Manitoba Schools question, showed that he was independent of such influence in political affairs. On the retirement of Mr. Blake in '91 he was chosen as leader of the Liberal party, and at the General Election of '96 he led his followers to a notable victory. His tariff legislation during '97, giving Great Britain the benefit of preferential trade with Canada, aroused much enthusiasm both in the colony and at home, and he was warmly welcomed when he came to London to attend the Jubilee festivities. He was then appointed a member of the Privy Council and made a G.C.M.G.

LAW, '99.

In the article under this heading, which appeared in the '99 edition, it was noticed that the Workmen's Compensation Act had come into force during '98, but had not so far much benefited the lawyers. It has redeemed itself from this reproach during '99, and the largest section in the following article is devoted to the decisions on this Act, which will be found grouped under "Master and Servant." The Court of Appeal still has much to do before it

has quite interpreted the Act. In this article there is some rearrangement of the grouping of the cases, many of the shorter sections of previous years being grouped under the heading "Trade Cases." The object aimed at is to make the article more useful to readers who are not lawyers, but who desire to know what decisions of the Law Courts should affect them in the conduct of their various businesses or their private relations. At the same time care has been taken to note as far as possible all cases which are likely to be useful to the practising lawyer in the ordinary course of his practice, while it is believed it may be very useful to the law student anxious to be "up in the latest decisions." It is impossible to give here the statistics of the law cases for the year, but the following record of '97 (published this year) should prove interesting. The total number of proceedings begun in Appellate Courts and Courts of First Instance, including the House of Lords, Privy Council, Court of Appeal, High Court of Justice (three divisions, Queen's Bench, Chancery, and Probate, Divorce and Admiralty), the County Courts and the other Civil Courts, was 1,243,960, the total number of appeals, actions, etc., heard and determined being 412,008. These figures are made up as follows:—Proceedings begun in the Appellate Courts, 1232; in the Chancery Division, 883; in the Queen's Bench Division, 71,582; in the Probate, Divorce, and Admiralty Division, 1657; in the County Courts, 1,130,341; in other Courts, 30,965. Appeals, actions, etc., heard and determined in the Appellate Courts, 1004; in the Chancery Division, 689; in the Queen's Bench Division, 3547; in the Probate, Divorce, and Admiralty Division, 1023; in the County Courts, 404,601; and the other Courts, 1144. The number of cases begun per 100,000 of the population has varied little for some years. The lowest percentage in the last ten years was in '90, the highest in '94. In '97 the number was 3999.53 per 100,000 of the population, the average for the ten years from '88, to '97 being 4124.41. In the Judicial Committee of the Privy Council 93 appeals were presented, as against 88.8 in '93-'97; the increase being in the appeals from India. The appeals heard and determined were 67. In the House of Lords there were 73 petitions of appeal presented during the year; of these 21 came from Scotland and 3 from Ireland. In one case—*Allen v. Flood*—the judges attended before the House of Lords, this being the first time they have done so since '81. In the Court of Appeal there was an increase in the number of appeals, the total being 670 as against 654 in '96. Altogether 574 cases were heard and determined in the Court of Appeal. To this it may be added, as showing the extent of the jurisdiction of the Privy Council, the supreme Court of Appeal for the whole British Empire (outside the United Kingdom), that in the Law Reports for the first nine months of this year there are reported 18 cases: from Bermuda 1, Canada 4, Gibraltar 1 (the case of Mr. Spilsbury, who is alleged to have filibustered in Morocco), Natal 2, New South Wales 8, New Zealand 1, Newfoundland 1.

Children.—In a case in the Court of Appeal application was made to appoint a guardian to act with the mother, who had married a second husband of a faith different from that which she professed and in which the infant was being educated, and the father had made no

appointment. The Court refused; for although under the Guardianship of Infants Act, '86, where there is no guardian appointed by the father in existence, the mother, if surviving the father, is entitled to be the sole guardian of an infant child of the marriage; and although the Court has power in such case, both under the Act and of its own jurisdiction, to appoint a guardian to act jointly with the mother, the Court will not do so where there has been no misconduct, and it is not shown that the real benefit of the child requires it.—*In re X*.

Company Law.—The "one man company" received a wholesome check *In re Karl Hirth*. It appeared that Mr. Hirth, who was liable under a judgment for the costs of an action, had the brilliant idea of selling his business to a company which he had formed for the purpose, in consideration of fully paid-up shares and of the company undertaking to pay his debts. He was the chairman, managing director, and secretary to the company; he or his nominee held substantially the whole of the shares in it, and he had the complete control of it, including the power to draw cheques, which he exercised in his own favour. But within three months of this transaction a bankruptcy petition was presented against him, and he was made bankrupt, his liabilities exceeding £2000 with assets nil. It was held by the Court of Appeal that the transfer was fraudulent and an act of bankruptcy; that the title of the trustee, in bankruptcy to the business related back to the date of the transfer, and overrode the claims of the creditors of the company in the winding-up; and that the liquidator of the company, which had in the meantime gone into liquidation, was bound to hand over to the trustee the assets representing the business at the time of the transfer.—It is never a difficult task for the subscriber for shares who is dissatisfied with his bargain to find something untrue in the prospectus, but it is very uncertain whether, if he brings an action against the company or its directors, he will succeed. In *Greenwood v. The Leather-Shod Wheel Company*, the prospectus on its proper construction contained statements as to orders for goods which fairly meant that people whose requirements would make them extensive customers had ordered goods for use, so that when the company had started or when ready to work it would start from a sure foundation on which a large business might be established, whereas, as a fact, many of the orders were mere "trial orders," on some of which the purchasers were to pay reduced prices, or not to pay at all if the trial proved unsuccessful; and it was held that the subscriber was entitled to a rescission of his contract, and also to damages against the directors, as the directors had not shown that they had reasonable grounds to believe that the statements in the prospectus were true; and it was further held that a waiver clause to be good must be so framed as to tell a reader of ordinary intelligence at least the character of what is intended to be waived. But the fact that a director is responsible for a prospectus of a company inviting subscriptions for the preference shares and debenture capital which stated that the directors would take all the ordinary shares which were not taken by the vendors to the company will not bind the company to allot, and the director to accept such shares.—In *Cory's case*, Mr. Cory, an ex-director of the

National Bank of Wales, was held liable by Mr. Justice Wright to refund £37,000 paid in dividends after there had been a loss of capital. But the Court of Appeal held that the dividends had not in fact been paid out of any part of the paid-up capital of the bank, though they were paid after and notwithstanding the loss of that capital, and without making it good. The law did not prohibit a limited company—even a limited banking company—from paying dividends unless the paid-up capital was intact. Excluding cases in which every one could see that a particular debt or outlay could not be reasonably charged to capital, it might be safely said that what losses could be properly charged to capital and what to income was a matter for business men to determine, and was often a matter on which the opinions of honest and competent men would differ. There was no hard and fast legal rule on the subject. If directors acted within their powers, if they acted with such care as was reasonably to be expected from them, having regard to their knowledge and experience, and if they acted honestly for the benefit of the company, they would discharge their equitable as well as their legal duty to the company.

Copyright.—The copyright case of the year was *Walter v. Lane*, an action brought by the proprietors of the *Times* newspaper against Mr. Lane, the publisher, to restrain him from infringing their copyright by publishing a book called "Appreciations and Addresses Delivered by Lord Rosebery," containing copies of reports which had been published in the *Times*. The book contained copies of reports of Lord Rosebery's speeches appearing in the *Times*, used with the consent of Lord Rosebery, who made no claim to copyright in these speeches. It was shown that if the reporters were entitled to any copyright in the reports, their rights had been assigned to the proprietors of the *Times*; and Mr. Justice North held that Lord Rosebery had not taken any steps to protect himself under the Copyright Act of '35, and had no original of which to multiply copies, therefore he was not entitled to any copyright. But while the reporters were not the authors of the speeches, they were the authors of the public reports of the speeches, with respect to which alone copyright could exist. They had not made copies; they had taken down what was spoken, and that was for this purpose original work and not a copy. Reports could not be looked upon as translations, but they were *in pari materia* with translations, and therefore the *Times* was entitled to an injunction.—This case of course was taken to the Court of Appeal, and there the Master of the Rolls, the President of the Probate Division, and Lord Justice Romer decided that there was no copyright in the reports. The counsel for the *Times* then intimated their intention of taking the matter to the House of Lords. Another interesting point in copyright law was decided in *Boosey v. Whight*. In this case it was held that perforated rolls of paper for use in a mechanical wind instrument called an "Æolian," which represented the instrumental music of certain songs in the music of which the plaintiffs had the copyright, the music being produced by the passage of air through the slots in the rolls into the pipes of the instrument, were part of the instrument, and were not sheets of music within the Copyright Act, '42; but that the directions as to time and

expression which were added to the sheets in print were infringements of the plaintiffs' copyright.

Criminal Law.—The year '99 has happily not been very notable for criminal cases involving great public interest; but amongst those that should be noted is the case of Lieutenant Wark, who was sentenced to death for murder, he having been held party to an illegal operation on a Miss Yates that resulted in her death. He was reprieved and sent to penal servitude for three years. The criminal trial was followed by an action in the Palatine Court of Lancaster which illustrates a peculiar point of English law. A man may not benefit by a death he has feloniously brought about, but whether he has done so or not is an issue that must be tried between him and the other party interested; that he has been convicted in a criminal court is no evidence. By her will Miss Yates gave a moiety of her residuary real and personal estate to Lieut. Wark. The next-of-kin of Miss Yates brought an action for a declaration that Wark had, by reason of his felonious act in wilfully murdering the testatrix, forfeited all his beneficial interest in the moiety of her estate, and for a declaration that the testatrix died intestate as to such moiety. The court held that proof of the conviction had no effect in a civil court, and that the issue of whether he in fact killed her feloniously must be again tried by a jury as a civil issue, and ordered the issue to be tried again before a judge and jury at the assizes. The re-trial has not yet taken place (*Yates v. Kyffin-Taylor and Wark*).—Three points decided under the Criminal Evidence Act, '98 are: (1) upon the trial of an indictable offence, where the person charged gives evidence in his own behalf, but does not call witnesses, the counsel for the prosecution is entitled, immediately after the person charged has given his evidence, to sum up the case for the Crown and in so doing to comment upon the evidence given by the person charged (*Reg. v. Gardner*); (2) a prisoner has no right of giving evidence on his own behalf before the grand jury; and (3) the court has the right to comment on the failure of a prisoner to give evidence at the trial (*Reg. v. Rhodes*).—A very important case arising out of the Jameson Raid of '95 was *Burrows v. Rhodes and Jameson*, which was a claim for damages by a captured trooper against Mr. Rhodes and Dr. Jameson; and the Queen's Bench held, on an application to dismiss the action on the ground that no cause of action was shown, that where a person is induced by the fraudulent misrepresentation of another to do an act which, in consequence of such misrepresentations, he believes to be neither illegal nor immoral, but which is in fact a criminal offence, he has a right of action against the person so inducing him for damages sustained by him in consequence of his having done such act. This decision is probably capable of pretty extensive application, and many cases of the kind may be looked for.—Under sect. 100 of the Larceny Act, '61, an order can be made for the restitution of stolen property, on conviction of the thief, to the owner. A £5-piece which is current coin of the realm may be sold as a curiosity, and in such a case, if the seller is a thief who has stolen it from the owner and who has subsequently been prosecuted to conviction, an order for its restitution to the owner may be made; but no such order could be made if the

coin had been passed into circulation as current money, although it might be possible to identify it. (*Moss v. Hancock*).—The Peculiar People object on religious grounds to calling in medical aid, and to the use of medicine. A man named Senior, belonging to this sect, who had wilfully and deliberately abstained from providing medical aid and medicine, which were necessary for his infant child, though he knew it to be dangerously ill, but in other respects had done all he could in the best interest of the child, was held by the Court for Crown Cases Reserved to have been rightly convicted of manslaughter, it being shown that medical aid would have prolonged, and probably saved, the child's life, and that the prisoner had the means to procure medical aid.

Ecclesiastical Charity.—This year's reports contain two decisions of the Court of Appeal on what is or is not an ecclesiastical charity. The deed of endowment of Perry's almshouses declared that the objects of the charity should be selected by the trustees thereof (one of whom was to be the rector of the parish) from amongst poor men and women resident in a certain parish who should have (1) regularly attended divine service in the church of the parish for a fixed period, (2) been partakers of the Holy Communion, (3) lived a godly, righteous, and sober life to the glory of God's Holy Name; and also declared that the lay trustees should always be members of the Church of England. This was held by the Court of Appeal a charity for the benefit of members of the Church of England "as such," i.e., in their character of members of that Church, and to the exclusion of non-members thereof, and accordingly an ecclesiastical charity within sect. 75 of the Local Government Act, '94, of which the parish council had no power to appoint trustees.—In the other case of *In re Ross's Charity* a testatrix by her will (made in 1799) devised a rent-charge to be paid to the churchwardens for the time being of the parish on a certain day in every year for ever, and to be laid out in the purchase of garments to be given to "six old and poor widows of the said parish whom they shall judge the properest objects to receive the same, with preference to those who, not being disabled by infirmity or sickness, are most constant in their attendance on the public service of the church." This was held not to be an ecclesiastical charity, and the parish council had the right of appointing trustees.

Election Law.—An economical registration agent put the name and address of the voter objected to on the back of the objection paper only, where it served as an address, and reduced the inside matter to a circular costing only a halfpenny to transmit. It should have been inserted in the body of the notice, as required by the Registration Order, '95, schedule 1., form 5 (a). It was held that the notice of objection was good, although it did not strictly follow the form prescribed by the Order (*Linforth v. Butler*).—A small point rather arbitrarily decided was the following:—A voter, whose name was on the list of voters for a borough in respect of his place of abode, duly claimed to have it also inserted on the list in respect of his place of business, and gave to the revising barrister a notice of selection in proper form, selecting the entry of his place of business as the one to be retained for voting. The revising barrister allowed the claim, but held that

at the time the notice of selection was given there was no duplicate entry on the list of voters to which the notice could apply, and he accordingly marked the entry in respect of the appellant's place of abode as the entry to be retained for voting; and this was held right, and it was further held that there was no appeal (*Lloyd Jones v. Munro*).—A mistake in the number of the qualifying house (31 was written for 33) can be amended by the revising barrister (*Kitchen v. Johnson*); and so can a mistake of law. In a notice of objection to the retention of a person's name on the occupiers' list of voters in a borough the objector described himself as "on the list of Parliamentary electors and burgesses" for a certain parish in the borough, but incorrectly inserted as his place of abode his shop, which was his qualifying property, and at which, though he spent the greater part of the day there, he did not reside. His reason for so doing was that his shop was situate in the borough and his place of abode was at some distance from the borough, and he thought he ought to give his address within the borough. No one was misled by the misstatement, and the Queen's Bench Division held that the misstatement of the place of abode was a mistake which the revising barrister had power to amend (*Prescott v. Lee*).

Estate Duty.—An important decision that has reversed the practice of the authorities (*Attorney-General v. Beech*) was decided by the House of Lords. The tenant for life of settled property with a power of appointment appointed the property to her son, subject to her own life interest; and by a subsequent deed surrendered her life interest to the trustees of the settlement "to the end and intent that such life interest may merge in the interest in remainder of" her son. The lady died more than twelve months after, and the Commissioners claimed estate duty. It was held that the property did not pass on the death of the tenant for life to the remainderman within the meaning of the Finance Act, '94, sect. 1, or sect. 2, subsect. 1 (b), and that estate duty was not payable by the remainderman under that Act.—Settlement estate duty was held to be payable where a testatrix by her will bequeathed an annuity, and directed that a portion of her estate should be set apart to provide for the payment of the annuity, and subject thereto she bequeathed the said portion of her estate to another; and also where a testator bequeathed his residuary estate to trustees on trust to pay the income to his wife for life, and after her death to pay an annuity to each of his four daughters for life, and after the death of each of his daughters to raise certain named sums in trust for the children of such daughters (*Attorney-General v. Owen, Attorney-General v. Coulson*).

Gaming.—The House of Lords after the issue of the '99 volume gave its decision in the *Kempton Park* case. The facts were that adjacent to the racecourse there was an uncovered inclosure of about a quarter of an acre, called Tattersall's Ring, fenced in by iron rails, to which when race-meetings were held the public were admitted by the owners of the racecourse on payment of an entrance fee. Among the five hundred to two thousand persons usually found there were always one or two hundred professional bookmakers, and most of the persons admitted, other than the bookmakers, went for the purpose of backing

horses with the bookmakers, but some did not bet at all. The bookmakers, who were accompanied by their clerks, did not use any apparatus such as a desk, stool, umbrella, or tent, but any particular bookmaker was usually to be found in or near the same part of the inclosure, calling out the odds to attract backers. There was both ready-money and credit backing. The owners of the course knew what was done. The House of Lords (Lords Hobhouse and Davey dissenting) held that the ring was not "a place within the meaning of the Act," and that the dissenting shareholder was not entitled to an injunction. This decision is said to overrule *Hawke v. Dunn*. But *Hawke v. Dunn* was a criminal case decided by the supreme court of criminal appeal (the Queen's Bench Division), and it is doubtful what is the exact effect of the two decisions (*Powell v. Kempton Park Racecourse Co.*).—Other cases on the point were the following:—A bookmaker and his clerk entered inclosed grounds in which horse-races were being carried on, and put up a cane structure about five feet high, with four legs or supports, and having on the top a board on which were painted the words "Bob Patch" (the respondent's name), "London. All in run or not—pay first past the post." He stood on a box placed close to the structure, and invited people to bet with him; and, assisted by his clerk who stood near, made bets on each race with backers of the horses running. The Queen's Bench held this was using a "place for the purpose of betting with persons resorting thereto" within the meaning of the Act (*Brown v. Patch*).—In *Belton v. Busby and Woods*, a bookmaker was in the habit of attending at the bar of a licensed beerhouse daily at certain hours for the purpose of betting with persons resorting thereto, and he carried on there a business of ready-money betting with the knowledge and permission of the licensed occupier of the beerhouse. His hours of attendance at the beerhouse were known to his customers, who came there for the purpose of transacting betting business with him. The beerhouse-keeper had no interest in the bets made, and the bookmaker had no interest in, or control over, the business of the beerhouse or the house itself. The bookmaker was convicted, and the Queen's Bench upheld the conviction. See also *Kitson v. Ashe*, under "Local Government."—A contract on the "cover" system for "differences" is not the less a contract "by way of gaming or wagering" because the contract gives the buyer or seller an option to demand delivery or acceptance (as the case may be) of the stocks or shares (*In re Gieve*).

Insurance.—An insurance against burglary does not cover theft, and in a case in the Court of Appeal the risk insured against was expressed in the policy to be loss of the property insured. "by theft following upon actual forcible and violent entry upon the premises wherein the same is herein stated to be situate." The insured property, which was stated in the policy to be situate on premises No. 78, Strand, was in a shop at that address, the front door of which was shut, but not locked or bolted, and access to the shop could be obtained by turning the handle of the door. In the early morning, before business hours, during the temporary absence of a servant of the assured, some person opened the front door, entered the shop, and, breaking open a

locked-up compartment or show-case within, which formed a portion of the shop, stole therefrom part of the insured property. The company refused to pay, and the Court of Appeal upheld them (*In re George and Goldsmiths and General Burglary Insurance Association*).

International Law.—A decree for divorce had been pronounced by the proper Court in Florida in an undefended action by the husband against the wife on the ground of her violent and ungovernable temper, both the parties being domiciled and resident in Florida; and, in an action brought by the wife in the English Courts to enforce a claim arising out of her alleged second marriage to a British subject, an alleged irregularity in service of process was held not to be a ground for questioning the validity of that decree, the Court in Florida having had full jurisdiction over the cause and the persons, and the Court of Appeal here holding that to grant a divorce for such a cause was not contrary to English views of substantial justice (*Pemberton v. Hughes*).

Landlord and Tenant.—An assignee of a lease on assigning ceases to be liable for future breaches of covenant by the lessee, but not for past; but if he assigns without covenants for title and obtains from the assignee the usual covenant thenceforth to pay the rent reserved by the lease, and perform the lessee's covenants therein contained, and to keep the vendors indemnified from the payment and performance thereof respectively, he can make his assignee pay him any amount he may have to pay for damages in respect of past breaches (*Gooch v. Clutterbuck—Davis third party*).—A lease of land in the Metropolis contained the usual covenant by the lessee to bear, pay, and discharge charges, duties, assessments, and impositions charged, assessed, or imposed upon the premises, or upon the landlord in respect thereof. The District Board of Works gave notice to the landlords of apportionment of expenses of paving a new street, under the Metropolis Management Act, '55, sect. 77, fixing no date for payment, and prior to the work being done and shortly before the expiration of the lease. The landlords paid the amount claimed before the expiration, but the work was not commenced until the lease had expired. Mr. Justice Gainsford Bruce held that when the district board gave notice to the landlords of the apportionment and charge, the charge became operative, and the landlords became liable to pay the amount, and were entitled to recover it from the tenant (*Wix v. Rutson*).—Under a similar covenant Mr. Justice Byrne held the lessee liable to pay the cost, amounting to £143, of repairing the drains, which were in bad order owing to certain structural defects, although the notice to repair being under sect. 85 of the Metropolis Local Management Act, '55, as amended by the Act of '62, sects. 64 and 95, the expenses were imposed upon the owner (*Farlow v. Stevenson*).—A landlord having verbally agreed with his yearly tenants to grant them a lease for twenty-one years of the messuage held by them (without the inclusion in the lease of any additional property) at an increased rent, the tenants for some time afterwards paid the increased rent. This was held a sufficient part performance to take the case out of the Statute of Frauds that requires an agreement for a lease for more than

three years to be in writing (*Miller & Aldworth, Ltd. v. Sharp*).—In *Moritz v. Knowles* the plaintiffs, in replying to an offer of a lease, agreed to take the lease if the house was put into a satisfactory sanitary state. The landlord never agreed to do this, and subsequently repudiated his offer of the lease. Held there was no contract, as the parties were never *ad idem*, and the defendant having repudiated, the plaintiffs could not then waive the condition they had imposed.—It is not necessary to maintain a distress that any one on the landlord's behalf should be left in possession of the goods, the goods having been impounded on the premises (*Jones v. Bernstein*).—"Adjoining premises" do not include all the houses in a block of buildings, but are confined to the next-door premises (*Vale & Sons v. Moor-gate Street and Broad Street Buildings, Ltd.*).

—The assignee of leasehold premises mortgaged the premises by way of sub-demise. The mortgage provided that, upon default by the mortgagor, the mortgagees might enter into possession or receipt of the rents and profits of the premises, and demise or sell the same, and out of moneys so received by them, whether as rents and profits or purchase-money, should in the first place pay the rent reserved by the original lease. The mortgagees, having entered into possession, did not pay rent which accrued due under the lease while they were in possession, and the original lessees were compelled to pay it. The Court of Appeal held they could not recover against mortgagees in possession (*Bonner v. Tottenham and Edmonton Permanent Investment Building Society*).—Under a proviso for re-entry in the event of liquidation or bankruptcy a voluntary winding-up, not by reason of insolvency, but for the purpose of reconstruction with additional capital, is a liquidation within the meaning of the condition, and the condition runs with the land. But a sufficient notice must be given under sect. 14, subsect. 1, of the Conveyancing and Law of Property Act, '81, as a condition precedent to enforcing the forfeiture, the effect of sect. 2, subsect. 2, of the Conveyancing and Law of Property Act, '92, being to take the case of a forfeiture on bankruptcy or liquidation out of subsect. 6 of sect. 14 of the Conveyancing and Law of Property Act, '81, for a year from the date of the bankruptcy or liquidation. A covenant by the lessees for themselves and their assigns not to assign or underlet the premises without the consent of the lessors, which was not to be unreasonably withheld, is not broken by an agreement for the sale of the lease, by which it was provided that at a certain period, though the purchase might not then be completed, the purchasers should be let into possession of the premises, and should from that day pay the rents and outgoings in respect of the same, followed by a letting into possession under that agreement, the purchase remaining uncompleted (*Horsey Estate, Ltd. v. Steiger and Petrifite Co.*).—There is a breach of such a covenant and the forfeiture was enforced where the lessees, without asking for the consent of the lessors, underlet a part of the premises to a tenant who already occupied under the lessors, and to whom no objection could have been reasonably taken. For the fact that the breach of covenant had been committed through forgetfulness, or because the lessees thought it unimportant, did not form a ground for giving them equitable relief against

forfeiture for breach of the covenant (*Eastern Telegraph Co. v. Dent*).—To maintain a distress it is not necessary to keep a man in possession if the goods are once impounded; and the real owner, a furniture dealer, was held liable for treble value who seized, during the absence, goods that had been distrained on for rent in the house of the hirer (*Jones v. Bernstein*).

Licensing Laws.—The most famous but not the most important case decided under the Licensing Laws was the House of Commons case. The charge made was against a servant of the House of Commons for having sold liquor, the property of the House, at a bar within the precincts of the House, to a person not a Member of either House of Parliament, the place where it was sold being of course not licensed for the sale of liquor; and the Queen's Bench held that the respondent was not guilty of an offence against the Act, and could not be convicted, not because the House of Commons had any special privilege, but because the provisions of sect. 3 of the Licensing Act, '72, imposing penalties for unlawful sale of liquor without a licence, do not apply to a servant selling liquor, the property of his master, by his master's order. You must summon the master (*Williamson v. Norris*).—A person who, after taking a ticket at a railway station, obtains intoxicating liquor at the refreshment-room at the station during prohibited hours and then leaves by train, even though he took the ticket in order to obtain the intoxicating liquor before starting, cannot be convicted of obtaining intoxicating liquor during closing hours by falsely representing himself to be a traveller, but is within the exemption in favour of persons arriving at or departing from a railway station by railroad (*Williams v. Macdonald*).—A licensed victualler cannot be convicted of keeping a room for public entertainment without a licence who has in the public smoke-room of his house a pianoforte on which customers are in the habit of playing for the amusement of themselves and others resorting to the room. The licensee made no extra charge either for the use of the piano or for the entertainment thus afforded, nor did he pay or encourage the performers (*Brearley v. Morley*).—In fixing the rateable value of a public-house where the rents actually paid for other public-houses in the district furnish no criterion of the rent which would be paid for the particular house, the amount of the weekly takings cannot be considered, but the largeness of the business actually done, and the advantageous situation of the house for carrying on business can be. (The Court of the Appeal in *Cartwright v. Sealcoates Union*.)

Local Government.—One of the most interesting cases in connection with Local Government was the case in which a mandamus was granted by a Queen's Bench Divisional Court at the suit of the Local Government Board against the *Leicester Guardians* to compel them to appoint a vaccination officer. The guardians refused to appoint such an officer because the Local Government Board had issued a circular requiring vaccination officers to institute prosecutions for non-vaccination without the authority of the guardians being first obtained, and they were supported by other Boards. They also refused to obey the mandamus. On Nov. 22nd the Solicitor-General applied for and obtained a rule *nisi* for the attachment of the

twenty-six members who had voted in favour of disobedience to the writ, but not against those who had voted in favour of obedience, but the Board eventually resolved to comply.—The Corporation of Windsor, by a decision of the House of Lords, have lost their right to take tolls on the Eton and Windsor Bridge. They had a prescriptive right to take certain customary tolls up to 1734, when they obtained a local Act which, after reciting their right to take the customary tolls, enacted that the said customary tolls should be and remain vested in them, and empowered them to take the said tolls, with a variation as to the exemption of freemen of the borough. In 1819 the Corporation obtained another local Act, which repealed the former Act and empowered them to take down the old bridge and build a new one, and to take tolls which varied from the old tolls in amount and subject-matter. This Act was temporary and had expired, and it was held that the prescriptive right to take tolls had been merged in and extinguished by the statutory right given in 1734, and neither had nor could have been revived by the later Act, and that the right to take tolls expired with the later Act (*New Windsor Corporation v. Taylor*). A local authority, empowered to make bye-laws for the regulation of buildings within its jurisdiction, cannot sanction plans in contravention of byelaws properly made. An "approved" plan is a plan which has been lawfully approved by a local authority, and not one which has merely received their approval in fact (*Yabbicom v. King*).—Under a power to take compulsorily "for the purpose of the street works, the lands shown on the deposited plans in connection therewith and which they may require for the purposes thereof respectively," a corporation cannot take lands fronting the new lines of street, not for the construction of the street works, but merely for the purpose of resale at a profit so as to reduce the cost of the street works (*Donaldson v. South Shields Corporation*).—An order can be made for the removal of a person suffering from an infectious disease, although it is proved that he had proper lodging and accommodation as far as he himself was concerned, if he could not be sufficiently isolated, and that there would be danger of infection to the other inmates of the house, sect. 124 of the Public Health Act, '75, being directed to the protection of persons from infection, and not merely to the protection of the sick person himself (*Warwick v. Graham*).—There is no right to drain sewage from private property into a surface-water drain, although it may be the only sewer available. Cesspools must be provided by the owner (*Kinson Pottery Co. v. Poole Corporation*).—A case of interest to visitors to the seaside was the action brought by the Llandudno Urban Council against a clergyman of the Church of England, who in June '98 visited Llandudno, and applied to the council for permission to hold religious services and deliver addresses on the beach; this was refused. He, however, held the services, and delivered addresses on the beach at which he strongly denounced the Ritualistic party in the Church of England. The council held a lease of the foreshore from the Crown, and applied to the Chancery Division for a declaration that the clergyman had no right to do what he did, and for an injunction to restrain him; and when the trial came on this year they

got their declaration but not their injunction, and had to pay their own costs (*Llandudno Urban District Council v. Woods*).—The Middlesbrough Corporation has power to make "such byelaws as they may think fit for the prevention of betting in the public streets and other places of public resort within the borough." The corporation made a byelaw that "any person who should frequent and use any street or other place of public resort within the borough for the purpose of bookmaking or betting should be liable to a penalty." A bookmaker used for the purpose of bookmaking an uninclosed piece of private ground within the borough, bounded by streets. Bookmakers and other persons habitually used the ground for betting, but without permission from the owner. The bookmaker conducted his business in an orderly manner, and caused no nuisance, annoyance, or obstruction. He was convicted, and the Queen's Bench upheld the conviction under the byelaw (*Kitson v. Ashe*).—The decision in *Penny v. Wimbledon Urban District Council* noted last year under the heading "Negligence" was affirmed by the Court of Appeal.—A county council cannot be compelled by mandamus to pay the expenses of the maintenance of troops brought into a county, on the application of the county magistrates, for the purpose of suppressing riots and preserving peace and order in the county (*Reg. v. Glamorgan County Council*).

Master and Servant.—The most important group of cases in this branch of the law during the year have been those decided by the Court of Appeal on various points arising on the interpretation of the **Workmen's Compensation Act**. These will be found grouped under the headings:—What is in the course of the employment; What is a factory, etc. (under which heading will be found the cases deciding to what classes of work the Act applies); What is "on, in, or about a factory, building, or engineering work"; What is ability to earn, a very nice point having arisen as to the result of the benevolence of the employer on the workman's legal rights; What is the same employment; and Who are dependants; while at the end will be found one or two points of practice.—**What is in the course of the employment.**—A fireman in a coal-pit employed to report to the colliery office on the state of the mine was riding, in breach of his orders, upon a tram laden with ashes and drawn by a horse in the direction of the office. The horse bolted, and the man ran to check it, in attempting which he fell, and was run over by the tram. Held liable (*Rees v. Thomas*).—A boy was employed in a pottery; his duty was to make balls of clay and hand them to the woman working at a machine, and he was forbidden to interfere in any way with the machinery. He sustained an injury through attempting to clean the machine while the woman was temporarily absent. Held not liable (*Lowe v. Pearson*).—A ticket-collector got upon the foot-board of a train after it had started, not for any object of his employment, but to talk to a friend. In getting off he was injured. Held not liable (*Smith v. Lancashire and Yorkshire Railway Co.*).—A firm of contractors contracted with a railway company for the construction of sidings near their railway. In order to get to their work the workmen of the contractors had to get upon the premises of the railway company by one of two gates. The use of one of

them necessitated crossing the main line of the railway; the use of the other did not. On a foggy morning a ganger in the employment of the contractors, while going to his work, was killed by an express train on the main line, seven minutes before the time for commencing work, and about 150 yards from the locality of his work. Held not liable, it being expressly held that the deceased's work did not begin when he got upon the premises of the railway company and was still going to his work (*Holness v. Mackay and Davies*).—The workman was employed in a colliery to clear away coal from the roadway of the mine. He got a mandril and set to work to mine some coal, and was killed by the coal falling on him. Held not liable (*Edwards v. International Coal Company*).—**What is a factory, etc.**—A workman was employed in a shed to look after a steam-engine connected with a mortar-pan for mixing mortar for use on a building near at hand. While so employed he sustained personal injuries through an accident. Held liable, because, as the engine was being temporarily used for the purpose of the construction of a building, the provisions mentioned in sect. 23 of the **Factory and Workshop Act, '95**, had effect as if the shed were a factory; so that a provision of the Act, namely sect. 4, relating to the power to make an order as to a dangerous machine used in a factory, applied to the engine, which therefore came within the definition of a factory in sect. 7 of the **Workmen's Compensation Act, '97**, and compensation could be claimed under that section (*McNicholas v. Dawson & Son*).—A building, which measured 28 feet in height from the ground to the parapet, and 36 feet to the ridge of the roof, was erected as stables for an omnibus company. Six months after its completion, and after the commencement of its use as stables, the company employed a firm of ironmasters to strengthen the building by introducing iron stays which were fastened to the girders and the upright iron columns supporting the building. A workman in the employ of the ironmasters, while standing inside the building at a height of 8 feet from the ground upon a scaffold, fell while lifting one of the iron stays and received injuries which proved fatal. The Court of Appeal held that the building was a building exceeding 30 feet in height within the meaning of sect. 7, subsect. 1, of the **Workmen's Compensation Act, '97**; that for the purposes of that section it was immaterial whether the scaffolding was inside or outside the building; but that the building was not being "constructed or repaired," and that therefore the employer was not liable (*Hoddinott v. Newton, Chambers & Co.*).—But a building is within the Act on which machinery driven by steam, water, or other mechanical power, is being used for the purpose of the construction, repair, or demolition thereof, although the building does not exceed 30 feet in height (*Mellor v. Tomkinson & Co.*).—A building is not within the Act which is in the course of construction and is intended when completed to exceed 30 feet in height, if it does not at the time of the accident exceed that height (*Billings v. Holloway*).—The expression "repair" in sect. 7, subsect. 1 of the **Workmen's Compensation Act, '97**, does not include merely "painting" the outside of a building which exceeds 30 feet in height. A ladder is not a scaffolding within the meaning of sect. 7, sub-

sect. 1; nor is an erection of a ladder placed outside the building with one end of a plank tied to a rung of the ladder and the other end resting on a window-sill a scaffolding (*Wood v. Walsh*).—What is “on, in, or about.”—The following cases were decisions on the point of what is employment “on, in, or about a factory”:—A harbour was being dredged by a steam dredger belonging to the harbour commissioners, the mud being discharged from the dredger into hoppers, which when full were taken by a tug out to sea and there emptied, the workmen employed by the commissioners on the dredger going with the hoppers for that purpose. The man was drowned while emptying a hopper out at sea. Held not liable (*Chambers v. Whitehaven Harbour Commissioners*).—A carter, in the employment of the owners of a factory, was injured while unloading goods from a cart of his employers at a distance of a mile and a half from the factory. Held not liable (*Lowth v. Ibbotson*).—A cart, belonging to the owners of a factory, was standing in a street, close to the entrance to the factory yard, in a position in which it was usually loaded. A workman in the employment of the factory owners was engaged in loading the cart, and was injured while doing so. Held liable (*Powell v. Brown*).—Where a ship was unloading in a dock by means of a crane on the quay hired by her owners, a workman employed by them in unloading her was killed by the explosion of a case of percussion-caps which he was placing in a basket attached to the chain of the crane for the purpose of its being hoisted out of the ship on to the quay. Held liable (*Woodham v. Atlantic Transport Co.*).—A workman was employed on a wharf at the side of a canal, on which no machinery was used, and to which no provision of the Factory Acts applied by the Factory and Workshop Act, '95. Held not liable (*Hall v. Snowden, Hubbard & Co.*); and therefore a workman employed on board a ship lying in dock is not employed on, in, or about a dock, and is not employed on, in, or about a factory within the meaning of sect. 7, subsect. 1, of the Workmen's Compensation Act, '97, whether the dock itself is a factory within the meaning of subsect. 2 of that section or not (*Flowers v. Chambers*).—What is ability to earn.—A case that threatened to destroy the Act altogether was *Irons v. Davis & Timmins, Ltd.* A boy lost the top of his right thumb by accident under circumstances to which the Act applied. The employers took him back, set him to odd jobs, and paid him the same wages. The Court of Appeal inclined to hold that he was entitled to no compensation, but, with the consent of the employers' counsel fixed the weekly payment at *1d.*, leaving open the power given under the Act to revise. It was contended, after this case was decided, in many county courts that the *1d.* was a mere act of grace, and that the decision of the court was that the boy was entitled to no award. The effect of this would have been that any employer paying full wages to an injured workman for the first six months during which the arbitration must take place would be clear of any further liability. But this view of the decision was finally held wrong in the case of *Chandler v. Smith*. The workman was employed as foreman in a carpet-weaving factory; his principal duty was to supervise the hands, but he also, to the knowledge of his employer, used to set up and adjust the machines.

While adjusting a machine he received an injury necessitating the amputation of his thumb; he continued however to attend regularly to his work, only absenting himself from the factory for a sufficient time to enable him to have his hand dressed. He was incapacitated by the accident from setting up and adjusting the machines, and his work was afterwards confined to the supervision of the hands. His employer continued to pay his wages at the same rate after as before the accident; but it was admitted that, should he leave his employer's service, his wage-earning power as a foreman in any other factory would be materially decreased; and on these facts, very similar to *Irons*'s, the employer making no offer, the Court of Appeal held that as the workman had been prevented by reason of the accident from doing a substantial part of the work at which he had previously earned his wages, he had been disabled for two weeks from earning full wages “at the work at which he was employed” within the meaning of sect. 1, subsect. 2 (a), of the Workmen's Compensation Act, '97, because the Court said “earn” meant legally entitled to recover, the workman having fully performed the duties for which he was engaged, and therefore that under these circumstances the proper course was to make a declaration of the liability of the employer, leaving the amount and duration of the compensation to be fixed upon an application under schedule 1, clause 12, to vary the award, should the workman at any future time be unable by reason of the accident to earn the same wages.—What is in the same employment.—A workman was employed for a period of twelve months by the same employer. During that period the character of his employment was altered and the amount of his wages increased. The change in the character of the employment did not affect the compensation to which he was entitled under the first schedule to the Workmen's Compensation Act, '97, which should be arrived at from his average weekly earnings during the whole of the previous twelve months (*Price v. J. Marsden & Sons*).—A workman was employed by a firm of coal-owners from Oct. 3rd, '97, to March 31st, '98, when the workman went out on strike and the contract of employment was duly determined by notice. He remained on strike for five months, and on Sept. 12th, '98, again entered the service of the same employers under a fresh contract of employment containing different terms. The injury happened on Oct. 3rd, '98. The Court of Appeal held that the period of employment contemplated by schedule 1, clause 1 (b), was a substantially continuous employment during which the relation of master and servant substantially existed between the employer and workman, and that, therefore, the employment between the end of the strike and the date of the accident could alone be regarded (*Jones v. Ocean Coal Co.*).—Who are dependants.—A workman resided with his parents, to whom he gave his wages. The father, who was thirty-four years of age and in receipt of full wages, stated that the earnings of the workman were a help to maintain his family. The county court judge having found that the parents were in part dependent upon the earnings of the workman within the meaning of sect. 7, subsect. 2, of the Act, the Court of Appeal held that the words “dependent upon the earnings” in that sub-

section meant dependent thereon in the proper sense of the term for the ordinary necessities of life, having regard to the class and position of the parties; and that, as it appeared that the county court judge had adopted this construction, the court could not interfere with his finding upon the question of fact whether the parents were so dependent (*Simmons v. White*).—In *Griffiths v. Davis & Son, Ltd.*, the workman who was killed lived apart from his mother (the applicant), and made payments to her of 10s. to £1 a fortnight. She lived with a son and daughter who also helped her. The mother was held to be a dependant.—*Practice*.—A county court judge sitting to hear an application for compensation under the Workmen's Compensation Act, '97, is acting as an arbitrator only, and has no jurisdiction to grant a new trial (*Mountain v. Parr*); in practically all the cases that have gone to the court on appeal, the court has required the appellant to give security for costs to the extent of £15.—A case quite outside any of the Acts was *Marney v. Scott*. The defendant chartered a vessel, which was at the time at sea and in ballast, for a single voyage. The charter-party declared that she was in every way fit for the service, and provided that she should be so maintained by the owners. On the afternoon of April 5th the vessel was put at the defendant's disposal in dock, and two hours afterwards the loading began, the defendant having contracted with a stevedore for the purpose. Fifteen minutes later the plaintiff, one of the men employed by the stevedore, in the course of his work had to descend a ladder leading into the hold. It came adrift, and the plaintiff fell, sustaining injuries for which he successfully sued the defendant, because it was his duty under the circumstances to make some inspection of the vessel before allowing the stevedore and his men to go on board her, and the slightest inspection would have revealed the defective state of the ladder.

Negligence.—The National Telephone Company were lawfully engaged in laying telephone wires along a street. The wires passed in the usual way through tubes laid in a trench under the level of the pavement. The company employed a plumber to connect these tubes at the joints with lead and solder to the satisfaction of the company's foreman at the sum of 12s. per joint. In order to make the connections between the tubes, it was necessary to obtain a flare from a benzoline lamp, which could not be done without the application of heat to the lamp. The lamp used for the purpose was provided with a safety-valve. The plumber, for the purpose of obtaining the necessary flare, dipped the lamp into a caldron of melted solder, which was placed over a fire on the footway for the purpose of the work, and which was unprotected by any screen or tent. Dipping the lamp into the solder would have been a proper and usual mode of obtaining the flare, provided the lamp had been in good order. The safety-valve of the lamp not being in working order, as the plumber ought to have known, the lamp exploded, with the result that Mr. Holliday, who was passing on the highway, was splashed by the molten solder and thereby injured. The Court of Appeal held the company liable, because, first, there was evidence that the company and the plumber were jointly engaged in the performance of the work under such circumstances as to render

the company liable for the negligence of which the plumber had been guilty; and, secondly, that, even if the plumber were an independent contractor, the company, having authorised the performance upon a highway of work, which from its nature was likely to involve danger to persons using the highway, were bound to take care that those who executed the work for them did not negligently cause injury to such persons (*Holliday v. National Telephone Co.*). For other cases of negligence, and for the cases of workmen's compensation, see under "Master and Servant."

Railways.—The National Cyclists' Union raised the question whether a bicycle was "ordinary luggage" within the meaning of a railway Act, by which every passenger travelling in a carriage of a certain class may take with him his ordinary luggage, not exceeding a certain weight, free of charge; but it was decided it was not, and that a passenger is not entitled to take a bicycle, not packed up, free of charge, although of less weight than the weight of luggage allowed to be carried free of charge by the class in which he is travelling (*Britten v. Great Northern Railway Co.*).—The forwarding of goods at owners' risk will not relieve the railway company from liability for delay where they do not forward them by the agreed route, as the delay of the goods is not a delay in the performance of the contract (*Mallet v. Great Eastern Railway Co.*).—Under sect. 48 of the Railways Clauses Act of '45, a railway train is not allowed to cross a level crossing at a greater pace than four miles an hour, and an injunction was granted against the London and North-Western Railway Co., although there was no injury to the public (*Attorney-General v. London and North-Western Railway Co.*).

Stamps.—The ordinary form of telephone agreement with a rent of £12 requires not a 6d. but a 7s. 6d. stamp (*National Telephone Co. v. Inland Revenue Commissioners*).—A hiring agreement for the hire and sale of goods requires no stamp. A £100 debenture redeemable at £103 requires a stamp calculated on the £103 and not on the £100 only (*Knight's Deep, Ltd., v. Inland Revenue Commissioners*).—A receipt given to a solicitor employed by a bank under an agreement whereby he was appointed an officer of the bank upon the terms that he was to be paid a salary, and to be provided with an office, stationery, and staff of clerks, and was to devote his whole time to the conduct of the legal business of the bank, and who recovered debts due to the bank and entered the amount in an account book, and then in accordance with his duty handed over the money to the secretary or cashier of the bank, who wrote against the entry in the account-book his initials and the date on which the money was handed over to him, in some instances adding the word "received," requires a stamp (*Attorney-General v. Carlton Bank*).—It is finally decided against the Commissioners that an assignment of a portion of the property comprised in a lease does not require a lease stamp on the apportioned rent (*Swayne v. Inland Revenue Commissioners*).

Trade.—The goodwill of a partnership business is one of its assets or effects, and on the death of one partner the partnership deed providing that "in case of the death of one of the partners a general account of the position shall be made, including all effects and securities—

of whatsoever nature that they possess, and the value of such effects and securities be estimated as at the date of such decease." The value of the goodwill ought to be appraised on the footing that, if it were sold, the surviving partner would be at liberty to carry on a rival business, but would not have the right to solicit any person who was a customer of the old firm prior to the death of the deceased partner, or the right to carry on business under the old firm's name, of course such name not being identical with his own (*In re an Arbitration between David and Matthews*).—The rule that a loan which, instead of interest, entitles the lender to a share of profits, can only be paid in the event of bankruptcy after all the other debts are paid was illustrated in the case of *In re Mason, ex parte Bing*, decided by Mr. Justice Wright.—Where it is proved that a bribe has been given to an agent it is immaterial to inquire what effect the bribe had on the mind of the agent. Where the agent was a veterinary surgeon employed to report on horses the subject of a sale, the offer and acceptance of a bribe invalidated the certificate, and the seller could not recover under a contract which depended on the validity of the certificate (*Shipway v. Broadwood*).—Where an agent makes a contract purporting to sell goods in the name of a principal, but with the fraudulent intention of selling them on his own account and for his own benefit, the principal can ratify and take the benefit of the contract as against the buyers (*In re Tiedemann and Ledermann Frères*).—The Court of Appeal (Lindley M.R. and Rigby L.J.), with Vaughan Williams L.J. dissenting held that where hay and straw merchants at Brentford who carried on an extensive wholesale and retail trade in the United Kingdom, France, Belgium, and Canada, and had permanent places of business in the United Kingdom and France, required a covenant from their clerk and foreman in Calais, at a weekly wage of 35s., that he would not, for the space of twelve months next after his leaving or being dismissed, carry on the business of a hay and straw merchant, or enter into the service of, or act as agent for, any person or persons carrying on the business of a hay and straw merchant, in the United Kingdom, or in France, or in the kingdom of Belgium, or Holland, or in the Dominion of Canada; that the restraint imposed on the defendant was not unreasonable, at any rate so far as the United Kingdom was concerned; that the covenant was not void on any ground of public policy; and that the defendant must be restrained from violating his covenant; but Vaughan Williams L.J. held that the covenant was unreasonable and invalid, and ought not to be enforced by injunction, and the old rule of law that all covenants in restraint of trade are *prima facie* contrary to public policy, and therefore void, has not been rescinded by recent decisions. (*E. Underwood & Son, Ltd. v. Barker*).—In the House of Lords the Manchester Brewery Company, Limited, succeeded in restraining "The North Cheshire Brewery Company, Limited," from becoming incorporated and registered under the name "The North Cheshire and Manchester Brewery Company, Limited," there being no intention to deceive the public into the belief that the two companies had amalgamated (*North Cheshire and Manchester Brewery Co. v. Manchester Brewery Co.*).—It was held in *Johnson v. Boyes* that a vendor who offered property for sale by auction on the terms of

printed conditions could be made liable in damages to a person who accepted the offer and complied with the conditions, if those conditions were violated by the vendor, and that the Statute of Frauds would be no defence; but that no custom had been proved obliging a vendor to accept, in payment of a deposit, the cheque even of a person in credit, although such a course was usual; and that no such custom could bind a vendor to accept a cheque from a pauper; that the conditions meant that the deposit was to be paid in cash, and the vendors were not bound to wait till the next day for it, or to sign the contract until this condition precedent had been performed.—A preference is not void under the bankruptcy laws, unless it is fraudulent, because it is made without pressure; and where a trustee, who had committed breaches of trust and was insolvent, on the eve of his bankruptcy conveyed an estate to make good the breaches of trust, without any pressure or request by his *cestuis que trust*, the House of Lords held that there was no fraudulent preference within sect. 48 of the Bankruptcy Act, '83, the debtor's object being to shield himself from the consequences of his breaches of trust.—**Bankruptcy cases.** The following three cases deal with points under the Bankruptcy laws:—In *In re Frances Handford & Co.* it was held by the Court of Appeal that a receiving order cannot be made against a married woman trading separately from her husband under a firm name on the ground of non-compliance with a bankruptcy notice founded upon a judgment obtained against her in the firm name; and in *In re Niel Mackenzie* the Court of Appeal held that the right of the landlord under the statute 8 Anne, ch. 14, sect. 1, to payment of his arrears of rent is not displaced by the interposition of a bankruptcy petition on which a receiving order is made subsequently to notice of landlord's claim, between sale under an execution by the sheriff and notice to the sheriff of the landlord's claim.—In *In re Roberts* Mr. Roberts, the billiard player, had the misfortune to become bankrupt. During the bankruptcy he received each year, under a contract with a firm of billiard-ball makers, billiard balls of a particular make, worth £600, with which he contracted to play exclusively. It was held that he must pay to his trustee £400 out of the £600, and that the whole £600 could not be held to personal earnings.—A coal merchant at Cardiff, having contracted with shipowners for the supply of coal to their steamers there, entered into a contract with a colliery company for the supply to him of coal, which was expressly stated to be for shipment in those steamers. The company committed a breach of their contract in not supplying coal under it with reasonable despatch, in consequence of which the supply of coal to one of the steamers was delayed and the steamer was detained. The shipowners thereupon made a claim of £150 against the merchant in respect of her detention, and subsequently brought an action against him to enforce their claim. He gave notice of the claim and action to the defendants, who repudiated all liability, and refused to take up the defence, stating, however, that they considered the claim preposterous and the amount of it excessive. The coal merchant defended the action, paying £20 into court, and at the trial he succeeded in showing that the sum so paid in was sufficient. In his

turn the coal merchant brought an action against the company, and got his £20 and his solicitor and client costs of the first action (*Agius v. Great Western Colliery Co.*).—The consignor of milk is liable to penalties under sect. 6 of the Foods and Drugs Act, '75, even where the milk is delivered in a pure and unadulterated condition to the railway company at the consignor's local station, and adulterated without the knowledge or consent of the consignor during the transit from the local station to the terminus (*Parker v. Alder*).—**Weights and Measures.**—It is a sufficient compliance with the Weights and Measures Act, '91, requiring the insertion on the ticket of the seller's name, to insert the name under which the seller carries on his business, so a sole trader who filled in his business name, Co-operative Coal Company, was held to have complied with the section (*Cameron v. Tyler*).—A quite unnecessary case on the same section was *Edwards v. Purnell*. Coal supplied to an asylum was to be weighed on the asylum weighbridge, and the weight there ascertained before delivery was accepted by the committee. At the conclusion of the weighing, and before any part of the coal was unloaded, the purchasers' storekeeper, instead of the vendor's carman, in pursuance of the arrangement between the parties, filled in upon the ticket the weight of the coal and vehicle, the tare weight of the vehicle and the net weight of coal delivered; the ticket was then detached from the book, and handed by the carter to the storekeeper, and the coal was unloaded.—**Banking.**—By sect. 82 of the Bill of Exchange Act, '82, where a banker, in good faith and without negligence, receives payment for a customer of a crossed cheque, and the customer has no title, or a defective title, the banker incurs no liability to the true owner by reason only of having received payment. A case arose where a rate collector, who had been in the habit of receiving cheques for rates, and cashing them at a country branch of the London and County Bank, where he was known, but had no account, by falsely pretending that a rate was due obtained a cheque, drawn to his order on a London bank, crossed generally, and marked "not negotiable," which he presented at the branch bank, where it was cashed. It was found as fact on the trial of the action that the bank received payment in good faith and without negligence, that they received it for the collector, and that the collector was a customer and therefore the bank protected by sect. 82, and was not liable.—The custom of sending with a bill of lading a bill of exchange for acceptance, while it gives no title to the goods to the consignee unless the bill is accepted, enables the consignee to give a good title to a third party who takes the bill of lading in good faith, and without notice of the rights of the original sellers in respect of the acceptance of the bill of exchange under sect. 25, subsect. 2, of the Sale of Goods Act, '93, and that the sellers had no right to stop it *in transitu* (*Cahn and Mayer v. Pockett's Bristol Channel Steam Packet Co.*).—A trader pledged with a bank, as security for an advance, eighteen hogsheads of tobacco which were in the custody of warehousemen. He subsequently repaid the advance on one of the hogsheads, and presented to the bank for their signature a delivery order on which the place for the quantity was left blank. The bank signed the order, and the trader having filled in

the blank space with the words "eighteen hogsheads," obtained delivery of them all and then disposed of them. In an action against the warehousemen for the conversion of the seventeen hogsheads it was held that the bank could not succeed, since they had impliedly given authority to fill up the blank in the delivery order, and were now estopped from showing that that authority was limited; but in a second action the bank had signed a properly-drawn delivery order in respect of one consignment and the trader subsequently added above their signature the description and distinguishing marks of a second consignment, and thus obtained delivery of both consignments, and it was held that an action for conversion would lie against the warehouseman, since the plaintiffs had not been guilty of any negligence which was the proximate cause of the wrongful delivery (*Union Credit Bank v. Mersey Docks and Harbour Board and North and South Wales Bank*).

Trade Unions.—Three important cases on watching and besetting were the following:—A perpetual injunction will be granted to restrain trades unionists from watching or besetting, because (1) it is an offence within sect. 7 of the Conspiracy and Protection of Property Act, '75; and (2) it is a nuisance at common law for which an action on the case would lie, for such conduct seriously interferes with the ordinary comfort of human existence and the ordinary enjoyment of the house beset; and the injunction will be granted when the house watched and beset is not that of the workman sought to be affected but that of the employer (*Lyons & Sons v. Wilkins*).—The following facts were held to constitute a watching and besetting:—During the pendency of a strike two agents of a trade union attended at a landing-stage to await the arrival of a steamer containing workmen imported by the masters from Ireland to replace the men on strike, and, on the arrival of the steamer, they informed the Irish workmen of the strike, and offered to pay their expenses if they would go elsewhere to work (*Charnock v. Court*).—And in *Walters v. Green* it was held that one firm of employers might sue for an injunction where it was alleged that the union men having ascertained that the Masters' Association were importing men to Hull, thereupon, with the intention of injuring the plaintiffs and other members of the Masters' Association in their trade, and thereby compelling the plaintiffs and other members of the association to accept the terms of the unions, wrongfully and without lawful excuse combined and conspired together to watch and beset the Hull railway stations and other places where workmen brought to Hull by the Masters' Association might happen to be, and the approaches thereto, for the purpose of persuading or otherwise inducing such workmen not to work for the plaintiffs, or any of them, or any other member of the Masters' Association, and did in fact persuade or induce many of such workmen to leave Hull, or refuse to work for the plaintiffs, or any of them, or any other member of the Masters' Association, by reason whereof the plaintiffs had been injured in the lawful conduct of their respective businesses and had suffered damage; and that it was no objection that the imported workmen had been intercepted before any firm had been specified by the association, since the intercepting of the men so as to deprive a particular

master of the chance of employing those particular men was a sufficient damage to enable the master to sue.—*In re Printers and Transferrers' Amalgamated Trades Protection Society*, a trade union raised funds, by means of weekly contributions, to defend and support its members in obtaining and maintaining reasonable remuneration for their labour. There were two classes of members, one subscribing twice as much as the other, and being entitled to receive twice as much strike or lock-out pay; the scale of payments also varied with the length of time a member had belonged to the society. No provision was made by the rules for the distribution of the funds of the society on a dissolution; and on a dissolution it was held that there was a resulting trust in favour of those who had subscribed to the fund, and that the money was now divisible amongst the existing members at the time of the dissolution in proportion to the amount contributed by each member to the funds of the society, irrespective of fines or payments made to members in accordance with the rules.—In a case at the relation, as it is called, of some of the employers the Attorney-General applied for an injunction to restrain the Merthyr Tydfil Guardians from granting relief to strikers; but it was held that if an able-bodied man and his family were starving, notwithstanding the wilful refusal of the man to work, guardians ought to grant relief; but when the urgent pressure of the moment was relieved, then the guardians ought to require the man to work, and if, being able to get work, he still wilfully refused, then they should prosecute him under the Vagrancy Act, '24 (5 Geo. IV., ch. 83), and though the Court had power to grant such an injunction, and would under very special circumstances do so, the proper and more usual course was to object before the auditor and the Local Government Board (*Attorney-General v. Merthyr Tydfil Guardians*).

Wills and Settlements.—A lady on her second marriage, who had one child by her first marriage, settled her property upon trust for herself for life, then to her husband for life, and, upon the death of the survivor, upon trust for the children of the intended marriage, and in default of children, and in default of appointment, in trust for such person or persons as under the Statutes for the Distribution of the Estates of Intestates would at the time of the wife's decease have been entitled thereto, if she had then died possessed thereof "a spinster and intestate." The settlement contained no reference to the child of the first marriage. There being no children of the second marriage, the child of the first marriage, in spite of the "spinster," was held to be entitled as next-of-kin (*Errington v. Sempell*).—A marriage settlement made on the marriage of a man to his deceased wife's sister is void so far as it confers any benefit on the second wife, being made for an illegal consideration (*Phillips v. Probyn*).—Two points under the Settled Land Acts. A lady in '69 bequeathed personal estate to be held on trust for the person entitled to the enjoyment of settled real estate, with a proviso that in case of sale, of the real estate, either during the life of a person then in being, or within twenty-one years from her death, her trust property should go over; it was held that in case of sale of the real estate under the Settled Land Acts the gift over was ineffectual. The Act must not

be defeated (*In re Smith—Grose-Smith v. Bridger*).—In the other case the fate of the Hope Blue Diamond was in question. The diamond is an heirloom; it was admitted that the diamond was unique, and that it had been supposed that there was no other blue diamond in existence; but another had recently been found, and it was said that the present time was a good one for sale, lest other stones should be discovered and the value depreciated. Leave was refused; the only reason for sale was to make income out of the sale money, and the Court held that the fact that a tenant for life had by his own extravagance got himself into pecuniary difficulties was not a circumstance which ought to have any weight with the Court in deciding in favour of a sale of an heirloom (*In re Hope Settled Estates*).—Two cases illustrating some of the peculiarities of probate law were the following:—Administration of an estate must be granted to the next-of-kin not renouncing, and only under very special circumstances can all the next-of-kin joining get a stranger in blood appointed. But in a case where all parties interested in the estate of the deceased had entered into a compromise with a view to putting an end to all further disputes and litigation, upon the basis that a stranger in blood, who had been employed by the deceased in auditing his accounts, should apply for and obtain a grant of letters of administration with the will and codicils annexed, the Court made the grant (*In the Goods of Potter—Potter v. Potter*).—No alteration in a will has any effect if it is possible to make out what were the words before the alteration was made, and words beneath an alteration that can only be deciphered by an expert in handwriting using a magnifying glass will be restored and given effect to (*In the Goods of Brazier*).—It constitutes a gift of money on deposit at a bank to indorse and deliver a banker's deposit receipt, with the intention to make a gift, certainly if the donee is also appointed executor of the donor's will (*In re Griffin—Griffin v. Griffin*).—In a Scotch case it was held that where a testator was alleged to believe "that he had a special and imperative duty to further the cause of total abstinence and to oppose the Church of Rome by devoting his pecuniary resources to these objects, in consequence of commands which he conceived he had received from the Deity by direct communications on various occasions," and that these insane delusions dominated his mind and overmastered his judgment to such an extent as to render him incapable of making reasonable and proper settlement of his means and estate, or of taking a rational view of the matters to be considered in making a will, the validity of the will must be tried (*Hope v. Campbell*).—Where a father makes a bequest to a son for life, then to his wife for life, and then to his children, it depends on the context whether wife means the existing wife only or will include a future wife (*In re Drew—Drew v. Drew*).—"Offspring" without the addition of other words means "children" only (*Tabuleau v. Nixon*).—Where a will containing a bequest of residuary real and personal estate to trustees upon trust to convert the same and invest; at such time as in their discretion they should think fit, and to pay the income to one for life, with remainders over, and power was given in the will to postpone conversion and to retain any invest-

ments of the testator at the time of his death, there being direction as to payment of the income of the retained funds, the tenant for life is not entitled to receive the income of the retained investments unless they fall within the class of investments authorised by the will or by law, and such investments must be valued as at the end of a year from the testator's death, and interest at the rate of 3 per cent. on that value ought to be allowed to the tenant for life (*In re Lynch-Blosse—Rickards v. Lynch-Blosse*).—A tenant for life of leaseholds, specifically bequeathed by the will of a testator, is bound, during the continuance of her interest, as between herself and the testator's estate, to pay the rent reserved by the lease, and perform the covenants and conditions contained in it (*In re Giers—Cooper v. Giers*); but is not liable for repairs necessary at the commencement of his interest, or in respect of breaches of covenant which had arisen before the testator's death (*In re Betty—Betty v. Attorney-General*).—A case that has no new principles in it, but illustrates the necessity of care in drawing wills, was *In re Nourse*. The testator by his will bequeathed to his son out of personal estate an annuity of £2000 and in the event of his marriage an additional annuity of £1000; and by a codicil directed that the additional annuity should be payable only if the son should have married with the previous consent in writing of the trustees of the will; and on an application for payment of the second annuity it was held that, as the testator had provided for the son in any event, the condition as to the consent was not *in terrorem* and was valid.

Workmen's Compensation.—See heading "Master and Servant" earlier in this article.

LAWN TENNIS, '99.

Lawn tennis as a recreation has gone down before the bicycle and croquet, and therefore has not been played nearly as much as it was a few years ago. The following are the results of the principal matches:—The French Championship was played at Auteuil during the Easter holidays, and resulted in the victory of an Englishman, Mr. M. J. G. Ritchie. The Covered Courts (Queen's Club) Championship Singles was won by W. V. Eaves, the holder, the Ladies' by Miss Austin, the holder, and the Doubles by R. F. and H. L. Doherty, the holders. The Irish Championship Singles was won by R. F. Doherty, the Ladies' by Miss Martin, and the Doubles by R. F. and H. L. Doherty. The Champion of Middlesex is again H. S. Mahoney, and Miss Austin the Lady Champion. The Kent Open Championship, played at Beckenham, was won by H. S. Mahoney, Miss Austin winning the Ladies' Open Championship. The Northern Championship Doubles was won by R. F. and H. L. Doherty, the Singles by S. H. Smith, and the Ladies' by Miss Martin. The Championship at Wimbledon was won by R. F. Doherty, the holder, who beat A. W. Gore in the final. Mrs. Hillyard beat Miss C. Cooper, the holder, for the Ladies' Championship, and the Doubles were won by R. F. and H. L. Doherty, the holders. Oxford won the singles against Cambridge, and Cambridge the doubles; the latter, owing to bad weather, were played in a covered court. The Championship of North London was won by A. W. Gore, the holder; Miss

Austin, the holder, again won the Ladies' Championship. The Welsh Champion is S. H. Smith, the holder, and the Ladies' Champion is Miss Robb. M. Boucher and S. H. Smith won the Championship Doubles. The Warwickshire Championship was won by G. F. Goodman, the holder; Mrs. Pickering is the Ladies' Champion. The Inter-County Cup was won for the second year in succession by Gloucestershire, who beat Warwickshire in the final. In the Ladies' Competition Surrey beat Northumberland. The Championship of London at the Queen's Club was won by H. S. Mahoney, the Ladies' by Miss Austin. W. V. Eaves won the Championship of the Midlands, at Leamington, when Miss C. Cooper won the Ladies'. At Burton-on-Trent S. H. Smith, the holder, won the Ratcliff Challenge Cup, and Miss Lane won the Ladies' Singles. The Championship of Northumberland was won by H. S. Mahoney, and the Ladies' Championship by Miss C. Cooper. H. R. Barrett, the holder, won the open match for singles at Colchester, and Miss Tulloch, the holder, the Ladies' Challenge Cup. P. G. Pearson won the open singles at Bournemouth, and the ladies' singles were won by Mrs. Winch. The Championship of Scotland was won by E. L. Black, the Ladies' Championship by Miss Cooper. The Ladies' Championship of West of Scotland was won by Miss K. Jamieson. G. W. Peacock won the Castle Wemyss Challenge Cup. H. Roper Barrett, the holder, won the Suffolk Championship Cup, as well as the singles at Felixstowe. At Exmouth F. L. Riseley won the singles. Mr. Clayton won the Championship of Derbyshire, Miss Robb the Ladies' Championship. E. D. Black, the holder, won the Yorkshire Championship, and Mrs. Morton the Ladies' Championship. The Boulogne-sur-Mer Championship was won by H. A. B. Chapman, the Ladies' by Miss H. M. Frome. At Homburg R. F. Doherty won both the Championship of Germany Challenge Cup and the Championship of Europe Challenge Cup. The Open Singles Championship of Switzerland, played at St. Moritz, was won by G. M. Simond, the Ladies' Championship being won by Miss Brooksmith. S. H. Smith won the Championship of Sussex, at Brighton, Miss C. Cooper winning the Ladies' Championship. At Devonshire Park, Eastbourne, S. H. Smith won the South of England Challenge Cup, and Mrs. Hillyard won the Ladies' Challenge Cup. Mr. H. S. Mahoney won the Dinard Challenge Cup at Dinard, Mlle Prévost winning the Ladies' Challenge Cup.

Lawson, Sir Wilfrid, M.P. See under COMMONS.

Lawyers Deceased (Dec. 1st, '98—Nov. '99). See OBITUARY.

LAYMEN, HOUSES OF.

The first House of Laymen for the Province of Canterbury assembled with the Houses of Convocation at the opening of the Parliament of 1886. It is composed of ten representatives from the diocesan conferences of London, six each from Winchester, Rochester, Lichfield, Worcester, and four each from the remaining dioceses of the province. To the representative body so formed the Primate may add ten laymen by nomination. At the first sitting, on Feb. 17th, '86, rules of procedure were adopted, the most important being that the

procedure of the House of Commons should be as far as practicable followed. The House is bound to avoid discussions upon doctrine. Like Convocation, the House of Laymen is elected with every fresh Parliament.

In '92 the first House of Laymen for the Province of York was elected. It contained 106 members, and held its first meeting on April 20th, '92. The rules of procedure adopted provided that the election of members should be by the laymen of Diocesan Conferences, and the meetings should be held at York, at least once a year, at Eastertide, and as often at other times as should seem good to the Archbishop. See CONVOCATION.

I. PROVINCE OF CANTERBURY.

Chairman : Lord Ashcombe.

Vice-Chairman : Viscount Cranborne, M.P.

Secretary : Sydney W. Flamank, Church House, Dean's Yard, Westminster, S.W.

Members. — **Canterbury** — Earl Stanhope, Lord Medway, Lord Teynham, A. S. G. Boscawen, M.P. **London** — Sir Theodore Hope, L. T. Dibdin, F. C. Holiday, Athelstan Riley, P. V. Smith, LL.D., Lieut.-Col. H. Everitt, J. A. Shaw Stewart, Eugene Stock, J. G. Talbot, M.P., W. D. Thurnam. **Winchester** — Lord Ashcombe, Admiral Field, C.B., M.P., M. G. Knight, Melville Portal, W. W. Portal, Lieut.-Col. Frank Willan. **Bangor** — Lord Penrhyn, Col. the Hon. W. E. Sackville-West, J. Lloyd Griffith, T. Prichard. **Bath and Wells** — Sir R. H. Paget, Bart., John F. Fortescue Horner, B. E. Somers, A. J. Goodford. **Chichester** — W. H. Campion, G. F. Chambers, R. Ball Dodson, J. Heywood-Johnstone, M.P. **Ely** — Prof. Sir G. G. Stokes, Bart., F. A. Blaydes, A. M. Ellis, A. Sperling. **Exeter** — Sir J. Kennaway, Bart., M.P., A. H. A. Hamilton, Col. Sir R. T. White-Thomson, K.C.B., John Shelly. **Gloucester** — Sir John E. Dorington, Bart., M.P., B. St. John Ackers, Wilfrid Cripps, C.B., G. E. Lloyd-Baker. **Hereford** — Sir O. Wakeman, Bart., Lord Glanusk, R. Jasper More, M.P., T. M. Southwell. **Lichfield** — Earl of Harrowby, Charles Bill, M.P., C. J. Blagg, Lieut.-Col. Seton Churchill, Stanley Leighton, M.P., Sir Thomas Salt, Bart. **Lincoln** — Earl of Yarborough, A. S. Leslie Melville. **Llandaff** — Lord Llangatock, O. H. Jones, J. E. Ollivant, J. Watson. **Norwich** — Lord Cranworth, Sir S. Hoare, Bart, M.P., Capt. E. G. Pretymann, M.P., Major C. L. A. Skinner. **Oxford** — Lord Adlington, W. G. Mount, M.P., H. C. Risley. **Peterborough** — Duke of Rutland, K.G., W. U. Heygate, E. P. Monckton, M.P., S. G. Stopford Sackville. **Rochester** — Viscount Cranborne, M.P., Derman Christopherson, Sydney Gedge, M.P., Henry Morris, E. H. Leicester Penrhyn, Morton W. Smith. **St. Albans** — Lord Aldenham, David Howard, A. W. Ruggles-Brise, Hon. C. H. Strutt, M.P. **St. Asaph** — Earl of Powis, J. Eldon Banks, P. P. Pennant, R. W. Williams Wynn. **St. Davids** — Earl of Cawdor, Sir J. T. D. Llewellyn, Bart., M.P., Sir C. E. G. Philipps, Bart., W. S. de Winton. **Salisbury** — Earl Nelson, J. K. D. Wingfield Digby, M.P., W. H. Laverton, Colonel Williams, M.P. **Southwell** — Sir H. H. Bemrose, M.P., Sir A. P. Heywood, Bart., H. E. Thornton, F. Wright. **Truro** — Earl of Mount Edgcumbe, Edmund Carlyn, Major Ross, Michael Williams. **Worcester** — Lord Norton, Alfred Baldwin, M.P., H. W. Fairfax-Lucy, Col. Victor

Milward, M.P., F. A. Newdigate, M.P., Albert Webb. **Nominated members** — Earl of Selborne, Earl of Cranbrook, Lord Stanmore, Sir Richard Temple, Bart., A. F. Buxton.

II. PROVINCE OF YORK.

Chairman : Viscount Cross.

Vice-Chairman : Viscount Halifax.

Hon. Secretary : J. W. Eastwood, M.D., Dinsdale Park, near Darlington.

Hon. Treasurer : W. F. H. Thomson, York and East Riding Bank, York.

Members. — **York** — Capt. G. R. Bethell, R.N., M.P., Lord Deramore, *Arthur Duncombe, *Earl of Feversham, Hon. H. W. Fitzwilliam, *Viscount Halifax, Hon. G. E. Lascelles, J. Grant Lawson, M.P., Lord Middleton, Sir F. G. Milner, Bart., M.P., W. H. St. Quintin, Earl of Scarbrough, *W. H. F. Thomson, Lord Wenlock, Right Hon. J. L. Wharton, M.P. **Durham** — *S. P. Austin, Lord Barnard, T. M. Barron, C. D. Hill Drury, M.D., *J. W. Eastwood, M.D., R. K. A. Ellis, *C. Hodgson Fowler, Marquis of Londonderry, K.G., G. B. Morgan, Sir Thomas Richardson, M.P., W. J. Watson, Sir Lindsay Wood, Bart. **Carlisle** — W. D. Crewdson, *James Cropper, *Viscount Cross, *Chancellor Ferguson, J. E. Hasell, Sir J. T. Hibbert, K.C.B., Miles Mac Innes, E. Wadham. **Chester** — Bulkeley Allen, *Col. C. H. France-Hayhurst, *Duncan Graham, J. H. Grafton, T. C. Horsfall, R. H. Joynson, Christopher Kay, Sir Horatio Lloyd, Arthur H. Sykes, Duke of Westminster, K.G., P. Egerton-Warburton. **Liverpool** — Lord Balcarras, M.P., J. C. Barrett, John Brancker, Stewart H. Brown, *J. R. Buckton, *J. J. Cockshott, J. W. Fair, Sir W. B. Forwood, W. Gamble, H. B. Gilmour, Sir Thomas Hughes, *Col. Morrison, John W. Watkins, M.D. **Manchester** — Major Ballantine, Hugh A. Birley, G. W. W. Blathwayt, H. Hargreaves Bolton, jun., *E. P. Charlewood, *Earl Egerton of Tatton, Thomas Fair, Ralph Fletcher, R. K. Freeman, Stewart Garnett, F. J. Grant, Sir W. H. Houldsworth, Bart., M.P., Sir J. W. Maclure, Bart., M.P., J. G. C. Parsons, Col. C. M. Roys, M.P. **Newcastle** — Sir B. C. Browne, Henry Cooke, W. D. Cruddas, M.P., *W. S. Daglish, Duke of Northumberland, W. R. Plummer, *C. Harrison Stanton, W. A. Watson-Armstrong. **Ripon** — Lord Bolton, Hon. H. E. Butler, Francis Darwin, Capt. C. S. Greenwood, J. S. Hurst, R. B. Jowitt, *J. E. Maude, Sir Theo. Peel, Bart., E. P. Peterson, *Sir F. S. Powell, Bart., M.P., Lieut.-Col. G. Robinson, Walter Rowley. **Wakefield** — *William Brooke, E. Hildred Carlile, Arthur T. Clay, R. J. Critchley, T. H. Holdsworth, *Col. E. Neville, M. E. Sanderson, Col. W. Spencer Stanhope, C.B., J. A. Erskine Stuart, E. West Symes, M.D., J. H. Swallow. **Sodor and Man** — Sir James Gell, A. W. Moore, Robert S. Stephen.

Those marked thus (*) are members of the Standing Committee.

Learned Societies. The rapid progress of art and science during the present century has led to the establishment of innumerable societies and institutions for the furtherance of the study of special subjects. A list of these associations would occupy so much space that we are only able to indicate the chief of them. Separate accounts of some of them are given

under their alphabetical headings. The names in brackets indicate the Secretaries.

Aëronautical Society of Great Britain, 8, St. George's Place, S.W. (Major Baden-Powell, Hon. Sec.).

Anthropological Institute of Great Britain and Ireland, 3, Hanover Sq., W. (Wm. Crooke).

British Archæological Association, 32, Sackville St., W. (George Patrick and Rev. H. J. D. Astley).

British Association for the Advancement of Science, Burlington House, W. (G. Griffith, M.A.).

British Medical Association, 429, Strand (F. Fowke).

Chemical Society, Burlington House, W. (Prof. W. R. Dunstan, F.R.S., and Dr. Scott, F.R.S.); Assist.-Sec. and Librarian, Robert Steele.

Clinical Society, 20, Hanover Sq. (Percy Kidd M.D., and Charters J. Symonds, M.S.).

Entomological Society, 11, Chandos St., W.C. (J. J. Walker, R.N., and C. J. Gahan, M.A., Hon. Secs.).

Geological Society, Burlington House, W. (R. S. Herries, Eng. M.A., and Prof. W. W. Watts, M.A.); Assist.-Sec., L. L. Belinfante, Eng. M.Sc.

Institution of Civil Engineers, Great George St., S.W. (J. H. T. Tudsbury, D.Sc.).

Institution of Electrical Engineers, 28, Victoria St., Westminster, S.W. (W. G. McMillan, F.I.C., F.C.S.).

Institution of Naval Architects, 5, Adelphi Terrace, W.C. (G. Holmes).

Irish Literary Society, 8, Adelphi Terrace, Strand, W.C. (A. P. Graves, M.A. Hon. Sec.).

Iron and Steel Institute, 28, Victoria St., S.W. (Bennett H. Brough).

Linnean Society of London, Burlington House, W. (B. D. Jackson, Bot. Soc., and Prof. G. B. Howes, F.Z.S.; Resident Sec., J. E. Harting, F.L.S., F.Z.S.).

Numismatic Society, 22, Albemarle St., W. (H. A. Grueber, F.S.A., and E. J. Rapson, M.A., M.R.A.S.).

Pali Text Society, 22, Albemarle St., W. (Prof. T. W. Rhys-Davids, Ph.D., LL.D.).

Pathological Society, 20, Hanover Sq., W. (H. D. Rolleston, M.D., and C. A. Ballance, M.S.).

Royal Academy of Music, 4, Tenterden St., Hanover Sq., W. (F. W. Renant).

Royal Archæological Institute of Great Britain and Ireland, 20, Hanover Sq., W.; Hon. Sec., Arthur H. Lyell, F.S.A.

Royal Asiatic Society, 22, Albemarle St., W. (Prof. T. W. Rhys-Davids, LL.D., Ph.D.).

Royal Astronomical Society, Burlington House (F. W. Dyson, M.A., and H. F. Newall, M.A., Assist.-Sec., W. H. Wesley; Foreign Sec., Sir William Huggins, K.C.B.).

Royal College of Physicians, Pall Mall East, S.W. (W. Fleming).

Royal College of Surgeons, 40, Lincoln's Inn Fields (E. Trimmer, M.A.).

Royal Geographical Society, 1, Savile Row, W. (Sec. and Editor of Transactions, Dr. J. Scott Keltie).

Royal Historical Society, 115, St. Martin's Lane, W.C. (Hubert Hall, F.S.A.).

Royal Institution of Great Britain, 21, Albemarle St., W. (Sir F. Bramwell, Bart., D.C.L., LL.D., F.R.S.).

Royal Meteorological Society, 70, Victoria St., S.W. (W. Marriott).

Royal Society, Burlington House (Sir Michael Foster, K.C.B., M.D., and Prof. A. W. Rücker, D.Sc.).

Royal Society of Literature, 20, Hanover Sq., W. (Percy W. Ames, F.S.A.).

Royal Statistical Society, 9, Adelphi Terrace, W.C. (Major P. G. Craigie; Noel A. Humphreys; and J. A. Baines, C.S.I., Hon. Secs.; Benedict W. Guisburt, M.A., LL.D., Assist.-Sec.).

Society of Antiquaries, Burlington House (Assist.-Sec., W. H. St. John Hope, M.A.).

Surveyors' Institution, 12, Great George St., Westminster, S.W. (Julian C. Rogers).

Victoria Institute, 8, Adelphi Terrace, W.C. (Capt. Petrie, F.G.S., Hon. Sec.).

Zoological Society of London, 3, Hanover Sq., W. (P. L. Sclater, M.A., Ph.D., F.R.S.).

Leaseholds. See LANDLORD AND TENANT.

Lecky, W. E. H., M.P. See under COMMONS.

Leeward Islands. The westward section of the Lesser Antilles (so called in distinction from the Windward Islands, with reference to the trade winds). Of the whole group Guadalupe, Martinique, St. Bartholomew, and part of St. Martin belong to France; St. Eustatius, Saba, and part of St. Martin to Holland; and some of the Virgin Isles to Denmark. Those which belong to Great Britain were grouped together in one federal colony in '71, and consist of the five presidencies of *Antigua* (with *Barbuda* and *Redonda*), *Montserrat*, *St. Kitts* and *Nevis* (with *Anguilla*), *Dominica*, and the *Virgin Islands* (all of which see under their separate alphabetical headings). The Leeward Islands confederation has representative government, with a Governor, Executive, and Federal Legislative Council, though each presidency possesses its own constitution. The capital and seat of government of the Leeward Islands is *St. John, Antigua*. See **BRITISH EMPIRE** (table), **DIPLOMATIC**, and **WEST INDIES SUGAR COMMISSION**.

Le Gallienne, Richard, comes of a Guernsey family, but was b. in Liverpool, Jan. 20th, 1866, and ed. at Liverpool College. After some time spent in an accountant's office he became literary secretary to Mr. Wilson Barrett in '89, and in '91, while on a visit to London, secured the position of literary critic on the *Star*. He also wrote for the *Daily Chronicle*, the *Speaker*, and the magazines, and followed up his early volumes of poetry by some charming pieces of prose. Mr. Le Gallienne's works include "My Ladies' Sonnets," "Volumes in Folio," "George Meredith: some Characteristics," "The Book Bills of Narcissus," republished in '95, "English Poems," "The Religion of a Literary Man," "Prose Fancies," 1st and 2nd series, "Robert Louis Stevenson and other Poems" ('96), "Retrospective Reviews," "The Quest of the Golden Girl," "Rubaiyat of Omar Khayyám: a Paraphrase," "If I were God: a Conversation," '97, "The Romance of Zion Chapel," '98, and "Young Lives," "Rudyard Kipling: a Criticism," "The Worshipper of the Image," "Travels in England," '99. Also he has very successfully appeared as a lecturer on questions of the day. In the spring of '98 he visited America on a lecturing tour. Address: Chiddingfold House, Chiddingfold, Surrey.

Legal Tender. The following are legal tender up to and including the annexed amounts:—

Of the	Gold coins	. . .	up to any amount.
Royal	Silver coins	. . .	£s.
1d. and ½d. coins	. . .		1s.
Mint.	¼d. coins (farthings)	. . .	6d.

Bank of England notes are legal tender in England and Wales (except by the Bank of England itself), but a creditor cannot be compelled to give change. The actual notes or coins must be produced by the debtor, and offered in payment, otherwise legal tender has not been made.

Legion of Honour, The. Instituted by Napoleon when First Consul of France (May 1802), and intended as a reward for military and civil services. There were originally four grades—Grands Officers, Commandants, Officers, and Légionnaires (see ed. '87). On the coronation of Napoleon I. the Grand Officers were divided into two classes. The constitution of the Legion was remodelled by Napoleon III. in '52, and now it includes the following grades in order: Grands Croix, Grands Officers, Commandeurs, Officers, and Chevaliers. The President of the Republic is the Grand Master of the Order. Membership of the Order is for life. The number of Chevaliers was, in '99, 36,170; of Officers, 5679; of Commandeurs, 1027; of Grands Officers, 210; of Grands Croix, 52. Military members only are allotted annually—Chevaliers, 250 fr.; Officers, 500 fr.; Commandeurs, 1000 fr.; Grands Officers, 2000 fr.; Grands Croix, 3000 fr.

Legitimist Jacobite League of Great Britain and Ireland. This Society was founded in '91 with the object of forming a nucleus for the reassertion in the United Kingdom of royal authority as against the popular trend in favour of democracy. Its organisers believe that the beginning of the twentieth century will see the abolition of the present constitutional forms and a vital struggle between the forces of anarchy and the principle of hereditary and lawfully constituted authority. To recognise a parliamentary sanction for the tenure of the crown is against the principles of the League, which, however, disclaims any disloyalty to the present reigning sovereign, while taking leave to point out the danger which would accrue from the withdrawal of the parliamentary sanction accorded in 1701. It believes that a democratic revolution is pending, that the democratic rule will only persist for a time, and that it can only be replaced by the restoration of the legitimate dynasty as represented in the descendants of the elder branch of the Royal Family. The League is founded to point out the claims of the elder line, so that when the time comes the people may know where to look for the prince around whom to rally; for it regards it as impossible that the reaction should be in favour of a line whose only title is parliamentary, and therefore revocable. A fair summary of the views of the League will be found in an article entitled "Legitimism in England," by the Marquis de Ruigny and Raineval and Cranstoun Metcalfe, in the *Nineteenth Century* for Sept. '97, and in a pamphlet entitled, "The Royal House of Stuart: a Plea for the Old Cause," by Theodore Napier, Esq., F.S.A.(Sc.). The Honorary Secretaries are Philip Walsingham Sergeant, Esq., 7, Victoria Street, Westminster, S.W.; and Theodore Napier, Esq., Balmanno, 7, West Castle Road, Edinburgh.

Leo XIII. See POPE, THE.

Leopold II., King of the Belgians, was b. at Brussels, 1835, and is the son of King Leopold I., whom he succeeded. His Majesty has travelled much in Europe, Asia Minor, and Egypt. He was practically the founder, and is

now the ruling sovereign, of the Congo Free State (*q.v.*). He was the friend of Gordon, whom he had taken into his employ, but was deprived of his services when the latter was summoned from Brussels to go to the Soudan. King Leopold married, in '53, the Archduchess Maria of Austria, by whom he has three daughters, one of whom, Princess Stephanie, widow of the late Crown Prince Rudolf of Austria, married again in '99. In default of male heirs the king can nominate his successor with the consent of the Chamber.

Leys School, The, Cambridge, was founded in '75 especially to afford an opportunity of high-class public school education under religious influences, but free from the ecclesiastical bias of the older public schools. It was incorporated July 16th, '78. The founders were chiefly members of the Methodist Church, but it draws pupils and masters from the Anglican and other Protestant Churches. Under the influence of the late Rev. Dr. W. F. Moulton, M.A., who was appointed head master, a broad and varied programme of study was laid down, special scientific, mercantile, and other courses being provided, in addition to the ordinary Classical and Modern sides. There are admirable laboratories, and a dozen acres of well-appointed playing-fields. The school has taken a high position both in examinations at Cambridge and elsewhere, and in the athletic world. Boys are received from ten years of age upwards. Several entrance scholarships, varying in value from £20 to £50 per annum, are offered for competition in April. A mission is supported by the old students in London. The school motto is "*In fide fiducia.*" Head-Master, Rev. W. T. A. Barber, B.D. Bursar, J. C. Isard, M.A.

Liberal Publication Department, The, has offices at 42, Parliament Street, S.W. Mr. Augustine Birrell, Q.C., M.P., is the Chairman of the Department, and its organ is the *Liberal Magazine*, issued monthly. Pamphlets and leaflets on current politics are issued at frequent intervals.

Liberal-Unionist Association. Formed to resist the Home Rule policy adopted by Mr. Gladstone in 1886. The Association has upwards of two hundred and fifty branches in England and Wales, besides those in Scotland and Ireland. For the purposes of consultation a representative body known as the *Liberal-Unionist Council* has been called into being, and consists of 120 members, the majority of whom are elected by the branch associations in all parts of the United Kingdom. Chairman of the Association, the Duke of Devonshire, K.G. Offices, 6, Great George Street, Westminster, S.W. Secretary, John Boraston.

Liberation Society. See DISESTABLISHMENT.

Liberia. A negro republic on the Grain Coast of West Africa. Area about 14,500 sq. m.; pop. 1,500,000, including about 18,000 civilised Americo-Liberians, the rest being natives. Capital, *Monrovia*, pop. 5000. Liberia was founded in '22 by American philanthropists for the settlement of freedmen. It was declared independent in '47, was recognised as a sovereign state by Great Britain in '48, and by the United States in '62. The constitution is on the model of that of the United States. The President is elected for two years, the House of Representatives (13 members) for

two years, and the Senate (8 members) for four years. A convention agreed upon with France at the end of '92 defined the boundaries of the Republic and of the adjacent French colonies. The climate is about the hottest in the world. The chief products are palm oil, coffee, rubber, and ivory. Revenue, '98, £40,000; expenditure, £40,000. Imports, '97, £250,000; exports, £212,500. In '71 a debt of £100,000 was contracted in England, on which no interest has been paid since '74. It has now grown to over £200,000.

Liberty and Property Defence League. The motto "Self-help *versus* State-help"), was established in 1882 for maintaining security and freedom of contract, for upholding proprietary rights, and for resisting socialistic legislation. Federated with the League are over 210 Defence and Protection Societies, representing the chief industries in the kingdom. Chairman, Earl of Wemyss. Central offices, 7, Victoria St., S.W.

Libraries. The special feature of our English library system has been the work done under the Public Libraries Acts. These Acts date from 1850, the Act of that year having been followed by Acts extending the principle to Scotland and Ireland and amending matters of detail. The Acts enable towns, local board districts, and parishes to establish libraries, to be maintained by a rate not exceeding 1d. in the £. Of the older libraries of the country the most important, of course, is that of the British Museum (*q.v.*), which is only exceeded in extent by the Bibliothèque Nationale at Paris. It possesses over 1,900,000 volumes and 100,000 MSS. and charters. It is entitled under the Copyright Acts to a copy of every work published in this country—a privilege which is also enjoyed by the Bodleian Library, Oxford (570,000 vols. and 30,000 MSS.), and the Cambridge University Library (500,000 vols. and 5000 MSS.), the Advocates' Library, Edinburgh (350,000 vols. and 3000 MSS.), and the library of Trinity College, Dublin (238,000 vols. and 2000 MSS.). Valuable and extensive libraries are attached to the other universities, to the colleges of Oxford and Cambridge, and to most cathedrals. There are a number of important professional libraries in London, Dublin, and Edinburgh, and a few endowed libraries, such as the Chetham (1653) and John Rylands at Manchester, and Mitchell at Glasgow (1874). The concentration of literary and intellectual interests in London has naturally given birth to a large number of special libraries, many of which are open to the student upon proper introduction. The more important of them are included in the following alphabetical list of the principal London libraries: Admiralty (40,000 vols.); Bethnal Green Free Library, London Street, Bethnal Green, E. (34,000), open 10 to 5 and 6 to 10; Chemical Society (13,000); Church House (15,000); College of Preceptors (7000); Colonial Office (13,000); Corporation, Guildhall (110,000), open free; Dr. Williams' (40,000); Foreign Office (75,000); Geological Society (19,000); Gray's Inn (14,000); House of Commons (42,000); House of Lords (32,000); Incorporated Law Society (35,000); India Office (60,000); Inner Temple (38,000); Institute of Civil Engineers (30,000); Lambeth Palace (30,000 and 14,000 MSS.); Lincoln's Inn (70,000); London Institution (75,000, subs.); London Library (156,000, subs.); Middle Temple (40,000); Museum of Practical Geology (20,000); Patent Office (86,000); People's Palace, Mile End Road, E. (12,500); Royal Society

(50,030); Royal Asiatic Society (13,000); Royal Astronomical Society (10,000); Royal College of Physicians (17,000); Royal College of Surgeons (60,000); Royal Colonial Institute (30,000); Royal Geographical Society (50,000); Royal Institution (60,000, subs.); Royal Medical and Chirurgical Society (42,000); Royal Society of Literature (8000); Royal United Service Institution (25,000); Russell Institution (18,500, subs.); St. Paul's Cathedral (10,730); Sion College (60,000); Society of Antiquaries (42,000); Society of Telegraph Engineers (4000); South Kensington, Educational (50,000); National Art (60,000); Dyce and Foster (35,000); Royal Statistical Society (30,000); University College (105,000); University of London (11,000); War Office (26,000); Westminster Chapter (12,000).—The Library Association, founded '77, incorporated by Royal Charter '98, now numbers upwards of 550 members, including chairmen and members of committees and the chief librarians of the country. President, Alderman J. W. Southern, Chairman of the Manchester Public Libraries Committee. Hon. Secretary, Frank Pacy, 20, Hanover Square, London, W. A list of 1000 of the largest libraries in the United Kingdom is published in the "Year Book" of the Library Association (Horace Marshall & Son, 125, Fleet St.), price 1s. net.

LICENSING LAWS COMMISSION.

A Royal Commission was appointed, April 25th, '96, "to inquire into the operation and administration of the laws relating to the Sale of Intoxicating Liquors, and to examine and report upon the proposals that may be made for amending the aforesaid laws in the public interest, due regard being had to the rights of individuals." Viscount Peel was appointed chairman, and the other members were: Lord Windsor (who took the place of Lord Jersey resigned); Viscount de Vesci; Rt. Hon. Bishop of London (now Archbishop of Canterbury); Rt. Hon. Sir Algernon Edward West, K.C.B.; Sir W. H. Houldsworth, Bart., M.P.; Sir Charles Cameron, Bart., M.P.; Very Rev. Hercules Henry Dickinson, D.D.; William Allen, Esq., M.P.; William Sproston Caine, Esq.; Alexander Morison Gordon, Esq.; William Graham, Esq.; Henry Grinling, Esq.; Samuel Hyslop, Esq.; Andrew Johnston, Esq.; John Herbert Roberts, Esq., M.P.; Henry Riley Smith, Esq.; Charles Walker, Esq.; John Lloyd Wharton, Esq., M.P.; Thomas Palmer Whittaker, Esq., M.P.; Alfred Money-Wigram, Esq., M.P.; Samuel Young, Esq., M.P.; George Younger, Esq.; Edward North Buxton, Esq. (who took the place of Sir F. Seager Hunt, Bart., M.P., resigned); Hon. Sidney Peel, secretary. The Commission held 123 sittings and examined 260 persons.

When the taking of evidence was concluded, in July '98, the Commissioners adjourned, and the Chairman drew up a draft Report for discussion, in five parts, dealing with (1) England and Wales, (2) Scotland, (3) Ireland, (4) Clubs, and (5) the Reduction of Licenses, Compensation, Local Option or Prohibition, and Municipal Management. The first four parts were considered and approved by the Commissioners page by page; and a difference of opinion arose as to whether, since the Commissioners were about equally divided on many points, and the paragraphs dealing with them were carried by the casting vote of the Chairman, a subsequent revision should be made, but this the Chairman did not see his way to allow. A majority of the Commissioners were also dissatisfied with the selections from the evidence of witnesses included in the Chairman's draft Report, holding that it was difficult for any selection, however judiciously intended, to avoid the appearance of bias. The result of this difference of opinion was that at a meeting of the Commissioners on April 12th, '99, when part 5 of the draft Report was to be considered, a proposal was made to substitute an alternative draft for Lord Peel's, and to consider a series of alternative drafts for the four sections already

considered by the Commissioners. Lord Peel refused to put these proposals, and left the room. Sir Algernon West was elected to the chair by the Commissioners who remained; and ultimately two main reports were presented by the Commissioners, one section agreeing with Lord Peel, and the other, including the majority of the Commissioners, presenting a report that differed from his in many important respects. The Blue Book containing these reports (C. 9379, Eyre & Spottiswoode, price 3s. 3d.) is a most valuable publication.

There were reservations to both reports. Dean Dickinson signed them both, because "on most important points they substantially agree; and because the recommendations herein embodied [in the Majority Report] represent at least a considerable advance in the direction of temperance reform." A valuable memorandum by Mr. Whittaker was appended, containing notes on direct local control, municipalisation or the Gothenburg system, compensation, popular control, drinking and drunkenness during the last sixty years; and statistics as to the health and mortality of those engaged in the liquor trade, the consumption of intoxicants, etc.

Lord Peel's Report.

The Report signed by Lord Peel (the Chairman), the Archbishop of Canterbury, Sir W. H. Houldsworth, Sir C. Cameron, Dean Dickinson, and Messrs. Allen, Caine, Herbert Roberts, and Whittaker, includes a sketch of the history of the Liquor Laws, an examination of the existing law, of the tied-house system, of the administration of the Licensing Justices, and the general details of Licensing administration by the authorities and the police, of the question of Sunday Closing, the sale of intoxicating liquor in Clubs, a discussion of the question of reduction of licenses, compensation and popular control, and a summary of the recommendations made by this section of the Commissioners. The limits of space compel us to summarise this summary.

1. **England and Wales.**—The Commissioners recommended that the law should be consolidated and simplified, and that the number of licensed houses should be immediately and largely reduced. All agreements and arrangements governing the tenure of licensed houses should be submitted to the Licensing Authority, which should have full discretion to refuse the license if these provisions are contrary to public policy. A record of breaches of the law should be kept, and the license should be suppressed if the record justified it. The Licensing Authority should have power to make regulations against repeated applications, no application should be allowed after refusal of renewal, and the law as to transfers should be simplified and codified. Annual licensing sessions should be held in March instead of August and September. No license should be renewed to a public-house of under £12 annual rateable value, though a time notice might be given. Licensed houses should be as open as possible to supervision, and should have the smallest number of doors compatible with the proper conduct of trade. The Licensing Authority should have full control over all alterations of premises. There should be a special hotel license, with power to the Authority to insert conditions as to early and Sunday

closing, open drinking bars, supply of food, etc. All "off" wine and spirit licenses should be subject to the full control of the Licensing Authority, as well as wholesale licenses for the sale of wine, spirits, beer, and sweets, excepting those required by brewers, distillers, wine merchants, and blenders. The Authority should control the sale of liquor on passenger vessels and in theatres. **The original Licensing Authority in each division** should be reconstituted thus: It should consist of a committee of from six to ten members, elected half by the Justices of the division from their own number, half by the County or Town Council, for a period of three years. The committee should elect a permanent chairman from their own number. **The appellate body in boroughs** should consist of the original Licensing Authority sitting with a larger number (in the proportion of 3 to 2) of additional members elected half by the Town Council and half by the Borough Justices. **The appellate body in counties** should be appointed half by the County Council and half by the County Justices, and should sit to hear appeals with the original Licensing Authority of the division from which the appeal comes. The new element should be in the proportion of 3 to 2 to the old. In both counties and boroughs the new appellate body should be elected for three years, and should perform the functions of the present confirming Committee. The Licensing Authority should not be hampered by any personal liability for costs. As to Sunday closing, the Welsh Sunday Closing Act should be extended to Monmouthshire; and, generally, the hours of opening on Sundays should be restricted to one hour at midday and two hours in the evening as a maximum, and the Authority should have power to reduce the hours or close entirely. **Travellers** should be defined as persons about to lodge or take a meal in the house, who have travelled at least seven miles from their previous night's place of lodging. **Railway Companies** should draw up regulations to be approved by the Board of Trade limiting the hours of sale in refreshment-rooms and railway carriages. Licensed premises should not be opened before 7 or 8 a.m., and the Authority should have discretionary powers as to earlier closing, six-day licenses, and closing on election days. **Occasional licenses** should be granted only in open court, by at least two members of the Licensing Committee, after due notice to the police. The sale, on or off, of any kind of intoxicant to children under sixteen should be forbidden. Registered benefit societies, coroners' courts, petty sessional courts, revising barristers' courts, etc., should be forbidden to meet in licensed premises. The trade in intoxicants should be forbidden to be carried on in the same premises as the trade in groceries or other articles, but a period of five years' grace should be given. As to the police, the Chief Constable should only be removable with the sanction of the Secretary of State, and the police should have legal assistance in prosecutions. No constable in uniform should be served in a public-house, and no testimonial should be given to a retiring inspector. There should be a general power of arrest for simple drunkenness, apart from disorder. To be drunk when in charge of a child of tender years should be an offence with a heavier penalty than that for simple drunken-

ness. Habitual drunkenness should be treated as cruelty, entitling to separation and protection, and habitual drunkards should be placed on a black list.

2. **Scotland.**—The recommendations as to Scotland were similar in their general tenor. New certificates should only be applied for at Whitsuntide. A separate licensing jurisdiction should be exercised by all burghs having a population of 7000 or more. **The Licensing Authority should be reconstituted thus:** In counties it should consist of a committee chosen half by the Justices, half by the County Council, with appeal to a body constituted in the same manner. In counties of cities it should consist of the magistrates, as now, with appeal to a committee elected half by the Justices for the county or city, half by the Town Council. In all other burghs it should consist of the magistrates, as now, or Police Commissioners, with appeal to a committee, chosen half by the Town Council, half by the Justices for the county, in the district in which the burgh is situated. The appellate body should also exercise the functions of the confirming committee. The Licensing Authority should have discretion to close on New Year's Day, holidays, and election days, either for the whole or part of the day. Some measure such as compulsory bonding should be adopted to check the evils of the consumption of new whisky. All liquor dealers' vans should be liable to search by the police or excise.

3. **Ireland.**—As to Ireland, the general recommendations followed on the lines of those as to England and Scotland. Further, the Tipping Acts should be amended so as to apply to liquor supplied on credit for wakes. A rating qualification of £25 annual value should be required in the case of new licenses, and of all existing licenses after five years, for all public-houses in towns over 10,000 population, of £15 in towns over 5000, and of £12 elsewhere. **The Licensing Authority** should be reconstituted thus: Except in the five towns where the Recorder is sole Licensing Authority, it should consist of the County Court Judge with all the resident magistrates of the county sitting at all licensing sessions in the county, and with two justices residing within each quarter-session division to be selected annually by the general body of the justices of the county. In the five towns the Divisional Justices or the stipendiaries or the residing magistrates should sit with the Recorder. Complete Sunday closing should be extended to the five exempted cities.

4. **Clubs.**—As to clubs, all clubs in which intoxicants are supplied should be registered, but no club or association with less than twenty-five members should be so registered. The club must be a members' club, not under obligation to any wholesale dealer in liquor, under the control of the members generally, with definite rules as to objects, subscription, and hours of opening and closing. The Committee must apply for registration, and be individually responsible for the conduct of the club. The Clerk of the Peace should be the Registrar in counties, or the Clerk of the Peace, Town Clerk, or Clerk to the Justices elsewhere. Objections to registration should be receivable, and should be heard before the Recorder or a County Court Judge or (in Scotland) the Sheriff. Balance-sheets should be forwarded to the Registrar for publication. Proof that a club is a disorderly house, or used merely for drinking

purposes, or causes habitual drunkenness among its frequenters, or that its rules are habitually broken, should entail a fine or the cancelling of registration.

5. **General.**—The general recommendations were these: "A great reduction in the number of licensed houses is of the first importance. While from the point of view of strict justice, no claim to compensation can be urged by those who lose their licenses, some allowance might be made, as a matter of grace and expediency, though not of right. 2. No money compensation should be paid from the public rates or taxes. If any money compensation is paid, it should be raised from the trade itself. A time notice of several years should be an element in the compensation. 3. Any scheme of compensation must be a thing apart from the ordinary operation of the licensing law. It should be nothing more than a temporary expedient to cope with an existing and removable evil, and must on no account interfere with the free and unqualified discretion of the licensing authority. Above all it must not be so designed as to confer any kind of vested interest in licenses. 4. It is a great anomaly that new licenses are granted for no consideration, and the duties on existing licenses are extremely low. An annual license rental of considerable amount should be immediately imposed, in addition to the present duties. These rentals might be applied to a compensation fund, but would be a just charge in themselves. 5. The local Licensing Authority, after consultation with the police and other persons well qualified to form an opinion, should fix the number and distribution of licensed houses to which they wish to attain. This might be safeguarded by fixing a low statutory maximum, not to be exceeded, of, say, one on-licensed house to every 750 persons in towns and 400 in country. 6. In England and Wales a term of, say, seven years should be fixed as the basis of a time notice and compensation arrangement under which the number of on-licenses should be reduced to the statutory maximum. The reduction should commence immediately. The Licensing Authority should have discretion to make the required reduction all at once, or to spread it over the period by withdrawing one-seventh of the surplus licenses each year. In the case of licenses withdrawn at the beginning of the first year, compensation should be paid not exceeding seven times the rateable value of the premises; the compensation paid for those withdrawn the second year would be six times the rateable value, and so on. The compensation paid should be raised by an annual license rental levied on the rateable value of the licensed premises. All holders of public-house or beerhouse licenses should have the option of dropping their licenses and taking seven times the rateable value of their premises as compensation at the beginning of the period. To secure the necessary funds in advance, a loan should be raised on the security of the license rentals. 7. The same arrangement should be applied to Scotland, except that a period of five years should be substituted for the period of seven years. 8. At the end of the period of seven or five years, the Licensing Authorities would have power to reduce the number of licenses below the statutory maximum, without any compensation being given, and the field would be clear for any legislation, experimental or otherwise, that

Parliament might be disposed to enact. 9. At the end of the given period a wide measure of direct popular control might be applied under proper safeguards to Scotland and Wales."

The Majority Report.

The Report signed by Lord de Vesci, Lord Windsor, Sir A. West, Dean Dickinson, Messrs. Allen, Buxton, Gordon, Graham, Grinling, Hyslop, Johnston, Riley Smith, Walker, Wharton, Wigram, Young, and Younger, also included a history of the Liquor laws, a discussion of the complexity of the law and the need for consolidation, an examination of the tied-house system, the general details of licensing administration, the hours of opening and closing, and so on; and concluded with a summary of recommendations in many respects similar to the recommendations summarised above, but also differing from them on many important points, the chief of which are here mentioned.

1. **England and Wales.**—As to the **Tied-House System**, agreements between owner and tenant should always be produced to the Licensing Authority on applications for transfers or new licenses, and it should be left to the Authority to say whether the terms are such as to warrant the refusal of the application. In the case of a managed house the employer should hold the license, but the name of the manager should be registered. The reasons for the refusal of the renewal of a license should be stated in open court, and if desired by the applicant given in writing. Wide discretion should be allowed to the Licensing Authority in imposing conditions, especially as to back and side doors and long bars, but these should be defined and regulated by statute or the order of the Secretary of State. The imposition of conditions should be confined to new licenses, except as regards structural alterations. The Licensing Authority should be reconstituted as follows: In divisions of counties and non-county boroughs, it should consist of three, six or nine members selected triennially, two-thirds to be justices nominated by the Justices of the Petty Sessional Division (or, in the case of boroughs with a separate commission of the peace, by the Borough Justices), one-third to be nominated by the County Council or in the case of the boroughs by the Town Council, out of their respective bodies. In **County Boroughs** it should consist of three, six, or nine members selected in the same manner and in the same proportion by the Borough Justices and Town Council. The number in each case should be fixed by the Secretary of State. The **Court of Appeal** should be reconstituted as follows: In each county and the non-county boroughs therein it should consist of justices nominated triennially by the County and Borough Justices, the number for each county to be determined by the Secretary of State and apportioned by him between the counties and boroughs according to the population. In each county borough it should consist of justices nominated triennially by the Borough Justices (the number to be determined by the Secretary of State), with the Recorder as *ex-officio* chairman wherever the borough has a separate quarter sessions. The Authority and the Court of Appeal should have power to administer oaths, and be guided by the ordinary rules of evidence and procedure, and the chairman should have no casting vote. The

Authority should not be liable for the costs of an appeal. Other recommendations were that the Authority should have power to impose the conditions of Sunday closing upon a new license; except in London and the principal cities the hours of opening on Sundays should be restricted to two hours at midday and two hours in the afternoon; a limited number of licensed houses where travellers may be served at specified hours should be selected by the Authority, and a special license duty imposed upon them; the statutory distance should be extended to six miles; Standing Joint Committees should provide petty sessional rooms, to be used also for inquests and revising barristers' courts, so that licensed premises need not be employed for the purpose. It was stated that the law as to travellers drinking at railway stations required amendment.

2. **Scotland.**—As to Scotland the Licensing Authority should be reconstituted as follows: In counties or districts of counties, including burghs under 7000, it should consist of a committee selected triennially, two-thirds by the Justices of the Peace for the county and one-third by the County Council from their respective bodies; with appeal to a committee selected by the Justices of the county out of their own body on which the districts and boroughs within the county should be adequately represented. In counties of cities it should consist of the magistrates as now, with appeal to a fixed number selected by the justices for the county or the city from their own number, with the Lord Provost as chairman. In other royal and parliamentary burghs over 7000, and in police burghs over 12,000, it should consist of the magistrates with appeal to a committee similar to that in the case of counties or districts of counties. No burgh possessing a population less than 7000 should have a separate licensing jurisdiction, and all police burghs with a population of 12,000 and upwards should obtain it.

3. **Ireland.**—As to Ireland a qualification of annual rateable value should be required for all newly licensed houses, graduated according to population, and should be applied to all existing houses after three years. The recommendation as to the Licensing Authority was the same as in the minority report, but an appeal was recommended to a court constituted for each of the four provinces, consisting of the County Court Judges of that province. There should be some further restrictions of hours of opening on Sundays in the five exempted cities.

4. **Clubs.**—As to clubs, all those in which intoxicants are supplied should be registered; the onus of proving *bona fides* should be placed on the club applying for registration; the members or trustees should own the club property, and no individual member should be directly interested in the sale of exciseable liquor on the premises. The registering authority should satisfy itself that the club is not formed solely for drinking purposes. The Authority should be the stipendiaries in cities and towns where they exist, and elsewhere a Court of Petty Sessions consisting of not less than three justices.

5. **General.**—1. **Reduction of licensed houses, Areas of.** To be in England and Ireland, counties and county boroughs. In Scotland, counties and counties of cities. 2. **Authority to decide amount of.** In England and Scotland, in coun-

ties, the Standing Joint Committees. In county boroughs in England, and counties of cities in Scotland, bodies to be constituted like Standing Joint Committees in counties. In Ireland, the Licensing Authority. All such authorities to report their actions to the Secretary of State. Authority to allot reduction within licensing area to be the Licensing Authority. 3. **Compensation.** Persons interested in all licensed premises to declare the value of license and good-will. Licensing Authority, if dissatisfied, to have right to have value ascertained under Land Clauses Consolidation Act. Such value to be the basis of special taxation on licenses not suppressed, to form compensation fund, and to be the amount paid as compensation for those suppressed. 4. **Compensation.** Public-houses and beer licenses and all off-licensed houses to contribute a special tax of 6s. 8d. per £100 per annum. Hotels and restaurants in like manner one-sixteenth of their annual rateable value per annum. Clubs to contribute. Licensed premises when enlarged to pay an increased contribution. 5. **New Licenses** only to be granted when authority has resolved that one or more are required within an area defined by them. Tenders of an annual license rent for seven years. Such rents to be added to the compensation fund. 6. Above scheme of reduction, taxation, and compensation to be worked in seven-year periods, the Authority having power to borrow at the beginning of such periods on security of income arising during the period from above sources. 7. Above scheme to be applied *mutatis mutandis* to Scotland and Ireland.

Lichfield, Bishop of. See under PEERAGE.

Lifeboats (for their origin and development see ed. '87). The **Royal National Lifeboat Institution**, which is supported by voluntary contributions, was founded 1824. It has 295 lifeboats on the coasts of the United Kingdom. Total number of lives saved since Institution founded, 41,233. Pecuniary rewards paid for gallant services since '24, £189,967; besides gifts of 98 gold and 1173 silver medals or silver clasps, 1 gold second-service clasp, 281 binocular glasses, 15 telescopes, 19 aneroid barometers, 104 framed certificates of service, and 1605 votes of thanks inscribed on vellum. The payments for last year amounted to £67,719; of which £33,730 was expended on lifeboats, lifeboat carriages, and boat-houses, £15,632 on stores, etc., and the balance on rewards, special grants, etc. During the past forty-five years the self-righting boats have been launched more than 10,000 times on service, and have saved upwards of 17,000 lives. The boats have been capsized altogether 55 times while out on service, but only on 28 of those occasions was there any loss of life. The number of lives lost (counting 42 men who perished on the occasion of disasters which befell the Southport and St. Anne's lifeboats on Dec. 9th, '86, and the Kingstown lifeboat on Dec. 24th, '95), amounts to 118, including 14 shipwrecked persons. The 104 lifeboat-men lost represent about 1 in 1030 of the men employed in the boats on service; and the upsets were at the rate of 1 in each of the 150 service launches. **Secretary, Mr. Charles Dibdin**, 14, John Street, Adelphi, W.C.

Life Saving Society. The objects of this Society, which was founded in '91, are to promote technical education in life saving and resuscitation of the apparently drowned; and to stimulate public opinion by lectures, demon-

strations and competitions, in favour of the general adoption of swimming and life saving as a branch of instruction in schools, colleges, etc. The subscriptions for individual members range from 2s. 6d. to £1 1s. per annum, and the affiliation fee is, for clubs, associations, etc., 10s. 6d. per annum, and for classes, schools, etc., 5s. per annum; a donation of £10 10s. constitutes a life governor, and £5 5s. a life member. A Handbook of Instruction has been issued (price 1s.), giving full details as to the course of instruction, which embraces the rescue of drowning persons, the modes of release in the event of the rescuer being clutched, and the methods of resuscitation of persons apparently drowned. Diplomas, certificates and medallions are awarded to those who pass certain tests proving their ability to perform a rescue and restore suspended animation. The subject now forms part of the general instruction in most of our public and elementary schools, and nearly thirty thousand have been taught this useful knowledge since the Society was founded. The Society has branches in all parts of the United Kingdom, Canada, India, South Africa, New Zealand, Sweden, Malta, Australia, and a branch is in course of formation in Italy. **Hon. President, H.R.H. the Duke of York. Acting President, Hon. Sydney Holland. Hon. Secretary, Mr. William Henry Offices, 8, Bayley Street, Bedford Square, London, W.C.**

Light Railways. See RAILWAYS.

Li Hung Chang, one of the most intelligent and enlightened Chinese of the present age, was b. 1823, in the province of Anhui, and took the Hanlin degree in '49. When the Taiping rebels invaded Anhui ('50) he joined Tseng Kuo Fan's army as secretary. Was appointed Provincial Judge (Nieh Tai) of Chèkiang, and in '61 Governor (Futai) of Kiangsu. In conjunction with General Gordon he recovered Suchow ('63), and drove the rebels entirely out of Kiangsu. For his services he received the Yellow Jacket and Peacock's Feather, and was created an hereditary noble of the third class. Two years later he was appointed Governor-General of the Liang Kiang Provinces, and subsequently commanded against the Nienfei and Mohammedan rebels. In '72 he was appointed Governor-General of Pechili, the metropolitan province. He is also Senior Grand Secretary (Chung Tang)—the highest distinction to which a Chinese official can aspire. He is a friend to foreigners, particularly to Russians. As member of the Board of Admiralty, he originated the Chinese navy, and he was the chief promoter of the China Merchants' Steam Navigation Co. The Emperor entrusted to him the supreme charge of the forces, both naval and military, sent to Korea during the war with Japan in '94; and though he was superseded, and for a time discredited, he was again restored to favour, and negotiated the treaty of peace with Japan in '95. He was sent as the special envoy to the Czar's coronation in May '96, and afterwards visited Germany, the Netherlands, France, England, the United States, and Canada. On his return to China he was made Foreign Secretary of the Empire, but was temporarily disgraced and excluded from the Tsung-li-Yamèn during '98. At the end of that year, however, the Empress-Regent appointed him Imperial Commissioner to report on the Yellow River. See CHINA.

Limitations, Statutes of. These statutes limit the time within which a man may seek redress for an injury he has sustained. Lapse of time will not protect any one who has ever committed a crime from being prosecuted for it. Redress from a trustee for such a breach of trust as to constitute a fraud may always be had, however long the interval since its commission. But with this exception the remedy for any civil injury may be barred by lapse of time. An action of debt or covenant, if founded on a deed, must be brought within 20 years of breach; if founded on any less formal agreement, within 6 years of breach. Part payment of a debt is sufficient to prevent the Statute from running, as is also a written document or letter admitting the debt or promising to pay it: either of these will enable a creditor to sue even after the 6 years has passed since the date of debt being contracted. An action to recover land must be brought within 12 years after the right to bring it first accrued. Should the right have accrued to a person under disability, as an infant or lunatic, an action may be brought within 12 years of its accruing, or within 6 years of the disability ending or the disabled person dying; but in no case of disability are more than 30 years to be allowed altogether. The above term of 12 years applies also to an action brought by a mortgagor to recover possession of his land, and to an action brought to recover money charged upon land by mortgage or otherwise. Only such arrears of rent as have accrued within 6 years before bringing an action for them can be recovered. Actions of trespass to goods, of assault, battery, wounding or imprisonment, must be brought within 4 years of the time when the injury was committed; actions for slander being limited to 2 years. Actions on penal statutes, if brought by the party aggrieved, are limited to 2 years; if brought by a common informer, are limited to 1 year. The lapse of 60 years bars actions for the recovery of real property, when brought by the Crown against a subject. The remedy in all the above cases may be lost by the lapse of time, but the right survives and may sometimes be made available in other ways than by action. Formal acknowledgment of a right by the person to whom it is adverse will render of no effect any lapse of time which has taken place, but time will run afresh from the acknowledgment. The law upon this subject is very complex and difficult.

LITERATURE, '99.

It is obviously impossible even to enumerate here the publications of the year, still less to give any detailed critical opinion or description of them. The most that can be done, and that is all that has been attempted, is to give an idea of the leading books that have been published

during the last twelve months in the various departments named, and in some cases to add a slight indication of the character of the contents. The name of the author and of the publisher is given, and may be of service.

Art.

Among works on the Old Masters must be mentioned Eugène Müntz's *Leonardo da Vinci* and Emile Michel's *Rubens* (both from *Heinemann*), and the third volume of Bode's *Rembrandt* (*Ledelmeyer, Paris*). On later Masters there are Max Roose's *Dutch Painters of the Nineteenth Century* (*Sampson Low*); Bate's *English Pre-Raphaelite Painters* (*Bell*); and Whitman's *Masters of Mezzotint* (*Bell*). Ashton Rollins Willard, an American, has sent out a large and carefully compiled volume on *Modern Italian Art* (*Longmans*). *Aubrey Beardsley's Early Work* is a volume edited by Marillier (*Lane*); Arthur Symons writes a small book on the same artist (*At the Sign of the Unicorn*), and a *Second Book of Fifty Drawings* by Beardsley has appeared (*Smithers & Co.*). Among works on collections and picture-galleries are Ernest Low's *Vandyck's Pictures at Windsor Castle* (*Bell & Sons*); Richter's *Lectures on the National Gallery* (*Longmans*); Cook's *Handbook to the Tate Gallery* (*Macmillan*); *Pictures in the National Gallery*, in photogravure, with letterpress by Charles Eastlake (*Hanfstaengl*). Lionel Cust has sent out a quarto volume on *The Master E. S. and the "Ars Moriendi."* E. S. is the artist of a set of copper-plates at Oxford dating back to the 15th century. The "*Ars Moriendi*" is a block book bought in '72 by the British Museum for £1000. *The Life and Work of Lady Butler* is the subject of the illustrated "Art Annual." J. Lewine has sent out a *Bibliography of Eighteenth-Century Art and Illustrated Books* (*Sampson Low*); and Ludwig Volkmann, *Pictorial Representations to Dante's "Divine Comedy"* (*Grevel & Co.*). Harry Quilter has devoted 3000 hours to the production of 6000 square inches of illustration to *The Pied Piper of Hamelin* (*Simpkin, Marshall & Co.*). *The Sovereign Ladies of Europe* (*Hutchinson*) is edited by Countess A. von Bothmer, and has 153 illustrations. *Twelve Portraits*, by William Nicholson (*Heinemann*), is a work of striking individuality. *The Lewis Carroll Picture Book* (*Fisher Unwin*) contains many unpublished drawings, and some reprints from scarce work. It is edited by Stuart Dodgson Collingwood. Walter Crane has issued a children's *édition de luxe* of his *Triplets* (*Routledge*). Mr. A. Bell has written *Representative Painters of the 19th Century*, and Lady Dilke *French Painters of the 18th Century*; R. de la Sizeranne, *English Contemporary Art*; R. G. Kingsley, *History of French Art, 1100—1899*; E. M. Hurl, *Life of Our Lord in Art*; Herbert Horne, *Botticelli* (*Bell*); M. Bell, *Rembrandt* (*Bell*); Dr. Denio, *Poussin* (*Low*); H. Knackfuss, *Van Dyck* (*Grevel*). In the "Great Masters" series (*Bell & Sons*), have appeared lives of Bernardino Luini, by George C. Williamson; Velasquez, by R. A. M. Stevenson; *Andrea del Sarto*, by Miss H. Guinness; *Luca Signorelli*, by Maud Cruttwell; *Raphael*, by H. Strachey; *Crivelli*, by G. McN. Rushforth; and *Correggio*, by S. Brinton.

In other art domains Frederic Whyte has issued *Actors of the Century* (*Bell*); Charles Hiatt, *Ellen Terry and her Impersonations* (*Bell*); and W. G. Elliott, *Amateur Clubs and Actors*

(*Arnold*). In a third volume Edwin O. Sachs finishes his monumental work on *Modern Opera Houses and Theatres* (*Batsford*). From Paris comes a scientific treatise on the *Histoire de l'Architecture* (*Gauthier-Villars*), by Auguste Choisy. From the publishing house of *Bell* come: *Gothic Art in England*, by E. S. Prior; *Reliques of Old London*, by Wheatley; *Westminster Abbey*, by H. J. Feasey. Leader Scott writes on the *Cathedral Builders*, and T. Hodgkin on the *Walls and Gates of Rome*. Mrs. Andrew Lang has translated from Count Michael Tyskiewicz's French the *Memoirs of an Old Collector* (*Longmans*). This is the history of a rich Polish Count who collected works of art in Egypt and Italy from '60 till his death in '97. Bernard Shaw gives a commentary on "Der Ring des Nibelungen" in *The Perfect Wagnerite* (*Grant Richards*). Cosmo Monkhouse published late in November *British Contemporary Artists* (*Heinemann*).

Biography.

In autobiography, the first place this year must be given to Bismarck, the *Man and the Statesman* (*Smith, Elder & Co.*), which contains reminiscences dictated and written by Bismarck himself. Sidney Colvin edits *Letters of R. L. Stevenson to his Family and Friends* (*Methuen*). Justin McCarthy has written *Reminiscences* (*Chatto & Windus*), in two large volumes; C. H. Spurgeon's *Autobiography* (*Passmore*) has reached its third volume; Dr. Parker, of the City Temple, also sends out his autobiography under the title of *A Preacher's Life* (*Hodder & Stoughton*); and Newman Hall gives in his *Autobiography* (*Cassell*) a gossiping record of his long and active life. G. A. Storey, A.R.A., follows the example of other artists, and sends out chatty and amusing *Sketches from Memory* (*Chatto & Windus*). Among autobiographies may also be mentioned a *Diary of the Eighteenth Century*, by Mrs. P. Libbe Powys (*Longmans*), a lively and entertaining book; *Recollections, '32-86*, by Sir Algernon West, K.C.B. (*Smith, Elder*); *Lady Malcolm's Diary of St. Helena (1816-17)* (*Innes & Co.*), a journal containing conversations of Napoleon with Sir Pulteney Malcolm; and the *Memoirs of Saint-Simon* (*Heinemann*), in which Katherine P. Worraley, an American, has compressed into four volumes the twenty-one volumes of the original work.

The Cromwell tercentenary naturally called forth a mass of literature. Among other works deserving notice were S. R. Gardiner's *Oliver Cromwell* (*Goupil*), a sumptuously illustrated volume; Sir Richard Tangye's *Two Protectors* (*Partridge*), with illustrations of Cromwell relics and MSS.; G. Holden Pike's *Oliver Cromwell and his Times* (*Fisher Unwin*); Samuel Harden Church's *Oliver Cromwell* (*Putnam*), a history by an American; Lieut.-Col. T. S. Baldock's *Cromwell as a Soldier*; and a monograph on *Cromwell*, by John Morley, begun in the *Century Magazine* for November, and to be continued.

Several statesmen have been represented in the biography of the year. The concluding second and third volumes of *Sir Robert Peel's Papers* (*Murray*), edited by Charles Stuart Parker, and accompanied by a summary of his life and character by his grandson, the Hon. George Peel, have appeared. Sir Wemyss Reid has issued a large illustrated volume on

the *Life of W. E. Gladstone* (*Cassell*). The four volumes of the *Verney Memoirs* (*Longmans*) vividly illustrate both public and private manners in the 17th century. The *Ormonde Papers* (*Eyre & Spottiswoode*), sent out by the Historical Manuscripts Commission, relate to Irish military affairs between 1640 and 1714. In *The Duke of Newcastle* (*Longmans*), Mary Bateson has edited a curious series of letters from the Duke to a friend, describing the change of Ministry during the years 1765-67. In Macmillan's "Foreign Statesmen" series, Countess Cesaresco writes a highly eulogistic monograph on *Cavour*.

The revived interest in Nelson has called forth from Mrs. Hilda Gamlin two volumes on *Nelson's Friendships* (*Hutchinson*). Among the noteworthy works of the year bearing upon our Navy is *A Sailor's Life under Four Sovereigns* (*Macmillan*), being the memoirs of Sir Henry Keppel, senior Admiral of the Fleet. The *History of Lord Lytton's Indian Administration, 1876-80* (*Longmans*), is compiled from letters and official papers by Lady Betty Balfour. Sir M. Grant Duff's *Diary in Southern India, 1881-86* (*Murray*) is the history of his Governorship of Madras. James Milne's *Romance of a Pro-Consul* (*Chatto & Windus*) contains the life and memoirs of Sir George Grey, K.C.B., and narrates one of the most remarkable careers in the annals of the Empire. In *Admiral Phillip: The Founding of New South Wales* (*Fisher Unwin*), Louis Becke and Walter Jeffery tell the story of the man who, more than a century ago, founded New South Wales. The same authors give us *The Naval Pioneers of Australia* (*Murray*). Earl Grey, the late Administrator of Rhodesia, describes a strong and interesting personality in *Hubert Hervey, Student and Imperialist* (*Arnold*). Dr. R. Garnett writes the life of *Edward Gibbon Wakefield* (*Fisher Unwin*), the man who did so much to develop our present Colonial policy. *Lumsden of the Guides* (*Murray*), is the first title of a sketch of the life of Lieut.-Gen. Sir Harry Lumsden, by Gen. Sir Peter Lumsden and George R. Elmslie. The subject of this book organised the regiment of the "Guides" on the Indian frontier. Lady Victoria Wellesley's *Memoir* (*Skeffington*), by her eldest god-daughter, gives us interesting glimpses into the private history of the Great Duke. In T. A. Spalding's biography of *Richard Badley* (*Constable*), we have an admiral who was a contemporary of Blake's brought afresh into well-deserved notice. Sir Alexander Arbuthnot writes a monograph on *Lord Clive* (*Fisher Unwin*); and Spenser Wilkinson, in *From Cromwell to Wellington* (*Lawrence & Bullen*), edits an interesting volume in which different writers deal with twelve great soldiers. In *A British Rifeman* (*A. & C. Black*), we have the letters and journals of a gallant soldier who served in the Peninsular War. *Babar*, by Stanley Lane-Poole, is the latest issue in the "Rulers of India" series (*Clarendon Press*).

Among the autobiographies of literary notabilities, the *Autobiography and Letters of Mrs. Oliphant*, edited by Mrs. Harry Coghill (*Blackwood*), deserves a prominent place. Another interesting work is *Fragments of an Autobiography* (*Nisbet*), by Felix Moscheles, grandson of Mendelssohn. J. B. Crozier, author of "History of Intellectual Development," has published reminiscences under the title of *My Inner Life: A Chapter in Personal Evolution*

(*Longmans*). In *Wordsworth and the Coleridges, with other Memories* (*Macmillan*), Ellis Yarnall gives reminiscences of many men of letters and politicians during more than half a century.

Passing to biography, we come to *Lewis Melville's Life of Thackeray* (*Hutchinson*). Mrs. Ritchie has also given a life of *Thackeray* (her father) in the Biographical Edition of his works (*Smith, Elder & Co.*). *George Saintsbury* has written a monograph on *Matthew Arnold* (*Blackwood*); *Arthur H. Beavan* has issued a readable book on *James and Horace Smith* (*Hurst & Blackett*); *Stephen Wheeler* has edited the private and public *Letters of Walter Savage Landor* (*Duckworth & Co.*); *Edmund Gosse* has written the life, and collected and revised the letters, of *John Donne* (*Heinemann*); *James Hay* gives us a fresh *Life of Sir Walter Scott* (*James Clarke*); and *John A. Doyle, Fellow of All Souls, Oxford*, has edited the *Memoir and Correspondence of Susan Ferrier* (*Murray*), the novelist whom Scott praises, and who was contemporary with Jane Austen. *Carlyle's Letters to his Youngest Sister* (*Chapman & Hall*) have been edited by Charles Townsend Copeland, of Harvard University. *Miss Palgrave* writes the life of her father, *Francis Turner Palgrave* (*Longmans*), who was 30 years in the Education Office, and afterwards Professor of Poetry at Oxford. *Dr. Birkbeck Hill* has edited a number of *Unpublished Letters of Dean Swift* (*Fisher Unwin*). *Memoirs of Victor Hugo* (*Heinemann*), is the English title of J. W. Harding's translation of "Choses Vues." *John Hookham Frere and his Friends* (*Nisbet*), contains letters edited by Miss Gabrielle Festing.

A group of divines claim attention. The Bishop of Salisbury writes *The Episcopate of Charles Wordsworth* (*Longmans*); *Dr. Evelyn Abbott* and Professor *Lewis Campbell* edit a supplementary volume of *Letters of Jowett* (*Murray*); *H. L. Thompson* writes a biography of the late *Dean Liddell* (*Murray*); *Berdmore Compton* gives a *Memoir of Dean Goulburn* (*Murray*); and *A. W. Dale* sends out a life of his father, *Dr. Dale, of Birmingham* (*Hodder & Stoughton*). *F. D. How* writes a memoir of *Bishop John Selwyn* (*Isbister*).

A. L. Baldry, in an illustrated book entitled *Sir John Everett Millais* (*Bell & Sons*), gives an account of that painter's art and influence. *John Guille Millais* publishes in two volumes the *Life and Letters of* (his father) *Sir John Everett Millais* (*Methuen*). *William Rossetti*, in *Ruskin, Rossetti, Pre-Raphaelitism* (*George Allen*), publishes letters written by his brother, *Dante Gabriel*, to *Ford Madox Brown*, and others written by *Ruskin* to *Dante Gabriel*. The *Life and Letters of Lewis Carroll* (*Fisher Unwin*), is a welcome biography written by "Carroll's" nephew, *S. D. Collingwood*. *James Russell Lowell and his Friends* (*Constable*), by *Edward Everett Hale*, is a series of reminiscences of the life and work of *Lowell*. A much-needed book has been produced by *Dr. Knapp* in the *Life, Writings, and Correspondence of George Borrow* (*Murray*). Educationists will be glad of *F. Storr's Life and Remains of the Rev. R. H. Quick* (*Cambridge University Press*).

Turning to scientists and those who apply science, we have *Sir Wemyss Reid's Memoirs and Correspondence of Lord Playfair* (*Cassell*); *Lady Prestwich's* biography of her husband, *Sir Joseph Prestwich* (*Blackwood*), who was geologist and professor as well as wine merchant;

the *Life Story of Sir Charles Tilson Bright*, the engineer (*Constable*), by his brother and son; Mrs. Alec Tweedie's life of her father, *George Harley, F.R.S.*, the noted London physician (*Scientific Press*).

Of great lawyers, we have a continuation of the *Memorials, Personal and Political (Macmillan)* of the Earl of Selborne (Roundell Palmer), bringing the story down to '95; and Charles Fairfield's *Memoir of Lord Bramwell (Macmillan)*. J. R. Gilmore gives interesting *Personal Recollections of Abraham Lincoln (Macqueen)*; and Robert Crozier Lory, in Stead's "Russian Library," translates "Pobyedonostzeff's Reflections of a Russian Statesman," with a preface by Olga Novikoff. A pathetic interest attaches to A. de Burgh's memoir of *Elizabeth, Empress of Austria (Hutchinson)*; and an interest which is also pathetic attaches to *A Prisoner of the Kaleefa: Twelve Years' Captivity at Omdurman (Chapman & Hall)*, in which Charles Neufeld tells his own touching tale. The *Memoirs of Madame D'Epinay (H. S. Nichols)* is a translation by J. H. Freese of a document interesting to students of Rousseau and his age. Two lives of Danton have appeared in English, one by Hilaire Belloc (*Nisbet & Co.*) and the other by A. H. Beesly (*Longmans*). The life of *Ralph Fitch (Fisher Unwin)*, England's pioneer to India and Burma, is told for the first time by J. Horton Ryley, member of the Hakluyt Society. Max Müller has edited the *Life and Sayings of Rāmkrishna (Longmans)*, an Indian saint who died in '86. A. V. Williams Jackson, of Columbia University, has written a biography of *Zoroaster, the Prophet of Ancient Iran (Macmillan)*.

Two books about Shelley and Byron are *Last Days of Shelley (Fisher Unwin)*, a translation from the Italian of Dr. Guido Biagi, and *Last Links with Byron, Shelley, and Keats (Smithers)*, by William Graham. J. J. Jusserand has written an opportune book on *Shakespeare in France under the Ancien Régime (Unwin)*; and Dr. Moore has issued from the *Clarendon Press* a second volume of *Studies in Dante. The Life of William Morris (Longmans)* has been written by J. W. Mackail, who had unreserved access to materials in the possession of Morris's family, the executors, and the firm of Morris & Co., as well as many intimate friends. The volume is enriched by a number of excellent illustrations. Cricketers will welcome W. G. Grace's *Cricketing Reminiscences and Personal Recollections (Bowden)*. Mention should here be made of the continuation of the great *Dictionary of National Biography (Smith, Elder)* to the 60th volume and the names "Watson—Whewell." A supplement is announced after the work itself is completed.

Criticism, Essays, etc.

In the foremost line under this heading must stand *The Map of Life: Conduct and Character (Longmans)*, by W. E. H. Lecky. In this work criticism is tinged with impersonal objective autobiography. Dr. Richard Garnett, whose retirement from the British Museum was so deeply regretted, has issued *Essays in Librarianship and Bibliography (George Allen)*. A dispute in copyright has given special prominence to *Appreciations and Addresses by Lord Rosebery (Lane)*, edited by Charles Geake. The same publisher has sent out Alice Meynell's fascinating *Spirit of Place, and other Essays*.

Stopford Brooke has supplied an excellent history of *English Literature to the Norman Conquest (Macmillan)*; and H. A. Beers, of Yale, a *History of English Romanticism in the Eighteenth Century (Kegan Paul)*. A welcome history of *Bohemian Literature (Heinemann)*, of which little has been known in England, comes from the pen of Count Lützow; and Dr. Douglas Hyde has supplied a similar lack by his erudite *Literary History of Ireland from Earliest Times (Fisher Unwin)*.

A hitherto unpublished work by Thomas Carlyle, *Historical Sketches (Chapman & Hall)*, has been edited by Alexander Carlyle. It refers to notable persons and events in the times of James I. and Charles I. *The Religion of Shakespeare (Burns & Oates)*, is a book sent out with the sanction of Cardinal Vaughan. In it, the late Richard Simpson attempts to prove that Shakespeare was a Roman Catholic. Dr. Brandes, the well-known Scandinavian critic, has written an elaborate *Study of Ibsen*, whose intimate friend he is (*Heinemann*). Joseph Texte's *Jean Jacques Rousseau and the Cosmopolitan Spirit in Literature (Duckworth)* is translated by J. W. Matthews.

From the British Museum comes a second volume on *Greek Papyri*, acquired from January '91 to May '95. Students will welcome also William Morris's translation of the tale of *Beowulf (Longmans)*, and Thomas Arnold's *Notes on Beowulf (Longmans)*. Educationists will be interested in William James's *Talk to Teachers on Psychology (Longmans)*; P. A. Barnett's *Common Sense in Education (Longmans)*; and R. P. Scott's *What is Secondary Education? (Rivington)*.

A new departure in quarterlies is the *Anglo-Saxon Review (Lane)*, edited by Lady Randolph Churchill. This review sells at a guinea a number, and has a certain resemblance to the defunct "Yellow Book." It is beautifully bound and printed.

The great *Oxford Dictionary* progresses with regularity, and is now in the fifth volume and the letter "I."

Poetry.

Poetry may be said to be "quiet." The Tennyson copyrights are running out, and many publishers are hurrying new editions into the market. Sir Edwin Arnold has issued a translation into prose and verse of the first four Babs or "Gateways" of *The Gulistan of Sa'di (Thomas Burtleigh)*. John Davidson has added another volume to his works, *The Last Ballad, and other Poems (Lane)*. William Watson's eagerly awaited *Collected Poems (Lane)* appeared soon after our last issue went to press. In the *Island Race (Elkin Mathews)*, Henry Newbolt has kept up to the standard of his former book. One of the most noteworthy volumes of poetry of the year is Thomas Hardy's *Wessex Poems*. A new collection of the *Poetical Works of the late R. S. Hawker (Lane)*, the warm-hearted Cornish parson, has appeared contemporaneously with a revised edition of Baring Gould's biography of him, *The Vicar of Morwenstow (Methuen)*. Father Russell, S.J.L., is the author of some beautiful *Idyls of Killowen*, dedicated to the author's brother, Lord Russell of Killowen. Edwin Markham, who hails from the Far West, appears to have made a mark with his *Man with the Hoe, and other Poems (New York: Doubleday & McClure)*.

Of the multitude of books of verse published during the year, few deserve special notice. Dr. Stubbs, Dean of Ely, in his *Brythnoth's Prayer, and other Poems*, gives us a good ballad and some good carols. W. B. Yeats has sent out his *Collected Poems (Unwin)*, and a new volume *The Wind among the Reeds (Elkin Mathews)*. Laurence Housman's *Little Land (Grant Richards)* exhibits originality and good style. Eugene Mason shows promise in *Field Floridus (Grant Richards)*. Among others may be mentioned Sturge Moore and his *Vine Dresser (Unicorn Press)*; John Cowper Powys's *Poems (Rider & Son)* have a genuine poetic touch; A. B. Miall's *Poems (Lane)* are musical; Marcus S. C. Richards shows an acquired taste and a grace of expression in his *Music from the Maze (Chiswick Press)*. Ethel M. de Fonblanque (Mrs. Arthur Harter) sends out a graceful *Chaplet of Love Poems (Smithers)*; and Warwick Bond writes a drama on Shakespearean lines, entitled *Zenobia (Elkin Mathews)*. It should be mentioned that Swinburne, Rudyard Kipling, and the Laureate have issued detached poems inspired by the war in the Transvaal. Late in November A. D. Godley issued his clever and most humorous *Lyra Frivola (Methuen)*.

Fiction.

There have been few, if any, new reputations made this year by the men who write novels. Rudyard Kipling has sent out *Stalky & Co. (Macmillan)*, a story of school life with a certain amount of autobiography in it. Anthony Hope maintains his highest level in *The King's Mirror (Methuen)*. S. R. Crockett gives a tale of the days of James II.'s boyhood in his *Black Douglas (Smith, Elder)*, and a tale of a more domestic character in *Kit Kennedy, Country Boy (Clarke & Co.)*. "Ian Maclaren" has issued a volume with the title *Afterwards, and other Stories (Hodder & Stoughton)*. Rider Haggard returns to South Africa for the subject of *Swallow (Longmans)*, a story of the "great trek" of 1836. E. F. Benson reminds his readers of "Dodo" in his *Mammon & Co. (Heinemann)*; Stanley Weyman's *Castle Inn (Smith, Elder)* treats of the days of Pitt and highwaymen. There are two novels—the last, alas!—by Harold Frederic, *Gloria Mundi* and *The Market Place (Heinemann)*. Conan Doyle is didactic in *A Duet, with an Occasional Chorus (Grant Richards)*. One of Grant Allen's volumes this year has been his novel *Linnet (Grant Richards)*. R. Le Gallienne gives the annals of a lower middle-class provincial family in *Young Lives (Arrowsmith)*. From W. H. Mallock comes *The Individualist (Chapman & Hall)*; from Frankfort Moore, *Well, After All (Hutchinson)*; from Max Pemberton, *The Garden of Swords (Cassell)*; from Joseph Hatton, *The White King of Manoa (Hutchinson)*; and from W. E. Norris, *Giles Ingilby (Methuen)*. Of American novelists—some of whom are almost acclimatised in England—Bret Harte gives us *Stories in Light and Shade (Pearson)*; Henry James, *The Awkward Age (Heinemann)*; W. D. Howells, *The Ragged Lady (Harpers)*; and Frank Stockton, *The Associate Hermits (Harpers)* and *The Vizier of the Two-Horned Alexander*. This latter book gives in its hero a new rendering of the legend of the Wandering Jew, the "Vizier" dating in this case from the days

of Abraham. From Rolf Boldrewood comes *War to the Knife (Macmillan)*.

As the number of novels by less known and new writers is legion, only a few as samples can be mentioned here. No. 5, John Street, by Richard Whiteing (*Grant Richards*), gives a vigorously drawn study of slum life, and was at once exceptionally popular. It was one of the greatest successes of the year. Dr. Joseph Parker has long been well known as a preacher; this year he has turned his hand to fiction and given some types of Dissenting ministers in *Paterson's Parish: a Lifetime among Dissenters (Burleigh)*. S. F. Harrison's *Forest of Bourgmaries (Arnold)* is a sweet and pretty story. Morley Roberts's *Son of Empire (Hutchinson)* gives pictures of frontier Indian warfare; his *Sea Comedy (Milne)* contains some rollicking fun; and in *The Colossus, a Story of To-Day (Arnold)*, he has drawn a portrait of Cecil Rhodes. Maurice Hewlett has, in his *Little Novels of Italy (Chapman & Hall)*, succeeded in a new style; Eden Phillpotts has attempted a picture of school life in *The Human Boy (Methuen)*; as has also A. W. Clarke in *Jasper Tristram (Heinemann)*. Silas Hocking adds another to his list of Cornish novels in *The Strange Adventures of Israel Pendray (Warne)*. From Louis Becke comes *Rodman the Boat-steerer (Unwin)*; from E. W. Hornung, *Some Persons Unknown (Cassell)*. *The Queen's Justice*, by Sir Edwin Arnold, is the story of a Bengalese law case, with sketches of rural life in India. R. W. Chambers, in the *Ashes of Empire (Macmillan)*, gives pictures of Paris during the siege. *At a Winter's Fire* is from the pen of Bernard Capes (*Pearson*); *The Green Field*, by Neil Wynn Williams (*Chapman & Hall*), is a graphic dialect and locality study of the Midlands; A. E. W. Mason tells a clever story in *Miranda of the Balcony (Macmillan)*; S. Macnaughton has achieved a striking work in *Selah Harrison (Macmillan)*; Margaret Deland's *Old Chester Tales (Harper)* are suggestive of Miss Austen; from Guy Boothby comes *A Sailor's Bride (White)*; Maurus Jokai's *Tower of Dago* has come out in English; F. Hinde Groome appeals to folk-lorists in *Gipsy Folk Tales (Hurst & Blackett)*; Arthur Morrison has written another of his characteristic works in *To London Town (Methuen)*; in *John Thaddeus Mackay (Burleigh)* Charles Williams makes a study in sects. *The Two Standards (Unwin)* would be noteworthy, if merely because it is from the pen of Canon Barry.

Women have not been idle in the domain of fiction, and at least one among them may be said to have made a new reputation. Ellen Thorneycroft Fowler in her second book, *A Double Thread (Hutchinson)*, has taken the public by storm. Her sister, Edith Henrietta Fowler, is following suit with *A Corner of the West (Hutchinson)*. Many of the old favourites have been busy. For example: Rhoda Broughton, *The Moth and the Candle (Macmillan)*; Beatrice Harraden, *The Fowler (Blackwood)*; L. T. Meade, *The Cleverest Woman in England (Nisbet)*; B. M. Croker, *Jason and other Stories*, and, later, *Terence (Chatto & Windus)*; Mrs. Comyns Carr, *The Arm of the Lord (Duckworth)*; Adeline Sergeant, *Blake of Oriel (White)*; Mrs. Wilfrid Ward, *One Poor Scruple (Longmans)*; M. Betham-Edwards, *Lord of the Harvest (Hurst & Blackett)*; Anne Douglas Sedgwick, *The Confounding of Camelia (Heinemann)*; Sarah Tytler, *Miss Manse (Long)*; May Crommelin, *Devil-May-*

Care (*White*); Gertrude Atherton, *The Californians (Lane)*; Mrs. Campbell Praed, *Madame Izan*, a story of Hong Kong and Yokohama (*Chatto & Windus*); Miss Barr, I, Thou, and the Other One (*Unwin*); Mrs. Burton Harrison, *The Triple Entanglement*, giving adventures of American and English lovers in the South of Europe; Florence Warden, *The Farm in the Hills (Sands)*. Among the books that ought not to be overlooked are Elizabeth and her German Garden and its sequel, *The Solitary Summer (Macmillan)*. These are anonymous sketches full of a quaint and genial humour, and delicious descriptions of outdoor nature. The Hawthor edition of the works of the Brontës begins with *Jane Eyre*, with an introduction by Mrs. Humphry Ward (*Smith, Elder*).

History.

While all eyes are fixed upon South Africa the following three books will possess special interest: *The Transvaal from Within: A Private Record of Public Affairs (Heinemann)*, by J. P. Fitzpatrick; Olive Schreiner's *An English-South African's View of the Situation (Hodder & Stoughton)*, which is an apology for Kruger; Canon W. J. Knox Little, in his *Sketches and Studies in South Africa*, gives a history and some charming descriptions of scenery, and speaks of Kruger as an incarnation of "Boerdom at its best." *The Colonisation of Africa by Alien Races*, by Sir Harry Johnston (*Camb. Univ. Press*), gives a historical summary covering 3000 years. On the problem of the Far East, a very useful book is Lord Charles Beresford's *Break-up of China (Harpers)*, giving an account of its commerce, currency, waterways, armies, railways, politics, and future prospects. In the same connection should be mentioned Alexis Krausse's *China in Decay (Chapman & Hall)*. *Kitchener's Campaign*, by Bennet Burleigh (*Chapman & Hall*), is another book of exceptional contemporary interest.

In British history, one of the best books of the year has been Sir George Trevelyan's first volume of *The American Revolution (Longmans)*. This is really the author's continuation of his life of Fox; but he chooses to tell his story as part of the history of the times. Sir Charles Dilke has published, under the title of *The British Empire (Chatto & Windus)*, a series of articles written in '98, giving the present position of the several members of the Imperial family. Justin McCarthy has written *Modern England under Victoria (Unwin)*. General Sir Robert Cadell wrote, but did not live to see through the press, *Sir John Cope and the Rebellion of 1745 (Blackwood)*. This book is a defence of "Johnnie Cope." Andrew Lang has followed his "Pickle the Spy" by *The Companions of Pickle (Longmans)*, a book full of curious information. Professor Colby, of Montreal, gives *Selections from the Sources of English History, B.C. 55—A.D. 1832 (Longmans)*. In anticipation of the thousandth anniversary of the death of King Alfred, Alfred Brooker, ex-Mayor of Winchester, has published a volume of essays, prefaced by a poem by the Laureate, entitled *Alfred the Great (Black)*. The Historical Manuscripts Commission have issued vol. 1 of the *Duke of Buccleuch's Papers*. W. Pember Reeves, Agent-General of New Zealand, gives a history of his Colony under the title of *The Long White Cloud (Horace Marshall)*.

In military and naval history there are

Hastings Irwin's *War Medals and Decorations, 1588—1898 (Gill)*; Hilliard Atteridge's *Wars of the Nineties*, illustrated (*Cassell*); Charles Morris's *American War with Spain (Hutchinson)*; Richard Harding Davis's *Cuban and Porto Rican Campaigns (Heinemann)*; a history of *The American-Spanish War, by the War Leaders (Gay & Bird)*; Theodore Roosevelt's narrative of the doings of the Cuban volunteer *Rough Riders (Kegan Paul)*. The *Navy Records Society* has published a first instalment of a selection from the papers of the late Sir Thomas Byam Martin, Admiral of the Fleet; and the same society has also published vol. 1 of *Logs of the Great Sea Fights, 1794—1805*, edited by Rear-Admiral Sturges Jackson. Winston Spencer Churchill's *River War: The Reconquest of the Soudan (Longmans)*, is edited by Col. F. Rhodes.

In Indian and Asiatic history, there are Sir W. Hunter's first volume of his *History of British India (Longmans)*; Max Müller's second series of *My Indian Friends (Longmans)*; Col. Hanna's *Second Afghan War (Constable)*; Mrs. Rickmers' (Miss C. Mabel Duff) *Chronology of India* from the earliest times to beginning of 16th century (*Constable*); R. S. Whiteway's *Rise of the Portuguese Power in India (Constable)*; *The Heart of Asia*, a history of Turkestan and the Central Asian Khanates, by F. H. Skrine and E. D. Ross (*Methuen*); William Foster's third volume of *India Company's Letters*, from the India Office records (*Sampson Low*); and the same writer's history of the *Embassy of Sir Thomas Roe (Hakluyt Society)*. Arthur Diósy, in *The New Far East (Cassell)*, writes enthusiastically of Japan. Archibald Little's enlarged issue of his *Through the Yang-tze Gorges (Sampson Low)* is a valuable work. Professor Worcester, of Michigan, conveys much new information in *The Philippine Islands and their People (Macmillan)*. Alexis Krausse, in his *Russia in Asia (Grant Richards)*, describes the growth of Asiatic Russia from 1553. In *The Story of China (Unwin's "Story of Nations" series)*, Professor Douglas gives a useful outline of Chinese history. W. G. Aston writes a *History of Japanese Literature (Heinemann)*.

Coming nearer home there are Miss Macgregor's *History of the Clan Gregor (Brown, Edinburgh)*; Hyde's *Literary History of Ireland (Unwin)*; Michael MacDonagh's *Irish Life and Character (Hodder & Stoughton)*; Dr. P. Hume Brown's *History of Scotland*, vol. 1 (*Camb. Univ. Press*); Robert S. Rait's selections from contemporary writers illustrating the history of *Mary Queen of Scots (Nutt)*; F. C. Conybeare's *Dreyfus Case (Allen)*; George Barlow's *History of the Dreyfus Case (Simpkin, Marshall)*; Lionel Dècle's *Trooper 3809 (Heinemann)*, an attack upon the French military system by a Frenchman naturalised in England; Catherine Bearn's *Early Valois Queens (Unwin)*; Part I. of Blok's *History of the Netherlands* from the earliest times, translated by Oscar Bierstadt and Ruth Putnam (*Putnam*); David S. Meldrum's *Holland and the Hollanders (Blackwood)*; Bolton King's *History of Italian Unity (Nisbet)*; Bullock Hall's *Romans on the Riviera (Macmillan)*, a choice piece of ancient history; Verestchagin's *Napoleon I. in Russia (Heinemann)*, the Emperor seen through the eyes of a patriotic painter; John Abercromby's *Pre- and Proto-Historic Finns (Nutt)*; Martin A. S. Hume's

Spain: Its Greatness and Decay (*Camb. Univ. Press*); Budget Meakin's Moorish Empire: a Historical Epitome (*Sonnenschein*); Frances Gerard's Romance of Ludwig II. of Bavaria (*Hutchinson*); Herbert Fisher's history of The Mediæval Empire (*Macmillan*); Sidney Whitman's Story of Austria (*Unwin*). Concerning America there are, among many others, the collected Messages and Papers of the Presidents (*Sampson Low*); Senator Lodge's Story of the Revolution (*Constable*); and Blackman's Making of Honolulu (*Macmillan*); Professor Greene, of Illinois, gives a study of The Provincial Governor in the English Colonies of North America (*Longmans*).

The Rev. S. Kinns, in view of the threatened demolition of the church in question, sends out an enlarged edition of his Six Hundred Years, or sketches of eminent men and women who have been connected with the church of Holy Trinity, Minorities, since 1293 (*Cassell*). John Sergeaunt is the author of Annals of Westminster School (*Methuen*); and Septimus Rivington writes the History of Tonbridge School (*Rivington*); R. J. Cornwell-Jones writes the history of The British Merchant Service (*Sampson Low*). Ancient history is represented by L. W. King's Letters and Subscriptions of the King of Babylon, B.C. 2200 (*Lusac*); Professor Dill's Roman Society in the Last Century of the Western Empire (*Macmillan*); and Gaston Boissier's Roman Africa (*Putnam*), translated by Arabella Ward. The Oxford Historical Society sends out *Epistolæ Academicæ Oxon.* (*Clarendon Press*), edited by the Rev. Henry Anstey, dealing with the period 1421—1509. Freemasonry has its history told afresh in John Strachan's Northumbrian Masonry (*Kenning*), and Albert Churchward's Origin and Antiquity of Freemasonry (*Causton & Sons*).

Politics and Economics.

Early in the year, W. E. H. Lecky gave new interest to a fresh edition of his Democracy and Liberty (*Longmans*) by adding an introduction in which he criticised Gladstone. Bernard Bosanquet writes the Philosophical Theory of the State (*Macmillan*); H. L. Stephen, two volumes of State Trials, Political and Social (*Duckworth*); the Rev. J. W. Horsley, prison chaplain, Prisons and Prisoners (*Pearson*); Thomas Erskine Holland, D.C.L., Studies in International Law (*Clarendon Press*); Professor Giddings, Elements of Sociology (*Macmillan*); an American (Ford) describes the Rise and Growth of American Politics (*Macmillan*); Gamaliel Bradford gives the Lesson of Popular Government; Professor Adams, of Yale, sends out a text-book entitled European History: An Outline of its Development (*Macmillan*); a New York barrister (Gardiner) publishes an essay on Our Right to Acquire Foreign Territory (*Putnam*); in The Armies of the World (*Lawrence & Bullen*), C. S. Jerram summarises the forces of the various States; Dobson Collet writes the History of Taxes on Knowledge, with introduction by G. J. Holyoake (*Unwin*). Rudyard Kipling's Fleet in Being (*Macmillan*), consisted of notes of two trips with the Channel Squadron.

On miscellaneous economical topics are the following:—Arthur Shadwell's London Water Supply (*Longmans*); F. W. Lawrence's Local Variations in Wages (*Longmans*); Prince Krapotkin's Fields, Factories, and Workshops

(*Hutchinson*); Willis Bund's Handy Book of Fishery Management (*Lawrence & Bullen*); Lieut-Col. Sexby's Municipal Parks, Gardens, and Open Spaces of London (*Stock*); Rowntree and Sherwell's treatise on the Temperance Problem (*Hodder & Stoughton*); and the Statesman's Year-Book, edited by Dr. Keltie (*Macmillan*).

Topography.

Sir Walter Besant has added to his list of books on London a descriptive volume on South London (*Chatto & Windus*). In a sumptuously got up work entitled London Impressions (*Constable*), William Hyde supplies the etchings and pictures in photogravure, and Alice Meynell the essays. London Types (*Heinemann*) are done by William Nicholson on brown paper in solid black strokes with touches of red and yellow, and they are accompanied by "quatorzains" with a racy, slangy flavour by W. E. Henley. J. H. Round's Commune of London, and other Studies (*Constable*) has a commendatory letter from Sir Walter Besant. William Fergusson Irvine has edited Sir Edward Moore's Liverpool in Charles II.'s Time (*Young, Liverpool*). Augustus J. C. Hare has sent out a useful and interesting account of Shropshire (*Allen*). S. Baring Gould's Book of the West (*Methuen*) is a chatty description of Devon and Cornwall, a sort of supplement to the guide books. In The Bath Road (*Chapman & Hall*) C. G. Harper gives another of his chatty books about our old highways.

Exceedingly interesting and valuable works are appearing in the form of histories of the Oxford and Cambridge colleges (*F. E. Robinson*). King's, at Cambridge, has its story told by the Rev. Austen Leigh; Sidney Sussex, Cambridge, by G. M. Edwards; Brasenose, Oxford, by John Buchan; Merton, Oxford, by Bernard W. Henderson; All Souls', Oxford, by C. Grant Robertson. Wadham College, by J. Wells; Queens' College, Cambridge, by Gray; Downing College, by H. P. E. Stevens; Trinity College, Oxford, by H. E. D. Blakiston. The writers are severally men whose relation to the college in question specially qualifies them for their task. A similar work is the Annals of Shrewsbury School (*Methuen*), by the late G. W. Fisher, edited after the author's death by J. Spencer Hill.

As topography should be classed also Lewis Rice's description of Mysore (*Constable*) in a new edition of two massive volumes; also Robert T. Hill's survey of Cuba and Porto Rico (*Unwin*).

Travel and Sport.

Of books of European travel we may mention Mrs. Norman Neruda's Climbs of Norman Neruda (*Unwin*), in which she edits her late husband's notes and describes his last climb; The European Tour, by Grant Allen (*Grant Richards*); Travels and Politics in the Near East, by William Miller (*Unwin*), treats of every State in the Eastern Peninsula except Roumania and the interior of Albania; The Valley of Light, by W. Basil Worsfold (*Macmillan*), a tour of exploration in Piedmont; E. C. Oppenheim's New Climbs in Norway (*Unwin*); With Nansen in the North, by Hjalmar Johansen (*Ward, Lock & Co.*), the Fram expedition of '93-96; The Voyages of the Zeni, by F. W. Lucas (*Stevens, Sons, and Stiles*), the story of the

exploration of the northern seas by the brothers Zeni three hundreds years ago; **A Russian Province of the North**, by Engelhardt, Governor of Archangel, translated by Henry Cooke (*Constable*).

Asia is represented by Lord Warkworth's notes of his holiday in **Asiatic Turkey** (*Arnold*); Major Waddell's wanderings **Among the Himalayas** (*Constable*); Capt. Adair's **Summer in High Asia** (*Thacker*); the Rt. Hon. Sir Mountstuart E. Grant Duff's **Diary in Southern India, 181-86** (*Murray*); Mrs. Archibald Little's **Intimate China: The Chinese as I have Seen them** (*Hutchinson*); Mrs. Hugh Fraser's **Diplomatist's Wife in Japan** (*Hutchinson*); Major Young-husband's **Philippines and Round About**, and **British Interests in those Waters** (*Macmillan*). Late in November were published Edward Fitzgerald's account of his ascent of Aconcagua, under the title **The Highest Andes** (*Methuen*); **From the Alps to the Andes** (*Fisher Unwin*), being practically the life of Mattias Zurbriggen, the famous guide, told by himself; and **Pictures of Travel, Sport and Adventure** (*Pearson*), by George Lacy.

About Africa there are Miss Mary Kingsley's **West African Studies** (*Macmillan*); R. B. Cunningham Graham's **Mogreb-el-Akksa: A Journey to Morocco** (*Heinemann*); Harold Bindloss's **In the Niger Country** (*Blackwood*); Capt. Guy Burrows's **Land of the Pigmies of Central Africa**, with introduction by H. M. Stanley (*Pearson*); Mrs. Lionel Phillips's **South African Recollections** (*Longmans*); Silva White's **Sphinx to Oracle** (*Hurst & Blackett*), the story of a visit to the Oasis of Siwa; Frederic Courtland Penfield's **Present-Day Egypt** (*Macmillan*); Dr. Anson's **Residence in East Africa and the Uganda Protectorate as Medical Officer to Her Majesty's Government**.

Fisher Unwin's "Over-Seas Library" began with Cunningham Graham's **Ipané**, or sketches of nomad life all over the world. Frank T. Bullen, in **The Cruise of the Cachalot** (*Smith, Elder*), gives a book on maritime adventure under the guise of a voyage round the world after sperm whales. In the **Log of a Sea Waif** (*Smith, Elder*), the same author professes to give his own early experiences. W. H. Long gives anecdotes of sea fights, wrecks, etc., in **Naval Yarns** (*Gibbings*). Mrs. Edgeworth David, in **Funafuti: or Three Months on a Coral Island** (*Murray*), gives charming notes of an expedition with her husband, a Sydney professor, to study the theory of coral islands. The Hon. David W. Carnegie gives a narrative of five years' pioneering in Western Australia under the title of **Spinifex and Sand** (*Pearson*).

Sport is represented by Frank Gillard's **History of the Belvoir Hunt** (*Constable*); W. C. A. Blew's account of **The Quorn Hunt and its Masters** (*Nimmo*); "Thormanby's" pen-and-ink portraits of **Kings of the Hunting Field** (*Hutchinson*). Going further afield we have **The Grand and Small Game of Africa** (*Rowland Ward*), edited by Bryden, and contributed to by well-known sportsmen, naturalists, and explorers; and F. V. Kirby's **Sport in East Central Africa** (*Rowland Ward*). In **Our Lady of August and the Palio of Siena** (*Torrini, Siena*) William Heywood describes a curious semi-religious race in which the palio or banner bearing the effigy of Our Lady, and blessed in her cathedral, is given to the winner.

Cricket is represented by Dr. Grace's **Recol-**

lections (*Bowden*); and William Caffyn's autobiographical **Seventy-one Not Out** (*Blackwood*). A new game that comes from the Bosphorus is explained by Hulme Beaman in his **Bridge for Beginners** (*Methuen*). Fishing is represented by Sir Edward Grey's **Fly-Fishing** (Dent's "Haddon Hall Library"), edited by the Marquis of Granby and G. A. B. Dewar; and by F. M. Halford's **Dry Fly-Fishing** (*Vinton*).

Religion and Philosophy.

The ritualistic controversy has naturally called forth a number of works of a more or less controversial character. Among the more important are Professor Sanday's **Catholic Movement and the Archbishops' Decision** (*Longmans*); the Rev. Arthur Galton's **Message and Position of the Church of England** (*Kegan Paul*); J. M. Lely's **Church of England Position** (*Horace Cox*), a compilation by a barrister bringing together the principal statutes, cases, and formularies in which the law for the regulation of the Church of England is contained; and a translation of Harnack's **Thoughts on the Present Position of Protestantism** (*Black*).

In critical and expository theology are the following:—Archdeacon Wilson's **Hulsean Lectures for '99, The Gospel of the Atonement** (*Macmillan*), treating atonement as the identification of the human and the divine life; Dr. Lyttelton's **Hulsean Lectures for '91** are at last published under the title of **The Place of Miracles in Religion** (*Murray*); Dr. Ramsay's **Historical Credibility of Luke** (*Hodder & Stoughton*), a defence of Luke's credibility as an historian; Professor Swete's critical work on **The Gospel according to St. Mark** (*Macmillan*); Canon Gore's practical exposition of **St. Paul's Epistle to the Romans** (*Murray*); a new edition of Dr. Thomas Jackson's **Commentaries upon the Apostles' Creed** (*Whittaker*), edited by Prebendary Gregory, with a preface by the Archbishop of York; the Bishop of Worcester's primary visitation charge, entitled **The Doctrine of the Lord's Supper Cleared from certain Misconceptions** (*Elliot Stock*); Dr. Samuel Green's seven lectures at Regent's Park (Baptist) College, entitled **The Christian Creed and the Creeds of Christendom** (*Macmillan*); Dr. Orello Cone's (an American) **Paul: Man, Missionary, and Teacher** (*Black*); Dr. Edgar Gibson's **Book of Job** (*Methuen*), one of the series of "Oxford Commentaries" edited by the Warden of Keble; Canon Newbolt's volume in the "Oxford Library of Practical Theology," entitled **Religion** (*Longmans*). Of a more purely practical character are Stopford Brooke's **Gospel of Joy** (*Isbister*); Dr. Pusey's **Spiritual Letters** (*Longmans*), edited by Canon Newbolt and the Rev. J. O. Johnston; **The Perfect Life**, by Canon Knox Little (*Longmans*); **Sermons** by the late Benjamin Jowett (*Murray*), edited by Dean Fremantle.

On canon law and ecclesiastical questions are Professor Maitland's **Canon Law in the Church of England** (*Methuen*); Dr. Wirmgan's **Constitutional Authority of Bishops in the Catholic Church** (*Longmans*); the reprint of Dr. Fairbairn's papers in the **Contemporary Review** on Catholicism, Roman and Anglican (*Hodder & Stoughton*); Canon Page Roberts's sermons on **Our Prayer Book, Conformity, and Conscience** (*Smith, Elder*) from a Broad Church standpoint; the Rev. W. L. Paige Cox's **Some English Church Principles** (*Young & Sons*), including a criticism of the ritualistic position;

and Professor Hastie's (of Glasgow) *Theology as Science* (Macmillan).

Works dealing with textual criticism and religious archaeology are *The Logia of Jesus*, transcribed from a recently found papyrus, and deciphered by Grenfell and Hunt; a commentary on the "Logia," by Dr. Taylor, under the title of *Oxyrynchus Logia and the Apocryphal Gospels* (Clarendon Press); a collation and critical account of the *Codex Purpureus Petropolitanus* (Purple Codex at St. Petersburg), by H. S. Cronin, of Trinity Hall (Camb. Univ. Press); the Rev. W. H. Frere's Latin texts of *The Use of Sarum* (Camb. Univ. Press); Professor Bright's *Aspects of Primitive Church Life* (Longmans); the Rev. A. H. Hore's *Eighteen Centuries of the Orthodox Greek Church* (Parker); D. G. Hogarth's (Director of British School at Athens) *Sacred and Profane Authority and Archaeology* (Murray), dealing with Scripture history and early Christian antiquity, as well as the history of Egypt, Assyria, Greece, and Rome, with essay on "Hebrew Authority" by Canon Driver; Dr. Nicol's Croall Lecture for '98 on *Recent Archaeology and the Bible* (Blackwood); the Rev. C. J. Ball's *Light from the East* (Eyre & Spottiswoode), a collection of illustrations from monuments, inscriptions, etc.; W. H. St. John Hope's photographic reproductions of *English Altars* (Longmans); the *New Dictionary of the Bible* (T. & T. Clarke).

Among books dealing with missionary effort and religious biography are *History of the Church Missionary Society*, by Eugene Stock (*Church Missionary Society*); a sketch of the 200 years' work of the S.P.G., under the title of *The Spiritual Expansion of the Empire*; C. F. Harford-Battersby's *Pilkington of Uganda* (Horace Marshall); F. D. How's memoir of *Bishop John Selwyn* (Isbister); W. Fiddian Moulton's memoir of *William F. Moulton*, with a chapter on Biblical work and opinions by I. H. Moulton (Isbister); Monseigneur Bougaud's *History of St. Vincent de Paul* (Longmans).

Jewish history is represented in Professor Sayce's *Early Israel and Surrounding Nations* (Service & Paton); and in Canon Cheyne's lectures on *Jewish Religious Life After the Exile* (Putnam). The religion of ancient Egypt finds elucidation in E. A. Wallis Budge's *Facsimiles of Papyri*, with translations (*British Museum*); and in the account of the *Temple of Mut in Asher* (Murray), by the excavators, Margaret Benson and Janet Gourlay. Jeremiah Curtin has compiled *The Creation Myths of Primitive America* (Williams & Norgate). Professor Lewis Campbell has written a learned disquisition on *Religion in Greek Literature* (Longmans).

By way of transition from theology to philosophy may be mentioned the late Professor Wallace's *Lectures and Essays on Natural Theology and Ethics* (Clarendon Press), edited by the Master of Balliol; Professor James's lectures on *Human Immortality* (Constable); the translation of Nietzsche's *Genealogy of Morals* (Unwin); and the late R. H. Hutton's *Aspects of Religious and Scientific Thought* (Macmillan). In philosophy there are F. W. Bain's *Realisation of the Possible* (Parker), against Berkeley; A. W. Benn's *Philosophy of Greece* in relation to the character and history of the people (Grant Richards); Dr. Latta's translation of Leibnitz's *Monadology*, and other *Philosophical Writings* (Clarendon Press). In the psychological domain of philosophy are Professor Ladd's (American) *Outlines of Descriptive Psy-*

chology (Longmans); Dr. Schofield's treatise on *The Unconscious Mind* (Hodder & Stoughton); and a translation of Gustave Le Bon's *Psychology of Peoples* (Unwin).

Science.

Beginning with man and biology generally, may be mentioned Emeritus Professor A. H. Keane's *Man Past and Present* (Camb. Univ. Press); Professor Ratzel's *History of Mankind* (Macmillan), translated by A. J. Butler; Dr. Weir's *Dawn of Reason, or Mental Traits in Lower Animals* (Macmillan); the Duke of Argyll's *Organic Evolution Cross-Examined* (Murray); a work by three Belgian professors on *Evolution by Atrophy in Biology and Sociology* (Kegan Paul); Professor Haeckel's *Last Link* (Black), with appendices by Dr. Gadow; Arthur Willey's *Zoological Results*, based on material from New Britain, New Guinea, etc. (Camb. Univ. Press); Eadward Muybridge's photographs of *Animals in Motion* (Chapman & Hall); Dr. Bowdler Sharpe's *Sketch-Book of British Birds* (S. P. C. K.).

Of books of a more or less pathological character there are E. H. Hawkins' treatise on *The Bubonic Plague* (Allahabad); Dr. Forbes Winslow on *Mad Humanity* (Pearson); Dr. Eugene Talbot on the *Causes, Signs, and Results of Degeneracy* (W. Scott); J. F. Nisbet on the *Human Machine* (Grant Richards), a sequel to the author's "Insanity of Genius"; several volumes of the *System of Medicine*, edited by Prof. Clifford Allbutt (Macmillan); Dr. George Newman's treatise on *Bacteria, as Related to the Economy of Nature, to Industry, and to the Public Health* (Murray); Dr. David Walsh's second edition of his work on the *Röntgen Rays in Medical Work* (Baillière).

On botany and gardening a high place should be given to Sir John Lubbock's charming work *On Buds and Stipules* (Kegan Paul). Then comes Edward Step's *Romance of Wild Flowers* (Warne), an excellent companion to the scientific flora. In practical work there are Rider Haggard's *Farmer's Year* (Longmans); Dean Hole's volume of the "Haddon Hall Library," *Our Gardens* (Dent); Mrs. Earle's second volume, entitled *More Pot-Pourri from a Surrey Garden* (Smith, Elder); Gertrude Jekyll's *Wood and Garden* (Longmans).

In geography and geology should be mentioned the *International Geography*, edited by Dr. H. R. Mill (Newnes); I. C. Russell's *River Development* (Murray); Charles Lapworth's *Intermediate Text-Book of Geology* (Blackwood). In astronomy are Arthur Berry's *Short History of Astronomy* (Murray); Alfred Fison's *Recent Advances in Astronomy* (Blackie), in the "Victorian Era" series; E. Walter Maunder's *Indian Eclipse, '98* (Hazell, Watson, & Viney); and in general science W. J. C. Miller's *Essays and Nature Studies* (Stock). Late in November appeared Dr. Munro's *Prehistoric Scotland and its Place in European Civilisation* (Blackwood).

Liverpool, Bishop of. See under PEERAGE.
Livery Companies of London. See LONDON LIVERY COMPANIES.

Llandaff, Bishop of. See under PEERAGE.
Lloyd, Edward, the famous tenor vocalist, was b. in London 1845. When seven years old he entered Westminster Abbey choir. Afterwards he became solo tenor at the Chapel Royal, St. James's. He was engaged in '67 at

Novello's Concerts, and in '71 at the Gloucester Festival, where he attracted much attention by his singing in Bach's "Passion" Music. In '88 he went on a tour in America, taking part in the Cincinnati Festival, and in '90 and '92 he repeated his visit, being enthusiastically welcomed on each occasion.

Lloyd's. This world-famous institution takes its name and derives its origin from a coffee-house established in Tower Street by one Edward Lloyd about the end of the 17th century, and removed in 1692 to the corner of Lombard Street and Abchurch Lane. There were numerous rival houses in existence then, but Lloyd's was distinguished above all others, especially by his news of the movements of vessels received from various correspondents at home and abroad, in which may be found the germ of "Lloyd's List." In 1696 *Lloyd's News* was commenced and published three times a week. But after seventy-six numbers had appeared the proprietor was so foolish as to insert a paragraph about the proceedings in the House of Lords. For this he was summoned to the bar of the House, and then he stopped the print, substituting handwriting for printing, till 1721, when *Lloyd's List* appeared, and has continued even unto this day. Besides being a news centre Lloyd's began to be used as the centre of Marine insurance, and this business rapidly increased. In 1771 the brokers and underwriters frequenting the house, to the number of 79, resolved to find fresh and more commodious quarters, and in 1773, chiefly through the energy of a Mr. Angerstein, rooms were taken on the north-west side of the Royal Exchange, where ever since this great institution has been established. A subscription of £20 a year was required of members, and rules were laid down for the conduct of business. During the forty years of war, from 1775 to 1815, Lloyd's grew and flourished amazingly, and business flowed in from all over the world, the reorganisation of the whole institution, accomplished in 1811, adding to the general confidence in its security. In 1870 an **Act of Incorporation** was applied for, and obtained in '71, notwithstanding considerable opposition. The objects of the Institution were described as being (1) the carrying on of the business of marine insurance by members of the society, (2) the protection of the interests of members of the society in respect of shipping and cargoes and freight, and (3) the collection, publication, and diffusion of intelligence and information. To carry out the third object Lloyd's has a staff of about 1500 agents in all parts of the world constantly reporting to headquarters, where clerks are employed both day and night. Then a "**Captains' Register**" is kept, consisting of a biographical dictionary of all the certificated commanders of the British mercantile marine, about 24,000 in all. The record of losses is kept in the "**Loss Book**." Lloyd's is of course open only to members and subscribers. These may take their friends in and show them round, through the underwriting rooms, the reading room, the captains' room, used for luncheon purposes, and the committee room, full of relics. **Members of Lloyd's** may be either underwriting or non-underwriting members. There are also annual subscribers and associates. All members must be recommended by six members and then elected by ballot; subscribers and associates can recommend

gentlemen for election to their own grades. Underwriters are required to deposit with the committee at least £5000 (for which they receive interest), and to pay an entrance fee, and an annual subscription of £21. But those members elected prior to Dec. 31st, '92, only pay an annual subscription of £16 16s. Non-underwriting members are exempted from the deposit, but pay an entrance fee, and an annual subscription of £7 7s. Subscribers pay an annual subscription of £7 7s. and associates of £5 5s. "**Lloyd's Register of British and Foreign Shipping**" is published annually. See **MERCANTILE MARINE.**

Load Line Committee. For report see **SESSION, '99.**

LOCAL GOVERNMENT.

- I. ENGLAND AND WALES.
- II. SCOTLAND.
- III. IRELAND.

ENGLAND AND WALES.

It is only within a comparatively recent period that the system of Local Government administration in England has been completely established, and even now there is much that requires to be done to bring all the parts into harmony with one another.

The earliest institutions which exercised powers of local administration were the Municipal Boroughs created by charter from the Crown, some of which date back to the earliest Saxon times. Towards the close of last century a system was begun of creating Lighting, Paving and Improvement Commissioners for populous towns which had no municipal government; and in course of time it became necessary to deal with the many anomalies that had arisen—such, for example, as the fact that many of the largest towns in the kingdom were governed by Paving and Improvement Commissioners, whilst some places that had dwindled into mere villages possessed all the important functionaries, such as Mayor, Aldermen, Jurats, Reeves, and the like, which belonged to the municipal institutions of past centuries. These matters were all dealt with by the **Municipal Corporations Act, 1835**, which swept away a large number of the smaller corporations and created machinery by which every borough would be governed by a corporation consisting of a Mayor and Town Council, the latter being elected by the rated inhabitants on the burgess roll. The powers of these Corporations are derived from the Act of 1835 and from other statutes which were passed from time to time, and all of which were consolidated into the **Municipal Corporations Act, '82**. In addition to the general law, however, many local Acts have been passed by Parliament giving to various Corporations such special powers in excess of the general law as have been found to be necessary for particular towns, and in this way the foundations were laid for that development of the sanitary law which has been one of the great features of the progressive legislation during the past half-century. A commission was appointed by Sir Robert Peel to investigate the sanitary condition of the great towns of the country, and ultimately the **Public Health Act of '48** was passed. This was the first statute to set up Boards of Health; and the stimulus that was given to the movement for improving the

general sanitary condition of the country by the terrible havoc that had been made by the epidemics of cholera resulted in the expansion of the system by the **Local Government Act, '58**, under which extensive powers of local government were given to existing corporations and to every populous place in the land. Under these statutes Municipal Corporations became the Public Health authorities for their boroughs, and Improvement Commissioners and Local Boards of Health were empowered to act for the areas under their control. Thus sanitary authorities were set up in every populous urban district, but the rural parts of the country remained subject to no control whatever from a sanitary point of view. After another decade a Sanitary Commission was appointed to deal with this matter, and the **Public Health Act, '72**, was ultimately passed, by which the Guardians of every Poor Law Union were made the Rural Sanitary Authority for the whole Union other than such part as was comprised in an urban district already constituted. This Act and a large number of other sanitary Acts were repealed and consolidated by the **Public Health Act, '75**, which is now in force. The constitution of the local authorities created under the Acts above mentioned and their relations to other authorities have undergone considerable change since '75. Many administrative powers have in the past been exercised by Courts of Quarter Sessions in counties, and a growing feeling of dissatisfaction with that system of government culminated in various proposals from both sides of the House of Commons for County Boards of some sort or other. Ultimately the **Local Government Act, '88**, was passed, by which County Councils, to be elected by county electors, whose qualification was practically that of the borough burgess, were established. Under that Act what was termed administrative business was transferred from the Courts of Quarter Sessions to the County Councils, and the Justices were left in possession of all their judicial functions, but very few of their administrative duties remained to them—such, for instance, as the granting of licences for the sale of intoxicating liquors. The control of the police was taken from them and vested in a Joint Committee consisting of the whole of the County Justices and the County Council. The County Councils that were thus set up for counties have no jurisdiction in any borough which, prior to the passing of the Act, had a population of 50,000 or upwards, as these boroughs were formed into counties by themselves and all the powers of the County Council were given to the Corporations.

The scheme of Local Government reform begun with the Act of '88 was completed by the **Local Government Act, '94**, under which the constitution of local governing bodies under the Public Health Acts and under local acts was rendered uniform. These bodies became Urban or Rural District Councils. In rural districts Parish Councils were established in every parish with a population of three hundred, and in place of the old Vestry there was set up the Parish Meeting, which is an assembly of the parochial electors of the parish. Very few administrative functions have as yet been given to these bodies, as it was deemed undesirable at the outset of their career to burden them with many responsibilities. The great change that was effected by the Act of '94

was the abolition of all the old and complex systems of election and the assimilation of the system to that already in operation for County Councils and Municipal Corporations. The effect is that the local government franchise for all purposes is now practically the same, and consists of what is known as the Burgess qualification, which is based on occupation and residence, and differs from the Parliamentary franchise to the extent that for local government purposes ownership of property as such does not confer a right to vote; and women whether married or single are eligible as electors. See **LONDON LOCAL GOVERNMENT**, and for the '99 Act see **SESSION**, sect. 70.

Local Government Board.

This department was established by the Local Government Board Act, '71, and superseded the Poor Law Board. It became the central department for Poor Law, Public Health, and other Local Government matters, and many duties were transferred to it that had previously been carried out by departments of the Home Office and the Privy Council. The year after the Board was established considerable changes were made by the Public Health Act, '72, and new duties of a very extensive character were imposed on the department. From that date to the present no session has passed without further additions being made to its work, so that there is not a local authority of any kind whatever that is not now to some extent subject to its control. Poor Law Guardians now stand in the same relation to it as their predecessors did to the Poor Law Board and Poor Law Commissioners under the Poor Law Act of '34. County Councils, Town Councils, Urban and Rural District Councils, as well as Parish Councils, all have to obtain the Board's sanction to their proposals to borrow money, to make bye-laws, and to do many other things; and Municipal Corporations, in common with Urban District Councils, have to subject their proposals for private Bills in Parliament to the criticism and opposition of the Board in the House of Commons committees; so that exceptional legislation, however good or useful its aim may be, is now rarely effected if the report of the Board to the House is opposed to it. The Board is represented throughout the country by a large staff of resident **General Inspectors**, who attend meetings of Boards of Guardians and inspect all Poor Law institutions; by travelling **Engineering Inspectors**, who inquire into all proposals for sewage disposal works, water supply schemes, street improvements, and other undertakings that involve the raising of loans; by **Medical Inspectors**, who visit districts in which any epidemic disease breaks out, and report upon it and advise as to the steps needed to prevent its recurrence; by **Poor Law Medical and Vaccination Inspectors**, whose duties extend to the medical supervision of workhouses, infirmaries and Poor Law schools, and of all public vaccinators; and by **County and District Auditors**, who audit the accounts of all local authorities other than Municipal Corporations and Burial Boards, and have power to disallow and surcharge against individual members all items of expenditure which in their opinion are illegal. The Board is not, as might be supposed from its name, a body consisting of so many members, who act collectively at periodical meetings similarly to popularly elected Councils; but

the whole of the functions of the Board are vested in the President, who is generally a member of the House of Commons. Everything that the Board does is done in his name, though only in a very few instances with his actual authority, as under an order of the Board issued in '77 the President delegates his powers to the **Permanent Secretary** (Mr. S. B. Provis, C.B.) and Assistant Secretaries; and thus, though democratic in name, "the Board" is in reality a bureaucracy. To this cause may be attributed the loss of prestige which this department has been gradually undergoing in the mind of the public during recent years, owing to its failure to keep in touch with progressive movements. This fact has been brought out very strikingly in connection with the attitude which the Board has taken up on such questions as the bringing up of pauper children, the administration of relief, and compulsory vaccination, on all of which questions the Department has had to give way to opposition arrayed against it in Parliament and elsewhere.

Local Administrative Bodies and their Powers.

The various local administrative bodies that now exist in England are as follows:—County Councils for administrative counties, Municipal Corporations for county boroughs and non-county boroughs, Urban District Councils for urban districts other than boroughs, Rural District Councils for rural districts, Parish Councils for parishes having a population of 300, or if with a less population by special grant from the County Council, and Parish Meetings for every rural parish—that is, for every parish not comprised in an urban district or borough. These bodies are intimately related to one another, and are practically all concerned in what may be described as the general good government of the country from the points of view of highways, sanitary, and general health conditions. Besides these there are Boards of Guardians which administer the Poor Laws, School Boards to administer the Education Acts, and Burial Boards to administer the Burial Acts, all of which have the power of raising moneys to meet their requirements from the rates.

County Councils.—By the Local Government Act '88 the administrative powers which were transferred from the Quarter Sessions to County Councils relate to the basis or standard for raising the county rate, raising the police rate, borrowing money for county purposes, the erection and maintenance of county buildings, the provision of asylums for county lunatics and the maintenance of reformatory and industrial schools, erection and maintenance of bridges, regulation of locomotives, the division of the county into polling districts for election purposes, the execution of the Acts relating to the contagious diseases of animals, destructive insects, fish conservancy, weights and measures, wild birds, and other minor matters. Powers were also transferred from the Local Government Board as to the issue of provisional orders for various local matters, such as the purchase of land for allotments and the creation of new urban districts. From urban authorities and other highway authorities there was transferred the control of the whole of the main roads in the county, and the burden of their maintenance was made a county charge. Under the

Local Government Act, '94, other powers were conferred upon the County Council in reference to the establishment, dissolution, and control of Parish Councils, the regulation of local government election expenses, fixing or altering the number of members of Boards of Guardians and Rural and Urban District Councils, allotments, the dealing with complaints as to the default of District Councils in respect to their obligations under the Public Health Acts and other matters. County Councils may also make byelaws for the good government of the county, and under these powers many useful enactments which the general law does not provide for have been brought into operation. The most important exercise of these powers has been the requirement that all vehicles shall carry lights at night-time. This regulation has now been adopted over about a half of the entire area of the country.

Borough Councils.—Every Municipal Borough is invested with the powers conferred by the Municipal Corporations Acts, which are the most extensive powers of local government possessed by any local authority; and in many respects—such, for instance, as the power to promote Bills in Parliament—a Municipal Corporation has greater power than a County Council. In addition, every Municipal Corporation is the urban sanitary authority for the borough, and exercises all the powers of the Public Health Acts and of all the many statutes incorporated therewith. Indeed, the only important matters that do not come under their control are the administration of the Poor Laws and the Education Acts. In county boroughs, of course, the whole of the powers of the County Council, so far as they are applicable to a borough, are vested in the Corporation; but non-county boroughs are, for general county purposes—such, for example, as police, lunatic asylums, and main roads—deemed to be merged in the county, and have to pay their contribution towards the county rates.

Urban District Councils.—These may be said to be the public health and highway authorities in urban districts, and their powers are wholly derived from the Public Health Acts, supplemented by minor statutes, by certain provisions of the Local Government Act of '94, under which some few powers were transferred to them, and in some districts by local Acts specially obtained from Parliament for each particular district. These Councils have power to maintain, widen and improve streets, to suppress nuisances, to promote works of sewage disposal and for the supply of water, gas, and electricity to the town. They may establish baths and wash-houses, hospitals, markets, pleasure grounds, and public abattoirs. Their powers of regulation extend to the licensing of common-lodging-houses, slaughter-houses, of hackney carriages, of dealers in game, explosives, petroleum, and of persons carrying on offensive trades. They make byelaws regulating the construction of new streets and buildings, the management of common and other lodging-houses, of slaughter-houses, of hackney carriages, of bathing, as to nuisances, and many other matters, all of which are directed towards the improvement of the sanitary condition of the district.

Rural District Councils.—Prior to the Local Government Act, '94, the Guardians of the Poor of every Union were the rural sanitary authority for the whole of the area comprised

in the Union, except any parts which were boroughs or urban districts; and as Poor Law Unions were formed for the convenience of administration from a Poor Law point of view, they overlap county boundaries to a very great extent, and the rural sanitary districts were consequently not limited to one county. The Local Government Act altered this, and directed that rural districts should henceforth be divisions of counties and should not extend into more than one county, so that such a district may now be defined as a group of rural parishes, all of which belong to the same county. Each of these districts is governed by a Rural District Council, whose members are elected for a term of three years, and whose general powers are similar to those of an Urban District Council except that they are not so extensive. The Council is the sanitary authority under the Public Health Acts, and the highway authority under the Highway Acts, but its powers of dealing with nuisances and similar matters are very limited, and before it can exercise such powers as are required for any populous parts of its district an order of the Local Government Board has to be obtained conferring upon it in respect of those places the powers of an urban authority. In this way a Rural District Council can acquire the power of making byelaws as to new streets and buildings and many other important matters, such as the right to take over private streets, the power to light and water streets, and to regulate slaughter-houses: but only such limited powers are conferred in this way as are deemed suitable—as, if all the powers of an urban authority are desired for any parish these can be obtained by constituting the place an urban district and giving it a separate council. This is done by means of an order of the County Council. As regards highways the Rural District Council has all the powers of the surveyor of highways under the Highway Acts, and is the highway authority for its district as regards every carriage-road, bridleway and footway which is a highway other than any main road under the control of the County Council. Under the Act of '94 it was made the duty of the Rural District Council to protect all public rights of way and to prevent the obstruction or stopping up of any highway and the encroachment on the roadside waste.

Parish Councils.—These bodies are elected for all parishes which had, according to the census of '91, a population of 300. If a parish has less population than that it can obtain a Parish Council by petitioning the County Council to issue an order directing one to be elected. At present the general powers of a Parish Council are limited to a few matters, such as the appointment of overseers of the poor, the repair of footpaths, the purchase of fire engines, the management of recreation grounds and allotments, and the control of parochial charities. But where what are termed the "Adoptive Acts" are in force the Council has power to establish a burial ground, to light the streets of the parish, to set up a free public library and public baths and wash-houses. The moneys required by a Parish Council are obtained by means of precepts served on the overseers, whose duty it is to raise the money either out of the poor rate or by means of a special rate, according to the purpose for which it is required.

Parish Meetings.—In every rural parish—that

is, in every parish which is not in a municipal borough or in any other urban district—there must be a parish meeting at least once a year during the month of March, at which those persons who are registered as parochial electors of the parish and no others may attend. If the parish is entitled to have a Parish Council the Parish Meeting is required to elect it in accordance with the rules comprised in the Parish Councillors Election Order, '98, issued by the Local Government Board. If the parish is not entitled to have a Parish Council then the Parish Meeting must appoint overseers of the poor, trustees of charities, and otherwise exercise all the powers of the old vestry which it supersedes and those new powers which are conferred upon it by the Local Government Act, '94. In every parish, however, whether there is a Parish Council or not, the power of adopting the "Adoptive Acts"—namely, the Lighting and Watching Act, the Baths and Wash-houses Acts, the Burial Acts, the Public Improvement Acts, and the Public Libraries Acts—vests exclusively in the Parish Meeting.

Rating Powers.

The most generally levied rate is the Poor Rate, for raising which Overseers of the Poor are annually appointed in every parish under a statute passed in Elizabeth's reign. County Councils raise their funds by levying the county rate upon Boards of Guardians of the various Unions in the county. These Boards in their turn raise the money which they require for Poor Law purposes, and for the purpose of meeting the county-rate precepts, by issuing contribution orders on the Overseers for the sums to be raised by means of the Poor Rate. This rate was originally raised as a voluntary contribution from well-to-do persons by the clergy and churchwardens in order to provide means of relief for "the impotent, feeble, and lame, which are the poor in very deed"; but by the statute of 5 Elizabeth the voluntary aspect of this levy was put an end to, for it is enacted that after due exhortation and persuasion, first by the parson and churchwardens of the parish and next by the bishop, "if any person of his froward or wilful mind shall obstinately refuse to give weekly to the relief of the poor according to his ability, the bishop shall have authority to bind him under a penalty of ten pounds to appear at the next sessions, when the justices are again to charitably and gently persuade and move the said obstinate person to extend his charge towards the relief of the poor." And if he will not be persuaded therein by the said justices, "they may sesse, tax, and limit upon every such obstinate person so refusing, according to their discretion, what sum the said obstinate person shall pay, and commit him to prison until he pay the sum, together with the arrearages thereof, if any such shall fortune to be." It was not until the statute of 43 Elizabeth that Overseers of the Poor with clearly defined duties were directed to be appointed regularly from year to year for the purpose of raising the Poor Rate. For over two centuries that rate was practically raised for and limited to the maintenance of poor persons unable through sickness or otherwise to maintain themselves or their families; but by degrees it became convenient to graft upon

it other charges; and now County Councils, Boards of Guardians, Burial Boards, Municipal Corporations as regards their expenditure under the Municipal Corporations Act only, School Boards, Rural District Councils, Parish Councils and Parish Meetings raise their funds for their various purposes out of this rate, either indirectly or by precept addressed to the Overseers. A different mode of raising money is, however, prescribed in respect of moneys required by Municipal Corporations when acting as sanitary authorities under the Public Health Act and by Urban District Councils. In both these cases a special rate called the General District Rate is levied, and this is assessed at a lower rate upon land than that which is charged on buildings and other properties. Rural District Councils have power to raise moneys for expenses chargeable to any particular parish by requiring the Overseers to levy a special sanitary rate, and Parish Councils have power by means of precepts upon the Overseers to require special rates to be raised for lighting and for public libraries.

By the Local Government Act, '88, there was established for England and Wales at the Bank of England a **Local Taxation Account**, to which were to be paid by the Commissioners of Inland Revenue the proceeds of the duties on certain specified licences (beer, spirits, game, tobacco, etc.), henceforth described as local taxation licences; and the amount of these licences ascertained to have been collected in each county is paid out of the Local Taxation Account to the council of such county. There was also to be paid by the Commissioners of Inland Revenue to the same account such sum as might be ascertained to be four-fifths of half of the proceeds of the probate duty; and this grant was to be distributed among the counties in proportion to the share which the Local Government Board certified to have been received by each county during the financial year '87-8 out of the grants previously made in aid of local rates, which would cease to be granted after the passing of the Act; such probate duty grant to be used in relief of local taxation. And by other statutes there were assigned to Scotland and Ireland their respective shares of the remaining fifth of the probate duty grant. The shares so paid to the several Local Taxation Accounts of the three countries are accordingly—England and Wales 80 per cent., Scotland 11 per cent., and Ireland 9 per cent. of one-half of the proceeds of the probate duty; and these proportions have been observed in the case of other grants made under subsequent statutes to the three countries. Particulars regarding the taxation transferred to the local authorities or charged upon imperial funds will be found under **FINANCE, NATIONAL**.

Local Taxation Returns.

In the 28th annual report of the Local Government Board, '98-9, the following particulars were given as to the local taxation returns for the financial year '96-7, the latest that are available in this analytic form. The returns include summaries of the accounts of no less than 30,482 Local Authorities, including 63 County Councils, 306 Municipal Boroughs, acting as Corporations and as Urban Sanitary Authorities or Urban District Councils, 778 Urban Sanitary Authorities or Urban District

Councils, 688 Rural District Councils, 7064 Parish Councils, 615 Parish Meetings, 746 Burial Boards and other authorities (except Parish Councils) acting under the Burial Acts, 650 Boards of Guardians, and 2474 School Boards, besides a host of minor miscellaneous Authorities.

RECEIPTS (EXCLUDING LOANS). £

Public Rates	37,542,016
From the Local Taxation Account—	
In respect of Local Taxation Licences, Estate Duty, and Customs and Excise Duties	6,218,516
Grants under the Agricultural Rates Act, '96 (a portion of the first instalment paid to certain Boards of Guardians at the end of the year '96-7 in respect of the half-year ended Michaelmas '97)	25,916
Treasury Subventions and Payments not included in above amounts	3,390,501
Tolls, Dues, and Duties	3,695,712
Revenue from Real and Funded Property	1,708,148
Sales of Property	650,330

SCOTLAND.

Local Government Board.

The Board consists of the following **ex-officio Members**: Lord Balfour of Burleigh, Secretary for Scotland, **President**; Mr. C. Scott Dickson, Q.C., Solicitor-General for Scotland; and Colonel Sir Colin C. Scott-Moncrieff, K.C.M.G., C.S.I., Under-Secretary for Scotland; the following **Appointed Members**: Mr. Malcolm McNeill, **Vice-President**; Mr. James Patten-MacDougall, M.A., Legal Member of Board; Mr. James Burn Russell, M.D., LL.D., Medical Member of Board. The **Secretary** is Mr. G. Falconar-Stewart; the Medical Officer under Public Health Act is Professor Sir Henry Littlejohn, M.D., LL.D.; the Superintendent of the Vaccine Institution is Mr. W. Husband, M.D., F.R.C.S.E.; the General Superintendents of the Poor and Inspecting Officers under Public Health Act are Messrs. R. B. Barclay, Kenneth Mackenzie, W. Penney, and A. Stuart, jun. The Chief Clerk is Mr. A. Murray. **Offices**, 125, George Street, Edinburgh. The fourth annual report, for the year '97-8, showed that there were 481 parishes, with a population of 3,240,754, which either singly or in combination had poorhouses. The number of poor of all classes, including dependants, in receipt of relief on May 15th, '98, was 99,578, of whom 12,637 were lunatics. Of the 86,941 ordinary

poor, 76,782 were receiving outdoor and 10,032 indoor relief, while 127 were vagrants. Of the total of 99,578 relieved, 65,000 were paupers and 34,578 were their dependants. Of the sane poor relieved no less than 22,242, or 42·48 per cent., were 65 years of age or upwards. The revenue of the parish councils for the year ending May 15th, '98, amounted to £1,085,838, made up as follows:—rates, £785,136; local taxation contributions, and Treasury grants in lieu of rates, £238,382; voluntary contributions, church collections, etc., £62,320. In addition to this £16,872 was borrowed on the security of the rates and property of the parish councils. The expenditure of the parish councils for the year amounted to £1,086,916, made up as follows:—

	Per cent
Relief and maintenance of the poor	£792,934 = 72·95
Medical relief	52,631 = 4·84
Management	152,123 = 14·00
Law expenses	5,203 = 0·48
Repayment of debt	26,472 = 2·44
Interest on debt	10,103 = 0·93
Buildings	34,787 = 3·20
Election expenses	222 = 0·02
All other expenditure	12,441 = 1·14
	£1,086,916 = 100·0

The gross rental of the parishes in '98 was £26,513,458; the net assessable rental in assessed parishes was, Owners £21,845,062, Occupiers £18,994,327; and the total indebtedness of the parishes was £300,938.

County Councils and District Committees.—After the reform of the local government system of England, it was inevitable that the rest of the United Kingdom would sooner or later have to be similarly dealt with. A smaller and more scattered population in Scotland had less urgent need for the alteration of its institutions than that of England, owing to the fact that a parochial system of managing local affairs had been in operation for the past two centuries which was in great contrast with that in the sister kingdom. But, notwithstanding this, the year after the passing of the Act establishing County Councils in England, the **Local Government (Scotland) Act, '89**, was passed, under which County Councils were set up for all the counties of Scotland on lines practically the same as the English precedent, though with some important variations, such, for instance, as the County Council being wholly elective and having no aldermen. The number of councillors to constitute the County Council was fixed by the Secretary for Scotland, "having regard to the population, distribution and pursuits of the population, area, annual value, and other circumstances." Burghs having less than 7000 population are merged in the county for representation, and their County Councillors are elected by the Town Councils of such Burghs from among their own number. The chairman of each County Council is called the "Convener of the County," and must be a councillor. The County Council superseded, as regards its County, certain existing local bodies, such as road trustees and parish local authorities under the Public Health Acts, and it was invested with many of the powers of other bodies, such as Commissioners of Supply and Justices of the Peace in General

Quarter Sessions. In Burghs under 7000 population the Police Administration is merged in the County, and the County Police force is controlled by a Standing Joint Committee of the County Council and the Commissioners of Supply. For public health and highway purposes each county is divided into districts, and each district has its committee, consisting of the elected representatives of the area on the County Council, and representatives from the Councils of each of the parishes in the district. County Councils are elected by the county electors, whose qualifications consist of occupation and payment of rates. Financial relations are established between the County Council and subordinate authorities for the purpose of raising funds, and duties of local taxation, licences, and probate duty grant are set aside from Imperial funds for administration by County Councils. The "County Fund" is constituted out of moneys raised by rating and the Imperial grant, and the County Council are required "to keep such accounts of the County Fund and of the sums raised by rates as will prevent a rate being applied to any purpose to which it is not properly applicable." The County Council is required to fix the rate in the pound of the rateable property which will be necessary to meet its requirements, and such rate is levied as a consolidated rate on all lands and heritages within the County; but rates for the maintenance of highways and the administration of the laws relating to public health are imposed on all lands and heritages in each division, district, or parish.

Burgh Corporations.—In every one of the larger towns there is a Municipal Corporation, and these bodies have complete control of local affairs, and are elected by the municipal electors on the register. These Burghs are divided into Royal or Parliamentary Burghs and Police Burghs. The former exist by virtue of ancient charters in most cases, and the latter have been formed under the General Police Act, 1862, and under local Acts. All Burghs have control of their own general government and sanitation; but in the smaller ones the control of the police has been taken away, and it is only those with a population exceeding 7000 that now possess such control.

Parish Councils.—The Local Government (Scotland) Act, '94, effected a greater change than its predecessor. By it the constitution of the smaller local bodies was entirely reformed, and in place of the Parochial Boards Parish Councils were established, to be elected triennially, with not less than 5 nor more than 31 members, regard being had to the population and special wants and circumstances of the Council. Of the total number of parishes in Scotland, 9 are wholly burghal (*i.e.* within some burgh), 650 are wholly landward (*i.e.* rural), and 226 are partly landward and partly burghal. The roll of electors is the Parish Council Register, and the elections are required to be held under the Ballot Act. Candidates are disqualified if they hold certain local offices, or are concerned in any contract. Parish Councils took the place of the Parochial Boards, and acquired all their powers and duties, which are equivalent to those of Guardians of the Poor in England, and, in the case of landward Parish Councils, additional powers were conferred, relating, amongst other things, to such matters as the provision of public offices, the

acquisition of grounds for public recreation, and of rights of way for the benefit of the inhabitants, the acceptance and holding of gifts of property, as well as powers of spending or contributing money on, or towards the furtherance of, any object as to which the Council has power. Further powers are given as to the protection of rights of way, lighting streets, scavenging, public baths, the establishment of allotments, and the control of charities other than those which exist for purposes ecclesiastical, or which relate to an educational endowment, or have been left for the benefit of the poor of the parish. There is a very important provision in force in Scotland which has no counterpart in the English system, so far as Parish Councils are concerned, which is to the effect that once in each year the Parish Council shall cause to be submitted to them estimates of their receipts and expenditure for the year, whether on account of property, contributions, rates, loans, or otherwise, and shall make provision for meeting the same. The Council are required to divide their administration into "General Parish Funds" and "Special Parish Funds," and to keep such accounts of these funds, "and of the sums raised by rates, as will prevent a rate from being applied to any purpose to which it is not applicable." The accounts are subject to audit; and though the people across the Tweed are generally reputed to be careful in small matters, they appear to have their failings, like some of the folk down south, for the Local Government Board for Scotland reported that amongst many illegal items that were dealt with were such things as "Charges for entertainments and trips for the sane poor," "Cost of refreshments of Parish Councillors and officials at meetings of the Parish Council," "Donations to soup-kitchens," "Gratuities to letter-carriers," and "Allowance to members of a committee for preparing inventory of poorhouse stock."

IRELAND.

See separate article on IRELAND for an account of the central administration.

The greatest problem of all in the reform of local institutions was that presented by Ireland, and several years elapsed ere the reform, begun in England, was extended to the sister isle. The chief difficulty in the way was the great number of conflicting jurisdictions that had to be dealt with, for local administrative and rating authorities comprised the Grand Jury, Presentment Sessions, Municipal Corporations, Boards of Guardians, Town Commissioners, and Asylum and Infirmary Boards. These different bodies were often in conflict owing to the fact that none had uncontrolled jurisdiction over any particular area. The Grand Jury was the County Authority, and consisted of the magistracy. It had in days gone by absolute control over the roads and certain County affairs, and the ratepayers were entirely unrepresented till a comparatively recent date, when provision was made for joining with the Grand Jury a small number of cesspayers in each Barony or County division. No reform of the system of local government was possible till this state of things had been improved. In the case of the towns a very curious state of things had grown up. Instead of having a system on the lines of that in England, under which large towns desiring

to have municipal administration obtained charters and smaller towns established local Boards of Health, the Irish people had a Municipal Corporations Act under which charters could be obtained by any towns exceeding 3000 population; and these, as well as the smaller towns, were left to avail themselves of various adoptive Acts, under which Town Commissioners with functions which varied according to the Act under which they were constituted could be established. The powers to obtain charters were consequently not acted on, and for over fifty years not more than one charter was granted. The Town Commissioners under one or other of the general Acts were the local authorities in most places, but whilst some had control of the roads others had not, and some possessed powers of sanitary administration, which in other cases were exercised by the Guardians of the Poor, whose jurisdiction was equivalent to English Rural District Councils.

County Councils.—The first step in the direction of improved institutions was made by establishing a uniform county franchise for all local government matters on the basis of the Parliamentary franchise. By the Local Government (Ireland) Act, '98, County Councils were established for every administrative county, its members being elected by the votes of the electors under the Ballot Act. The counties are divided into electoral areas, each of which returns its representative to the Council; and in addition to these members the County Council comprises the chairmen of Rural District Councils, and certain additional members chosen by the Council from outside. These Councils are elected triennially. They are the rating authority for the county except in urban districts. Their powers are limited to what may be called strictly county matters, and include all the powers transferred to them from the Grand Jury (whom they supersede so far as all administrative work is concerned); from the Presentment Sessions; from Boards of Guardians as to the making of poor rates in all places other than those that are urban; and from various authorities as to such matters as coroners, lunatic asylums, contagious diseases of animals, technical instruction, the encouragement of agriculture, fisheries, ancient monuments, marine harbours and coast protection works, and other matters. The County Councils also have conferred on them some new powers as to the acquisition and holding of land, as to exceptional distress, hospitals, and the making of byelaws for the government of the county.

Municipal Corporations.—These Corporations exist in a limited number of the larger towns and cities, and are administered under the Municipal Corporations (Ireland) Act, '40, the municipality being the only authority for local government purposes. It is a somewhat remarkable feature of the past history of Ireland that, owing to the restricted class in whom rested the power of petitioning for a charter, only one town has, since the passing of the Act of '40, obtained municipal powers. Now that these restrictions are practically removed, it is to be anticipated that more towns will obtain charters of incorporation in view of the growing needs of many of them.

Urban District Councils.—These Councils supersede the Town Commissioners and other bodies previously existing in towns, and they become the sole rating authority in the area over which they have jurisdiction. The Local

Government Act, '98, transferred to them all the powers of the Presentment Sessions, and provided for their election by the Local Government electors. They are the highway and public health and burial authority for the district, subject to control as regards highways of the County Council. If any town has a population exceeding 1500, it may petition the Local Government Board for Ireland for an Order forming it into an urban district, and such Order, if issued, will have effect without confirmation by Parliament.

Rural District Councils.—These Councils are elected by the Local Government electors for those parts of the county division or rural district which are outside urban districts, and two councillors, instead of one as is the case in England, are returned for each electoral division. The number of members of these Councils in Ireland is therefore relatively larger than for a similar district in England. They supersede the rural sanitary authorities, and are the sanitary, but not the highway, authority for their district. They have transferred to them the powers of the Baronial Presentment Sessions, and all public health powers as well, and they can exercise under the Local Government Act, '98, additional powers as to boats plying for hire, recreation grounds, labourers' dwellings, epidemic diseases, and other matters. They may obtain by an Order of the Local Government Board any of the powers of an Urban District Council. In regard to highway expenditure the Council has to submit proposals to the County Council, and it is not in their power to do more. The County Council will decide what is to be done, and carry it out. The funds of District Councils are obtained by precepts issued to the County Council, by whom the sum required is levied. There are no Parish Councils in Ireland.

Finance.—The areas of local rating are the Rural and Urban Districts, and the Barony in which the county cess was in the past raised is now merged in the larger area of the county. For rating purposes the County Council is the sole authority in the county, exclusive of urban districts, and the Urban Council is the authority in its own district. Expenses for public health purposes are raised by a general rate for what are termed "district charges," and special rates are levied for works of water supply and sewerage, to which the areas that benefit are alone called upon to contribute. For poor law purposes the Guardians of each Union obtain funds by precepts on the County Council. General County purposes, such as the maintenance of highways, lunatic asylums, etc., are defrayed out of the rate levied by the County Council, and called the "poor rate." One-half the amount of all rates levied on agricultural land is remitted as against the ratepayer, and the deficiency is made good out of a grant from the Imperial Exchequer. The amount of this grant is nearly three-quarters of a million sterling annually. Further special grants of the proceeds of local taxation licences, as they are termed, amounting roughly to about a quarter of a million sterling, are made annually to the County Councils. Apart from the general expenses for which rates are levied uniformly on the rating areas, a system has been created of "excluded charges" which are levied on particular districts for special purposes, such as the cost of extra constabulary (this force not being under the control of the

local authorities at all), the cost of harbour, tramway, and light railway works, compensation for injuries caused by crime, and expenses for local works of public sanitation.

Local Option. See previous eds. and LICENSING LAWS COMMISSION.

Local Parliaments, The National Association of, has its offices at 298, Regent Street, W. The Hon. Secretary is Mr. F. Bindon.

LOCAL TAXATION COMMISSION, '99.

A Royal Commission was appointed August 15th, '96, "to inquire into the present system under which taxation is raised for local purposes, and report whether all kinds of real and personal property contribute equitably to such taxation, and if not, what alterations in the law are desirable in order to secure that result." The commissioners are: Lord Balfour of Burleigh, chairman; the Earl of Cawdor; Rt. Hon. J. B. Balfour, M.P.; Rt. Hon. Sir John Tomlinson Hibbert; Rt. Hon. Charles B. Stuart-Wortley, M.P.; Sir Edward W. Hamilton, K.C.B.; Cornelius N. Dalton, Esq., C.B.; Charles A. Cripps, Esq., Q.C., M.P.; Harcourt E. Clare, Esq. (town clerk of Liverpool); Thomas H. Elliott, Esq., C.B.; Arthur O'Connor, Esq., Q.C., M.P.; Edward O. Smith, Esq. (town clerk of Birmingham); James Stuart, Esq., M.P.; Rt. Hon. James Lloyd Wharton, M.P.; Sir Geo. H. Murray, K.C.B.; Arthur Wilson Fox, Esq. (Secretary).

The first report issued by the Commissioners, Dec. 16th, '98, is a most valuable document [C. 9141—price 6d.]. The Commissioners declared that they had arrived at the conclusion that an alteration in the law for the purpose of obtaining a uniform basis of valuation in England and Wales was a necessary preliminary to any revision of the existing system of Local Taxation. In a careful and historical survey of the law affecting taxation they pointed out that though the larger portion of local rates is raised by the Poor Rate, yet there can be in all five independent valuations of the same property in the same area, outside the Metropolis—viz., one for the Income Tax, one for the Land Tax, one for the Poor Rate, one for the County Rate, and one for the Borough Rate. The systems of valuation and collection for the purposes of the Poor Rate, the County Rate, the Borough Rate, and rates in the County of London, and also the system of valuation for the purposes of the Income Tax and Land Tax, were then minutely described in detail, objections to them discussed, attempts at improvement related, and finally the following important recommendations were made:—The following scheme for securing greater uniformity in valuation throughout England and Wales outside the Metropolis should be adopted, and the same principles should be applied within the Metropolis with the necessary modifications:—"That there should be only one Valuation Authority in each County, and the Valuation List of that authority should be the basis on which rates and taxes for all purposes should be raised; that, except in the County of Lancaster, a Valuation Authority should be created in each Administrative County, and in each County Borough, but that power should be given to any County Council and the councils of the County Boroughs in any county to adopt the area of the Geographical County; that in Lancashire

the Geographical County should be taken as the valuation area; that the Valuation Authority should consist:—(1) In a Geographical County, of members appointed by the County Council and by the Councils of County Boroughs; (2) in an Administrative County, of members appointed by the County Council; (3) in a County Borough, of members appointed by the County Borough Council; that the Valuation Authority should have power to divide the area within its jurisdiction into convenient districts which might or might not conform to union areas; in each district a committee should be constituted composed of members of the Valuation Authority and of representatives of Boards of Guardians, Borough Councils, and Urban District Councils within the district; that the Valuation Authority should issue instructions to the District Committees for their guidance in preparing the Valuation List; that the Valuation List should be prepared, whenever practicable, by Professional Surveyors; that every property should be valued once during a period not exceeding five years, and that provision should be made for the making of Provisional and Supplemental Lists; that a representative of the Board of Inland Revenue should have the right to attend meetings of the Valuation Authority and of the District Committees, and also have the same powers as they now have in the Metropolis; that legislation should provide for the establishment of a maximum scale of deductions; that legislation should provide for compulsory returns from owners and occupiers of rent paid and other particulars; that the Valuation List so prepared, as hereinbefore suggested, should be submitted to the District Committee, notice being given to any ratepayer the valuation of whose property it is proposed to increase, or to include for the first time in the List; that the District Committee should consider the lists and revise them if thought necessary, and, after hearing any objections made against them, should then submit them to the Valuation Authority; that the Valuation Authority should take such steps as they might think necessary to ascertain if their instructions had been carried out, and, subject to any alterations they might think fit to make, should finally approve of the lists and cause them to be printed and published, such lists, subject to appeals, to be the accepted valuation for all purposes, whether local or imperial; that notice should be given to any ratepayer the valuation of whose property the Valuation Authority proposed to increase, or to include for the first time in the List, and any such ratepayer should have the right to give a notice of objection, and the Valuation Authority should hear such objection; that appeals from the lists as finally approved by the Valuation Authority should be to Quarter Sessions, and that the jurisdiction of Special Sessions should be abolished; that special properties such as railways, canals, mines, tramways, docks, telephones, and gas, water, and electric light works should be valued in the first instance by a valuer appointed by the Valuation Authority, objections being heard by that Authority, and appeals lying to the Railway Commission, or a Special Tribunal created for that purpose."

As regards the collection of rates the Commissioners recommended:—"That the collection of all rates in Boroughs should be made by the Borough Councils, and in Urban Districts by the Guardians; that all rates

should, as far as practicable, be levied on one Demand Note, specifying the rateable value of the premises, the rate in the pound, and the amount of rates payable for each purpose, and the period for which the rate is made; that the powers of the Overseers and Vestry under the Poor Rate Assessment and Collection Act, '69, and the powers of Urban Authorities under the Public Health Act, '75, with regard to Compounding, should in all cases be vested in the Rate Collecting Authority."

A second report of the Commissioners made in Jan. '99 on Valuation and Rating in respect of Tithe Rent-Charge led to the introduction and passage of the much-debated **Tithe Rent-Charge (Rates) Act, '99**, the provisions of which are given in **SESSION**, sect. 111.

London Chamber of Arbitration. The City Corporation and the London Chamber of Commerce, acting in concert, decided in '92 to establish a body to be called the Tribunal of Commerce or the London Chamber of Arbitration, for the settlement of trade and commercial difficulties. The Chamber was inaugurated by a luncheon at the Mercers' Hall (Nov. 23rd, '92), with the President of the Board of Trade as the chief speaker. The Chamber of Commerce and the Corporation nominate each year a number of experts, amounting in all to about 1400, who amply represent the various trades likely to avail themselves of the Chamber's intervention. The procedure is as follows:—An agreement of reference is signed, on payment of a fee of one guinea at the Guildhall, by those wishing to settle any commercial dispute. Option is then given to the parties to refer the case to a single arbitrator, to three arbitrators with a majority vote, or to two arbitrators and an umpire. The arbitrator, or arbitrators, or umpire, has power to examine witnesses on oath, and to call for any documents necessary. Any party to an arbitration who so desires may be represented by a barrister or solicitor. The Chamber has prepared a model clause for insertion in trade contracts providing for the submission of disputes arising in connection with such contracts to the Chamber. A moderate scale of fees to be charged for arbitrators and umpires is arranged, yet high enough to secure the services of the best experts in the City. In ordinary cases the minimum is put at £2 2s. for the first hour and £1 1s. per hour subsequently. In complicated cases two legal officers, appointed by the Corporation, are open to consultation. These are the legal assessor—a prominent Q.C. specially retained for the purpose—and the registrar. The scale of fees for consulting the legal assessor is £5 5s. for three hours, or £10 10s. per day of more than three hours. The Registrar's Office, where all information and forms can be obtained, is at No. 5, Church Passage, Guildhall Yard, E.C.

London Chamber of Commerce, The. Incorporated under the Limited Liability Act. Oct. '81. First President, Mr. Chas. Magniac (then M.P.); Second President, Mr. J. Herbert Tritton; Third President, Rt. Hon. Sir John Lubbock, Bart., P.C., M.P.; Fourth President,

Sir Albert K. Rollit, D.C.L., LL.D., M.P.; Fifth President, Mr. Albert G. Sandeman. The L. C. C. takes cognisance of, and action in regard to, all questions affecting the good of the community at large, which from time to time occupy the attention of the mercantile world. The affairs of the Chamber are governed by a Council. From its first formation the Chamber has adopted the principle of dividing itself into sections, each dealing with subjects of interest to particular classes of business men, and forty-three trades have already been organised in this way. The Chamber has on its premises the nucleus of a valuable commercial library, and through its Information Department inquiries on an immense variety of matters connected with commerce, tariffs, new markets, trade statistics, etc., are conducted. The Chamber issues certificates of origin for goods exported to Italy and Russia, both to members and non-members; special certificates on trade customs and usages as required; also Commercial Travellers' Certificates for Switzerland and Russia, by means of which British travellers visiting those countries obtain their "licences to travel" on the most advantageous terms. The scheme of Commercial Education, on which the Chamber has been engaged for twelve years past, was further extended by schools and teaching institutions; the tenth examination for junior commercial certificates, and the sixth examination for senior commercial certificates took place during '99, when 566 candidates presented themselves, of whom 499 were successful. Partly as a consequence of the granting of these certificates, and the necessity for a medium through which employers and certificated youths may be brought in contact, the Chamber has an Employment Department in active operation. A special feature of the proceedings of the Chamber is the delivery of addresses by specialists on a variety of subjects. The addresses delivered in this way are reported in *The Chamber of Commerce Journal* (issued monthly, price 1s., annual subscription 10s., post free), of which a new series was started in April '94. President, Mr. Albert G. Sandeman. Office, 10, Eastcheap, E.C. Secretary and Editor, Mr. Kenric B. Murray.

London Congregational Union. This, the only society representing the interests of London Congregationalists, was formed in March 1873. The limits of its operations are comprised within the area known as Greater London, including the whole of Middlesex, and such portions of Surrey, Kent, Essex and Herts as are within twelve miles of Charing Cross, these being divided into ten districts. The objects of the Union are to promote the spiritual intercommunion of the Congregational churches of the Metropolis, to aid such of them as are weak, to advance their common religious and social interests, and further to promote church extension. An annual average of about £4000 is expended in aiding churches to support their ministers and in extending and consolidating mission work. In addition, grants are made in aid of Chapel Building, and Free Loans are granted for a term of years from a fund amounting to £11,050. About £28,500 has been raised during the last nine years for children's breakfasts and other philanthropic work. Upward of 250,000 garments have been distributed. The membership of the Union consists of the representatives of affiliated churches and of ministerial, personal and

honorary members. The Council consists of sixty members, thirty ministerial and thirty non-ministerial, elected by the Districts; and not more than twenty co-opted by the Council, together with the Chairman, ex-Chairmen, vice-Chairman, Treasurers, and Secretary. Each District Committee is entitled to nominate for the Council in the proportion of one member for every seven affiliated churches in the district. The Chairman for '99 is Chas. W. Toms, Esq. Offices, Memorial Hall, Farringdon Street, E.C. Secretary, Rev. A. Mearns.

LONDON CORPORATION.

The Corporation of the City of London consists of the whole body of the citizens or freemen, under the style of "the Mayor, Commonalty, and Citizens." The small portion of this great Metropolis which is comprised within the City and its liberties is divided into 27 wards, including Bridge Without. There is an alderman for this ward, but no freemen and no common councillors. Each of the other wards, with the exception of the two Cripplegate wards (which return an alderman jointly), elects one alderman and a number of common councillors varying from 4 to 16, but amounting in all to a total of 232; or, in other words, 26 aldermen and 202 commoners. An alderman is elected when a vacancy occurs, and holds office for life; the councilmen are elected on St. Thomas's Day, and hold office for one year, but are of course eligible for re-election. The electors are in each case freemen, who may have obtained their freedom by birth, apprenticeship, purchase, or gift; but who must be rated householders before they can vote at a ward-mote, as a meeting of the ward is termed. A liveryman is a freeman who, by payment of a fee, has entered the livery of one or other of the City companies or guilds, and was first so called because he was entitled to wear the livery of his company. He has the right to vote at the elections of Lord Mayor, sheriffs, chamberlain, and other Corporation officers, and also for M.P.'s for the City. The Lord Mayor is elected on Sept. 29th by the liverymen of the several companies assembled together at the Guildhall, and as it is termed in Common Hall, and to be eligible he must have served as sheriff of London. The Livery may select any alderman thus qualified, but they almost invariably accept the names of the two senior aldermen who have not passed the civic chair. A poll, to be taken by ballot, may however be demanded, if necessary. The names of the two selected aldermen are then submitted to the general body of the aldermen, who choose usually the first, but sometimes, for a special reason, prefer the second. The Lord Mayor elect is presented to the Lord Chancellor to receive the assent of the Crown to the election; he is sworn before the retiring Lord Mayor and aldermen on Nov. 8th, and on Nov. 9th he is escorted by the citizens in procession to the Royal Courts of Justice to be presented to the Lord Chief Justice and again sworn. The mayoralty thus commenced lasts a year, but the same alderman has in some instances been re-elected for a second, and in ancient times for even a third period of service. His public duties absorb every moment of the Lord Mayor's time, and the £10,000 annually voted by the Corporation does not anything like cover his expenses while in office. He is expected to preside during the day over meetings for public or

benevolent objects, and to take part in many important ceremonies: to open schools, distribute prizes, initiate subscriptions for relief of distress; and by night to entertain eminent and distinguished personages at his official residence, or to preside at Charity Festivals. As head of the Corporation he presides at Common Hall, the Court of Aldermen, and the Court of Common Council; he presides at the justice room of the Mansion House, and is first commissioner of the Central Criminal Court; he is a trustee of St. Paul's and a governor of the Royal Hospitals and other institutions, and several charities. He is head of the City Lieutenancy. He is styled "right honourable," and, although not actually of the Privy Council, he attends when, on the demise of the Crown, the new sovereign is proclaimed; and at the coronation he is present as chief butler, receiving therefor a golden cup and cover. [The Lord Mayor's private secretary is W. J. Soulsby, Esq., C.B., Mansion House.] The alderman of the ward, or (in his absence) the Lord Mayor, presides over the annual ward-mote for the election of common councilmen. At a bye-election during the year the deputy may preside in the absence of the alderman. Each alderman is a justice of the peace, and may preside at the Guildhall or Mansion House justice rooms. Each is a commissioner of the Central Criminal Court. The present Lord Mayor is Alderman Sir John Voce Moore, and the Sheriffs are Aldermen Frederick Prat Alliston and Colonel Clifford Probyn. The aldermen are the bench of magistrates for the City, the visiting justices to the prisons; they admit freemen, and decide disputes at ward elections. When a vacancy in the aldermanic representation of the ward of Bridge Without occurs, as it did last in '95, they choose one of their number, usually the senior alderman, to fill it, whose successor in the ward he retires from is elected in the usual manner. They sit in the Court of Common Council, the full title of which is "Lord Mayor, Aldermen, and Commons of the City of London in Common Council assembled," and no business can be done unless some of each body be present. The Common Council manages the financial and general affairs of the Corporation, has charge of its own police (see POLICE, CITY OF LONDON), lets its lands, has full power over its funds, and has charge of certain of the Thames bridges. The work until then done by the Commission of Sewers was given to the Corporation in '98, the Commission being dissolved. To cope with this new work a Public Health Department was formed by the Corporation. The Recorder (Sir Charles Hall, K.C.M.G., Q.C., M.P., salary £4000, and £57 as steward of Southwark) presents the Lord Mayor elect to the Lord Chancellor and to the Lord Chief Justice, is principal adviser of the Lord Mayor, and attends him on all occasions of State ceremony. He tries cases in the Lord Mayor's Court, is one of the judges in the Central Criminal Court, and is chairman of quarter sessions for the City. This officer is appointed for life by the Court of Aldermen, but he may not exercise any judicial functions unless he is appointed by Her Majesty to exercise such functions. (The necessary confirmation was of course given by the Crown in the case of Sir C. Hall, who was appointed in '92.) The Chamberlain (Sir William James Richmond Cotton, who was Lord Mayor in '76, salary

£2000) is elected by the Livery on Midsummer Day, and comes up annually for re-election. He receives the revenues of the Corporation or City cash, pays all salaries, charges, and outgoings, and has the custody of accounts, admits all duly qualified persons to the freedom, and is custodian of the records relating to freemen. He has also jurisdiction to punish refractory City apprentices, whom he sometimes commits to Bridewell. The **Common Serjeant** (Sir Forrest Fulton, Q.C., salary £3000) is now appointed by the Crown; he attends the Lord Mayor on all state occasions, and is present at meetings of the Court of Aldermen or Common Council; he is a legal adviser of the Corporation, one of the commissioners at the Central Criminal Court, a judge of the Mayor's Court, and acts on certain occasions as Deputy Recorder. The **Town Clerk** or Common Clerk (Sir J. B. Monckton, F.S.A., salary £3500) keeps the charters and records of the City, and attends all courts held before the Lord Mayor and Aldermen. He has the special privilege of signing documents with his surname only. The **Remembrancer** (Mr. G. P. Goldney, salary £2000) attends the Lord Mayor on certain days, puts the Corporation in mind of the business to be transacted, attends the Parliament House during session, and watches the interests of the Corporation in all legislative matters. The **Sword Bearer** (Mr. Winzar) carries the sword, being the emblem of justice, before the Lord Mayor. The last three are appointed by the Common Council. There are a number of other officers—legal, ceremonial, and official. See LONDON LOCAL GOVERNMENT, and SESSION, sect. 70.

LONDON COUNTY COUNCIL.

I. THE COUNCIL UP TO DATE.

The fourth and last Election took place on Thursday, March 3rd, '98. Under the County Electors Act, '88, women householders and peers may vote at the County Council election, but lodgers and those on the service franchise list may not, and no elector can legally vote more than once in the county. There were elected 70 Progressives and 48 Moderates, as against 59 Progressives and 59 Moderates in '95, 84 Progressives and 34 Moderates in '92, and 71 Progressives and 47 Moderates in '89. The members elected in the various constituencies are given below. An asterisk denotes that the member was also in the former Council. The list has been corrected up to Nov. 27th, '99.

Battersea. *W. Davies (P), *John Burns, M.P. (P).
Bermondsey. *Dr. G. J. Cooper (P), A. A. Allen (P).
Bethnal Green (North-East). *C. Freak (P), *E. A. Cornwall (P).
Bethnal Green (South-West). *J. Branch (P), *B. F. C. Costelloe (P).
Bow and Bromley. *W. W. Bruce (P), *B. Cooper (P).
Brixton. *W. Haydon (M), *C. Jerome (M).
Camberwell (North). *R. Strong (P), *Alderman Taylor (P).
Chelsea. J. Jeffery (P), E. J. Horniman (P).
City of London. *Sir J. C. Dimsdale (M), Lord Thynne (M), *B. L. Cohen, M.P. (M), *H. Clarke (M).
Clapham. *Lieut-Col. A. Rotton (M), *T. L. Corbett (M).

Deptford. *Sidney Webb (P), R. C. Phillimore (P).
Dulwich. J. R. Cousins (M), Bryce Grant (M).
Finsbury (Central). P. J. Rutland (M), *Alderman Beachcroft (M).
Finsbury (East). *J. A. Baker (P), J. Benson (P).
Fulham. Lord Wolverton (M), E. G. Easton (M).
Greenwich. R. S. Jackson (P), J. Peppercorn (P).
Hackney (Central). *T. M'K. Wood (P), James Stuart, M.P. (P).
Hackney (North). *Dr. E. B. Forman (M), G. Lampard (P).
Hackney (South). *A. Smith (P), E. Browne (P).
Haggerston. *Lord Monkswell (P), *Rt. Hon. G. J. Shaw-Lefevre (P).
Hammersmith. *W. J. Bull (M), *E. A. Goulding, M.P. (M).
Hampstead. *J. S. Fletcher (M), *E. Bond, M.P. (M).
Holborn. *J. F. Remnant (M), Sir J. Dickson-Poynder, M.P. (M).
Hoxton. *H. Ward (P), H. T. Sawell (P).
Islington (East). *A. M. Torrance (P), *J. Laughland (P).
Islington (North). *T. B. Napier (P), *W. C. Parkinson (P).
Islington (South). *G. S. Elliott (P), Howell J. Williams (P).
Islington (West). *W. Goodman (P), *G. H. Radford (P).
Kennington. *T. A. Organ (P), *J. W. Benn (P).
Kensington (North). G. E. S. Fryer (M), *J. B. Porter (M).
Kensington (South). *C. H. Campbell (M), *R. A. Robinson (M).
Lambeth (North). *Lt.-Col. C. Ford (P), F. Smith (P).
Lewisham. G. E. Dodson (M), *T. W. Williams (M).
Limehouse. *W. Pearce (P), *A. L. Leon (P).
Marylebone (East). *Lord Farquhar (M), *E. Boulnois, M.P. (M).
Marylebone (West). *Earl of Hardwicke (M), *E. White (M).
Mill End. J. Renwick Seager (P), B. Straus (P).
Newington (West). J. D. Gilbert (P), J. Piggott (P).
Norwood. *Col. F. Campbell (M), *J. White (M).
Paddington (North). *W. Urquhart (M), *H. P. Harris (M).
Paddington (South). *Sir G. D. Harris (M), H. A. Harben (M).
Peckham. C. Goddard Clarke (P), F. W. Verney (P).
Poplar. *W. Crooks (P), *J. McDougall (P).
Rotherhithe. A. Pomeroy (P), H. J. Glanville (P).
St. George's (Hanover Square). *R. C. Antrobus (M), *Col. Hon. H. Legge (M). Mr. W. H. C. Payne now sits as one of the members for this constituency, *vice* R. C. Antrobus, chosen Alderman.
St. George's-in-the-East. C. Barratt (P), C. Balian (P).
St. Pancras (East). *N. Robinson (P), F. Purchase (P).
St. Pancras (North). *T. H. W. Idris (P), D. S. Waterlow (P).
St. Pancras (South). *Sir John Hutton (P), *Sir J. Blundell Maple, M.P. (M).
St. Pancras (West). *Dr. W. J. Collins (P), *Earl Carrington (P).
Southwark (West). *T. Hunter (P), *E. Bayley (P).
Stepney. *W. C. Steadman, M.P. (P), *W. B. Yates (P).

Strand. *Lieut.-Col. C. Probyn (M), *T. W. L. Emden (M).
Walworth. *R. Spokes (P), *R. Parker (P).
Wandsworth *Dr. G. B. Longstaff (M), Mr. Mark Mayhew (P).
Westminster. *Louis H. Hayter (M), R. W. Granville-Smith (M).
Whitechapel. *H. L. W. Lawson (P), W. C. Johnson (P).
Woolwich. *Col. E. Hughes, M.P. (M), *A. Penfold (M).

The Aldermen are as follows, those with (†) retiring in 1901, and those with (‡) in 1904: †R. C. Antrobus, †Sir Arthur Arnold, †J. A. Baines, †W. F. Blake, †G. Dew, †W. H. Dickinson, †H. Gosling, †Lord Ribblesdale, †N. W. Hubbard, †Earl of Meath, †Sir H. B. Poland, Q.C., †Sir W. H. Porter, †Earl Russell, †Lord Tweedmouth, †Lord Welby, G.C.B., †Sir Algernon West, †T. B. Westacott, †C. A. Whitmore, M.P., †Rev. C. Fleming Williams.

Lord Welby is **Chairman of the Council**, Mr. R. Strong, **Vice-Chairman**, and Mr. T. L. Corbett, **Deputy-Chairman**.

The chief Officers are:—**Clerk**, C. J. Stewart; **Chief Engineer**, Sir A. R. Binnie; **Superintending Architect**, Thomas Blashill; **Valuer**, Andrew Young; **Solicitor**, W. A. Blaxland; **Comptroller**, H. E. Haward; **Statistical Officer**, G. L. Gomme; **Medical Officer of Health**, Shirley F. Murphy; **Chemist**, F. Clowes; **Public Control**, Alfred Spencer; **Parks and Open Spaces**, J. J. Sexby; **Manager of Works**, W. Adams; **Chief Officer, Fire Brigade**, Commander L. de L. Wells, R.N.; **Manager, Tramways**, Alfred Baker; **Clerk, Asylums Committee**, R. W. Partridge; **Secretary, Technical Education Board**, Dr. W. Garnett; **Parliamentary Agent**, H. L. Cripps; **Superintending Architect**, W. E. Riley.

II. THE COUNCIL'S WORK.

The Council's Budget.

Mr. Bruce, Chairman of the Finance Committee, submitted a report (May 2nd, '99) showing the estimated receipts and expenditure of the Council for the year '99-1900; and in so doing briefly reviewed the financial position of the Council. He said the average rate for London might be taken to be 6s. in the pound, including the 6d. equalisation rate. Of this the London County Council rate was 1s. 2d., the School Board rate 1s. 0½d., the Metropolitan Asylums Board 4½d., the Police rate, in addition to the sum paid out of the Exchequer contribution, 5d., the Common Poor fund 8½d., and the Equalisation rate 6d., making together 4s. 2½d., which left for local rates and cost of collection 1s. 9½d. The Council's rate had not advanced during the last five years in the same proportion as that of the other bodies. Although the average rate for London was 6s., the actual rate varied greatly in different parts of London. The highest rate raised was 8s. 7d., and the lowest 4s. 11d. There was no doubt that this led to a feeling of unfairness among those who paid the higher rates, and he thought the central authority should be charged by statute with the duty of ascertaining whether there was just ground for this feeling of unfairness, and of adjusting the rate accordingly. The year '98-99 had again been a prosperous one for the Council. They estimated for a total expenditure of £3,630,666; the actual expenditure was £3,538,275, showing a saving of £92,391. They estimated for a receipt, including a rate of 1s. 2d. and excluding the balance at the be-

ginning of the year, of £3,473,297; the actual receipt was £3,567,559, showing an excess over estimate, chiefly due to the increase of Exchequer contribution, of £94,262. The net debt of the Council on March 31st, '98, was £20,093,773, and on March 31st, '99, £21,562,018, showing an increase of £1,468,245, but of this about £1,000,000 was in respect of capital outlay on tramways and working-class dwellings, the interest and sinking fund for which were paid out of the income received. Of the total net debt £2,131,576 was invested in remunerative undertakings. The total debt of London was £40,870,747, with an annual charge for interest and repayment of £2,586,413. The rateable value of London on March 31st, '99, was £36,590,093, and hence the total debt was equal to 19 years' purchase of the rateable value.

The Council proposed for '99-1900 a rate of 1s. 1½d. in the pound, being 1½d. for general county purposes, and 2d. for special county purposes. This was a reduction of ½d. as compared with '98-99. A penny rate over the whole county produced in '98-99 about £152,000. The estimated profit of the tramways for '99-1900, after making adequate provision for interest and repayment of capital outlay and for repairs and renewals, was £78,935, and was equal to upwards of ½d. in the rate.

Chairman's Annual Address.

The Chairman, Lord Welby, on July 25th, '99, reviewed the work of the year ended March 31st, '99. He said the chief achievement of the Improvements Committee had been the scheme for a new street from Holborn to the Strand, which had received the assent of Parliament. The gross cost of the improvement was large, but the net charge, after providing for the re-housing of persons displaced, was reduced to £774,000, and the Committee saw hope for a more favourable result. One of the most important duties of the Council was the carrying into execution of the Acts which provided for the housing of the working classes. The work was progressing, but they must hope for faster progress. The Council was fully alive to the importance of the subject, and was determined to discharge the responsibility under which it lay, as to acquiring suitable sites, notwithstanding the increase in cost of building, the restrictions which Government departments imposed upon them, and the onerous terms under which the Treasury required repayment of the debt. He could not but hope that a part of their work might be accomplished by the building of cottage dwellings in places easily accessible by tram or rail. The Public Control Committee had exercised their powers for the protection of infant life as enlarged by the Act of '97. Nine new inspectors under the Shop Hours Act had entered upon their duties, and in more than half of the 7667 premises visited where young persons were employed infringements were discovered. Attempts had been made, in many cases with success, to awaken the local authorities to their duty of preventing smoke nuisances, but efforts on their part had not always been encouraged by the magistrates. London was deeply interested in the question whether its sewage could be disposed of by filtration through coke beds and intermittent bacterial treatment. The experiments which the Main Drainage Committee had in hand were continued during the past year.

The results so far obtained showed that the coke filters could remove the whole of the suspended matter from the crude sewage, as well as over 50 per cent. of the putrescible matter. Fish had lived for months in the liquid effluent. It was important to determine the maximum possible rate of treatment by each coke bed, which had not yet been determined, because the practicability of adopting the bacterial method for London depended largely on the area required for the laying down of the coke beds. Since '89-90 the number of open spaces under the Council's care had increased 100 per cent., and the total acreage 40 per cent.—from 2656 to 3753 acres. Nearly 70 acres of open space had been added during '98-9, including Golder's Hill, on the north side of Hampstead Heath. The report of the Asylums Committee showed that the minimum annual increase of patients was estimated at 600. The number of certified pauper lunatics for whom the County Council had to provide accommodation was on Jan. 1st, '90, 10,100; on Jan. 1st, '99, 14,645. Excluding the City, the population of London had increased at the rate of 9·3 per cent. in the last decade. The number of registered lunatics, however, had grown at the rate of 31·2 per cent. Improved registration would only account for part of this increase. The report of the Water Committee gave the reasons that induced the Council to persevere during '99 with its Bills for acquiring the undertakings of the companies and for supplementing them from Wales. The House of Commons, however, rejected the Bill on the ground that it was inexpedient that the Bill should be read a second time before the Royal Commission on London Water Supply had made its report. The close of the session had come, and the Commission had not issued its report. Meantime the volume of water in the Thames had been falling, as compared with previous years. On one day, indeed, in June '99, it was only 158,000,000 gallons, against 245,000,000, the smallest flow in June '98. Considering the demands upon it, might not the Thames prove insufficient? It must not be forgotten that it would require nine or ten years to obtain a supply from Wales, and time was passing. The Highways Committee had earned their first experience in the working of municipal tramways. The undertaking of the London Tramways Company was purchased at a cost of £860,872, the conditions of employment were revised by raising wages equal to the best paid in London for similar work, while one day's rest in seven was given. They were advised that this would cost them £13,300. The Committee, however, felt justified in anticipating that at the close of the financial year £39,100 would be available for relief of the rates or for other purposes after payment of interest and sinking fund. The Committee were making experiments in electrical traction. Professor Kennedy was investigating the subject under their instructions, and they trusted that ere long it might be practicable to adopt the system. The actual cost of the works completed for which the Council were responsible compared satisfactorily with the estimate, but the amount was not large enough to enable a definite judgment to be formed. The establishment and general charges were high, but as the amount of work increased they would proportionately decrease. Before the year which he had been reviewing closed, a measure of immense importance to London, the London Government Bill,

had been introduced into Parliament. That measure had now become law, and he was sure that he was speaking their sentiments when he said that they earnestly hoped that it would promote the good government of the Metropolis. It would always be their wish to co-operate heartily with the new authorities which the Act created.

Miscellaneous.

The Council approved of proposals (July 25th) for a large number of extensions of the tramways system, both north and south of the Thames, involving a capital outlay of over £600,000; but it was stated that the Finance Committee estimated that the outlay would not involve any charge on the county rate, but, on the contrary, would produce a margin of profit. It was also decided (Nov. 21st) to seek powers in the 1900 session for the reconstruction for electrical traction of the portions of the tramways between Westminster Bridge Road and Tooting, and between Blackfriars Bridge and Kennington, at an estimated cost of about £250,000. Lord Onslow, leader of the Moderate party, resigned his seat as county alderman (Oct. 10th). The Asylums Committee presented a recommendation that £1000 should be voted for inquiries, the preparation of designs for further asylum accommodation, and the cost of visiting foreign asylums, in view of the fact that in Jan. 1901 there would be 16,538 beds in the existing London asylums, with 15,918 London patients, increasing at the rate of 600 per annum. The recommendation was adopted. The Housing of the Working Classes Committee recommended the clearance of four areas in different parts of London, including Lever Street, Roby Street, Baltic Street, and Honduras Street areas, St. Luke's; Aylesbury Place, Clerkenwell, and Union Buildings areas, Holborn; the Webber Row, King's Bench Walk, and Grotto Place areas, St. George-the-Martyr, Southwark; and the Burford's Court, Tucker's Court, and Faviaonia Street areas, Poplar, which had been declared insanitary (Oct. 24th). The schemes involved a capital expenditure of between £500,000 and £600,000. In a special report the Finance Committee pointed out that the projected improvements already sanctioned by the Council, and those for which powers would be sought in the present session of Parliament, would involve a capital expenditure of £12,673,460, the net cost to the Council when the recoupment came in being estimated at £7,147,210. The Committee desired to leave it to the Council, with these figures before them, to decide whether they would for the present sanction any further schemes involving large expenditure, except such as they might consider to be absolutely urgent. The Council adopted the recommendation.

London Electric Lines. See ENGINEERING.

LONDON LOCAL GOVERNMENT ACT, '99.

In the '99 edition an account was given of the steps taken during '98 to transform a number of Metropolitan parishes from their existing status as Vestries into local self-governing bodies as Municipal Boroughs. In the Queen's Speech, at the commencement of the '98 Session, a promise of legislation in this direction was made, but not till '99 was it fulfilled. Then the London Government Act, '99, was brought in and carried. A full analysis of the measure,

together with an account of the proceedings in Parliament with regard to it, will be found in **SESSION, sect. 70.**

London. Livery Companies of. There have been 100 companies founded, but the latest return of the liverymen entitled to vote in elections in Common-hall only gives a total of 76, as follows. The figures after the names of the Companies give the number of liverymen entitled to vote. It should be pointed out that many persons belong to more than one Company:—The Worshipful Companies of Apothecaries, 56; Armourers and Brasiers, 84; Bakers, 144; Barbers, 120; Basketmakers, 30; Blacksmiths, 89; Bowyers, 19; Brewers, 44; Broderers, 33; Butchers, 130; Carmen, 5; Carpenters, 141; Clockmakers, 66; Clothworkers, 161; Coachmakers and Coach Harness-makers, 107; Cooks, 76; Coopers, 187; Cordwainers, 111; Curriers, 74; Cutlers, 105; Distillers, 37; Drapers, 273; Dyers, 85; Fan-makers, 97; Farriers, 97; Feltmakers, 65; Fishmongers, 335; Fletchers, 18; Founders, 88; Framework Knitters, 77; Fruiterers, 88; Gardeners, 46; Girdlers, 97; Glass-sellers, 34; Glaziers, 70; Glovers, 66; Gold and Silver Wyre Drawers, 103; Goldsmiths, 170; Grocers, 287; Gunmakers, 25; Haberdashers, 437; Horners, 48; Innholders, 80; Ironmongers, 40; Joiners, 93; Leather-sellers, 149; Loriners, 415; Makers of Playing Cards, 110; Masons, 31; Mercers, 197; Merchant Taylors, 304; Musicians, 41; Needle-makers, 62; Painters, 113; Pattenmakers, 66; Pewterers, 108; Plasterers, 53; Plumbers, 85; Poulterers, 110; Saddlers, 89; Salters, 178; Scriveners, 46; Shipwrights, 223; Skinners, 213; Spectacle-makers, 320; Stationers, 250; Tallow-chandlers, 112; Tinplate-workers, 91; Turners, 176; Tylers and Bricklayers, 78; Upholders, 27; Vintners, 102; Wax-chandlers, 37; Weavers, 98; Wheelwrights, 126; and Woolmen, 24. The liverymen of the Guilds who reside within twenty-five miles of the City borders have a vote in the parliamentary elections for the City. The twelve principal companies are those of the Mercers, Grocers, Drapers, Fishmongers, Goldsmiths, Skinners, Merchant Taylors, Haberdashers, Salters, Ironmongers, Vintners, and Clothworkers; but two of the largest liverymen are those of the Loriners and Spectacle-makers, both of which, however, like most of the minor companies, have scarcely any income except such as arises from the fees and fines paid by the members. Nearly thirty of them are without halls. In '80 it was estimated that the trust and corporate income of the livery companies of London was between £750,000 and £800,000, and the capital value of their property £15,000,000. The value of their plate and furniture was returned at about £270,000. On the whole it is estimated that the trust income is about £200,000 a year, and the corporate income from £550,000 to £600,000. Several of the companies possess a considerable amount of real property in the county of Londonderry. The total rent of the real property is above £600,000, and there is a further source of income exceeding £100,000 a year from investments. The contributions of existing members are from £15,000 to £20,000 a year. Of the £200,000 which forms the charitable or trust income, about £75,000 a year is expended on the support of almshouses and the relief of poor members, another £75,000 on education, and about £50,000 on charitable objects of a

general character. Many of the charities of the companies are for the benefit of the inhabitants of provincial towns and villages where they possess land. The cost of the hospitality annually given by the companies is estimated at £85,000. Technical education has within the last few years been taken up by the Guilds. The Clothworkers' Company has promoted the establishment of Yorkshire College, at Leeds, where instruction is given in the manufacture of woollen goods, and similar institutions at Bradford, Huddersfield, and other places. The City and Guilds of London Institute (*q.v.*), for the advancement of technical education, has also been formed. There is a technical college at Finsbury and a central institution at South Kensington. The Leather-sellers Company have been instrumental in establishing the Leathersellers' Tanning School, and the Leather Trades School for affording technical education in leather manufacture and boot and shoe-making. On May 28th, '84, a Royal Commission, appointed to inquire into the foundation and objects of the companies, issued a report, in which it recommended that the companies should be placed by Act of Parliament under such restrictions as regards the alienation of their real and personal estate as would remove all danger of the loss of any portion of their property; that the accounts of the companies should be open to public inspection; that no future admission to the livery of a company should confer the parliamentary franchise; the appointment of a commission which should undertake the allocation of a portion of the corporate incomes of the companies to objects of acknowledged public utility, the better application of the trust incomes, and, should it prove practicable, the reorganisation of the constitution of the companies. A dissenting report was, however, issued by three members of the Commission. No action has since been taken on this report.

London Parochial Charities. The parochial charities of the City of London are now administered by a number of trustees, nominated by various bodies, who are as follows:—Nominated by the Crown, the Dean of St. Paul's, Messrs. Quintin Hogg, C. J. Drummond, W. H. Fisher, M.P., and the Rev. R. H. Hadden; by the Corporation, Sir J. Savory, Bart., M.P., Messrs. C. T. Harris, C. J. Todd, and T. H. Ellis; by the London County Council, Messrs. Evan Spicer, Sidney Webb, Edward Bond, M.P., and T. A. Organ; by the Ecclesiastical Commissioners, Messrs. E. Freshfield, LL.D., and C. A. Whitmore, M.P.; by the University of London, Sir Philip Magnus; by University College, Professor Ramsay, F.R.S.; by King's College, Sir O. Roberts; by the City and Guilds of London Institute, Mr. L. B. Sebastian; by the Bishopsgate Foundation, Mr. G. N. Johnson; by the Cripplegate Foundation, Mr. H. J. Felton. During the last few years over £170,000 out of the funds of the trust have been devoted to the securing of open spaces, while about £33,000 a year is given in support of the various Polytechnics that have recently been started. The foundation is the largest for charitable purposes in the kingdom. The annual income now is between £80,000 and £90,000. Offices, 3, Temple Gardens, E.C. Clerk, Mr. H. Howard Batten.

London Police. See POLICE OF THE UNITED KINGDOM.

London Reform Union. Inaugurated Oct. '92. A non-party organisation having branches

in most of the Metropolitan parliamentary constituencies. Its object is to improve the municipal government of London, the administration of its public affairs, and the collective organisation of its civic life. The London Municipal Reform League and the United Committee for the Taxation of Ground Values are merged in the London Reform Union. The Union is in general agreement with the progressive policy of the London County Council. It has instituted an annual "Citizen Sunday" in London, and "Citizens' Visits" to places of interest in and around London, and does much educational work. The President of the Union is Mr. J. Passmore Edwards, the Chairman Mr. T. Lough, M.P., and the Secretary Mr. F. W. Galton. Offices, Trafalgar Buildings, Northumberland Avenue, Charing Cross, W.C.

London Salvage Corps. This corps was first established in 1866 by the Fire Insurance Companies on the transfer of the London Fire Establishment to the Metropolitan Board of Works, when the Metropolitan Fire Brigade was organised. The Corps is maintained by contributions from the principal Insurance Companies. There are five stations, all in connection by telephone, and also in communication with the Fire Brigade, in various parts of the Metropolis, and the men and plant are highly efficient. The number of fires attended by the Corps during '98 was as follows: Inside the Metropolitan area, 2122; outside, 116; total, 2238. At nearly all of these, services of a valuable character were rendered on behalf of the Offices interested. The staff of the Corps consists of 1 chief officer, 5 superintendents, 9 foremen, 17 1st-class men, 20 2nd-class men, 40 3rd-class men, and 8 coachmen. Only men of the Royal Navy are taken. The following is a list of the stations: Commercial Road, E., Supt. Adams; Southwark Bridge Road, S.E., Supt. Bridges; Shaftesbury Avenue, W., Supt. Allen; Upper Street, Islington, Supt. Morgan; and Watling Street, City, Supt. Blyth. The Watling Street Station is the Headquarters of the Corps, and the Chief Officer, Major Fox, resides there.

LONDON SCHOOL BOARD.

The Elementary Education Act of 1870 specially provided that a school board should be formed for London. The first board was accordingly elected only a few months after the passing of the Act (Nov. '70). Its educational progress since '70 will be seen by the following table, and also the "rate" at the end of each triennial period:—

BOARD SCHOOLS.

	Rate at end of each Triennial Period.	School places provided.	No. on the Roll.	Average attendance.
1870	d.	—	—	—
1873	'89	58,581	59,606	40,481
1876	3'0	146,074	146,031	114,380
1879	5'15	219,291	233,480	185,518
1882	6'15	280,275	295,833	238,205
1885	8'0	357,298	364,140	290,099
1888	8'37	407,636	420,914	328,578
1891	10'70	428,035	450,981	347,857
1894	10'20	468,300	488,038	390,812
1897	12'34	512,025	520,877	421,960
1898	12'36	525,955	527,486	429,853
1899	12'57	537,524	533,855	438,434

VOLUNTARY SCHOOLS.

	School places provided.	No. on the Roll.	Average attendance.
1870	261,158	221,401	173,406
1873	282,936	259,543	195,662
1876	287,116	259,436	199,605
1879	271,314	235,084	182,728
1882	263,617	223,297	174,723
1885	262,175	211,711	168,712
1888	262,022	207,887	162,349
1891	258,329	210,516	162,525
1894	257,652	226,163	177,579
1897	256,896	227,568	178,257
1898	257,124	226,766	179,173
1899	224,480	224,482	177,944

The curriculum is as follows (with one or two exceptions), as prescribed by the Code of the Education Department: reading, writing, and arithmetic, drawing (and needlework for girls), of course take precedence over all other subjects. The class subjects last year were English, geography, elementary science, history, object lessons, and suitable occupations for the lower standards; and needlework, drawing, and domestic economy for girls. Besides these there are specific subjects for the upper standards: namely, algebra, Euclid, animal physiology, book-keeping, botany, chemistry (domestic economy for girls) and domestic science, French, German, hygiene, mechanics, mensuration, physics, chemistry, shorthand, and the theory and practice of housewifery, cookery and laundry-work, each child being restricted to two specific subjects. The curriculum also includes singing, recitation, and physical exercises; and also (for boys) manual training in woodwork. Bible instruction also is given. Taking advantage of the Elementary Education Act, '91, which came into operation on Sept. 1st, '91, the Board resolved that all the day-schools under their control should be free. No fees have therefore been charged at any such Board school since the week ended Aug. 28th, '91. The number of teachers employed at Lady Day, '99, was 9890. There were also 2203 pupil teachers and probationers. The Board for many years have provided efficient instruction for blind, deaf, and dumb children; but, acting under the powers of the Elementary Education (Blind and Deaf Children) Act, '93, the Board have now, where necessary, arranged for the admission of such children into suitable homes or institutions. The Board have also made special arrangements for the instruction of physically or mentally defective children. The Board have availed themselves of the provisions of the Industrial Schools Acts and the Education Acts, relating to children wandering or not under proper control, or begging or not under proper guardianship, or persistently truanting from school, or charged with felony, etc., with a view to such cases being sent to industrial schools (a) under voluntary management, or (b) under the management of the Board. There are sixty-three of the former schools with which the Board have agreements. There are also six of the latter schools: (1) a training-school ship on the Thames; (2) an industrial school temporarily located at Margate, chiefly for boys not suitable for other industrial schools, and an Industrial School for girls at Isleworth; (3) two

truant schools for boys, one at Homerton and the other at Highbury; and (4) a Day Industrial School (mixed) in Drury Lane. Evening continuation schools have now been established in every part of the Metropolis. The total number of pupils admitted during the session '98-9 was 109,000; average number on rolls, 42,109; and average attendance, 28,189. The subjects taught are classed under the following heads:—Elementary, English, commercial, languages, science and art; Euclid, etc.; vocal music; cookery, laundry-work, etc.; manual training and wood-carving. Instruction in some form of physical exercises is given in every school; in the summer months swimming is taught; social gatherings and entertainments are held; and the libraries of the schools are open for the free use of the students. No less than 62 scholarships were offered in '99, 38 for boys and 24 for girls. Fifty of them were tenable at Christ's Hospital and the rest elsewhere. The expenditure in the financial year ending March 25th, '99, was £2,644,042, and the revenue amounted to £2,752,351, leaving a surplus in hand of £108,309. For the year '99-1900 the estimated expenditure was £2,885,800.

The election for the new Board—the tenth—was held on Nov. 25th, '97, and the contest was rendered particularly interesting by the split in the Moderate party, which had resulted from the disagreement of several of its members with Mr. Diggle's policy. In the list of elected members given below the * prefixed to various names indicates that these candidates were members of the last Board. The various capital letters placed after the names indicate the parties to which the candidates were understood to belong. Thus P stands for Progressive, M for Moderate (in agreement with Mr. Diggle), I M Independent Moderate, VM Moderates supported by the Voluntary Schools Defence Union, IP Independent Progressive, I Independent, L Labour, and S Socialist.

City of London (Four Members)—Miss M'Kee (P), 7,385; *Mr. W. H. Ke (M), 7,052; *Canon Ingram (M), 6,932. [Vacancy, in place of Mr. Leveson-Gower resigned.]

Chelsea (Five Members)—*Mr. Frederick Davies (M), 14,978; *Mr. Thomas Huggett (M), 14,906; *Mrs. Maitland (P), 14,839; *Viscount Morpeth (P), 13,292. [Vacancy, in place of Mr. Leslie M. Johnson resigned.]

Finsbury (Six Members)—*Miss Eve (P), 22,576; *Mr. C. Bowden (P), 18,951; Mrs. R. W. Dibdin (VM) 18,398; *Mr. J. W. Sharp (M), 12,805. Rev. R. F. Hosker co-opted by Board in place of Rev. J. H. Rose deceased. Anthony John Mundella, Esq., co-opted by Board in place of Earl Beauchamp resigned.

Greenwich (Four Members)—*Mr. G. S. Warmington (P), 21,855; *Rev. J. Wilson (P), 20,571; Rev. F. S. Clark (M), 15,026; Mrs. Bridges Adams (L), 14,366.

Hackney (Five Members)—Miss Honnor-Morten (P), 29,206; *Rev. Stewart D. Headlam (P), 21,506; *Mr. Graham Wallas (P), 17,862; Mr. W. C. Bridgeman (VM), 14,153; Mr. John Lobb (I), 11,928.

East Lambeth (Four Members)—*Rev. A. W. Jephson (P), 15,549; *Mr. G. Crispe Whiteley (P), 14,353; Mr. H. C. Gooch (M), 13,777; *Mr. Thomas Gautrey (P), 13,520.

West Lambeth (Six Members)—*Dr. T. J. Macnamara (P), 29,793; *Rev. William Hamilton

(P), 29,636; Mr. M. Mayhew (P), 28,646; Mr. John Sinclair (P), 26,053; *Rev. Canon Allen Edwards (M), 22,370; *Mr. W. H. Kidson (M) 20,881.

Southwark (Four Members)—Rev. J. S. Lidgett (P) 13,913; *Rev. W. Copeland Bowie (P), 10,921; Rev. W. F. Brown (I), 10,461; *Mr. J. M. T. Humphreys (M), 6,637.

Marylebone (Seven Members)—*Mr. E. Barnes (I), 30,652; *Hon. Lylph Stanley (P), 18,511; Rev. H. R. Wakefield (P), 15,898; *Mr. A. J. Shephard (P), 15,277; Mr. J. A. M. Macdonald (P) 15,029. W. W. Thompson, Esq., co-opted by Board in place of General Moberly deceased. Mr. John Cator co-opted by Board in place of Mr. Evelyn Cecil resigned.

Tower Hamlets (Five Members)—*Mrs. Ruth Homan (P), 25,622; *Sir Charles Elliott, K.C.S.I. (VM), 21,277; *Rev. Ed. Schnadhorst (P), 19,593; Mr. B. F. Costelloe (I), 17,456; Mr. E. Flower, M.P. (VM), 15,569.

Westminster (Five Members)—Mr. H. Morgan-Browne (P), 13,454; *Major C. L. A. Skinner (VM), 7,072; *Mr. W. Winnett (VM), 6,564; *Mr. D. H. Kyd (VM), 6,024. Hon. Maude Lawrence co-opted by Board in place of Mrs. Patey resigned.

At the first meeting of the Board, on Dec. 2nd, '97, Lord Reay, G.C.S.I., G.C.I.E., was elected Chairman, and Hon. Lylph Stanley, Vice-Chairman.

Chief Officers of the Board.—These are as follow: Clerk, Geo. H. Croad, B.A.; Assistant Clerk and Principal Clerk of the School Accommodation and Attendance Department, C. W. Isitt; Accountant of the Board, G. Attenborough; Principal Clerk General Purposes Department, E. H. Bramley; Principal Clerk of the Works Department, G. C. Harcourt; Principal Clerk School Management Department, F. Wiles; Principal Clerk Industrial Schools Department, A. E. Garland; Solicitor, C. E. Mortimer, 22, Surrey Street, Strand; Medical Officer, Professor W. R. Smith, M.D., D.Sc., F.R.S. Ed.; Architect, T. J. Bailey. Offices, Victoria Embankment.

London Shipping Exchange, the meeting-place of the principal shipowners and shipbrokers. Nearly every shipbroker in London belongs to the Exchange, which has over 1500 members. Shipping information of every kind can be obtained here, and shipping auction sales take place periodically. The business of the old Jerusalem, where shipping transactions were formerly carried on, has been transferred to the Exchange, which is located in Billiter Street, E.C.

London, The University of, is an examining body with the power of conferring degrees, which it does under its 4th royal charter, dated 1863. In '78 it received an additional charter admitting women to all degrees without exception. Besides holding examinations in London, the University extends them when required to the provinces and the colonies. From its foundation, in '36, to '98 inclusive, it had examined 124,293 candidates. The Earl of Kimberley is the Chancellor, and Sir Henry Roscoe the Vice-Chancellor. Parliamentary representative, Sir John Lubbock, Bart. The degrees conferred are: LL.D., LL.B., M.D., M.S., M.B. and B.S., D.Sc., B.Sc., D. Lit., M.A., B.A., D. Mus., B. Mus. A necessary preliminary to proceeding in any faculty is the passing of the **Matriculation Examination**, no exemption from this being granted on account of examinations passed

elsewhere. For the regulations of this and other examinations apply to the Registrar, Mr. F. V. Dickens, M.B., B.Sc., Univ., Burlington Gardens, Piccadilly. *Consult London University Calendar.* Arrangements were made and sanctioned by the Treasury in '99 for housing the University in the eastern and central portions of the main block and portions of the inner block of the Imperial Institute at South Kensington. The University will occupy its new quarters under conditions substantially the same as those under which it has occupied the building in Burlington Gardens. The *University of London Act, '98*, made provision for the reconstitution of the University of London as a teaching as well as an examining body, and for the appointment of a commission consisting of Lord Davey (chairman), the Bishop of London (Dr. Creyghton), Thomas Barlow, M.D., Fellow Univ. Lond., Sir Owen Roberts, D.C.L., Professor Jebb, Regius Professor of Greek, Univ. Camb., Dr. Michael Foster, M.D., F.R.S., Professor of Physiology, Univ. Camb., and Mr. Edward Henry Busk, M.A., LL.B., Chairman of Convocation, Univ. Lond. Thomas Bailey Saunders, M.A., Barrister-at-law, is Secretary to the Commission. The powers of the Commissioners may not be continued beyond the year 1900. The Commissioners are to make statutes and regulations for the University in general accordance with the scheme of the report of the Commissioners appointed to consider the draft charter for the proposed Gresham University, but subject to certain modifications specified or indicated in the schedule to the Act, and to any other modifications which may appear to them expedient after considering the changes which have taken place in London education of a university type since the date of that report, and any representations made to them by or on behalf of the Senate or Convocation or any fifty graduates of the University, or by or on behalf of any body or person directly affected. Any statute or regulation made by the Commissioners is not to be valid until it has been approved by Her Majesty in Council, and if either House present an address praying the Queen to withhold her assent from the statute or regulation, or any part thereof, no further proceedings shall be taken on it, or on the opposed part of it, though this shall be without prejudice to the making of a new statute or regulation. The Senate or Convocation of the University, or any other person or body directly affected by such statute or regulation, may petition Her Majesty in Council to withhold her approval, and Her Majesty in Council may refer any such petition to the Privy Council, a committee of which may hear the petitioner personally or by counsel and report on the matter. After the expiration of the powers of the Commissioners the Senate of the University may make statutes and regulations for altering or supplementing any of the statutes or regulations made by the Commissioners, but this power is subject to the foregoing provisions, and any statute must be communicated in draft to Convocation, whose opinion thereon is to be taken into consideration. For the purposes of this Act the South-Eastern Agricultural College at Wye is to have such privileges as it would have had if situated within the administrative county of London, and the *University of London Act, '99*, applies the '98 Act to the Royal Holloway

College at Egham (see SESSION, sect. 112). Nothing in the Act is to affect the rights or privileges of any of the Inns of Court or of the Incorporated Law Society; and existing fellows, though retaining their fellowship for life, are no longer to be, as such, members of the Senate. The provisions of the schedule to the Act to which effect is to be given by the Commissioners in framing statutes and regulations have reference to, among other things, the constitution of the Senate, and are against the adoption or imposition of a religious test, or the imposition of disability on ground of sex.

LONDON WATER SUPPLY.

The Metropolis is supplied with water by eight companies—viz., the New River, East London, Southwark and Vauxhall, West Middlesex, Lambeth, Chelsea, Grand Junction, and Kent Waterworks. The companies supply an area consisting of the whole of the Metropolis and of parts of Middlesex, Herts, Essex, Kent, and Surrey, which is termed the Metropolitan Water Area, and is 620 square miles in extent. The supply is drawn from the rivers Thames and Lea, from springs in the Lea Valley, and from wells in the chalk formation in and around London. The principal intakes from the Thames are at Hampton, West Molesey, and Sunbury, and from the Lea at Ware and Chingford Mill. The total volume of water supplied from all sources during '98 amounted to 74,480,000,000 gallons, and of this about 43,000,000,000 were drawn from the Thames, 16,000,000,000 from the Lea, and the rest from springs and wells. The average daily supply per head of population from all the companies was about 35 gallons. Of the Companies, the East London supplies the largest population, and the Chelsea the smallest. The subject of the water supply of the Metropolis has for the last 30 years been dealt with by numerous Royal Commissions, and much legislation has been proposed with a view to controlling the Water Companies or providing for the transfer of their undertakings to some public body. Royal Commissions have considered the question of obtaining a supply from Wales or the Lake District, but they have rather favoured the existing sources of supply, which by Lord Balfour of Burleigh's Commission in '93 were regarded as sufficient to render a daily supply of 35 gallons per head to 12,000,000 persons, a number largely in excess of the estimated population for 1931. Doubts have, however, been entertained as to whether this estimate of population was not too low, and also as to whether the supply from the Thames and Lea during periods of dry weather would suffice to meet the requirements of the increased population. This Commission, as above stated, were in favour of the retention of the present sources of water supply, but they recommended that extensive storage reservoirs should be constructed at Staines and in the Lea Valley so as to provide for a supply during periods of drought.

In '95 the London County Council introduced eight separate Bills for compulsory purchase of the undertakings of the companies, the price to be settled, failing agreement, by arbitration. Great opposition was raised to the Arbitration Clause, which provided that the arbitrators should have regard to certain specific circumstances and claims; and the local authorities generally of the districts

outside London which were supplied by the Companies opposed the principle of the London County Council obtaining complete control. Two of the Bills were read a second time and referred to a committee, who decided against the proposed clause. They were, however, willing to amend the clause in order to make it clear that the arbitrators should not be precluded by any legal objections from entertaining all the circumstances which they might think it right to take into consideration, and the London County Council had agreed to this amendment when Parliament was dissolved. In March '96 a Government measure was introduced into the House of Lords by Lord James of Hereford, termed the **Metropolitan Counties Water Board Bill**. This Bill proposed the constitution of a Water Board for the purpose of dealing with the question of water supply. The Board was to consist of 30 members—16 appointed by the London County Council; two each by the City of London, the Middlesex County Council, the Essex County Council, and the Town Council of West Ham; and one each by the Kent, Surrey, Herts, and Croydon Councils, and the Lea and Thames Conservators. The Water Board was to have transferred to it all the powers of the Metropolitan authority under the Water Act of '71, and the powers of the London County Council as to the supply of water. The Bill met with considerable opposition on the part of the London County Council and of the local authorities outside London, and though it passed the Lords it was not proceeded with in the House of Commons. In April '96 the London County Council approved of a scheme for obtaining a supply from Wales.

In '97 the County Council again introduced eight Bills for the acquisition of the companies' undertakings, each Bill containing an arbitration clause similar to that settled by the Committee of '95. The Government, however, considered that if they agreed to these Bills the interests of the ratepayers in the water area would not be sufficiently safeguarded, and that in the first place a full inquiry should be made into the arrangements for the distribution of water, and into the question as to what were the best governing bodies for the London district and the outside areas. Accordingly, (in March '97, a **Royal Commission** was appointed, with Lord Llandaff as chairman, the terms of reference being as follows: (1) To inquire and report whether, having regard to financial considerations and to present and prospective requirements as regards water supply in the districts within the limits of supply of the Metropolitan Water Companies, it is desirable in the interests of the ratepayers and water consumers in those districts, that the undertakings of the water companies should be acquired and managed either (a) by one authority, or (b) by several authorities, and if so, what should be such authority or authorities; to what extent physical severance of the works and other property and sources of supply of the several companies and the division thereof between different local authorities within the limits of supply are practicable and desirable, and what are the legal powers necessary to give effect to any such arrangements: (2) If the undertakings are not so acquired, whether additional powers of control should be exercised by local or other authorities, and if so, what those powers should

be: (3) Whether it is practicable to connect any two or more of the different systems of supply now administered by the eight Metropolitan Companies, and if so, by whom and in what proportions should the cost of connecting them be borne, and what are the legal powers necessary to give effect to any such arrangement. In consequence of the appointment of this Commission the County Council Bills were withdrawn.

Pending the settlement of this larger question, the Government introduced a Bill for the purpose of providing water consumers with a means of complaint against the companies. Under this Bill, which became the **Metropolis Water Act, '97**, any water consumer, or any local authority within the area supplied by the Metropolitan Water Companies, was empowered to complain to the Railway and Canal Commission of any failure of duty by one of the companies or as to the quantity or quality of water supplied, and the Commission were empowered, if they thought fit, to order that company to remove the ground of complaint.

The chief feature of '98 was the partial failure of the supply in the district of the **East London Water Company**. This Company derives its supply mainly from the River Lea. The New River Company also takes the greater part of its supply from the Lea, but is empowered to draw from the river much higher up than the intakes of the East London Company. A period of excessive drought (which lasted from the middle of '97 to Oct. '98) so reduced the flow of the Lea that in Aug. '98 the East London Company were unable to obtain any water from the river. The Company's reservoirs were unequal to the demand, and although assistance was given by other Companies, with whose mains connections were made, it was found necessary to stop the constant supply and limit the service to two periods of three hours each, which subsequently were reduced to two hours each. The period of limited supply lasted from Aug. 22nd to Dec. 14th, '98.

It had become evident that the most pressing difficulty in the London water question was the supply to **East London**. In this district alone had there been failures owing to drought. The East London Company supply a population of 1,311,000, for which an average of 40,000,000 gallons is daily required. Their reservoirs when full contain 1,200,000,000 gallons or thirty days' supply to the district, and the company can obtain 10,000,000 gallons daily from the Thames; but whenever the flow of the Lea became small, the Company were in difficulties. To meet their case the **Royal Commission** (Dec. 20th, '98), presented an **interim report** dealing only with the subject of intercommunication of the mains of the different companies, which was one of the questions into which they had to inquire. It stated that a scheme of intercommunication between the several systems, enabling the different companies to supply water to, or receive it from, each other would be not only practicable and expedient, but necessary, and it was recommended that steps should be taken immediately to put the supply of London on a safe footing. Without deciding on any particular scheme the Commission stated that a Bill should be introduced enabling the companies to execute such works for the purpose of intercommunication as might be authorised by the Local Government

Board, and requiring the companies to perform any works directed by the Board. The cost of the works was to be met by the issue of debenture stock, the interest on which was to be paid by the several companies in proportion to their water rentals so long as the works were not used, but so long as the works were used the company receiving water was to pay such proportion of the total interest as might be agreed on by all the companies, or, failing agreement, might be fixed by an arbitrator. Further it should be provided that no company should be allowed in the event of purchase to enhance the value of its undertaking by reason of an intercommunication scheme. As regards the needs of the companies generally, the Commission thought that powers should be given to the companies to take more water from the Thames on any day provided that a certain average for the half-year was not exceeded. The proposals of the Commission as to intercommunication had been practically agreed to by the companies, and in the beginning of the session of '99 the companies introduced a Bill to give effect to the above recommendations. This Bill was, however, withdrawn, as the matter was taken up by the Government, and the President of the Local Government Board brought in a similar measure dealing with the subject of intercommunication, which became the *Metropolis Water Act, '99* (for details see *SESSION*, sect. 75). In anticipation, and as a result of this Act, the companies constructed during the latter part of '98 and in '99 various junctions between their mains, and the East London Company was connected with the systems of the New River, Grand Junction, West Middlesex, and Southwark and Vauxhall Companies. The beneficial effect was soon felt, for the summer of '99 was very hot, and during four months there was practically no rain. Although but little water could be obtained from the Lea, the East London Company, by means of their reservoirs and with the aid of the supplies they received from the other companies, were enabled to give a constant supply to their district all through the summer.

Meanwhile the **London County Council** were once more proceeding with a view to the purchase scheme. In November '98 they had determined on the promotion of *Bills* in the following session, enabling them to purchase the undertakings of the eight water companies, and also to bring water from Wales. Accordingly in '99 they introduced four Water Bills: (1) a Purchase Bill; (2) a Finance Bill; (3) the Welsh Reservoirs and Works Bill; and (4) the Aqueducts and Works Bill. Under the Purchase Bill the Council were to acquire the undertakings of the companies by agreement not later than March 31st, 1900, or failing agreement by compulsion, the terms being then settled by arbitration. In arriving at the purchase money, the arbitrators were to consider all the circumstances of the case, past, present, or future, laid before them by either party. The undertakings were to be managed by a committee appointed by the London County Council and the Corporation of the City of London. Under the Bill the councils of the areas outside London supplied by the companies were to be empowered to acquire the portions of the undertakings appropriated to the supply of water within their districts. The Finance Bill enabled the County Council to raise stock

redeemable at one hundred years for the purchase of the undertakings. The other two Bills of the Council provided for the construction of reservoirs in Wales to store water for the supply of London, and for the construction of aqueducts, etc., to bring the water to London. On March 22nd, on the second reading of the Welsh Reservoir Bill, Mr. Stuart, on behalf of the County Council, pointed out that the water obtained under this Bill was intended to be in addition to that from the Thames and Lea. It was estimated that further supplies would probably be required for London after 1911, and this supply from Wales was for the purpose of meeting that necessity. He objected to further quantities of water being taken from the Thames and Lea in times of flood for storage purposes, and contended that the Thames water was largely subject to pollution. Mr. Chaplin, in reply, stated that the Bill raised the question of who was to be the new water authority, and also the whole question of the policy of purchase, and that as these questions were at present under the consideration of the Royal Commission, he thought the Bill should await their report on these points. The second reading was lost by 206 to 130 votes. The Purchase Bill was deferred from time to time in the hope that the Water Commission would present its report on the question outstanding, but on June 1st Mr. Stuart withdrew the Bill on the ground that in the absence of the report of the Commission it was inexpedient to attempt to proceed with the second reading.

The Royal Commission, as stated above, had to report on the general question as to whether it is desirable that the undertakings of the water companies should be acquired and managed either by one authority or by several authorities, and, if so, who should be such authority or authorities. The question was not submitted to them as to whether the present sources of supply—*i.e.* the Thames and Lea, and the various wells in and near London—were sufficient for the needs of London. It was apparently considered that this question had been settled by Lord Balfour's Commission, who had reported that the present sources were sufficient to meet the needs of London until 1931. But it must be remembered that this Commission had advocated the construction of large reservoirs at Staines and in the Lea valley, where water could be impounded during times of large flow for use when the rivers were too low to supply the daily amount required. The whole question of London water supply, irrespective of the question of purchase and control, resolves itself into this—Shall sufficiently large reservoirs be constructed in the Thames and Lea valleys? If not, water must be brought from Wales or elsewhere. Although the Thames during the last two summers has fallen very low—indeed, on a few occasions, after the companies had abstracted the quantities they required, barely fifty million gallons remained to flow over Teddington Weir in the day for the navigation of the lower reaches—yet the Thames has so far never failed in its supply to the companies. The only difficulty up to the present has been in the case of the East London Company; all the other companies—except the New River Company, which is able to obtain a large part of its supply from wells, and the Kent Company, which derives all its

supply from extensive wells in Kent—rely almost entirely on the Thames. Compared with the East London Company, the Thames-supported companies have very little storage; they have always been able to take practically the whole of each day's supply from the Thames. At present the average daily amount taken from the Thames by all the companies is 120,000,000 gallons. According to Lord Balfour's Commission, an average of more than 300,000,000 gallons daily could safely be taken from the river—a quantity which they estimated would be more than sufficient to meet the demands of the population of Greater London for the next thirty years. Since the report of this Commission, **reservoirs have been largely constructed** with a view to providing the reserve of water recommended by them. The Staines reservoirs, which were authorised in '96, will, when completed, have a capacity of 2,500,000,000 gallons; and in '98 an addition of 750,000,000 gallons to their capacity was authorised. The reservoirs for Thames water already constructed have a capacity of less than 1,000,000,000 gallons, and when all that have been authorised have been built the total storage will be about 6,000,000,000 gallons. The Royal Commission were in favour of a scheme of reservoirs by which in 1901 the storage capacity would be 1,900,000,000 gallons, then rising gradually to 17,500,000,000 gallons in 1941. As regards the Lea, the existing reservoirs of the East London Company contain 1,200,000,000 gallons, but additional reservoirs authorised in '97 for 1,000,000,000 gallons are under construction. In '99 the Company introduced a Bill for the construction of further reservoirs containing 5,000,000,000 gallons, which they considered necessary to enable them to keep up the supply to their district. This Bill passed the House of Commons, although opposed by the London County Council, but was thrown out in committee in the House of Lords.

In October '99 the **Water Committee of the County Council** reported on the subject. They pointed out that the flow of the Thames was even lower in August '98 than it was in the preceding year, and stated that the droughts of the last two years had shown that reliance could not be placed in the conclusions of Lord Balfour's Commission as to the amount which could be drawn from the river. They asserted that during August the companies had taken practically the whole volume of the Thames. For these reasons it seemed to them that, if the supply of water in the future was to be secured by storage reservoirs, it would be necessary that these should be constructed of a far greater capacity than originally intended, and the cost would greatly exceed the estimates. They came to the conclusion that the Thames could not be depended on for the ultimate supply of the Metropolis, and that the supply could only be assured by resorting to a source other than the valleys of the Thames and the Lea, and they stated that it was urgently necessary that a scheme for this supply should be set on foot without a single year's delay. They therefore recommended that the **Welsh Scheme** of the Council should again be presented to Parliament, and if the Government again refuse to allow it to go before a Select Committee the responsibility would not be upon the Council. They also recommended that a Bill for the compulsory

purchase of the undertakings of the Water Companies should be introduced in 1900. This report came before the County Council on November 7th. As regards the Purchase Bill, an amendment was moved to the effect that the question of proceeding with the Bill should be reconsidered as soon as the Royal Commission had reported. This amendment was lost by 61 votes to 40; and a similar amendment with respect to the Welsh Bill was rejected. The Council then adopted the recommendations of the Committee to introduce in the Session of 1900 the Purchase Bill and the Bill for the Welsh scheme. This scheme consists in the formation of reservoirs in the valleys of the Upper Wye and Yrfon, together with collecting conduits from the Towy, and the construction of an aqueduct along the north side of the Thames Valley as far as Elstree. The Finance Committee of the County Council reported that the cost of the scheme would be £17,000,000, and that in their opinion the cost of the construction of reservoirs, as recommended by Lord Balfour's Commission, would be not much less than that amount. They added that, whatever was done now, it would eventually be necessary to go outside the Thames Valley for the supply for Greater London.

While the County Council thus determined on their action, the **Water Companies** gave notice of their intentions for 1900. The Companies, as a body, proposed to introduce a Bill enabling the Local Government Board to require the companies or any one or more of them to submit schemes for, and to construct, additional storage reservoirs in the Thames Valley providing for the supply of water necessary for the needs or anticipated needs of the companies' districts. With the consent of the Local Government Board and the Thames Conservators, the companies are to have power to take additional water from the Thames. The cost of the works is to be met by the issue of debenture stock. The East London Company also prepared to introduce a Bill for the construction of further large reservoirs in the Lea Valley. Pending the report of the Royal Commission now sitting, the whole question of London water supply remains an open one. It may be mentioned that two members of the Commission (H. W. Cripps, Q.C., and Major-General Scott) died during the autumn of '99.

Lord Chamberlain. The Lord Chamberlain of England has the control of the establishment attached to the chapels royal; of officers and servants attached to the royal chambers, except of those of the bedchamber; and over the medical men of the Household. The royal tradesmen are appointed by him. He directs all great royal ceremonies, receives all applications to attend levees and drawing-rooms, superintends the royal wardrobe and the jewel house at the Tower, and licenses theatres and plays, his power extending to the cities of London and Westminster, and certain other parts of the Metropolis, as well as to those places within which the sovereign may reside occasionally. The power of licensing theatres elsewhere belongs to the justices. Theatres licensed by letters patent from the Crown do not, even in the foregoing places, require the Lord Chamberlain's licence. One copy of every new play, prologue, or epilogue,—or new addition to an old play, prologue, or epilogue,—intended to be produced at any

theatre in Great Britain, must be sent to the Lord Chamberlain at least seven days before it is first acted or produced. An account of the theatre where, and the time when, it is to be acted or produced, must be signed by the manager. In the event of its being disallowed by the Lord Chamberlain, either before or after the expiry of the seven days, it must not be presented. It is lawful for the Lord Chamberlain to disallow it, if he considers it fitting for him so to do, "for the preservation of good manners, decorum, or the public peace." A fine of £50 may be levied on any person who presents a piece either before it has been allowed, or subsequent to its being disallowed, while the licence of the theatre where it was presented becomes void. The Examiner of stage plays is Mr. George Alexander Redford.

Lord Chief Justice of England. See **Russell** under **PEERAGE**.

Lord Great Chamberlain. A State office of great antiquity entirely distinct from that of Lord Chamberlain of the Household. The Lord Great Chamberlain assists, with the Earl Marshal, at the ceremony of the introduction of new peers; he issues tickets for the opening and prorogation of Parliament, and orders of admission for viewing the House of Lords when Parliament is not sitting. He arranges the preparation of Westminster Hall for a coronation, the trial of a peer, or for any other ceremony taking place therein. He walks on the right of Her Majesty when she opens Parliament in person. The office is hereditary, and at present is held by the Earl of Ancaster.

Lord Mayor. See **NEWTON**.

Lords, House of. See **PEERAGE**.

Lords of Appeal. See **JUDGES** and **PEERAGE**.

Lorenzo Marques. See **EAST AFRICA**, **PORTUGUESE**, and **TRANSVAAL** (map).

Lorne, John George Edward Henry Sutherland, Marquis of, K.T., P.C., G.C.M.G. See under **COMMONS**.

Loubet, M., President of France, was born at Marsanne on Dec. 31st, 1838. His father was a farmer there. He became a barrister, practising at Montélimar, and soon took a prominent part in public life. Indeed, he has risen step by step from the Municipal Council of Montélimar to the Presidency of the Republic, passing through the Chamber of Deputies and the Senate *en route*, and having held the offices of Prime Minister (Feb. to Dec. '92) and President of the Senate. It was the Panama affair which caused the fall of his Ministry, but he was in no way implicated. As President of the Senate he was kept more or less outside of parties, though he was known to be a Moderate with Radical tendencies. On the sudden death of President Faure, in Feb. '99, he was elected by a large majority to succeed him, and at once announced his firm resolve to uphold and defend the Republic. He is married, his wife being the daughter of an ironmonger of Montélimar. His son acts as his private secretary. His mother has reached the age of eighty-six, and still resides on the farm at Marsanne. See **FRANCE, History '99**.

Lubbock, Sir John, M.P. See under **COMMONS**.

Lunacy Bill, '99. See **SESSION**, sect. 71.

Lunacy Returns, '99. The fifty-third report of Her Majesty's Commissioners in Lunacy showed that on Jan. 1st, '99, there were, in **England and Wales**, 105,086 lunatics, idiots, and persons of unsound mind under

their cognisance, as compared with 101,972 on Jan. 1st, '98. This total was made up as follows: Of the **private class**, that is, those supported from their own or friends' resources, there were 8673, of whom 4174 were males and 4526 females. In this class there was an increase of 231 as compared with '98. Of the **pauper class**, that is, those chargeable to or maintained wholly or in part by any parish, union, county, or borough, there were 95,628, of whom 43,085 were males and 52,543 females, giving a total increase of 2868 on '98. Of the **criminal patients**, that is, those detained under orders of the Secretary of State, there were 785, of whom 599 were males and 186 females, showing an increase of 15 on the figures of '98. The **net increase** for the year was 3114. The average annual increase in the total number of lunatics for the ten years '89-98 was 2075. The recovery rate for the year ending Dec. 31st, '98, was 36.87 per cent. of the total admissions, or 1.48 below that for the previous year. Taking the total number of lunatics, the **proportion per 10,000 of the population** was 33.11 on Jan. 1st, '99, as compared with 32.48 on Jan. 1st, '98. Turning to the assigned causes of insanity, hereditary influence appeared in the report as the most potent cause, but "intemperance in drink" was put down as responsible for 22 per cent. of the male and 9.1 per cent. of the female cases. Old age was stated to account for an increasing number of cases.

The forty-first annual report of the General Board of Commissioners in Lunacy for **Scotland** showed that on Jan. 1st, '99, there were 15,399 persons (7233 males and 8166 females) of unsound mind in Scotland, of whom 2345 (1086 males and 1259 females) were maintained from private sources, 13,006 (6105 males and 6901 females) by parochial rates, and 48 (42 males and 6 females) at the expense of the State. The total increase, as compared with the previous year, was 487, 49 in the private class and 438 in the pauper class. Taking the total number of lunatics on Jan. 1st, '99, the **proportion per 10,000 of the population** was 35.2.

The forty-eighth report of the Inspectors of Lunatics in **Ireland** showed that on Jan. 1st, '99, there were 20,304 persons of unsound mind in Ireland, including 10,522 males and 9782 females, as compared with 10,127 males and 9463 females in '98. The total increase was thus 714, which was nearly double the average for the previous ten years. The main increase was in the population of district asylums. The number of the insane **per 10,000 of the population** was 44.7 in '98, as compared with 43 in '97, and 25 in '80. For **Lunacy Bill**, see **SESSION**, sect. 67.

Luxemburg. The King of the Netherlands, William III., was Grand Duke of Luxemburg until his death in Nov. 1890, when Adolph, Duke of Nassau, succeeded him. The Grand Duke was b. July 24th, 1817, and in '51 married Adelaide, Princess of Anhalt. The heir-presumptive is Prince Wilhelm, born April 22nd, '52, who married in '93 Marie Anne, daughter of the Duke of Braganza. By the Treaty of London, '67, Luxemburg is declared neutral territory. For commercial purposes the Grand Duchy is included in the German Zollverein. The Chamber of Deputies consists of 45 members, elected directly by the cantons for six years (half retiring every three years). **Area**, 998 sq. m.; **pop.** 217,583. **Capital, Luxemburg**, pop. 20,000. See **DIPLOMATIC**.

M

McCarthy, Justin, M.P. See under COMMONS.

McCormac, Sir William, Bart., M.A., M.Ch., D.Sc., President of the Royal College of Surgeons, and son of Dr. H. McCormac of Belfast, was born in Belfast in Jan. 1836, and educated at Belfast, Dublin, and Paris. In '61 he married a daughter of Mr. J. Charters, of Belfast. He was attached as surgeon to the Anglo-American ambulance in the Franco-German war, and is consulting surgeon to St. Thomas's Hospital, and surgeon-in-ordinary to the Prince of Wales. He has written a number of valuable works on surgery, including "Notes and Recollections of an Ambulance Surgeon." He was knighted in '81, and made a baronet in '97. In '99 he volunteered for surgical work in attendance on the British wounded in the Transvaal War, and went out in November, his action evoking much enthusiasm.

Macdonald, Rev. F. W., President of the Wesleyan Methodist Conference, '99, is the son and the grandson of a Wesleyan minister, and was born at Leeds in 1842. Educated at St. Peter's Collegiate School, London, and Owens College, Manchester, he was called to the ministry in '62, and served therein for nineteen years. In '81 he became Professor of Theology at Handsworth College, Birmingham, a post which he held for ten years, leaving it to act as one of the Secretaries of the Wesleyan Missionary Society. One of his sisters married Mr. Lockwood Kipling, another Sir E. Burne-Jones, and a third Sir E. J. Poynter, the present President of the Royal Academy.

Macdonald, Sir Claude M., K.C.M.G., the British Minister at Peking, is the son of Major-General J. O. Macdonald, and was b. in 1852. He was ed. at Uppingham and Sandhurst. Entering the 74th Highlanders in '72, he served through the Egyptian campaign of '82, and in the Soudan of '84, attaining the rank of major. His first active diplomatic work was done at Zanzibar as Agent and Consul-General there in '87. In '88 he was appointed H.M. Commissioner on the West Coast of Africa, and afterwards became Commissioner and Consul-General in the Oil Rivers Protectorate. He was made a K.C.M.G. in '92. In Jan. '96 he was appointed H.M. Envoy Extraordinary and Minister Plenipotentiary at Peking. See CHINA.

Macedonia. The Macedonian Committee at Sofia, in Bulgaria, sent out to the European Powers, in Jan. '99, a memorial in which their demands were stated in the form of an elaborate scheme. They declared that if European diplomacy did not soon introduce in Macedonia and in the vilayet of Adrianople reforms analogous to those given to Crete, the population would be driven in despair to resort to extreme measures. The scheme was as follows:—1. The formation of a province, with Salonika as the capital, and comprising the already existing vilayets of Salonika, Monastir, and Uskub. 2. The nomination to the post of Governor-General for five years of a person with an upright and tolerant mind, and belonging to the predominant nationality of the province. 3. The

Governor-General will administer the province with the aid of a General Assembly composed of representatives elected directly by the people, at the same time guaranteeing the rights of the minorities. This Assembly will have to give its decision on all questions relating to the internal administration of the province. 4. A sufficient and effective guarantee of personal liberty and inviolability of domicile for all the inhabitants of the province without distinction. Suppression of the Press censorship. 5. All officials will be chosen from among that section of the population predominating in the locality of their service. The high State officials will be nominated by the Sultan on the proposal of the Governor-General. The others will be appointed directly by the Governor-General. 6. The recognition of the principal languages of the province on the same footing as the Turkish language in all the provincial institutions, leaving it to the option of the administrative units to use any of these languages in their official intercourse. 7. The different Christian nationalities will organise their own schools without any interference from the Government or from any constituted body of the province. 8. The formation of a militia force recruited in the province for the maintenance of order and tranquillity. This force will be placed directly under the orders of the Governor-General. The whole of this militia will be formed proportionally to the number of inhabitants of the various nationalities, the maximum strength representing 1 per cent. of the male population. The superior officers will be appointed by the Sultan on the proposal of the Governor-General, the remainder receiving their commissions direct from the Governor-General. 9. The fixing of the Budget and the taxes of the province by the General Assembly. Twenty-five per cent. of the revenue will be paid into the common Treasury of the State for the needs of the Empire; the remainder will be employed for the needs of the province. 10. The nomination, simultaneously with that of Governor-General, of a commission *ad hoc*, on which the native populations will be largely represented, to elaborate, under the presidency of the Governor-General, the details of the reforms to be introduced. 11. A general amnesty of all the political prisoners and for all emigrants. 12. The introduction of identical reforms in the vilayet of Adrianople.

Macgregor, Sir William, K.C.M.G., C.B., son of the late Mr. J. Macgregor, was born in Scotland in 1847, and was educated at Aberdeen and Glasgow Universities, and at Berlin and Paris. He is M.D. and Hon. LL.D. (Aberdeen), Hon. D.Sc. (Cambridge), and L.R.C.P. (Edin.). After holding the posts of resident physician at the Glasgow Royal Infirmary and the Royal Lunatic Asylum, Aberdeen, he took Government appointments in the Seychelles, Mauritius, and Fiji. In '77 he was appointed Receiver-General of Fiji, and in '88 was appointed administrator of British New Guinea, being raised to the dignity of Lieut.-Governor '95. In '99 he was given the important post of Governor of Lagos. i

Mackenzie, Sir Alexander Campbell, Mus.D. St. Andrews, Cambridge and Edinburgh, was b. at Edinburgh 1847. He studied as violinist in Germany from '57 to '62, and then became King's Scholar at the Royal Academy of Music, London. His compositions of late years have been very numerous, and include many orchestral works, rhapsodies, and overtures, the last of which is "Britannia," besides works for the violin. Of these latter perhaps the best known are his "Pibroch," composed for Sarasate, his "Benedictus," a set of Scottish pieces entitled "From the North," and a violin concerto, brought out and very favourably received at the Birmingham festival of '85. Among his other compositions may be mentioned three operas, "Colomba," "The Troubadour," and "His Majesty," the two former produced at Drury Lane by Mr. Carl Rosa, and the latter at the Savoy Theatre by Mr. D'Oyley Carte. "The Story of Sayid," a cantata produced at the Leeds festival in '86, "The Dream of Jubal," first heard at Liverpool, "The Rose of Sharon," an oratorio written for the Norwich festival, "Veni, Creator Spiritus," first given at Birmingham in '91, the oratorio "Bethlehem," written for the Chicago Exhibition and first heard in England at the Albert Hall in '94, a "Scottish Concerto" for the pianoforte, and the music to "Ravenswood" and "The Little Minister," performed at the Lyceum and the Haymarket. Sir A. C. Mackenzie was elected Principal of the Royal Academy of Music in Feb. '88, and in '92 was appointed conductor of the Philharmonic Society's concerts, in succession to Mr. Cowen. Knighted '95. Address: R.A.M., 4, Tenterden St., Hanover Square, W.

M'Kinley, William, was b. of Scotch parents at Niles, Ohio, Feb. 26th, 1844, and ed. at the Poland Academy, Ohio. When the Civil War broke out in '61 he entered as a private in the Union army, and rose to the rank of major. He then entered the legal profession, and was admitted to the bar in '68, practising at Canton, Ohio. Entering the House of Representatives in '77, he soon made his mark as a zealous and able Protectionist, and ultimately became chairman of the Ways and Means Committee which framed the tariff measure known as the M'Kinley Act of '90. In November of that year he was defeated in the Congress election, but in '93 he was elected Governor of Ohio by a tremendous majority. From that date onwards he was regarded as a possible candidate for the Presidency, and his chances grew more and more favourable till he was nominated in '96. The circumstances of the contest made him practically the champion of a sound currency, his opponent, Mr. Bryan, standing on a silver and Populist platform. Consequently many Democrats voted for Mr. M'Kinley, and at the election in November he was returned by a very large majority. His term of office commenced in March '97. During '98 he had a difficult task to perform in regard to the war with Spain, but he rather strengthened his position with his countrymen than otherwise. Great discontent was felt and expressed, however, during '99, at the way in which he shielded the War Minister, Mr. Alger (who finally resigned), in the face of his proved incompetence, and General Otis, whose conduct of the military operations in the Philippines was severely criticised. Yet the November elections resulted in unexpectedly large Re-

publican majorities, the electors evidently approving the policy of the Administration.

Maclaren, Ian (Rev. J. Watson, M.A., D.D.). Born in 1850 at Manningtree, Essex, of Scottish parents, who removed to Perthshire four years later. Ed. at Edinburgh University, where he graduated '70. Studied theology at New College (Edin.) and Tübingen. Ordained minister of the Free Church, Logiealmond, Perthshire, in '75. Called to Free St. Matthew's, Glasgow, in '78. Translated in '80 to Sefton Park Church, Liverpool, one of the most important congregations of the Presbyterian Church of England. Received Hon. D.D. in '95 from St. Andrews University, and a similar degree in '97 from Yale University, where he lectured on preaching '96. Till '93 Dr. Watson was known as a popular preacher and able minister; but in that year he acquired additional distinction and wider fame by writing a series of Scottish idylls for the *British Weekly*. When collected and published in book form under the title of "Beside the Bonnie Brier Bush," they became widely popular, and have now reached a circulation of 80,000 in Great Britain and a larger figure in America. The *nom de plume* "Ian Maclaren" did not long conceal Dr. Watson's identity, and the Drumtochty of his idylls was soon identified with Logiealmond, his first charge. "The Days of Auld Lang Syne," a second series of idylls, followed in '95, "Kate Carnegie" in '96, "A Doctor of the Old School" in '97, and "Afterwards, and other Stories" in '98. Dr. Watson's religious publications include "The Upper Room," "The Mind of the Master," '96, "The Cure of Souls" and "The Potter's Wheel," '97, and "Companions of the Sorrowful Way" in '98. A Life of Christ is now in progress.

Maclaren, Rev. Alexander, B.A., D.D., ex-President of the Baptist Union, was born in 1826 at Glasgow, where his father was a merchant, and at the same time pastor of the Baptist Church in John Street. In '41 he removed with his family to London, and entered Stepney (now Regent's Park) College. Dr. Maclaren took his B.A. at London when scarcely twenty years of age, and in '46 accepted the Pastorate of Portland Chapel, Southampton, before he was twenty-one. In '58 he removed to Union Chapel, Manchester, where, after a pastorate of over forty years, he still ministers to one of the largest congregations in the North of England, and is regarded by many as one of the greatest of living preachers. He takes very little part in public questions, but wields great influence nevertheless. In '77 the University of Edinburgh conferred on him the honorary degree of D.D. In May '96, on the completion of his ministerial jubilee, an address of congratulation was presented to him by representative men of all the great evangelical denominations. In Jan. '97 his portrait was presented to the City of Manchester, and a testimonial to himself, by a committee of citizens, including leading representatives of all churches and parties. Dr. Maclaren has written several books on religious subjects. Address: Union Chapel, Manchester.

Madagascar. A large island separated by the Mozambique Channel from south-eastern Africa. Prior to '95 the Government was an absolute monarchy under Queen Ranavalona III., a French Resident controlled its foreign relations. In '95, however, France decided to make her protectorate effective.

An expedition was sent out, and the island made a French colony, with General Gallieni as Governor-General and Commander-in-Chief (Sept. '96). The Hovas are the predominant tribe, and long held the other Malagasy tribes in a condition of practical slavery. A great deal of missionary work has been done in the island, principally by the London Missionary Society, and a large majority of the natives were adherents of the Society till '95. Since then, however, it is alleged that the whole weight of French influence has been thrown on the side of the Catholic missions, and it is a fact that very many of the Mission Churches connected with and regarded as the property of the Society have been transferred to Catholic hands. The natives are terrorised into professing Catholicism, and then the church property is taken from Protestant and British hands and placed under French and Catholic control. An enormous mountain mass traverses the island from north to south. The soil on the eastern slopes is fertile, and the island has rich deposits of gold, copper, iron, and salt, and magnificent forests of valuable timber. Coal is found in the north-west; rice, cattle, hides, gum, india-rubber, wax, cotton, sugar, vanilla, lard, and coffee are exported to Mauritius, Réunion, and Europe. Climate very hurtful to Europeans, especially on the east coast, though inland it is far more healthy. Cattle herding and agriculture are the principal occupations. **Area** 228,500 sq. m., **pop.** 3,500,000. **Capital**, **Antananarivo**, a striking and well-built town, **pop.** 100,000, upon a lofty hill about two hundred miles inland. **Ports** are **Tamatave**, **pop.** 10,000, on E.; **Majunga**, on N.W., **pop.** 14,000.

Madeira Islands. A group off N.W. African coast, belonging to Portugal, and regarded as an integral part of the kingdom. **Area**, 505 sq. m.; **pop.** 134,623. **Capital** and port, **Funchal**, a fine town of 20,000 inhabitants.

Madras. See **INDIA**. For Administration see **DIPLOMATIC**.

Malacca. See **STRAITS SETTLEMENTS**.

Malaria and Mosquitoes. See **MEDICAL SUMMARY**, '99.

Malta. Anciently **Melita**. Situated in the Mediterranean, 56 miles south of Sicily. Is a British Crown colony and stronghold. With smaller islands, **Gozo** and **Comino**, **area** 117 sq. m., **pop.** 177,745, including the garrison of about 10,000. Malta itself contains about 158,000 inhabitants. **Capital**, **Valetta**, **pop.** 50,000, a fine city, impregnable fortified, commanding a noble harbour. It is a great naval station, with dockyards and arsenals, and is the seat of some commerce. Executive in the hands of a military Governor and Executive Council. The Legislative Council consists of 6 official and 13 elected members, and chooses its own president. The elected members control finance and local matters, the Governor, however, having the right of veto. The Maltese are nearly all Roman Catholics, and the Government schools, which provide free primary education for children, are Roman Catholic also. For financial statistics see **BRITISH EMPIRE** (table); and for Governor, etc., see **DIPLOMATIC**. — **History**, '99. The use of the English language in the Courts was made allowable by an Order in Council issued in March, and at the same time it was proclaimed that after fifteen years the English would be

substituted for the Italian language in all legal proceedings. The question had been discussed in the previous year, and the Order in Council had to be made because the elected members of the Legislative Council refused to pass such a measure. They petitioned against the Order, indeed, describing it as degrading to the whole population; but it was proved that the mass of the population learned English at school in preference to Italian, where a choice was given them.

Manchester, Bishop of. See under **PEERAGE**.

Manchester College, founded in Manchester 1786, now at Oxford, "exists for the purpose of promoting the study of Philosophy, Theology, and Religion, without insisting upon the adoption of particular doctrines." No subscription or doctrinal statement is required either of trustees, professors, or students. Exhibitions and free admission to lectures and classes are given to students for the ministry, without restriction as to the sect in which they will minister. The lectures are open to all members of Oxford University without payment of fees. The new buildings at Oxford, which have cost £55,000 in all, were opened by the President, Mr. H. R. Greg, in Oct. '93. **Principal**, Rev. James Drummond, M.A. (Oxon.), LL.D., D.Litt. (Dublin).

Manchester Grammar School. Founded in 1515 by Hugh Oldham, Bishop of Exeter, and others. The school consists of 160 foundationers (free) and about 600 capitation scholars, and has three main branches—classical, modern, and scientific. It is governed by a Board of Governors, under a scheme of the Charity Commissioners. The school has a number of close scholarships at Wadham and Brasenose College, Oxford, and St. John's College, Cambridge, ranging in annual value from £50 to £60. There are 23 scholarships for classics, mathematics or physical science, tenable at the Universities, ranging in value from £17 to £50 each per annum; also 29 scholarships, tenable at the school, ranging in value from £14 to £25 each per annum, together with numerous prizes. **High Master**, J. E. King, M.A., late Fellow and Tutor of Lincoln College, Oxford; **Receiver**, Owen W. Cox. **Motto**, *Sapere aude*. **Alumni**: De Quincey, Harrison Ainsworth, John Bradford (the Manchester martyr), James Bradshaw (the Jacobite), General Drinkwater, John Byrom, Prebendary Smith, Bishop of Carlisle, Dean of Manchester, Sir Frank Lockwood, Q.C., M.P.

Manchester Ship Canal. See **ENGINEERING**. **Manila.** Capital of the Philippine Islands (q.v.); **pop.** 155,000.

Manitoba. A province of the Dominion of Canada, formerly known as the **Red River Settlement**; entered the Dominion in 1870. It takes its name from Lake Manitoba, which is situated 60 miles S.W. of Lake Winnipeg. **Area**, 73,956 sq. m.; **pop.** 193,425. **Capital**, **Winnipeg** (**pop.** over 40,000), at the junction of the Assiniboine and Red rivers. The district of **Keewatin** (q.v.), formerly belonging to the N.W. Territories, is now a separate government under the Lieut. Governor of Manitoba. Climate healthy, but great extremes of temperature. Soil very fertile, and yields abundantly. The chief crops are wheat, oats, barley, flax, rye, and peas, potatoes, and roots. Large numbers of horses, cattle, sheep, and swine are

raised. Coal abounds throughout the province. Executive vested in a Lieutenant-Governor appointed by the Governor-General of the Dominion, and a Ministry, consisting of 5 members, with a Legislative Assembly, numbering 40 members, elected by districts for four years. Four members are called to the Dominion Senate, and seven elected to the House of Commons. A system of national, free, non-sectarian schools was established throughout the Province in '90; but to meet the wishes of the Roman Catholics, denominational religious teaching is allowed in the last half-hour of the school day, providing the parents are willing. For Ministry see DIPLOMATIC.

Mansfield College, Oxford. Established for the education of men for the Nonconformist ministry, but its classes are open to all persons possessed of the requisite academic qualifications. It is purely theological, and its students must, before entering on its distinctive studies, be graduates of some recognised university. It has two kinds of Scholarships: (1) Arts, value £60 a year, tenable by undergraduates, at any of the older colleges in Oxford. The men who hold these are scholars, but not students, of the College. They become the latter only after they have taken their degree. (2) Theological, value £60 a year, with tuition free, tenable during the course at Mansfield, which extends over three years. These can be held only by graduates in honours who have distinguished themselves in the entrance examination. The College buildings were opened on Oct. 15th, '89. A Settlement in connection with the College has been formed at Canning Town, E., and is called "Mansfield House." The staff of the College consists of: Principal, Rev. A. M. Fairbairn, D.D.; Vice-Principal, Mr. J. Massie, M.A.; Lecturers, Revs. J. V. Bartlett, M.A., G. B. Gray, M.A., and G. W. Thatcher, M.A., B.D.; Bursar, Rev. N. H. Smith, M.A.

Marchand, Major, was born in 1863 at Thoissey, in the Department of Aisne; and after a brief experience as clerk to a notary, he entered the army in '83. He spent some time in a military school, and was then sent to Africa, where later he so much distinguished himself. His first service was in Senegambia, and as early as '90 he was despatched on exploring expeditions to the sources of the Niger and other districts, where he did useful work. When France obtained control of French Congo she sent M. Liotard to the Upper Ubangi region to look after French interests in the north-east; and Captain Marchand, as he then was, was afterwards appointed as one of his subordinates, with special instructions apparently to push on towards the Nile. These instructions he carried out with the utmost gallantry and success, and in '98 arrived at his goal, Fashoda, after having established French posts along his route through the Bahr-el-Ghazal province. Being ordered to retire by his Government, he led his forces along a most hazardous route through Abyssinia to the Red Sea coast, thence returned to France early in '99, and was made a Commander of the Legion of Honour.

Marconi, William, electrical engineer and inventor of wireless telegraphy—whose feat on Nov. 15th, '99, in sending messages from the steamship *St. Paul* which were received at the Needles after travelling over-sea 66 nautical miles, has given striking practical

proof of the indisputable commercial value of the system to all maritime nations—was born at Marzabotto, near Bologna, in '75. His father was an Italian, his mother an Englishwoman. It was at Bologna that his system of wireless telegraphy first attracted attention. In '96 he visited England, and with his invention sent messages across the sea from Penarth, near Cardiff, to Weston-super-Mare. The Italian Minister of Marine then interested himself in Signor Marconi, who at Spezzia and elsewhere succeeded in sending messages from the shore to an ironclad ten miles out at sea. Signor Marconi has now a permanent installation working over a distance of 14½ miles, between Bournemouth and Alum Bay in the Isle of Wight, and another between Dover and Cape Grisnez. When the messages were sent from the *St. Paul* to the Needles the fog prevailing was such that no ordinary signals could have been read from any passing ship. The value of wireless telegraphy as a means of signalling from ships, lighthouses, and lightships in foggy weather is therefore obvious. Its value on land in war will probably be seen before the close of the present war in South Africa. Its adoption in the Navy seems a certainty. See WIRELESS TELEGRAPHY.

Marine Insurance, '99. See INSURANCE.

Marines, Royal. See NAVY.

Marlborough College, Wiltshire. Founded 1843, incorporated by royal charter '45, received additional charter '53. Exhibitions to Universities, one each of £50, £40, and £30 for three years, offered annually, and every three years the "Old Marlburian," £50, the Council Exhibition £30, and Leaf Exhibition £22 10s., fall vacant alternately. Also 2 Modern School Exhibitions of £25 and £20 each, offered annually. Scholarships filled annually: 15 or 16 "Foundation," for sons of clergy, £30; 3 "Senior," £40; 6 "Junior," £30; 1 "House," £80, all open; Minor Scholarships for Modern Languages, etc. Pupils, 590. Master, Rev. G. C. Bell, M.A.

Marriage Regulations. In Great Britain marriage can be had in four ways—by special licence, by common licence, by publication of banns, and before a registrar, or (as provided in the Marriage Act of '98, which came into force on April 1st, '99) some other "authorised person." The effect of the '98 Act is to enable marriages to be solemnised at Nonconformist places of worship without the attendance of a registrar. In the case of a licence, one of the parties must have resided at least fifteen days in the parish or district where the ceremony is to be performed. (1) The common licence can be obtained at the registry office of the bishop of the diocese, or from any surrogate of such bishop. One of the parties must personally apply for the licence, and make affidavit that there is no legal impediment to the marriage. The fees amount to from £2 2s. 6d. to £3 3s. The common licence fixes the time and place of the ceremony. (2) The special licence can only be obtained by one of the parties attending at the Faculty Office, Doctors' Commons. The granting of special licences rests solely with the Archbishop of Canterbury, who considers each application on its merits. On an average about 40 per annum are issued. The fees amount to about £30, and the licence empowers the parties to be married at any time, in any

place. (3) In the case of **banns**, they must be published in the church of the parish in which both parties or each of them reside for three consecutive Sundays, and the ceremony must be performed within three months of the final publication in one of the two churches, a certificate of the publication in the other church being given to the minister performing the ceremony. (4) If the marriage is to be before a **registrar**, or some other authorised person, one of the parties must give notice to the registrar of the district, in which he must have dwelt for seven days. If the parties are in two districts, notice must be given to the registrar of each district. Notice will then be placed on the notice board of the office for twenty-one days, after which the certificate issues and the marriage may be celebrated (a) at the superintendent registrar's office without a religious ceremony, or (b) in any building registered for marriage in presence of the district registrar. The fees for the marriage are 2s. to the superintendent registrar, and 5s. to the registrar before whom the marriage is solemnised, and 2s. 7d. is charged for each certificate of marriage. If desired, the presence of the registrar may be dispensed with in registered buildings, other than Church of England churches, certified to the Registrar-General as places of religious worship, and for him may be substituted any "authorised person" certified as having been duly authorised for the purpose by the trustees or other governing body of the building, or of some registered building in the same registration district. In such a case a fee of 4s. is to be paid to the superintendent registrar on the issue of a certificate for a marriage, or if the marriage is by licence an additional fee of 6s. 6d. The registrar may also issue a licence which dispenses with some of the above formalities. The fees are, for the licence, £2 4s. 6d. to the superintendent registrar, and 10s. to the registrar. All marriages, except those by special licence, must be performed between the hours of 8 a.m. and 3 p.m., in buildings with open doors. All marriages must be registered, if performed by a clergyman of the Church of England, by the clergyman, who transmits a copy to the superintendent registrar; in other cases by the district registrar, or the registering officer of the Quakers, or the secretary of the synagogue among the Jews. In Scotland the regulations for a **Regular Marriage** are very much the same as in England. The old idea that **Consent makes Marriage** has been very much altered by the necessity for the registration of the marriage, which was formerly unnecessary. But there is no marriage by special licence in Scotland. See **DIVORCE, JUDICIAL SEPARATION, RESTITUTION OF CONJUGAL RIGHTS.**

Marriages Validity Act. See **SESSION**, sect. 73.

Marriage with a Deceased Wife's Sister. Before 1533 marriages of consanguinity and affinity were wholly governed by Canon Law. Such marriages were voidable (1533-1835). In the latter year Lord Lyndhurst's Act made past marriages of affinity valid, future marriages void. The House of Commons rejected the prohibitory clause as regards marriage with a deceased wife's sister, but afterwards were persuaded to accept it temporarily. In 1847 a Royal Commission was appointed to examine the marriage laws, and from '49 up to the present

day, a period of more than fifty years, attempts have been made, both in the Lords and the Commons, to carry the Bill making marriage with a deceased wife's sister legal, but eventually they have always failed. As a rule, especially from '75 to '93, the Commons have carried the Bill by a large majority, but it has been thrown out in the Lords. In '96, however, the Bill was carried by the House of Lords, but went no further. The **Colonial Bill** passed in the House of Commons more than twenty years ago, and in the House of Lords during the session of '98, to make marriages of this class legally contracted in the colonies legal also in England, and the **Scotch Bill**, having a similar object, have also never been carried, though there are not wanting high authorities who pronounce such marriages legal in Scotland even now, without any special permissive legislation. It may be added that marriage with a deceased wife's sister has been specially legalised under the sanction of the Crown in all the Australian colonies, in Canada, Barbados, Ceylon, Mauritius, New Zealand, South Africa, Jersey, and Natal. Throughout India marriages of this kind are universally legal among all sects and creeds, except European Protestants. In all the colonies not here named they become legal in all respects on the death of the husband or wife; or, as in Lagos and elsewhere, by the sanction of the Governor, which means, of course, the permission of the Crown. In every Christian country in the world, except the United Kingdom, they are legal. The headquarters of those opposed to the existing law are the offices of the **Marriage Reform Association** (Secretary, Mr. T. Paynter Allen), 2, Dean's Yard, Westminster. Defending the law as it stands is the **Marriage Law Defence Union** (Secretary, Mr. G. J. Murray), Westminster.

Martineau, Rev. James, D.D., LL.D., D.C.L., comes of an old Huguenot family. He is a brother of the late Harriet Martineau, and was b. at Norwich 1805. Educated at Norwich Grammar School, Dr. Lant Carpenter's School at Bristol, and Manchester New College (q.v.). He entered the ministry in '28, ordained by the Dublin Presbytery of the Synod of Munster. In '32 he commenced his larger pastorate of twenty-five years in Liverpool, uniting with it after '40 the duties of Lecturer on Mental and Moral Philosophy at Manchester New College, '41. In '57 he followed the College to London, retiring from the pulpit; but in '59 he became, in conjunction (for two years) with his friend Principal J. J. Tayler, responsible for the services in Little Portland Street Chapel; succeeding to the College Principalship in '69. Many eminent men, including Lyell, were occasional or habitual worshippers at Little Portland Street Chapel during his pastorate. He retired from the ministry in '72, and from the College in '85. Dr. Martineau is a voluminous writer on ethical and theological questions, and is master of a most lucid and graceful style. Amongst the best known of his works are "Endeavours after the Christian Life," "Hours of Thought on Sacred Things," "Studies of Christianity," "The Seat of Authority in Religion," "A Study of Spinoza," "Types of Ethical Theory," "A Study of Religion" ('88), "Essays, Reviews, and Addresses" ('90). He is an hon. LL.D. Harvard, D.D. Leyden and Edinburgh, D.C.L.

Oxford, '88, and Litt. D. Dublin, '92. Address: 35, Gordon Square, W.C.

Martinique. A West Indian island of the Windward group. It is a French colony administered by a Governor with a General Council. **Area**, 381 sq. m.; **pop.** about 190,000. **Fort Royal** (or **Fort de France**) is the seat of government; **St. Pierre**, **pop.** 25,500, the principal town. It is represented at Paris by a senator and two deputies. The chief products are sugar, coffee, tobacco, and cotton. See **COLONIES, ETC., OF EUROPEAN POWERS.**

Mashonaland. See **RHODESIA.**

Massingham, H. W., editor of the *Daily Chronicle*, was b. at Catton, near Norwich, and was a pupil of Dr. Jessopp at Norwich Grammar School, of which he was the head at the time of his leaving. He early entered the journalistic profession, and after some work at Norwich on the *Norfolk News* came to London, and was appointed one of the editors of the National Press Agency. On the retirement of Mr. T. P. O'Connor he became editor of the *Star*, of which journal he was assistant editor from its foundation, and on leaving that paper proceeded to the *Chronicle*, acting as leader-writer, conductor of the literary department, and later on as assistant editor. From '92 to '95 he specially represented the *Chronicle* in the House of Commons, and was appointed to the editorship in succession to Mr. A. E. Fletcher; but resigned Nov. 25th, '99, owing to differences with the proprietors as to the policy of the paper on the Transvaal war. Mr. Massingham has also been a contributor to many magazines, and has written a book on the "London Daily Press." He is a Commander of the Order of the Saviour.

Massowah. See **ERYTHREA**, and **COLONIES, ETC., OF EUROPEAN POWERS.**

Master and Servant, Law as to. In the case of domestic servants the hiring is subject to a month's notice (from any date), or the payment of an extra month's wages (not board wages). A governess or tutor is usually entitled to three months' notice. It may generally be taken that if a servant is paid by the day, week, or month, he is entitled to a day's, week's, or month's notice. A servant may, however, be dismissed without notice or compensation for (1) being absent without leave, (2) utter incompetency, (3) wilful disobedience to reasonable orders, or (4) gross moral misconduct. The death of the master puts an end to the hiring. A master is not bound to give a character to a servant, but if given it must be truthful, and if given *bonâ fide* it is privileged, and not actionable. A master is liable for the acts of his servant, as, for instance, where a coachman, through careless driving, causes damage to another person or their property, though he would not be liable if the servant were acting without his knowledge or authority. Apart from special arrangement, a servant cannot be compelled to pay for accidental breakages. A master is not liable for any medical attendance unless he actually authorises it. See **LAW, '99.**

Matabelerland. See **RHODESIA.**

Mauritius. An island in the Indian Ocean 500 miles east of Madagascar, 2000 miles from India, and 2300 from the Cape. It is a British Crown colony. **Area**, 705 sq. m.; **pop.** 378,041, including a large proportion of Hindus. The

island is divided into nine districts. Capital and chief port is **Port Louis** (**pop.** 56,000). A Governor presides over the administration, which is conducted by Executive and Legislative Councils. Of the Executive Council of 7 members 5 are official and 2 elected. Of the Council of Government, numbering 27 members, 8 are *ex-officio* members, 9 nominated by the Governor and 10 elected. The capital is strongly defended, but the former large garrison is reduced to 950. There is now a constabulary of about 850. French is spoken all over the island. There is a Royal College, and also many Government and other schools. The chief products are sugar, rum, vanilla, aloe, fibre and oil. An Imperial loan of £32,820 was advanced under the Colonial Loans Act '99 for the purpose of various public works urgently required. Dependent appanages of the colony, under the administration of its governor, are various groups in the Indian Ocean. The **Seychelles**, **Rodrigues**, the **Amirantes**, the **Oil Islands**, including **Diego Garcia** and the **Chagos group**, and **St. Brandon group**, are the chief of them. Their total area is about 350 sq. m.; **pop.** 17,000. For financial statistics see **BRITISH EMPIRE** (table); see also **DIPLOMATIC.**

Mayotte. See **COMORO ISLANDS.**

Medical Association, British. See **BRITISH MEDICAL ASSOCIATION.**

MEDICAL SUMMARY, '99.

The epidemic of plague has continued during the year, and as the disease has now obtained a foothold so far west as Oporto, it may be said to have assumed the proportions of a pandemic. Bombay has maintained its sinister reputation as the chief focus of the disorder. In Nov. '98 the disease was tending to become epidemic in the south of India, whilst only a few sporadic cases indicated its presence to the north of Bombay. It was very severe in the city of Bangalore; it had increased in the Mysore State, and a few cases were reported in the Central Provinces, which had hitherto escaped. By the end of the year, however, the plague was generally less everywhere. In Jan. '99 the virulence of the disease in the Bombay Presidency was reported as abating; it was abating in the large cities of the Mysore and Hyderabad States, but was spreading rapidly through the country districts. In the Madras Presidency it was nowhere widely spread. At the end of that month, however, the disease began again to increase in Bombay city, and in February the authorities pronounced it to be again epidemic, for the fourth time. The mortality from plague in Bombay during the first year of the epidemic was 27,597, in the second 25,958, and in '99 up to March 18,503 deaths had occurred, making a total of 72,058. In March the daily plague mortality in Bombay was 150. In Mysore State a panic occurred among the coolies at the gold mines, owing to an outbreak of plague, and a recrudescence was announced at Poona, there being 100 cases in hospital at the beginning of April. During the week ending April 1st there were 2689 deaths from plague in India: 992 of them occurred in Bombay city, and 1051 in the Presidency. In Karachi there were 213 deaths; in Calcutta, 191; in the Mysore State, 108; and in the Madras Presidency, 54; in the Hyderabad State,

34; in the Pargunnahs district of Bengal, 24; in Durbhangee, 13; and in the Punjab only 5. In April the death rate fell still further, and with the commencement of the rainy season the plague declined generally throughout the country. By the beginning of July there were still from 10 to 20 fresh cases of plague daily in Bombay, but the general death rate of the city had fallen to the normal figures. The disease never died out entirely, from 10 to 20 fresh cases being stated to occur daily in September—in the week ending Sept. 10th, *e.g.*, there were 89 deaths from plague. In July the plague began rapidly to increase in Poona, where on the 23rd there were 110 cases and 82 deaths. A general exodus of the population took place, and on July 28th the state was alarming, there being 151 cases and 121 deaths, including 4 Europeans, of whom 3 were ladies. At the beginning of September a very virulent form of plague was raging in Poona. About the middle of this month there was an extraordinary and sudden drop in the number of cases, and though they increased again afterwards, the epidemic had passed its height; so that at the end of October it was stated there was a slight increase in all plague-infected centres, except in Poona city and in the Belgaun and Surat districts. At this time the death rate from plague in the Bombay Presidency averaged from 4500 to 5100 weekly. In the Indus Valley the virulence of the plague appeared to be increasing. In Calcutta, where the last plague-death had occurred on Sept. 19th, '98, a suspected case was announced on Jan. 14th, '99, and by April the disease was again well in evidence, though by July not more than half a dozen were occurring daily. During the week ending Sept. 16th, however, 44 deaths from plague were registered, and for the first week of October they numbered 57.

In December '98 an official statement was made that in **Madagascar**, between Nov. 26th and Dec. 2nd, there had occurred 38 cases of plague with 18 deaths. Peculiar interest attaches to this outbreak, as it is the first recorded instance of the occurrence of plague to the south of the Equator. By the beginning of February there had been 285 cases, with 195 deaths; shortly after the epidemic declined. From the island of **Mauritius** it was announced in February that a case of true bubonic plague had occurred at Port Louis in a dock labourer. An epidemic followed; in the first week of July 30 cases occurred, of which 24 proved fatal, there having been in the preceding week 13 new cases of which 12 died. The corresponding numbers for the first week of August were 52 and 37 respectively, and for the week ending Oct. 12th, 63 and 47. In July it was officially reported that 2 deaths from plague had occurred in the neighbouring island of **Réunion**. About the same time the German Imperial Board of Health announced that "plague" was endemic in **German East Africa**, around Bukoba and Kitengule (*Brit. Med. Journ.*, July 29th). In September 12 cases believed to be plague were reported from **Portuguese East Africa**. In November plague was officially declared to be present at Lorenzo Marques, the port of Delagoa Bay (*Brit. Med. Journ.*, Nov. 18th, '99). In August it was reported from the Gold Coast that "a fatal type of sickness," supposed to be bubonic plague, was prevalent in the French possessions. Meanwhile the epidemic had begun its progress towards the west. A *Times* telegram from

Teheran stated that 2 cases of plague had occurred at Bushire and that the place was declared infected, and on July 9th a telegram from Bombay stated that the disease continued to spread. In March plague was officially declared to have broken out at Jeddah, the first case being recognised on Feb. 22nd, and the authorities at Alexandria declared quarantine against arrivals from that port; 36 deaths occurred at Jeddah in the four weeks ending March 21st. A case of plague is said to have occurred at Mecca on March 6th in a Bokharan pilgrim who had arrived from Jeddah, and on April 12th two new cases were reported from the holy city. Beyond these doubtful instances, the Mecca pilgrimage appears to have passed off without an outbreak. From **Egypt**, where the Khedive had refused to stop the annual pilgrimage to Mecca, came on May 21st the official announcement that a case of plague had died in Alexandria on May 17th; three more cases were soon after reported, and it is worth noting that the two patients first attacked were Greeks. Energetic measures were taken by the authorities, and a special sanitary force of 800 men was employed. The disease never spread beyond Alexandria. From May 4th, the date of the first known case of plague in Alexandria, to June 3rd, there had been 10 cases and 2 deaths. From June 4th to 10th there occurred 12 cases and 5 deaths. For a period of four days from June 2nd to 5th there were no cases, and hopes were entertained that the disease had been stamped out. On June 5th 4 cases occurred, one being in a hospital attendant, the remaining 3 cases coming from quarters of the town not hitherto attacked. There was no excitement and no exodus from the city. The disease was relatively mild; up to July 19th there had been a total of 74 cases, with 32 deaths, 33 recoveries, and 9 cases still under treatment. There was then a short interval, but new cases cropped up in August. Up to Aug. 27th there had been a total of 83 cases, with 42 deaths; the last case left hospital on Sept. 17th, there having been 89 cases, with 46 recoveries. On September 23rd two fresh cases occurred, there having been no deaths or new cases since Sept. 2nd. The total number of cases up to Oct. 1st, after which date no more occurred, was 92 with 47 recoveries.

At the beginning of July, 9 Spanish sailors were landed at **Oporto** and conveyed to hospital, where 7 of them died; though their disease was pronounced to be plague by many of the doctors who saw them, there was a reluctance at first to admit that the plague had found its way to Western Europe; but in the next month its existence was officially notified, and by some was attributed to packages landed from Bombay. At this time there had been 26 cases and 11 deaths. A military cordon was established round the city, but does not seem to have been very efficient in its action; cases were said to have occurred in neighbouring villages. By the end of September there had been 75 cases, with 30 deaths, and by Oct. 3rd they amounted to a total of 138 cases, with 44 deaths. The theatres and public halls were closed; the populace believed that the disease was the invention of the doctors, and mobbed them on their rounds. Cases were still occurring at the end of October.

During the first half of March, 10 deaths from plague occurred in **Hong Kong**: this month marking the fifth year during which plague

had prevailed in the colony. In the third week of May 87 fresh cases occurred and 70 deaths; in the first week of July there were 142 new cases, and 144 deaths; the total up to June 1st having been 567 cases, with 507 deaths. In July a slight abatement set in with the heavy rains, but the weekly number of cases still exceeded 100; at the end of the month these dropped to 30, and by the beginning of September to half that number; and in the week ending Oct. 7th there were only 2 new cases and 2 deaths. The total cases reached 1500, with 1400 deaths. From Shanghai it was reported in August that 73 deaths from plague had occurred in four days at Newchwang, in Northern China; the nearest infected port is Amoy, 1500 miles distant. It is probable that the disease was imported by Chinese coolies, of whom 30,000 were working on the Siberian Railway between Talien-wan, Newchwang, and Mukden. In the Straits Settlements, a few cases of plague occurred in the island of Penang owing to the importation of 1500 coolies from China in the middle of May. At Samarkand, where it made its appearance towards the end of '98, the plague was said to be dying out in Feb. '99, after carrying off an enormous number of people. There appears to be some reason for supposing that the disease may have reached this district from India through Thibet. In July '99 pneumonic plague broke out in the province of Astrakhan, at the village of Kolobooka, which was rigidly isolated; the disease died out early in September. Its origin was not ascertained. At the beginning of November it was reported from Rio Janeiro that 13 cases of plague had occurred at Santos, and one at San Paulo, a town fifty miles inland from Santos. Thus it would appear that plague has really reached the American continent for the first time; and it is to be feared that in the filthy cities of South America it may find only too congenial a home.

Statistics as to plague mortality in India from '96 to Feb. 1st, '99, show the numbers attacked during this period. In Bombay city during '96 there were 2507 seizures; in '97 they amounted to 11,963; and in '98 (and Jan. '99) to 21,711, making a grand total of 36,381. The only district which exceeded Bombay city was that of Dharwar, where 36,459 seizures were reported during the same period. The numbers in other towns and districts were as follows:—Satara, 26,000; Belgaun, 23,000; Kolhapore State, 13,000; Poona, 9397; while other states and districts in the Bombay Presidency show 50,000 cases. In other parts of India the numbers of seizures have been as follows:—Karachi City, 668; Sind Districts, 2000; Jullundur (Punjab), 2591; Hoshiarpore, 937; Saharanpur (North West Provinces), 275; Wardha District (Central Provinces), 163; Madras Districts, 1000; Hyderabad State, 5000; Sirohi State (Rajputana), 117; Mysore State, 9000 (Bangalore city and cantonment accounting for 7167 of the number). Of this total, which in round numbers may be taken at 225,000, at least 200,000 have died according to the official returns (*Brit. Med. Journ.*, April 8th, '99). The Special Plague Commission began its sittings at Bombay on Nov. 29th, and subsequently examined numbers of experts and other witnesses in the various towns and districts affected. An important paper by Professor Haffkine on his method of preventive inoculation for plague, read before the Royal Society,

is reported, together with the discussion, in the *British Medical Journal* for July 1st, '99.

The **British Medical Association** met at Portsmouth on Aug. 2nd, under the presidency of Dr. Ward Cousins. The address which excited most attention was that of Professor Ogston, on "The Medical Services of the Army and Navy." After pointing out that during the last three decades the medical services of the Army and Navy had increasingly failed to attract the best men from the medical schools, as had been admitted by the Secretary of State for War, the professor went on to point out that the enormously improved methods, both of medicine and surgery, and especially the latter, demanded improved equipment for the medical service, and opportunities for practice and improvement to be given to the members, equal to those enjoyed by civil practitioners. "More than the Army," he said, "the Navy requires the touch of a reformer's hand. I should be sorry to use any word that may give needless offence, but am forced to say that, even on board the most modern ships of war, a comparison of their surgical outfit and arrangements with the varied *armamentarium* and the conditions of work of the civil surgeon tends to evoke a vision of the Knight of La Mancha, equipped in his great-grandfather's suit of armour." Though admitting the difficulties, he demanded that adequate and properly equipped operating space should be contrived, and better arrangements for lowering the wounded from the deck. Going to the question of reform, he pointed out that in the German, Russian, and French armies ample provision is made for "post graduate" study by the medical officers. He suggested that a section for military and naval surgery should be created in the Association in order to elicit the interest of civil practitioners, and that professional influence should be brought to bear to secure "that organisation and equipment may be modernised." But the "best claimant of all reforms was provision for the proper instruction of officers in their war duties"; the development of military and naval hospitals was of vital importance. Further, Professor Ogston urged that every fleet should be provided with fast unarmed steamers, under the Red Cross flag, completely fitted with the best hospital appliances. He combated the idea that deficiencies in the medical services could be compensated by engaging civil aid (*Brit. Med. Journ.*, Aug. 5th, '99). An interesting paper was read by Dr. G. Nuttall on the "Part played by Insects, Arachnida, and Myriapoda in the Propagation of Infectious Diseases of Men and Animals" (*Brit. Med. Journ.*, Sept. 9th). Dr. Sutherland pleaded "The Urgency of Legislation for the Well-to-do Inebriate."

An important **International Congress on Tuberculosis**, under the patronage of H.I.M. the German Emperor, was held in Berlin, in the Chambers of the Reichstag, from May 23rd to 27th. There were 180 delegates appointed by and representing different States and Universities and other public bodies. The report of Sir Herbert Maxwell, M.P., F.R.S., and Dr. Pye-Smith, F.R.S., the delegates of Her Majesty's Government, was published as a Parliamentary paper. In the papers and discussions, emphasis was laid on four aspects of the question of the prevention of the disease, which should be widely known to the public:—

1. The primary importance of free ventilation, and wholesome and abundant food. 2. The prevention of infection of the lungs by the bacillus of tubercle depends chiefly on rational treatment of the sputa of consumptive patients, or rather, for practical purposes, of the sputa of all those affected with cough and expectoration. The phlegm should never be deposited on the ground or a handkerchief, where it can dry up: it should be kept moist until it can be destroyed by heat, and the vessel used to receive it should contain carbolic acid or some other antiseptic solution. 3. The prevention of infection by tuberculous milk may be accomplished either by boiling all milk given as food to children, or by inspection of dairies, so as to prevent tuberculous milch cows being used. 4. The prevention of infection by meat can be secured by careful and thorough inspection of carcasses, or by diagnostic testing of cattle with tuberculin (*Times*, July 13th; *Brit. Med. Journ.*, May 27th and June 3rd). Numerous meetings under distinguished auspices have during the year been held in many of the chief towns of the kingdom in aid of the national movement for the prevention of tuberculosis, and also for the establishment of local sanatoria for the open-air treatment of the disease. Similar movements are on foot in almost every civilised country.

The sixth International Otological Congress was held in London in August, under the presidency of Professor Urban Pritchard. The proceedings were entirely technical, but afforded proof of the progress that is being made in the study of diseases of the ear. The eighteenth Congress of the Sanitary Institute was opened at Southampton on August 29th; 2000 members were present. The Council was recommended to urge the Government to undertake a scheme for the reduction of the prevalence of bovine tuberculosis. In September a Conference of Social Hygiene was held at Brussels. It was attended by representatives from most European countries, among them being some of the leading authorities in syphilology, notably Professor Fournier, of Paris, and Mr. Jonathan Hutchinson. A resolution, moved by Professor Fournier, was unanimously adopted calling upon the various Governments to exert all their powers to suppress prostitution among women under age.

The report on Lead Poisoning in the Potteries presented to Government by Professors Thorpe and Oliver was issued in February. It appears that in many potteries, carbonate of lead is used in an unscientific and wasteful manner. The report recommends that a double silicate of lead should be used, and points out that for seven-tenths of the total output of wares, leadless glazes can be used. Of the 50,000 to 60,000 people employed in the Potteries it is estimated that 4700 work in the lead. During three years (1896-98), it is stated that 1085 people suffered from lead poisoning. In '98, of the total male workers 4·9 per cent suffered, while the percentage in females rose to 12·4. Drs. Thorpe and Oliver recommend that young persons and women should be excluded from certain branches of work, and that the males employed therein should be subjected to systematic medical inspection. There was a limited outbreak of small-pox in Hull in the spring; in 37 cases there were 7 deaths; the

fatal cases, with one exception, were unvaccinated (*Brit. Med. Journ.*, May 20th, '99).

The connection between malaria and mosquitoes was referred to under this heading in the '99 edition. Much work has since been done, owing to the impetus given by Major Ross's brilliant discoveries. Professor Celli, in an interesting report presented to the Italian Society for the Study of Malaria, stated that a man named Sola (who had never had malarial fever) was exposed to the bites of three species of mosquito (*Anopheles claviger*, *Culex penicillaris*, and *Culex malariae*), after he had been bitten in vain by other mosquitoes. This experiment lasted from Sept. 28th to Oct. 21st. On Nov. 1st, Sola was seized with grave malarial fever, of which he was perfectly cured by means of quinine; in his blood were found parasites of the æstivo-autumnal species. The attendant who went to capture the three above-mentioned species, and which he captured as they bit him, was meanwhile infected with the æstivo-autumnal fever (*Brit. Med. Journ.*, Jan. 14th, '99). Grassi states that the grey mosquito which Ross has proved to be the propagator of the malarial parasite of birds in India is identical with the *Culex pipiens*, and Ross found that the parasites of malarial fever in man do not develop in the body of this species. Grassi and others have observed the cultivation of the crescent-shaped bodies of malarial fever of man in the body of *Anopheles claviger*, and the same species has also been shown to be the host of the spring tertian parasites. This mosquito is widely diffused in Europe, occurring in Scandinavia, Austria, Germany, Russia, Italy and the adjoining islands, and it was described in '25 as existing in England. It and its allied species occur in the United States. In a lecture at Liverpool (*Brit. Med. Journ.*, July 1st, '99) Major Ross expressed his belief that it would be possible to deal preventively with malaria by exterminating the larvæ of *Anopheles*, as this species only breeds in isolated pools, and scarcely ever in large bodies of water, as these contain fish which devour the larvæ. On July 31st, an expedition for the investigation of malaria, under the direction of Major Ross, left Liverpool for Freetown, Sierra Leone. The work done was of great importance; it was proved that the parasite of quartan ague can be cultivated in *Anopheles*, thus demonstrating that this is an intermediary host for all known malarial parasites of man. An epidemic of malaria among the West Indian troops in the barracks, where *Anopheles* abounded, afforded ample opportunities of investigation. The breeding pools of the insect in the town were discovered by the members of the expedition. Either by drainage of the pools, or by the more temporary expedient of spreading a film of kerosene oil over the surface, it is possible to destroy the larvæ. This rapidly accumulating evidence is strengthened by the result of an interesting experiment by Grassi. He and a family of seven persons passed eight consecutive nights in a cottage in a notoriously malarious district near Rome, in rooms where the entrance of mosquitoes was prevented by a covering of perforated zinc over the open windows. Though they therefore breathed the night air, and in addition drank of the local water, they all escaped infection, "while at the same time several persons sleeping only a hundred

mètres away from the cottage, and not protected in the same manner, were taken ill with the disease." The recently recognised importance of the various tropical diseases has led to the formation of two special schools for their study. The Liverpool School of Tropical Medicine was formally opened by Lord Lister on April 22nd; whilst on May 10th Mr. Chamberlain presided at an important banquet at the Hotel Cecil, to promote the establishment of a London School of Tropical Medicine, the total subscriptions received in connection with the festival being £15,800.

Melba, Madame. Operatic vocalist, b. Australia, May 10th, 1865. At six sang ballads to her own accompaniment at a charitable concert. Studying under Madame Marchesi in Paris, she made her stage *début* Oct. 15th, '87, in "Rigoletto," at Théâtre de la Monnaie, Brussels. Next year appeared as Lucia at Covent Garden. In '89 played Ophelia at Paris Grand Opera," and Juliet in London. For her Bemberg specially wrote "Elaine," produced in London in '92. She sang in "Pagliacci" at Covent Garden '93, and in the Handel Festival '94, while she has taken a prominent part in recent opera seasons. Her private name is Mrs. Armstrong, and she resides at Paris.

Méline, Félix Jules, was b. at Remiremont, in the Vosges, 1838. After completing his studies he joined the Paris bar, and entered the Chamber in '72, being appointed Under Secretary of State for Justice in '76. He took office under M. Jules Ferry in '83 as Minister of Agriculture, and became President of the Chamber in '88. After that he was chosen chairman of the Tariff Commission, on which his strong protective opinions had great weight. He is a member of the Moderate Republican party, and after the fall of M. Bourgeois successfully undertook the task of forming a "Conciliation Cabinet" (April 28th, '96), which held together for more than two years, but fell in '98. He was an unsuccessful candidate for the Presidency on the death of President Faure in Feb. '99.

MERCANTILE MARINE OF THE WORLD.

The total number of steamships and sailing vessels in the world, of 100 tons register and upwards, according to Lloyd's Register of British and Foreign Shipping, was 28,180, and their estimated tonnage about 27,673,528, from July 1st, '99, to June 30th, 1900. The number of such ships belonging to the different countries in the world is given in Table A. The number of sailing vessels of all countries is 12,856, with a net tonnage of 6,795,782 tons. These are given in Table B; and the number of steamships in the world, which is 15,324, having a gross tonnage of 20,877,746, is given in Table C.

Statistics of Shipbuilding at Home and Abroad for '98.

During '98, exclusive of war-ships, 761 vessels of 1,367,570 tons gross (viz., 744 steamers of 1,363,318 tons, and 17 sailing vessels of 4252 tons) were launched in the United Kingdom.

As regards the materials for their construction, 99 per cent. of the steam tonnage was built of steel, and 1 per cent. of iron. The iron steam tonnage is practically made up of trawlers, and includes no ship of more than 225 tons. The output of the year in the United Kingdom has surpassed all earlier records. Sailing tonnage has only formed 0.3 per cent. of the output. In '92 sailing vessels formed 24 per cent. of the output. Of the total output 1,037,775 steam tons and 3,867 sailing tons, or 1,061,642 tons in all, being nearly 78 per cent., belong to ports in the United Kingdom. The losses, etc., of United Kingdom ships during '98 average 276,000 tons, consisting of 194,000 steamers and 82,000 sailing vessels. Sales of ships to foreign and colonial owners for the twelve months ending Oct. '98 amounted to 563,000 tons (426,000 steam and 137,000 sail). On the other hand, the purchases during the same period from such owners amounted to 104,000 tons (100,000 steam and 4,000 sail). The sailing tonnage of the United Kingdom therefore appears to have decreased by about 211,000 tons, while the steam tonnage has increased by

538,000 tons. The net increase of United Kingdom tonnage during '98 is therefore about 327,000 tons. This tonnage exceeds the similar estimate for '95, '96, and '97 by 198,000 tons, 110,000 tons, and 279,000 tons respectively. Rather over 22 per cent. of the total output was built to the order of foreign and colonial ship-owners in '98, as compared with 30 per cent. in '96 and 25 per cent. in '97. Denmark in '98 provided the largest amount of work for British shipbuilders, 22 ships of 44,691 tons (3·2 per cent. of the total output) having been built for that country. Sixteen ships were built for Norway of 44,338 tons; afterwards come Russia with 33,330 tons; Germany with 37,045 tons; and Japan with 30,191 tons. The largest steamers which have been launched in the United Kingdom during '98 were the *Africa* and *Medic*, each of 11,850 tons, *New England* (11,394 tons), *Statendam* (10,475), *Omrah* (8,300), and *Ultonia* (8,056). Except the *Inverclyde*, of 1,634 tons, no sailing vessel of considerable size was launched in that year.

The following table shows the ships launched in the principal shipbuilding districts of the United Kingdom during '98:—

Total for Colonies and Foreign Countries		371	415,907	158	109,866	529	525,773

The returns for '98 include 201 steam trawlers and other fishing vessels, 20 dredgers, barges, etc., 24 yachts, 36 tugs, 6 vessels designed to carry oil in bulk, and other vessels for special service. Of the vessels launched in the United Kingdom, 654, of 1,131,237 tons, have been built with the view to classification in Lloyd's Register Book, under the Society's inspection.

Concerning the movements of the shipbuilding industry during '98, the total tonnage under construction in the United Kingdom, exclusive of war-ships, on Dec. 31st exceeded by about 387,000 tons, or over 38 per cent., of that building twelve months previously. The increase is wholly in steam tonnage. The sailing tonnage in progress is now entirely insignificant.

Table D shows the number and tonnage of ships over 100 tons under construction at colonial and foreign ports in '98, according to

the latest authentic returns. This table notifies that there have been built abroad during that year 371 merchant steamers of 415,907 tons, and 158 sailing vessels of 109,866 tons. If to these figures those for the United Kingdom are added, the total output of merchant ships of the world during '98 has been about 1,893,000 tons (1,779,000 steam and 114,000 sail). Lloyd's Register Wreck Returns show that the tonnage of all nationalities totally lost, broken up, etc., in '98 amounted to about 733,000 tons (328,000 steam and 405,000 sail). It will consequently be noticed that, while the sailing tonnage of the world has been reduced by 290,000 tons in '98, the steam tonnage has been increased by about 1,450,000 tons. Therefore the net increase in the world's mercantile tonnage is 1,160,000 tons. Of this total the net increase of the tonnage in the United Kingdom is equal to 28 per cent.; but of the new

tonnage launched, the United Kingdom has acquired about 56 per cent. Among foreign countries the three nations which have built the most ships are the United States of America, which produced 173,000 tons, Germany 153,000 tons, and France 67,000 tons. Of the mercantile tonnage reported from the United States, nearly half of such does not affect the general commerce of the world, as such portion is either intended for service on the great lakes of North America, or for local service on the Pacific coast. As showing the size of vessels employed on these lakes, it may be stated that six steamers have been built for this trade in '98 of upwards of 4000 tons each, in addition to five sailing barges over 3,000 tons each. Two of the latter approach 5,000 tons. Germany has launched the *Graf Waldersee* of 12,800 tons, and the *Bulgaria* of 10,237 tons, as well as five other steamers of more than 5000 tons. In France the building of large sailing vessels, which has almost been abandoned elsewhere, has continued to flourish under the influence of the bounties granted by the State. Twelve of such ships of 2,000 tons and upwards were launched in '98. The largest of these, and also the largest sea-going sailing vessels built in the world during the year, are the *Emilie Siegfried* and the *Ernest Siegfried* of 3214 tons each. Both have been built at Havre under the supervision of Lloyd's Register. No expansion of the like kind has been made in the construction of steamers in France. In Italy the mercantile output of the year has only been about 26,000 tons, but much larger figures may be expected in '99. The returns of ships now in progress or contracted for amount to about 90,000 tons, as compared with only 34,000 tons at the end of '97. Italy is another country in which the shipbuilding industry is affected by

the operation of the bounty laws. At the close of the quarter ending Sept. 30th, '99, the ships under construction in the United Kingdom (excluding war-ships) were 558, of 1,347,549 tons, of which 533 were steam, with a tonnage of 1,342,385, and 25 sail, with a tonnage of 5164.

Ships Entered and Cleared in '98 at United Kingdom Ports.

Below will be found statistics as to the total number and tonnage of ships which entered and cleared with cargoes and in ballast at United Kingdom ports in '98. (a) From and to foreign countries and British possessions and coastwise:—Entered: British ships, 327,377, with a tonnage of 85,132,533. Of these 91,547, having a tonnage of 7,665,950, were sailing vessels, and 235,830, with a tonnage of 77,466,583, were steamers. The number of foreign sailing vessels that entered was 10,651, having a tonnage of 3,302,566; and the number of foreign steamers 20,002, having a tonnage of 12,112,274. The number of ships which cleared were: British sailing vessels, 89,908, of 7,588,084 tons, and British steamers 234,798, of 77,228,661 tons; foreign sailing vessels 10,524, of 3,219,743 tons, and foreign steamers 19,877, of 12,264,195 tons. (b) Coastwise:—Entered: 293,285 ships, having a tonnage of 55,422,029. Of these 89,185 were sailing vessels, having a tonnage of 6,621,776, and 204,100 steamers, with a tonnage of 48,800,253. The ships cleared numbered 290,688, with a tonnage of 54,462,061, of which 87,460, with a tonnage of 6,507,391, were sailing vessels, and 203,222 were steamers, of 47,954,670 tons.

Registered Ships in the Home and Foreign Trade of the United Kingdom.

The total number and tonnage of the registered ships of the United Kingdom, Isle of Man, and Channel Islands used in the home and foreign trades and in fishing, and the number of persons employed therein in '98, are given in the following table:—

	Number.	Tonnage.	Persons employed.		
			British.	Foreign.	Total.
Sailing vessels	8,108	2,312,696	48,212	10,894	59,107
Steam	7,099	6,768,032	126,768	24,414	151,182
Total	15,207	9,080,728	174,980	35,308	210,288

Ships Lost, Condemned, etc., in '98.

Table E (on opposite page) shows the number, tonnage and nationality of steam and sailing vessels totally lost, condemned, etc., during '98, of 100 tons register and upwards. Of the 1141 ships lost, 96 were abandoned at sea; 224 were broken up and condemned; 25 were burnt; 54 foundered; 25 were lost; 103 were missing; 90 were lost by collision; and 524 were wrecked.

Merchant Ships as War Auxiliaries.

Liberal subsidies have been given for the encouragement of building ocean steamships capable of being converted into cruisers during

war by Great Britain, France, Germany, Italy, and the United States. Table F, on next page, gives a list of the reserved merchant steamers held by the owners for the use of the British Admiralty.

The special ships in respect of which the owners receive an annual subvention are the *Campania* and *Lucania* of the Cunard Line; the *Majestic* and *Tenonic* of the White Star Line; the *Himalaya*, *Australia*, *Victoria* and *Arcadia* of the P. & O. Company, and the *Empresses* of the Canadian Pacific Railway Co. According to the *Navy List* the first four of them have a speed of more than 20 knots, the first two P. & O. liners 18 and the two latter 16½, and the *Empresses* 17. The remaining steamers

Ocean Speed Records.

As regards the very fast speed of ocean steamers, no records were made in '98 except by the *Kaiser Wilhelm der Grosse* of the North German Lloyd's Line, as will be afterwards particularised. The most noteworthy speed records are those between Queenstown and New York, Southampton and New York, and

Havre and New York. The record passages across the Atlantic, which were on the first-named route, have been made by the *Lucania* and *Campania*, of the Cunard Company. The fastest voyage made by the *Lucania* was at the rate of 22'01 knots per hour throughout her passage, early in '95. The *Campania* made the fastest eastward voyage, in 5 days 9 hrs. 18 mins. One day's run of 562 knots was made by the *Lucania*. On the Southampton route to New York by far the best record has been made by the *Kaiser Wilhelm der Grosse*, of the North German Lloyd's Line. In September '97, and on her last complete twenty-four hours' steaming, she beat the world's record for a day's run, which was previously held by the Cunarder *Lucania*, and which made a daily run westward of 562 knots, the next best being the daily run of 558 knots in the same direction by the *Campania* of the Cunard Line. This record run by the *Kaiser Wilhelm der Grosse* on the Southampton route was performed in 5 days 22 hrs. 30 mins., at an average speed of 21'39 knots. The distance traversed was 3050 knots. The best previous run between the same points was 6 days 31 mins., made in August '96 by the American liner *St. Paul*, built by Messrs. Cramp in Philadelphia, and the average speed on that performance was 21'08 knots per hour. In November '97 this German steamer was driven between New York and Southampton in 5 days 17 hrs. and 8 mins. Although on the Queenstown and New York route the *Lucania* and *Campania* have made better average speed than this German liner, the highest being 22'01, it is stated in an article in *Engineering*, published on Oct. 1st, '97, that the possibilities of this new German ship "are clearly indicated by her daily runs. From noon to noon on successive days she made 531, 495, 512, 554, and 564 nautical

miles, the last being the longest distance then travelled by any ship in one day. Allowing for the lengthened day owing to the ship chasing the sun, this day's run is well over 22½ knots, so that there is no reason why she should not yet take several hours off her performance, and make the trip from London to New York . . . of shorter duration than the trip *via* Liverpool or Queenstown." Again in '98 she was the only ocean steamer which made a record in that year important enough to be publicly notified. This was her propulsion between Southampton and New York, in August '98, a distance of 1609 knots, in three days, at an average speed per hour for this period of 23½ knots, thus beating all previous records for long-distance steaming. The fastest day's run was made by this steamer in May '98, which was 580 knots in 24 hours. In '99 her fastest speed on the eastern voyage was 22½ knots per hour in July. Her highest speed on the western voyage, in March last, was 22½ knots per hour. On the Havre route the best record ever made was by the twin-screw steamer *La Touraine*, of the General Transatlantic Line, the fastest steamer in the French mercantile marine, in '92, when she ran from Havre to New York in 6 days 17 hrs. 51 mins., at an average speed of 19½ knots an hour. The shortest time in which the voyage has been made to Australia is, including all detentions, 33 days 4 hours from London to Adelaide, by the *Victoria* of the P. and O. Line, in '88. She did not call at Plymouth, but the time is equivalent from Plymouth to Adelaide in 32 days 12 hrs. 45 mins. In October '88 the *Ormuz* of the Orient Line was propelled from Plymouth to Adelaide in 33 days 2 hrs. 11 mins., but as she appears to have been detained at Suez for mails twice as long as the *Victoria*, it is evident that her steaming time to Australia was shorter than that of the P. and O. liner, and therefore she is entitled to the credit of making the fastest voyage under steam to the Antipodes. On the Cape route the *Scot* of the Union Line was driven in '94 from Southampton to Cape Town in 14 days 11 hrs., and from Cape Town to Plymouth in 13 days 23 hrs. These voyages are the shortest made on the Cape route. The *Carisbrook Castle* of the Castle Line, in her voyage from the Cape to Southampton occupied 14 days 11 hrs. 13 mins., being the fastest voyage for that line, and only 13 minutes longer than the *Scot*.

Mail Records to India, China and Australia.

Some very rapid arrivals of mails in India, China and Australia have been made *via* Brindisi, by the Peninsular and Oriental Steam Navigation Company's liners, which have proved very interesting to the mercantile community and others. By the China mail which left London at 8 p.m. on April 7th, '93, letters were delivered at Hong Kong by the *Oriental* on May 1st, in 24 days. The Indian mail which left London at 8.23 p.m. on April 12th, '95, was shipped at Brindisi by the *Caledonia*, and delivered by her in Bombay at 7.7 a.m. on the 25th, so that only 12 days 10 hrs. and 44 mins. were occupied between London and Bombay, and 10 days 7 hrs. and 31 mins. from Brindisi. The homeward Indian mail record is held by this steamer, which left

Bombay at 2.25 p.m. on March 23rd, '95, and arrived at Brindisi at 3.23 p.m. on April 2nd, and the mails arrived in London on the evening of the 4th of that month; so that only 12½ days were taken for the conveyance of the mails from Bombay to London. This steamer, except through the Suez Canal, was driven at 18 knots per hour. These records have not been excelled. Since the last edition of this ANNUAL was published, the P. & O. Co. have had two very fast small steamers built, each of 1728 tons, but of 6500 horse power, by Caird & Co., of Greenock, called the *Isis* and *Osiris*. These have for several months been running in the mail service between Brindisi and Port Said. The object of these small ships is to accelerate the passage from London to Egypt. They convey the mails from Brindisi to Port Said in about 48 to 50 hrs., and there transfer the mails and passengers to the large mail steamers which now make Marseilles their Continental port of call between London and Bombay and London and Australia. Passengers leaving London every Friday by the P. & O. special express train are thus enabled to reach Port Said in four days. The *Osiris* has steamed from Brindisi to Port Said in 47 hours, being equal to 20 knots an hour. Mail matter despatched from London on April 7th, '93, by the *Oriental*, at 8 p.m., arrived in Adelaide (Australia) on May 4th in 26 days and 17 hrs. This time was shortened during May and June, as the London mails were delivered in Adelaide in 26 days and 7 hrs. by the *Himalaya*. In Oct. '87 the *Ormuz* of the Orient Line delivered London mails at this Australian port in 26 days 8 hrs. In all these instances the mails were carried from Brindisi *via* the Suez Canal, except in the case of the *Ormuz*. Her mail was taken by the P. & O. steamer from Brindisi to Alexandria, thence by rail to Suez, where it was shipped by this Orient liner, which did not call at Colombo, as did the *Himalaya* in '93.

Fast Small Steamers.

Great improvements have recently been made in the speed and accommodation of small steamers for river, cross-channel, coastwise, and other short voyages. During war the services of several of these may be utilised to great advantage as look-out ships and for other purposes. Those at 19 knots an hour or upwards include screw and paddle ships running between England and Ireland, and between England and the Continent, the Isle of Man, and the Channel Islands, and steamers between Scotland and Ireland. Of these small steamers four are of 23½ knots speed: viz., the *Ulster*, *Leinster*, *Munster*, and *Connaught*, belonging to the City of Dublin Steam Packet Co. The Isle of Man Steam Packet Co. have one steamer, the *Empress Queen*, of 22 knots, and two others, the *Queen Victoria* and *Prince of Wales*, of 21 knots. The other ships of this speed are the *Manche* of the London, Brighton, and South Coast Railway Co., and the *Leopold II.*, *Marie Henriette*, *Princesse Henriette*, *Princesse Josephine*, *Princesse Clementine*, and *Rapide*, owned by the Belgian Government. Seven others are of 20-knots speed: namely, the *Ireland* of the City of Dublin Steam Packet Co.; the *Ibex*, *Reindeer*, and *Roebuck* of the Great Western Railway Co.; the *Banshee* and

Cambria of the London and North-Western Railway Co.; the *Seine*, *Tamise*, and *Sussex*, of the London, Brighton, and South Coast Railway Co.; *La Marguerite* and the *Royal Sovereign* of the Fairfield Shipbuilding and Engineering Co.; the *Koningin Wilhelmina*, *Koningin Regentes*, and *Prins Hendrik*, of the Stoomvaart Maatschappij or "Zeeland Company;" the *Isis* and *Osiris* of the Peninsula and Oriental Steam Navigation Co.; the *Waverley*, of the North British Steam Packet Co.; the *Eagle*, of the General Steam Navigation Co.; the *Britannia*, *Cambria*, and *Westward Ho*, owned by P. and A. Campbell; *Le Nord* and *Le Pas des Calais*, of the Northern Railway of France; and the *Moskva*, of the Russian Volunteer Fleet Association. Of the 19-knot small steamers we have the *Adder*, owned by G. and J. Burns; the *Alma*, *Columbia*, *Frederica*, *Lydia*, belonging to the London and South-Western Railway Co.; the *Glen Sannox*, of the Glasgow and South-Western Railway Co.; the *Paris* and *Rouen* of the London, Brighton, and South Coast Railway Co.; the *Hygeia*, belonging to Huddart, Parker, & Co.; the *London Belle*, owned by the Belle Steamers (Limited); the *Koh-i-Noor*, belonging to the Fairfield Shipbuilding and Engineering Co.; and *La Flandre*, *Prince Albert*, and *Ville de Douvres*, owned by the Belgian Government; the *Calais*, *Calais-Douvres*, *Dover*, and *Lord Warden*, of the London, Chatham, and Dover Railway Co.; the *Willem Prins van Oranje* of the Stoomvaart Maatschappij Co.; the *Duchess of Devonshire*, owned by James Little & Co.; the *Ariadne*, belonging to Charles Tricot; the *Kenilworth* and the *Talisman* of the North British Steam Packet Co.; the *Princess of Wales*, of the South-Eastern Railway Co.; the *Vera*, of the London and South-Western Railway Co.; and the *Kherson*, *Orel*, and *Saratov*, of the Russian Volunteer Fleet Association. The contract between the City of Dublin Steam Packet Co. and the Government provides for an acceleration of the steamers between the two ports of half an hour. The London and North-Western Railway Co. have accelerated their mail trains between London and Holyhead another half-hour, so that there is a saving of time for mails and passengers between London and Kingstown of an hour. A record passage was made by the City of Dublin Steam Packet Co.'s new steamer *Connaught*, which is not only the fastest ever made across the Irish Channel, but in the world, by a small mercantile steamer for a short run. On Sept. 21st, '98, she was driven, in the face of a strong ebb tide, from Kingstown to Holyhead in 2 hours 20 minutes, being at the marvellous rate of 27 knots an hour, whereby she beat the records of her sister ships by several minutes. These fine Birkenhead-built mail and passenger ships are by far the fastest in the mercantile marine of the world on very short voyages.

Leading Ocean Liners and Cargo Steamers built and building since October '98.

The Peninsular and Oriental Steam Navigation Co. are having built for them by Caird & Co., of Greenock, the *Persia*, *Assaye*, *Sobraon*, and *Plassy*. The estimated speed of the first is 18 knots and 8000 tons, and the other three will each have a tonnage of 7240, and a speed

of about 16 knots. All four are to be run on the Eastern service of the company. The Orient Line Co. have had the *Omrah* built for them for their Australian mail service by the Fairfield Shipbuilding and Engineering Co., of Govan, Glasgow, of 8291 tonnage, and about 18½ knots speed. Another fine steamer, of 8250 tonnage, and the same speed as the *Omrah*, to be also run on the Australian line, is also being built for the Orient line. The Messageries Maritimes Co. have had built for them at their yard in Marseilles, the *Tonkin*, of 6246 tonnage, and the *Annam*, of 6250 tonnage for their China line; each has a speed of about 16½ knots. The same Company are having built for them at the same yard the *Atlantique* of 6000 tonnage and 17 knots speed, and another not yet named, for their Australian line. The Cunard Steamship Co. are having built two large liners for their Transatlantic line, which are the *Inverna* and *Saxonia*. The tonnage of each is to be 13,900, but their speed is not estimated. The former is being built by Swan & Hunter, Ltd., and the latter by John Brown & Co., Ltd. The General Transatlantic Co. are having built for them two out of four new Atlantic liners which have been ordered for their service between Havre and New York. These ships will be of greater tonnage and far superior speed to *La Touraine*, owned by this Company, and which, as has been stated, is the fastest steamer in the French mercantile marine. The names of such steamers are *La Lorraine* and *La Savoie*. It is expected that each will have a speed of at least 21 knots, and be ready for voyages before the opening of the Paris Exhibition in 1900. The North German Lloyd's Co. have had built for them the *Kaiserin Maria Theresia*, of 8500 tonnage and 21 knots speed, running in their New York line. The Company are also having built for them the following numerous steamers: for their same line *Grosser Kurfürst*, 12,500 tons and 17 knots speed; *Rhein* and *Main*, each of 10,000 tons and 16 knots speed; for the Australian service, *König Albrecht* and *Princess Irene*, each of 10,000 tons and 16½ knots speed; for the Baltimore service, the *Köln*, *Frankfurt* and *Hanover*, each of 7500 tons and about 14 knots speed, and for the East Asian line the *Strassburg* and *Wurtzburg*, each of 5000 tons and about 12 knots speed. The owners of the White Star line have had built for them the twin-screw steamer *Oceanic*, by Messrs. Harland & Wolff, of Belfast. She is 704 feet in length, 17,274 tons gross measurement, and 30,000 tons displacement. She is running on the owners' line between Liverpool and New York. She is by far the largest steamer in the world, considerably exceeding in size any other ship built or building. Other large steamers built for this line in '99 are the *Medic* and *Persie*, twin-screw passenger and cargo steamers, each of 12,000 tons. They are to be run, like the *Afric*, which was launched in December '98, on the new Liverpool and Australia service of the White Star line. They are to be succeeded by the *Runic* and *Suevic*, which will complete the service. The *Medic* inaugurated this new service by sailing with 85 passengers, and a considerable cargo from Liverpool for Australia *via* the Cape on August 3rd last. The *Oceanic* is so important a passenger steamer, that it is essential to here give a brief description of her main points of public interest. She has four decks eight feet

high for the use of passengers. The library and state-rooms are on the promenade deck. The former is 53 feet long and 40 wide, and is well supplied with books, writing-tables and chairs, and other seats and cosy alcoves where voyagers may sit and read. This room is elegantly decorated and upholstered. The saloon is provided with 350 seats. It is 80 feet long and 64 wide, and 19 feet high to the top of the dome. It is cased in oak, and is artistically gilded. The dome has most beautifully painted decorations by Mr. Clayton, in which Great Britain is represented armed with the trident, beside her is couched the English lion, with America opposite grasping the flag of liberty. On one side are the arms of Liverpool with emblems of commerce, and on the other are those of New York. The smoking-room has two large ornate domes so constructed as to well ventilate the apartment. It is cased with oak and elegantly decorated with gold. The state-rooms are on the upper decks. In some of these there are suites of three rooms with a private bath-room. There are also many sets of two rooms. The second-class accommodation is arranged on two decks at the after end of the steamer, with a smoking-room for the men, library and writing-room for ladies and non-smokers, and an elegant and well ventilated dining saloon to seat 148 passengers. The second-class state-rooms, which each contain four berths, are well and comfortably fitted and furnished. Numerous bath-rooms have also been provided for second-class passengers. For third-class passengers, the single men are accommodated in open berths forward, the single women in the after end in closed rooms. Isolated cabins between this sleeping accommodation have been provided for married people and families. Ample lavatory accommodation exists for all three divisions. In some ships third-class passengers had to supply their own plates, knives, forks and mugs. In this new liner these are provided. Table-cloths are spread for them, and the food is laid out in a homely and pleasant manner. They have a galley to themselves, and all their provisions are served out by the same caterer who looks after the food of the first and second saloon voyagers, and all food for these several classes of passengers is from the same cold store-rooms. The *Oceanic* has been fitted with triple-expansion engines. Her boiler furnaces will consume about 500 tons of coal per day, so that she must carry between 3000 and 3500 tons to propel her between Liverpool and New York on each single average voyage. Her estimated speed is 21 knots an hour. The American Line Co. have at present under construction six steamers, four at Clydebank and two at Philadelphia, each of which will be from 10,000 to 12,000 gross tonnage. They will be employed in the Company's different Transatlantic services. The names of these steamers have not yet been finally decided, and, as it will be some time before they are completed, it would be premature to state details respecting them, which might afterwards be considerably altered.

The Hamburg American Co. have had built for them by Blohm & Voss, of Hamburg, the *Graf Waldersee*, of 12,800 tons, for the New York passenger and cargo service. The owners of this line are also having built for them the *Deutschland* by the Vulcan Ship-

building and Engineering Co., of Stettin, to be run between Hamburg and New York. This large steamer will be of 16,000 gross tons, and her estimated speed is 23½ knots per hour. For the Union Line Messrs. Harland & Wolff are building two twin-screw steamers, viz., the *Galeka*, of 6763 tons, and the *Saxon*, of 10,000 tons, to be run on their line between England and South Africa. For the Castle Mail Packets Co. two new steamers, the *Kinfauns Castle* and the *Kildonan Castle*, were built by the Fairfield Shipbuilding and Engineering Co., of Govan, Glasgow. They are each 10,000 tons, and are expected to make the voyage between Southampton and the Cape in 15 days. For the New Zealand service Shaw, Savill & Albion Co., Ltd., have had built for them the *Kumara*, *Karama*, and *Waiwera*, each of which is of 6500 tons. They are all specially constructed to carry 100,000 carcasses of frozen sheep and lambs, and crates of rabbits, besides 10,000 bales of wool, and other produce from the colony. The New Zealand Shipping Co. have also had built for them the *Paparoa*, of 7158 tons, and the *Whakatane*, of 7002 tons. The Company is also having built for them two steamers, each of 7500 tons. These steamers, and the three just named of the Shaw, Savill & Albion Co., who carry on a similar trade between London and New Zealand, are about of equal merit both as regards speed and passenger and cargo accommodation.

Merchant Taylors' School, London.

Founded (1561) by Sir Thomas White, founder of St. John's College, Oxford, and the court of the Merchant Taylors' Company. The company remains the governing body of the school, which has always continued a day school. In 1875 it was reorganised, enlarged, and removed from Suffolk Lane to its present site in **Charterhouse Square**. Twenty-six scholarships, and exhibitions of £86 and £100 for five and seven years, to St. John's College, Oxford; others, ranging from £90, to Cambridge—altogether 39. Pupils 500; on entrance must be over nine and under fourteen. **Head Master**, Rev. W. Baker, D.D. **Sec.**, C. Waters, M.A. **Motto**, *Homo plantat, homo irrigat, sed Deus dat incrementum*. A **Merchant Taylors' School Mission** has recently been founded at Shacklewell, West Hackney.

Meredith, George, poet and novelist, is a native of Hampshire, and was b. 1828. After studying for some time in Germany he commenced his literary career with the publication of a volume of poems in '51. This was followed by the "Shaving of Shagpat, an Arabian Entertainment" ('55), "Farina, a Legend of Cologne" ('57), "The Ordeal of Richard Feveril" ('59), "Modern Love: Poems and Ballads" ('62), "Emilia in England" ('64), "Rhoda Fleming" ('65), "Vittoria" ('66), "The Adventures of Harry Richmond" ('71), "The Egoist" ('79), "The Tragic Comedians" ('81), "Poems and Lyrics of the Joy of Earth" ('83), "Diana of the Crossways" ('85), "One of our Conquerors" ('91), "Lord Ormont and his Aminta" ('94), "The Amazing Marriage" and a volume of short stories ('95). A selection from his poems was published in '97, and "Odes in Commemoration of the History of France" ('98). His difficult style has greatly militated against Mr. Meredith's chances of popularity, and for many years it prevented him from being even noticed. But in later years his genius has

received more of the appreciation which it deserves. A number of distinguished men of letters joined in sending him a congratulatory letter on his 70th birthday (Feb. 12th, '98). Address: Boxhill, Surrey.

Merv. An oasis in Central Asia, situated almost midway between Meshed and Bokhara, and Herat and Khiva. It has an area of 1600 square miles, and a population of a quarter of a million Turcomans. There is no town of Merv; the thickly packed prosperous settlements spread over the oasis constituting what is recognised under that name. About 10,000 Russian troops are maintained in the oasis, which is distant 200 miles from Herat.

Methodism. See **WESLEYAN METHODIST CHURCHES.**

Metric System. The **Weights and Measures Act, '97**, declares that, "notwithstanding anything in the **Weights and Measures Act, '78**, the use in trade of a weight or measure of the metric system shall be lawful, and nothing in section 19 of that Act shall make void any contract, bargain, sale, or dealing, by reason only of its being made or had according to weights or measures of the metric system; and a person using or having in his possession a weight or measure of the metric system shall not by reason thereof be liable to any fine."

Metropolitan Fire Brigade (established Jan. 1st, 1866). During the 34 years of its existence the strength and appliances of the Brigade have been more than quadrupled, and many alterations have been made in the constitution of the force, which now consists of 62 land stations, 4 floating stations, 45 hose-cart stations, 161 fire escape stations, 8 steam fire engines on barges, 62 land steam fire engines, 27 manual engines, 34 horsed escapes, 40 miles of hose, 106 hose-carts, 7 steam tugs, 12 barges, 12 skiffs, 204 fire escapes, 19 sub. and street stations, 111 watch boxes, 949 officers and men, 32 men under instruction, 17 pilots, 133 coachmen, and 231 horses. The area protected by the Brigade is about 118 square miles, including the City and County of London, and extends from Highgate in the North to Sydenham in the South, and from Roehampton in the West to Plumstead in the East. An excellent system of **Fire Alarm** telephones between fire stations, and to police stations and to public and other buildings, is provided. Every land station has an appreciable method of fire alarm which gives about 592 call points within the Brigade area. The total annual expenditure of the Metropolitan Fire Brigade is about £203,000. Of this sum the fire insurance companies contribute £31,000; the Government £10,000, for the protection of the public buildings; and the ratepayers £162,000. The last published report of the London fires, for '98, shows an increase of 85 as compared with those in '97. The number of calls for fires, or supposed fires, received during the year was 4654. Of these 830 were false alarms. There were 1563 calls for chimneys on fire, of which 555 were false alarms. **Chief Officer**, Commander L. De L. Wells, R.N.; **Second Officer**, Mr. Sidney G. Gamble, C.E.; **Third Officer**, Lieut. S. Sladen, R.N. **Head-quarters**, Southwark Bridge Road, S.E.

Metropolitan Free Church Federation, for the united action of Evangelical Free Churches on moral and social questions affecting Greater London. **President**, Rev. F. W. Bourne; **Treasurer**, R. W. Perks, M.P.; **Secretary**, Rev.

Joseph Fletcher. **Offices**, 26, Memorial Hall, Farringdon Street, E.C.

Metropolitan Gas Companies. See **SESSION**, sect. 120.

Metropolitan Hospital Saturday Fund. One day, determined by the delegates of the Metropolitan Hospital Saturday Fund (which is quite distinct from the Hospital Sunday Fund), is set apart from year to year for a collection in aid of Hospitals and Dispensaries under the auspices of the **Hospital Saturday Fund**; a weekly collection is also made in workshops, etc. The total collected in '98 amounted to £18,765, and donations, etc., amounted to £294, the whole being divided amongst 172 hospitals, dispensaries and other institutions. The **Offices** of this fund are at 54, Gray's Inn Road, W.C. **Secretary**, Mr. W. G. Bunn.

Metropolitan Hospital Sunday Fund. Founded in '73 by the late Dr. James Wakley, editor of the *Lancet*, and by the then Lord Mayor, Sir Sydney H. Waterlow, Bart., who is still its Vice-President. The total sum collected on behalf of the Hospital Sunday Fund during '98 was £40,397 2s. 10d. The financial year closes early in November, and the report of the Council is published in the third week of December. **Secretary**, Henry N. Custance; address, Mansion House, E.C.

Metropolitan Police. See **POLICE OF UNITED KINGDOM.**

Metropolitan Police Act, '99. See **SESSION**, sect. 76.

Metropolitan Public Gardens Association. The acquisition and laying-out of open spaces, disused burial grounds, churchyards, squares, and other vacant sites, the provision of seats and the planting of trees both in gardens and thoroughfares, the formation of public gymnasia and children's playgrounds, opposing threatened encroachments upon commons, open spaces, etc., are part of the work of this society. Funds are urgently needed at the present time, when many grounds await laying out at an estimated cost of £4000. Income in '98, £4020; expenditure £4400. One hundred gardens and playgrounds (total area 125 acres), at a cost of over £40,000, have been laid out since the Association was formed, in '83. Entirely supported by voluntary contributions. **Chairman and Hon. Treasurer**, The Earl of Meath; **Secretary**, Basil Holmes, 83, Lancaster Gate, W.

Metropolitan Water Act, '99. See **SESSION**, sect. 76.

Metropolitan Water Supply. See **LONDON WATER SUPPLY.**

Mexico. A country forming the southern extremity of North America, and stretching into Central America. Bounded on the north by the United States; on the south by Guatemala and British Honduras. **Area**, 767,005 sq. m.; **pop.** over 13,000,000, of whom the large majority are Indians. There are about 2,000,000 educated whites. **Capital**, Mexico, **pop.** 344,400. The country is divided into twenty-seven states, two territories, and the Federal district, and governed as a Republic by a President, elected by the people for a term of four years. General Diaz has, with the exception of a period of 4 years, been President ever since '76, and his present term of office expires Nov. 20th, 1900. There is a Senate, each state electing two members, and a House of Repre-

sentatives elected for two years by universal suffrage, one member for every 40,000 inhabitants. Each state has its own popularly elected governor and legislature. Prevailing religion Roman Catholic; but all sects are tolerated. Primary education nominally free and compulsory, but the law is not enforced. Industries comprise mining and smelting of silver and other metals, agriculture, and cattle-herding. The mineral wealth is great, comprising gold, silver, mercury, iron, tin, zinc, lead, antimony, arsenic, and sodic carbonate. Mexico is the second largest silver-producing country in the world. The other chief products are cereals, fibres, and cocoa; coffee and tobacco are now cultivated to some extent. There are about 7000 miles of railway. Revenue, '99-1900, £5,148,000; expenditure, £5,145,640; imports, '98-9, £4,770,000; exports, £13,980,000; internal debt, '99, £23,000,000; internal debt, '99, £3,492,670. See DIPLOMATIC, and FOREIGN ARMIES.

Mexico, President of. See DIAZ.

Midland Railway. See under RAILWAYS.

Milan Obrenovitch I., ex-King of Servia, was b. 1854, at Jassy, in Moldavia. He studied at Paris, at the Lycée Louis-le-Grand. The assassination of his cousin, Prince Michael, caused his recall to Servia, where he was proclaimed prince at the age of fourteen. A Council of Regency administered the government till the Prince came of age ('72). In '75 he married Natalie, Princess of Stourdza, from whom he has been divorced, and by whom he has a son, now King Alexander. Owing to the troubles arising out of disagreement with the Queen, he abdicated in favour of his son March 6th, '89. He was reconciled to Queen Natalie in Jan. '93, and in '94, despite his pledges to the contrary, he returned to Belgrade. An attempt to assassinate him was made in '99, but failed. See SERVIA.

MILITIA, THE

The Militia is a force of very old standing, the purpose of which is to provide a body of trained men, available in case of need or of imminent national danger, to supplement, support, or relieve the regular army at home and in the Mediterranean garrisons. It has frequently been embodied for service, and (Nov. '99) a number of battalions have been assembled for permanent service in the absence of Regular troops in South Africa. At the same time the Militia has often acted as a feeder to the regular army, notably during the Crimean war, when it contributed many officers and some 30,000 men to the line, and, under the territorial system, this has come to be regarded as its chief function. A very large number of Militia recruits are every year transferred to the line—as many, indeed, as one-third of the whole number enlisted—and the force is a channel through which many commissions are annually gained in the regular army. The drain upon the force, in this way, is excessive, and not a few Militia officers hold that, as a consequence, its true value is impaired. On the other hand there are many advantages in allowing the Militia to become a stepping-stone to the line. There is a consensus of opinion that the four weeks' period of training is too short, and should be lengthened to six weeks. At the same time there has been a wonderful change in the system of training, which, considering the short time

allowed, is as good as it can be. This was demonstrated during the manœuvres on Salisbury Plain (Sept. '99). The close relation with the line into which the Militia was brought by the territorial system is a powerful factor in inducing a military spirit, and it may be said that the better class of militiamen (a good proportion) at the close of their month's training compare not unfavourably in soldier-like bearing and smartness with the linesman. The ballot for the Militia was suspended in '29, and in the regular Militia, reorganised in '52, recruitment is by volunteering; but the ballot remains in reserve upon emergency, and is our nearest constitutional approach to conscription. This is a matter that is now (Nov. '99) engaging a good deal of public attention. A Bill to amend the law relating to the Militia ballot was introduced by Lord Lansdowne in the '99 Session, and the machinery proposed is described in the article on SESSION, sect. 80. The local Militia, which has been in abeyance since '15, may also be raised upon emergency by ballot. Since the introduction of the territorial system in '81 the Militia battalions have formed additional battalions to the regiments of the line.

Organisation and Establishment.—There are in all 126 Infantry battalions attached to the Line regiments, 32 corps of Artillery, 2 fortress corps of Engineers, 10 divisions of Submarine Miners, and 2 companies of the Medical Staff Corps. The Malta regiment, some colonial corps, and 9 Channel Islands regiments are in addition. The following table shows the changes in establishment and effective during the last five years, exclusive of the permanent staff:—

Date.	Effective strength.	Establishment.	Wanting to complete.
1st Jan., 1894	113,330	126,503	13,173
" 1895	108,392	126,697	18,305
" 1896	108,350	126,723	18,373
" 1897	107,878	126,609	18,731
" 1898	105,531	125,435	19,904
" 1899	103,647	124,481	20,834

The reduced establishment is due to the disbanding of one or more companies in many regiments in agricultural districts, and to the operation of the conditions explained above.

Finance.—The cost of the Militia during the financial year '99-1900 was given as follows in the annual Army Estimates:—Regimental pay, etc., £330,300; extra pay of officers and men, £7000; regimental allowances, £49,100; extra duty pay, £1400; bounty and expenses of enrolment, £196,000; expenses of prison staff, etc., £1200; contingent and unforeseen expenses, £1600: total, £586,600, against £568,600 in '98-9. From the total sum there has to be deducted £15,600 for appropriations in aid, the principal figures being £13,200 received from militiamen for release from their engagement, the net total being £571,000, as compared with £553,000 in the previous year.

Recruiting.—In '98 the total influx of men to the Militia, exclusive of the permanent staff, was 43,013, including 40,108 enlistments, 2019 re-enlistments, and 886 men who rejoined from desertion. The total decrease was 44,897, including 19,808 men discharged, 8791 deserted and absentees struck off, and 15,167 transferred

to the Regular Army and 796 to the Royal Navy and Royal Marines. The net decrease was thus 1884, as compared with 2347 in the previous year. The number present at the inspection was 98,042. In regard to the trades of non-commissioned officers and men (exclusive of the permanent staff), the following particulars were returned for '98: artisans, 9943; mechanical labourers, 19,343; agricultural labourers, 32,691; miners, 12,700; fishermen, 3549; undescribed, 27,927, making a total of 106,153. Particulars of the religion of militiamen (including the permanent staff) returned 53,610 as belonging to the Church of England, 8668 as Presbyterians, 3624 as Wesleyans, 1309 as "other Protestants," 40,496 as Roman Catholics, and 46 as Jews: total, 107,753.

Terms of Enlistment.—The recruit is enlisted for six years, and may re-engage if under forty-five years of age for a further period of four years. Recruits are liable, at any time after enlistment, to be assembled for preliminary drill for such period, not exceeding six months, as may be directed from time to time by the Secretary of State for War. Brigades and regiments are called out annually for twenty-seven days' training, which may be extended to fifty-six days if deemed expedient. A special-service section of the Militia was called into being from Dec. 1st, '98. It is composed (1) of individual militiamen engaging for service abroad with the Regular Forces; (2) of militiamen engaging for service abroad with their Militia units under special conditions.

Commissions.—The Lord-Lieutenant of a county recommends to the consideration of the Secretary of State for War, for submission to Her Majesty, the names of candidates for first appointment, commanding officers being directed to assist him in the selection if called upon. For subaltern officers in the Militia, candidates must be seventeen years of age or upwards. The appointment of officers as captains and field officers is recommended by the Militia commanding officer direct. Officers appointed after July 1st, '81, have, as a rule, to retire at the age of fifty-five. In special cases, however, an extension of five years, is allowed; but in no case is any extension sanctioned beyond the age of sixty.

Formation of Reserve.—The quota of men to be enlisted in the Militia Reserve is one-third of the establishment of gunners in each unit of Artillery, and one-fourth of the establishment of sappers and privates in each unit of Engineers or of Infantry. Men volunteering must be over nineteen years of age, have served two trainings, and bear good characters. The Reserve engagement coincides with the Militia engagement. Men entering the Militia Reserve are required when called up to enter upon service (in case of national emergency), and required to fulfil all conditions of service attaching to an ordinary Militia engagement. The Militia Reserve is a valuable auxiliary, and an immediately available reserve to the regular army. Total strength, Jan. 1st, '99, 29,996; increase, 35.

Militia Ballot Bill. See SESSION, sect. 80

Mill Hill School (London, N.W.). Founded 1807, reconstituted under direction of the Court of Chancery '69. Awards the "Wills" Scholarships of £70 each, the "Bousfield" of about £50, the "Scrutton" of about £30, and

three other leaving scholarships each tenable for three years. Also several Ministerial Exhibitions (about £45 a year) and Entrance Scholarships (£30 to £90). Number of boys, about 200. Motto, *Et virtutem, et musas*. The "Old Mill-Hillians Club" numbers over 400 members. Head Master, J. D. McClure, M.A., LL.D.

Milner, Sir Alfred, K.C.B., G.C.M.G., Governor of Cape Colony, and High Commissioner for South Africa, is the son of Dr. Milner. He was educated in Germany, at King's College, London, and Balliol College, Oxford. He took a first class in Classics, and is an Hon. Fellow of New College, Oxford. He was admitted to the Bar at the Inner Temple, '81, and for some years was engaged in journalistic work, being for a time on the staff of the *Pall Mall Gazette*. In '85 he fought the Harrow Division, and became private secretary to Mr. Goschen, then Chancellor of the Exchequer, '87-9. He was Under-Secretary for Finance in Egypt '89-92, and the knowledge and experience thus gained enabled him to write "England in Egypt," the best book that has yet been published on the position of England in Egypt. In '92 he came back to England, having been appointed Chairman of the Board of Inland Revenue, and that post he filled till '97, when he was chosen by Mr. Chamberlain to succeed Lord Rosmead at the Cape. The choice was universally approved, for Sir Alfred Milner has won golden opinions by the great ability and tact he has displayed throughout his career. There was not the same unanimity as to his action during '99 in regard to the difficulties with the Transvaal, Mr. Courtney in particular describing him as "a lost mind." But there were others, both at the Cape and in this country, just as enthusiastic in his favour. As to his conference with President Kruger at Bloemfontein, and his subsequent conduct of the negotiations which ended in the Boer Ultimatum, see TRANSVAAL, CAPE COLONY, etc.

Miniature Painters. The years 1896 and '97 witnessed an important revival of the art of miniature painting, and the foundation of two societies devoted to the Art. The **Society of Miniature Painters** is composed wholly of artists, Sir William B. Richmond, K.C.B., R.A. being its President, Mr. Quinell its Hon. Sec., and Mr. Edward Freeman its Secretary. It has held four annual exhibitions of members' and non-members' works. Its exhibitions are held (in January and February) at the Modern Gallery, 175, Bond Street, W., where also this Society has a permanent collection of members' miniatures always on view to the public, thus bringing the clients and artists into direct communication. The **Society of Miniaturists** has its offices at the Galleries of the Royal Institute of Painters in Water Colours, Piccadilly, and holds its exhibitions concurrently with that body throughout the spring and summer. Its President is Alfred Praga, Esq., and its Hon. Sec. Mr. L. Van Der Velde. It differs from its sister society in possessing on its council certain experts, collectors, and art critics who have given special attention to miniatures, and whose advice has been deemed by the society worthy of consideration. It also occasionally unites with its exhibitions a show of old miniatures, and aims at training the modern worker by the study of the work of the old masters.

MINING (COAL).

The World's Production of Coal.

In a very interesting statement published in the *Journal of the Iron and Steel Institute*, the first volume for '99, the figures shown in the following column were given :—

Country.	Year.	Production in Tons.
United Kingdom ..	1898	202,054,516
Australasia:		
New South Wales ..	1897	4,383,591
„ Zealand ..	1897	840,713

United States ..	1897	178,769,344

Coal Supply of the United Kingdom.

Coal accounts for about 92 per cent. of the minerals annually raised in the United Kingdom. The output of such fuel at the beginning of this century did not probably exceed 10,000,000 tons. In 1830 the total production in the British Isles was 29,000,000, and in '60 more than 80,000,000 tons. In '75 the yearly output of coal in Great Britain had increased to 131,867,100 tons, in '80 to 146,969,409 tons, in '85 to 159,351,418, in '90 to 181,614,288, in '91 to 185,479,126, in '94 to 188,277,525, in '95 to 189,661,362, in '96 to 195,361,260, in '97 to 202,120,931 tons, and in '98 to 202,054,516 tons, of the value of £64,169,382 at the mines and quarries. In '87 the average price per ton at the mines was 4s. 9⁸/₁₀d., in '88 5s. 0⁷/₁₀d., in '89 6s. 4⁴/₁₀d., in '90 8s. 5⁴/₁₀d., in '91 8s., in '92 7s. 3⁴/₁₀d., in '93 6s. 9⁵/₁₀d., in '94 6s. 7⁴/₁₀d., in '95 6s. 0⁴/₁₀d., in '96 5s. 10²/₁₀d., in '97 5s. 10⁹/₁₀d., and in '98 6s. 4²/₁₀d.

The total quantity of coal raised in England in '98 was 147,823,430 tons, of which 25,636,367 was produced in the North and West Ridings of Yorkshire, 34,737,347 in North and South Durham, 13,427,557 in West Lancashire, 10,897,053 in North and East Lancashire, and 8,526,025 in South Staffordshire. In Wales the output was 23,863,505 tons, of which Glamorganshire alone produced 19,140,742 tons. Scotland produced 30,237,295 tons, to which

East and West Lanark contributed 16,142,580, Fife 4,447,569, Ayrshire 3,753,694, and East and West Stirling 2,260,058 tons. The output in Ireland was only 129,965 tons, of which 83,697 was produced in Leinster.

A far greater quantity of coal is shipped from Great Britain for use abroad than from any other country. Including coal supplied for the use of steamers engaged in the foreign trade, the quantity of coal, coke, and patent fuel shipped coastwise and exported from the United Kingdom amounted to 47,827,000 tons in '98, as compared with 47,557,666 tons the previous year. The quantity of coal exported from the United Kingdom ports in '98 was 35,058,430 tons, coke 769,742 tons, and patent fuel 734,624 tons, amounting together to 36,562,796 tons, of the value of £18,135,502; and the quantity of coal shipped for the use of steamers engaged in the foreign trade was 11,264,204 tons, the value of which is not declared. The exports of coal approach our entire output 50 years ago, and considerably exceed the output of every country in the world except Germany and the United States. The circumstances which are in favour of the foreign and colonial demand for British coal are the very energetic manner in which the people of Great Britain carry on all mercantile operations, and the splendid mercantile marine which she possesses, and that can be used by British merchants. Of the quantity of coal, coke, and patent fuel exported abroad, exclusive of that used for steamers engaged in the foreign trade, 9,109,515 tons were shipped from Cardiff, 3,285,149 from Newcastle, 3,171,212 from South Shields, 2,890,180 from Blyth, 2,017,503 from Sunderland, 1,957,531 from Kirkcaldy, 1,795,083 from Newport, 1,850,398 from Swansea, 1,255,641 from Grangemouth, 1,247,676 from Glasgow, 994,584 from Grimsby, 848,218 from Liverpool, 643,594 from Goole, and 642,301 from Leith. Of the countries to which this fuel was exported, France took 5,710,113 tons, Germany 4,711,370, Italy 4,665,166, Sweden 2,408,521, Russia (Northern Ports) 2,155,268, Denmark 2,045,768, Egypt 1,907,505, Spain and Canaries 1,789,866, Norway 1,203,924, Brazil 1,010,109, Holland 931,134, Argentine Republic 848,119, Portugal, Azores, and Madeira 741,623, and British East Indies, comprising Continental territories, Straits Settlements, and Ceylon, 641,914 tons. The remainder was sent to 46 other ports. There is no doubt that a stoppage of our exports of coal for a few weeks, or a material diminution of the supply available for export, would cause those countries which depend upon Great Britain for their coal supplies to obtain them elsewhere, much to the injury of our shipping trade, whereby freights on exported and imported goods would be immensely increased, a result which would raise their price intolerably. British coal exports are about seven times as valuable as they were fifty years ago.

The persons employed in and about the mines in the United Kingdom in '98 are as under—viz., The total number of persons employed in and about all the mines of the United Kingdom during that year was 741,125, of whom 706,894 worked at the 3249 mines under the Coal Mines Act, and 34,231 at the 752 mines under the Metalliferous Mines Act. Compared with '97 there is an increase of 11,681 persons at mines under the Coal Mines Act, and of 731 persons at mines under the

Metalliferous Mines Act. Of the 706,894 persons working at mines under the Coal Mines Act, 567,124, or about 80 per cent., were employed below ground. Of the 139,770 surface-workers 4617, or 3'3 per cent., were females. At the mines under the Metalliferous Mines Act, 20,173 persons, or nearly 59 per cent., worked below ground, and of the 14,058 surface-workers 509, or nearly 3'6 per cent., were females. The total output of minerals at mines under the Coal Mines Act was 215,161,954 tons, of which 202,042,243 were coal, 2,783,219 fire clay, 7,901,046 ironstone, 2,137,993 oil-shale, and 297,453 sundry minerals. Adding 12,273 tons from open quarries, the total output of coal was 202,054,516 tons, which is lower than that of the previous year by 75,415 tons. In '98, at the mines under the Coal Mines Act, there were 828 separate fatal accidents, causing 908 deaths. At the mines under the Metalliferous Mines Act, there were 31 fatal accidents, which caused 33 deaths. The death-rate of the underground workers at the mines under the Coal Mines Act was 1'37 per 1000 persons employed and that of the surface-workers '92 per 1000 employed. At the mines under the Metalliferous Mines Act the death-rate of the underground workers was 1'34 per 1000 employed, and that of the surface-workers '43 per 1000.

The Coal Mines Regulation Act, '96, gives the Home Secretary increased power respecting dry and dusty mines, by enabling him in certain cases to propose special rules concerning lights, explosives, the number of persons allowed to be in a mine, and the watering and damping of such. It also deals with plans of abandoned mines, inspection before work, etc. The most fruitful source of accidents in coal mines is by falls of roofs and side. In '98, an average year in this respect, 431 out of the 908 deaths from accidents in collieries were occasioned by falls of ground. In '97 the proportion of deaths was even higher from this cause. The Home Secretary has addressed a circular, which has been sent to owners, agents, and managers of collieries, in which he states that he thinks it desirable to embody the precautions, or similar ones mentioned in his circular for the material reduction of such accidents, in special rules. Such precautions include a sufficient supply of timber to be kept ready for use in each working place, and the systematic timbering and spragging of the working places. The question of when and where sprags or props should be set is one which, in the opinion of the inspectors of mines, should not wholly be left to the judgment of the individual miner, while he should be at liberty to put up additional props when he considers them necessary; but he should have no discretion to omit the setting of props altogether, or to exceed a fixed maximum distance between them.

MINISTRY.

When a Ministry resigns it is the function of the Sovereign to call upon some person to form another administration. There is no restriction upon the Royal choice, but the statesman usually selected is the leader of the opposing party in one of the two Houses. If the individual chosen undertake the task of forming a Ministry, he commences by nominating his Cabinet, taking himself the principal position, which is variously designated as head of the Government, or First Minister, or Prime

Minister, or Premier. The offices which invariably give the holder Cabinet rank are those of First Lord of the Treasury, Lord Chancellor, Lord President of the Council, the Secretaries of State for the Home Department, Foreign Affairs, the Colonies, for War, and for India, Chancellor of the Exchequer, and First Lord of the Admiralty. For many years the Prime Minister of the day took the office of First Lord of the Treasury himself, but Lord Salisbury has thrice given that position to another member of the Cabinet, and associated with himself the office of Foreign Secretary. The Prime Minister may be First Lord of the Treasury and Chancellor of the Exchequer, or First Lord of the Treasury and Lord Privy Seal. The other offices, the holders of which may or may not be in the Cabinet, include those of Lord Privy Seal, Chancellor of the Duchy, First Commissioner of Works, Postmaster General, Lord-Lieutenant of Ireland, Lord Chancellor of Ireland, Chief Secretary for Ireland, Secretary for Scotland, President of the Board of Trade, President of the Local Government Board. Appointments to all these offices, and to many others, a full list of which follows this article, are made by, or on the recommendation of, the new Prime Minister, and each person so appointed may hold office as long as he does. Cabinets vary in number from eleven or twelve to eighteen or nineteen; their members are necessarily Privy Counsellors, and their deliberations are confidential. If a Cabinet minister was in office before election there is no re-election necessary, as there is when the acceptance of office comes after a general election. Ministers holding office direct from the Crown, on going from one such office to another do not vacate their seats. There is, in effect, no limit to the duration of a ministry but the confidence of the Commons; it will not now resign upon the adverse vote of the House of Lords, nor if it be defeated upon a trifling matter in the Commons, but only when it is placed in a minority there upon some question of importance. In such a case the Prime Minister either places his resignation in the hands of Her Majesty, or asks leave to appeal to the country, and should the latter course be decided upon a general election follows. The chief Executive power, though theoretically vested in the Crown, is actually exercised by the Cabinet, which is responsible to Parliament, and to the House of Commons more especially, for all its acts. While each minister conducts the ordinary business of his own office without reference to his colleagues, the most important business of every office is brought under the consideration of the whole Cabinet, who in Parliament are bound to act together on all executive questions. From an early period the kings of England were advised on public affairs by a privy council; matters of State being discussed in the sovereign's presence, and the result determined by vote subject to his pleasure. The selection by the sovereign of a few of the whole number was no doubt the origin of the Cabinet Council. It was not until the Restoration, says Macaulay, that the interior council began to attract general notice. The sovereign cannot now constitutionally preside at a Cabinet Council. We give on pp. 406-9 a full list of all those who go out of office at a change of ministry, and under corresponding headings throughout this work will be found a summary of the powers and duties exercised by many of them.

Ministries from 1886 to 1899.

Notes.—The names of Cabinet Ministers are indicated by an asterisk (*). In columns 1, 2, and 3 the names of those forming the original administration are printed in roman type, and those who took any particular office subsequently in *italics*.

[OFFICE AND SALARY.]		Ld. Salisbury's 2nd Administration (Aug. '86—Aug. '92).	Mr. Gladstone's 4th Administration (Aug. '92—March '94).	Ld. Rosebery's Administration (March '94—June '95).	Ld. Salisbury's 3rd Administration (formed June 29th, '95).

Mint, The Royal. The existence of a mint in this country is of very ancient date, regulations concerning it having been made as early as 928, by Athelstan. The present building was erected between 1806-10, at a cost of £262,000. It was somewhat injured by fire in '15, but repaired. By an Act passed April 4th, '70, the mastership of the Mint was absorbed in the office of Chancellor of the Exchequer, and the duties were devolved upon the Deputy Master of the Mint. The report for '98 shows that for the Imperial coinage the gold issued during that year amounted to £5,780,446, the silver to £1,312,306, and the bronze to £84,555. The total number of good pieces struck during the year was 98,099,217, and their value was £7,941,645. The coins were of 26 different denominations; this number, of course, being accounted for by the coinage of pieces for circulation in the Colonies as well as in the United Kingdom. For the United Kingdom alone only 16 denominations are required. Compared with '97 there was an increase of £4,510,231 in the value of pieces struck, an increase of 4,505,364 in the number, and a decrease of 5 in the number of denominations used. The light gold coinage withdrawn during the year was worth nominally £2,050,691, and intrinsically £2,028,578, and worn silver coinage was worth nominally £377,457, and intrinsically £338,194. The details of the number of coins struck are as follows:—

Imperial—	
Gold	7,229,874
Silver	25,389,530
Bronze	26,902,096
Colonial—	
Silver	38,505,717
Bronze	72,000

Total Imperial and Colonial . 98,099,217

The Colonial coinages were executed for Canada, Cyprus, Hong Kong, Newfoundland, and the Straits Settlements, and five-sixths of the number of silver coins were taken by Hong Kong. The profit on the year's working amounted to £536,752. The total quantity of metal melted during the year and cast into bars for coinage and the preparation of medals was 647 tons. The present Deputy Master is Mr. Horace Seymour, C.B.

Missionary Societies. The earliest missionary operations in modern times were carried on by the Jesuits in Japan, where great progress was made; but their work was overthrown, and the missionaries expelled before the sixteenth century. They also carried on operations in China and India. The Society for the Propagation of the Gospel in Foreign Parts was established by Act of Parliament in 1647, and work commenced amongst the North American Indians. Frederick IV. of Denmark founded a mission on the coast of Coromandel in the beginning of the eighteenth century. The Moravian Church was the first to begin missionary operations in its corporate character by establishing mission stations at the Cape of Good Hope, in the West Indies, Labrador, Greenland, and in many other parts of the world. The Baptist Missionary Society was founded in 1792 (its centenary was celebrated by a number of special meetings in London in Oct. '92), the London Missionary Society in 1795, the Church Missionary Society at the commencement of the present century, and the Wesleyan-Methodist Missionary Society in 1814. The

following details are extracted from the last published reports of each society.—**Baptist Missionary Society.** Received on behalf of the Society during '98-9, £75,331 9s. 2d. In India operations are carried on in Bengal, Orissa, and the North-West Provinces; there are 198 stations and sub-stations, 71 European missionaries, 17 assistant missionaries, and 113 native evangelists. In the island of Ceylon there are 108 stations and sub-stations, 4 European missionaries, and 19 evangelists. In China work is carried on in the provinces of Shantung, Shansi, and Shensi; there are 320 stations and sub-stations, 29 European missionaries, and 64 native evangelists. In Palestine the chief station is at Nablus, and there are 5 sub-stations and 1 missionary. Africa has 26 stations on the Lower and Upper Congo. There are 33 European missionaries at work, and 24 native evangelists. Mission work is also carried on in Jamaica (Calabar College, Kingston, for training a Native Ministry, etc.), and in Brittany and Italy. The statistics for '98-9 summarised, excluding Jamaica and the West Indies, now independent of the Society, show the following results: missionaries, 164; stations and sub-stations, 702; self-supporting churches, 72; evangelists, 239; baptised, 964; number of members, 13,485; day-school teachers, 513; Sabbath-school teachers, 2693; day-scholars, 12,320; Sabbath-scholars, 10,720. **Mission House, 19, Furnival Street, Holborn, E.C.**—The Church Missionary Society, which celebrated its centenary in April '99, labours in West Africa (Sierra Leone, Lagos and Yoruba country, and the Niger); in Eastern Equatorial Africa (Mombasa, Taita, Taveta, Usagara, Usukuma, etc., and Uganda). Palestine (Jerusalem, Nazareth, Salt, Nablus, Jaffa, Gaza, and Hauran). In India it has six missions, having headquarters in Calcutta, Allahabad, Bombay, Madras, Amritsur, Travancore, and Cochin. Besides these, mission work is carried on in Egypt, Persia, Ceylon, the Mauritius, China, Japan, New Zealand, North-west America, and the North Pacific. The summary of the work shows the following results: Stations, 520; Missionaries, etc., including European, Eurasian, and native clergymen, female teachers, and native Christian unordained teachers, 7285; native adherents baptised, 247,556; catechumens, 31,808; native communicants, 64,904; schools, 2181; scholars, 88,094. **Mission House, Salisbury Square, Fleet Street, London, E.C.**—**London Missionary Society.** Income received in year '98-9, £155,677 5s. 2d. (besides special contributions towards Centenary Fund). Mission operations carried on in China, at Hong Kong, Canton, Amoy, Chiang Chiu, Shanghai, Hankow, Wu Chang, Hiau Kan, Chung King, Tientsin, Yen San, Chi Chou, Peking, and Mongolia. In India at Calcutta, Berhampore, Jaganj, Benares, Mangari, Mirzapore, Dudhi, Kachhwa, and Almora, in the north; and at Belgaum, Bellary, Anantapur, Gooty, Jammulamadugu, Cud-dapah, Kadiri, Chik Ballapur, Bangalore, Tripatoor, Salem, Coimbatore, Madras, and Vizagapatam. Also in the kingdom of Travancore, in Southern India. In Madagascar 13 principal stations are sustained. In South Africa there are 12 and in Central Africa 3 stations. Mission work is also carried on in Polynesia and New Guinea. A general summary shows that the Society has 266 European missionaries and 3858 native agents;

52,803 Church members, and 175,588 native adherents, while they conduct 1037 native schools, with 56,613 scholars. The amount advised as raised and appropriated at mission stations was £17,778 4s. 11d., but this amount is included in the total given above. **Mission House**, 14, Blomfield Street, London Wall, E.C.—**Presbyterian Church of England Foreign Missions**. Founded '47. Total income, '98, £18,500; expenditure, £19,260. In China operations are carried on in the districts around Amoy, Chinchew, Kangpoo, Swatow, Suabue, Chaochow-fu and the Hakka country, and amongst the Chinese and more or less civilised Malay aborigines in the island of Formosa, now a province of Japan. Work is also carried on at Singapore, and at Rampore Boalia, in India, and at Aleppo, in Syria. Thirty-seven European missionaries are engaged, of whom 13 are medical, and 3 are teachers. There are also 28 lady missionaries, including 3 fully qualified lady doctors, besides 22 native pastors, 134 native evangelists, and 64 native students. There were 5943 communicants at the end of '98, being an increase of 477 during the year; and there were 3712 baptised children. —**Primitive Methodist Missionary Society**. The total receipts of this Society for the year ending March 31st, '99, were as follows: General fund £33,566 13s. 2d., African fund £10,750 19s. 7d., making a total of £44,317 12s. 9d. Secretary, Rev. R. W. Burnett, 71, Freegrove Rd., Holloway, N. —**Wesleyan Methodist Missionary Society**. The total sum received in '98 from the home districts amounted to £99,522 10s. 5d., Ireland £4126 12s. 7d., Foreign districts £6197 10s. 9d., Mission House receipts £3150 13s. 1d., and miscellaneous receipts £16,576 4s. 7d., together making a total of £129,573 11s. 5d., in addition to a balance brought forward from '97 of £960 5s. 3d. The expenditure was £130,466 6s. 6d., showing a surplus on current account at close of '98 of £67 10s. 2d. Mission operations carried on in France, Italy, Spain and Portugal, and Malta; in four districts of Ceylon, seven districts of India, two districts in China, in Southern and Western Africa, and in the West Indies. The summary of the year (not including affiliated Conferences) gives the following results: Circuits, 399; chapels and preaching places, 2370; missionaries, 362; other paid agents, 3037; unpaid agents, 5940; full Church members, 46,262; on trial for Church membership, 11,619; scholars, 90,117. **Mission House**, 17, Bishopsgate Street Within.

Monaco. A principality, surrounded on all sides by the French department of Alpes Maritimes, except to the south, where it borders on the sea. Area, 8 sq. m.; pop. 13,304. Consists mainly of the towns of Monte Carlo, pop. 3794; Monaco, 3292; and Condamine, 6218. Italian in language and traditions, but virtually under French control. The present ruler of the principality is Prince Albert of Monaco. He has a son by his first wife, Lady Mary Douglas Hamilton, Prince Louis, born July 12th, 1870. The first stone of the **Casino** at Monte Carlo was laid in '58. To Prince Albert the sum of £60,000 is paid annually for the concession to play. The Société Anonyme des Bains de Mer et du Cercle des Etrangers de Monaco, whose capital is 30,000,000 fr. in 60,000 shares, holds a contract, which was made with the late Prince Charles, and expires in 1913. It has practically to bear the cost of spiritual and temporal government for the Principality.

Money Lending. A Committee of the House of Commons, which first sat in '97, was re-appointed Feb. 16th, '98, "to inquire into the alleged evils attendant upon the system of money-lending by professional money-lenders, at high rates of interest, or under oppressive conditions as to repayment," and to report thereon. The members of the Committee were—Messrs. Ascroft, Thomas Bayley, Caldwell, Captain Chaloner, Messrs. Garfit, Hazell, Jeffreys, Lloyd-George, A. K. Loyd, Dr M'Donnell, Price, T. W. Russell, Warr, George Whiteley, and Yerburgh. On the reassembling of the Committee Mr. T. W. Russell was re-elected **chairman**. In course of the inquiry upwards of forty witnesses were examined. The Committee reported in June '98, and unhesitatingly came to the conclusion that the system of money-lending by professional money-lenders at high rates of interest is productive of crime, bankruptcy, unfair advantage over other creditors of the borrower, extortion from the borrower's family and friends, and other serious injuries to the community; and although the system is sometimes honestly conducted, they were of opinion that only in rare cases is a person benefited by a loan obtained from a professional money-lender, and that the evil attendant upon the system far outweighs the good. They considered that there is urgent need for the interposition of the Legislature with a view to removing the evil. As to the **question of remedies**, the two fundamental proposals which were made to the Committee were: (1) that Parliament should enact that any interest above a certain rate on loans advanced by professional money-lenders should be irrecoverable at law; or (2) that the courts should have power to go behind any contract with a money-lender, to inquire into all the circumstances of the original loan and of the subsequent transactions, and to make such order as may be considered reasonable. The Committee, however, holding that a high rate of interest is not in itself incompatible with fair dealing, and that no limit of interest could be prescribed which would be adapted to the widely different conditions under which these loans are contracted, did not recommend any statutory limitation of interest; but they arrived at the conclusion that **the only effective remedy** for the evils attendant upon the system of money-lending by professional money-lenders is to give the court absolute and unfettered discretion in dealing with these transactions. They therefore recommend that all transactions, which are, in substance, transactions with persons carrying on the business of a money-lender, in the course of such business should be open to complete judicial review. That in all legal proceedings to enforce, or for any relief in respect of, a claim arising out of such transactions the court should have power to inquire into all the circumstances of such transactions, from the first transaction up to the time of the judicial inquiry. That in such proceedings the court should have power to reopen any account stated in the course of such transactions, to direct that an account be taken upon the basis of allowance of such a rate of interest as shall appear to be reasonable, having regard to all the circumstances, and to make such order as the court may think fit. That the court should have power to direct repayment by the money-lender to the borrower of any

amount which, upon taking the account, may appear to have been paid by the borrower to such holder over and above the amount which the court may direct to be reasonably due to the money-lender under all the circumstances. That a borrower from a money-lender should be enabled, notwithstanding any provision or agreement to the contrary, to apply to the court at any time to redeem any security, or for relief on the part of himself and any other person who acts as surety, or otherwise, upon payment of the principal sum advanced and such interest as the court may consider reasonable. That the discretion suggested should be exercisable by any judge of the High Court or any judge of a county court. That from any decision given under these powers, by the judicial authority, there should be no right of appeal by either party except by leave of the court. That no transaction between a judgment debtor and a judgment creditor by way of a renewal of the loan should be valid so long as the judgment remains unsatisfied. The Committee also had under their consideration proposals for the alteration of the law in regard to **bills of sale, bankruptcy proceedings, and other matters** connected with money-lending, and also certain suggestions as to the **registration and licensing of money-lenders**, and the desirability of establishing **co-operative banks**. They recommended that goods assigned under a bill of sale, made or given by way of security for the payment of money advanced by or through a person carrying on the business of a money-lender, should not be removed by the grantee without a county court judge's order; that every bill of sale should be attested, and fully explained by the registrar of the county court or the district in which the borrower resides, and that the money should be handed over to the grantor in the presence of the registrar, or proof otherwise given to the satisfaction of the registrar that the whole amount secured by the bill of sale has been *bonâ fide* paid over to or on account of the grantor; that every bill of sale made or given in consideration of any sum under £50 should be void, and that the instrument should also be void if the borrower does not actually receive and enjoy the use of the full sum stated to have been advanced. As to **procedure**, in all cases where proceedings are taken in the county court, the money-lender should sue only in the county court or the district where the borrower resides. Statutory declarations in connection with money-lending transactions should in future be made only before the registrar of the county court, who should be required to fully explain their purport to those making them. In bankruptcy proceedings the Committee would give full power to review the whole transaction with the money-lender. In regard to **Scottish procedure** under summary diligence, they think this process should not be applicable in connection with any transactions with a person carrying on the business of a money-lender in the course of such business unless the borrower has a domicile in Scotland. The Committee made a series of recommendations regarding the **registration of money-lenders**, suggesting among other things that it should be declared an offence for any money-lender, individually or in partnership, to carry on the business of a money-lender under the name of "bank," "trust," "corporation," or other misleading title, or to issue or publish

any false or misleading prospectus, circular, or advertisement, and that it should be the duty of the registrar of each county court to report to the Public Prosecutor any such offence which may be brought to his knowledge or of which he may become cognisant; that on conviction for any of these offences it should be competent to the court to strike the name of such money-lender off the register for any period, and to impose a penalty to be prescribed by statute; that no money-lender should be capable of recovering any debts incurred in connection with money-lending transactions during the period for which he has been struck off the register. Any money-lender carrying on such business without being registered should be incapable of recovering any debt incurred in connection with money-lending transactions. **A further safeguard** to which the Committee attached some importance is that every person or company carrying on the business of a money-lender should be required to keep regular and strictly accurate accounts of each transaction, and to furnish to the borrower, on every date when an instalment falls due, a clear statement of his account up to date. The money-lender should be required to furnish to the borrowers and to the sureties, if any, at the time each transaction is entered into, copies of every document signed by him or them, and any failure to do this should render the money-lender liable to lose his right of recovery of any money lent. The Committee received important evidence as to the operation of **co-operative banks** on the Continent and in some parts of the United Kingdom. It appears, they say, that the establishment of such banks has been of great use in abolishing or largely diminishing the trade of lending money at exorbitant rates of interest to the poorer classes. The Committee were impressed with the extreme usefulness of these institutions, and were of opinion that they meet a real want, especially in agricultural districts. They do not, however, recommend any State intervention in connection with them at the present time.

Money Lending Bill. See SESSION, sect. 81.

Money Market. See BANKING, and STOCK EXCHANGE, MOVEMENTS OF.

Monson, Sir Edmund, G.C.B., G.C.M.G., H.M. Ambassador to Paris, is the son of the sixth Baron Monson, and was b. in 1834. Educated at Eton and Balliol College, Oxford (becoming Fellow of All Souls' in '58), he entered the Diplomatic Service in '56 by being appointed Attaché at Paris. He afterwards was appointed to Florence, Washington (where he was private secretary to Lord Lyons), and Hanover; and then was promoted to be third secretary at Brussels. He resigned in '65, and contested Reigate unsuccessfully, and in '69 was appointed Consul in the Azores, and Consul-General for Hungary in '72. After holding the positions of Minister to Uruguay '79, to the Argentine and Paraguay '84, to Denmark '84, to Greece '88, and to Belgium '92, he was appointed Ambassador to Austria in '93, in which year also he was made a Privy Councillor. In Aug. '96 he was chosen to succeed the Marquis of Dufferin as Ambassador at Paris.

Monte Carlo. See MONACO.

Montenegro. A principality under the patriarchal rule of Prince Nicholas I. (*g.v.*), which is practically absolute, though nominally shared with a State Council of eight, half elected by the

inhabitants capable of bearing arms, and half nominated by the Prince. The country is divided into a number of districts governed by prefects who are called "captains," but whose powers are not at all defined. For 400 years the principality maintained its independence against Turkey, and in '78 this independence was recognised by the Treaty of Berlin. The Montenegrins belong to the Servian branch of the Slav race. **Area** (including town and district of Dulcigno, ceded by Turkey in 1880), 3630 sq. m.; **pop.** 230,000. **Capital**, Cetinje, **pop.** 3000. Prevailing religion, Greek Church. Education compulsory and free. A large portion of the principality is uncultivable, consisting of forest and mountain pasture, and bare limestone. Large herds of cattle are reared, and some small crops are grown. The Crown Prince was married to the Duchess Jutta (Militza), daughter of the Hereditary Grand Duke of Mecklenburg-Strelitz (July 27th, '99). **Revenue and expenditure**, '99, about £60,000; **public debt**, '99, £200,000. **Imports**, '98, £65,000; **exports**, £50,000. See DIPLOMATIC AND TURKEY.

Montserrat. A British West Indian island, with an area of 32 sq. m. **Pop.** 11,762. **Capital**, Plymouth. Governed as a Presidency of the Leeward Islands by a Commissioner and Executive Council nominated by the Sovereign, and a Legislative Council of six members appointed by the Crown. Education well provided for. The chief exports are sugar, limes, coffee, and cocoa. For financial statistics see BRITISH EMPIRE (table). The island was devastated by a hurricane on Aug. 7th, '99. There were numerous deaths, and three-fourths of the population had to depend on the Government for food. A Mansion House Fund was opened for the relief of the sufferers.

Moravian Church. The. A body of Christians formed from among the followers of Hus; organised in 1457 as the Brethren's Unity; repressed in the beginning of the Thirty Years' War, 1621. Descendants of the Church survived in Moravia, and settled in 1722 at Herrnhut in Saxony, on the estate of Count Zinzendorf. In 1735, the Orders of the Moravian Church were resumed. It spread into Holland, Denmark, England, and America; developed extensive mission work in the colonies, and engaged in wide educational activity at home and abroad. The Church is composed of three "provinces," Germany, England, and America, each independent within its own sphere, and all constituting the Brethren's Unity. In constitution, ritual, and doctrine, the Church is one; foreign missions, leper mission at Jerusalem, mission in Bohemia and Moravia, the joint responsibility of all. Elected General Synods held every ten years, representative of all the provinces and foreign missions. Governing Board of the Unity elected at these synods. Each province appoints its own executive at its provincial synods. See "A Short History of the Moravian Church," by J. E. Hutton, M.A. (Publication Office, 32, Fetter Lane, E.C.). Total constituency in '98 about 200,000. Pupils in Day-schools and Boarding-schools about 29,000; in Sunday-schools about 36,000.

"**Morning Advertiser**," a daily paper founded Feb. 8th, 1794, is the recognised organ of the licensed victuallers. It possesses distinctive features of its own; and, while Constitutional in politics, it is not exclusively the advocate of any one party. **Editor**, Frank G. Doney. **Offices**, 127, Fleet Street, E.C.

"**Morning Herald.** The" published its first issue on April 24th, '99. The aim of the paper is to present the complete news and intelligence of the day in a concise form, with up-to-date illustrations and unprejudiced, outspoken criticism of all matters of public interest. It has a special page with magazine and literary matter. A unique feature is a daily signed article from some known writer or public man on "Topics of the Hour." The principles of the paper are Independent Liberal. The editor is Mr. Thomas Cox Meech, and the paper is the property of the Consolidated Newspapers, Ltd., of which Company Mr. Joseph Cooke is the Managing Director. **Offices**, 19, St. Bride Street, and Castle Court, Ludgate Circus, E.C.

"**Morning Leader**." First published in May 1892, and the first of the halfpenny morning papers. Its net sale is now considerably over 200,000 per day. Professing Liberal views, it aims at being a political organ as well as a thoroughly well-edited compendium of the day's news, its motto being "A pennyworth of news for a halfpenny." It has a large and well-organised staff of its own foreign correspondents, and in addition it makes illustration of the news a feature. It consists of twelve pages. **Offices**, Stonecutter Street, E.C.

"**Morning Post**." The oldest of the London daily newspapers, having been first published on Nov. 2nd, 1772. Enjoys the distinction of being the fashionable chronicle of society, and since its reduction in price to 1d., in '81, has increased its circulation tenfold. Conservative in politics, it takes a keen interest in naval, military, and ecclesiastical matters, and makes a feature of its foreign correspondence and telegrams. **Offices**, 346, Strand, and 12, Wellington Street, W.C.

Morocco. The westernmost of the Barbary States, occupying the N.W. corner of Africa. An empire consisting of the kingdoms of Fez and Morocco, and the territories of Suse, Draha, and Tafilet. The British Government issued a notice in '98 recognising the coast as far as Cape Bojador, on the 26th parallel of N. lat., as belonging to Morocco. Area estimated at about 220,000 square miles. Population now estimated at about 8,000,000. There are three capitals: Fez (pop. 140,000), Morocco (pop. 50,000), Mequinez (pop. 56,000). Chief ports are Mogador and Tangier, on the Atlantic; Tetuan and some smaller places on the Mediterranean. Tafilet is the point of arrival and departure for the caravans through the Sahara. Ruled by a Sultan, Abdul Aziz (q.v.), usually styled "Emperor" by Europeans. He is absolute, but the tribes beyond the mountains scarcely acknowledge his authority. The Sultan is head of religion as well as of the state. He has six ministers, from whom he receives advice, and through whom he carries on the executive. Disciplined standing army 10,000 infantry, 400 cavalry, and some artillery; militia infantry 10,000, cavalry 8000; irregular forces 40,000. Trade chiefly with Great Britain, France, and Germany. Morocco is a fine wheat-growing country, ridged with many ranges of mountains, and rich in minerals; but the barbarous form of government prevents the development of the country's resources, and the exportation of corn is actually forbidden. Imperial revenue about £500,000 per annum. **Imports**, '98, £1,284,602; **exports**, £1,231,802. See DIPLOMATIC.

Morocco, Sultan of. See ABDUL AZIZ.

Morris, Sir Lewis, M. A., author of the "Epic of Hades," "Songs of Two Worlds," "Gwen," "The Ode of Life," "Songs Unsung," "A Vision of Saints," "Songs without Notes," etc., originally published anonymously as the productions of "A New Writer," was b. in Carmarthen. Graduated first class in Classics at Jesus College, Oxford, 1855. Called to the bar '61, and ('80) served on the Committee of Inquiry into Intermediate and Higher Education in Wales. In Jan. '88 he received a silver medal from Her Majesty in recognition of his Jubilee Ode. A new volume of poems by him, "Idylls and Lyrics," was published in '96. He was knighted in '95. Athenæum Club. Address: Penbryn House, Carmarthen.

MOTOR VEHICLES.

In popular opinion the history of motor vehicles dates from the passage of the Locomotives on Highways Act, '96; as a matter of fact they are as old as the steam engine, if not older. Leaving out of account the somewhat mythical steam waggons of Ramsay and Isaac Newton, one can recall that Hancock's steam coaches ran fairly successfully through London nearly seventy years ago, and he was only one of a number of builders of such vehicles in the early part of this century. Then the railway era dawned, and in the immense success of the union of steam locomotion with a specially prepared permanent way, automobilism fell quite into the background, not to be renewed until the greatly improved materials and manufacturing processes of recent years, combined with the demand for a more flexible system of rapid locomotion to supplement the railway, encouraged inventors to attack the problem once again. Of this revival of interest in automobilism, the Act of '96 was an effect rather than a cause. Moreover, while it removed many obstacles to the road traffic of vehicles propelled by mechanical power, and so gave an impetus to the manufacture and use of the lighter types of automotors and road locomotives, it must, in the opinion of competent authorities, be materially amended to allow heavy loads to be successfully dealt with by this system of traction. Under the Act as it stands vehicles must weigh, when unladen, less than three tons, or, if used for drawing a second or trailing vehicle, the two must not weigh more than four tons, when unladen, if they are to come within the term "light locomotive," and to be exempted from the old locomotive laws. The result of this has been practically to restrict the use of motor vehicles to loads of four tons and under; for it has been found commercially impossible within the above limit of tare to build a durable vehicle to carry five tons or over, though there is considerable demand for such service up to ten tons. It is true that in France and America—the two countries besides England in which automobilism has taken root—a greater latitude as regards tare is allowed; but in these countries the commercial conditions are such as to make little demand for motor vehicles for heavy traffic. There is a strong movement on foot to bring about an amendment of the Act of '96 in respect of its limits of tare, and, if this succeeds, automobilism will make more rapid progress.

The lighter type of automotor, on the other hand, is in demand alike in France, in America,

and in England; and the streets of Paris, New York, and London, all give evidence of their growing popularity for the transport both of persons and goods. Other cities also have motor vehicles in use within their areas, but the three just mentioned are all that is necessary to study to indicate the present condition of affairs. In New York, according to a recent computation, there are about 100 motor hansom and *coupe* cabs in public service; about 20 motor waggons are engaged in the delivery of light merchandise, and there are between 30 and 50 private motor carriages, usually carrying two passengers. To Paris the same expert computation gives 12 public cabs in regular service, a large number of motor delivery waggons, and 3000 or 4000 of all types of private motor vehicles. From the streets of London the service of about 40 *coupe* cabs, which plied with apparent success for some months, has been temporarily withdrawn for reasons not definitely stated. A line of motor omnibuses has, however, recently been started between Victoria Station and Kennington Gate, and every day a number of motor delivery waggons can be seen carrying light goods. There are also probably three times as many private motor carriages as in New York, though not nearly so many as in Paris. In several country districts in England motor vehicles ply as public conveyances, and also in the summer at seaside resorts. Everywhere, however, the movement is still in a more or less experimental stage, and its developments, consequently, are in a state of constant flux.

As regards the types of vehicles employed, the position has been recently stated by an expert writer as follows:—"For short distances, for relatively light loads, and courses within a limited area, the electric system has succeeded in forcing out all other systems; for heavy weights and long distances steam has succeeded in displacing all competitors; while for high speeds, for indefinite distances and light weights, the gasoline engine has proved best suited." Thus we find that every one of the public hansom or *coupe* motor cabs is propelled by the electric system, using storage batteries; whilst, on the other hand, for heavy traffic vehicles propelled by steam practically hold the field undisputed. In the case of private motor cars the choice of system varies more, according to the requirements and tastes of the individual owners; but gasoline vehicles are decidedly the most popular in England and France, albeit in America there are a considerable number of electric storage-battery cars privately owned. In France, where speeds up to thirty miles per hour are cultivated and racing is fashionable, the gasoline engine, or "moteur à pétrole," practically holds the field for passenger vehicles, and also for light delivery vans. In England the steam and gasoline engines are used fairly equally for the lighter class of vehicles, delivery vans of both types being common; but in two sets of trials of vehicles for heavy traffic held at Liverpool in '98 and '99 steam has been the sole motive power represented. At the second of these trials a marked advance was exhibited on the work of the previous year, and there are signs that steam motor waggons may come into considerable use for the heavy cartage of our manufacturing districts, and that their manufacture may develop into a prosperous British industry. On the other hand, the much

advertised "steam omnibus" has made no headway at present, the vehicles now running in London (Nov. '99) being of the petrol type. Probably, however, this latter system is inferior to the electric storage battery for city service. For pleasure touring, however, the petroleum or gasoline motor is undoubtedly the best; but motor car touring is not likely to be popular except with men of a mechanical turn of mind.

The following conditions are imposed by the '96 Act, and the regulations made under it by the Local Government Board and the Home Office:—The vehicle must emit no smoke or visible vapour. A bell must be carried to give warning of the approach or position of the vehicle, and a lamp between one hour after sunset and one hour before sunrise. The width of the vehicle must not exceed 6½ ft.; it must have two independent brakes; the weight, and the name and address of the owner, must be painted distinctly on the off side of the vehicle, where it weighs 1½ tons, or is used for the carriage of goods, or for drawing another vehicle; the lamp carried must be on the off side, and show a white light in front and a red light behind. The maximum speed of a light locomotive is not to exceed 12 miles an hour. The petroleum, etc., shall be kept in vessels containing not more than 20 gallons each, and not more than two of such vessels must be on a light locomotive at the same time. The statutory enactments relating to light locomotives are very numerous, as a "light locomotive" is brought within the term "carriage" as used in any Act of Parliament or any byelaw or regulation made under any such Act, and, if used as a carriage of a particular class, is deemed a carriage of that class. A light locomotive is liable, as a "carriage" or a "hackney carriage," to the ordinary carriage duty, which varies from £2 2s. to 15s.; in addition to which it is subject to a special duty as a light locomotive, if it exceeds 1 ton in weight unladen. This additional duty is £2 2s. where the weight does not exceed 2 tons unladen, and £3 3s. where the weight is over 2 tons. A light locomotive, as such, is not liable to licence fee. The alteration of the law as to horseless carriages applies to Scotland and Ireland as well as England. See LOCOMOTIVES ON HIGHWAYS ACT, '96.

Mowatt, Sir Francis, Permanent Secretary to the Treasury since 1894. Born '37; educated at Winchester and Oxford (St. John's). Formerly a member of the Patriotic Fund Commission; K.C.B. '93. Married to Eliza, daughter of A. Frerichs and widow of Count Stenbock.

Münster, Prince, German Ambassador in Paris, was born in London in 1820. He was one of the first of the Hanoverian nobles to give a hearty allegiance to the King of Prussia

after the annexation of Hanover in '66, and became a member of the North German Reichstag, sitting as a Free Conservative. From '73 to '85 he acted as German Ambassador in London, and then went to succeed Prince Hohenlohe, the present Imperial Chancellor, as Ambassador in Paris. He has done much to promote better relations between France and Germany, and his discreet attitude in the Dreyfus case is still fresh in memory. At the Peace Conference in '99 at The Hague, he was the chief German representative, and in August he was granted the title of Prince of Derneburg by the German Emperor.

Muravieff, Count, comes of a family that has played a distinguished part in Russian history. He was born in 1845, and educated at the Poltava gymnasium and afterwards at Heidelberg. Entering the diplomatic service, he was appointed secretary to the Russian Embassy in Berlin in '64, and afterwards went in a similar capacity to Stockholm, and Stuttgart. In '69 he was again appointed to Berlin, and again to Stockholm in '73. In '74 he was made Secretary at The Hague. He was for some time at Paris '80-84, and in the latter year became Councillor of Embassy at Berlin. Promotion came in '93, when he was made Minister to Denmark. His name was mentioned at one time as that of the probable successor of Baron Mohrenheim at Paris; but a more important post was in store for him, and it was largely the high opinion of his abilities entertained by the Dowager Empress that led to his appointment in January '97 as the Czar's Minister for Foreign Affairs, in succession to Prince Lobanoff.

MUSIC, '99.

Upon the attention of so many of our leading musicians professional duties in connection with the larger schools make such a heavy claim as to allow little time for composition. This was more patent than ever. Very few of the better-known British composers produced works of such importance as to greatly stimulate curiosity. For novelty the provincial festivals had to rely upon comparative fresh comers and upon musicians less occupied with teaching and training. Of the younger men Mr. S. Coleridge-Taylor (*q.v.*) was the most fortunate. His cantata "**Hiawatha's Wedding Feast**," the first of a trilogy dealing with scenes from Longfellow's "**Song of Hiawatha**," was so warmly approved that it was taken up in all directions. At the Norwich Triennial Festival in October it was preceded by a specially composed overture, and later in the month the second of the set of cantatas, "**The Death of Minnehaha**," was introduced at the North Staffordshire (Hanley) Festival. It was also announced that the third cantata, "**Hiawatha's Departure**," completing the series, would be ready for performance in the coming March by the Royal Choral Society at the Albert Hall. To the Three Choirs' gathering at Worcester in September Mr. Coleridge-Taylor contributed an expressive "**Solemn Prelude**" for full orchestra, and his orchestral "**Ballad in A minor**" (written for Gloucester the year before) found its way to the Philharmonic Society. Mr. Edward Elgar's name was also frequently met with. His Leeds cantata "**Caractacus**" was given by the Royal

Choral Society, whilst his orchestral "Meditation" from "Lux Christi" became quite a popular piece. In June, at a Richter concert, a set of "Variations on an Original Theme" commanded praise, and at the Norwich Festival he submitted a series of five graceful songs, "Sea Pictures," for contralto. Respecting the already celebrated composers, Sir A. C. Mackenzie brought from his desk incidental music for a contemplated revival of "Manfred" at the Lyceum, and Sir Hubert Parry composed music for the short tragic play "A Repentance" at the St. James's Theatre. At the Philharmonic a set of clever and humorous "Variations for Piano and Orchestra," by Professor Villiers Stanford, on the air "Down among the Dead Men," was heard, and a new orchestral suite called "The Seasons," by Mr. Edward German, was given at the Norwich Festival. Mr. Frederick Corder composed an overture and incidental music for "The Black Tulip" at the Haymarket.

Modern foreign art was as well represented on the concert platform as usual. In October, at Queen's Hall, Dr. Richter afforded a hearing of Dohnányi's Pianoforte Concerto, and two or three excerpts were given from Siegfried Wagner's comic opera, "Der Bärenhäuter," first produced in January at Munich. At the Philharmonic appeared Richard Strauss with his symphonic poem, "Tod und Verklärung"; Rachmaninoff, as composer, conductor, and pianist; and Giuseppe Martucci (director of the Bologna Conservatoire) with his Symphony in D minor, op. 75. Moritz Moszkowski also visited England. It was inevitable that interest should attach to the sacred works of Don Lorenzo Perosi, the young priest-composer of whose talent such glowing reports had been received from Italy. The Norwich Festival committee early secured "The Passion of Christ," the first of the four short oratorios then completed of a series of twelve intended to illustrate passages in the life of the Saviour. This could not be given until October. But the second, third, and fourth oratorios, respectively entitled "The Transfiguration of Christ," "The Resurrection of Lazarus," and "The Resurrection of Christ," were performed in May, under the conductorship of Mr. George Riseley, at the London Musical Festival organised at Queen's Hall by Mr. Robert Newman. Perosi was invited to England, but did not come, and the curiosity concerning his works failed to acquire augmented intensity. Many other foreign compositions were given at this festival, which extended over a week and employed two orchestras—the Queen's Hall players under Mr. H. J. Wood, and the Lamoureux Paris force under its distinguished founder, each appearing alternately until the closing performances, when the bands were united. At Mr. Newman's Symphony Concerts, at the successful Promenade series in the autumn, and at the Sunday concerts—all under the same roof—Continental sources were freely drawn upon, and as a rule with excellent results. At Queen's Hall acquaintance with modern Russian composers was considerably increased. A few works received their first performance in England under the baton of Mr. August Manns at the Crystal Palace Saturday afternoon concerts.

As two cycles of "Der Ring des Nibelungen," separated by performances of "Die Meistersinger" and "Parsifal," had been determined

upon at the Bayreuth Festival, the colossal tetralogy was not given as a whole during the Covent Garden summer Opera Season. There were, however, two cycles of Wagner's works, comprising "Lohengrin," "Tristan und Isolde," "Die Walküre," "Der Fliegende Holländer," "Die Meistersinger," and "Tannhäuser," followed by occasional performances of three or four of these music-dramas. Of each of the two first-named, at the beginning of the series, Herr Felix Mottl directed a fine performance, with Frau Mottl, Frau Schumann-Heink, Madame Litvinne (a *débutante*), M. Jean de Reszké, and Herr Van Rooy among the principals. The other Wagnerian representations were directed by Dr. Mück, of Berlin, and in these the genius of Frau Gadschi and Frau Lilli Lehmann was immediately recognised. Herr Scheidemann was engaged for two representations of "Die Meistersinger," and his Hans Sachs was greatly admired. During the sixty-seven nights twenty-one operas were given, and of these three were additions to the *répertoire*. First came Puccini's "La Bohème" (June 24th), with Madame Melba as Mimi. This melodious example of the modern Italian school had been performed in English on the same stage by the Carl Rosa Opera Company eighteen months before, but this was the first representation here in the original tongue. Following a performance before the Queen at Windsor Castle, Adolphe Adam's little opera, sixty-five years old "Le Châlet," was revived on July 8th. Some discussion was evoked by the production (July 13th) of Mr. Isidore de Lara's "Messaline," originally given at Monte Carlo during the preceding March. The leading parts were taken by Madame Heglon, M. Alvarez, and M. Renaud, and the spectacle was of the most liberal description. Signor Mancinelli was again the conductor-in-chief, and M. Philippe Flon presided over some of the French operas. Old-fashioned works restored to Covent Garden were "Norma" (for Frau Lehmann), "Lucia di Lammermoor" (for Madame Melba), and "Les Huguenots" (in which Mlle. Lucienne Bréval made her *début*). Well-earned reputation was maintained by Mesdames Nordica, Zélie de Lussan, Suzanne Adams, and Marie Brema, and MM. Van Dyck, Saleza, De Lucia, Dippel, and Plançon. Although the non-arrival of Madame Calvé was a disappointment, the season was the most prosperous on record. The Carl Rosa Opera Company paid several visits to London. In January and February they were at the Lyceum, and elsewhere in the summer they produced Mr. Victor Holländer's "San Lin," founded on the Chinese drama "The Cat and the Cherub." The Moody-Manners Company revived Wallace's "The Amber Witch," and the operatic students of the Guildhall School in February gave Gounod's "The Mock Doctor."

To most of the chief features of the festivals at Worcester (conductor, Mr. Ivor Atkins), Norwich (Mr. Randegger), and Hanley (Dr. Swinnerton Heap) incidental references have been made, but it remains to be said that at the first-named city were introduced an oratorio, "Hora Novissima," by Professor Horatio W. Parker, an American musician of high repute, and a revised version of Mr. C. Lee Williams' "A Harvest Song." The second triennial festival at Sheffield (in October), conducted by Mr. August Manns, proved a magnificent

choral display. The volume of tone, the precision of attack, the evenness of execution, and the regard for light and shade, resulting from the training received from Dr. Henry Coward, made the gathering memorable, although the programme consisted of familiar works. Festivals on an imposing scale, but devoid of novelty, were also held at Lincoln in June (conductor, Dr. G. J. Bennett) and at Scarborough in October (conductor, Mr. F. H. Cowen). The Welsh National Eisteddfod took place at Cardiff.

Notable items of the season of the Royal Choral Society at the Albert Hall were performances, under Sir F. Bridge, of "The Messiah" without Mozart's "additional accompaniments," and of Wagner's little-known "Holy Supper of the Apostles" (March 9th). The Bach Choir was again in evidence under Professor Villiers Stanford, and at the Crystal Palace in June there was a performance of "Elijah" on Handel Festival scale under Mr. Manns in aid of the funds of the Royal Society of Musicians. The Bristol Choral Society, under Mr. Riseley, visited London to sing in Brahms's "Requiem" and Mendelssohn's "Hymn of Praise" at Queen's Hall, and a hundred Leeds choralists accepted an invitation from the Philharmonic Society to take part in Beethoven's "Choral Symphony" and in Sir Hubert Parry's "Blest Pair of Sirens." Mr. Charles Fry organised a recital in June at St. George's Hall of Byron's "Manfred," with Schumann's incidental music, the latter being conducted by Dr. Yorke Trotter. Decidedly an interesting concert was that at St. James's Hall in May, introducing compositions by Fritz Delius, whose force and originality were widely recognised. The Monday and Saturday Popular Concerts, the Elderhorst chamber series, and the Royal College of Music concerts pursued the even tenor of their way. There was a brief series of promenade concerts at Covent Garden in August under Messrs. Riseley and Jacobi.

Sir A. C. Mackenzie resigned the conductorship of the Philharmonic, and the directors appointed in his stead Mr. F. H. Cowen, who was Sir A. C. Mackenzie's predecessor at the desk. The Mendelssohn Scholarship was gained by Mr. Percy Hilder Miles, of the Royal Academy of Music. Another student of this

institution who specially distinguished himself during the year was Mr. Harry Farjeon. His two-act opera "Floretta" (book by Miss Eleanor Farjeon, his sister) was performed in July at St. George's Hall, and at the students' concert on Nov. 20th his *Harmonic Variations in G*, for two pianofortes, received a cordial welcome. Madame Adelina Patti (who in the summer became Baroness Cederström) appeared at several concerts at the Albert Hall, and interesting vocal recitals were given by Madame Blanche Marchesi and Herr Van Rooy. Nearly all the famous pianists and violinists visited the Metropolis during the year, but there were indications that "one-instrument recitals" were somewhat declining in popularity.

Mutsu Hito, the present Mikado (or Emperor) of Japan, was b. 1852. Ascended the throne in '67, and married Princess Haruko in '69. His children are Prince Yoshihito, b. '79, and proclaimed Crown Prince in '89, and three Princesses. His reign has been marked by great reforms; and the feudal system, which had impeded the general progress of the country, has been abolished. Under the rule of the present Mikado, Japan has entered upon an unprecedented era of prosperity. Civilisation has made rapid progress, and the introduction of Western arts and ideas has secured for Japan a foremost place amongst the Asiatic nations. He has given the Japanese a parliamentary constitution based on European principles. See JAPAN.

Muzaffer-ed-Din, Shah of Persia, is a son of Nasr-ed-Din, the late Shah, and was b. March 25th, 1853. He was nominated by his father for the succession in spite of his being the second, and not the eldest son, the Shah having a power always to appoint his successor. He held the post of Governor-General of the Azerbaijan province, his elder brother, Zil-es-Sultan, being Governor of Ispahan. On the death of his father at an assassin's hand, Muzaffer-ed-Din quietly succeeded to the throne (May 1st, '96), and was enthroned at Teheran (June 8th).

Mysore. For Resident see DIPLOMATIC.

N

Napoleon, Victor, son of the late Prince Napoleon and Princess Clotilde, was b. 1862. When his father, after the death of the Prince Imperial in '79, took the position of head of the house of Bonaparte, the claim was disputed by M. Paul de Cassagnac and several other Imperialists, who put forward the young Prince Victor as his father's rival, a position he definitely assumed even before his father's death in '91. By the Expulsion Bill of '86 the Prince was exiled from France, and took up his residence at Brussels. His younger brother, Prince Louis Napoleon, is a colonel in the Russian Imperial Guard, and for personal reasons is preferred before Prince Victor by

many Bonapartists as a candidate for the French throne.

NATAL.

A British colony situated on the south-east coast of Africa, discovered by Vasco da Gama on Christmas Day 1497, and hence named *Terra Natalis*. Sea-board extends a distance of about 376 miles. Portuguese East Africa and the Transvaal border the colony on the north, Orange Free State and Basutoland on the west, and Cape Colony on the south-west. **Area**, including Zululand and Amatongaland, 35,089 sq. m.; pop. 843,500, including 723,500 Kaffirs, 60,000 Indians, and 60,000 whites. Capital,

Pietermaritzburg, pop. 24,595; the only port is Durban. Zululand and British Amatongaland, which had formerly been administered as a dependent protectorate, were in Dec. '97 made an integral part of the colony. There is a Governor, a Ministry of 6 members, a Legislative Council of 12 members, appointed for ten years by the Governor, with the advice of the Ministry, 5 members retiring every five years, and a Legislative Assembly of 39 members, elected for four years by voters having a property qualification of £50, or paying £10 rent per annum, or having an income of £96. An Imperial garrison of 5000 is quartered at Pietermaritzburg, Ladysmith, and Eshowe; and besides this there is a volunteer force 1550 strong, and a mounted police force of 550 Europeans. Of course the Imperial forces in the colony were very largely increased during '99 as a result of the Transvaal troubles (see ARMY BRITISH, and TRANSVAAL). Religion is well provided for by denominational bodies, but no State aid. There are 23 Government primary schools, and a large number of other primary and secondary schools, for both European and native children, are aided and inspected by the Government. The chief products of the colony are wool, cereals, coal (a rapidly growing industry), iron, and sugar. Nearly 500 miles of railway have been constructed. Revenue, '97-8, £1,964,314; expenditure, £1,812,318; exports, '98, £2,184,667; imports, £5,323,216; debt, £8,019,143. See BRITISH EMPIRE (table), DIPLOMATIC, and TRANSVAAL (map).

History. '99.—In consequence of the death of the Premier, Sir Henry Binns, the Government was reconstituted (June 10th) with Lieut.-Col. A. H. Hime, C.M.G., as Premier. A resolution expressing full approval of the action and policy of the Imperial Government with regard to the Transvaal was unanimously carried by the Assembly (July 19th). As matters became more threatening considerable increases in the defensive forces were made, and Lieut.-General Sir George White arrived at Pietermaritzburg and took command of the troops (Oct. 8th), including the contingent sent from India, which had previously arrived. The Government were officially informed of the Boer ultimatum (16th), and the Reserves were called out at once, while the formation of an Uitlander force, one thousand strong, was sanctioned by the Imperial Government. On the same day came the news that the Free State Boers had seized a Natal train at Harri-smith. The Transvaal Boers advanced in force through Laing's Nek, and the Free Staters through Van Keenen's, Botha's and the Tintwa Passes. The British headquarters were at Ladysmith, where General Sir George White and Major-General Sir Archibald Hunter were in command, with a strong force at Glencoe and Dundee under Major-General Sir W. Penn Symons. Charlestown and Newcastle were occupied by the Boers (15th), and a combined movement was commenced against the British force at Glencoe. The railway between Ladysmith and Glencoe was cut (19th), and early on the 20th a strong force under Commandant Meyer attacked General Symons, the intention evidently being to cut him off from the larger force at Ladysmith. He, however, promptly took the offensive, carried the Boer position on Talana Hill, and took their guns in brilliant style. Unfortunately General Symons himself

was mortally wounded, and afterwards died, and a detachment of Hussars and Mounted Infantry got cut off in the pursuit, and were taken as prisoners to Pretoria. General White lost no time in sending General French to dislodge the Boer force between him and Glencoe. The enemy, under Commandant Kock, were found in force on rocky hills near Elands-laagte station (21st), but were driven from their position in confusion after hard fighting, and two of their guns were captured, besides all the Boer camp equipment, horses, waggons, etc. The Boer attack on Glencoe was resumed, however, and the separate columns appointed for the purpose having by this time joined hands, though in somewhat diminished numbers, General Yule, who had succeeded to the command, had to leave his wounded at Dundee, and retire, *via* Beith, upon Ladysmith. General Sir George White found it necessary to fight another action at Reitzfontein against the Free State commando (24th) to cover his march, and in this he was successful, but the British loss in the three actions was estimated at over six hundred. Although no figures were available, it was estimated that the Boer loss was even greater. Commandant Viljoen was killed, and Commandant Kock and the German Colonel Schiel were taken prisoners, with several prominent Transvaal officials. General Yule reached Ladysmith safely (26th), and for some days nothing more was done, the Boers, whose strength was estimated at about 18,000, contenting themselves with closing in upon Ladysmith, and attempting to cut its communications with Pietermaritzburg. A heavy blow was dealt at the British force, however, when a complete column, made up of the Royal Irish Fusiliers, the Gloucestershire Regiment, and No. 10 Mountain Battery, making up about 1000 men, was isolated and surrounded by the enemy in the hills north-west of Ladysmith, and after losing heavily capitulated (30th). The column which formed the left flank of the British force in a general attack on the Boers lost both guns and reserve ammunition through the mules stampeding, and fought till ammunition was exhausted. After this action the investment of Ladysmith was effected, and the Boers brought up heavy siege guns, the fire of which was, however, to some extent kept under by a powerful naval battery brought up from Durban. The wires between Ladysmith and Pietermaritzburg were cut, and the force defending Colenso were forced to retire over the Tugela river to Estcourt. All Natal north of the Tugela was then proclaimed Free State territory by the Boers (Nov. 2nd). The military authorities were offered the services of 2000 more Colonial volunteers drawn from Pietermaritzburg and Durban, and accepted 1000 of them (3rd). General White stated (10th) that the bombardment of Ladysmith at long range continued, but little damage was being done. The Boers had fired on a party of refugees sent in by them under a flag of truce, and taken over by the British, before the refugees reached the British pickets, and while they were still under the white flag. Colenso, after being abandoned, was reoccupied by the Boers, and the line to Estcourt was damaged at Chieveley. An armoured train was derailed three miles north of Frere, and the force of Dublin Fusiliers and Durban Volunteers with it suffered heavily (15th). Mr. Winston Churchill and about 100 men were made prisoners. General Hildyard

arrived at Durban, bringing with him a message from Sir Redvers Buller expressing high appreciation of Natal's action, and admiration for the gallant conduct of the Colonial forces and volunteers. Details were published (20th) of an attack upon Ladysmith on Nov. 9th, which had been repulsed with heavy loss to the Boers. A Boer force advanced on Estcourt (18th), but retired on finding naval guns ready to receive them. Lieut.-General Sir C. F. Clery, commanding the second division of the Army Corps, assumed command of the British forces south of Ladysmith (10th). Boer foraging parties were reported to be looting farms all over the colony south of Estcourt. They got within about thirty miles of Pietermaritzburg, and cut the telegraph and damaged the railway south of Estcourt (22nd), but then had to retire. See OCCURRENCES DURING PRINTING.

National Agricultural Union. See AGRICULTURE, VI.

National Artillery Association. See ARTILLERY ASSOCIATION.

National Council of the Evangelical Free Churches. This body was first definitely formed at the fourth National Congress of the Evangelical Free Churches of England and Wales, which was held at Nottingham in March '96. Prior to '90 there were only four local Free Church Councils in existence; but the movement rapidly spread, and by March '95 130 Councils had been formed. A year later, at the Nottingham Congress above mentioned, 209 Councils were represented, and by the end of '97 there were 7500 churches, representing, in round numbers, about a million members, associated with about 500 local Councils. The denominations represented are Congregational, Baptist, Presbyterian, Methodist of all sections, the Society of Friends, the Moravians, the Salvation Army, the Countess of Huntingdon's Connexion, the Free Episcopal Church of England, and various unattached Evangelical Missions. At the annual congress held at Bristol in March '98, there were 800 delegates present, representing 6,000,000 Free Churchmen, and at the Liverpool meetings in '99 it was reported that 600 Councils were in existence. Definite religious work is first and foremost in the work of the Councils. United missions are held in many centres, as well as united open-air and indoor services. Social work is not neglected, however. There have been organised crusades against gambling, houses of ill-fame, and drunkenness. The American Churches have been twice addressed on the subject of "International Arbitration"; and correspondence is carried on with Evangelical Free Churches on the continent of Europe. The movement is not associated with any political party, and all shades of political opinion are represented on the Councils. The constitution of the Council was settled at the Nottingham meeting in March '96, and the objects are stated as being:—(1) To facilitate fraternal intercourse and co-operation among the Evangelical Free Churches. (2) To assist in the organisation of local Councils. (3) To encourage devotional fellowship and mutual counsel concerning the spiritual life and religious activities of the Churches. (4) To advocate the New Testament doctrine of the Church, and to defend the rights of the associated Churches. (5) To promote the application of the law of Christ in every relation of human life. All local Councils formed in harmony with the principles of the

National Council of the Evangelical Free Churches are entitled to send as many representatives—men or women—to each Annual Council as the Executive Committee shall from time to time determine, on payment of 5s. on behalf of each representative thus sent. The Executive Committee consists of fifteen ministers and fifteen laymen elected annually by the Council by ballot, together with the President, ex-President, past-Presidents, and as many Treasurers and Secretaries as the Council shall from year to year appoint. The organs of the movement are the *Free Church Chronicle* and *The Free Churchman*, both published monthly. **President**, Rev. Alexander Mackennal, D.D.; **Treasurers**, Mr. George Cadbury, J.P., Mr. R. W. Perks, M.P., Mr. Evan Spicer, J.P.; **Secretary**, Rev. J. Monro Gibson, D.D.; **Organising Secretary**, Rev. Thomas Law; **Office**, Memorial Hall, Farringdon Street, London, E.C.

National Debt. See BRITISH EMPIRE (table) and FINANCE, NATIONAL.

National Footpath Preservation Society. This was formed in 1884, for the "preservation and protection of ancient foot and bridle paths, and all other rights of way by land and water, fishing, vacant spaces, as village greens, roadside slips of land, etc." It was amalgamated in July '99 with the Commons Preservation Society, and the joint Society is now known by the name of the "Commons and Footpaths Preservation Society," as to which see separate article under that heading.

National Gallery. (For earlier history see ed. '88, and later editions.) The present **Trustees** are: The Earl of Carlisle, A. C. de Rothschild, Esq., John P. Heseltine, Esq., the Marquis of Lansdowne, Sir Charles Tennant, Bart., Earl Brownlow, Sir Henry Tate, Bart., and Sir J. Murray Scott, Bart. The **Director** is Sir Edward J. Poynter, P.R.A.; the **Keeper** and **Secretary** is Mr. Hawes Turner; the **Chief Clerk** being Mr. George E. Ambrose. The National Gallery contains by far the best examples of the English school of painting to be found, comprising as it does the masterpieces of Turner, Reynolds, Landseer, Gainsborough, Wilkie, Romney, Constable, Herring, Callcott, Etty, and others. On the other hand, the **foreign masters** are well represented, the paintings including works of Raphael, Rembrandt, Vandyck, Rubens, Cuyp, Teniers, Correggio, Titian, Holbein, Velasquez, Murillo, and others. The Gallery was visited by 422,913 persons on the 209 free days during '98, showing a daily average attendance of 2023. On the 31 Sunday afternoons when it was opened 30,635 persons visited it. On students' days 39,349 persons were admitted. The Gallery is open to the public on Mondays, Tuesdays, Wednesdays, and Saturdays, and on payment of a fee of sixpence on the students' days, Thursday and Friday. Much information, compiled independently of the National Gallery authorities, may be found in Mr. E. T. Cook's "Guide to the National Gallery," while official details appear in an *Annual Report* issued by the Director.

National Gallery of British Art, The, Grosvenor Road, S.W., was presented to the nation by Sir Henry Tate, Bart., and opened by H.R.H. the Prince of Wales July 21st, '97. The site was the old Millbank Prison, and was placed by the Government at the disposal of Sir Henry Tate, who built the galleries at his own expense, and is now extending them to provide room for further pictures. The Government

has undertaken the maintenance through the Trustees of the National Gallery. The Gallery is open to the public in January from 10 a.m. to 4 p.m.; in February and March from 10 a.m. till dusk; from April to September, from 10 a.m. till 6 p.m.; from October to December, from 10 a.m. to dusk. The Gallery is open to students on Thursdays and Fridays from 10 a.m. to 5 p.m. in summer and 4 p.m. in winter, and to the public on the same days from 11 a.m. and up to the same hours, by payment of sixpence. The Gallery is open on Sundays from 2 p.m. until 6 p.m. from April to September, and from 2 p.m. until dusk during October. It is closed on Christmas Day and on Good Friday. There were 190,994 visitors on the 209 days on which the Gallery was open during '98, and 41,853 visitors on 31 Sunday afternoons, besides 27,910 visitors on students' days. The Keeper is Mr. Charles Holroyd.

National Home-Reading Union. This Society completed the tenth year of its existence in August '99. **President**, H.R.H. the Princess Louise, Marchioness of Lorne. **Chairman of the Council**, Rt. Rev. the Lord Bishop of Hereford; **Chairman of Executive Committee**, Dr. Hill, Master of Downing College; **Vice-Chancellor of Cambridge University**; **Hon. Secretary**, Rev. Dr. Paton, of Nottingham; **Secretary**, Miss Mondy. **Office**, Surrey House, Victoria Embankment, London, W.C.

National Incorporated Association for the Reclamation of Destitute Waif Children, otherwise known as "Dr. Barnardo's Homes." The work of this Association was begun in the year 1866 by Dr. Barnardo, at that time a young medical student attached to the London Hospital. Year by year the Homes have since extended, and from the first the central principle of the Institutions has been: No destitute child, boy or girl, ever refused admission, irrespective of age, creed, nationality, or physical defects. At present the Homes comprise eighteen Mission Branches, and ninety-one distinct Homes. Four are situated in Canada, one in Jersey, seventeen in the English counties, and the remainder in London. **Industrial training** is imparted to the older boys in the Homes, fourteen different trades being taught in the shops at Stepney Causeway. An **Emigration agency** furnishes an important adjunct to the work. Over 38,000 young people, of all ages, from infancy to the threshold of adult age, have passed through the Homes. The **daily expenses** of maintenance and food alone amount to at least £140. The Homes were incorporated under the title at beginning of this article in April '99. **Head Offices**, 18 to 26, Stepney Causeway, London, E.

Nationalisation of the Land. See LAND NATIONALISATION SOCIETY.

National Liberal Federation. The (for history see ed. '88). It consists of a union for national purposes of all the Liberal Associations throughout England and Wales. The **Liberal Central Association** is charged with the official care of the Parliamentary interests of the party, while the Federation chiefly represents and expresses the outside opinions of the rank and file of the party. The **headquarters** of the Federation are at 42, Parliament Street, Westminster, S.W. **President**, Dr. Robert Spence Watson; **Chairman of Committee**, Mr. Edward Evans, jun.; **Secretary**, Mr. Robert A. Hudson; **Assistant Secretary**, Mr. Frank Barter.

National Physical Laboratory. Largely as the outcome of two addresses delivered before the British Association in '91 and '95 by Professor Oliver Lodge and the late Sir Douglas Galton, a National Physical Laboratory is being organised, and will be in operation early in 1900. A committee, with Lord Rayleigh as chairman, was appointed by the Treasury; and they reported in favour of the establishment of a public institution "for standardising and verifying instruments, for testing materials, and for the determination of physical constants." They further recommended that the Kew Observatory should be extended for the purposes of the new institution, and that the Royal Society should be asked to control it and to nominate its governing body, on which commercial interests should be represented. The Government has granted £12,000 for the buildings, and £4000 a year towards the working expenses. The **Kew Observatory**, which possesses a Gaussiott endowment of £458 a year, and has an income of about £2700 from standardising fees, will be merged in the new institution. Under the ultimate control of the Royal Society, the institution will be managed by an executive committee and a general board, to which the executive committee must report yearly and submit its scheme of work for the ensuing year. Twelve of the members of the general board are nominated by the following societies:—The Institutions of Civil, Mechanical, Electrical, and Naval Engineers, the Iron and Steel Institute, and the Society of Chemical Industry; and six of these nominees are to sit also on the executive committee. This committee consists of twelve ordinary members and the following five official members:—The president of the Royal Society, the chairman of the committee, the Permanent Secretary of the Board of Trade, and the treasurer and one of the secretaries of the Royal Society. To superintend particular departments or investigations, the executive committee may appoint sub-committees, the members of which need not necessarily be members either of the general board or of the executive committee. Mr. R. T. Glazebrook, F.R.S., has been appointed **principal**. He was educated at Dulwich College and Liverpool College, at which latter college he gained a scholarship at Trinity College, Cambridge, where he graduated as fourth wrangler. He leaves the principalship of University College, Liverpool, to undertake his new duties at Kew. The **Executive Committee** consists of Lord Lister, P.R.S., Lord Rayleigh (chairman), Mr. A. B. Kempe, Treas. R.S., Professor A. W. Rucker, Sec. R.S., and Sir Courtenay Boyle (*ex officio*), Captain W. de W. Abney, Sir N. Barnaby, Mr. G. Beilby, Sir E. H. Carbutt, Captain E. W. Creak, R.N., Professor R. B. Clifton, Professor G. C. Foster, Mr. F. Galton, Professor O. J. Lodge, Sir A. Noble, Professor J. Perry, Sir W. Roberts-Austen, Professor A. Schuster, Mr. A. Siemens, General Sir R. Strachey, Professor J. J. Thomson, Dr. T. E. Thorpe, and Sir J. Wolfe Barry. In addition to the above, the following are also members of the **General Board**:—Sir M. Foster, Sec. R.S. (*ex officio*), Sir F. A. Abel, Professor W. G. Adams, Professor W. E. Ayrton, Mr. H. Bell, Mr. A. Buchan, Mr. R. E. Crompton, Professor G. F. Fitzgerald, Professor J. Joly, Lord Kelvin, Mr. J. T. Milton, Sir W. H. Preece, Mr. W. F. Reid, the Earl of Rosse, Dr. R. H. Scott, Mr. W. N. Shaw, Mr. C. E.

Stromeyer, Admiral Sir W. Wharton, and Sir W. H. White.

National Portrait Gallery. Founded in 1856, on a motion by Earl Stanhope, P.S.A., in the House of Lords (March 4th, '56), "for the exhibition of portraits of eminent British historical characters." At first temporarily housed in 29, Great George Street, then in Exhibition Road, South Kensington, whence the collection was removed, on loan, to Bethnal Green Museum, in Sept. '85, while temporary offices and board-room, etc., were granted at 20, Great George Street, Westminster. The munificent offer of Mr. W. H. Alexander to build a permanent gallery having been accepted by the Government in May '89, a new building at the back of the National Gallery, in St. Martin's Place, was commenced in the following year, and opened to the public on April 4th, '96. The collection now comprises over twelve hundred portraits and busts. The gallery is open to the public free, from 10 a.m. to 4, 5, or 6 p.m., on Monday, Tuesday, Wednesday, and Saturday; Thursday and Friday are students' days, when an entrance fee of sixpence is charged. The **Director, Keeper, and Secretary** is Mr. Lionel Cust, M.A., F.S.A. The present **Trustees** of the Gallery are: Viscount Peel (Chairman), the Lord President of the Council (for the time being), Lord Ronald Sutherland Gower, Viscount Cobham, Viscount Dillon, P.S.A. (Vice-chairman), Viscount Knutsford, G.C.M.G., The Lord Balcarras, M.P., Lord Edmond Fitzmaurice, M.P., The Lord Bishop of London, Lord Ribblesdale, Lord Aldenham, Hon. Philip Stanhope, M.P., Right Hon. William Edward Hartpole Lecky, M.P., Sir Coutts Lindsay, Bart., the President of the Royal Academy of Arts (for the time being), and George Frederick Watts, Esq., R.A.

National Reform Union, The, is an outgrowth of those reform associations which existed in most towns prior to the Reform Bill of 1867. The conference which led to its establishment was held at Manchester in April '64. Its first programme included "the household and lodger franchise, vote by ballot, redistribution of seats, and triennial parliaments." Its declared objects now are: (1) The dissemination of political knowledge and the furtherance of Liberal organisation, especially in the county constituencies. (2) The promotion and agitation of any leading question which an important section of the Liberal party may from time to time place before the nation, and in regard to which it may be thought desirable to move and instruct public opinion. It has 419 affiliated and subscribing branches, and sends out lecturers all over the country. The officers are: **President**, Hon. P. Stanhope, M.P.; **Hon. Secretary**, Mr. J. H. Maden, M.P.; **Treasurer**, Mr. George Rhodes. **Chairman of Executive**, Mr. R. Barlow; **Secretary**, Mr. A. G. Symonds, M.A.; and the offices are at 50, Haworth's Buildings, 5, Cross Street, Manchester.

National Refuges for Homeless and Destitute Children. This Institution was founded in the year 1843 by the late Mr. William Williams, and is supported by voluntary contributions. It now has under its care the two well-known training-ships *Arethusa* and *Chichester*, lying off Greenhithe, Kent, where boys, of good character only, are trained for the Navy, Merchant Service, or Army Marines; it also wholly maintains eight

Homes on shore for boys and girls, amongst those for boys being two at Bisley, Surrey. In these Homes and ships there is accommodation for 1000 children. No votes are necessary, but applicants for admission are seen every morning, except Sunday, at 11 o'clock, at the London Home and Offices, 164, Shaftesbury Avenue, W.C. Children having fathers able to work are not considered eligible; criminal children are not received. The age for admission to the Homes is from 10 to 13, but boys for the ships must be between 14 and 16, and physically fit. As many as 12,498 boys and 2436 girls have been received and sent out into the world since the establishment of the Society. From the *Arethusa* and *Chichester* training-ships 4899 boys have joined merchant ships, 741 the Royal Navy, 39 Army, 48 Royal Marines. An Emigration Agency and Working Boys' Home form an important part of the work. £18 will support a child for one year. Receipts in '98 amounted to £19,333 10s. 5d. **President**, The Right Hon. the Earl of Jersey, G.C.M.G.; **Chairman and Treasurer**, Mr. W. E. Hubbard; **Deputy Chairman**, Mr. Charles T. Ware; **Secretary**, H. Bristow Wallen; **Finance and Deputation Secretary**, Henry G. Copeland. **Head Offices**, 164, Shaftesbury Avenue, W.C.

NATIONAL RIFLE ASSOCIATION.

The fortieth prize meeting commenced at Bisley on July 10th, '99. The weather, perhaps the most important thing to a rifleman, was very good throughout the fortnight. The shooting was again splendid, "highest possibles" were monotonously numerous, whilst the revolver shooting was especially good. There were 1663 competitors for the Queen's Prize, a number which exceeded that of '98 by more than 100. On the first day of the regular shooting several accidents occurred, owing to defective ammunition. Captain Bonham, R.E., narrowly escaped a fatal accident: the breech bolt of his rifle was blown out, and though it just missed his head, it went through the peak of his cap. The defect occurred probably through the very hot weather, which caused the nickel covering of the Mark IV. bullets to become detached, and portions of the nickel were left in the barrel, causing the explosions. The whole of the Mark IV. ammunition was immediately withdrawn, and Mark II. used during the remainder of the meeting, and no more accidents took place. The Duchess of York presented the prizes at the conclusion of the meeting. The following were the results of the principal competitions:—

Evelyn-Wood Competition: E Co. 2nd Northampton Regiment, 177½.

Waldegrave Series (10 shots at 800 and 900 yards): Major the Hon. T. F. Freemantle, 1st Bucks, 93.

Regulars v. Volunteers (15 shots at 800, 900, and 1000 yards): Regulars 1528, Volunteers 1480.

Humphry Challenge Cup (15 shots at 800, 900, and 1000 yards): Oxford 758, Cambridge 716.

Secretary of State for War's Prize (10 shots at 800 yards): Lieut. Dunlop, 1st Lanark, 47.

Ashburton Shield (7 shots at 200 and 500 yards): Rossall 472, Berkhamstead 463, Charterhouse 463, Bradfield 462, Uppingham 462, Marlborough 457, Dulwich 454, Bedford 450, Glenalmond 444, Harrow 439; 17 other schools competed.

Spencer Cup (7 shots at 500 yards): Sergt. Bray, Harrow, 34.

Cadet Corps Challenge Trophy (7 shots at 200 and 500 yards): Marlborough 110.

Public Schools Veterans' Match (10 shots at 500 yards): Clifton 239, Eton 237.

Duke of Coburg's Challenge Cup for the Marines (7 shots at 200, 500, and 600 yards): R.M. Artillery 689.

United Hospitals' Challenge Cup (15 shots at 500 yards): St. Thomas' Hospital.

Halford Memorial Challenge Cup (15 shots at 900 and 1000 yards): Major G. C. Gibbs, 2nd Gloucester Engineers, 134.

Albert (10 shots at 800 and 900, and 15 at 1000 yards): Arm.-Sergt. J. E. Martin, 5th V.B.H.L.I., 161.

Bass (15 shots at 900 and 1000 yards): Dr. J. C. Sellars, Dundalk, 135.

Kolapore Cup (7 shots at 200, 500, and 600 yards): Mother Country 768, Canada 759, Guernsey 735, Jersey 714, India 702.

United Service Cup (7 shots at 200, 500, and 600 yards): The Army 762, Royal Marines 757, Volunteers 754, Royal Navy, 741, Militia 731.

Lucas Cup (7 shots at 200, 500, and 600 yards): Glasgow Brigade 1500, Clyde Brigade 1469.

Chancellor's Plate (7 shots at 200, 500, and 600 yards): Oxford University 712, Cambridge University 708.

Duke of Westminster's Challenge Cup: London Rifle Brigade 903.

Elcho Shield (15 shots at 800, 900, and 1000 yards): England 1577, Scotland 1541, Ireland 1511.

Prince of Wales' (10 shots at 200 and 600 yards): Staff-Sergt. Wattleworth, 2nd V.B. Liverpool Regiment, 95.

Sir J. Whitehead's Challenge Cup: Galloway Rifles 112.

Mullens' Competition: Queen's Westminsters 62.

Brinsmead Challenge Shield: H.M.S. *Cambridge*, 24.

The Barlow (7 shots at 200, 500, and 600 yards): Pvt. R. J. Sparks, Civil Service, 100.

Mappin: 1st V.B. Leicester 232.

Wimbledon Cup for match rifles (15 shots at 1100 yards): Mr. Braithwaite, Belfast, 61, after a tie with Lieut. Ranken, 6th. V.B. Royal Scots.

St. George's Competition: 1st stage (7 shots at 500 and 600 yards); Corp. Ommundsen, 5th R. Scots; 2nd stage (10 shots at 800 yards): Corp. Ommundsen, 116.

Wimbledon S.R. Cup (10 shots at 600 yards): Pvt. A. Forsyth, 5th V.B.D.L.I., 49.

Whitehead Challenge Cup for revolvers (12 shots at 20 and 50 yards): Regular Army 1040, Royal Navy 1008, Volunteers 948, All Comers 917, Royal Marines 862.

Martin's Cup (7 shots at 200 yards, standing position): Pvt. W. T. Ward, 1st Devon, 34.

Alexandra (7 shots at 500 and 600 yards): Sergt. W. Graham, Border Rifles, 69.

National Challenge Trophy: Scotland 1886, England 1875, Wales 1862, Ireland 1847.

China Cup (10 shots at 600 yards): Glasgow, 453.

Lloyd-Lindsay: Queen's Edinburgh, Mounted Squad, 116.

Belgian Cup: 3rd V.B. Hants 185.

Rover Cyclist Competition: Galloway Rifles, 2nd team, 150.

The Ranelagh Cup: Queen's Edinburgh, 575.

The Duke of Cambridge Series (10 shots at 900 yards): Lieut. Dunlop, 1st Lanark, 48.

Mackinnon Challenge Cup: Scotland 45, England 30, Canada 29, Wales 27.

Royal Cambridge Shield for Regulars: Queen's Bays 123.

Bargrave Deane Revolver Cup: Queen's Westminsters 119.

Queen's Prize: 1st stage (7 shots at 200, 500, and 600 yards), Corp. Filmingham, 2nd Norfolk, 101, bronze medal; 2nd stage (10 shots at 500, and 15 at 600 yards), Col.-Sergt. W. H. M. Matthews, Civil Service, 213, silver medal; 3rd stage (10 shots at 800, 900, and 1000 yards), Pvt. W. Priaulx, Guernsey Militia (won on shooting off tie with 2nd and 3rd), 336, gold medal, gold N.R.A. badge, and £250; Col.-Sergt. J. Anderson, 4th Scottish Rifles, 336, N.R.A. badge and £60; Sergt. Cyclist F. Jones, 1st Welsh Fusiliers, 336, N.R.A. badge and £40; Sergt. S. Chantler, 1st V.B. Royal Fusiliers, 334, N.R.A. badge and £20; Pvt. J. Shannon, 3rd Welsh, 334, N.R.A. badge and £15.

The Grand Aggregate Challenge Trophy and the **Association's Gold Cross** was won by Surgeon-Lieut. Bertram, Canada, with 360. He also won the **Volunteer Aggregate Challenge Trophy** with 196, and the **100 Guineas** given by the Corporation of the City of London for Indian and Colonial Volunteers with 360. The **All Comers Aggregate** was won by Arm.-Sergt. Jones, 4th V.B. S.W. Borderers, with 167.

National Society for Checking the Abuses of Public Advertising. Hon. Secretary, Mr. Richardson Evans, 1, Camp View, The Common, Wimbledon. **Official Address**: 7, Great College Street, Westminster, S.W.

National Society for the Prevention of Cruelty to Children, The (Incorporated by Royal Charter), has for its object that no child in the United Kingdom shall live an unendurable life. This object is sought by (1) warnings; (2) enforcement of laws; (3) promotion of any new law that may be necessary. The Prevention of Cruelty to Children Act, which was passed during '94, imposes penalties upon those who inflict unnecessary suffering on children and injury to their health; punishes assault, neglect, abandonment, and exposure; adds further penalties where the death of the child so wronged would bring insurance money; specially provides for the treatment of drunkards who cause suffering to their children; punishes parents who cause their children to beg, or to sell anything in the street, after nine at night and before six in the morning, under eleven years of age. It provides for Government inspection of places where pantomime children are employed, or acrobat children are trained; provides conditions of new guardianship, and makes necessary the authority of the Home Office for the emigration of cruelly treated children; abolishes the necessity of the oath for abandoned and abducted children of tender years who are victims of crimes of indecency by penalties varying from three months' imprisonment to three years' penal servitude. **Patron**, H.M. The Queen. **Director and Secretary**, Rev. Benj. Waugh. **Assistant Secretary**, S. H. Gladstone. **Organ**, *The Child's Guardian*; **Editor**, Rev. B. Waugh. **Central Office**, 7, Harpur Street, London, W.C.

National Society, The, for promoting the education of the Poor in the principles of the Established Church, was instituted in 1811 and incorporated in 1817. Its objects are expressed in its title. Schools are supported in all parts of England and Wales, training colleges are

helped, religious inspections of the schools are organised, and information on all educational topics is diffused directly and by means of Diocesan and other local Boards of Education throughout the country. The annual report for '98 showed that the accommodation in Church schools was 2,780,402, and the average attendance 1,883,263. The income for '98 was £19,197. The voluntary contributions to the schools were £58,945 in '98. The total income of the schools amounted to £3,969,870, and the expenditure to £4,032,704. President, the Archbishop of Canterbury; Secretary, Rev. Canon Brownrigg. Offices, The Sanctuary, Westminster.

National Telephone Co. See TELEPHONES, and SESSION, sect. 109.

National Union of Teachers. Founded 1870. Objects: (1) to promote the spread of education; (2) to bring practical knowledge to bear on educational legislation; (3) to unite the school teachers in a strong professional organisation; (4) to watch the interests and advance the welfare of schools and teachers; (5) to secure the appointment of a Representative Educational Council, and the creation of a Ministry of Science and Education. The Union provides legal advice, defence, and assistance for its members, professional advice and protection against unjust management or inspection of schools. Its organ is the *Schoolmaster*. It includes local associations and district unions. Conferences are annually held at Easter. The thirtieth annual conference was held at Cambridge, April 3rd to 7th, '99, the President being Mr. T. Clancy. There are now 430 local associations in England and Wales, with 40,485 members. The N.U.T. Examination Board holds quarterly examinations for pupil teachers, and conducts commercial examinations annually in March. There are a Provident Society, Benevolent Fund, Orphan Fund, and Orphan Homes in connection with the Union. Up to May '99 £131,909 had been raised for benevolent purposes. Secretary, J. H. Yoxall, M.P. Office, 71, Russell Square, W.C.

NAVAL MANŒUVRES, '99.

The manœuvres of '99 were undoubtedly most decisive in result, of unusual interest, and yet in a sense disappointing. Decisive, inasmuch as "B" fleet had it all their own way from the beginning; unusually interesting, for, for the first time, wireless telegraphy was used for signalling purposes; disappointing, for "A" fleet, owing mainly to the untoward weather conditions, failed to find the convoy. The constitution of the opposing fleets was as given below:—

FLEET "A."—27 Ships.

Majestic	} 17'5	*Pique	} 20

CONVOY.

Calliope } Slow ships
 Curaçoa }
 A first-class Cruiser to be detached from "B." . . . Escort.

Vice-Admiral Sir Harry Rawson, K.C.B., was in command of "A" fleet, and flew his flag in the *Majestic*, his second in command being Rear-Admiral Fanshawe, whose flagship was the *Magnificent*. The "B" fleet was commanded by Vice-Admiral Sir Compton Domville, K.C.B., in the *Alexandra*, with, as second, Rear-Admiral Aldrich, in the *Sans Pareil*. The nucleus of "A" fleet was the Channel, that of "B" the Reserve, Squadron, and each fleet was supplemented by a large number of specially mobilised cruisers. To "A" fleet were allotted all the torpedo-boats, with three torpedo gunboats as nursing ships, to "B" the destroyers, also with three nursing ships. It will be seen, moreover, that the mobilisation was an unusually heavy one, for 10 battleships, 1 first-class cruiser, 3 second-

* Ships and destroyers newly mobilised, as were also all torpedo-boats.

† These coast and port guard ships had to complete their reduced crews to full complements.

class cruisers, and 6 torpedo gunboats had to complete to sea-going establishment; while full crews and stores had to be found for 4 first-class cruisers, 25 second-class cruisers, 4 torpedo-boat destroyers (the remaining destroyers were those of the Instructional Flotillas always in permanent commission), and 30 torpedo-boats. The two third-class cruisers that were told off to represent the convoy did not require to mobilise, as they are always in permanent commission as tenders to the sea-going training-ship *Northampton*. The mobilisation was a complete success. It commenced on July 11th, and was completed the following day without the slightest hitch, and, what is more important, without unduly depleting the reserves at the naval depôts, either in men or material. Engine-room ratings, however, were given a start, for they joined their ships a week earlier than the date fixed, were with them in their preliminary dockyard trials, and knew their way about them before the actual date of mobilisation. Six destroyers were also mobilised at Portsmouth, to be available as reliefs in case of breakdown.

The objects governing the manoeuvres, and the general idea that was to rule operations, were thus officially set forth: The principal object of the '99 manoeuvres is to obtain information as to the most advantageous method of employing a considerable body of cruisers in conjunction with a fleet. A subsidiary object is to throw some light on the relative advantages and disadvantages of speed and fighting strength. Another subsidiary object is to obtain information relative to the working of destroyers and torpedo-boats. The general idea was set out thus: A British convoy "C" of slow ships escorted by a fast cruiser, on passage from Halifax to Milford Haven, is ordered to wait at a certain rendezvous the arrival of a protecting squadron. N.B.—The slow ships cannot be taken in tow, must remain in company, and have no fighting value. A hostile squadron "A" of fast ships, lying at Belfast, is sent to sea to intercept and capture the convoy and bring it into Belfast. After an interval, a superior British squadron "B" of slower ships is sent to protect the convoy "C," which has been ordered to a pre-arranged rendezvous, cover it from the hostile squadron, and bring it into Milford. The whole of Ireland is hostile territory, and belongs to "A." The coast of England and Wales from the island of Islay to the Lizard, including the Scillies and the Isle of Man, is British territory. The hostile fleet "A" has torpedo-boats at Waterford, Kingstown, and Belfast. The British fleet "B" has destroyers at Milford Haven, Holyhead, and Lamlash.

A glance at the foregoing will show that the fleets were so constituted as to best lend themselves to the "objects" of the manoeuvres. "A's" objective was to find the convoy and bring it back to Belfast before "B" could bring him to action. "B's" objective was to steam to where he knew his convoy was, and with his cruisers find if "A" were near, and if so, bring him to action before he could capture it, or, if captured, bring it into Belfast. And so each fleet would have to use its cruisers incessantly, and thus attain the first "object," viz., how a large number of cruisers could be best employed working in conjunction. A study of the "general idea" will show that the conditions were somewhat analogous to those

which would prevail in the Atlantic on the outbreak of a war between this country and France. The "A" fleet would represent the French Northern Squadron, weaker but faster than "B," which would represent our Reserve Squadron. The convoy stood, of course, for the food supplies which we should be endeavouring to get into the country, and the French would equally be endeavouring to keep out.

By July 16th the fleets were assembled in full readiness—the "A" fleet at Portland, the "B" at Torbay, the torpedo boat flotillas at Plymouth, the destroyer flotillas at Portsmouth. On the morning of the 17th both "A" and "B" fleets left their respective rendezvous for the preliminary cruise and exercise at steam tactics, and various other evolutions both at sea and at anchor. The programme for the former was to proceed west about the coast of Ireland to its second rendezvous at Belfast, calling at Blacksod Bay and Lough Swilly *en route*. Owing to the thick fog the fleet encountered between the Fastnets and Black Rock, Blacksod Bay was not entered, the fleet arriving at Lough Swilly at 2.30 p.m. on the afternoon of the 20th, and leaving, some of the cruisers early on the 21st, the battleships and the remaining cruisers on the morning of the 22nd, arriving in Belfast Lough the same day. The "B" fleet after a cruise off the south coast of Ireland, and anchoring for one night in Berehaven, also reached their rendezvous at Milford Haven on the 22nd. From this date onward the fleets were coaling and making final arrangements until the 27th, on which day, soon after noon, they received the Admiralty order "Prepare for hostilities." This allowed the destroyers and torpedo-boats—which had in the meantime been exercising, the former under the direction of Captain Durnford, of the *Vernon*, at Portsmouth, the latter under Captain Hamilton, of the *Defiance*, at Plymouth—to proceed to their respective rendezvous. On the morning of the 29th war was declared. As neither of the battle fleets came in contact during the period hostilities lasted, it will be necessary to relate their operations separately. "A" fleet left Belfast at 10 a.m. on the morning of the 29th, and headed for a rendezvous at lat. 55° 52' N., long. 8° 10' W., i.e., a point some 35 miles to the northward of the entrance of Lough Swilly. Although Admiral Rawson knew that Admiral Domville's instructions were to use his torpedo destroyers mainly against "A's" torpedo-boats, he also knew that by the rules they could be used for torpedo attack on the ships of "A" fleet, and so he made his passage through the North Channel in an organisation so arranged that his battle-squadron was surrounded with, first, a cordon of cruisers, and outside that again a cordon of torpedo-boats. To obtain the necessary strength in torpedo-boats for this purpose, he had, previous to leaving Belfast, brought up the Kingstown flotilla to reinforce the torpedo-boat flotilla that had Belfast as its base. His organisation was so arranged, in fact, that it would have been impossible for a destroyer to get within striking distance, without being first put out of action under the time limit by some of the ships of the protecting cordon. By the rules two torpedo-boats could put one destroyer out of action in five minutes, whereas the destroyer would require ten minutes to put both boats out of action, and so the torpedo-boats of the defensive

cordon on the Scotch side of the Channel—from which attack was most probable—were grouped in pairs. The Lamiah destroyers fully realised the hopelessness of any attempt to cripple the "A" fleet, and, though half a dozen of them were seen, no attempt at attack was made. On emerging from the Channel, and when just abeam of Rathlin Island, the weather grew very thick, and the Admiral took advantage of it to dismiss the torpedo-boats with orders to slip back to Belfast under cover of the sheltering fog. The fleet then drew into closer organisation, and the rendezvous was reached at 9 p.m. that evening. According to the rules "A" in its search for the convoy was to be allowed a start of "B" fleet, and had the locality of the convoy's rendezvous been fixed southward of lat. 51° N., and within a radius of some 350 miles of the Fastnet, "A's" advantage in start would have been rendered practically nugatory, for any point in that area would have been nearer to "B" at Milford than to "A" at Belfast. The Admiral, therefore, concluded that the rendezvous would be somewhere in the area of sea north of lat. 51° N., and this was where his search for the convoy was to be made. To describe his method without a map is not easy. If you take a fan with twenty-four ribs, and place it opened to its full extent on a chart, with the handle at the Atlantic entrance to the North Channel, one outermost rib will run up the Scottish coast to north of the Butt of Lewis, the other south down the Irish coast to opposite the Blaskets at entrance to Dingle Bay. Each rib of the twenty-four would represent the course taken by one of the ships of "A" fleet, for the eight battleships also scattered for the search. Each ship would steam on its appointed rib at a given rate and speed, and so at any precise moment its exact position would be known to the others, and by contracting the fan at night each ship could at all times communicate with the ribs on either side. As each ship drew to the end of its rib it curved southward, also on a prescribed course, and repaired to an appointed rendezvous. To connect the fan with "A's" signal stations on the Irish coasts were the three slow cruisers *Mersey*, *Thames*, and *Arethusa*. With clear weather and favourable conditions, the convoy must have been found anywhere in the vast area thus searched, but unfortunately, with but brief breaks, fog prevailed, and that not localised, but over the whole area of search. After searching south as far as the Porcupine Bank, about 140 miles west of Connemara, and the fog being so dense that ships could easily pass close to the convoy without seeing it, the Admiral made a cast back, and on August 1st the battleships were in company at a rendezvous on the Rockall Bank, about 250 miles due west of North Uist in the Hebrides, and the same distance north of the Porcupine Bank, and about three that afternoon news came in that "B" fleet had left Milford at 5 a.m. on the 30th, steering for the south coast of Ireland. This left the southern area of search clear for "B" fleet, and on the morning of August 2nd the Admiral signalled:—"Unless 'B' fleet has had a fog and missed the convoy the game is up, and they are back this evening at Milford. My proper move would therefore be to return quietly to Belfast round the north of Ireland, so as not to give the destroyers a chance. But as I am certain the Admiralty wishes to gain some

information as to torpedo-boats and destroyers, I have ordered the whole of our torpedo-boats to meet the squadron off Waterford, and I shall, with as many cruisers as I can collect, proceed up the Irish Channel to Belfast in the same formation as we left in. If 'B' fleet is going back through the North Channel we shall meet it on the wav. If they come out to meet me I shall let cruisers and torpedo-boats at them and try and claim them." Such then was Sir Harry Rawson's programme, but before it could be carried into effect he, on August 4th, soon after noon, received the news that "B" fleet had found the convoy and carried it safely into Milford, and that hostilities were therefore to end. The only incident that occurred on the 3rd was the sighting of their own cruiser *Furious*, which had been captured by a cruiser squadron of the enemy, and was, according to the rules, returning to Belfast, and was prohibited from giving any information. Later in the afternoon the battleship squadron sighted *Europa*, *Argonaut*, *Gladiator*, and *Vindictive*, but all chance of overtaking these fast cruisers was hopeless. The "A" fleet anchored at Portland early on the morning of the 4th.

"B" fleet, as we already know, had left Milford Haven at five on the morning of the 30th, and interest in it was keen, for its scouting operations were to be assisted, in their signalling, by the use of wireless telegraphy, the Marconi installation having been fitted on board the flagship and the cruisers *Europa* and *Juno*. Admiral Domville had two facts on which to base his strategy: (1) that as war was declared at 10 a.m. on the 29th, "A" fleet had nineteen hours' start of him; and (2) that the convoy's assigned station was lat. $51^{\circ} 40'$ N., and long. 19° W., i.e., some 350 miles due west of Bantry Bay, 570 miles from Belfast, and 750 from Milford Haven. He could not of course sail direct for his convoy, for he would have have been reported by the signal stations on the enemy's coast. He then proceeded for 180 miles W.S.W. from Milford until arrival at lat. $50^{\circ} 35'$ N., and long. $9^{\circ} 30'$ W., known as rendezvous A, and about 60 miles to the south of Cape Clear. On this latitude he steered due W. for 197 miles, until arrival at long. $40^{\circ} 40'$ W., a point 176 miles from the convoy, due E.S.E. direction, and known as rendezvous B. A third rendezvous, C, was fixed in lat. $49^{\circ} 40'$ N., long. $11^{\circ} 3'$ W., 149 miles due E.S.E. from B, and therefore 325 miles due E.S.E. from the convoy, while a straight course from the convoy to C would pass through B. The cruisers *Europa*, *Argonaut*, *St. George*, *Vindictive*, *Gladiator*, *Diana*, and *Sappho* were sent on ahead at a speed of seventeen knots, five or six knots faster than the squadron. Their orders were when they reached the convoy to send the *Europa* to B at her highest speed to establish wireless communication with the *Juno*, which would pass on her report to the fleet. If through any hitch the convoy on arrival at B should not have met the fleet, they were to proceed to C and there await further orders. There they would be well to the southward of the enemy's likely area of search, farther from Belfast and nearer to Milford. Domville had received misleading reports that "A" fleet had gone down the Irish Channel, though, as the reader knows, they never approached it during the whole course of manœuvres. He consequently kept the *Juno*, with her invaluable installation, 20 miles on his starboard flank to give him news

if any signs of the enemy were observed. A was reached about 10 p.m., July 30th, and B at 3.15 on the afternoon of the 31st. Course was then altered to W.N.W., *i.e.*, straight for the convoy, 176 miles distant. So keen was the Admiral in his desire to get news, that at 2.30 he had pushed on with only nine battleships, as the *Thunderer* could only do ten knots, and was left behind to come on as quickly as she could. No wonder he was eager, for the game was very nearly won, and at 7.30 that night the following signal was received by the *Alexandra* by the wireless telegraphy: "*Junio* to flag.—Communicated with *Europa* about 60 miles off convoy rendezvous. She was there with convoy, and has now returned to squadron. Convoy following at about nine knots. No enemy sighted by her or by us." This message was conveyed by wireless telegraphy from the *Europa* to the *Junio* when the ships were 25 miles apart, and sent in same way from *Junio* to flagship, 30 miles distant. By 11.30 that evening the convoy was in the safe custody of the "B" fleet. The way in which Admiral Domvile's dispositions went without fault or hitch was undoubtedly in large measure due to the excellence of the Marconi system. The *Junio* was kept some ten, fifteen, or twenty miles ahead, and could inform of everything, weather conditions, if fishing fleets in path of squadron, etc. For example, when "B" fleet was entering Berehaven, the *Junio* informed the Admiral of the state of the anchorage, though neither she nor it were visible, the huge mountain of Bere Island lying between them and the fleet. By the morning of the 3rd Admiral Domvile had brought his fleet into Milford Haven absolutely unmolested.

As for the work done by the torpedo flotillas there is little to be recorded. Neither acted against the enemy's ships, and there were only here and there slight encounters between the two types of craft, which were solely employed in keeping watch over the enemy's coast. A claim (disallowed) was made by two boats of the Belfast flotilla to have put out of action a Lamlash destroyer. One of the Milford Haven destroyers would appear to have put No. 72 out of action by a dash into Queenstown Harbour, where she was lying, while a claim—which does not seem to have been established—was made by two of the Milford Haven destroyers to have captured Nos. 73 and 83, both Waterford boats, though the boats maintained they escaped into Queenstown. Finally, the *Niger* and some destroyers, again from Milford, landed a party at Bere Island, which captured the signal station there, and sent the men in charge across the island, rendered the instruments useless, locked the door, and brought the keys to the Admiral. A pretty and dashing little piece of work, but whether such was contemplated under the rules, or would be possible in war, when stations would have military guards, is more than doubtful.

Navies, Foreign. See FOREIGN NAVIES.

Navy League, The, was founded in 1895, and is a strictly non-party organisation formed to urge upon Government and the electorate the paramount importance of an adequate navy as the best guarantee of peace. The League, which has branches throughout the world, carries on its work by the distribution of literature, public meetings, the delivery of lectures, and by educational propaganda in

public and other schools. **President,** the Earl of Drogheda; **Secretary,** Commr. W. C. Crutchley, R.N.R. **Offices,** 13, Victoria Street, Westminster.

NAVY, THE BRITISH.

For early history of the Navy see ed. '87, and for continuation of history and modern progress, eds. '98 and '99. See also ADMIRALTY, NAVAL MANŒUVRES, FOREIGN NAVIES, and SESSION, sect. 27.

Finance.—The Navy Estimates for '99-1900 amount to a net total of £26,594,500, as compared with £23,778,400 voted for the year '98-99, thus showing an increase of £2,816,100. Of this increase the votes connected with the *personnel* account for £452,600, including an increase of £55,300 in the non-effective votes, which will now amount to £1,890,700. The increase in the ordnance vote is £161,600, in the works vote £145,000, and in various miscellaneous votes £40,900. The shipbuilding vote shows an increase of £2,016,000, but of this no less than £2,000,000 is for liabilities due to the supplemental programme of August '98, for which was authorised an expenditure of some £8,000,000, to be extended over three years and a half. The increase therefore, it will be seen, is due in the main to this supplementary programme, and secondly to the increase in all ranks and ratings necessary to meet the larger requirements of the fleet, which, of course, is reflected in every vote that is concerned with *personnel*. The increase in the ordnance vote naturally keeps pace with the shipbuilding programme, and it must be remembered, also, that by the end of the financial year the work of converting the breech-loading guns into quick-firing in all sea-going ships will be practically completed. The increase in the works vote is for new works, additions, and alterations both at home and abroad—with regard to the latter, more especially at Malta, Bermuda, Esquimaux, and Wei-hai-Wei. The abstract of expenditure is as follows:—

Effective Services.	£
Wages, etc., of Officers, Seamen, and Boys, Coastguard, and Royal Marines	5,242,700
Victualling and Clothing for the Navy	1,606,700
Medical Establishments and Services	176,600
Martial Law	12,200
Educational Services	90,600
Scientific Services	69,500
Royal Naval Reserves	271,000
Shipbuilding, Repairs, Maintenance, etc. :—	
Section I.— <i>Personnel</i>	2,417,000
Section II.— <i>Matériel</i>	3,799,000
Section III.—Contract Work	6,601,000
Naval Armaments	2,710,800
Works, Buildings, and Repairs at Home and Abroad	795,100
Miscellaneous Effective Services	248,200
Admiralty Office	261,600
Total Effective Services	£24,302,000

Non-Effective Services.	
Half-Pay, Reserved and Retired Pay	774,700
Naval and Marine Pensions, Gratuities, and Compassionate Allowances	1,116,000
Civil Pensions and Gratuities	341,500
Total Non-effective Services	£2,232,200

Extra Estimate for Services in Connection with the Colonies.

Additional Naval Force for Service in Australasian Waters—Annuity payable under	£	60,300
Grand Total	£	26,594,500

In vote 1 there is a real increase of £256,200, for though the apparent increase is but £254,700, the vote is decreased by a transfer of £1500 to vote 8. This increase is mainly due to provision for additional numbers for the fleet, as shown under vote A, and to variations in ranks and ratings, and in rates of pay and allowances generally. In vote 2, for victualling and clothing, the increase is £115,000, and is mainly on provisions, on savings—that is to say, payment for provisions not taken up—mess traps, seamen's and marines' clothing—owing, of course, to the increased numbers—victualling stores, and finally for the first cost and maintenance of certain craft employed in connection with the victualling-yards. The increase in vote 3, medical establishments, is £9600, and is in the main due to increased requirements on account of hospital and infirmary provisions and stores, caused by the increase in the *personnel* of the fleet. Moreover, there is not only no appropriation in aid to this vote, but there is added to it the sum of £2600 on account of the reduction in the amount of contribution from Greenwich Hospital in respect of the maintenance of patients in naval hospitals. The increase of £800 in vote 4, martial law, is due almost entirely to increased provision for courts-martial and naval prisons at home and abroad. Vote 5, educational services, has been substantially reduced by a decrease in the expenses of the training of naval cadets, and the net increase stands at £4000. This is accounted for largely by the increase of the educational staff of the fleet, again necessitated by the augmentation of the *personnel*, and by increased provision on account of the larger number of officers studying at the Royal Naval College, Greenwich. Vote 6, for scientific services, shows an increase of £2300, mainly on account of expenses in connection with the observations at Cape of Good Hope and Greenwich, and the increased cost of preparing charts and of coast, etc., surveys—reduced, however, by heavier receipts from the sale of charts. It is worth noting that whilst in '94 the amount received by sale of charts was £10,710 1s. 4d., in '98 the sale of charts produced not far short of double—viz., £17,231 6s. 6d. The net increase of £14,000 in vote 7, Royal Naval Reserves, is well spent, since it allows for increased provision for officers undergoing various courses of training, for an additional number of Royal Naval Reserve men (qualified seamen and seamen classes), for the full attendance at drill of the increased number of firemen entered during '98-'99, for the giving of an additional number of Royal Naval Reserve men six months' training in the fleet, and for an increase in the number of seamen pensioners. Vote 8, shipbuilding, repairs, maintenance, etc., shows also an increase in all three sections—viz., *personnel*, *matériel*, and contract work. Section 1 shows an increase, apparently, of £199,000, though the real increase is £1300 less, the amount transferred to this vote from vote 1. The vast bulk of this increase is due on account of increased requirements for wages

of artificers, consequent on additional work in connection with the shipbuilding programme. In section 2 a saving of £52,000 is effected by the decrease of expenditure on timber, the net increase of £828,000 being in the main due to an increase on naval stores, and notably for the provision of armour and coal. In contract work, section 3, the increase is £989,000, due to additional provision for hulls of ships and machinery, gun-mountings and air-compressing machinery, machinery for shore establishments at home and abroad, and an increase in subvention paid for royal reserve of merchant cruisers. In Vote 9, naval armaments, there is a reduction in expenditure on projectiles and ammunition, small arms and miscellaneous, to an extent of over £100,000; while the bulk of the net increase of £161,600 is accounted for by payments on account of guns, torpedoes, and gun-cotton. In vote 10, works, buildings, and repairs, there is a very sensible reduction under the head of victualling-yards, coastguard stations, Royal Navy Reserve batteries, and observatories; while the net increase of £145,000 is accounted for by new works both at home and abroad. The increase of £15,300 in vote 11, miscellaneous effective services, is due to various causes, the principal items being passage-money and conveyance of officers and seamen, lodging allowances, compensation for damage done by Her Majesty's ships, and contributions in aid of religious and charitable institutions. The Admiralty Office vote, 12, shows a net increase of £13,900, due almost entirely to increase in sub-head, salaries and allowances, owing to augmentation of staff. All the non-effective votes show the usual and inevitable increase. That for half-pay, reserved and retired, is £22,200; for naval and marine pensions, gratuities, and compassionate allowances it is £33,100; for civil pensions and gratuities £8600. In vote 16, that for additional naval force for service in Australasian waters, there is no variation.

Personnel.—The total number of officers, seamen and boys, coastguard and Royal Marines, in the Royal Navy allowed for in the estimates of '98-'99 was 106,390, being an increase on '97-'98 of 6340. In '99-1900 the force has been increased by 4250, and at the close of the financial year it will have reached 110,640. The increase of 4250 is thus distributed: 463 officers, 1700 petty officers and seamen, 215 engine-room artificers and artisans, 1000 stokers, 172 miscellaneous, 500 marines, and 200 boys under training. The increase in officers is not one bit more than is necessary to keep up with the continued expansion of the fleet. The increase in the executive ranks is 12 flag officers, 37 captains, 56 commanders, and 400 lieutenants. The number of engineer officers rises from 950 to 1050, but the increase is to be spread over two years. While there is no increase in the paymasters list, medical officers, chaplains, and naval instructors are added to, notably the former, who rise from 450 to 490. The chief gunners and chief boatswains rise from 80 to 100, while the gunners and boatswains increase from 920 to 1150. The chief carpenters and carpenters lists are also increased by 2 and 33 respectively. It will be seen, therefore, that there has been a very appreciable increase in the ranks of executive officers, both commissioned and warrant. The supplemental list has been increased by the entry of 50 more officers from the mercantile

marine, so as to meet the requirements of the fleet and to tide over the interval which must necessarily elapse before a supply of executive officers, who have gone through the regular training in the service, has been produced in the ordinary course. The rules governing the grant of full-pay leave on return from foreign service have now been extended, so as to include not only all classes of commissioned officers, but also warrant officers; and another boon in the way of leave is that the Admiralty may, at their discretion, grant sick leave on full pay for a period not exceeding three months to officers, either at home or abroad, who become unfit for service through causes outside of their own control. The rules governing the examination, entry, and course of training of the engineering students at Keyham and Devonport Dockyard have been revised and improved. There has long been a scarcity in shipwright ratings; but since April there has been in force a scheme by which shipwrights are trained in Her Majesty's dockyards for the Navy. When fully trained they are drafted to sea-going ships, and, after completing their allotted time in the Navy, they are eligible to be again taken on the dockyard establishments. Under this scheme 150 naval shipwright apprentices have been entered by open competition.

The system under which officers of the executive branch of the Navy reckon their service while on full pay for the several purposes of promotion, retirement, etc., has been considerably simplified by some new regulations issued from Whitehall. The principal change is in connection with "service in a ship of war at sea," which term has been given a more rigid definition, and in future will be as follows:—1. All time served on board ships or vessels commissioned for service, or in vessels actually employed in surveying. 2. Service in coastguard ships, port guardships, and Royal Naval Reserve drillships whilst kept fully manned for sea service. 3. Service in sea-going tenders to coastguard ships, in training duties during the cruising season, and in such other tenders to harbour-ships as the Admiralty may declare to be sea-going tenders. To qualify a captain for promotion he must have served in a ship of war for six years during peace, for four years during war, or five years during peace and war combined. Captains who arrive at their turn for promotion without having completed the qualifying service are to be retired. To qualify a commander for promotion he must have completed two years' service as a commander, of which one year must have been in a ship of war at sea. To qualify a lieutenant for promotion he must have completed four years' service as a lieutenant, of which three years must have been in a ship of war at sea. A lieutenant, however, may be promoted to rank of commander for gallantry in action, provided he has completed two years' service, of which one year must be in a ship of war at sea. The new regulations, although not issued until August, were made retrospective from the commencement of the financial year. An increase was also made in the active lists, and by an Order in Council, dated Nov. 29th, '98, the future numbers of the undermentioned ranks upon the active service lists were made as follows: flag-officers, 80; admirals of the fleet, 3; admirals, 12; vice-admirals, 22;

rear-admirals, 43; captains, 245; commanders, 360; lieutenants, 1550. The rate of increase in the executive lists is to be as follows: flag-officers, 1 each year, commencing on January 1st, '99; captains, annual increase of 4 in '98, 5 in '99, 5 in 1900, and so on in each succeeding three years; commanders, 6 each year, commencing with '98. There is also to be a considerable increase in the numbers of the warrant officers lists, which are to number as follows: chief gunners and boatswains, 100; chief carpenters, 20; gunners and boatswains, 1150; carpenters, 240.

The Naval Works Act.—A statement of estimated expenditure on naval works on March 1st, '99, under the Naval Works Act, '97, was issued as a parliamentary paper. The statement shows a total increase from £1,270,868, the estimated expenditure in '98-99, to £3,638,665, the total estimated expenditure to March 1st, '99. Thus, the expenditure on Gibraltar for various purposes is to be increased from £248,000 to £903,174. Other increases are: for the enclosure and defence of Portland Harbour, from £43,000 to £254,590; for deepening harbours and approaches, from £69,000 to £650,587; for Keyham Dockyard Extension, from £245,000 to £518,125; for Portsmouth Docks, from £1000 to £373,442; for Hong Kong Dockyard Extension, from £54,600 to £61,965; for Haulbowline Improvements, from £18,207 to £38,075; for Keyham Engineers College, from £3500 to £23,545; and for Dartmouth College for naval cadets, from £52,000 to £52,165. The item of superintendence and miscellaneous charges is to be increased from £48,000 to £132,410, while two new items are £26,325 and £17,658 for Chatham Naval Hospital and Walmer Marine Depot. No increase is provided in the estimate of £15,000 for Colombo Dock.

Marines, Royal.—This corps is a military body specially organised and trained for service in the fleet as well as on shore. It constitutes an important part of the naval forces of the country, and is supported by funds taken in the naval votes. In the '99 edition full particulars of the corps were given, and we need here only note the conditions that have governed the increase of the corps during the year. Recruiting for the corps has been brisker than ever, and it has been possible to keep the physical conditions exacted for recruits at the same high standard as heretofore. In '98, 2871 recruits were raised for the corps, and the waste for the same year amounted to 2138; but of these 200 men did not relinquish the service, but were, at their own request, transferred to serve in other ratings, such as stokers, ships' police, artificers, etc. The net pay of the marine on shore has been increased by 2d. a day, and he now gets 10d., in place of 8d. Formerly his net pay was 1s. 2d. per diem with 1d. beer money—i.e. 15d. From this 7d. per diem was deducted for rations and groceries, leaving him with 8d. per diem net. Now from the 1s. 2d. only 4d. per diem is deducted for groceries and rations, leaving him with 10d. per diem net pay, but he gets no beer money. In our '99 edition we touched on the question of the garrisoning of coaling stations by the Royal Marines. It is a question that admits of much to be said both for and against, and one that has exercised considerably the minds both of the Admiralty and those of the public who take an intelligent interest in service questions.

At present marines are taking a part in garrisoning both Wei-hai-Wei and Vancouver, the force at the former being mainly infantry, while on a smaller scale that *corps d'élite*, the Royal Marine Artillery, are in evidence at the latter station. During '98 the average number of non-commissioned officers and men on shore was 7079, of whom over 6000 were put through the annual course of musketry. This year the training in the depot and divisional batteries has been much improved. Old breech-loading guns have been gradually replaced by modern quick-firing weapons as they became available, and there has also been great improvement in the facilities accorded for carrying out the instruction in ammunition. As was the case last year, battalions of the corps took part in the Army Manœuvres on Salisbury Plain during the early autumn.

Royal Naval Reserve.—During the year ending December 31st, '98, 1711 seamen of this force were embarked for six months' training in ships of the Royal Navy in commission; but this year some 2000 men of the Reserve will have done their six months afloat. The result of the entries in the seamen class, drawn mainly from the fishing population throughout the United Kingdom, has been very satisfactory. The coastguard ships have been kept up throughout the year with their full complement, and men have also done their six months' training on the Channel, Mediterranean, and North American stations. The men are, as a rule, well reported on as thoroughly amenable to discipline and taking much interest in their instruction, and a very large percentage on the completion of their period of training pass the necessary examination for promotion to the qualified seamen class. During the present financial year the force has been increased by the addition of 1000 men to the seamen class. In the estimates for '98-99 provision was made for increasing the executive officers list by 100. This has not only been done, but the candidates on the list for appointments enormously exceed any possible vacancies that may occur; and this in spite of the fact that a number of officers have left the Royal Naval Reserve to enter the Royal Navy on the supplementary list. The officers in October numbered as follows: lieutenants, 388; sub-lieutenants, 551; midshipmen, 556; senior engineers, 62; engineers, 147; and assistant engineers, 164. By an Order in Council of May 19th, '98, an increase, bringing the list of engineer officers up to 400, was sanctioned; and this list, as will be seen from the above figures, is now near completion. Regular instructional classes for engineers have been established in the home dockyard reserves and have been thoroughly successful, so much so, indeed, that the number of applicants to attend considerably exceeds the number authorised. A great boon to the men of the force has been the authorisation of an increased allowance of clothes. The whole question of the Royal Naval Reserve, and more especially their training, was dealt with very fully in our issues of '98 and '99, and it is unnecessary to here recapitulate. The modernisation of the drillships proceeds but slowly, for of the nine ships the only two that are modern ships, as apart from hulks, are the twin-screw third-class cruisers *Medea* and *Medusa*, which have since '95 been stationed at Southampton and North Shields respectively. Two first-class

gunboats, the *Antelope* and *Gleaner*, are also kept permanently in commission at Portishead and Gravesend respectively, for the training of officers and men of the Royal Naval Reserve.

Shipbuilding Programme.—Progress of ships building, whether of the older programme or of those of last year, was influenced by the unprecedented activity in mercantile shipbuilding which followed the settlement of the prolonged labour dispute lasting from July '97 until February '98. The disarrangement of work arising from those difficulties produced a sensible effect on the completion of ships in '98-99, the most serious result being the delay experienced in the supply of steel and other material required by private firms to whom Admiralty orders had been given. This was particularly felt in the case of ships which had been begun in the private yards in '98 and '99. The dates of laying down the ships were thrown onward. The manufacture of armour was also affected by the introduction of the Krupp process, necessitating a reconstruction of plant. While the output of armour continues to increase, it can hardly yet be said to have kept up with the requirement. Naturally the new ships which are building in the dockyards have not been affected to quite the same extent as those under construction by contract, but at the same time they have suffered to a certain extent. Of the battleships in hand of the *Majestic* class all are already in commission, although the later vessels were delayed. Of the six battleships of the *Canopus* class it is hoped that the *Canopus* and *Ocean* may be in commission before the end of '99; the *Goliath* at Chatham will probably be about three months later. The *Albion* and *Glory*, building respectively at the Thames Ironworks and at Birkenhead, should be delivered before the close of the financial year '99-1900. The *Vengeance*, building at Barrow, is also in the water, and according to contract should be delivered in July 1900. Of the *Formidable* class all have now been launched. The *Formidable* and *Irresistible* were launched before the end of '98. The *Implacable* took the water in March '99, while the *London* and *Bulwark* went off the slips in the autumn of the same year. The *Venerable* was launched at Chatham in November '99. The laying down of the later vessels of this class, the *London*, the *Venerable*, and the *Bulwark*, was rather earlier than was anticipated, and the rate of advancement has somewhat exceeded expectations. These vessels are improved *Majestics*, with new and more powerful types of guns and armour of the latest quality, associated with higher speed and water-tube boilers. The four battleships ordered under the supplementary programme are to be known as the *Duncan* class. They are building the *Duncan* and *Cornwallis* at the Thames Ironworks, the *Exmouth* at Birkenhead, and the *Russell* at Palmer's, Jarrow. These vessels are intermediate in size between the *Formidable* and *Canopus* classes, and have practically the same armament as the *Formidable*, but are to have superior speed and thinner armour, which will be of the latest and most improved quality, possessing much greater defensive power, in proportion to its thickness, than armour used in the *Majestic* class. Belleville boilers with economisers will be fitted. Of the first-class cruisers of the older programme all have completed their

Ships of the British Navy, completing, building, or ordered (Nov. '99).

* Steam turbine boat.

trials, and have been delivered, with the exception of the *Spartiate*, still completing at Pembroke. It is expected, however, that the last-named vessel will also be completed by the end of the financial year. The six armoured cruisers of the *Cressy* class, building by contract, have been delayed somewhat in construction for the reasons above given. It is hoped that the contract dates for delivery will be kept. The four large armoured cruisers, two of which belong to the original programme for '98-99, and two to the supplemental programme, are in hand, one at Pembroke, and the remaining three by contract. The type will be known as the *Drake* class. They will have a displacement of 14,000 tons, speed 23 knots, and 30,000 indicated horse-power. The armament will include two 9·2-in. guns of the latest and most powerful type, with armour protection equal to that of the *Powerful* class, sixteen 6-in. quick-firing guns in casemates, and seventeen smaller guns. Side armour 6 in. thick will be associated with strong steel decks. They will be fitted with Belleville boilers and economisers. These four vessels will be named the *Drake*, building at Pembroke, the *King Alfred*, at Barrow, the *Leviathan*, at Clydebank, and the *Africa*, by the Fairfield Company. Two other cruisers were included in the supplemental programme; they are of new design, the *Bedford* and the *Monmouth* being their names. Both these ships will be built at Glasgow. They will have a displacement of 9800 tons, and a speed of 23 knots, with 22,000 indicated horse-power. The heaviest gun carried will be a 6-in. of the latest type, protected by armour about 4 in. thick. Vertical side armour of the same thickness will be carried over a considerable portion of the length, and they will be fitted with Belleville boilers. Of the second-class cruisers, all of those of the *Arrogant* class have been completed and are in commission, with the exception of the *Gladiator*, which is ready to hoist the pennant. The three vessels of the improved *Talbot* class—the *Hermes*, *Hyacinth*, and *Highflyer*—have all been delivered, and will shortly be ready for sea. Of the ten third-class cruisers of the *Pelorus* type, only two remain in hand—the *Pandora* and *Pioneer*—the latter vessel having been launched in June '99. Six sloops of the *Condor* class are in hand, but these, with the gunboats of the *Dwarf* class, are all approaching completion. The supplementary programme provided for twelve additional torpedo-boat destroyers; orders for these have been placed. Four experimental vessels of higher speed have been ordered, one of which has been fitted with a steam turbine, and the trials are shortly to be begun. The new royal yacht has been considerably advanced, and was expected to make her trials in November '99.

New Programme, '99-1900.—The new programme, announced to the House of Commons in March, consisted of two battleships, two armoured first-class cruisers, three smaller cruisers, two sloops, and two first-class torpedo-boats. The two battleships will be built at Chatham and Devonport. They are to be named the *Montagu* and *Albemarle*. The two first-class cruisers will be of the same design as the *Bedford* and *Monmouth*. They are to be named the *Kent* and *Essex*, and are to be built at Portsmouth and Pembroke respectively. The two sloops will be in

their general character similar to the *Phoenix* and *Algerine*, but will be propelled by twin-screws and be of moderate draught, suitable for river service. Preparations have been made for building them at Sheerness.

General Administration.—In addition to the shipbuilding and completion of new vessels, the following ships underwent large repairs, and in some cases reconstruction, during '98-99. *Dreadnought*, *Forfe*, *Brisk*, *Cossack*, *Tartar*, *Superb*, *Edinburgh*, *Pylades*, *Buzzard*, *Dolphin*, *Comus*, *Crescent*, *Orlando*, *St. George*, *Sybil*, *Bellona*, *Marathon*, *Seagull*, *Collingwood*, *Cambrian*, *Blonde*, *Calypso*, *Salamander*, *Sheldrake*, *Aeolus*, *Charybdis*, *Retribution*, *Spartan*, *Rainbow*, and *Philomel*. The following ships are also in hand for repairs: *Hecate*, *Speedy*, *Active*, *Scout*, *Pique*, *Blanche*, *Blake*, *Astræa*, *Cordelia*, and *Partridge*. A large number of vessels have made their steam trials, including several fitted with various types of water-tube boilers. The manufacture of guns proceeds satisfactorily, little or no difficulty being experienced in keeping pace with the requirements of the fleet. One of the new design of 12-in. breech-loading wire-wound guns has been delivered, and the result of a trial was that the new weapon was considered satisfactory. This type will be supplied to the *Formidable* class of battleships. Another new type which has been approved is the 9·2-in. breech-loading wire gun, which is to be mounted in the *Cressy* class of armoured cruisers and also in the *Drake* class, the type ship of which is now building at Pembroke. The intention to convert all the 6-in. breech-loaders to quick-firers for sea going has been carried out, and the same course is to be adopted with the guns for the Royal Naval Reserve batteries and drillships. Magazine rifles have been supplied to the whole of the naval service. As regards ammunition, no delay whatever has been experienced in preparing it in sufficient quantities to meet all the requirements of the fleet; and, as a matter of fact, the output could easily be very considerably increased should there be any need. Nearly all quick-firing guns in the fleet have now been supplied with cordite cartridges, and the same may be said with regard to the heavy breech-loading guns. This policy will be continued, as cordite is now considered to be of greater value than the old smoky powder.

Launches and Trials.—The vessels launched since the last issue of the *ANNUAL* are the *Implacable*, launched March 11th, '99; *Bulwark*, Oct. '99; *London*, Sept. 21st, '99; *Pioneer*, June 28th, '99; *Spartiate*, Oct. 27th, '98; *Royal yacht*, May 9th, '99; *Hyacinth*, Oct. '98; *Formidable*, Nov. 17th, '98; *Bramble*, gunboat, launched Nov. 28th at Liverpool; *Irresistible*, launched Dec. 15th, '98; *Condor* and *Rosario* floated out at Sheerness on Dec. 15th, '98; *Glory* floated out at Laird's yard March 11th, '98; *Brilomart* floated out at Messrs. Potter's yard at Liverpool on March 29th. The trials which have been made during the period under consideration include those of vessels of all types. The *Pactolus*, a third-class cruiser, in rough weather averaged 20½ knots, with 7201 horse-power; the *Pegasus*, a similar ship, with Reed's boilers, made a speed of 20 knots with 5400 horse-power, and 21½ knots with 7134 horse-power; the *Avon*, torpedo-boat destroyer, made a speed of 30·164 knots with

6243 horse-power; the *Sylvia*, with 6500 indicated horse-power, made an average speed of 30.194 knots; the *Fawn*, with 6454 indicated horse-power, made 30.267 knots. The *Seagull*, fitted with the Niclausse type of water-tube boiler, has also made successful trials. The *Argonaut*, first-class cruiser, with 3600 indicated horse-power, showed a consumption of coal of 2.13 lbs. per indicated horse-power; while the *Andromeda*, with 3388 indicated horse-power, in a similar trial had the coal consumption work out at 1.98 lbs. per horse-power per hour. At her concluding trial the *Andromeda*, with 16,781 indicated horse-power, made a mean speed of 20.4 knots, and the *Argonaut* also finished her trials successfully. The *Bittern*, torpedo-boat destroyer, with 6400 indicated horse-power, attained a speed of 30.364 knots; the *Flirt*, with 6468 indicated horse-power, a speed of 30.009 knots; the *Coquette*, with 5740 indicated horse-power, made a speed of 30.371 knots. The *Sheldrake*, which is fitted with Babcock & Wilcox's water-tube boilers, on a three hours' full-power trial, with 4050 indicated horse-power, made a speed of 20.5 knots. A further trial of the *Bittern* made at full speed with 6659 indicated horse-power made a speed of 30.403 knots. During a thirty-hours' trial of the third-class cruiser *Psyche*, good results were obtained; and the results of her eight-hours' full-speed trial were, with 5095 indicated horse-power, 19.3 knots. The *Pomone*, a similar vessel, with 7340 indicated horse-power, made a speed of 20.8 knots. The results of the trial of the first-class cruiser *Ariadne*, with 19,156 indicated horse power, were a speed of 21.5 knots. The results of a series of trials for coal consumption, with sister cruisers, were as follows: the *Amphitrite*, 1.54 lbs.; *Europa*, 2.24 lbs.; *Diadem*, 2.21 lbs.; *Ariadne*, 2.05 lbs.; *Argonaut*, 2.02 lbs.; *Andromeda*, 1.98 lbs.; and *Niobe* 1.76 lbs. The *Albatross*, torpedo-boat destroyer, at a full-speed trial, made a mean speed of 32.294 knots, the *Orwell* 30.4 knots, and the *Mermaid* 30.1 knots. The *Pyramus*, at a four hours' full-speed trial, with 7303 indicated horse power, made a speed of 20.7 knots. The *Mermaid*, torpedo-boat destroyer with Thornycroft boilers, on a three-hours' trial made a speed of 30.926 knots. The *Cygnets*, torpedo-boat destroyer, made an average of 30.6 knots. The gunboat *Dwarf* also made satisfactory trials. The *Hermes* and *Highflyer* on trial made, the first, with 10,224 indicated horse-power, 20.5 knots; and the latter, with 10,344 indicated horse-power, 20.1 knots. The *Prometheus*, with 5183 indicated horse-power, made a speed of 19.8 knots. The trials of the *Canopus*, battleship, were completed, the vessel on an eight-hours' full-power trial, with 13,763 indicated horse-power, made a speed of 18.5 knots. The gunboat *Thistle*, with 1350 horse-power, made a speed of 13.5 knots. The *Coquette*, torpedo-boat destroyer, with 5868 indicated horse-power, made a speed of 30.211 knots. The *Cheerful*, torpedo-boat destroyer, with 5632 indicated horse-power, made a speed of 29.941 knots. Considerable interest attaches to the trials of the *Viper*, torpedo-boat destroyer, which was launched on Sept. 6th, '99, and of which the propelling machinery consists of four steam turbines, each driving a separate shaft, fitted with two propellers of 3 ft. 4 in. diameter, and 4 ft. 6 in. pitch. The speed of the turbines at the maximum power will be a thousand revolutions

per minute. Steam is to be supplied by four Yarrow water-tube boilers. The *Viper* has a length of 210 feet with 21 ft. beam, and is built on lines which are an exact copy of those of the *Mermaid*, torpedo-boat destroyer, which attained a mean speed of 30.9 knots on a three-hours' trial. It is estimated by her designers that the *Viper* will attain a speed of 35 knots, which is actually at the rate of 40 land-miles an hour.

Incidents and Appointments.—The *Devastation*, a second-class battleship, was commissioned at the end of '98 as port guard-ship at Gibraltar, where she takes the place of the harbour defence ship *Rupert*, and thus adds to the strength of the Mediterranean Squadron. Owing to the absence of the Channel Squadron from England it was decided to mobilise the Reserve Squadron, the political situation at the moment seeming to require the presence of a force in the Channel. The ships included the *Nile*, *Trafalgar*, *Sanspareil*, *Benbow*, *Rodney*, *Collingwood*, *Howe*, *Thunderer*, *Alexandra*, *Colossus*, *Australia*, *Galatea*, *Melampus*, and *Severn*. These ships had their crews filled up to sea-going strength, were coaled, and completed their stores. They then assembled at Portland, and were not demobilised until January '99. In November '98 the *Terrible* was commissioned to take a draft for the *Camperdown* to Malta, and similarly the *Edgar* left for China with relief crews. The *Astræa*, *Forte*, *Cordelia*, and *Blenheim*, with the crew of the *Barfleur*, arrived at home to pay off. The ship's company of the *Blake* was turned over to the *Niobe*, and the place of the *Cordelia* in the Training Squadron was taken by the *Comus*. The following appointments were made: Vice-Admiral Sir Harry Rawson to command the Channel Squadron, in place of Vice-Admiral Sir H. Stephenson, who resigned owing to ill-health; Capt. A. L. Winsloe was appointed to the *Niobe*; and Capt. A. C. Corry was appointed to the *Hood*. The third-class cruiser *Philomel* relieved the *Phæbe* on the Cape station. The *Buzzard*, sloop, relieved the *Pelican* on the West Indies station. The *Scout* paid off. An interesting return on naval expenditure and the mercantile marine was issued as a parliamentary paper. Returns of a similar nature will be found in the *Times* of Sept. 7th, '94, Jan. 20th, '96, and Nov. 22nd, '97. In January Capt. F. Pole was appointed Commodore of the second class in charge at Hong Kong; Capt. H. J. May to the *Mars*; J. Ferris to the *Magnificent*; and H. B. Williams to be Inspector of Warlike Stores. In February, Rear-Admiral L. A. Beaumont was selected to succeed Rear-Admiral Palliser in command of the Pacific, and the *Warspite* was commissioned by Capt. T. P. Walker as his flagship. Admiral Beaumont was succeeded as Director of Naval Intelligence by Admiral Custance. Capt. G. A. Gifford was appointed to the *Comus* as Commodore of the second class during the fishery season in Newfoundland. The third-class cruiser *Pylades* was commissioned for service in Australia; the *Oplando* and *Aurora* hoisted the pennant to relieve the *Undaunted* and *Narcissus* in China, the last-named vessels returning to pay off. The first-class cruiser *Theseus* relieved the *Grafton* in the Mediterranean. On March 18th the second-class cruiser *Talbot* arrived at Spithead with the

remains of the late Lord Herschell on board; after making good defects the vessel returned to the North American station. The third-class cruiser *Pegasus* left for the South-East Coast of America, and the *Edgar* for Malta with the crew of the *Royal Oak*. During a run of the *Terrible* home from the Mediterranean, when steaming at 15 knots across the Bay of Biscay, one of the tubes of one of the port boilers burst, the scalding steam which escaped causing the death of one stoker, and injuring five other men. Four other tubes had also given way during the cruise. They were all welded instead of being solid bronze, and to this cause the unfortunate accident has been attributed. The report of the Medical Director-General of the Navy for '97 showed that during that year the death rate of the total force was 5·23 per thousand, the invaliding rate being slightly increased from that of the previous year. The total force in the service afloat was 80,540. The lowest sick rate was on the South-East Coast of America, and the highest on the China station. In April, Vice-Admiral Sir F. G. Bedford was appointed Commander-in-Chief of the North American and West Indian station, hoisting his flag in the *Crescent*. He relieved Admiral Sir John Fisher, who returned home in the *Renown*, in which ship he has since left, to take command of the Mediterranean station, relieving Admiral Sir John Hopkins in July. The second-class cruiser *Forte* relieved the *Fox* on the Cape station. The returns of rifle practice by the petty officers and seamen of the fleet for '98 showed that the average points attained were only 134·53, as against 147·78 for the previous year. The highest score was two points above that for '97. The best ship record is that of the *Royalist* on the Australian station, the crew of which scored 237 points. The number of men who took part in the firing was 11,626. The musketry returns for the Royal Marines from 105 ships showed that in order of merit the East Indian Squadron came first. Sergeant J. H. Ram, R.M.A., made the best record, with 219 points. In May, Admiral Sir H. Fairfax was selected to succeed Admiral the Hon. Sir E. R. Fremantle as Commander-in-Chief at Devonport, and Vice-Admiral Sir N. Bowden-Smith as Commander-in-Chief at the Nore. Rear-Admiral A. D. Fanshawe hoisted his flag in the *Magnificent* as second in command of the Channel Squadron, succeeding Rear-Admiral J. W. Brackenbury. Rear-Admiral D. H. Bosanquet was selected to succeed Rear-Admiral A. L. Douglas as Commander-in-Chief in the East Indies, Admiral Douglas returning to England to assume the post of Second Sea Lord, vacant by the preferment of Lord Walter Kerr to the post of First Sea Lord, on the retirement of Sir Frederick Richards. The *Edgar* returned to England with the paid-off crew of the *Royal Sovereign*. The *Tribune* relieved the *Intrepid* on the North American station, and the *Psyche* the *Pallas* on the same station. The *Pomone* relieved the gunboat *Redbreast* in the East Indies. The *Archer* and the *Narcissus* returned home to pay off. In June, Rear-Admiral T. S. Jackson was appointed Admiral Superintendent at Devonport Dockyard; Capt. R. L. Groome to be Commodore of the second class in command of the squadron on the South-East Coast of America; G. N. Pollard to be Captain in charge at Ascension; M. P. O'Callaghan to the *Royal*

Sovereign; H. H. Dyke to the *Empress of India*; G. L. Egerton as Flag-Captain to the *Majestic*; A. A. C. Parr to the *Asia*; R. F. Henderson to be Captain Superintendent of Sheerness Dockyard; A. Barrow to the *Prince George*; R. F. Foote to the *Repulse*; G. C. Langley to the *Nile*; C. Campbell to the *Wildfire* as Flag-Captain at Sheerness; and T. McGill to be Captain in charge at Bermuda. Prince Louis of Battenberg was appointed Assistant Director of Naval Intelligence on resigning his post as Flag-Captain in the Channel Squadron. During August and September the following ships were commissioned: the *Terrible* to relieve the *Powerful* in China, but owing to the trouble with the Transvaal both these ships were subsequently ordered to the Cape; the first-class cruiser *Andromeda* was commissioned to relieve the *Hawk* in the Mediterranean; and the *Hermes* to relieve the *Talbot* in North America. The *Imperieuse* arrived home and paid off. Rear-admiral Pelham Aldrich was appointed to be Superintendent of Portsmouth Dockyard, and S. C. Holland to be Superintendent of Chatham Dockyard. Capt. W. H. Pigott was appointed Senior Officer at Gibraltar; C. J. Norcock as Assistant to Admiral Superintendent of Naval Reserves; T. H. Jerram as Assistant Captain of Boys' Training Ships; Percy Scott to the *Terrible*; C. G. Robinson to the *Vernon*; and J. Durnford to the *Jupiter*. The gunboat *Dwarf* left to take the place of the *Widgeon* on the Cape station, but the latter vessel was ordered to remain on the station for the present. In September a large number of officers were appointed for transport duties in connection with the despatch of an Army Corps to the Cape, Sir Edward Chichester being made Principal Transport Officer in Natal, and Capt. Von Koughnet Transport Officer at Capetown. Capt. C. J. Barlow was appointed Superintendent at Pembroke Dockyard.

Naval Publications.—Among the principal naval publications of the year were: "A Life of Richard Badley, Vice-Admiral of the Fleet," by Thomas Alfred Spalding (Constable); "Appendix to the Report of the Chief of the Bureau of Navigation, '98" (United States Navy Department); "How to Enter the Royal Navy," by Ernest J. Felix (Simpkin); "Bearers of the Burden," by Major W. P. Drury, R.M. (Lawrence & Bullen); "Blockade of Brest, 1803-5," by John Leyland (Navy Records Society); "Watch, Station, and Quarter Bill for H.M. Torpedo-Boat Destroyers," by Lieut. D. Brownrigg, R.N. (Chaprentier, Portsmouth); "Imperial Defence," by Sir George Clarke (Imperial Press); "Nelson's Friendships," by the late Mrs. Hilda Gamlin (Hutchinson); "Idylls of the Sea," by F. T. Bullen (Grant Richards); "From Howard to Nelson: Twelve Sailors," by Prof. Laughton (Lawrence & Bullen); "Naval Annual," by T. A. Brassey (Griffin, Portsmouth); "Merchant Skipper's and Ocean Traveller's Atlas" (George Philip & Son); "British Naval Power," by Hamilton William (Macmillan); "Histoire de la Marine Française. 1.—Les Origines," by Charles de la Roncière (E. Plon Nourrit & Co.); "The Sinking of the *Merrimac*," by Naval Constructor Hobson (Unwin); "The Strength and Decay of Nations," by Giles Andrew Daubeney (*Timber News*); "The *Maine*: An Account of her Destruction in

Havana Harbour," by Capt. Sigsbee (Unwin); "The American Navy: Its Ships and their Achievements," by Charles Morris (Hutchinson); "The Tadpole of an Archangel," by Capt. W. P. Drury, R.M.L.I. (Simpkin); "Text-Book on Navigation and Nautical Astronomy," by J. Gill, F.R.A.S. (Longmans); "Life of Vice-Admiral Edmund Lord Lyons," by Capt. Eardley-Wilmot (Sampson Low); "The Torpedo in Peace and War," by F. T. Jane (Thacker); "Life of Vice-Admiral Sir George Tryon, K.C.B.," by Rear-Admiral Penrose Fitzgerald (Blackwood); "Marine Boilers," by M. Bertin (Murray); "The Royal Navy; A History from the Earliest to the Present Time," vol. iv., by W. Laird Clowes (Sampson Low); "Fleet in Being," by Rudyard Kipling; "Navy in the Civil War" (U.S.) (Sampson Low); "Seaman's Life under Four Sovereigns," by Sir Henry Keppel (Macmillan).

Nepal. A kingdom in the Himalayas, with Tibet on the north, Sikkim on the east, and British India on the south and west, which is independent, but maintains friendly relations with the Indian Government, who have a Resident at the capital, **Katmandu**. The population is of mixed character, but the Ghoorkas predominate. The ruler is the Maharajah Dhiraj, born August 8th, '75, and succeeded in '81. **Area** about 50,000 sq. miles; **pop.** estimated at from 2,000,000 to 5,000,000.

NETHERLANDS, THE.

A kingdom under Queen Wilhelmina (*q.v.*), daughter of the late King William III. and of Queen Emma, who was Queen-Regent till the Queen came of age (Aug. 31st, '98). The Constitution of 1848, revised in '87, vests the executive in the sovereign, and the legislative authority in the States-General, sitting in two chambers: the first, consisting of 50 members, elected for nine years (one third retiring every three years) by the provincial States from among the most highly assessed inhabitants; the second, of 100 members, elected directly by all male citizens of 25 years or more who either pay a direct tax to the State of a little over a florin, or have occupied rooms at a rent of from 80 cents to 2½ florins for 6 months or more, or own or lease a boat of not less than 30 tons burden, or receive a public pension of 275 florins or more, or have deposits of at least 50 florins in the savings bank, or have passed the examination necessary for the profession of an engineer, a surgeon, and other professions. Practically, the ability to support himself and his family qualifies a man to vote. The second chamber is elected for four years. The Government and the second chamber alone possess the initiative in legislation; the upper house having the right of approval or rejection, but not of amendment. Alterations in constitution are made by two-thirds vote of both houses, followed by a general election, and confirmation by a similar vote of the new States-General. The country is divided into 11 provinces and 123 communes, each province having its own representative body, which has the power of making ordinances subject to the approval of the King. Its colonies include Java and territories in Sumatra, Borneo, and numerous other islands in the Eastern Archipelago; Curaçao and five other small islands in the West Indies, and Surinam in South America. Entire liberty and social equality granted to all religions, but the majority belong to the Dutch Reformed

Church. Education not compulsory, but well organised, and practically free as to the primary schools. Length of railways 1699 miles. The chief exports are food products, drugs, iron, steel, textiles, sugar, etc. **Area**, 12,648 sq. m.; **pop.** 5,004,204. **Revenue**, '98, £12,542,122; **expenditure**, £12,010,082; **debt**, £90,422,200; **imports**, '98, £149,650,000; **exports**, £126,316,500. See DIPLOMATIC, FOREIGN ARMIES and FOREIGN NAVIES.

Political Parties.—Parties in the States-General are divided into **Liberals** and **Anti-Liberals**, the latter being composed chiefly of such opposite elements as Catholics and Orthodox Protestants, who are also called **Conservatives**. The only bond apparently between these two bodies is the conviction that the supremacy of religious authority must be recognised in the government of the nation, whereas the Liberals urge that religious questions should be kept separate from the administration of the State. A Franchise Reform Bill brought in by Dr. Tak van Poortvliet, the Premier and head of the Liberal party, in '94, split up the Liberal party, an extreme or Radical section supporting the Premier, while a moderate Liberal section opposed him. The Chamber was dissolved, and at the general election in April the Moderate Liberals scored an unexpected victory. Dr. Tak only secured 44 seats, against the 56 secured by the Opposition. M. Van Houten then carried a measure considerably extending the suffrage, in June '96, and the disintegration of the Liberal party was completed. It now consists of four groups, Conservative Liberals, Advanced Liberals, Radicals, and Social Democrats. A general election took place in June '97, when 48 Liberals, 20 Catholics, 21 Orthodox Protestants, 4 Historic Christians, 4 Radicals, and 3 Social Democrats were returned. Classified in another way, the successful candidates included 52 Liberals, 45 Anti-Liberals, and 3 Social Democrats. The Historic Christians are a section of the Orthodox Protestants, but hostile to the coalition with the Catholics. A Progressive Liberal Cabinet was formed under Dr. Pierson.

History, '99. The chief event of the year was the assembling at The Hague of the Peace Conference, called together on the initiative of the Czar. A Bill providing £6250 for the reception of the delegates was passed (May 5th). The Conference itself was opened at the Palace in the Wood (18th), and a telegram was sent to the Czar expressing congratulations and hopes for the accomplishment of the great and noble work he had initiated. See separate article, PEACE CONFERENCE.

Nevis. A British West Indian island included in the presidency of **St. Christopher** (*q.v.*), of the federal colony of the **Leeward Islands** (*q.v.*). **Area**, 50 sq. m.; **pop.** 13,087. Capital, **Charlestown**, with a population of 1500. The island is simply a single cone-shaped mountain, surrounded by a margin of low lands. Statistics included in those of St. Christopher. See BRITISH EMPIRE (table). A hurricane caused great loss of life and property on July 7th, '99.

New Brunswick. A province of the Dominion of Canada. It lies along the Bay of Fundy. **Area**, 27,105 sq. m.; **pop.** 321,294. Capital **Fredericton**, pop. 7000; chief commercial centre **St. John**, with a population of 46,000. Divided into fifteen counties. Chief rivers are the St. John and the Miramichi, which are

navigable in part. Administered by a Lieut.-Governor and Executive Council. The people elect a Legislative Assembly of 46 members. The Province has ten seats in the Dominion Senate and fourteen in the House of Commons. Both higher and elementary education publicly provided and supported—the latter free, but not compulsory. Coal, iron, and antimony abound, and there are fine timber forests. Cereals are largely grown, and fruits, and the fisheries are remunerative. See CANADA and DIPLOMACY.

New Caledonia is an island in the South Pacific, lying to the south-west of the New Hebrides. It is a French penal colony, and the Loyalty Islands to the east of it are grouped with it as a dependency. Other dependencies are the Huon Island, the Chesterfield Islands, and the Wallis Archipelago. New Caledonia is governed by a Governor with a Council-General. The penal population is about 10,000 or 11,000. The area of the island and its dependencies is about 7700 sq. miles, and the total pop. about 62,752. The capital is Noumea. Ores and minerals are worked and exported.

Newcastle, Bishop of. See under PEERAGE.

NEWFOUNDLAND.

This—the oldest British Colony—was discovered in 1497 by John Cabot with an English expedition. The area is 42,200 sq. m.; the population, 210,000; the capital, St. Johns (pop. 29,007). Newfoundland divides Labrador with Canada, her share being estimated at 160,000 sq. m., with a resident population of 5000. The Colony is ruled by a Governor, with a Legislative Council of 15 members appointed by the Crown, and a House of Assembly of 36 members elected for four years, from 18 districts, by manhood suffrage and the ballot. The religious bodies are:—Church of England, 69,823; Church of Rome, 72,666; Wesleyan, 53,276; other denominations, 6245. Education is purely denominational. The progress of the Colony has been retarded by British policy, which until 1813 absolutely prohibited settlement. Its real advance began in '25, when the first resident Governor was appointed. Representative Government was granted in '32. The railway was commenced in '81, and has now been extended across the island to Port aux Basques, and tri-weekly steamship connection with the American railway system *via* Sydney, C.B., is maintained. The railway has given great impetus to pulp manufacture, mining, lumbering, and general trade. Newfoundland abounds in copper and iron, particularly at Bell Isle, in Conception Bay. In fact, from a great fishing country the island is being transformed into a great mining centre. Coal is abundant, but the output, which is in the hands of the contractor, Mr. R. G. Reid, is still inconsiderable. Newfoundland is a great place for sport. Caribou shooting is excellent, and there is good fishing for salmon and trout. The principal industries are the seal and cod fisheries, and agriculture by small farmers. The best land is in the Codroy Valley and on the west coast. The export of cod averages over a million quintals, hair seals about 300,000 skins and the oil. By the Treaty of Utrecht, 1713, certain rights were granted to French fishermen, the nature and extent of which are still in dispute. The islands of St. Pierre and Miquelon are owned by the French, and a French fishing fleet visits the coast annually,

claiming the exclusive right to fish from Cape John on the east coast round north to Cape Ray on the west coast. This exclusive right has never been admitted by Great Britain. Further, the French claim the right to prevent the erection of stations on the French coast, and thus many locations rich in minerals are rendered useless. A Royal Commission to inquire into the whole matter was appointed in August '98. See BRITISH EMPIRE (table) and DIPLOMACY.

History, '99. In Nov. '98, the Governor, on the receipt of a petition setting forth that the Hon. A. B. Morine, who had taken the leading part in carrying the Reid Contract Bill through the Assembly, was the paid legal adviser of the contractor, called on the Minister for an explanation. Mr. Morine admitted his professional connection with the Reids, and thereupon was requested to resign, which he did (5th). The agitation against the Reid contract continued, and very numerous signed petitions against it were got up. The various objectionable features in the arrangement were summarised in a dispatch from Mr. Chamberlain to Sir H. Murray, but the Governor was directed to sign the contract, and further opposition was seen to be futile. The Royal Commissioners appointed in '98 embodied the results of their investigations in a report which, though printed in March '99, was not made public by Oct. 13th. It may be said, however, that the report is entirely favourable to the Colony. Its general conclusions are that the French cod fishery on the coast has become practically valueless, and should be extinguished by money payment or concession elsewhere; that the lobster industry should be settled on the same basis; that the Colony should give the French free bait if they will abandon their bounties, which expire in 1901; that French interference with the Treaty Shore should be no longer tolerated, except in cases where actual damage to their fisheries could be proved; that an English Consul should be appointed at St. Pierre, to prevent the smuggling trade now carried on, with the connivance of the French authorities, with Canada and Newfoundland. Negotiations with the French Government proceeded during the summer, but no definite conclusion was reached. Sir H. Murray, who left the Colony on Jan. 26th, was succeeded by Sir Henry McCallum, K.C.M.G., on March 3rd. After some correspondence between the Governor and the Hon. A. B. Morine, and on his relinquishing all professional connection with the Reids in April, he was re-installed in office. In the summer and autumn the Governor made a tour through the Colony, and his proposed formation of a naval reserve became very popular. The seal and cod fisheries were fairly successful. The effect of the Reid contract on the prosperity of the Colony has been so far beneficial. Large public works are being carried on, an electric railway is nearly completed in St. Johns, and seven new steamers are being built for Mr. Reid to run on the various bays in connection with the railway, and one to Labrador. Two were completed in November. Mr. Morine and Mr. Dawe resigned (20th), being succeeded (27th) by Messrs. Bowring and Goodridge.

New Guinea, or Papua. An island lying directly N. of Australia, and after Australia the largest island in the world. It is about 1490 miles from E. to W., with a breadth at

centre of 430 miles. The area is now computed to be 234,768 sq. m. British New Guinea comprises the south-eastern part of the island, and the adjacent islands south of the 8th parallel south latitude. It is bounded on the west by Dutch and on the north by German territory. Its area is about 87,786 sq. m. on the mainland, and 2754 sq. m. of islands; and the population is estimated at about 350,000. A protectorate was proclaimed over the territory in '84, and in '88 it was definitely annexed. It is administered as a Crown colony by a Governor, who resides at Port Moresby. There are four magisterial divisions, each under a resident magistrate. An annual sum of £15,000 is guaranteed by the colonies of Queensland, New South Wales, and Victoria, to cover the cost of administration, in which these colonies have some share. It was agreed in '98 to continue the guarantee for four years, at the end of which period it is hoped the colony will be self-supporting. The country is being gradually settled, and it is hoped that the natives may be trained to use their tribal lands for commercial purposes. All minerals, except coal, are reserved to the Crown. The chief exports are trepang, copra, pearl-shell, gold and sandal-wood. The London Missionary Society has been established in the island since '70, and has done much good work. See BRITISH EMPIRE (table).—The German territory is known as **Kaiser Wilhelm's Land**, and lies to the north of the British territory. Its area, with Long Island, Dampier Island, etc., is about 72,000 sq. m., and the population 110,000. The administration was formerly in the hands of the German New Guinea Company and an Imperial Commissioner, but an order authorising the Imperial Government to assume the control of the protectorate came into force on April 1st, '99. Tobacco is cultivated with much success.—**Dutch New Guinea**, lying to the west of the British possessions, covers an area of 151,790 sq. m., and has a population of about 200,000. It is administered as a part of the Dutch East Indies, by a Resident at Ternate, who is responsible to the Governor-General. See COLONIES, ETC., OF EUROPEAN POWERS.

New Hebrides. A long chain of volcanic islands in western Polynesia, lying W. of Fiji and N.E. of New Caledonia. Area about 3000 sq. m.

New Jerusalem Church. The New Church, whose members are commonly called "Swedenborgians," because they accept the system of Scriptural interpretation contained in the writings of Emanuel Swedenborg (b. 1688; d. 1772), by whose instrumentality they believe the Lord has effected His Second Coming by unfolding the internal or spiritual sense of the Divine Word. The doctrines of this sense, together with the science of correspondences—which constitutes the key by which that sense may be unlocked—are set forth in Swedenborg's theological writings. The fundamental doctrines taught are, that the Lord Jesus Christ, in His glorified humanity, is the only God of heaven and earth, and that in Him is the Trinity of Father, Son and Holy Spirit, answering to the trinity in man of soul, body, and their operation together; and that in order to be saved it is necessary to believe in Him, and to keep the commandments by shunning the evils therein forbidden, as sins against Him. Swedenborg's writings were first extensively made known in this country by a clergy-

man of the Church of England, the Rev. John Clowes, rector of St. John's, Manchester, who translated a great number of them, including his greatest work, the "**Arcaana Coelestia**" (13 vols.). Another clergyman, the Rev. William Hill, translated the work second only in importance to it, the "**Apocalypse Explained**" (6 vols.). The Rev. Thomas Hartley, rector of Winwick, translated "**Heaven and Hell**." Very early, some drawn from the ranks of the Methodist preachers and other students of Swedenborg, formed a separate organisation for worship (1788), which has continued and increased. There are existing 85 societies, with 6589 registered members. They have Sunday-schools with 7767 children, and day-schools with 4386 scholars. There are twelve societies in London and its neighbourhood. Their statistics, however, fail to tell the number of their receivers, who have always consisted of separatists and non-separatists—the latter sometimes from their isolation, but sometimes from principle, worshipping in the Established Church or with some of the other religious bodies. In America the number of the societies of the New Jerusalem Church is much greater; and in every foreign country, both in Europe and elsewhere, they possess zealous, if not numerous, adherents. The body in Great Britain is governed by a **Conference**, which meets annually, and consists of all the ministers and of from one to three representatives from each society, according to the number of its members. The **Swedenborg Society**, 1, Bloomsbury St., was founded 1810 for translating, printing and circulating Swedenborg's works, which may be had in fifteen languages. The Church also possesses its own orphanage, its college for training candidates for the ministry, its National Missionary Institution, and other associations formed to forward its propaganda.

Newnham College. See WOMEN, HIGHER EDUCATION OF.

NEW SOUTH WALES.

New South Wales is the oldest of the British colonies in Australia. It was founded as a penal settlement in 1788, and originally embraced half the continent. It has Queensland on the north, and Victoria on the south. From the sea upon the east it stretches to about long. 140° E., which meridian divides it from South Australia. Total area 310,700 sq. m.; pop. in '99, 1,346,240. The capital is Sydney, on Port Jackson, pop. 417,250. Ruled by a Governor (Earl Beauchamp, see under PEERS) and responsible Ministry. Legislative power is vested in a Parliament of two houses. The upper, or Legislative Council, consists at present of 58 members (the number is unlimited, but is not to be less than 21) appointed by the Governor for life. The lower house, or Legislative Assembly, is composed of 125 members, elected triennially by 125 constituencies on a basis of manhood suffrage. Every male subject above twenty-one, having resided for one year in the colony and for three months in his electoral district, possesses a vote. The elections take place all on the same day. Members are paid the sum of £300 a year. For local government purposes the colony recognises 75 boroughs and 107 municipal districts, besides Sydney. There is also a division into 141 counties. Education under Government control, compulsory for all children between the ages of six and fourteen years,

and free to the poor. There is a University at Sydney which grants degrees. The Church of England has by far the most adherents, next coming the Roman Catholics, the Presbyterians, the Wesleyans and the Congregationalists, in the order named. There is no state aid to religion. For defence there is a permanent force of about 620 men and about 5000 volunteers, while there is a naval station at Port Jackson and a naval force of nearly 600 men. There are 2706 miles of railway open, and 33,000 miles of telegraph wire. Much grain is grown, and there are nearly 50,000,000 sheep in the colony. There are large forests, and gold and silver are mined. Staple export is wool, to the amount of £10,000,000 per annum. Silver and gold, coal, hides, tallow, and frozen meat are also exported. **Revenue**, '98-9, £9,754,185; **expenditure**, £9,757,800; **imports**, '98, £24,453,560; **exports**, £27,648,117. **Public debt**, £67,000,000. See AUSTRALIA, BRITISH EMPIRE (table), and DIPLOMATIC.

History, '99. The Federal Enabling Bill was passed by the Legislative Assembly without amendment (March 2nd), and by the Legislative Council (15th), but the Council tacked on an amendment requiring that a minimum of one-fourth of the electors should vote for the measure when it was referred to the country, and this minimum was higher than at the previous vote. The Assembly refused to agree to this amendment, and a conference of both Houses failed to come to an agreement (28th). Thereupon Mr. G. H. Reid, the Premier, exercised his constitutional power, and appointed 12 new members to the Council, and the Bill was comfortably passed in the form approved by the Assembly (April 10th), Parliament afterwards being prorogued. The referendum was taken (June 20th), and resulted in 101,200 votes for and 79,634 against the Bill. Parliament reopened (July 18th), and an Address to the Queen praying that effect should be given to the Commonwealth Bill was carried during August. The Opposition, being pledged to support Federation, lent their support to the Government while this was being done; and the Treasurer in his Budget statement estimated the revenue for the current year at £9,720,000, and the expenditure at £9,909,000 (16th). But the strength of the Opposition was shown directly the Federal issue was put on one side. After a week's debate, a vote of want of confidence in the Government, mainly on financial questions, was moved by Mr. Lyne, who had succeeded Mr. Barton as Leader of the Opposition, and was carried by 78 votes to 40, the Labour party throwing in their lot with the Opposition (Sept. 7th). Mr. Reid's Ministry accordingly resigned, and a new Administration was formed, with Mr. W. J. Lyne as Premier (14th). The Colony joined with the other Australian colonies in offering a force for service in the Transvaal, and the offer was accepted. A detachment of New South Wales Lancers, who had been training at Aldershot for six months, also volunteered for service in South Africa, and left London for the Cape (Oct. 10th).

Newspapers and Magazines. It appears from the '99 edition of the "Newspaper Press Directory" that the number of newspapers now being published in the United Kingdom is 2385. In England there are 1843, 460 in London and 1383 in the provinces; in Wales there are 106,

in Scotland 235, in Ireland 180, and in the various isles round the coast 21. Of these there are 182 daily papers in England, 7 in Wales, 19 in Scotland, 20 in Ireland, and 4 in the isles. In '46 there were only 551 papers published in the United Kingdom, and only 14 dailies. Of magazines, including the quarterly reviews, there are now 2290, 520 of which are religious. In '46 there were only 200 magazines in existence.

Newton, Alfred J., Lord Mayor of London, is the son of the late Mr. G. Beeforth Newton of Hull, and was born at Hull in 1849. In '68 he became a yeast merchant at Burton-on-Trent, and in time amalgamated his business with that of Messrs. H. Love & Co., of Southwark. A considerable export trade with France and Belgium was established, and finally Mr. Newton became the sole proprietor. He also joined his brothers in the firm of Messrs. Newton Brothers & Co., steamship owners, in '80, but left the firm in '86. In '88 he was appointed Sheriff of London and Middlesex, and in '90 was elected Alderman of the Ward of Bassishaw. He has been Chairman of Harrod's Stores, Ltd., and Messrs. D. H. Evans & Co., Ltd., since their incorporation. He was Master of the Girdlers' Company in '99, and is on the court of the Fanmakers' and Turners' Companies. In '74 he married the eldest daughter of the late Mr. Joseph Watson, of Mill House, Mitcham Common. Mr. Newton is a Churchman, and in politics is associated with the Liberal-Unionists.

NEW ZEALAND.

New Zealand is a colony of the British Empire, consisting of a group of islands in the South Pacific, about 1200 miles E. by S. from Australia. There are two large islands: **North Island**, 500 m. by 250, area 44,468 sq. m.; **South Island**, sometimes also called **Middle Island**, 500 m. by 200, area 58,525 sq. m.; also **Stewart Island**, area 665 sq. m.; **Chatham and Auckland Islands** at some distance E. and S., area 813 sq. m. **Area** of entire colony, 104,471 sq. m.; **population** 747,930, exclusive of the Maoris, who number 39,854. **Capital, Wellington**, pop. (including suburbs) 44,791; chief cities, **Dunedin**, 48,672; **Auckland**, 58,344; **Christchurch**, 56,330. Volcanoes and volcanic belt across the centre of North Island. Alpine chain descends along the west coast of South Island. The famous "Hot Lakes" and geyser regions are in North Island, between Taupo and the Bay of Plenty. Government is carried on by a Governor, who is advised by a responsible Ministry. Of the two houses of parliament, the Legislative Council consists of 48 members nominated by the Governor for life (except those nominated subsequently to Sept. 17th, '91, after which date all appointments are for seven years only), the House of Representatives of 74 (including 4 Maoris) members elected triennially on an adult suffrage. The qualifications for electors are residence in the colony for a year, and in the electoral district for 3 months. Members of the Lower House receive £240, and of the Upper House £150 a year. For local government the country is divided into 83 counties and 97 boroughs, the 83 counties being further divided into town districts and road districts. About 40 per cent. of the inhabitants belong to the Church of England, 22 per cent. are Presbyterians, and 10 per cent. Methodists. Education is compulsory, free, and secular;

and the University of New Zealand, which has three colleges, at Dunedin, Christchurch, and Auckland, confers degrees. **Ports** defended by heavy batteries, mines, and torpedo-boats. A permanent force of artillery and engineers 250 strong is maintained, and the volunteer force numbers over 4000. The majority of the population are engaged in agricultural and pastoral pursuits, and a big frozen meat industry is being fostered. There are 2222 miles of railway, as well as numerous roads and water communication. There are over 200 daily, weekly, and monthly periodicals. The chief exports are wool, sheep skins and pelts, tallow, butter, frozen meat, coal, gold, gum, and grain. **Revenue**, '98-9, £5,258,228; **expenditure**, £4,858,511; **imports**, '98, £8,230,600; **exports**, £10,517,955. **Public debt**, £46,080,727. See **BRITISH EMPIRE** (table) and **DIPLOMATIC**.

History, '99. The Treasurer's Budget statement estimated the revenue for the current year at £5,300,000, and the expenditure at £5,060,000 (**Aug.** 1st). He said a loan of £1,000,000 would be necessary for the construction of roads and railways. The Governor forwarded to the Imperial Government the offer approved by the House of Representatives (**Sept.** 29th) to send to South Africa a force of mounted rifles to assist in the war with the Transvaal. The offer was accepted (**Oct.** 3rd), and H.M. Government undertook to treat the force as an integral portion of the Imperial forces, providing pay at Imperial rates, etc. The troops left Wellington (**20th**).

Niagara Utilisation. See **ENGINEERING**.

Nicaragua, a Central American republic, bounded on the N. by Honduras, S. by Costa Rica, W. by the Pacific, and E. by the Caribbean Sea. Honduras, Nicaragua and San Salvador were in '96 constituted the United States of Central America so far as their relations to foreign countries were concerned; but at the end of '98 the arrangement fell through. The Constitution of '94 vests the executive in a President elected for four years, and a Legislature of one House, containing 40 members elected by universal suffrage for two years. **Army** about 17,000, including reserve and militia. **Exports:** coffee, sugar, hides, and cattle. **Area**, 49,500 sq. m.; **pop.** 450,000, consisting mainly of Indians and mixed races, with very few Europeans. The capital is **Managua** (**pop.** 18,000). **Total revenue**, about £300,000; **expenditure**, £500,000; **imports**, £538,700; **exports**, £462,929. **Public debt**, £607,507. See **CENTRAL AMERICA**; for Ministry, etc., see **DIPLOMATIC**; and for Nicaragua Ship Canal see **ENGINEERING**.

Nicholas I., the reigning Prince or **Hospodar** of Montenegro, was b. **Oct.** 7th, 1811. After an educational course at Trieste and Paris, he succeeded his uncle, who had been assassinated, **Aug.** '60. He married, in the same year, Princess Milana, the daughter of the Vice-President of the Council of State, and has three sons and six daughters. The heir-apparent is Prince Danilo, born June 29th, '71, who married the Duchess Jutta of Mecklenburg-Strelitz in July '99. During '90 the thirtieth anniversary of his accession was celebrated, and during '96 the bicentenary of the foundation of his dynasty. Queen Victoria gave him the Grand Cross of the Royal Victorian Order in March '97. His daughter Princess Helen is married to the Prince of Naples, the heir to the throne of Italy.

Nicholas II., who on Nov. 1st, '94, succeeded his father, Alexander III., as "Emperor of all

the Russias," was born at St. Petersburg on May 18th, '68, his mother being the Princess Dagmar, a daughter of the King of Denmark, and sister to the Princess of Wales, the Duchess of Cumberland, and the King of Greece. The course of his studies was, by the wish of the late Czar, chiefly directed to modern history and languages, constitutional history, political and social economy, and the law and administration of his own country. He is gifted with the linguistic facility of most of his countrymen, and fluently speaks French, German, Italian, and especially English, of whose literature he has a thorough knowledge. During the famine of '91 he was, at his own request, made President of the Committee of Succour, and worked hard in the organisation of relief. As Czarevitch he held several military commands in his own country—in the famous *Préobrajensky* regiment among others—and in England he had conferred upon him in '93 the Order of the Garter. He married the Princess Alix of Hesse-Darmstadt in Nov. '94, and three daughters have since been born to them. Failing the birth of a son, the heir to the throne is the Grand Duke Michael, the Czar's brother, born Dec. 4th, '78. The coronation took place with impressive and elaborate ceremonial at Moscow in May '96, and in August of the same year he commenced a tour which included visits to the Emperor of Austria and Germany, to the King of Denmark, to Queen Victoria, and to the President of France. The visit to Paris was taken advantage of to accentuate the friendly understanding or alliance, as it may now be called, between France and Russia. This alliance was definitely announced on the occasion of the visit of President Faure to St. Petersburg in '97. The famous peace proposals which he made to the Powers during '98 led to a Conference at the Hague in '99, in which all the leading Powers took part. See separate article on **PEACE CONFERENCE**.

Nicoll, W. Robertson, LL.D., was born **Oct.** 10th, 1851, at the Free Church manse, Auchindoir, Aberdeenshire. He studied first at the University of Aberdeen, graduating M.A. in '70; next at the Free Church College, Aberdeen, until '74, when he was ordained minister of the Free Church, Duftown, from which in '77 he was transferred to the Free Church, Kelso. In succession to Dr. S. Cox, he became editor of the *Expositor* in '84. In the following year ill-health compelled him to give up public speaking. In Nov. '86 he came to London, and started the *British Weekly*, which has been instrumental, to a remarkable extent, in introducing new writers to the reading world. The degree of LL.D. was conferred upon him by Aberdeen University in '90. He was married to Miss Katherine Pollard in '97. Dr. Nicoll is the author of many theological works, in addition to a "Life of James Macdonell, of the *Times*" ('89), a "Memoir of Professor Elmslie" ('90), and has been engaged for a long time on "The Victorian Era of English Literature: a Biographical and Critical History." He has projected and edited "The Expositor's Greek Testament," "The Expositor's Bible," "The Theological Educator," "The Clerical Library," "The Household Library of Exposition," etc. He is also joint editor of "Literary Anecdotes of the Nineteenth Century," of which two volumes appeared in '95 and '96. In **Oct.** '91 he commenced the *Bookman*, a monthly literary

journal, which was quickly recognised to be of high literary merit; in '93 the *Woman at Home*, which he had a large share in founding, began its career; and in '98 he undertook the editorship of the *Christian Budget*.

Niger Coast Protectorate. A British protectorate was formed in 1884 along the west coast of Africa, from the boundaries of Lagos (*q.v.*), at the mouth of the Benin river, to the mouth of the Rio del Rey, including the mouths of what are called "the Oil rivers," but excluding that portion of the coastline which lies between the Forcados and Brass rivers, and which belongs to the Niger Territories. Until '93 it was called the Oil Rivers Protectorate. Inland it includes the whole Benin region, the Niger delta, and the Old Calabar or Cross river from the rapids to the sea; but in consequence of the transfer of the administration of Nigeria from the Royal Niger Company to the British Government, it is expected its boundaries will undergo some alteration. Benin lies on the western limits of the Protectorate, and owing to the attitude of the king and the savage fetish customs prevailing, trade was very difficult to carry on, so an expedition was sent in '97 and the king was deposed, a Resident being appointed in his place. The country is rich in rubber, gums, mahogany, etc. It is bounded on the north-west by Lagos and Yoruba. The territory is administered under the Colonial Office by an Imperial Commissioner and Consul-General, with six vice-consuls, and is now divided into three divisions, each under a consular officer. Government posts have been setablished at Ediba on the Cross river and Ngwa, behind Opopo. Old Calabar is the headquarters. The trade is chiefly carried on by a Liverpool Company, called the African Association, Ltd. The chief products are palm oil and kernels, rubber, ivory, camwood, gums, etc. See DIPLOMATIC, FRENCH WEST AFRICA, and NIGERIA (map).

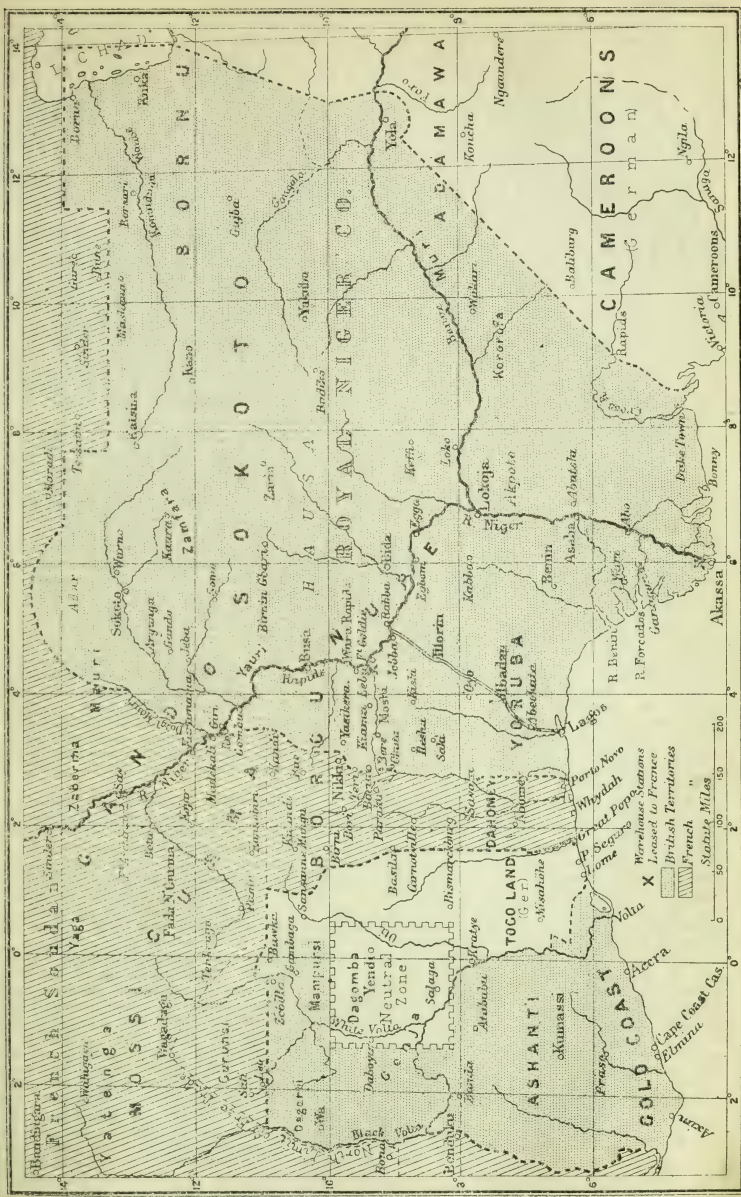

NIGERIA.

The Niger Territories, now called Nigeria, which the Royal Niger Company administered until '99, under a royal charter dated July 10th, 1886, cover about 500,000 sq. miles, and contain a population variously estimated at from 20,000,000 to 40,000,000. In '99 an arrangement was made whereby the British Government revoked the Charter as from Jan. 1st, 1900, and took over all the administrative powers and duties of the Company, with land and mining rights under the terms mentioned below. The Anglo-German and Anglo-French agreements of '85, '86, '90, '93, and '98, settled the frontiers of the territory. The eastern frontier, settled by previous agreements made in '85 and '93, runs from a point on the Old Calabar or Cross river on the coast in a north-easterly direction to a point on the river Benue. Yola and its immediate neighbourhood were made the property of Great Britain, while Germany secured the Upper Benue and the confluence of the Faro river, together with the south shore of Lake Chad, as far as the 14th degree E. long. This frontier separates the Company's territory from the German sphere of influence in the Cameroons. The frontiers on the north and west were settled by the Anglo-French Convention signed June 15th, '98. The French claim was for the whole of the right bank of the Niger from Say to a point just below Busa, the capital of the kingdom of that name. The boundary agreed upon gave them the kingdom of Gurma,

and a triangular district on the east of the river, lying between Say, Mauri, and a point ten miles north of Ilo, with both banks of the river from Say to the point ten miles north of Ilo. From that point the boundary passed in a north-easterly direction along the watershed between the Niger and the river Sokoto, and thence in an arc extending some distance to the north of the old Say-Barua line, so as to include all the empire of Sokoto. From the intersection of the arc with the 14th parallel the boundary line ran along that parallel for 70 miles, then south and east again for 250 miles, and then north again to the 14th parallel and along the parallel to a point a little to the east of the longitude of Kuka, and thence southward to the southern shore of Lake Chad. Southwards, from the point ten miles north of Ilo, the boundary was traced so as to include Borgu, but leaving Nikki to France, the line eventually joining the boundary between Dahomey and Lagos on the 9th parallel. This necessitated the withdrawal of the French from Ilo, Busa, Kishi, and Boria, leaving them Nikki, however. Two pieces of land (to be mutually agreed upon by the two Governments) on the Niger between Leaba and the junction of the Mossi and the Niger, and on one of the mouths of the Niger, were leased for 30 years to the French Government for trade purposes, and in return France conceded equal terms for French and British trade in all French colonies from the Liberian frontier to the Niger. On the Gulf of Guinea the Territories have access to the sea by means of a coastline of about 120 miles in length, extending from the Forcados to the Brass river. The capital of Sokoto is Wurno, and other large towns are Gando, Sokoto, Kano, Bida, Yola, Yakubu, Zaria, and Illorin. The capital of the Territories is at Asaba; and the troops—Hausas principally, with English officers—are chiefly centred at Lokoja, the junction of the Niger and Benue rivers. There is a West African Frontier Force under British officers at Jeba. The naval headquarters are at Akassa, at the mouth of the Niger, which possesses the only "slip" on the West coast of Africa on which vessels can be repaired. The Niger delta has a bad climate, but the inland portions of the territory are much healthier. The chief products are rubber, gum, hides, ivory, palm oil, and palm kernels. The Governor of the Royal Niger Company is Sir George Taubman-Goldie, and the Deputy Governor is Lord Scarbrough. The Offices of the Company are at Surrey House, Victoria Embankment, W.C. See BRITISH EMPIRE (table), DIPLOMATIC, and SESSION, sect. 100.

History, '99. The Government decided to take over the Administration of the Territories, and gave their reasons for the decision in a letter sent from the Foreign Office to the Treasury (June 15th). The Government felt that it was incumbent on them to control the frontier and fiscal policy of Nigeria, in view of the settlement with the French Government, especially in view of the advantages secured to them in the Lower Niger by the '98 Convention. Moreover, the West African Frontier Force needed direct Imperial control, and the commercial situation created by the Company's practical monopoly of trade also influenced the Government. The Treasury were therefore asked to make an arrangement with the Company. The terms of this arrangement appeared

(illustrating the Anglo-French Settlement of June '98).

George Philip & Son.

in a Treasury minute dated June 30th, '99. The Company agreed to transfer to the Government all their administrative powers and duties, the benefits of all their treaties and all their land and mining rights, retaining, however, their plant and trading assets, stations and waterside depots, with customary rights of access, buildings, wharves, workshops and the sites thereof. The Government assumed liability for the interest, amounting to £12,500 per annum on the public debt of £250,000, repayable at par on Jan. 1st, 1938, but reserved the right to redeem the stock at £120 per £100 stock on Jan. 1st or July 1st in any previous year on giving three months' notice. In consideration the Government agreed to pay £150,000 within one month after the revocation of the Charter, as the price of the Company's rights, and as compensation for interruption and dislocation of the Company's business; also £300,000 within the same period as repayment of expenditure from time to time by the Company for the development of the Territories, as distinct from the expenditure on ordinary civil administration. The Government will impose a royalty on all minerals worked in that portion of Northern Nigeria which is bounded on the west by the main stream of the Niger and on the east by a line running direct from Yola to Sinder, provided that such minerals are exported from a British port or pass through a British custom-house; and will pay to the Company, or its assigns, one-half of the receipts from any royalty so imposed for a period of 99 years from the revocation of the Charter. On the revocation the Government will take over the Company's war materials and buildings for administrative purposes, and a specified proportion of the Company's plant, including steamers, buildings, and land at stations, wharves, stores, etc., for the sum of £115,000. The Company issued a circular to their shareholders (July 3rd) stating that the revocation of the Charter would not affect their legal existence nor the validity of their contracts. At a general meeting of the Company (Aug. 23rd), the assent of the shareholders was given to the terms of the arrangement. It was further decided that the Company should continue, as "The Niger Company, Ltd.," to exercise the functions authorised by the memorandum of association as a company for trading, mining, banking, the working of forests, and the cultivation of indigo, tobacco, and other indigenous products. On the authority of Reuter's Agency it was announced (Sept. 20th) that the administrative changes in the Territories will be put into force during 1900. The boundaries of Lagos will be increased toward the east so as to extend the coast-line of that colony and definitely fix it on the north—probably along the 9th parallel. The Niger Coast Protectorate will be extended considerably north, so as to include a larger portion of the Niger than it now possesses. The frontier demarcating Northern Nigeria from the Coast Protectorate will probably follow a line considerably to the south of and more or less parallel to the Binue. The new colony of Northern Nigeria, which will be styled a protectorate, and of which Colonel Lugard will be appointed Governor, will, when officially fixed, be by far the largest in extent of any of the British West African possessions, forming, roughly speaking, a parallelogram of 600 miles by 500—300,000

sq. m. The capital of this colony will remain at Jeba until a new site is fixed in the direction of Kano. Colonel J. Willcocks, military commandant of Northern Nigeria, left England during September for Jeba, where he will act as Commissioner and Commandant pending the arrival of Colonel Lugard. The Imperial forces in Northern Nigeria include two battalions of infantry, three batteries of artillery, a company of engineers, 100 mounted infantry, a telegraph section, and medical and transport services.

Noms-de-Plume. See previous eds.

Norfolk Island. Discovered by Capt. Cook, Oct. 9th, 1774; 600 miles from New Zealand, 900 miles east from Australia; length 5 miles, breadth 3 miles. Other islands around make up a total of 12 sq. miles. Pop. 738. Occupied as a penal settlement till '55, and then given to the Pitcairn Islanders. In Nov. '96 the island was transferred to the Government of New South Wales, and a resident magistrate was appointed to administer it, assisted by an elected council of twelve members. The chief village is Kingston.

Norman, Henry, born in Leicester, journalist, author, and traveller. Educated in France, at Harvard, U.S.A., and at Leipzig. For several years on the staff of the *Pall Mall Gazette*. From '88 travelled in China, Siberia, Korea, Japan, Tonquin, and Malaya, visiting the Franco-Chinese frontier, crossing Korea on horseback, and exploring a hitherto unknown part of the Malay Peninsula, which he also crossed, being the first European to pass through the upper part of the closed native State of Kelantan. Author of "An Account of the Harvard Greek Play" ('81), "The Real Japan" ('91), "The Peoples and Politics of the Far East" ('94), and a later work upon the Balkan Peninsula, based upon a series of letters in the *Daily Chronicle*, in the autumn of '95, called "Round the Near East." From '92 till '99 he was a member of the editorial staff of the *Daily Chronicle*, being assistant-editor '95-99. He resigned this post, however, in order to have more time to devote to purely literary pursuits.

North-West Territories, The, comprise the following districts: Assiniboia, area 89,535 sq. m.; Alberta, area 106,100 sq. m.; Saskatchewan, area 107,092 sq. m.; Athabasca, area 265,000 sq. m.; Yukon, area 200,000 sq. m.; Mackenzie, area 538,000 sq. m.; Franklin, and Ungava. Assiniboia, Alberta, Saskatchewan, and Athabasca were marked off in '82, and are properly organised and divided into electoral districts, from which the members of the Legislative Assembly are elected. The Yukon provisional district was in '98 constituted a separate territory, and is administered by a Commissioner acting under instructions given by Order in Council or the Dominion Minister of the Interior. Pop. 130,000. Capital, Regina. Great lakes and large navigable rivers—the Mackenzie, Slave, Peace, Saskatchewan, among the chief—are found in the Territories. The resources are enormous, agricultural, pastoral, and mining. Vast coal fields of fairly good quality exist, and are being profitably worked. The Canadian Pacific Railway traverses Assiniboia and Alberta. The Government of the Territories consists of a Lieut.-Governor, a Responsible Ministry, and a Legislative Assembly of 29 members. The Territories have two seats in the Dominion Senate, and

four in the House of Commons. The new gold fields at Klondike lie in the Territories. Klondike is only a small section of Yukon. All those who are acquainted with the district seem to agree with Mr. W. Ogilvie, the Dominion Surveyor on the Yukon, and Commissioner for the district, that it promises to be one of the largest and richest mining areas in the whole world. The gold-bearing area extends south-eastwards from the 141st meridian into British Columbia. Indications show that it is at least 500 miles long, and in places upwards of 100 miles wide. The arctic climate and the shortness of the summer season appear to be the great hindrances to mining operations, together with the scarcity of supplies caused by the remoteness of the district, and the great difficulty of the transit thither. Dawson City, which has sprung up at the junction of the Klondike and Yukon rivers, has a population of 20,000, that of the whole district being about 27,000. There are about 5000 miners actually at work, and the output of the '97-8 season has been estimated at from £2,000,000 to £5,000,000, primitive and uneconomical as the modes of working the gold are. The administration of the district has been bitterly complained of, more particularly the Dominion regulations that a 10-per-cent. royalty must be paid on the gross output, and that alternate claims in every new district must be reserved for the Government. A Commission directing Mr. Ogilvie to hold an immediate inquiry under oath into the charges of official corruption and maladministration in the Yukon district was issued (Oct. 9th, '98). Dawson City was almost entirely destroyed by fire (April 26th, '99). See ALASKA (as to the boundary question), BRITISH EMPIRE (table), CANADA, and DIPLOMATIC.

Norway. See SWEDEN AND NORWAY.

Norwich, Bishop of. See under PEERAGE.

Nossi Bé. A small island on N.W. coast of Madagascar, held by France since 1843; and a flourishing trade-port.

Nova Scotia. A province of the Dominion of Canada. It is a peninsula connected by a narrow isthmus with New Brunswick. Incorporated with it is **Cape Breton Island**, formerly a distinct colony. Area 20,907 sq. m.; pop. 450,523. Capital, **Halifax**; pop. 38,556. A fine city and harbour, also an Imperial military and naval station. Divided into 18 counties. The coal mines near Halifax and Cape Breton turn out about 2,000,000 tons of coal per annum, and the whole of the Dominion Government railways are worked with coal from these mines. Iron and gold are also worked, but agriculture is the chief occupation. Fishing also employs many. Administered by a Lieut.-Governor and Executive. The people elect a Legislative Council of 21 members, and a House of Assembly of 38 members. The Province has 10 seats in the Dominion Senate and 20 in the House of Commons. Education receives some Government support, and is free and to some extent compulsory. The colony was originally a French one, and then called Acadia; ceded to England 1714; entered Dominion 1867. See BRITISH EMPIRE (table), CANADA, and DIPLOMATIC.

Nurses, Royal British Association of, is a professional organisation of trained nurses, with a membership of nearly 3000. Its objects are to improve the status of the nursing profession, to establish a Register of Trained Nurses, and to carry out benevolent schemes for the advantage of members. Over 2500 nurses have already been registered, and a copy of the register (3s. 6d.) can be obtained of the **Secretary**, 17, Old Cavendish Street, Oxford Street, W.

Nyasaland. See BRITISH CENTRAL AFRICA PROTECTORATE.

OBITUARY.

(Dec. '98—Nov. '99.)

The following classified list of persons deceased during the year will explain itself, though it may be mentioned that, wherever it has been possible to obtain them, the date of decease is given in parentheses at the end of each paragraph, and the age in italic figures.

ROYALTY AND RULERS.

Bulgaria, Princess Marie Louise of, after giving birth to a daughter (Jan. 31), 29

George, The Grand Duke, Heir-apparent to the Russian throne (July 10), 28

Faure, Félix François, President of France. Beginning as a journeyman currier in Touraine, he eventually became a merchant and shipowner at Havre. Elected to the Chamber in '81. In May '94 he became Minister of Marine in M. Dupuy's Cabinet, and was appointed Vice-President of the Chamber. On the retirement of M. Casimir Perier in Jan. '95 he was chosen President by 430 votes as against 361 given to M. Brisson, and held office till his death (Feb. 16), 58.

Khalifa, Abdullahi bin Sayd Mohammed, The (Nov. 25)

Saxe-Coburg, Prince Alfred, only son of the Duke of Saxe-Coburg and Gotha (Feb. 6), 24

PEERS.

Beaufort, Henry Charles FitzRoy, 8th Duke of, P.C., K.G.; Master of Horse '58-9, 66-8 (April 30), 75

Bolingbroke and St. John, Henry St. John, 5th Viscount (Nov. 7), 79

Buchan, David Stuart, 13th Earl of (Dec. 3), 83

Clifden, Leopold George F. Agar-Ellis, 5th Viscount; M.P. co. Kilkenny, '57-74 (Sept. 10), 70

Dunboyne, James F. Clifford-Butler, 24th Lord (Aug. 17), 60

Dunsany, John William Plunkett, 17th Lord, an Irish representative peer, and from '86-92 M.P. for the Southern Division of Gloucestershire (Jan. 16), 45

Esher, William B. Brett, 1st Viscount, P.C.; Master of the Rolls '83-97 (May 24), 84

Exmouth, Edward Fleetwood John Pellew, 4th Viscount (Oct. 31), 38

Farrer, Thomas Henry, 1st Lord; formerly Permanent Secretary to the Board of Trade (Oct. 11), 80

Henley, Anthony Henley, 3rd Baron; M.P. for Northampton '59-74 (Nov. 27, '98), 73

Herschell, Farrer Herschell, 1st Lord, P.C., G.C.B.; M.P. for Durham '74-85, Solicitor-General '80-86, and then made a Peer and Lord Chancellor; also again '92-5. He was Chancellor of the University of London and a member of the Anglo-American Commission at the time of his death, which occurred at Washington, U.S.A., from the results of a carriage accident (March 1), 62

Howard de Walden, Frederick George Ellis, 7th Lord (Nov. 3), 69

Hylton, Hedworth H. Jolliffe, 2nd Lord; M.P. for Wells '55-68; took part in the charge of the Light Brigade at Balaclava (Oct. 30), 70

Lindsey, Montague Peregrine Bertie, 11th Earl of (Jan. 27), 83

Lisburne, Ernest George H. A. Malet, 6th Earl of (Sept. 4), 37

Malmesbury, Edward James Harris, 4th Earl of (May 19), 57

Mexborough, John Charles George Savile, 4th Earl of; M.P. Gtton '31-2, Pontefract '35-7, '41-7 (Aug. 17), 89

Napier and Ettrick, Francis Napier, 10th Lord, P.C., K.T.; Governor Madras '66-72, and Acting Viceroy *pro tem.* on death of Lord Mayo; Minister to U.S.A. and Netherlands, and Ambassador to Russia and Germany (Dec. 19), 79

Northumberland, Algernon George Percy, 6th Duke of, P.C., K.G.; M.P. for Beeralston '31-2, North Northumberland '52-65; a Lord of the Admiralty '58, Vice-President of the Board of Trade '59, and Lord Privy Seal '78-80 (Jan. 2), 89

Salisbury, The Marchioness of (Nov. 20)

Somers, Philip Reginald Cocks, 5th Lord (Sept. 30), 84

Strafford, Henry William John Byng, 4th Earl of, C.B., K.C.V.O.; killed by falling before an express at Potter's Bar Station (May 16), 68

Townshend, John Villiers Stuart, 4th Marquis; M.P. Tamworth '56-63 (Oct. 26), 68

Truro, Thomas Montague Morison Wilde, 3rd Lord; succeeded his uncle '91. Title extinct by his death (March 8), 43

Wharfedale, Edward M. S. G. Montagu-Stuart-Wortley-Mackenzie, 1st Earl of; some time Chairman Great Central Railway (May 13), 72

BARONETS.

Armytage, Sir George, 5th Bart. (March 9), 79

Boynnton, Sir Henry Somerville, 11th Bart. (April 21), 54

Burrell, Sir C. R., Bart. (Sept. 6), 51

Clarke, Rev. Sir Charles, 2nd Bart. (April 25), 86

Coote, Rev. Sir Algernon, 11th Bart., and premier Bart. of Ireland (Nov. 21), 82

Dryden, Sir Henry E. Lee, 4th Bart. (July 24), 31

Fowler, Sir J. A., 2nd Bart. (March 25)

Gooch, Sir Alfred Sherlock, 8th Bart. (Feb. 24), 48

Kirkpatrick, Sir James, 8th Bart. (Nov. 10), 58

Lacon, Sir Edmund B. K., 4th Bart. (Aug. 11), 57

Lampson, Sir George Curtis, 2nd Bart. (Nov. 7), 66

Larpent, Sir George H. de H., 3rd Bart.; Col. Commanding 16th Regimental District (May 18), 53

Moon, Sir Richard, 1st Bart.; Chairman L.&N.W. Railway Company '62-91 (Nov. 17), 85

Mowbray, Sir John, 1st Bart.; M.P. for Oxford University '68-99 (April 22)

Naylor-Leyland, Sir H. S., 1st Bart.; Conservative M.P. for Colchester '92-5, Southport Division of Lancs. '98-9 (May 7), 35

Price, Sir R. L., 3rd Bart. (April 17), 62

Roberts, Sir Randal H., 4th Bart. (Oct.), 62

Staples, Sir Nathaniel A., 8th Bart. (March 12), 82

Stapleton, Sir Francis G., 8th Bart. (Oct. 30), 68

Sullivan, Sir E. R., 5th Bart. (July 22), 73

Sykes, Sir Frederic Henry, 5th Bart. (Jan. 20), 73

Verner, Sir E. W., 4th Bart.; M.P. for Lisburn '63-73, Armagh '73-80 (June 21), 69

M.P.s AND EX-M.P.s.

Archdale, W. H., D.L., M.P. for Fermanagh '74-85 (June), 84

Ascroft, Robert, M.P. for Oldham '95-9 (June 19), 52

Bassett, Francis, of Leighton Buzzard, M.P. for Bedfordshire '72-5 (June 9), 80

Bickford-Smith, William, M.P. Truro Division of Cornwall '85-92 (Feb. 24), 72

Bright, Jacob, M.P. for Manchester '67-74, '76-85, '86-95, brother of the late John Bright, Privy Councillor (Nov. 7), 78

Chamberlain, Richard, brother of the Rt. Hon. Joseph Chamberlain, and M.P. for West Islington '85-92 (April 2), 59

Cox, Robert, M.P. for South Edinburgh '95-9 (June 2), 54

Ellis, Thomas E., M.P. for Merionethshire '86-99, Chief Liberal Whip '94-9 (April 5), 40

Manfield, Sir Philip, M.P. for Northampton '91-5, and head of the firm of Manfield & Sons, shoe manufacturers (July 31), 80

Rothschild, Baron Ferdinand de, M.P. Aylesbury '85-95, Aylesbury Division of Bucks '95-8. He was the 2nd son of the late Baron Anselm de Rothschild, of Vienna, and lived at Waddesdon Manor. He bequeathed his valuable collection of art treasures to the British Museum (Dec. 17), 59

Severne, John E., M.P. for Ludlow and for South Shropshire till '85 (April), 73

Sykes, Christopher, M.P. for Beverley '65-8, the East Riding of Yorks '68-85, and the Buckrose Division '85-92. He was an intimate friend of the Prince of Wales (Dec. 15), 67

Wallace, Robert, M.A., D.D., M.P. for East Edinburgh '86-99; some time Professor of Church History at Edinburgh University and minister of Greyfriars Church, Edinburgh; editor of the *Scotsman* '76-80; (June 6), 68

Wigram, Alfred Money, M.P. Essex, Romford Division, '94 (Oct. 13), 43

Wilson, Isaac, M.P. for Middlesbrough '78-92 (Sept. 22), 77

CLERGY AND MINISTERS.

Akers, Very Rev. Canon G., of the Roman Catholic Chapter of Westminster (Aug. 14), 61

Beazley, Rev. Joseph, Congregational minister, and missionary in Tasmania and Sydney '36-60; minister at Blackheath '60-74 (Jan. 14), 86

 Rawson, Sir Rawson W., K.C.M.G., C.B., Governor of the Windward Islands '69-75 (Nov. 20), 87
 Rees, Sir Josiah, Chief Justice of Bermuda (Nov. 4), 78
 Richards, E. H., Puisne Judge of the Supreme Court of the Gold Coast (May 5), 49
 Sealy, Sir John, K.C.M.G., Attorney-General in Barbados, '46-74 (Feb. 13), 92
 Service, The Hon. James, several times Premier of Victoria, and an ardent advocate of Federation (April 11), 76
 Sophronius, Pope and Patriarch of Egypt (Sept. 3), 103
 Stewart, Cockburn, C.M.G., Administrator of the Seychelles Islands (June 5), 54
 Sullivan, Rt. Rev. E., Bishop of Algoma, Canada, '82-96, and Rector of St. James's Cathedral, Toronto '96-9 (Jan. 6)
 Tozer, Rt. Rev. W. G., Bishop of Zanzibar '63-73, Jamaica '79-80, and afterwards of British Honduras (June), 71
 Tyson, James, M.L.C. of Queensland, and a millionaire (Dec.), 75
 Upington, Sir Thomas, ex-Premier, Judge, and Attorney-General of Cape Colony (Dec. 10), '98), 54
 Vogel, The Hon. Sir Julius, K.C.M.G., Colonial Treasurer of New Zealand, '69-76, Agent-General in London '76-81, again Colonial Treasurer '84-7 (March 12), 64
 Welby, Rt. Rev. T. Earle, Bishop of St. Helena (Jan. 6), 88
 Wood, John F., Q.C., Controller of Canadian Customs '95-6

FOREIGN

Annenkoff, General, the constructor of the military railway from the Caspian Sea to Samarkand (Jan. 22), 64
 Azarian, Mgr., the Armenian Catholic Patriarch (May 1)
 Bamberger, Ludwig, long one of the leading members of the German National Liberals and then of the Freisinnige party (March 14), 76
 Blanco, General Guzman, ex-President of Venezuela '73-7, '78-84, and '86-7 (July 28)
 Bonheur, Mlle. Rosa, the great French painter of cattle and horses (May 25), 77
 Brault, General, Chief of the French General Staff (Sept. 22), 62
 Bunsen, R. W., F.R.S., Professor of Chemistry at Heidelberg '52-89, inventor of the Bunsen voltaic-battery, the Bunsen gas-burner, etc., and one of the discoverers of spectrum analysis (Aug. 16), 87
 Busch, Moritz, the "Boswell" of Prince Bismarck, author of "Count Bismarck and his People During the War with France" and "Bismarck: Some Secret Passages from his History" (Nov. 16), 78
 Caprivi, General Count von, who succeeded Bismarck as Chancellor of the German Empire in March '90, and held office till Oct. '94 He had a distinguished career in the

Army, and from '83 till '88 he was Chief of the Admiralty (Feb. 6), 68
 Castelar, Don Emilio, the leader of the Possibilist Republican party, which in '93 joined the Liberals, Señor Castelar then retiring into private life. He was a prolific writer, and a great orator (May 25th), 67
 Catargi, Lascar, chief of the Conservative party of Roumania and ex-Premier (April 11), 75
 Cherbuliez, Victor, the French Academician, critic, and novelist (July 1), 70
 Clari, Mgr., Papal Nuncio in Paris (March), 63
 Dennery, Adolphe, dramatist of Paris (Jan. 26), 88
 Dingley, Nelson, Chairman of Committee of Ways and Means of the House of Representatives, U.S.A., and the chief framer of the Dingley Tariff (Jan. 13), 66
 Erckmann, Emile, one of the pair of collaborators who produced the Erckmann-Chatrian publications, "Le Juif Polonais" (the original of "The Bells"), "L'Ami Fritz," etc. (March), 77
 Falkenhayn, Count, formerly Minister of Agriculture in the Austrian Government (June 12)
 Flower, R. P., ex-Governor of New York (May 13), 64
 Garcia, General Calixto, one of the chief leaders of the Cuban insurgents (Dec. 11)
 Hervé, Edouard, member of the French Academy and the founder of *Le Soleil* (Jan. 4), 64
 Hildesheimer, Dr. Israel, of Berlin, a famous Orthodox Rabbi (June), 79
 Hobart, Garret, Vice-President of the United States (Nov. 21)
 Hoge, Rev. Moses D., D.D., of Richmond, Virginia, U.S.A., chaplain to the Confederate camp at Richmond in the Civil War (Jan. 21), 79
 Hohenwart, Count Karl, Prime Minister of Austria in '71, and a prominent party leader in the Reichsrath (April 26), 75
 Ingersoll, Colonel Robert G., "the American Bradlaugh," Agnostic lecturer and author (July 21), 66
 Kiepert, Professor, of Berlin, the eminent geographer (April 21), 81
 Krementz, Cardinal, Archbishop of Cologne (May 6), 79
 Marsh, O. C., Ph.D., LL.D., Professor of Paleontology at Yale College, U.S.A. (March), 68
 Mertel, Cardinal, Vice-Chancellor of the Roman Catholic Church (July 11), 93
 Nubar Pasha, the Egyptian statesman. He was born at Smyrna, of Armenian parentage, and after serving Mahomed Ali he rose rapidly, especially under Ismail Pasha, and succeeded in altering the law of succession and in setting up the Mixed Tribunals (Jan. 14), 74
 Palladius, the Metropolitan of St. Petersburg and Ladoga (Dec. 17, '98), 71
 Possiet, Admiral, Russian Minister of Ways and Communications '74-88 (May 8), 80
 Rechberg und Rothenlöwen, Count Johann Bernhard, Prime Minister of Austria in '59 and Foreign Minister '59-64 (Feb.), 92
 Ristitch, M. Jovan, leader of the Liberal party in Serbia, Prime Minister '67, appointed Regent in '68 during Prince Milan's minority, and held office till '72. He was several times Premier afterwards, and again became Regent on King Milan's abdication in '89 till '93 (Sept. 4), 68
 Rochebouet, General de, a former Prime Minister of France (Feb. 24), 88

Sarcey, Francisque, French dramatic critic, and author of "Comédiennes and Comédiens" and other works (May 16), 71

Scheurer-Kestner, M., a former Vice-President of the French Senate, a distinguished chemist, and one of the principal leaders of the French campaign on behalf of Dreyfus (Sept. 19)

Schoenborn, Cardinal Count Francis, Archbishop of Prague and Primate of Bohemia (June 24), 55

Secrétan, M., the leader of the copper ring of '88 (March) 63

Silva, Americo Ferreira dos Santos, Cardinal Bishop of Oporto and spiritual adviser to the King of Portugal (Jan. 21), 69

Sviatopolk-Mvisky, Prince, member of the Russian State Council (Jan. 30), 72

Thomson, Frank, President of the Pennsylvania Railroad (June 6)

Vanderbilt, Cornelius, the head of the Vanderbilt family of America, and director of a large number of railway companies (Sept. 12), 56

Von Simson, Dr. Martin Edward, who in '49 at Berlin, as President of the National Assembly, and again in '70 at Versailles, as President of the North German Reichstag, offered the Imperial Crown to King Frederick William IV. and to King William I. President of the Supreme Court of the Empire '79-91 (May 2), 88

Williams, Rt. Rev. J., Bishop of Connecticut, and Presiding Bishop of the Episcopal Church U.S.A., (Feb. 7), 81

MISCELLANEOUS.

Allport, S. B., Master of the Birmingham Proof House '02-9 (Oct. 23), 76

Barnes, William, the Notts cricketer (March 24), 46

Cadbury, Richard, of the firm of Cadbury Bros., cocoa manufacturers; and a generous philanthropist (March 22), 63

Castner, Hamilton Y., Managing Director of the Aluminium Co. at Oldbury, and the Castner-Kellner Co. at Weston Point, near Runcorn (Oct.)

Cook, John M., head of the firm of Messrs. Thomas Cook & Son, and one of its founders (March 4), 65

de Reuter, Baron Paul Julius, the founder of the great news agency known by his name. Beginning in Berlin, he made London his headquarters in '51, and thenceforward steadily built up the agency (Feb. 25), 83

Donaldson, John, partner of Mr. Thornycroft, the naval engineer (Oct. 4), 57

Graham, George, Chief Engineer Caledonian Railway (June), 78

Grant, Baron Albert, ex-M.P. for Kidderminster, financier, and the donor of Leicester Square to the Metropolis (Aug. 30), 68

Head, Jeremiah, consulting engineer (March 10), 64

Inskip, William, General Secretary National Union of Boot and Shoe Operatives (May 11), 47

Ismay, T. H., of Liverpool, of the firm of Ismay, Imrie & Co, the White Star Co., the Oceanic Steamship Co., etc. (Nov. 23), 62

Jones, Henry, better known as "Cavendish," the author of "The Laws and Principles of Whist" (Feb. 10), 68

Laird, William, senior partner of Laird Bros., shipbuilders, of Birkenhead (Feb. 7), 67

Lloyd, Herbert, of the firm of Edward Lloyd, Ltd. (May 12)

Lyster, George F., engineer-in-chief to the Mersey Docks and Harbour Board for over twenty years (May), 76

Peek, Francis, long Chairman of the Howard Association, and author of "Social Wreckage" and other writings on social reform (Sept. 11)

Raphael, Henry Lewis, senior partner of R. Raphael & Sons, of the Stock Exchange, and bankers (May 11), 67

Renshaw, Ernest, the lawn tennis player (Sept. 2), 37

Spottiswoode, George A., senior partner of Spottiswoode & Co., Government printers, and Vice-Chairman of the House of Laymen (Feb. 8), 72

Swarbrick, Samuel, General Manager G.E.R. '66-80 (Jan. 22), 79

Vogel, Professor H. W., known for his photographic discoveries (Dec. 19, '98), 64

Whittaker, Thomas, of Scarborough, temperance advocate (Nov. 20), 86

Obok is a port on the Bay of Tadjurah, in the Gulf of Aden, and is a French possession, together with a wedge of territory lying between Erythraea and the British Somali Coast Protectorate. See FRENCH SOMALILAND.

O'Connor, T. P., M.P. See under COMMONS.

O'Connor, Sir Nicholas R., Ambassador at Constantinople. See PRIVY COUNCIL.

Oddfellows, Independent Order of (Manchester Unity, Friendly Society). According to the report for the year '98 the total adult membership is 804,415. It has also 111,512 juvenile members. The total capital of the Order belonging to Society, Districts and Lodges, amounts to £10,074,410. The summary of receipts and expenditure for the year ending Dec. 31st, '98, is to the following effect. Receipts—contributions to sick and funeral fund, £911,856; interest, £320,146; admissions, £3422. Expenditure—sickness benefits, £704,777; funerals, £171,527. Excess of receipts over expenditure was, therefore, £359,120. An important new departure was made in '98, when it was agreed to form lodges composed of females only. **Grand Master**, Tom Hughes, J.P., Llanely, Carmarthenshire. **Secretary**, Thomas Collins; **Assistant Secretary**, Walter Collins, 97, Grosvenor Street, Chorlton-on-Medlock, Manchester. There is also the **National Independent Order of Oddfellows**, which consists of 572 lodges, with an adult membership of 56,083, and a juvenile membership of 8088. It has a capital of £177,060. Other bodies are the **Grand United Order of Oddfellows**, with a total membership of 79,453, and funds amounting to £650,000; and the **British United Order of Oddfellows**, with a membership of 15,047.

OLD AGE PENSIONS.

Much valuable information has been furnished on this important subject in the evidence given before, and the reports of, the Royal Commission appointed in '93, the Treasury Committee of '96, and the Select Committee of the House of Commons in '99. The **Royal Commission of '93**, of which Lord Aberdare was chairman, was appointed "to consider whether any alterations in the system of Poor Law Relief are desirable in the case of persons whose destitution is occasioned by incapacity

or work resulting from old age, or whether assistance could otherwise be afforded in those cases." The Commissioners were engaged for about two years, and took evidence from about seventy witnesses, ranging over the whole administration of the Poor Law. They also examined numerous schemes for dealing with the old age question. The Special Committee of '96 was presided over by Lord Rothschild, and was appointed "to consider any schemes . . . for encouraging the industrial population by State aid or otherwise to make provision for old age . . . with special regard, in the case of any proposals of which they may approve, to their cost and probable financial results to the Exchequer and local rates, their efforts in promoting habits of thrift and self-reliance, their influence upon the prosperity of the friendly societies, and the possibility of securing the co-operation of these institutions in their practical working." This Committee was composed of several distinguished permanent officials, and two or three actuaries and representatives of friendly societies. It was appointed at the suggestion of the members of the Aberdare Commission, who were of opinion that the schemes notified to the latter body had not been fully dealt with. Neither the Commission nor the Committee made any recommendations in favour of old age pensions. As several Bills were introduced into the House of Commons during '99 by private Members, embodying different principles for the pecuniary relief of old age of the poor, the Select Committee of '99, of which Mr. Chaplin was the chairman, was appointed "to consider and report upon the best means of improving the condition of the aged deserving poor, and for providing for those of them who are helpless and infirm; and to inquire whether any of the Bills dealing with old age pensions, and submitted to Parliament during the present session, can with advantage be adopted, either with or without amendment." The Committee had before them sixty-nine witnesses who were examined by the Royal Commission in '93 and '94, and also the testimony which was given to Lord Rothschild's Committee in '96 and '97, and which was more expressly directed to old age pensions. In their report on July 26th, '99, the Committee say:—"The evidence thus already taken on this question was voluminous, and in some respects exhaustive, and we decided to limit our examination as far as possible to the evidence of witnesses who were able either to bring new information to our notice or to tell us from their own experience the results of certain systems of old age pensions which were in existence already, either in this country or abroad, or who were thoroughly conversant with questions relating to provision for the poor."

It is beyond doubt that, while a small proportion of the working classes possessed of exceptional strength and self-denial have been able to place themselves on attaining old age in an adequate pecuniary position for their future maintenance, the vast majority of such wage-earners have not been able to do so, and apparently cannot, because their wages will, even with reasonable thrift, never provide them with more than enough wholesome food, clothing, shelter, and other necessities of life when in full work. The Workmen's Compensation Act, '97, which was passed mainly in the interests of wage-earners, has had quite

an unexpected result in causing the older employees to be dismissed. Both the Royal Commission and the Treasury Committee referred to have made strong statements on the remarkable increase of thrift among the working classes in modern times, and on the danger of making proposals which might tend to arrest or impede the laudable efforts which many of the poorer classes are making to secure for themselves an independent position in old age by the exercise of prudence and self-denial. While, however, concurring in this opinion, the before-mentioned Select Committee on the subject in '99 state that they could not ignore the fact, "abundantly supported as it is by the evidence we have had before us, that cases are too often to be found in which poor and aged people, whose conduct and whose whole career has been blameless, industrious, and deserving, find themselves, from no fault of their own, at the end of a long and meritorious life with nothing but the workhouse or inadequate outdoor relief as the refuge for their declining years." Although the majority of inmates of workhouses are there on account of sickness or infirmity, there are numerous instances of hard-working people who have entered these institutions from misfortune beyond their control. Nearly one-half of the working population of this country either cannot or do not make sufficient provision for their old age, and are therefore more or less dependent upon the rates at about 65 years of age and upwards. There is also a large population always on the verge of poverty, and who, to avoid pauperism, have to make great sacrifices. In his speech on Mr. Holland's Old Age Pensions Bill on March 23rd, '99, Mr. Chamberlain said that the extraordinary amount of old age pauperism which exists in this country "is proved not to be due or mainly due to drink, idleness, or culpable improvidence. To contend the contrary would be to draw an indictment against the whole of the working classes. It is evidently not true, for the statistics published by Mr. Booth show that while the pauperism between the ages of 16 and 65 is, I think, about 12 per cent., at all events the pauperism of persons over the age of 65 is seven times that proportion. That shows clearly that it is the failure of powers in old age which produces by far the larger amount of pauperism, and if we wanted any further confirmation we have it in the fact that of the people who come on the Poor Law at the age of 65, five-sixths have never applied for relief up to the age of 60."

All old age pension schemes may be logically divided into four great classes, viz. :—(a) Schemes involving compulsory contribution, whether with a State subsidy or not; (b) Schemes which include universal pensions without contribution by the beneficiaries; (c) Schemes involving State-aided pensions in which the beneficiary provides his quota, to be supplemented either by the State or the local authorities; and (d) schemes for pensions to special classes of the community, such as members of friendly societies. There are also schemes which more or less comprise the features of these four classes, but the latter include all the general principles involved.

The first of these categories which has engaged the most attention is that of Canon Blackley, but its operation and advantage to

pensioners would be deferred for many years, and is opposed to the wishes of nearly all members of the class to which it would apply. Such scheme would also be very partial in its operation, and would not provide for the most necessitous of the aged poor. Again, a great proportion of the young men employed in unskilled work are not so circumstanced that it would not be practicable to collect from them the necessary contributions, even if they had the money to pay the same, and many of them out of their small earnings could not make the payments required by the scheme. As regards schemes involving universal pensions without contributions by the recipients, the principal one, which has been very much discussed, is that of **Mr. Charles Booth**. He firstly suggested that every one, from a millionaire to a peasant, on reaching the age of 65 should be entitled to draw 5s. per week from the State. The object of making the pensions universal is to take away the stigma of pauperism, because if every one were entitled to a pension, then no one, it is alleged, would be subject to any social stigma in drawing it. Now several arguments may justly be brought against the adoption of this scheme. In the first place there are at present about 2,000,000 persons in the United Kingdom of 65 years of age and more, and to provide each of them with a pension of only 5s. a week would cost £26,000,000 per annum, irrespective of the cost of administration. The social organisation would be seriously disturbed by raising such an enormous sum by taxation, even if the well-to-do and the self-respecting did not draw the pensions. If Mr. Booth's pension method were provided, there can be little doubt that either wages would be reduced or there would be a practical prohibition of employment imposed on persons who drew pensions. Mr. George King, in an address on old age pensions before the Insurance and Actuarial Society of Glasgow, on March 13th, '99, said that for their own protection the industrial classes would not permit those drawing State pensions to engage in remunerated employment; otherwise they would be in competition with a subsidised class, who would underbid them in the labour market, and the evils of the ancient Poor Law would be reintroduced. If an absolute prohibition were passed against a pensioner doing any work to supplement his pension, a large compulsorily idle class would be created to their injury, and to the disadvantage of the community.

Concerning voluntary State-aided pensions, the idea underlying schemes for this purpose is that, by the offer by the State of a supplementary allowance, the working classes might be encouraged to save enough money to make provision for their old age. The Rothschild Committee examined very many schemes of this kind, but not finding any one satisfactory proposed one of their own upon the basis of a scheme suggested by **Sir Spencer Walpole**. The proposal of that Committee was that any person over 65 who could produce an income from an "assured source" of not less than 2s. 6d., and not more than 5s. per week, should receive from public funds a supplement varying inversely to his own income, but not beyond 2s. 6d. per week. An "assured income" was to mean an income obtained from real estate or a post office or friendly society authority, or any other safe source. Now the Committee

practically crushed this scheme by certain adverse remarks respecting it, because, after declaring that it would encourage thrift up to a particular point, they stated it would subsequently discourage such, and would only assist a very limited section of the manual labour community, because the 5s. per week limit would exclude those who were better off; and that the impossibility of providing the 2s. 6d. contribution would exclude all the poorest, and that of the remainder many from infirmity would be unable to live upon a pension outside of public institutions.

Concerning schemes for pensions to special classes of the community as members of friendly societies, much conflicting evidence has been given. It has been strongly advocated that a legal right should be conferred on persons to receive old age pensions at 65 by definite meritorious acts. The qualification for this purpose which has generally been suggested is **membership of a friendly society during a fixed term of years**. This proposal has been objected to, because such membership is not the only proof of an economically virtuous life, and that the practical adoption of such a qualification would exclude a vast number of meritorious individuals. For example, in Ireland there is much thrift among the working classes, but membership of friendly societies is not the form which it generally takes. Another great objection to giving special privileges as regards pensions to members of friendly societies is that the majority of persons in the United Kingdom who are over 65 are women, and these would be almost totally excluded. There are but few of these societies which admit women to membership, and even if the contrary were the case, the circumstances under which the majority of females of the wage-earning classes are placed would prevent them from joining friendly societies. Again, many of these societies are financially unsound.

Lastly, other popular forms of investments, as subscriptions to building societies, co-operative societies, houses, and savings in banks, are equal and often better tests of thrift than contributions to friendly societies. Another leading pension scheme urged upon the Select Committee of '99, was that a legal right to a pension should be given to every individual who was over 65 and had not received Poor Law relief (unless under exceptional circumstances), and had not been convicted of a criminal offence for a term of years before the application for a pension, and **whose income was less than 10s. a week**. The great objection to legislate for this scheme is the enormous cost of such, because there is reason to believe that out of about 2,000,000 persons in the United Kingdom of over 65 years of age, not more than 700,000 possess incomes beyond 10s. per week.

The Select Committee of '99 stated in their report that they were of opinion "that the success of the **Danish old age pension scheme** on the one hand, and on the other the satisfactory results of the pension schemes which have for many years been established in England by the Charity Commissioners, afford *prima facie* evidence that it is practicable to create a workable system of old age pensions for the United Kingdom." The Danish pension system was established by a law

passed in '91. Under it applications for a pension must be made to the commercial authorities, who are also the poor law authorities (and in Copenhagen to the permanent officer, who is nominated by the municipality and confirmed by the Crown), on a form authorised by the Minister of the Interior, accompanied by certain particular information. The principal qualifications for a pension are that the applicant must be a native-born subject, over 60 years of age, and "without the means of providing himself, or those practically dependent on him, with the necessaries of life, or with proper treatment in cases of sickness." There are also disqualifications for the pension: firstly, that the pensioners must not have undergone sentence for any transaction deemed dishonourable, regarding which he had not received rehabilitation; secondly, his poverty must not be the result of any actions by which, for the benefit of his children or others, he has deprived himself of the means of subsistence, or caused by a disorderly and extravagant mode of life, or in any other respect be brought about by his own default; and, thirdly, he must not have received Poor Law relief for ten years before the application. Although the commercial authority cannot refuse a pension to any person who fulfils all the conditions required for such, the nature and the amount of the relief to be given is left to their discretion. The law declares that such relief "must be sufficient for the support of the person relieved and of his family, and for their treatment in sickness, but it may be given in money or in kind, as circumstances require, and consist in free admission to a suitable asylum, or other establishment intended for this purpose." Mr. James Davy, one of the general inspectors of the Local Government Board, who went to Denmark to examine the State pension system, states that under the Act creating these Danish pensions they can be withdrawn in certain circumstances but in his belief are very seldom taken away, and are considered as a permanent provision for old age. On this account, and as they do not involve any civil disability, he believed them to be very popular, and was informed that the people regarded a pension as more honourable than Poor Law relief.

Sir Henry Longley, the Chief Charity Commissioner, supplied information to the Select Committee as to the old age pension schemes established by the Charity Commissioners in recent years. The conditions contained in their typical schemes are usually five, which are (a) that the pensioners must be poor; (b) of good character, and able to prove that they have led reasonably provident lives; (c) they must have resided in the parish for five years before the application; (d) they must not have received Poor Law relief during that period; and (e) they must be wholly or partially unable to maintain themselves by their own exertions, in consequence of their old age, ill-health, accident or infirmity.

The Select Committee of '99 were of opinion that the general lines upon which a scheme of old age pensions might best be framed should include the following conditions:—(1) "Any person (meaning either man or woman) who satisfies the pension authority that he—(1) Is a British subject; (2) Is 65 years of age; (3) Has not within the last twenty years been convicted of

an offence and sentenced to penal servitude or imprisonment without the option of a fine; (4) Has not received poor relief other than medical relief, unless under circumstances of a wholly exceptional character, during twenty years prior to the application for a pension; (5) Is resident within the district of the pension authority; (6) Has not an income from any source of more than ten shillings a week; and (7) Has endeavoured to the best of his ability, by his industry or by the exercise of reasonable providence, to make provision for himself and those immediately dependent on him; shall receive a certificate to that effect and be entitled to a pension." With reference to the exercise of reasonable providence, the Committee state that "we think that the authority should be bound to take into consideration whether, and how far, it has been shown, either by membership of a benefit society for a period of years or by the endeavour of the applicant to make some provision for his own support by means of savings, or investments, or some other definite mode of thrift. . . . We have thought it to be our duty to report, if possible, upon the questions directly committed to us during the present session, and it has therefore been impossible for us, within the means and the time at our disposal, to arrive at any estimate, which can in any way be relied on, either as to the number of applicants who would be eligible for pensions or as to the cost that the pensions would entail. It is to be observed, moreover, that the instruction to Lord Rothschild's Committee to have 'special regard to the cost and probable financial result to the Exchequer and the local rates of any schemes they might suggest,' was not included in the reference to this Committee. We think, however, that this branch of the subject should be further investigated during the recess by competent experts on the basis of the proposal that we recommend." The Committee next remark that they had still, however, to consider the amendments in the Poor Law, without which, in their opinion, any scheme for old age pensions would be incomplete, and would still leave many of the old deserving poor without improvement in their lot. They took some evidence themselves from Mr. Knollys and others on this branch of the subject, but their duties in this respect had happily been lightened by the labours of the Cottage Homes Committee and the report which they had published. Mr. Chaplin's Committee go on to point out that they were specially instructed by the reference to consider the best means of providing for those of the aged and deserving poor who are helpless and infirm, but they do not think that they could usefully add much to the views which that Committee had expressed already. Mr. Knollys stated in his evidence that all the inmates in the sick wards of the workhouse ought to get, and do get, "if the administration is carried out as it should be," the best available treatment under the existing system. This opinion is supported by the report of the Cottage Homes Committee, but that Committee also recommend the provision of separate cottages in connection with the workhouse, and these cottages would be available for old and deserving couples who are infirm. In this, and in further suggestions which the Cottage Homes Committee make with regard to classification and other matters, the Committee heartily concur; and they generally indorse the

recommendations which the committee make. In discussing the question of the pension authority the Committee express the opinion that "provision should be made for the withdrawal of a pension on proof being given that any of the statements on which it was granted were false, or that the circumstances under which it was given have materially changed." The Committee recommend:—"(1) That a pension authority should be established in each union of the country, to receive and to determine applications for pensions; (2) That the authority for this purpose should be a committee of not less than six or more than twelve members appointed by the guardians from their own number in the first instance; (3) That the committee, when so appointed, should be independent of the board of guardians, and that other members should be added to it, subject to regulations to be made by the Local Government Board, and that it is desirable that other public bodies within the area should be represented on the Committee, and that a majority of the committee shall be members of the board of guardians; (4) That the cost of the pensions should be borne by the common fund of the union, and that a contribution from imperial sources should be made to that fund in aid of the general cost of the poor law administration, such contribution to be allocated not in proportion to the amount distributed in each union in respect of pensions, but on the basis of population, not to exceed one-half of the estimated cost of the pensions; (5) That the amount of the pensions in each district should be fixed at not less than 5s. or more than 7s. a week, at the discretion of the committee, according to the cost of living in the locality, and that it should be paid through the medium of the Post Office; (6) That the pension should be awarded for a period of not less than three years, to be renewed at the end of that period, but subject to withdrawal at any time by the pension authority, if in their opinion the circumstances should demand it. In order to facilitate the inquiries of the pension authority, and to prevent as far as possible attempts at fraudulent misrepresentation, we think that applications for a pension should be made on a prescribed form, and should be signed before a justice of the peace on oath, without fee. The machinery which we propose for the administration of a pension scheme in England and Wales may not, in some respects, be possible or equally suitable for Ireland and Scotland, and our recommendations are subject to such modifications as to machinery as may be necessary or desirable in the case of either of these countries." The Committee lastly consider the main objections which have been put forward to the above and similar pension proposals, and in conclusion say:—"We are very sensible of the grave importance of the inquiry which has been committed to our care, and of the difficulties of the problem which it has been our duty to examine. We have given to the subject, within the time at our disposal, the best attention in our power, and we make our proposals with the deference which is due to the opinions of others on a difficult and highly complicated question. But we believe that if they are adopted they will add to the comfort, and improve the position, of the aged and deserving poor." See *SESSION*, sect. 83.

Ontario, a province of the Dominion of Canada—also called Upper Canada. It joined

with other provinces to form the Dominion in 1867. **Area**, 219,650 sq. m.; **pop.** 2,114,321. It extends along the north shores of the great lakes, and is important as containing the **Dominion metropolis, Ottawa** (pop. 44,154). Provincial capital, **Toronto**, pop. 181,220, on Lake Ontario, the second city in Canada in wealth and population. Besides the two capitals, important towns are Hamilton (pop. 43,980), London (pop. 31,977), Guelph, St. Catherine's, Brantford, Belleville, and Chatham. **Administered** by a Lieut.-Governor and responsible Ministry. There is only one chamber, the Legislative Assembly, which has 94 members elected by manhood suffrage for four years. Ontario has 24 seats in the Dominion Senate and 92 in the House of Commons. See *ANGLO-AMERICAN COMMISSION, BRITISH EMPIRE* (table), *CANADA*, and *DIPLOMATIC*.

ORANGE FREE STATE.

An independent Dutch republic in South Africa, bounded by Cape Colony on S. and W., Transvaal on N., Natal on E., Basutoland on S.E. **Area** estimated at 48,326 sq. m.; **pop.** 207,503, of whom 77,716 are whites, and of these about 85 per cent. are Dutch. Capital, **Bloemfontein**, pop. 3500. The Colony was founded by Boers who trekked from Cape Colony in and after '36, and was declared independent in '54. Executive vested in a **President** (Judge Steyn, elected '96), elected every five years by the registered voters, and a **Council**, consisting of the State Secretary, the Landrost of Bloemfontein, and three members, appointed by the Volksraad. The legislative authority is in the hands of the Volksraad, which consists of 60 members, elected for four years by burghers (adult whites) owning real property of not less than £150 value, or personal property to the value of £300, or holding on lease real property at a rental of £36. Burghers are qualified by birth or by naturalisation, and must have been in the State five years. Half of the members are re-elected every two years. The State is divided into 18 districts, each under a Landrost or Magistrate, appointed by the President, and confirmed by the Volksraad. Every able-bodied man above 16 and under 60 must take up arms in case of necessity, and the estimated number of men available is about 18,000. A treaty with the Transvaal was made in '97, giving burghers of each State the franchise in either Republic. The two Republics agreed to stand by each other in case of attack, and arranged that a joint Federal Council of ten members, five from each State, should consider questions of mutual interest, sitting every year alternately in Bloemfontein and Pretoria. Roman-Dutch law prevails. The prevailing religion is that of the Dutch Reformed Church, supported by the State. Education general, but not compulsory or free. **Chief products** are wool, hides, and diamonds. **Revenue**, '96, £374,774; **expenditure**, £381,861; **imports**, '96, £1,185,000; **exports**, £1,750,000; **public debt**, '96, £45,000. For Administration, etc., see *DIPLOMATIC*.

History, '99. On the invitation of President Steyn, Sir Alfred Milner, High Commissioner of South Africa, and President Kruger met at Bloemfontein (May 30th) to confer on the situation in the Transvaal, but separated (June 5th) without having come to any agreement (see *TRANSVAAL*). The sym-
 pa-

thy of the State with the Transvaal was made very apparent, both at this time and in the negotiations which followed. Mr. Fischer, a member of the Free State Executive, was constantly at Pretoria advising the Transvaal Government during the diplomatic correspondence between them and the British Government on the franchise question, and it was evident from the first that the two Republics meant to act in concert. When the situation began to look critical, Sir Alfred Milner, in informing the President that British troops were being sent north, and that a detachment would be stationed near the Free State borders, said that the movement was in no way directed against the Free State; and the Imperial Government, while hoping for a friendly settlement with the Transvaal, looked to the Free State Government to preserve strict neutrality, and to prevent military intervention by its citizens. They were prepared in that case to give formal assurances that the integrity of the Free State would be strictly respected under all circumstances (Sept. 19th). The President in his reply regretted the sending of the troops, as he could not see that the differences with the Transvaal justified the use of force as a solution. The Free State would do all in its power to allay excitement, but the sending of the troops would not improbably be regarded by the burghers as a menace. The Raad met (21st), and addressing them, the President charged Mr. Greene, the British agent at Pretoria, with decoying the Transvaal Government into making the offer of a five years' franchise, and plainly foreshadowed the intention of the State to assist the Transvaal in case of war. After a prolonged secret session it was resolved to instruct the Government still to use every means to maintain and ensure peace, but in case of war to join forces with the Transvaal (27th). Further correspondence ensued between the President and the High Commissioner, the former still offering his services to secure peace, but saying also that it had been deemed necessary to call out and arm the Free State burghers. He asked for assurances that the increase of the British forces in South Africa would not be continued, and that troops now on the water should not be landed. Sir A. Milner replied that no such assurances could be given, but he was prepared to exchange assurances that no hostile act would be committed during the negotiations (Oct. 6th). He also declared that any reasonable proposal, from whatever quarter proceeding, would be favourably considered by Her Majesty's Government if it offered an immediate termination of the existing tension and a prospect of permanent tranquillity. However, on the presentation of the Boer ultimatum, the President formally notified his intention of making common cause with the Transvaal, and the first act of hostility was committed by the Free State, who seized a Natal train on the frontier, *en route* to Harrismith. A force of burghers, estimated at 12,000, was at once sent into Natal to co-operate with the Transvaal forces, and full details of the fighting in that district will be found in the articles on the TRANSVAAL and NATAL. A considerable force of burghers had to be kept on the Basutoland border, as the natives there showed distinct signs of hostility to the Boers, who were, indeed, accused of trying to stir them up against the British. Other commandos were sent to the western

border to help invest Kimberley and other towns, and a proclamation annexing a part of Cape Colony was issued. The Upper Tugela division of Natal was also proclaimed to be Free State territory (Nov. 2nd). At first, though an invasion of Cape Colony was threatened, little was done; but it was reported (18th) that the Orange River had been crossed and Aliwal North, Colesberg, Jamestown, and other places occupied and their annexation proclaimed by Free State Boers. The colonists, too, were urged to make common cause with the Republics for the achievement of South African independence, and undoubtedly many Dutch colonists joined them, though General Sir Redvers Buller announced that H.M. Government would exact compensation for injury done to the property of loyal inhabitants, and that disloyal persons would be dealt with afterwards. See CAPE COLONY, TRANSVAAL, and OCCURRENCES DURING PRINTING.

Ordnance Survey Office, The, is a department under the Board of Agriculture for the preparation of maps and plans of the United Kingdom, which are issued on various scales. See ed. '94 for a full account of the recommendations of the departmental committee appointed in April '92 by the Board of Agriculture to inquire into the condition of the Ordnance Survey. The Survey was transferred from Army Funds to Civil Votes by the Survey Act '70. (See Board of Agriculture, under AGRICULTURE.)

Orleans, Duc d', Prince Louis Philippe Robert, the head of the house of Orleans, and probably the chief claimant to the throne of France, is the eldest son of the late Comte de Paris, and was b. Feb. 6th, '69. In '90 he entered Paris, notwithstanding the Expulsion Act of '86, and claimed his right, as a Frenchman, to undertake military service for his country. He was arrested, but shortly afterwards liberated. After the death of his father he received his supporters in London, and then removed to Brussels, as being nearer France. His sister, Princess Hélène d'Orleans, was married to the Duc d'Aosta in June '95. His marriage to the Archduchess Maria Dorothea of Austria was celebrated at Vienna, Nov. 5th, '96. See France for details of the conspiracies against the Republic with which it was alleged he was connected during '99.

Orphan Working School, The, was founded in 1758 by a body of philanthropists who started a small house at Hoxton, where twenty boys and soon after twenty girls were received. Now the institution includes the senior school at Maitland Park, N.W., where 400 children are provided for, and the Alexandra Orphanage for Infants, Hornsey Rise, N., the junior branch of the institution, where 200 little ones are accommodated and educated. There is a Convalescent Home too at Harold Road, Margate, containing provision for 25 children. The object of the institution is to keep and educate children of respectable parentage left fatherless and in need. The Secretary is A. C. P. Coote, M.A.; Office, 73, Cheapside, E.C.

Oscar II., King of Sweden and Norway, was b. 1829. Is a great-grandson of Napoleon I.'s famous general, Marshal Bernadotte, the first King of the new independent kingdom of Norway. He ascended the throne in '72, in succession to his brother Charles XV. He is an excellent scholar and writer, and has translated Goethe's "Faust" into Swedish. Issued in '88

a volume of minor poems under his *nom de plume* of "Oscar Frederik." He married, in '57, the Princess Sophia of Nassau, by whom he has issue four sons. His Majesty has evinced a most resolute opposition to the desire of the Norwegian Storting for a foreign and consular service independent of Sweden.

Ottoman Empire. See TURKEY.

Owens College, Manchester. John Owens, a Manchester manufacturer, vexed with the tests at the Universities, bequeathed, on his death in 1846, £96,654 for the purpose of founding this college, which commenced with 62 students. In '72, when their number had risen to 337, the old Quay Street buildings became too small, and the Owens College Extension Fund was started and ultimately reached £211,152; the old buildings being sold for £13,000. The new buildings were opened and amalgamated with the Manchester Medical School in '73. Further and rapid development was promoted by many generous bequests. In '80 the College became the first college of the Victoria University (*q.v.*). In '83 further additions to the college buildings became necessary, and were built; and, four years later, the new Beyer Laboratories and the Natural History Museums were erected, at a cost of £80,000. Additional buildings for the Medical Department were opened in Nov. '94, and the medical school is now one of the finest in the kingdom. In '88 Sir Joseph Whitworth's bequests to the College amounted to over £50,000 as supplemented by the liberality of his residuary legatees, one of whom, Mr. R. C. Christie, in '97, further presented the College with the balance of his share, amounting to £50,000, for the erection of a Hall and the completion of the Quadrangle. In '94 Mr. R. C. Christie offered to build a Library for the College at a cost of about £20,000, and the building was opened in June '98. A large new Physical Laboratory is at present in course of erection. Total students (98-9) 994 (528 arts, science, and law students, 111 women students, and 428 medical students). The admission of women was sanctioned by the Extension Act. There are three halls of residence—the "Hulme" (conducted on Church lines), the "Dalton" (in connection with the Society of Friends), both for men only, and a Women's Hall of Residence (Ashbourne House, Victoria Park). The College receives annually £3500 from Government, £1000 from the Manchester Hulme Trust, £700 from the Manchester Corporation (under the Technical Instruction and Local Taxation Acts), and £250, to be increased to £500, from the Lancashire County Council, in addition to £400 for the Manchester Museum, of which the College is entrusted with the administration. President, the Duke of Devonshire, K.G. Treasurer, Mr. Alderman Joseph Thompson. Principal, Alfred Hopkinson, Q.C.

Oxford, Bishop of. See under PEERAGE.

Oxford University. This University seems to have grown up in the twelfth century, although to Alfred the Great used to be ascribed the foundation of one college, University, in 872. Originally the scholars at Oxford lived scattered about in various houses in the city, meeting for instruction, but in other respects resembling the non-collegiate students of the present day. The number of undergraduates in residence is now somewhat over 3000. The

number has doubled in the last forty years, and is still increasing. The University began to experience reform at the hands, to some extent, of devoted sons in 1854. The Ordinance of that year, amongst other changes, assigned positive and not merely ornamental duties to the professoriate. The second Universities Commission introduced some sweeping changes which began to take effect in '82. Not the least of them, as affecting the personnel of the Colleges, was the substitution of Prize and Tutorial Fellowships for Life Fellowships (which had been voided, as a rule, by marriage, or neglect, save under dispensation, to take Holy Orders, and for none other cause). The Government of the University vests in three bodies: The **Hebdomadal Council** (so called from meeting once a week in term), which alone has power of initiation, **Congregation** (consisting of resident M.A.s and members of superior faculties), which has power of rejection and amendment, and **Convocation** (all M.A.s and members of superior faculties), which has power of rejection alone. The two latter bodies consist of members of Colleges, Halls, or of the Non-Collegiate Body. The **Colleges**, with reputed dates of foundation, and Heads, are: University, 872 (?), J. F. Bright, D.D.; Balliol, 1262, E. Caird, M.A.; Merton, 1270, Hon. G. C. Brodric, D.C.L.; Exeter, 1314, W. W. Jackson, D.D.; Oriel, 1326, D. B. Monro, M.A.; Queen's, 1340, J. R. Magrath, D.D.; New College, 1386, J. E. Sewell, D.D.; Lincoln, 1427, W. W. Merry, D.D.; All Souls, 1437, Sir W. R. Anson, Bart., D.C.L.; Magdalen, 1456, T. H. Warren, M.A.; Brasenose, 1509, C. B. Heberden, M.A.; Corpus Christi, 1516, T. Fowler, D.D.; Christ Church, 1532, Dean, the Very Rev. F. Paget, D.D.; Trinity, 1554, H. F. Pelham, M.A.; St. John's, 1555, J. Bellamy, D.D.; Jesus, 1571, J. Rhys, M.A.; Wadham, 1613, G. E. Thorley, M.A.; Pembroke, 1624, Rt. Rev. Bishop Mitchinson, D.C.L.; Worcester, 1714, W. Inge, D.D.; Hertford, 1874, H. Boyd, D.D. The **Halls**: St. Edmund, 1226, E. Moore, D.D.; St. Mary, 1325, D. P. Chase, D.D.; New Foundation, Keble College, 1869, W. Lock, D.D. The **Non-Collegiate Body** was instituted in 1868; Censor, R. W. M. Pope, D.D. The Private Halls, which bear the name of their Master, are: (E. S.) Grindle's; (C. A.) Marcon's; (R. F.) Clarke's; (Sir D.) Hunter-Blair's. A statute (passed in '80, amended in '93), allowing colleges within Her Majesty's dominions to affiliate, has been adopted by St. David's College, Lampeter, University College, Nottingham, and Firth College, Sheffield. Under a similar statute (of '87), applying to Colonial Universities, the following Universities enjoy the privileges therein contained:—Cape of Good Hope, Sydney, Calcutta, Punjab, Bombay, Adelaide, Madras, Toronto. The degrees ordinarily granted by the University are: Baccalaureate and Magistrate in Arts, and in the Sub-Faculty of Surgery, included in the Faculty of Medicine; the Baccalaureate and Doctorate in the Superior Faculties of Divinity, Law, and Medicine, and in the Faculty of Music. For the Baccalaureate in all these faculties, except Divinity, an examination must be passed. For that Baccalaureate, and for all the Doctorates except Music, a thesis or exercise qualifies. The quasi-Faculty of Music stands alone, but to entrance into all the other faculties the attainment of the Baccalaureate in Arts is essential. It may be taken either as a Pass or in any one of the Honour "Schools" of Classics, in its two

divisions of Moderations and Litteræ Humaniores, Mathematics (also divided into Moderations and Final Schools), Jurisprudence, Modern History, Theology, Natural Science, in one or more of its several branches, Oriental Languages, and English Literature. Equally with passing the examinations, residence for twelve terms (of which for these purposes there are four in each year) is essential, but it need not be continuous nor contemporaneous with the passing of examination, standing for which is reckoned from the date of matriculation, *i.e.*, formal entry into membership of the University. Women are admitted to the examinations for the B.A. degree, but here at present their privileges cease. They may join Somerville College, Lady Margaret Hall, St. Hugh's Hall, St. Hilda's, or the Home Students, a body in

some degree resembling the Non-Collegiate Body (see WOMEN, HIGHER EDUCATION OF). Two colleges, neither of which has any official connection with the University, have within recent years removed to Oxford: Mansfield, Principal A. M. Fairbairn, in '89; Manchester, Principal J. Drummond, in '93. Ruskin Hall, which also is not officially connected with the University, was opened in St. Giles' Street in Feb. '99 for the furtherance of the education of the working classes. Chief Officers of the University: Chancellor, Marquis of Salisbury, K.G.; Vice-Chancellor, T. Fowler, D.D., President of Christ Church; Proctors for '99-1900, W. M. Lindsay, M.A., Jesus College; H. E. D. Blakiston, M.A., Trinity College. Parliamentary Representatives, Rt. Hon. J. G. Talbot and Sir W. R. Anson, Bart., D.C.L., All Souls'.

P

Pacific Cable Scheme. During the last ten years much discussion has taken place as to the importance and necessity of the laying down of a cable between Canada and the British Australasian colonies. The subject attracted much attention at the Colonial Conference at Ottawa in '94. Of the several routes which have been proposed for the cable two may be mentioned. One is from Vancouver, British Columbia, to Fanning Island, Fiji, and Norfolk Island, and from thence to branch to Queensland and New Zealand. This route is entirely through British territory. The other route is from Vancouver to an island in the Hawaiian group, and thence through the Gilbert and Solomon Islands to Bowen in Queensland. In June '96 a committee was appointed to consider the matter. The delegates from the Imperial Government were Lord Selborne, Under-Secretary of State for the Colonies, and Mr. G. H. Murray, C.B., a principal clerk at the Treasury, with Mr. W. H. Mercer as secretary; the Canadian representatives were Sir Donald Smith and Sir Mackenzie Bowell; and the Australian delegates were Sir Saul Samuel and Mr. Duncan Gillies. The Committee in January '97 reported on the subject, but their final report was not published until early in '99. It was stated in the *Times* (April 27th) that the British Government had decided to enter into an agreement with Canada and the Australasian Colonies for the construction, laying, maintenance and working of an all-British Pacific Cable, substantially as recommended by the committee. It is arranged for a Board of Commissioners to be appointed under the authority of the British Parliament, in which Board the cable is to be vested for the use of the Governments sharing the undertaking, and in proportion to their respective shares in the joint guarantee. The Board are to issue debentures for the payment of capital and interest, which will become a first mortgage on the cable property and its earnings. All the landing-points are to be on British territory, and these several Governments will appoint administrators in proportion to their respective shares. Canada will take five-

eighteenths of the property, the United Kingdom the same amount, and New South Wales, Victoria, Queensland, and New Zealand one-ninth each. The Cable Committee in their report state that as a means of communication between Australasia and Europe would be dependent across America on the land lines and on the trans-Atlantic cables to America, it would be necessary for the owners of the proposed Pacific cable to have some working agreement with the proprietors of such land lines and the Atlantic cable companies. The only telegraph line which now runs from the eastern sea-board to Vancouver is that of the Canadian Pacific Railway Co. This company is in connection at Canso, Nova Scotia, with the Commercial Cable Co., which has three cables from Great Britain to Canso. This company is an American one, but all the landing stations are on British territory. Although the new telegraphic route in the Pacific will be a little longer than the existing one, it will only include about half the number of manual transmissions, which become a large item in the cost of working, and increase the risks of message errors. The highest estimate of the cost of the Pacific Cable, and adding something for contingencies, is not expected to exceed £2,000,000, the interest on which, at 2½ per cent., is £50,000 a year. To this also must be added the cost of repairs, and of a sinking fund for replacement of the cable. When all these items are reckoned, it is alleged that the probable earnings of the cable, at a very low tariff as compared with the existing one, show a very good surplus. It is reasonably supposed that half of the existing Australasian cable messages will be secured by the one to cross the Pacific, even if the old one should reduce its charges, per word to Australia, from 4s. 6d. to the proposed rate of 3s. It is not clear why the British Government decided to pay a subsidy for the new cable instead of coming to the same terms respecting it as Canada and the Australasian colonies. In June the Imperial Government decided to modify the form and extent of the pecuniary assistance which they are prepared to give to the Pacific cable pro-

ject. They originally proposed to contribute for twenty years an annual subsidy of not more than £20,000 in any year, but such subsidy was to be estimated on a basis which would limit the responsibility of the British Treasury to five-eightieths of the amount by which the net receipts of the cable fall short of the amount of the expenses. Such proposal was opposed by the colonies concerned. To meet their wishes the Government have intimated a willingness to reconsider the cable scheme on the basis of utilising the credit of the United Kingdom in the provision of the capital necessary. This matter appears still to be under discussion between the Imperial Government and the Colonial Governments affected. Each of the Colonial Governments interested in the question has been invited to appoint delegates to meet the Chancellor of the Exchequer and the Secretary of State for the Colonies in relation to the projected new cable. The object of the conference is to discuss questions relating to the mode of raising the necessary capital, and to the construction and control of the cable.

In the half-yearly report very recently issued of the Eastern Extension, Australasian, and China Telegraph Co., reference is made to the offer of that company, in conjunction with the Eastern Telegraph Co., to provide a new cable from England to Australia *via* the Cape of Good Hope. The *Electrician* of Nov. 3rd, '99, declares that these companies are at once to reduce the rates on ordinary messages to 4s. a word (an average reduction on Australasian telegrams of $\frac{1}{2}$ d. per word), to 3s. a word for Government messages, and to 1s. 6d. per word for press telegrams. The former-named company also offers to lay a cable from Durban to Freemantle (West Australia), *via* Mauritius, Rodriguez, and Cocos Islands. This will be an extension of the direct submarine line from England to the Cape, touching, amongst other places unconnected by cable, at Ascension and St. Helena; messages passing from Cape Town to Durban by the existing land lines. The companies do not ask for any subsidy or guarantee; but only, in consideration of these concessions, that they should be permitted to open offices in Perth, Adelaide, Melbourne, and Sydney, as they have done in the leading British towns. They moreover agree that when the revenue from Australasian traffic, after the successive reductions, again attains an average for three years of £350,000, the rates shall be successively reduced to 3s. 6d., 3s., and 2s. 9d. for ordinary messages. It is stated that the existing cables to Australia and South Africa being duplicated throughout, and tripled for the greater part of the distance, the new route will form a complete triplicate connection with those places, will open up communication with Ascension and St. Helena, now telegraphically isolated, will supply duplicate lines to Mauritius, and form another alternative route to India and China, etc., if the Mediterranean or Red Sea cables are interrupted, and also secure an additional connection between many intermediate places. Sir Charles Todd, the Postmaster-General of South Australia, has recommended the acceptance of this offer.

Sir Sanford Fleming recently stated that the Eastern Extension Telegraph Co. is in alliance with a company organised in the United States to lay a cable between San

Francisco and Manila. The latter company failed before Congress rose to obtain the subsidy it sought, but such company defeated the Government measure to establish a cable to Manila under the United States Post Office Department. There is, therefore, a strong probability that it will obtain all it requires on the next meeting of Congress. With a cable from San Francisco to Manila, and there connected with the Eastern Extension cables, the two companies will practically become one concern. "If before then the British cable has made no progress, there will be but small hope for it afterwards." As to other cable projects in the Pacific, mentioned in previous editions of the ANNUAL, nothing of importance appears to have been done during the last twelve months.

Paderewski, Ignace Jan, the famous pianist and composer, was born on Nov. 6th, 1860, in Padolia, a province of Russian Poland. He began to play the piano at the age of three, and, when seven years old, was placed under Pierre Sovinski, a local tutor. In '72 he went to Warsaw, learning harmony and counterpoint from Roguski, and subsequently from Frederick Kiel. He toured through Russia, Siberia, and Roumania, playing only his own compositions. In '78 he became Professor of Music in Warsaw Conservatoire, still continuing to practise his art indefatigably. For a short while in '84 he was a professor at Strassburg Conservatoire, but then definitely decided to try his fortune as a virtuoso. After three years' study with Leschetizky, in Vienna, he made his *début* in '87 with instant success. He next toured through Germany, and in the autumn of '89 appeared in Paris, where he created a *furor*. His *début* in London took place under Mr. Daniel Mayer's direction, on May 9th, '90, at St. James's Hall. In the following year he visited America, and has since repeated the tour. He has composed more than eighty vocal works, a concerto in A minor for piano and orchestra, a suite for orchestra in G, and many pieces for the piano. His "Polish Fantasia" was produced at the Norwich Festival in '93. M. Paderewski is a widower, with one son.

"Pall Mall Gazette." Evening newspaper and review. Established 1865, by George Smith, of Smith, Elder & Co. Transferred to Henry Yates Thompson, his son-in-law, in '80. First number appeared Feb. 7th, '65. Edited first by Frederick Greenwood, next ('80) by John Morley, who in turn was succeeded in '83 by W. T. Stead, and he by Mr. E. T. Cook. In Oct. '92 the paper was sold by Mr. Thompson to the Hon. W. W. Astor. The present editor is Sir Douglas Straight. **Offices**, 18, Charing Cross Road, W.C.

"Pall Mall Magazine." An illustrated magazine intended by its proprietor, Mr. W. W. Astor, to equal in every respect the best American publications. The editor is Lord Frederic Hamilton. The first number appeared in May '93, and at once achieved a success, which has since been more than maintained. The price is 1s. **Editorial Offices**, 18, Charing Cross Road.

Pamirs, The, are sometimes called "The Roof of the World," and consist of a number of bleak plateaux and shallow valleys situated about 13,000 feet above the sea level. They lie between Chinese Turkestan, Russian Turkestan, and Afghanistan, and are inhabited chiefly by

nomad Khirghiz bands. They command the routes to many of the territories which they overlook, and so Russia and England and the Afghans and the Chinese are all interested in them. In April '94 Russia so far conceded China's demands as to undertake that, pending the conclusion of a final agreement, Russian troops should not touch the portion of Pamir territory claimed by China. Negotiations between the Russian and British Governments resulted during March '95 in an agreement that the spheres of influence of the two countries should be divided by a line starting from a point on Lake Victoria (Zor Zul) near to its eastern extremity, and following the crests of the mountain range running somewhat to the south of the latitude of the lake towards the Chinese frontier. For full details see ed. '96. A joint commission of British and Russian delegates was entrusted with the demarcation of the line. The British Government engaged that the territory lying within the British sphere of influence between the Hindu Kush and the line from the east end of Lake Victoria to the Chinese frontier should form part of the territory of the Ameer of Afghanistan, that it should not be annexed to Great Britain, and that no military posts or forts should be established in it.

Panama Canal. See **ENGINEERING**.

Paraguay, Republic of. One of the most promising states of South America, situated between the rivers Parana and Paraguay. Capital, **Asuncion**, pop. about 45,000. Area about 98,000 sq. m.; pop. about 600,000 whites, exclusive of large numbers of Indians. It is governed by a President elected for four years, a Congress consisting of a Senate and a Chamber of Deputies, both elected by universal suffrage, and five Ministers of State chosen by the President. The State religion is Roman Catholic, but all others are tolerated. Education is free and nominally compulsory. A railway of about 160 miles is opened. There are vast supplies of timber in the forests, but the chief products are tea, tobacco, sugar-cane, cotton, and coffee. A large number of cattle are reared. Estimated revenue, '98 (peso at 4s.), about £1,795,250; expenditure, £1,688,250; public debt, '98, £994,600; imports, '98, about £440,470; exports, about £2,856,000. For Ministry, etc., see **DIPLOMATIC**.

Parish Councillors (Tenure of Office). See **SESSION**, sect. 86.

Parish Councils. See **LOCAL GOVERNMENT**.

Parker, Gilbert, is the son of Captain Joseph Parker, R.A., and was born in Canada, Nov. 23rd, 1862. He was educated at Trinity University, Toronto, from which he holds the degree of D.C.L. He was for some years associate editor of the *Sydney Morning Herald*, New South Wales, and there devoted himself to dramatic and literary work entirely. He is the author of "Round the Compass in Australia," "A Lover's Diary," "Pierre and his People," "Mrs. Falchion," "The Trespasser," "The Translation of a Savage," "When Valmond came to Pontiac," "An Adventurer of the North," "The Seats of the Mighty," "The Pomp of the Lavillettes," and "The Battle of the Strong." A dramatised version of "The Seats of the Mighty" was produced at the opening of Her Majesty's Theatre in April '97. Address: 20, Carlton House Terrace, London, S.W.

Parker, Rev. Joseph, D.D., minister of the City Temple, Holborn Viaduct, was b. at Hexham, 1830. Ed. at Univ. Coll., London '52. Ordained in the Congregational body '53. Has held the following church appointments: Banbury '53, Manchester '58, London, City Temple '69-98. The cost of the City Temple was £70,000. It accommodates 3000 persons. Chairman of Congregational Union of England and Wales '84, of London Congregational Board '83, and a second time '97, and of London Congregational Union '90. Founder of Nottingham Congregational Institute. Dr. Parker, in addition to being a vigorous and popular preacher, is also an author of repute. Among numerous works written by him may be mentioned "The Paraclete," "Ecce Deus," "Springdale Abbey," "Inner Life of Christ" (3 vols.), "Apostolic Life" (3 vols.), "Paterson's Parish," "Studies in Texts" (6 vols.), and "The People's Prayer-Book." He has visited the United States five times. He was for years engaged on the "**People's Bible**," which is now completed in twenty-five vols., and may be regarded as the *magnum opus* of his literary labours. The conclusion of his twenty-fifth year of ministry in London was celebrated during '94 by numerous good wishes and gifts from all denominations, and the purchase of an annuity, value £250. On June 18th, '98, Dr. Parker celebrated his preaching jubilee. In connection with this event he has published a book, "A Preacher's Life: an Autobiography and an Album." Dr. Parker preaches in the City Temple every Thursday at 12 (noon).

PARLIAMENT AND PARLIAMENTARY PROCEDURE.

Parliament is composed of the **Sovereign** and the **Three Estates of the Realm**, which are the Lords Spiritual, the Lords Temporal, and the Commons; the Lords Spiritual and Temporal sitting together and forming the **House of Lords**. The Sovereign alone has the power of summoning or proroguing or dissolving Parliament, and gives the Royal Assent to measures which have passed both Houses. Unless it be dissolved by the Crown, Parliament exists seven years from the date on which it was first to meet. The demise of the Crown does not dissolve Parliament, but, on the contrary, renders an immediate assembling of the two Houses necessary; and if there be no Parliament in existence, the old Parliament must reassemble, and may sit again for six months, if it be not within that time dissolved by the new Sovereign. See also **COMMONS**, **HOUSE OF**, and **PEERAGE**.

The Houses of Lords and Commons differ from each other not only as to their constitution but likewise in respect of their powers and methods of procedure. It is in the **House of Peers**, for instance, that the Sovereign meets Parliament, and the formal ceremonies connected with the opening or proroguing of the Legislature are gone through. On these occasions, as also when the royal assent is given to public or private bills, the "faithful Commons" merely attend in their lords' House. But, on the other hand, the House of Commons has an individuality of its own, which is yearly becoming more marked. Its powers and privileges are enormous: it is in the Lower Chamber exclusively that the national estimates are voted, and it is in the Commons that the majority of

important legislative proposals are initiated. The royal assent to bills is always given in the House of Lords, more frequently by commission than otherwise; and it is a curious circumstance that the French language is still employed in connection therewith. When a public bill is approved, the clerk says, "*Le roi (or, la reine) le veut.*" If the measure be a private one, he says, "*Soit fait comme il est désiré.*" Should the bill have subsidies for its object, the official says, "*Le roi (or, la reine) remercie ses loyaux sujets, accepte leur bénévolence, et aussi le veut.*" If the Sovereign thinks fit to refuse approval to a measure, the clerk then says, "*Le roi (or, la reine) s'avisera.*" This power of rejection, it may be noted, was last exercised by Queen Anne, in the year 1707.

The most striking feature in the procedure of the House of Commons is the great power vested in the Speaker. Unlike the Lord Chancellor, the Speaker must abstain from debating, unless in committee of the whole House; and even there he rarely takes advantage of his right. The member of the House who is elected to the office of Speaker usually acts quite independently of party considerations. He never votes, save when the numbers happen to be equal, in which case he gives the casting voice. The chief duty of the Speaker undoubtedly is the preservation of order, with respect to which the rules of the House of Commons are very stringent. Only the royal assent can convert a bill into an Act of Parliament. It occasionally happens that the opponents of a bill are not desirous of meeting the motion for its second reading with a direct negative. An amendment is therefore proposed to the effect that the bill "be read this day three months," or "this day six months," it being understood that three months or six months hence the House will not be sitting. In the cases of motions in respect to which the House is also unwilling to come to a decision, "the previous question" may be carried, in which case the other business of the day is at once proceeded with.

The business of both Houses of Parliament, but more especially of the House of Commons, is transacted very largely "in committee." When the whole House is in committee the Speaker vacates the chair, the Mace is placed under the table, and the Chairman of Ways and Means or another member of the House presides. Proceedings relating to the expenditure of public money take place in Committee of Supply, while in Committee of Ways and Means resolutions having reference to the funds by which such expenditure is to be sustained, are passed. There are also grand committees, Select Committees chosen for specific purposes, and committees for the consideration of private bills. No member of the House of Commons can, as a matter of fact, resign his seat, but this end is attained by his acceptance of the "Chiltern Hundreds." No office having emolument attached can be conferred on a member of the House of Commons without his vacating his seat; and therefore by obtaining "the stewardship of Her Majesty's Chiltern Hundreds, the stewardship of the Manor of Poynings, of East Hendred and Northstead, or the Escheatorship of Munster," a member may rid himself of his duties.

The rule regulating the sittings of the House of Commons provides that unless the House shall otherwise order, the House shall meet

every Monday, Tuesday, Thursday and Friday, at 3 o'clock, and shall, unless previously adjourned, sit till 1 o'clock a.m., when the Speaker shall adjourn the House without question put, unless a bill originating in Committee of Ways and Means, or unless proceedings made in pursuance of any Act of Parliament or standing order, or otherwise exempted from the operation of the standing order, be then under consideration. At midnight on Mondays, Tuesdays, Thursdays, and Fridays, except as aforesaid, and at half-past 5 on Wednesdays, the proceedings on any business then under consideration are to be interrupted, any dilatory motion which may be before the House is to lapse without question put; and the business then under consideration, and any business subsequently appointed, is to be appointed for the next day on which the House shall sit, unless the Speaker ascertains by the preponderance of voices that a majority of the House desires that such business should be deferred until a later day. On the interruption of business the closure may be moved, and in such case the Speaker or Chairman is not to leave the chair until the questions consequent thereon have been decided. After the business under consideration at midnight, or at 5.30 on Wednesdays, has been disposed of, no opposed business is to be taken. A motion may be made by a Minister of the Crown at the commencement of public business, to be decided without amendment or debate, to the effect that the proceedings on any specified business if under discussion at midnight that night be not interrupted under this standing order. When the House meets at 2 o'clock for a morning sitting, the sitting is suspended at 7 (no opposed business to be taken after 10 minutes to 7), and is resumed at 9, and continued, unless previously adjourned, until midnight, the evening sitting being subject to the provisions of the Standing Order No. 1, which relate to the interruption of business and the adjournment of the House. On Wednesdays the House meets at noon, opposed business is not taken after 5.30, and the House adjourns at 6.—**Closure of Debate.** Questions for the closure of debate are to be decided in the affirmative, if when a division be taken it appears by the numbers declared from the Chair that not less than one hundred members voted in the majority in support of the motion.—**Disorderly Conduct.** The Speaker or the Chairman may order members whose conduct is grossly disorderly to withdraw immediately from the House during the remainder of that day's sitting; and whenever any member shall have been "named" by the Speaker or Chairman for disregarding the authority of the Chair, or for abusing the rules of the House by persistently and wilfully obstructing business, or otherwise, he may, by vote of the House, be suspended from the service of the House, on the first occasion for a week, on the second occasion for a fortnight, and on the third or any subsequent occasion for a month; but such suspension is not to exempt the member from service on any private bill to which he may have been previously appointed.—**Irrelevance or Repetition.** The Speaker or the Chairman, after having called the attention of the House or of the Committee to the conduct of a member who persists in irrelevance, or tedious repetition either of his own arguments or of the argu-

ments used by other members in debate, may direct him to discontinue his speech.

Parliamentary Sessions, '99. See **SESSION.**
Parliaments, Clerk of the. An officer of the House of Lords, by whom, in conjunction with the Clerk Assistant and the Reading Clerk, are performed such duties as making minutes of the proceedings, swearing peers and witnesses, and signifying the royal assent to bills which have passed both Houses. The Clerk of the House of Commons acts as chairman and is addressed by members during the election of Speaker. He, like the Clerk of the Parliaments, is appointed by the Crown, and is associated with two clerks assistant, who make minutes of the proceedings. The office of Clerk of the Parliaments is held by Henry J. L. Graham, C.B.; and Sir Reginald Palgrave, K.C.B., is Clerk of the House of Commons.

Passmore Edwards Settlement, The. The Settlement, towards the cost of which Mr. Passmore Edwards gave £14,000, embraces a lecture-hall, accommodating 450 persons, classrooms, gymnasium, library, entertaining-rooms, and rooms for a Warden and 18 Residents. It is intended to continue and develop the work that was formerly carried on at University Hall and Marchmont Hall, and to be a centre of education, recreation, and social life for the district. A special feature of the Settlement is a Men's and Women's Club, consisting mainly of working people of the district, and numbering at present nearly 300 members. They have the title of "Associates," and it is the aim of the Settlement that every member of the body should take an active part in the life and work—educational and social—of the place. There are also Boys' and Girls' Clubs. In addition to the evening classes and club work there is a Day School in Domestic Economy under the Technical Education Board, L.C.C., and a School for Crippled and Invalid Children, established at the beginning of the present year, in connection with the London School Board. There are 40 children at present on the books, all drawn from the neighbourhood. An ambulance carriage is supplied by the Settlement for those who are unable to walk the distance between the Settlement and their homes. Mrs. Humphry Ward, one of the founders of University Hall, delivered the opening lecture at the Settlement (Oct. 10th, '97), and it was formally opened, on the completion of the building, on Feb. 12th, '98, by the Right Hon. John Morley, M.P. The Warden is Mr. R. G. Tatton, and the Settlement is located in Tavistock Place, St. Pancras.

Pastel Society, The. An attempt was made in '99 to revive public interest in the art of pastel painting, which had been somewhat neglected in the preceding decade. The Pastel Society was formed, with a committee which included Sir W. B. Richmond, Messrs. Abbey, Solomon, Walter Crane, Edward Stott, H. B. Brabazon, Clausen, Mark Fisher, Alfred Gilbert, Holman Hunt, Alfred Parsons, Byam Shaw, and J. J. Shannon, besides a number of foreign artists of distinction. The first exhibition was opened in February at the galleries of the Royal Institute of Painters in Water Colours, when some excellent work was shown by Messrs. Besnard, Clausen, Fromuth, Stott, Fisher, Abbey, Josselin de Jong, Whistler, Thaulow, and others. The exhibition was a good one, but did not attract so much attention as those held at the Grosvenor in '88 and '89,

which made pastel extremely popular for a time. The Hon. Sec. is Miss Marion Gemmell.

Patents for Inventions, and how to get them. The right to patent and the privileges which go with it are denied to no one of either sex. The two principal points to bear in mind in patenting are **novelty and utility**. A patent is essentially a **restricted monopoly**, and the inventor is therefore called upon to observe certain limitations. His protection extends over a period of **fourteen years**, provided the fees are paid, but he can extend it at the end of that term for a similar period. Before the actual date of patenting an invention may not be used for profit, either secretly or publicly. Patents are issued at the **Patent Office**, 11, Staple Inn, London. Application must be made on an application form accompanied by either a provisional or complete specification, and must conform strictly to the **prescribed regulations**. Forms are obtainable at the Inland Revenue Office, Law Courts, or, at a few days' notice, of any money order office in the United Kingdom. Patents may be taken out through **patent agencies**, and this is the best plan, provided only that the agent be respectable and reliable. Applications are liable to adverse judgment by the Patent Office, and to **outside opposition**; in the former case ten days' or more notice is given the applicant, and he may amend under certain regulations; in the latter, notice of opposition is made on a special form, the grounds being stated. When a complete specification is accepted, the inventor is informed of it; it is advertised in the official journal; and is open to inspection by the public at the Patent Office on payment of a fee of one shilling, while certified copies of entries can be had at the rate of one hundred words for fourpence. The fees are, in brief: **up to sealing**, on application for provisional protection, £1; on filing complete specification, £3. On application to amend specification, **up to sealing**, £1 10s.; ditto, **after sealing**, £3. Every patent is granted for the term of fourteen years from the date of application, subject to the payment, before the expiration of the fourth and each succeeding year during the term of the patent, of the prescribed fee. The patentee may pay all or any of the prescribed fees in advance. They begin with £5 in respect of the fifth year, increasing by annual instalments of £1 to a last payment of £14 in respect of the fourteenth year. Thus the total cost of a patent kept in force for the maximum period of 14 years is £99. Applications for patents communicated from abroad are entertained, as are also all inventions requiring international and colonial arrangements for their furtherance. Special forms of procedure in these cases are necessary. The inventor, in conclusion, is advised to consult the "Illustrated Official Journal (Patents)," published Wednesdays, price 6d., which contains **abridgments of patents, and illustrations**, and the volumes of abridgments. Copies of specifications can be had, on payment of the published price, at Quality Court, Chancery Lane, W.C. The above may all be consulted also at the **Patent Office Free Library**, Bishop's Court, Chancery Lane, where admirable facilities exist for readers. During '98 there were 27,659 applications for patents, 20,049 for designs, and 9767 for trade marks. The receipts from patent fees were £200,418. Many inventions during the year were of guards for pre-

venting accidents with machinery, probably in consequence of the Workmen's Compensation Act.

Patriotic Fund Act. See SESSION, sect. 88.

Patti, Madame Adelina Clorinda, was b. at Madrid in 1843. Was trained professionally under Ettore Barili, her step-brother, and made her first appearance on the stage at New York in '59. She first appeared in London in '61, as Amina in "*La Sonnambula*" at Covent Garden, and at once became the favourite *prima donna* of the day. In '70 she received from the Emperor of Russia the Order of Merit, and the appointment of First Singer at the Imperial Court. She married in '68 M. Roger de Cahuzac, Marquis de Caux, from whom she was divorced in '83; Signor Nicolini, who died in '98; and Baron Olaf Rudolph Cederström in Jan. '99. A theatre, which she had erected at Craig-y-nos, her Welsh residence, was opened in August '91. Madame Patti has undertaken several very successful tours abroad, in the Argentine Republic and in the States. In '95 she reappeared at Covent Garden after a ten years' absence. She rarely appears now except at concerts.

PEACE CONFERENCE, '99.

In response to the proposal sent out by the Czar, in August '98, to all the Powers, a Peace Conference was held at the Hague in May, June, and July, '99, attended by representatives of the following States:—Austria-Hungary, Belgium, Bulgaria, China, Denmark, France, Germany, Great Britain and Ireland, Greece, Italy, Japan, Luxemburg, Montenegro, Mexico, Netherlands, Persia, Portugal, Roumania, Russia, Servia, Siam, Spain, Sweden and Norway, Switzerland, Turkey, and United States of America. The British representatives were the Rt. Hon. Sir Julian (now Lord) Pauncefote and Sir Henry Howard, Ambassadors Extraordinary and Plenipotentiaries, Vice-Admiral Sir John A. Fisher and Major-General Sir J. C. Ardagh, technical delegates, and Lieut.-Col. C. à Court, Military Attaché at Brussels and the Hague, assistant technical delegate. The United States representatives were Mr. Andrew D. White, U.S. Ambassador at Berlin, the Hon. Seth Low, President of Columbia University, New York, Mr. Stanford Newel, Envoy Extraordinary and Minister Plenipotentiary at the Hague, Captain Alfred T. Mahan, United States Navy, and Mr. William Crozier, captain of artillery, delegates plenipotentiary, and Mr. Frederick W. Holls, advocate at New York, delegate and secretary to the Delegation. Russia sent M. de Staal, Russian Ambassador at London, M. de Martens, of the Imperial Ministry for Foreign Affairs, and M. de Basily, also of the Imperial Ministry for Foreign Affairs, as delegates plenipotentiary, M. Raffalovich, agent in France of Imperial Ministry for Finance, Col. Gillsky, Col. Count Barantzew, Captain (Naval) Scheine, and Lieut. (Naval) Ovchinnikow as technical delegates. France sent M. Léon Bourgeois, ex-Minister for Foreign Affairs, M. Georges Bihourd, Envoy Extraordinary and Minister Plenipotentiary at the Hague, and the Baron d'Estournelles de Constant as delegates plenipotentiary, M. Mounier, general of brigade, M. Péphan, rear-admiral, and M. Louis Renault, legal adviser to Ministry for Foreign Affairs, as technical delegates. Germany sent

Count (now Prince) Münster, German Ambassador at Paris, as delegate plenipotentiary, Baron de Stengel, professor at Munich University, second delegate, Dr. Zorn, professor at Königsberg University, scientific delegate, Col. de Gross de Schwarzhoff, and Captain Siegel, Naval Attaché at Paris, technical delegates. The total number of delegates sent by the twenty-six States was 101.

The Conference was opened on May 18th, '99, the Czar's birthday, in the Palace in the Wood. On the proposition of M. de Beaufort (Dutch Minister for Foreign Affairs), M. de Staal (Russian Ambassador in London) was chosen President. Eight proposals were submitted to the Conference for discussion:—

1. Not to increase the present effective armaments, and to provide for a reduction of them in the future.
2. To prohibit the use of new arms and explosives.
3. To restrict the use of existing explosives, and prohibit projectiles or explosives from balloons, etc.
4. To prohibit submarine torpedo-boats, and not to construct boats with rams in the future.
5. To apply to naval warfare the stipulations of the Geneva Conventions of '64 and '68.
6. To neutralise ships and boats employed in saving those overboard during or after an engagement.
7. To revise the (unratified) declaration concerning laws and customs of war elaborated by the Brussels Conference of '74.
8. To accept in principle mediation and facultative arbitration in cases lending themselves thereto.

Three sections or commissions were nominated to report on the above eight points. Section 1 was to report on points 1 to 4, relating to the limitation of armaments; section 2 on points 5, 6, and 7, relating to laws of war, the Geneva Convention, etc.; and section 3 on point 8, relating to mediation and arbitration. To each commission was communicated a series of diplomatic documents of a historical character and of expert opinions specially relating to the points on which the commission had to report, and intended to serve as a basis for the exchange of views. Several little initial difficulties—such as the representation of the Pope and of the South African Republics—were disposed of with only a small amount of friction. The Continental Powers were unaccustomed to see the United States sitting in their midst. It very early became apparent that little of a practical character was to be expected from the deliberations of commission 1 on disarmament; and that the chief real work done by the Conference would be in commission 3, in the province of mediation and arbitration. In an early sitting of this third commission, a Russian scheme of arbitration was presented. At the same sitting, Sir Julian Pauncefote proposed the immediate discussion of the establishment of a permanent tribunal of arbitration; but withdrew his motion in favour of an order of discussion proposed by the President. The Russian scheme was submitted to a sub-committee, together with Sir J. Pauncefote's proposal. The Russian scheme included (1) good offices and mediation, (2) international arbitration which should be obligatory in cases that did not affect the vital interests or the

national honour of the contracting parties and voluntary in other cases, and (3) international commissions of inquiry as to local circumstances giving rise to litigation, and which cannot be settled by ordinary diplomatic means, but do not affect the vital interests or national honour of the States concerned. **An American project of arbitration** was subsequently communicated to the same sub-committee. This was a 'project of a permanent international tribunal, one member to be appointed by each sovereign State participating in the treaty. Sir J. Pauncfote's proposal provided for the appointment of two members of the tribunal by each signatory Power. On June 30th, the work of commission 1, on the reduction of armaments, was closed by the adoption of a motion substantially to the following effect:—"The commission considers: First, that it would be very difficult to determine, even for a period of five years, the figure of effective forces without regulating at the same time the other elements affecting national defence. Secondly, that it would be no less difficult to regulate by an international convention the elements of that defence as organised in each country according to very different views (*d'après des vues très différentes*). Thirdly, that the restriction of those military burdens which at present weigh upon the world is greatly to be desired for the material and moral welfare of humanity." On July 4th, the sub-committee on arbitration eliminated from the Russian project everything of an obligatory character.

On July 7th, the **project of arbitration** drafted by the sub-committee was presented to commission 3. This project established a permanent arbitration court open to any of the signatory powers. It was fully discussed in the Conference, and as ultimately passed contained 61 articles, thus divided:—Part I., article 1, the maintenance of the general peace; Part II., articles 2 to 3, good offices and mediation; Part III., articles 9 to 15, international commissions of inquiry; Part IV., chap. i., articles 15 to 19, arbitration; chap. ii., articles 20 to 29, permanent court of arbitration; chap. iii., articles 30 to 61, arbitration procedure. The project established an international bureau at the Hague; each signatory Power to nominate not more than four members of the court; Powers desiring arbitration to choose any number of arbitrators out of this list; non-signatory powers to have the right to make use of the court under prescribed conditions. In commission 2, there were on several occasions long discussions on the Dum-Dum bullet, which was condemned by considerable majorities. British and American representatives denied that this bullet uselessly aggravated the sufferings of the wounded, and contended that the objections made to its use were based upon misunderstanding.

The final Act embodying the results of the Peace Conference contained the following conventions:—1. **A convention for the pacific settlement of international disputes** (arbitration). This was signed by Belgium, Denmark, Spain, United States of America, United States of the Mexicans, France, Greece, Montenegro, Netherlands, Persia, Portugal, Roumania, Russia, Siam, Sweden and Norway, and Bulgaria. 2. **A convention concerning the laws and customs of war on land**. This was signed by the same Powers with the exception of the

United States of America. 3. **A convention for the adaptation to naval warfare of the principles of the Geneva Convention of '64**. This was signed by the same Powers as the second convention. The final Act also contained three declarations:—1. **Prohibition of the throwing of projectiles and explosives from balloons or by other analogous means**. This prohibition is to be in force five years. This was signed by the Powers that signed the arbitration convention, with the addition of Turkey. 2. **Prohibition of projectiles intended solely to diffuse asphyxiating or deleterious gases**. Signed by the same as the last, with the exception of the United States of America. 3. **The prohibition of the use of bullets which expand easily in the human body**. Signed by the same as the last, with the exception of Portugal. The Conference also passed the following resolution unanimously:—"That the restriction of military budgets, which are at present a heavy burden on the world, is extremely desirable for the increase of the material and moral welfare of mankind." The wish was also unanimously voted that the revision of the Geneva Convention might shortly be undertaken by a Special Conference. The following five wishes were voted with only a few abstentions:—That the question of the rights and duties of neutrals be considered at a future Conference; that the Governments might come to an agreement respecting new types and calibres of rifles and naval guns; that the Governments would examine the possibility of an agreement as to the limitation of armed forces and of war budgets; that the inviolability of private property in naval warfare might be considered by a subsequent Conference; and that a subsequent Conference might also take into consideration the question of the bombardment of ports, towns, and villages, by a naval force. The final Act was passed on July 29th, and the Conference then broke up. In reporting to Her Majesty's Government the close of the Conference, the British plenipotentiaries described the work of the Conference as "consisting in the production of three most important and beneficent codes destined to preserve the blessings of peace and to lessen the calamities of war"; and they dwelt with special emphasis upon "the great work the Conference has produced in its 'project of a convention for the pacific settlement of international conflicts.'" See Session, sect. 28.

Peace Society, The, was founded in 1816, and has for its object the promotion of permanent and universal peace. It welcomes the support of Christians of all denominations, and also of those persons who oppose war on humanitarian or other grounds. The Society has always advocated a gradual, proportionate, and simultaneous disarmament by all the nations of Europe, and the principle of arbitration, and it is unquestionably due to its efforts that this mode of settling international difficulties has been adopted with increasing frequency and acceptance, until now a Permanent Court has been provided for by the Powers assembled lately at The Hague. During the period of its existence over 160 instances of pacific settlements have occurred. The Society maintains a constant propaganda in favour of peace, and, amongst other methods of action, especially advocates the preaching of sermons on the subject of peace, in as many churches as possible, on the Sunday before Christmas.

President, Sir Joseph W. Pease, Bart., M.P.; **Treasurer,** Walter Hazell, Esq., M.P.; **Secretary,** W. Evans Darby, LL.D. **Offices,** 47, New Broad Street, London, E.C.

Peculiar People, The. This body of Christians was founded by James Banyard, a native of Rochford, Essex. Banyard was a Methodist local preacher, who, in 1838, believed that he had received fuller light. He commenced to preach, "that we must be born again and receive the Holy Ghost from Heaven: that there is no sin in Christians—no doubts in believers." Perceiving that he would not now be allowed to preach in the chapel, he formed a separate congregation, declaring that "we will accept no money for preaching, make no laws, have no book of rules but the Word of God alone." Up to this point there was no special doctrine respecting sickness and healing, but soon it happened that a member of the congregation who was in a consumption had the well-known words from James (v. 14) impressed upon him in such a manner that he insisted on being taken to chapel on the following Sunday. The laying-on of hands and the healing of the patient followed. Other members were subsequently healed by the same means, whilst a brother who resorted to a doctor died. It was then declared that "the Church and the Elders were the most suitable persons for God to heal the sick by, and Sisters in cases of childbirth." In support of this doctrine they quote many more passages than that from James. They hold that "there are promises and examples for all we need for soul and body in the Word of God, if it is only believed and obeyed." The religion of the Peculiar People regulates dress and other matters which are considered of indifference by the great majority of Christians. The title "Peculiar People" is self-chosen, and was suggested by such texts as, "The Lord hath chosen thee to be a peculiar people unto Himself" (Deut. xiv. 2). The government of the body is conducted by a committee, consisting of district representatives, and a council comprising elders from the churches. The **Chairman** is Brother Heddle, Southend. His predecessor took the title of "bishop" (Bishop Harrod), but Mr. Heddle, though he discharges exactly the same functions, has not taken the title. At public worship the women always sit on the right hand of the preacher, and the men on the left. The denomination is strong in South Essex, and in some parts of Kent.

PEERAGE.

Peers are created by the Sovereign, and, with an exception to be noticed presently, the titles are hereditary, though they may be lost by attainder for high treason. Before the union of the three kingdoms, England, Scotland, and Ireland had each a peerage of its own containing the five temporal ranks or degrees, and precedence in each degree depended upon the date of the creation of the title. Thus in each country the dukes came first, and took precedence of each other in order of date of title; then came the marquises, earls, viscounts, and barons, precedence in each rank being similarly governed by priority of date. At the union with Scotland, in 1707, it was arranged that the Scotch peerages should rank after the English peerages then in existence, according to degree, and the Scotch dukedoms were accordingly

placed in order of date after all the English dukedoms, and so on through the other ranks. The Act of Union also provided that the Scotch peers should be represented in the House of Lords by a portion of their number only; and as it made no provision for the creation of any new Scotch peers, the peerage of North Britain consists exclusively of those whose titles date from before the year 1707. From that time until the Union with Ireland the peerages created were either Irish or of Great Britain, the latter alone giving seats in the House of Lords, and taking precedence according to degree next after the English and Scotch peerages. The Act of Union with Ireland provided that peers of that kingdom should take precedence next after peers of Great Britain according to rank, and that Ireland should be represented in the House of Lords by a portion of her peers only. It was further enacted that one new Irish peerage might be created on the extinction of three existing Irish peerages, and that when the number should be reduced to one hundred, if one peerage became extinct one other might be created. The peerages of the United Kingdom and of Ireland created since the Union take precedence according to rank and date of patent next after those of Ireland which were in existence at the Union, but of the two classes only the peerages of the United Kingdom give of themselves a seat in the House of Lords. There is no limit to the increase of these but the pleasure of the Sovereign. The peerage collectively may thus be classified as consisting of peers of England, of Scotland, of Great Britain, of Ireland, and of the United Kingdom, but of the Scotch and Irish peers only a portion are peers of Parliament. Irish peers who have not been elected to represent their order in the House of Lords may be returned and may sit for any borough or county constituency in Great Britain. The **House of Lords** is composed of two of the estates of the realm, the **lords spiritual and temporal**. The first consists of the Archbishops of Canterbury and York, and twenty-four bishops of the Church of England, the number not having been increased with the successive creation of new bishoprics. The Archbishops and the Bishops of London, Durham, and Winchester are always entitled to sit; the other bishops only receive a writ or summons when the voidance of a see decreases the total number of lords spiritual to less than twenty-six, and then in order of seniority of appointment. The Bishop of Sodor and Man is not included in this rotation, and has no seat in Parliament. A bishop ceases to be a lord of Parliament on resigning his see. The **temporal lords** may be divided into peers whose right to sit and vote in the House is hereditary, representative peers of Scotland and Ireland, and lords of appeal in ordinary. By the Act of Union between England and Scotland the **Scottish peers** send sixteen representatives to the House of Lords, who are elected immediately after every general election, and sit until Parliament is dissolved. The **Irish peers** elect twenty-eight representatives for life. The **Lords of Appeal**, of whom there may not be more than four appointed, enjoy the dignity of a baron for life. By the Act of '76 they were to lose the right to sit and vote on resigning office; but by the Appellate Jurisdiction Act of '87 any retired lord of appeal may sit and vote as a member of the House of

Lords during his life. And it was directed, '98, that the children of legal life peers and of legal life peers deceased should in future have the courtesy title of "Honourable," together with the rank and precedence next to and immediately after the younger children of all hereditary barons now created or hereafter to be created, and immediately before all baronets. The peers temporal are divided into dukes, marquises, earls, viscounts, and barons, these titles taking precedence in the order given. But it should be borne in mind that a peer may hold a superior Scotch or Irish title (and by which he may be generally known) to that under which he sits as a peer of the United Kingdom. Thus the Duke of Buccleuch sits as Earl of Doncaster. The lords spiritual and temporal sit together, and all have an equal voice and vote in the house, whatever may be their rank. As in the House of Commons, each peer must be present to record his vote, the practice of peers giving proxies having been discontinued. A newly created peer, or one elevated to a higher title, is introduced by two other peers of his own degree, who are accompanied by the Earl Marshal (the hereditary office of the Duke of Norfolk), the Lord Great Chamberlain (now the Earl of Ancaster), all in their parliamentary robes, attended by Garter King of Arms (Sir Albert Woods has long held this office), and Black Rod (Sir M. Biddulph). The procession enters the house at the bar, and bows three times on the way to the woosack, where the peer kneeling presents his patent and writ to the Lord Chancellor. Both these documents are read by the clerk, and the oath is administered to the peer at the table, and he subscribes the roll. He is then with further formalities conducted to one of the benches of the house, the position chosen varying with the rank of the new peer, where he and his introducers bow thrice to the Lord Chancellor, by whom he is afterwards congratulated. Peers are robed on these occasions, and at the opening of Parliament by Her Majesty, but wear their ordinary dress when the House is sitting for business. A bishop is introduced by two other bishops, but without many of the formalities described above; representative peers simply present their writs, and are sworn like peers succeeding to a title. The peers place themselves somewhat differently to the commons. There are in this House, as in that, rows of benches running down each side from the throne to the bar; but in the Lords there are, near the bar, a few seats known as the cross benches, the occupants of which face the woosack. In this quarter of the House sit the Royal dukes, who take no side in politics, and a few noble lords who give a rigid adhesion to neither great party. The lords spiritual sit on the upper benches to the right of the throne, and retain these places no matter which party may be in power. The other lords range themselves pretty much as the commons do,—the Leader of the House and his colleagues in the Ministry on the front bench to the right of the woosack, his supporters taking their places on the benches behind him, and the Leader of the Opposition in that House and the ex-Ministers on the left front bench, behind their adherents. There is no arrangement of peers according to rank, the different degrees sitting together indiscriminately if of the same political complexion. The House of Lords has both legislative and judicial powers. It is the

highest appellate court of the United Kingdom: it may in certain cases try members of its own body, it tries any person who may be impeached by the House of Commons, and it also decides claims to the peerage. The Appellate Court is constituted of the Lord Chancellor and of other legal lords of high standing, such as ex-lord chancellors, and the lords of appeal in ordinary. It may sit during a parliamentary recess, and its hours of business are from 10.30 a.m. to 4 p.m. The following list contains in alphabetical order the names of all peers of whatever classification, whether they be English, Scotch, Irish, of Great Britain, or of the United Kingdom, those who are not entitled to a seat in the House of Lords having an * prefixed. It also includes the bishops, whether they be lords of Parliament or not, the distinction between these being indicated in the same manner. The initials S.P. and I.P. and S.R.P. and I.R.P. are used to signify that the lord is a Scotch or Irish peer, or a Scotch or Irish representative peer. The abbreviations *n.*, *s.*, *bro.*, *un.*, *h.b.*, and *g.s.* will be readily understood to mean nephew, son, brother, uncle, half-brother, and grandson. P.C. is used where the peer is a Privy Councillor, and L.L. stands for Lord Lieutenant. The following is the present composition of the House of Lords: Peers of the Blood Royal, 6; Archbishops, 2; Dukes, 22; Marquises, 22; Earls, 123; Viscounts, 30; Bishops, 24; Barons, 320; Scotch Representative Peers, 16; Irish Representative Peers, 28; total, 593. Thirteen of the foregoing are minors, and two are reckoned both as peers of the United Kingdom and Irish representative peers, so that the possible voting strength of the House is now (Nov. 23rd, '99) 578.

Alphabetical and Biographical List of Peers and Bishops.

(Revised to Nov. '99.)

- Abercorn**, James, 2nd D. of (cr. 1868). Sits as M. of Abercorn (1790). Surname Hamilton. B. 1838, s. 1885. P.C.; K.G.; C.B.; L.L. Co. Donegal; M.P. Co. Devonshire, Spencer Compton, 8th D. of (cr. 1694). Surname Cavendish. B. 1833, s. 1891. P.C.; K.G. He is *e. s.* of the late Duke of Devonshire. E. at Trin. Coll., Camb., where he graduated B.A. '54. The Duke was long familiar to the world by the title of the **Marquis of Hartington**, which he bore previous to his succession to the dukedom. He was returned for North Lancashire as a Liberal in '57, and in '59 moved the vote of want of confidence which resulted in the defeat of Lord Derby. In March '63 he was appointed a Lord of the Admiralty, and in April of the same year Under-Secretary of State for War in Lord Russell's administration. In Feb. '66 he obtained Cabinet rank as **Secretary for War**. At the general election of '68 he was defeated in North Lancashire, but was returned for the Radnor Boroughs. He was appointed **Postmaster-General** in Mr. Gladstone's first administration, and retained that office till '71, when he succeeded Mr. Chichester Fortescue as **Chief Secretary for Ireland**. On the retirement of Mr. Gladstone after his defeat in '74, Lord Hartington was unanimously chosen as **leader of the Liberal Party** at a meeting held at the Reform Club under the presidency of Mr. John Bright. In '79 he was elected **Lord Rector of the University of Edinburgh**, which office he held till '91. At the general election of '80 he was elected M.P. for North-East Lancashire, and was sent for by the Queen on the defeat and resignation of Lord Beaconsfield. He declined, however, to form an administration, being content to serve again under Mr. Gladstone. He became **Secretary for India**, but returned to the War Office in '82. At the general election in '85 he was returned by an enormous majority for the Rossendale Division of Lancashire. When Mr. Gladstone formulated his policy of **Home Rule** Lord Hartington disagreed with him, and became the recognised leader of the **Liberal Unionist party**. Recognising his commanding influence with the Unionists of both parties, Lord Salisbury first offered to serve under him if he would accept the premiership, and after the secession of Lord Randolph Churchill, again endeavoured to induce him

to join his Cabinet. But, on the ground that he could best serve the Unionist cause without taking office, he declined both offers. Subsequent events only served to emphasise his antagonism to Mr. Gladstone's Home Rule policy; and he has since assumed an attitude of close alliance with Lord Salisbury. He was appointed Chairman of the Royal Commission on Labour April '91. The Duke, as he became at the end of '91, was "inaugurated" as **Chancellor of Cambridge University** in Jan. '92, and "installed" in June, in succession to his father. In August he was married privately, at Christ Church, Mayfair, to Louise, Duchess of Manchester, a daughter of the late Count von Alton of Hanover, and widow of the 7th Duke of Manchester, who died in '90. She was born in '32. During the same month his grace was invested with the Order of the Garter. He was appointed Lord President of the Council in the Coalition Cabinet '95. Is President of a Cabinet Committee of National and Imperial Defence such as was recommended by the famous "Hartington Commission." Lord-Lieutenant of Derbyshire and Co. Waterford. Elected Mayor of Eastbourne '97. *Heir*, Victor Cavendish, M.P., *n.* 78, *Piccadilly, W.*

- James of Hereford**, Henry, 1st L. (cr. 1895). Surname James. B. Hereford 1828. E. Cheltenham Coll.; Lecturer's Prizeman at the Inner Temple '50-51; called to Bar, Middle Temple, '52; nominated to the ancient office of "postman" of Court of Exchequer '67; appointed Q.C. '69; M.P. Taunton '69-85; Bury, Lanc., '85-95; was Solicitor-General '73, and Attorney-General '73-4 and '80-85. During the latter period he introduced and carried through Parliament the Corrupt Practices (Parliamentary Elections) Act. Sir Henry James, as he then was, refused to join Mr. Gladstone's '86 Administration, though offered the Lord Chancellorship, because of the views which he held upon the Home Rule question. Was subsequently one of the active leaders of the Liberal Unionist party. He was one of the counsel for the *Times* in the action of O'Donnell v. Walter, and as one of the leading counsel for that organ in the *Parnell Commission* delivered an able address, which formed quite a retrospect of the history of Ireland. He took a prominent part in the discussion of the Home Rule Bill during the '93 session, and succeeded in getting several of his amendments adopted. Was one of the Chairmen of Standing Committees. On the formation

- of Lord Salisbury's coalition Cabinet ('95) he was offered, and accepted, the office of Chancellor of the Duchy of Lancaster, with a peerage. - Kelvin**, William, 1st L. (cr. 1892). Surname Thomson. B. at Belfast 1824. E. at Glasgow Univ. and Cambridge, where he graduated ('45) as second wrangler, and was elected to a fellowship. Prof. of Natural Philosophy in the Univ. of Glasgow '46-99. His jubilee as Professor was celebrated in '95, when he received the hon. degree of LL.D. Editor of the *Cambridge and Dublin Mathematical Journal* '46, in which he contributed valuable additions to the mathematical theory of electricity. It is, however, in connection with submarine telegraphy that Lord Kelvin's labours in electrical science are best known. His electrical measuring instruments are largely used in electrical engineering, and his compass and sounding machine have been found most useful by navigators. He has also made important additions to the sciences of electricity and magnetism. His mathematical insight is seen to the greatest advantage in his investigation of the nature of heat. Pres. of the British Association '71. Knighted in '66. Created *Grand Officier* of the *Légion d'Honneur* in '89; is also a knight of the order "Pour le Mérite" of Germany, a commander of the order of Prince Leopold of Belgium, and a foreign associate of the French Academy. He is joint author with Professor Tait of the well-known treatise on "Natural Philosophy." Was President of the Royal Society '90-5; three times President of the Royal Society of Edinburgh. - Kitchener of Khartoum**, Horatio Herbert, 1st L. (cr. 1898). Surname Kitchener. He is the eldest son of the late Lieut.-Col. H. H. Kitchener, and was b. in 1850. Educated at the Royal Military Academy, Woolwich, he joined the Royal Engineers, and was employed for some time in and after '74 on the Palestine and Cyprus Surveys. He served, having volunteered, as a major of cavalry in the Egyptian Army in '82, with the Nile Expedition in '84, and became Governor of Suakin '86. For his bravery in the action of Handub in '88, when he led the Egyptian troops against Osman Digna, he was made A.D.C. to the Queen, and in the subsequent fighting he was mentioned in despatches and made a C.B. From '88 till '92 he held the rank of Adj.-Gen. in the Egyptian Army, and in the latter year was appointed Sirdar. After the taking of Dongola, in '96, he was made K.C.B., and subsequently organised the final irresistible advance against the Khalifa, which resulted in his utter defeat at Omdurman in Sept. '98. For this he was awarded a peerage, as Baron Kitchener of Khartoum and of Aspoll, in the County of Suffolk. On his return to England he was given an enthusiastic reception, and he was presented with the freedom of the City of London and a sword of honour. Appointed Grand Master of English Freemasons in Egypt and the Soudan '99. D.C.L. Oxford '99. Received, June '99, the thanks of both Houses of Parliament and a grant of £30,000 as an acknowledgment of his eminent services in planning and conducting the campaign on the Nile in '96-8 which culminated in the battle of Omdurman, the capture of Khartoum, and the overthrow of the power of the Khalifa.

Ripon, William Boyd, 3rd Bp. of. (See founded 1836.) Surname Carpenter. B. 1841, app. 1884. E. at Cambridge, where he graduated Senior Optime '64; vicar of St. James's, Holloway, '70, Christ Church, Paddington, and Hon. Chaplain to the Queen '79; Canon of Windsor '82; Bishop of Ripon '84. **Hulsean Lecturer** in '79; **Bampton Lecturer** in '87, when he selected the subject of "The Permanent Elements of Religion," and this was published in '89. Lecturer in Pastoral Theology, Cambridge, '94. His lordship has also written "A Commentary on the Book of Revelation," "The Burning Bush," and "The Son of Man among the Sons of Men" (sermons), "Twilight Dreams," "Truth in Tales," "Narcissus," "Book of Household Prayers," "Heart Healing," "Lectures on Preaching," and "Thoughts on Reunion." Is a D.D. and Hon. D.C.L. (Oxon. '89). Dr. Carpenter has earned quite a reputation for the literary grace of his utterances. He spoke in the House of Lords against the Home Rule Bill, Sept. '93, and also on the Factory Act, Parish Councils Bill, the Benefices Bill, and on the question of Seats for Shop Girls. *The Palace, Ripon*; 71, *Carlisle Place, S.W. Athenæum*.

Robarts (see Clifden).

Roberts of Kandahar and Waterford, Frederick Sleigh, 1st L. (cr. 1892). Surname Roberts. He is the son of Sir Abraham Roberts, G.C.B. B. 1832. E. at Eton and Addiscombe. Appointed Lieut. in the Bengal Artillery '51; Capt. and Brevet-Major '60; served with distinction in the Indian Mutiny, and received the **Victoria Cross**. Took part in the **Abyssinian war** ('68) as Assistant Quartermaster-General, and obtained the brevet rank of Lieut.-Colonel. In '72 he was made C.B. for his services in the Looshai Expeditionary Force. He became Quartermaster-General in India in '75, with the local rank of Major-General; and in the **Afghan war** of '78 commanded the column sent to operate through the Kuram Valley, and surmounting the difficulties of the Peiwar Pass, gained a

brilliant victory at Charasiah and entered Cabul. On the investiture of Candahar by Ayoub Khan, after the disaster at Maiwand, he rapidly performed the march from Cabul to Candahar, one of the most brilliant military feats of modern times, which has earned him undying fame, and utterly defeated the Pretender. He was created a baronet in '81, and given the distinctions of G.C.B. and C.I.E. In '81 he was despatched to take command of the forces against the Boers in South Africa, but was recalled in consequence of peace being made. He succeeded Sir Donald Stewart in the command of the **Indian army** '85 and was created a Peer in Jan. '92. In April '93 he left India for England, having resigned his command. He was given a brilliant farewell and an equally brilliant reception here. Hon. LL.D. Dublin '80; Hon. D.C.L. Oxon '81. Cambridge University made him an hon. LL.D. in June, and he was made a G.C.S.I. in May '93; D.L. Edin. '93; app. Field Marshal and Com.-in-Chief of Forces in Ireland in '95; P.C. '95; K.P. '97. *Heir*, Hon. Fredk. H. S. Roberts, Lieut. King's Royal Rifle Corps, s. *Royal Hospital, Dublin. Athenæum, Marlborough, United Service*.

Robertson, James Patrick Bannerman, L. (cr. 1899). Surname Robertson. B. 1845. P.C. Called to the Scottish Bar '67; Q.C. '85; Sol.-Gen. Scotland '85-86; Lord Advocate '88-91. Rosebery, Archibald Philip, 5th E. of (cr. 1703). P.C., K.G., K.T. Sits as Ld. Rosebery (1828). Surname Primrose. B. 1847, s. 1868. E. at Eton and Christ Ch., Oxford; m. '78, Hannah, d. of the late Baron Mayer de Rothschild, M.P. She died in Nov. '90. Lord Rosebery succeeded his grandfather in '68; appointed a commissioner to inquire into endowments in Scotland '72; Under-Secretary of State, Home Office, '81-3; elected Rector of the University of Edinburgh '80; Lord Rector of Glasgow Univ. '99; was Lord Privy Seal, and First Commissioner of Works '85. On the accession to power of Mr. Gladstone in the beginning of '86, Lord Rosebery attained the distinguished post of **Secretary for Foreign Affairs**. He held the portfolio for only six months, until the fall of Mr. Gladstone's Government in June, but he established a very high reputation even in that short period. Lord Rosebery cast in his fortunes fully with Mr. Gladstone, and entirely agreed with his Home Rule policy. Though a peer, he moved ('84) for a select committee to inquire into the best means of improving the efficiency of the House of Peers. Mr. Gladstone some years ago forecast his future, and publicly spoke of him as destined to play a great part in the history of the country. He is a strong advocate of **Imperial Federation** (*q.v.*), and takes a great interest in movements for the improvement of the social condition of the masses. He generously presented a magnificent swimming bath to the People's Palace (*q.v.*) in the East End of London. Elected, with Sir John Lubbock, for the City division to the London County Council Jan. 17th, '89, and on Feb. 12th appointed Chairman of that body, over whose deliberations he presided with great success. But, owing to his many public duties, he had to resign in June '90. His lordship abstained to a great extent from his usual political and social labours during '91, owing to the lamented death of Lady Rosebery. His monograph on William Pitt the Younger was issued in November. In Jan. '92 he again became the **Chairman** of the London County Council, and held the position for some months, till the approach of the general election compelled him to resign it. When Mr. Gladstone succeeded to power Lord Rosebery became **Secretary for Foreign Affairs**, and in October he was made a **Knight of the Garter**. On the resignation of Mr. Gladstone in March '94 the Queen offered the post of **Prime Minister** to Lord

Rosebery, and he carried on the government with no little success till July '95. He then urged upon his supporters that the general election should be fought upon the question of the predominance of the House of Lords. During '96 his attitude upon the Armenian Question differed from that of Mr. Gladstone, and finally he decided upon resigning the leadership of the party in order to leave himself an absolutely free hand upon this question. His view was that Great Britain should not be hurried into an intervention in the Armenian Question, which would lead to the risk of a European war. In '98 Lord Rosebery, from his place in the House of Peers, paid a noble and eloquent tribute to the life and public services of Mr. Gladstone, and later on spoke in the country in support of the attitude taken up by Lord Salisbury on the Fashoda situation. He urged the country to support the Government in its prosecution of the Transvaal war during '99, and made many notable speeches on public and political affairs during the year. Returned head of the poll for the Epsom Urban Council, '99. Is Pres. of the Throat Hospital, Golden Square. Lord Rosebery keeps an excellent racing stud, and both in '94 and '95 he won the Derby. *Heir*, Lord Dalmeny, s. L. *Mentmore, Leighton Buzzard; Dalmeny Park, Edinburgh. Brooks's.*

Rosmead, Hercules Arthur Temple, 2nd L. (cr. 1896). Surname Robinson. B. 1866, s. 1897. Capt. 3rd Batt. Royal Irish Fusiliers. m. Hon. Edith L. Hancock, d. 4th Ld. Castlemaine. *Heir*, Hon. Hercules Edward J. Robinson, s. C. *Carlton, Army and Navy, Hyde Park.*

- B. 1876, s. 1892. *Heir*, Lord Alastair Robert Innes-Ker, *bro.* *Floors Castle, Kelso, N.B.*
- Russell**, Francis John Stanley, 2nd E. (cr. 1861). Surname Russell. B. 1865, s. 1878. g.s. of Earl Russell, the well-known statesman, whom he succeeded. *Heir*, Hon. B. A. W. Russell, *bro.* *Amberley Cottage, Maidenhead. National Liberal, Reform, Whitehall, Royal Societies.*
- Russell** of Killowen, Charles, L. (cr. 1894). G.C.M.G., LL.D., and D.L. Surrey. Surname Russell. B. 1833. E. at Trin. Coll., Dublin. P.C. Commenced his career in the gallery of the House of Commons as a Parliamentary leader-writer. Called to the bar at Lincoln's Inn '59; appointed Q.C. and elected Bencher of Lincoln's Inn '72. M.P. for Dundalk '80-85; Hackney, S.D., '85-94. *Attorney-General* in the Gladstone Administration of '86, when he received the honour of knighthood, and again in '92. As a sound lawyer, acute cross-examiner, and persuasive advocate, Sir Charles Russell was without a rival at the English bar. He increased his reputation in '89 by his masterly oration at the *Parnell Commission*, where he appeared, with Mr. Asquith, Q.C., M.P., as counsel for Mr. Parnell. When he assumed office in '92 he gave up the old privilege, which had generally been made good use of before, of keeping his private practice. He was one of the English counsel in the Behring Sea Arbitration case ('93). On the decease of Lord Bowen he was appointed ('94) a Lord of Appeal in Ordinary (with a life peerage), and in July of the same year was appointed Lord Chief Justice of England in succession to Lord Coleridge. Hon. LL.D. of Cambridge Nov. '97. Was one of the Arbitrators of the Venezuelan Arbitration in Paris. *Tadworth Court, Surrey; 86, Harley Street, W. Athenæum, Reform, Turf, National Liberal.*
- ***Ruthven**, Walter James, 8th L. (cr. 1651). Surname Hore-Ruthven. B. 1838, s. 1864. S.P.; formerly Capt. Rifle Brigade; served in Crimea and Indian Mutiny. *Heir*, Hon. W. P. Hore-Ruthven, Master of Ruthven, Lieut. Scots Guards, s. C. *Harperstown, Taghmon, Co. Wexford; Barncluith, Hamilton, Scotland. Carlton.*
- Rutland**, John James Robert, 7th D. of (cr. 1703). Surname Manners. B. 1818, s. 1888. K.G.; G.C.B.; M.P. Newark '41-7, Colchester '50-57, N. Leicestershire '57-85, Melton Div. '85-8; First Com. Works, with seat in Cabinet, '52, '58-9, and '66-8; Postmaster-General '74-80 and '85-6; Chanc. of Duchy '86-92; D.C.L. Oxon '76; LL.D. Camb. '62; Hon. Col. Leicestershire Militia; High Steward of Cambridge. *Heir*, M. of Granby (peer), s. C. *Belvoir Castle, Grantham; Longshaw Lodge, Sheffield; St. Mary's Tower, Burnam, N.B.; 3, Cambridge Gate, Regent's Park, N.W.*
- Sackville**, Lionel, 2nd L. (cr. 1876). Surname Sackville-West. B. 1827, s. 1888. Was assist. précis writer to the 4th E. of Aberdeen; ent. disp. service '47; Sec. of Embassy '67; in the absence of the Ambassador was Min. Plen. at Paris '71-2; Min. to Argentine Repub. '72-8, Madrid '78-81, Washington '81-8; G.C.M.G. '88. *Heir*, Hon. W. E. Sackville-West, *bro.* C. *Knoll Park, Sevenoaks, Kent.*
- St. Albans**, John Wogan, 2nd Bp. of. (See founded 1877.) Surname Festing. B. 1837, app. 1890. E. Wells Theological Coll. and Trin. Coll., Camb., graduating B.A. '60 and M.A. '63. He was ordained deacon in '60 and priest in '61. He was curate at Christ Church, Westminster, '60-73; vicar of St. Luke's, Berwick Street, '73; vicar of Christ Church, Albany Street, '78; Rural Dean of St. Pancras '87; Prebendary of St. Paul's '88; and in May '90 was appointed to the bishopric, on the resignation of the late Dr. Claughton. 21, *Endsleigh Street, London, W.C.*
- St. Albans**, Charles Victor Albert Aubrey de Vere, 11th D. of (cr. 1684). Surname Beauclerk. B. 1870, s. 1898. Lieut. Notts. Yeo. Cav.; late Lieut, 3rd Batt. Roy. Scots; is hered. Grand Falconer and hered. Registrar to the Court of Chancery. The 1st Duke was son of Charles II. by Nell Gwynne. *Heir*, Lieut. Lord Osborne de Vere Beauclerk, *bro.* *Bestwood Large, Arnold, Nottingham; 13, Grosvenor Crescent, S.W.*

Salisbury, John, 93rd Bp. of. (See founded 1042.) Surname Wordsworth. B. 1843. s. of the late Bishop of Lincoln, and *g.n.* of the poet Wordsworth. *E.* at Ipswich, Winchester, and New Coll., Oxon, graduating in '65. Ordained deacon in '67 and priest in '69. His clerical life until he was ordained Bishop was passed in academical and cathedral appointments. He was Fellow and College Tutor of Brasenose, Proctor, Grinfield Lecturer, Select Preacher, *Bampton Lecturer*, Examiner for Classical Moderations and in the Theological Schools, and Examining Chaplain to his father. In '83 he was appointed Canon of Rochester and *Oriel Professor of Interpretation of Scripture*, and Bishop of Salisbury '85. Dr. Wordsworth is a moderate High Churchman, and has written several theological and classical works, the best known of which are "Fragments and Specimens of Early Latin," the *Bampton Lectures* for '81, "The One Religion," a comparison of Christianity with other religions as satisfying the desire of mankind for a revelation of truth, holiness, and peace; and his critical edition of the *Vulgate New Testament* (in partnership with the Rev. H. J. White), of which the first volume, containing the Gospels, was published in '98. His *Visitation Addresses on the Holy Communion* reached a second edition in '92. His "Considerations on Public Worship and on the Ministry of Penitence," addressed to the clergy, with a "Pastoral Letter to the Laity of the Diocese" ('98), has been much read and commented on. In '99 he published a "Memoir of the Episcopate of Charles Wordsworth, Bishop of St. Andrews 1853-1892," with particular reference to his share in the Eucharistic Controversy and the movement for Reunion with Presbyterians. Made a voyage round the world in '94-5, spending two months in New Zealand. In Jan. and Feb. '98 he executed a commission from the Archbishop to visit the Patriarchs and Chief Prelates of the East, at Alexandria, Nicosia (Cyprus), Damascus, Jerusalem, and Constantinople, and to present the resolutions of the Lambeth Conference of '97 on Union among Christians. He consecrated the Anglican Church of St. George at Jerusalem, Oct. 18th, '98. *Palace, Salisbury; Lollards' Tower, S.E.*

Salisbury, Robert Arthur Talbot, 3rd M. of (cr. 1879). Surname Gascoyne-Cecil. B. 1830, s. 1868. *E.* Eton and Christ Church, Oxford, and—as Lord Robert Cecil—was elected for the family borough of Stamford in '53. K.G.; P.C. He received a place in Lord Derby's

ministry of '66 as *Secretary of State for India* ('66-7), under the title of Lord Cranborne, which he assumed on the death of his elder brother. Owing to certain divergencies of opinion on the question of the extension of the franchise, to which he was opposed, Lord Cranborne separated himself for a time from his political associates; but on taking his place in the House of Lords at his father's death, in '67, as Lord Salisbury, he returned to his old party associations, and soon took rank as the foremost debater of the Upper House. In '64 he was elected *Chancellor of the University of Oxford*. He gradually assumed a high position of authority on Indian and foreign affairs; and when Mr. Disraeli resumed office as Premier in '74, Lord Salisbury became *Secretary for India* ('74-8). He was despatched to Constantinople in '76 to take part in the Conference which was expected to settle the matters in dispute between Russia and Turkey. The Conference failed to attain this result, and the war broke out which ended by the Treaty of San Stefano. Lord Salisbury accompanied Lord Beaconsfield to the *Berlin Congress*. He was *Secretary for Foreign Affairs* '78-80. Upon Lord Beaconsfield's death, in '80, Lord Salisbury became the recognised leader of the Conservative party; and when the Gladstone Ministry resigned office in June '85 Lord Salisbury became *Premier* as well as *Secretary for Foreign Affairs*. The new Administration, however, did not last long. The general election in November of the same year did not result favourably to the Government, and immediately after Lord Salisbury resigned. Mr. Gladstone succeeded, but he too had a short lease of power, and was defeated on the second reading of the Home Rule Bill June 8th, '86. The general election which took place in the following month brought Lord Salisbury again into power, and his tenure of office during the Jubilee year of the Queen's reign will be memorable in his lordship's family for the honour which her Majesty paid him by going in person to visit him at Hatfield. In May '88 he introduced a Bill into the House of Lords for the reform of that Assembly and the creation of life peers. He was presented with the *freedom of the city of Glasgow* May 20th, '91, and in July he had the honour of entertaining the *German Emperor* at Hatfield, which was also visited by the Prince of Naples. Though the result of the general election in '92 was adverse to his Government he remained in office till he was defeated in the Commons, when he gave way to Mr. Gladstone. Lord Salisbury was an occasional contributor in his younger days to the *Quarterly Review*, but he now seeks relaxation from the cares of office in scientific rather than in literary pursuits, experimental physics being his favourite study. He spends much of his time in his laboratory at Hatfield, and has greatly interested himself in the application of electricity to practical purposes on his estates. On the resignation of Lord Rosebery, in June '95, Lord Salisbury formed his third Administration, which is a coalition ministry, in which places were found for a number of Liberal Unionists (see MINISTRY). Lord Warden of the Cinque Ports '95; D.L. Kent. He was occupied throughout '96 by the conduct of our relations with America in

regard to the Venezuelan Boundary dispute, and by affairs in Armenia; and in '97 events in Crete, and afterwards in Greece, found ample occupation for him, apart from other foreign affairs. His conduct of the negotiations in regard to the China question ('98) exposed him to criticism even from his own side, but in the firm stand he made on the Fashoda question he received the support of both great political parties. He sustained an irreparable loss by the death of his wife, Nov. 20th, '99. *Heir*, Visct. Cranborne, M.P., s. C. Carlton.

Saltersford (see Courtown).

Saltoun, Alexander William Frederick, 18th L. (cr. 1445). Surname Fraser. B. 1851, s. 1886. Formerly Maj. and Lieut.-Col. Grenadier Guards; elected a S.R.P. '90. *Heir*, Hon. A. A. Fraser, Master of Saltoun, s. Carlton.

Winchester, Randall Thomas, 86th Bp. of (See founded 636.) Surname Davidson. B. 1848, app. 1895. *E.* at Harrow and Trin. Coll., Oxford, where he graduated ('71) in honours in Law and History. Curate at Dartford, but became ('77) Chaplain and private secretary to Archbishop Tait, whose second daughter he married a year later. In '82 H.M. the Queen appointed him her sub-almoner and hon. chaplain, and he also became one of the "six preachers" of Canterbury Cathedral. On the late Dr. Benson's succession to the Primacy, Dr. Davidson retained the offices he held under Dr. Tait; but in '83 he was appointed Dean of Windsor and resident chaplain to the Queen. He has written on many historical subjects, including the "Origin and History of the Lambeth Conferences," and edited (with Canon Benham) the "Life of Archbishop Tait." He is a trustee of the British Museum, and a governor of the Colleges of Charterhouse and Wellington. He succeeded to the bishopric of Rochester on Dr. Thorold's translation to the see of Winchester ('90), and was consecrated in Westminster Abbey April 25th, '91. In Sept. '95 he was translated to the see of Winchester in succession to Bishop Thorold. His lordship is the Clerk of the Closet to the Queen, and holds the Oxford degree of D.D. by diploma, and is also an hon. D.D. of St. Andrews University. *Farnham Castle, Surrey; Lollards' Tower, S.E. Athenæum.*

Winton (see Eglintoun).

Wolseley, Garnet Joseph, 1st V. (cr. 1885) Surname Wolseley. B. 1833 at Golden Bridge House, Co. Dublin, and is s. of late Major G. J. Wolseley. K.P. Entered the Army in '50. As ensign he served with the 80th Regt. in the latter part of the second Burmese war. He was dangerously wounded at the head of a storming party in the last and most critical action of the war. As lieutenant he served in the Crimea from Dec. '54 with the 90th Light Infantry, and as assistant engineer, and was twice wounded. Attaining a captain's rank, he served in India with the 90th, and on the staff in the campaigns of '57-9, and received a brevet majority. As lieutenant-col. he served in the China war of '60; and as colonel in Canada from '62-70, in which last year he commanded the Red River Expedition. As major-general he commanded the troops in the Ashantee War in '73-4; and as lieutenant-general he held the command of the troops in the South African War in '79. Commanded the army in the Egyptian War of '82, and was raised to the peerage, after the victory of Tel-el-Kebir. He also commanded in the Sudan campaigns of '84-5, and was made a Viscount and K.P. Lord Wolseley received

£25,000 for his services in Ashantee, and £20,000 for his Egyptian campaign. He has held many staff appointments, and has been High Commissioner to Natal and to Cyprus. Appointed Adjutant-General '82. He contributes occasionally to periodical literature; of his "Soldier's Pocket-book" several editions have appeared. Appointed ('88) Ranger of Greenwich Park. In Oct. '90 he took up new duties as Commander-in-Chief of the army in Ireland, and in Nov. '95 was made Commander-in-Chief in place of the Duke of Cambridge. Appointed Field Marshal '94, in which year he also published a fine biography of the Duke of Marlborough. *Heiress* (to the Viscounty by special remainder), Hon. Frances G. Wolseley, *d. Farm House, Glynde, Sussex. United Service, Athenæum.*

Wolverton, Frederic, 4th L. (cr. 1869). Surname Glyn. B. 1864, s. 1888. Partner in banking house of Glyn, Mills, Currie & Co.; J.P. Dorset; app. a Lord-in-Waiting '02, resigned '93; Memb. L.C.C. '08; Hon. Sec. of the League of Mercy. *Heir*, Hon. George E. D. Carr-Glyn, s. L. *Brooks's.*

Worcester, John James Stewart, 103rd Bp. of. (See founded 679.) Surname Perowne. B. at Burdwan, Bengal, 1823; app. 1890. *E.* at Norwich Grammar School and Corpus Christi Coll., Camb.; he held Bell's, Tyrwhitt's, and Crosse's Univ. Scholarships, and was member's (Latin) prizeman three times. He was ordained deacon '47, and priest a year later. He became Fellow and assistant tutor of Corpus Christi Coll.; was for some time Divinity Lecturer at King's Coll., London, and afterwards Examining Chaplain to the Bishop of Norwich. Vice-Principal of Lampeter Coll., which owes much to his strenuous activity; Prebendary of St. Davids '67; Canon Residentiary of Llandaff '69; *Hulsean Lecturer* in '68; and was seven years later appointed Hon. Chaplain to the Queen and *Hulsean Professor of Divinity* in the Univ. of Camb. The restoration of Peterborough Cathedral, whither he went as dean in '79, has been largely owing to his efforts. He formed one of the Convocation Company of Old Testament Revisers, was a member of the Ecclesiastical Courts' Commission, and was select preacher before the Univ. of Oxford in '88. Elected Prelector in Divinity, Trin. Coll. '72; Fellow '74; Hon. Fellow of Corpus Christi Coll., Camb., '86; Hon. D.D. of Edinburgh '84; J.P. for the Liberty and Borough of Peterborough. Dr. Perowne has a high reputation for many theological works, especially a Commentary on the Book of Psalms. His appointment as successor to Dr. Philpott in the see of Worcester was notified at the end of Oct. '90. During '92 his lordship attended the Reunion of the Churches Conference at Grindelwald, and spoke strongly in favour of the object expressed in the title of the Conference. He was sharply criticised in some quarters for so doing. *m. Anna M., d. of Mr. Serjeant Woolrych, of Croxley House, Herts. Hartlebury Castle, Kidderminster. Athenæum.*

Worthingham (see Gosford).

PEERS WHO HAVE BEEN COMMONERS.

The following list of names formerly borne in public life by gentlemen who are now members of the House of Lords, and whose present title is dissimilar to their surname, will be found of assistance in making references to the peerage.

Commoner.	Peer.
Adderley, Sir Chas., M.P.	Norton, L.
Bailey, Sir Joseph	Glanusk, L.
Bass, Sir Michael A., M.P.	Burton, L.
Beckett, Sir Edmund	Grimthorpe, L.
Borthwick, Sir Alg., M.P.	Glenesk, L.
Brooks, Sir T.	Crawshaw, L.
Burns, Sir John	Inverclyde, L.
Campbell, Sir A., M.P.	Blythwood, L.
Carmarthen, Marq. of,	
M.P.	Leeds, D.

Commoner.	Peer.
Cochrane - Baillie, Mr., M.P.	Lamington, L.
Corry, Mr. Montagu	Rowton, L.
Cubitt, Mr. G., M.P.	Ashcombe, L.
Cunliffe-Lister, Mr. S.	Masham, L.
Dalkeith, Earl of, M.P.	Buccleuch, D.
De Worms, Baron H., M.P.	Pirbright, L.
Fellowes, Capt., M.P.	De Ramsey, L.
Flower, Mr. Cyril, M.P.	Battersea, L.
Foljambe, Cecil G. Savile	Hawkesbury, L.
Fremantle, Mr. T. F.	Cottesloe, L.
Gardner, H., M.P.	Burghclere, L.
Gathorne - Hardy, Mr., M.P.	Cranbrook, E.
Gibbs, Mr. Henry Hucks	Aldenharn, L.
Gibson, Mr. Edw., M.P.	Ashbourne, L.
Giffard, Sir H., M.P.	Halsbury, E.
Gordon, Sir A. H., G.C.M.G.	Stanmore, L.
Gore-Langton, Mr. W. S., M.P.	Temple, E.
Grimston, Visct., M.P.	Verulam, E.
Grosvenor, Earl, M.P.	Westminster, D.
Grosvenor, Ld. Rd., M.P.	Stalbridge, L.
Grosvenor, Mr. R. W., M.P.	Ebury, L.
Guinness, Sir A. E., M.P.	Ardilaun, L.
Guinness, Sir E. Cecil, Bart.	Iveagh, L.
Gurdon, Mr. Robert T.	Cranworth, L.
Hamilton, Marq. of, M.P.	Abercorn, D.
Hartington, Marq. of, M.P.	Devonshire, D.
Hawkins, Sir Henry	Brampton, L.
Herbert, Sidney, M.P.	Pembroke, E.
Holland, Sir Henry T., M.P.	Knutsford, V.
Hozier, Sir Wm. Wallace	Newlands, L.
Hubbard, Mr. E., M.P.	Addington, L.
James, Mr. W., M.P.	Northbourne, L.
Johnstone, Sir H., M.P.	Derwent, L.
Knatchbull - Hugessen, Mr. E., M.P.	Brabourne, L.
Legh, Mr. T. W., M.P.	Newton, L.
Lewisham, Lord, M.P.	Dartmouth, E.
Lindsay, Lord, M.P.	Crawford, E.
Lopes, Lord Justice	Ludlow, L.
Loyd-Lindsay, Sir R., M.P.	Wantage, L.
Lymington, Lord, M.P.	Portsmouth, E.
Manners, Lord John, M.P.	Rutland, D.
Marjoribanks, Mr. E., M.P.	Tweedmouth, L.
Matthews, Henry, M.P.	Llandaff, V.
Plunket, D. R., M.P.	Rathmore, L.
Rolls, Mr. J. A.	Llangattock, L.
St. Aubyn, Sir J., M.P.	St. Levan, L.
Sandon, Visct., M.P.	Harrowby, E.
Scott, Lord Henry, M.P.	Montagu de Beaulieu, [L.]
Selwin-Ibbetson, Sir H., M.P.	Rookwood, L.
Smith, Sir Donald	Strathcona and Mount Royal, L.
Stafford, Marq. of, M.P.	Sutherland, D.
Stanley, Colonel, M.P.	Derby, E.
Stephen, Sir George	Mount-Stephen, L.
Stern, Mr., M.P.	Wandsworth, L.
Sturt, Mr. Henry, M.P.	Alington, L.
Thesiger, General F.	Chelmsford, L.
Thomson, Sir W., D.C.L.	Kelvin, L.
White, John Campbell	Overtoun, L.
Williamson, J., M.P.	Ashton, L.
Winn, Mr. Rowland, M.P.	Saint Oswald, L.
Wolmer, Visct., M.P.	Selborne, E.

This list is not exhaustive; a fuller list of Peers who have been Commoners will be found in previous editions.

Pelew Islands. See CAROLINE ISLANDS.

Pensions. See FINANCE NATIONAL, Part III.

People's Palace for East London, The, opened May '87 by Her Majesty, is situated in the busy thoroughfare of the Mile End Road. It provides for the vast population of the East End a large hall for concerts, entertainments, etc.; a library and reading-rooms, gymnasia, swimming baths, social meeting rooms, game rooms, refreshment rooms, and trade shops and technical schools. The last-named department is intended to instruct youths in their trades, and is subdivided into day and evening departments. The day school, the fee of which per session of about 40 weeks is £2, contains over 400 boys, of whom about one-half pay fees, and the rest hold scholarships. The evening classes attract an average attendance of about 954, and embrace such subjects as brass-finishing, bookbinding, physiology, tailors' cutting, elocution, machine construction and drawing, etc. Much stress is laid upon this feature as a social factor of great probable importance. These trade training schools, built, equipped, at a cost of £20,000, by the Drapers' Company, were opened by the Master and Wardens of the Company Oct. 5th, '88. The site has cost in all £22,400. The "Palace" idea is a resuscitation and development of the Beaumont Philosophical Institute, established nearly half a century since in Mile End, the Governors of which are some twenty gentlemen closely identified with the East End. In '92 the buildings and grounds were practically completed by the grant of £3500 by the Drapers' Company towards the laying out of the grounds and the public gardens, which were then thrown open to the public. **Patron, the Queen; Chairman of the Governors and Treasurer, Sir J. H. Johnson; Director of Studies, J. L. S. Hatton, M.A.; Secretary, Clarence Brandon. Offices, People's Palace, Mile End Road, E.**

Persia. An independent Asiatic state lying between Turkey and Afghanistan, three times as large as France. The chief cities are Teheran, Tabriz, Ispahan, Meshed, and Shiraz. The Shah, officially called the "Shahinshah" or king of kings, is the autocrat of the realm, and carries on his government through a cabinet of 12 responsible ministers, and several ministers without portfolios. The country is divided into 33 provinces under governors-general, generally called Hakim, who, with the Sheikhs-el-Islam, or chief judges of the cities, administer justice and superintend the collection of the revenue. The provinces are subdivided into districts. The chiefs of the nomad tribes exercise authority over them and collect the revenues from them. The nomads consist chiefly of Turks, Kurds, Arabs and Lurs, and altogether number nearly 2,000,000. The priests have great power in the country. Many colleges exist for instruction in religion, which is of the Shia sect, and Persian literature. The chief products of the country are silk, grain, fruits, gums, opium, carpets, and tobacco. The army numbers about 100,000, of whom about one-fourth are kept in active service. **Revenue, '98-9, about £1,500,000.** The Government obtained from the Imperial Bank of Persia in '92 a loan of £500,000, repayable in eighty half-yearly instalments. This is the only public debt. The imports and exports of '97 were estimated to amount to about £7,500,000. **Area, 628,000 sq. m.;**

pop. about 9,000,000. For Ministry see DIPLOMATIC. See also Euphrates Valley Railway, and Persian Roads and Railways under ENGINEERING. — **History, '99.** Various circumstantial accounts of the efforts of Russia to strengthen her commercial and political hold upon the country and to oust British trade were published during the year. In May it was asserted that a Russian mining company had obtained a lease for industrial purposes of the northern province of Azerbaijan for 70 years. The province is understood to be rich in copper, iron, and other metals. The *Times of India* in June declared that the port of Bandar Abbas on the Persian Gulf had been ceded to Russia by a secret agreement. Disturbances broke out at Bushire at the end of July in consequence of quarantine regulations adopted in view of the plague, and ultimately the regulations had to be withdrawn in order to restore quiet.

Persia, Shah of. See MUZAFFER-ED-DIN.

Persian Gulf, etc. For Residents, etc., see DIPLOMATIC.

Peru. A republic on W. coast of S. America. The capital is Lima, with an estimated population of 104,000. The country contains vast stretches of rich agricultural and pastoral lands, besides profitable mining and petroleum fields and immense forests. The Sierra is a region of mineral wealth. The climate is very good, and the country is admirably suited for European immigrants. The disastrous war with Chili completely shattered the power of Peru. The Constitution is modelled on that of the United States, the legislative power being vested in a Senate elected by the provinces, one member for every 30,000 inhabitants, and a House of Representatives nominated by the electoral colleges of the provinces. **Executive** in the hands of a President elected for four years. Absolute political but not religious freedom allowed, the constitution prohibiting the public exercise of any but the Roman Catholic religion, although some degree of toleration exists. Education is compulsory and free in the elementary schools. There are about 1000 miles of railways belonging to the State, but ceded to the bondholders for a term of years. **Chief products** are sugar, wool, cotton, coffee and guano. **Area, 464,000 sq. m.; pop., 3,000,000. Revenue, '98 (dol. at 1s. 10d.), £988,705; expenditure, £1,053,085; imports, '97, about £1,650,000; exports about £2,850,000. Internal debt, about £4,000,000.** For Ministry, etc., see DIPLOMATIC.

Peterborough, Bishop of. See under PEERAGE.

Petroleum Bill. See SESSION, sect. 89.

PHILIPPINE ISLANDS.

A large group of the Asiatic Archipelago. **Area, 115,326 sq. m.; pop. 7,500,000.** The largest islands are Luzon and Mindanao. **Capital, Manila.** The inhabitants consist of the aborigines, called Negritos; the Igolotes, probably of Chinese descent, who are the agriculturists of the islands; and the Tagalos, who are Malay immigrants. Over the two former races the Spaniards easily obtained the ascendancy, but the Tagalos never bowed to Spanish rule. Great mineral wealth is said to exist throughout the islands, but the unhealthy climate prevents any effective attempt being made to work it properly. The chief industries are in the hands of the Chinese, who number about 100,000. Sugar, hemp, coffee, cigars, and tobacco

are exported. The islands are specially rich in timber. The imports amount to about £2,000,000, and the exports to about £4,000,000. Until '98 the islands formed a Spanish colony, but when the Americo-Spanish war broke out, Admiral Dewey sailed with an American squadron from Hong-Kong and completely destroyed the Spanish ships in Manila harbour, captured the forts at Cavite, and thus had Manila itself at his mercy. Being without military aid, however, he could not at once proceed to reduce the city, though Aguinaldo and other leaders, who had formerly been in rebellion against Spanish rule, were brought from Hong-Kong, and soon completely hemmed in Manila from the land side. Meanwhile, American troops were hurriedly dispatched to the islands, and Manila was bombarded and taken by the American land and sea forces co-operating (August 13th, '98), just one day after the signature of the peace protocol at Washington, and before the proclamation of the President, ordering a cessation of hostilities, could reach the combatants. The insurgents then attacked the Spanish positions till they controlled the whole island of Luzon, except Manila and Cavite. Their headquarters were fixed at Malolos, and there an Assembly of Delegates met (Sept. 15th), and decided (23rd) to request the Americans to recognise the independence of the islands, save for an American protectorate relating only to external affairs. Aguinaldo was elected President. Considerable friction manifested itself as time went on between the American forces and the insurgents, and there was even a naval engagement (Oct. 19th), while General Otis obliged them to evacuate the suburbs of Manila. When the Peace Commissioners met in Paris, the American delegates presented a demand (31st) for the cession of the whole Philippine Archipelago to the United States, as territorial indemnity for the expenses of the war. This demand was perforce granted, and the island of Guam in the Ladroneas was also ceded to the United States. This by no means fell in with the views of Aguinaldo. A Filipino Government, recognising him as President of the Republic, was constituted (Dec. 1st, '98), and an appeal to the United States was drawn up asking that the future government of the islands should not be hastily decided. Meanwhile the Filipino forces were hotly attacking Iloilo, which General Rios, the Spanish commander, evacuated (24th). The insurgents at once occupied the city, and declined to accede to the American demand that it should be transferred to them. A proclamation was issued in Manila (Jan. 5th, '99) stating that the United States forces would at once assume the administration of the whole of the ceded territory. A liberal form of government was promised, in which the Filipinos were invited to share. The Filipino Government at Malolos, however, was reconstituted, and it was made plain that Aguinaldo and his followers would fight for independence. A new Constitution was drawn up and adopted, and Aguinaldo was empowered to declare war against the Americans whenever he should deem it advisable (21st). His forces made a general attack upon the American troops holding Manila (Feb. 4th), but were everywhere repulsed. The American warships joined in the fighting, and the Filipinos lost heavily. Calocan town was captured after a brilliant engagement (10th), and the Americans secured

possession of Iloilo without loss (11th). The insurgents made a futile attempt to burn Manila (23rd), but the native settlement of Tondo and other sections, making in all about a square mile, were destroyed by the flames. Guadalupe and San Nicolas were taken by General Wheaton's brigade (March 13th), and the insurgents were driven from Pasig (14th). After a halt for a few days, the forward movement was continued, and the main Filipino army, under Aguinaldo himself, was defeated and driven in on Malolos (27th), which was captured (31st). Aguinaldo then made Calumpit, 6 miles north of Malolos, his headquarters, and afterwards shifted still further north. A proclamation to the Philippine people was issued (April 4th) by the American Civil Commission, declaring that the United States Government desired to establish a form of government which, while insuring the due fulfilment of their sovereign obligations, would give the Filipinos the fullest possible measure of self-government. Religious freedom, the protection of civil rights, a sound fiscal system, the pure administration of justice, public works to promote trade and commerce, and a good educational system were promised, and the co-operation of the Filipinos was invited. Complaints began to be heard during this month that many of the American volunteers desired to return home. It was accordingly decided to send out 14,000 regulars to Manila. After sustaining several heavy defeats, the Filipino commander, General Luna, sent commissioners to ask for an armistice pending a meeting of the Filipino Congress to consider whether the fighting should go on (28th), but General Otis declined to consider anything but the complete surrender of the Filipino army. General Luna was afterwards assassinated by members of Aguinaldo's guard. Desultory fighting went on, with intervals of negotiation for peace, all through May, and the peace negotiations ultimately ceased. The whole staff of war correspondents joined in a protest to General Otis against the system of censorship (July 17th), and declared that the official despatches gave the people of the United States a false impression of the situation, and that their own reports were excised so as to bear out the official despatches. A long period followed, in which no news of importance was published, except that the Filipinos held their own, and that General Otis proposed to divide the islands into four military departments. The Civil Commissioners left in September, and afterwards submitted a report to the President, urging that the only possible course was to compel the submission of the insurgents as a preliminary to the establishment of civil government, and then to give them the largest measure of self-government of which they were capable. The Commissioners were strongly persuaded that the permanence of American rule would prove the greatest blessing to the islands. The Cabinet adopted and approved their report. General Otis reported (Oct. 31st) that the continuance of the rainy season still hampered him in his operations. His troops at this date numbered 39,000, but it was stated that they would be at once increased to 65,000. The U.S. cruiser *Charleston* was wrecked on an unmarked coral reef to the north-east of Luzon (Nov. 2nd), but the crew were saved. Tarlac, the Filipino civil and military headquarters, was captured (12th),

and it was stated that Aguinaldo's power was broken, though guerilla fighting would probably continue for a time.

PHOTOGRAPHY, '99.

Whilst the past year has not been marked by any specially important event or discovery, it has been a period of great activity, advances and improvements being made in nearly every sphere, and public interest in photography of one kind or another has greatly increased. The number of amateur workers throughout the country who make photography a serious study and not merely a pastime is rapidly growing; and it is to amateurs that a great deal of the progress and improvement made is due. An almost unbroken succession of exhibitions in various parts of this country and on the continents of Europe and America has brought the general public into contact with the best contemporary results, and has led to a marked improvement in their management and direction. It is noticeable that, without exception, photographic exhibitions, both at home and abroad, are almost entirely devoted to what is called pictorial work, or the application of photography to the production of a pictorial rendering of nature. Of recent years this has unquestionably been the most popular side of photography, and most modifications and improvements in existing processes have been made in the direction of securing a more artistic result. Early in the year exhibitions were held in Berlin and in Florence, and to both British photographers were specially invited to contribute. This may be taken as a testimony to the high esteem in which British pictorial photography is held amongst those European nations where the fine arts would seem to be more generally cultivated than in our own. Indeed, that movement which has for its aim the emancipation of photography from the fetters of the purely mechanical, mainly originates in Great Britain, and the influence of British work of this kind has gradually spread to, and is frankly acknowledged in, America, Paris, Berlin, Vienna, and elsewhere.

The Exhibitions of the Royal Photographic Society and that of the Photographic Salon were held as usual. Each still maintains its individuality, and is guided by the traditions of the past few years. At the Royal Photographic Society's Exhibition the judges were:—Pictorial section, Lieutenant-Colonel J. Gale, Messrs. Harold Baker, A. Horsley Hinton, B. W. Leader, R.A., and W. L. Wyllie, A.R.A.; technical section, Captain W. de W. Abney, C.B., F.R.S., Messrs. T. Bolas, F.I.C., F.C.S., and Chapman Jones, F.I.C., F.C.S. The Society's medal was awarded to Messrs. Dudley Hoyt, John H. Gash, W. T. Greatbatch, Chas. Inston, W. R. Bland, E. G. Boon, John M. Whitehead, and Alfred Steiglitz. In technical section the following were awarded a medal:—J. Hort Player, J. E. Johnson & Co., and E. Sanger Shepherd. The Royal Photographic Society in June removed into new premises at 66, Russell Square, the formal opening taking the character of a *conversazione* on June 27th. The new home affords plenty of space and convenient rooms for all purposes.

The Photographic Convention was held in Gloucester, its members being accorded an official reception by the Mayor and Corpora-

tion. The President for the year was Mr. William Crooke, of Edinburgh.

As a means of popular entertainment photography has found an immense field in what is known as **animated photography**. Improvements in the construction of apparatus have now placed within the reach of any photographer complete means of taking the animated photograph, and also of exhibiting it on a small or large scale, thus adding a new attraction to the drawing-room or lecture-hall magic lantern display. **Ozotype**, a method of photographic printing introduced towards the close of '98 by Mr. Thomas Manly, and also the revived process of printing with pigmented gum, both intended for the use of the pictorial worker, can scarcely be said to have become more widely used, whilst the older processes of carbon printing and platinotype still maintain their undisputed position as the two finest methods. The ordinary silver printing processes have only increased in proportion to the increased number of recruits to the photographic ranks.

Dr. W. J. Russell has continued his investigations of Captain Coulson's **Vapography**, and now finds that pure mercury is inactive, the activity previously observed being due to the presence of traces of zinc. Referring to the fact that paper and cardboard can absorb the active emanations of turpentine, essential oils, and other bodies, and then themselves become active if brought very near to, or in contact with, plates, Dr. Russell, at the meeting of the British Association, produced evidence to show that the action was due to hydrogen peroxide produced during the slow oxidation of the substances, and hence paper containing ferrous sulphate, potassium, permanganate, or other substance which will absorb hydrogen peroxide, is rendered harmless.

Three-colour heliochromy, or trichromatic photography, the only definite form which the much-desired photography in colours has yet assumed, has been the subject of constant study with many leading scientists, and the only advance which can be recorded is in the improvement of the colour screens, and the ascertaining of the relationship between a particular screen and the plate used therewith. Mr. Sanger Shepherd, in conjunction with Mr. James Cadett, has been working in this direction, and his achievements have had another application, namely, to improve the monochromatic rendering of scenes in nature more truthfully as regards the relative luminosities of its various colours. Mr. Sanger Shepherd has arrived at a certain tint, by the use of which only a small portion of the blue rays are passed, whilst yellow, green, and red are relatively balanced. When the "mixed" screen is used the best results are obtained by employing the plate which Mr. Cadett has prepared especially to suit it. These spectrum plates, as they are called, may well be regarded as the greatest advance in dry plate manufacture during the year. Obviously the use of a plate sensitive to yellow, and partly so to red, necessitates an alteration of the conditions which commonly obtain in the dark room, where red or orange light is with ordinary plates a safe light; and in order to remove the serious objection and inconvenience of having to work in total darkness when using "spectrum" plates, Mr.

Cadett has also introduced a spectroscopically tested glass of deep red tint, which he issues as a "safe" light. A chemical salt which has been much talked about of late, and has made good its claim to be included in the photographer's long list of chemicals, is **ammonium persulphate**, its use being to reduce the density of the negative image when required, acting equally upon all parts of the plate, and not less on the denser portions than on the more transparent ones, as is the way with potassium ferricyanide. **Aduro**, **ortol**, and **diogen** are amongst the **new developers**, or re-agents, with the names of which one has during the year become accustomed; but probably their introduction has not to any appreciable degree effected the use of pyrogallol as a developer for all ordinary purposes. Metol alone of the new developers appears to be at all widely used, and then chiefly in conjunction with pyrogallol or hydroquinone. In the field of **photographic optics** Messrs. J. H. Dallmeyer, Ltd., have made further improvements with the telephoto lens, the patent stigmatic lens by the same makers being also amongst the noteworthy things of the year. The **Ross-Zeiss** and **Ross-Goerz** lenses are also, in the opinion of many, unrivalled. Increased facilities are now offered to photographers by the authorities of Kew Observatory for the testing of lenses, definite fees being fixed according to the nature of the test required. Forms for the entry of lenses and all particulars are obtainable on application to the Superintendent of Kew Observatory Test Department. Amongst some of the more interesting **applications of photography to useful industries** is its use in connection with weaving in a Jacquard loom, Herr Szczepanik having apparently already gone a long way towards controlling the loom by means of a photograph. Without diagrams and a long technical description it would be impossible to describe what Herr Szczepanik proposes to do, but the matter was referred to in the *Times* and *Daily Chronicle* early in the year, when Szczepanik presented a specimen of the new weaving to the Austrian Emperor. **Radiography**, or **scia**graphy, never properly belonged to the domain of photography, and since the formation of the Röntgen Society it appears to have taken a more independent path, and therefore hardly needs to be referred to here. The chief advances in this interesting science seem to have been in the direction of reducing the duration of exposure, whilst, generally speaking, the results usually obtained are more perfect in proportion to the greater practice which the daily use of radiography has naturally secured.

Picquart, Colonel, was born at Strasburg in 1854, and was educated at St. Cyr '72-74, and at the General Staff School '74-76, gaining high places at the examinations in both schools. After serving in Algeria with the Zouaves he entered the infantry, and gained his captaincy '80. In '83 he was appointed to the War Office staff, and in '85-88 served in Tonquin, where he earned a decoration. Returning to France he became professor at the Military School, and in '93 rejoined the War Office, becoming head of the Intelligence Department in succession to Colonel Sandherr, in '95. The next year he was given the rank of lieutenant-colonel, but then he began his inquiries into the Dreyfus case, moved thereto by certain suspicious discoveries which he

made as to Major Esterhazy. In this he was at first encouraged by his official superiors, but afterwards discouraged, and in January '97 he was sent in disgrace to Tunis. He returned to take a prominent part in the inquiries and legal proceedings which took place in the winter of '97 and during '98, and his evidence formed the strongest proof of the illegality of the trial at which Dreyfus was condemned, and of the astounding methods employed by the War Office to hush up the affair. In Feb. '98 he was placed on the retired list, and afterwards prosecuted and imprisoned on a charge of revealing War Office secrets. After a long imprisonment, however, he was released, and was one of the leading witnesses for Dreyfus at the second court-martial in '99. See FRANCE, *History*, '99.

Piers and Harbours. See SESSION, sect. 30.
Pinero, Arthur Wing, dramatic author, was b. in London in 1855. Commencing a legal career, he afterwards became connected with the stage, and acted at the Lyceum and Haymarket Theatres. Devoting himself to play-writing he produced his first piece, which was entitled "Two can Play at that Game," at the Lyceum. Other plays from his pen include "£200 a Year" ('77), "The Money Spinner" ('80), "The Squire" ('81), "Lords and Commons," "The Rocket" ('83), "The Magistrate" ('85), "Sweet Lavender," "The Profligate," "In Chancery," "Lady Bountiful," "The Times," "The Second Mrs. Tanqueray" ('93), "The Notorious Mrs. Ebbsmith" and "The Benefit of the Doubt," both produced in '95, "The Princess and the Butterfly," produced at St. James's Theatre, March '97, "Trelawny of the Wells," produced at the Court Theatre Jan. '98, and "The Gay Lord Quex," produced at the Globe Theatre on April 8th, '99. He also collaborated with Sir Arthur Sullivan and Mr. Comyns Carr in "The Beauty Stone," a romantic musical drama produced at the Savoy Theatre in May '98. Address: 63, Hamilton Terrace, London, N.W.

Plague, The. See MEDICAL SUMMARY, '99.
Poet Laureate. An office in the household of the sovereigns of Great Britain, the appellation having its origin in a custom of the English Universities, which continued to 1512, of presenting a laurel leaf to graduates in rhetoric and versification, the king's "laureate" being a graduated rhetorician in the service of the king. The first appointment of a poet laureate dates from the reign of Edward IV., the first patent being granted in 1630. It was formerly the duty of the poet laureate to write an ode on the birthday of the monarch, but this custom has been discontinued since the reign of George III. Amongst those who have held this office may be mentioned Dryden, Southey, Wordsworth, and Tennyson. Mr. Alfred Austin (*q.v.*) is the present holder of the office.

Poland, a general government of Russia, including ten provinces, with a total area of 49,159 square miles, and a population of over 9,000,000. The country had a separate constitution 1815-30, and a separate government '30-64; but, in the latter year it was deprived of its administrative independence, and in '68 it was incorporated as an integral part of Russia, trial by jury was abolished, and the official use of the Polish language was prohibited. The majority of the inhabitants are Roman Catholics. There are two main parties, one the Nationalist party and the other the

Socialist party. But both are equally opposed to the Russian Government. See RUSSIA.

Police Courts and Magistrates. **City:** **Mansion House**, presided over by the Lord Mayor or an Alderman. **Guildhall**, presided over by one of the Aldermen, in rotation for a week at a time. **Metropolitan:** **Bow Street**, Covent Garden: Sir Franklin Lushington, Kt., A. de Rutzen, and R. H. B. Marsham, Esqs. **Clerkenwell**, King's Cross Road: J. R. W. Bros and C. M. Chapman, Esqs. **Lambeth**, Lower Kennington Lane: A. A. Hopkins and C. K. Francis, Esqs. **Great Marlborough Street:** E. N. F. Fenwick and G. L. Denman, Esqs. **Marylebone**, Seymour Place: H. Curtis Bennett and A. C. Plowden, Esqs. **Southwark**, High Street, Borough: W. Slade, G. Paul Taylor, and E. C. T. D'Eyncourt, Esqs. **North London**, Stoke Newington Road: E. S. Fordham, Esq. **Thames**, Arbour Square, Stepney: F. Mead and J. Dickinson, Esqs. **Westminster**, Vincent Square: J. Sheil and Horace Smith, Esqs. **Worship Street:** Haden Corser and A. R. Clier, Esqs. **West London** (West Kensington), Vernon Street: J. Rose and R. O. B. Lane, Q.C., Esqs. **South-Western**, Lavender Hill: E. W. Garrett, Esq. **Greenwich and Woolwich:** G. G. Kennedy and E. C. T. D'Eyncourt, Esqs. **West Ham**, West Ham Lane, Stratford: E. Baggallay, Esq., and the Borough Justices. **Hours of Sitting:** **Mansion House**, 12 to 2; **Guildhall**, 10 to 4; **Greenwich**, 10 to 1.30; **Woolwich**, 2.30 to 5. **All other Courts**, 10 to 5. In Jan. '99 the Home Secretary appointed a Committee, consisting of Lord Belper (Chairman), Sir Harry Bodkin Poland, Q.C., Mr. J. S. Dugdale, Q.C., Mr. C. A. Whitmore, M.P., and Mr. F. Lushington, with Mr. F. J. Dryhurst, of the Home Office, as Secretary, to inquire into the jurisdiction of the Metropolitan police magistrates and county justices respectively in the Metropolitan Police Court district; and to report whether any, and what, limitations in lieu of, or in addition to, those contained in section 42 of the Metropolitan Police Courts Act, 1839 (2 and 3 Vict., cap. 71), should be made by legislation or otherwise in regard to their respective jurisdictions, and generally whether any, and what, measures are required in order to meet the needs of the Metropolitan Police Court district as regards the exercise of magisterial jurisdiction.

POLICE OF THE UNITED KINGDOM.

Below will be found a series of articles on the police forces of the United Kingdom, arranged in the following order: 1, Metropolitan Police; 2, City of London Police; 3, Police of England and Wales (Counties and Boroughs); 4, The Scotch Police; 5, Royal Irish Constabulary; 6, Dublin Metropolitan Police.

Metropolitan Police.—Established by Act of Parliament (1829), and the protection of the district by watchmen was discontinued by that statute and entirely intrusted to the then newly appointed force. The Metropolitan police area is 688½ sq. miles, and embraces all places within a radius of fifteen miles of Charing Cross, except the City of London, which has its own police. The Metropolitan police district consists of twenty-one land divisions, in addition to its jurisdiction on the river Thames. Every division is under the immediate charge of a superintendent, and the

subdivisions under that of inspectors. Each subdivision has a station house in charge of inspectors, who are sometimes assisted by sergeants. About 260 mounted police patrol the more distant parts of the outer subdivisions, and assist in the inner divisions during processions and large meetings. The Thames police are selected from sailors, and patrol in boats and steam launches. For executive purposes there are three police districts, each of which is in charge of a superior officer, called a Chief-Constable. The Metropolitan police are also employed in H.M. dockyards, and in the principal military stations of the War Department. In each division there are about fifty men selected as a reserve force to carry out special duties, headed by an inspector and assisted by several sergeants. The supreme government of the Metropolitan police is vested in the Commissioner appointed by and acting under the control of the Home Secretary. This office is now held by Sir Edward Bradford, G.C.B., K.C.S.I. There are three Assistant Commissioners—A. C. Bruce, Esq., Dr. Anderson, C.B., and Sir A. C. Howard, C.B.—and four Chief Constables. Latest returns, for the year ending Dec. '98, give the strength as 15,694, comprising 31 superintendents, 578 inspectors, 1930 sergeants, and 13,155 constables. Four superintendents, 54 inspectors, 203 sergeants, and 1600 constables were employed on special duties for various Government Departments. The police available for service in the Metropolis, exclusive of the last named, were 27 superintendents, 524 inspectors, 1727 sergeants, and 11,555 constables; total, 13,833. The financial administration is under the control of the Receiver for the Metropolitan police district, A. R. Pennefather, Esq., C.B., who is appointed by the Crown. He has the direction of contracts of every description, the management of all police buildings, he buys the sites of and erects new buildings, and all the property of the police force is vested in him. He is constituted a corporation sole with perpetual succession. He receives all moneys applicable to the purposes of the Metropolitan police, and makes all disbursements. He is also the receiver for the Metropolitan police courts, and very recently by statute law the police court buildings are vested in him. He has a staff of 25 clerks, 19 surveyors and assistants, 13 storekeepers and assistants, and 76 other officers. The income of the force for the year '98-9 was £1,880,227, and of the pension fund £241,579. There are also a chief surgeon and about thirty Civil Service clerks. There are local surgeons of the police in the divisions. The most important branch of the police not engaged in ordinary divisional duty is the Criminal Investigation Department, which was organised in '78 under a "director," and is now presided over by Dr. Anderson, C.B., assistant commissioner. A part of this service is at New Scotland Yard, and consists of a superintendent, three chief and three first-class inspectors, seven second-class inspectors, and about eighteen sergeants. There is also another part of the service in each division, under the charge of an inspector, responsible to the director. The number of members belonging to each branch is regulated according to circumstances. The Convict Supervision Office, established in '80, is a branch of the Criminal Investigation Department, under a superintendent. It registers the names and

particulars of discharged convicts on licence, and other criminals under police supervision in England, and retains photographs and marks of these persons, under the provisions of the Prevention of Crimes Act of '71. The development and progress of this office has been immense, and the amount of good it has done in co-operation with Discharged Prisoners' Aid Societies and otherwise for the prevention and repression of crime, not only in the Metropolis but throughout the provinces, cannot be exaggerated. The number of licence holders, supervisees, and expeires registered by the Metropolitan Police from '64 to the end of December '98, was 60,689. So commendable are the results of this work that the number of identifications in '98 was 4532 as compared with 3701 in '97. The register is a national one, dealing with every convict, supervisee and habitual criminal discharged in England and Wales. In Oct. '93 the Home Secretary appointed a Committee to inquire into and report upon the best means available for identifying habitual criminals. This committee reported in Feb. '94, recommending the adoption in a modified form of the French method of anthropometry as carried out in France by M. Bertillon, together with Mr. Francis Galton's finger-print system. This proposal has been approved by the Home Secretary, and he has entrusted its administration to Dr. Anderson, Assistant-Commissioner of Police, and has appointed Dr. J. G. Garson as an expert to assist in organising the department established for that purpose. Among other departments of the Metropolitan police are the executive branch, and the public carriage and lost property branch. Satisfactory provisions are made for rewards for diligence and praiseworthy acts by the police, as well as for punishment for breach of discipline. Appreciable regulations also exist for promotion and testing by examination the qualifications of members to fill the higher offices. Provision is made by the Police Act '90 for payment of pensions for life to all ranks in the force who have completed 25 years' approved service; and the pension is to be not less than $\frac{1}{3}$, or more than $\frac{3}{10}$, of their annual pay, with an addition of not less than $\frac{1}{80}$, or more than $\frac{3}{80}$, of such pay for every year of approved service above 25 years, so that the pension shall not exceed more than $\frac{2}{3}$ of their yearly pay. Provisions are also made for payment of pensions to policemen who have served a less number of years, and who are incapacitated by injuries in the performance of their duty. Pensions are to be paid to the widows and allowances to the children of a member of the force who dies from the effect of an injury received in the execution of his duty. Gratuities may be granted in other cases to the widow and children of a policeman who dies from any other cause while in the force. The rateable value of the Metropolitan area for '97-8 was £41,419,302 10s. The police rate is now fixed at 9d. in the £, of which 4d. in the £ is payable out of the Local Taxation Account under the Local Government Act of '88. The pay of the Metropolitan Police force for '98 was about £1,300,000.

City of London Police.—This force is under the control of a Commissioner, who is appointed by the Mayor, Aldermen and Common Council, subject to the approval of Her Majesty the Queen. The total strength of

the force is 1002, consisting of 1 Assistant-Commissioner, 1 superintendent Executive Department, 1 superintendent Detective Department, 3 chief inspectors, 15 district inspectors, 23 station inspectors, 12 detective inspectors, 74 sergeants, 7 detective sergeants, and 865 constables. In addition to the above, 57 constables are employed on private service duty at the expense of persons engaging their services, the charge being at the rate of £135 per annum for each man. The force has also a surgeon, receiver, chief clerk, and several assistant clerks. The detective department consists of a superintendent, 12 inspectors, 7 sergeants, 12 detective constables, and about 45 plain-clothes constables, who are selected from the uniform branch. The Police area is divided into three districts, each containing two divisions (exclusive of the chief and detective offices) and under the immediate charge of a chief inspector, assisted by five district inspectors and six station inspectors. The Superannuation Fund is provided from the stoppage of 2½ per cent. of the pay of the force, the amount of fines at Police Courts, etc., the balance being provided from the Police rate. The City Police Superannuation Act, '94, provides pensions for members of the Force with 25 years' service irrespective of age. The total cost of the force is about £136,000 per annum, one-fourth of which is paid from the City's cash, the remainder by a rate of 5½d. on the assessable rental of the City. The City Police, unlike the Metropolitan Police Force, is supported entirely by the citizens, without Imperial aid. The pay of the force is considerably in advance of any other similar body in the United Kingdom. The members also enjoy other advantages, perhaps the greatest of which is the scheme for granting pensions to the widows of deceased members of the service. All married men contribute from 4d. to 1s. per week, according to their rank, the balance is made up by grants from the City's cash, the pensions varying from 7s. to 21s. per week. The services of upwards of 200 men are daily required to cope with the enormous and ever-increasing traffic of the City, the most capable men being selected for this dangerous and important duty, for which they receive a small allowance of extra pay. Headquarters, Old Jewry, Cheapside. Chief Clerk and Superintendent, Mr. John Whatley.

The Police of England and Wales (Counties and Boroughs).—See previous eds. for the various Acts from '39 to '56 relating to the appointment of police in counties and boroughs. Important changes were made concerning their control and payment by the Local Government Act 1888. By this statute the powers, duties and liabilities of quarter session and magistrate out of session respecting the county police, are to be exercised and discharged through the standing joint committee of the quarter sessions and county council. In those boroughs (not being county boroughs), which according to the census of '81 had a population of less than 10,000, it is provided by this Act that the power and duties of the watch committee have now ceased and have been transferred to the council of the administrative county which comprises these boroughs. County boroughs, as defined by the Local Government Act, are those cities and towns each of which on June 1st, '88, either

had a population of not less than 50,000 or was a county of itself. To a considerable extent, the system of administration in cities and large towns is based upon that which exists in the Metropolitan police. The cost of the county and borough police is paid from rates levied in counties and boroughs, supplemented by a contribution from the Exchequer or Local Taxation Account of half the cost of pay and clothing of every force certified by the Home Secretary on the report of the Inspector of Constabulary to be efficient. The Local Taxation Account has been provided by the Local Government Act, '88, and consists of the proceeds of the duties on local taxation, licences, and four-fifths parts of one-half of the probate duty payable in certain ascertained proportions to each county and borough in aid of their rates. By the Police Act, '90, equitable provisions were made for payment of pensions for life to all members of county and borough police forces in England and Wales. In certain cases gratuities are paid to them and to their widows and children (see *Metropolitan Police* for further statements under this head, which are substantially applicable to the county and borough police). The pension scales are, as regards the great majority of the forces, the maximum rates mentioned in the Act. In a considerable proportion of counties a limit of age is required, and in some instances as much as sixty years of age is stipulated before pensions are granted. The authorised strength of county and borough police was for the year ended Sept. 29th, '98, 26,102. Out of this number there were 1460 in the Liverpool force, exclusive of 436 of all ranks additionally appointed—viz., 373 for the Docks, 11 for private duty, and 52 for the fire brigade; 1031 in the Manchester force, exclusive of 6 constables appointed at private cost; 700 in the Birmingham force, exclusive of 19 of different ranks appointed at private cost; 491 in the Leeds force; 499 in the Bristol force, exclusive of 15 constables not paid by rates; and 465 in the Sheffield force, exclusive of 10 of different ranks appointed at private cost. All these boroughs and a few other of the more populous towns have a more or less meritable detective police service. Those for Liverpool, Manchester, Birmingham, Leeds, and Bristol appear to be very good.

The Scotch Police.—Several statutes have been passed from an early part of this century for establishing and maintaining police forces in Scotland. The principal Acts under which they are now regulated are those of '57, to render more effectual the police in counties and burghs, and the Act of '62 for making better provision for regulating the police of towns and populous places. The authority of each county force was vested in the Commissioners of Supply, acting through a police committee. By the Local Government (Scotland) Act, '89, this authority has now been transferred to a standing joint committee, consisting of County Councilors, and such Commissioners not exceeding seven of each class. The Sheriff of the county, or one of his substitutes in his absence, is to be an *ex-officio* member of this Committee. It is provided also by the same statute that the administration of the police in any burgh or police burgh, containing a less population than 7000, shall also be transferred to the same authority. The Inspector of Constabulary for Scotland, appointed under the County and

Burghs Police Act, '57, submits a report annually. According to that for the year ended Dec. 31st, '98, the authorised strength of the force is 4774, of which 1730 belong to county forces and 3044 to city and burgh forces. There are also 227 additional police who are privately employed. If these are added, the total in counties will be 1808 and in cities and burghs 3193, giving a grand total of 5001 policemen in Scotland, excluding the Orkney and Shetland Islands. There is a detective staff of 140 officers in 14 county and in 12 city and burgh forces. The staff in the former is 26 and in the latter 114. In addition to these detectives constables in plain clothes frequently assist them. In Edinburgh there is a detective staff of 27, consisting of 1 superintendent, 1 lieutenant, 1 inspector, 3 sergeants, and 21 detective officers. In Glasgow, which has a police force of 1326 members and an estimated population of 725,000, there is a detective staff of 46, consisting of 2 lieutenants, 7 sub-inspectors, and 37 detective officers. The Criminal Registry kept at Edinburgh, Glasgow, Aberdeen, Inverness, Greenock, Dumfries, Dundee, Perth, Stirling, Elgin and Ayr works very satisfactorily in supplying the police with valuable information concerning habitual criminals. The total amount expended for the last financial year for pay and clothing for the whole authorised force was £384,841 15s. 8d. The aggregate cost of the police, excluding the additional police, privately employed and paid for, was £476,390 16s. 10d., which includes rent, taxes, buildings, and all other expenses connected with the police. Towards the cost of pay and clothing £150,000 per annum is distributed out of the Local Taxation (Scotland) Account. This amount is made up of duties of local taxation, licences, and a part of the probate duty. Only those forces, however, are entitled to be aided out of the amount which obtain a certificate from the Secretary for Scotland under the Police Act of '57. A satisfactory system of paying pensions and gratuities has been provided by the Police (Scotland) Act, '90, substantially similar to the system established for the police of England and Wales by another statute passed in the same year.

In his annual report for '97 the Inspector of Constabulary states that he has always been in favour of a General Criminal Investigation Department for Scotland, working from a central office, which would be of the greatest service in the prevention and detection of crime.

Royal Irish Constabulary.—This is a semi-military force, consisting of 11,200 members, who are drilled and disciplined as soldiers, live in barracks, and are armed with rifles, swords, bayonets, and revolvers. In quelling disturbances they are frequently required to act in large bodies in the double capacity of policemen and soldiers, but upon all their ordinary duties they are, like the men of other police forces, armed with a truncheon only. As at present constituted, the Irish Constabulary force was established by Act of Parliament in '36. It has undergone several changes and additions to its strength by subsequent statutes. In '67 the title of Royal Irish Constabulary was conferred on the force by command of Her Majesty. The City of Dublin and its suburbs are protected by the Dublin Metropolitan Police, and the Royal Irish

Constabulary perform police duties for the remainder of Ireland. This force is directly under the Irish Government, and the Parliamentary responsibility is in the Chief Secretary for Ireland. The principal officer of the Constabulary is the Inspector-General, resident in Dublin, and who is assisted by a Deputy Inspector-General and three Assistant Inspectors-General. Each county or riding is under the immediate charge of a county inspector. A certain number of districts are allotted in every county, with a district inspector in charge of each. The members of the force subordinate to the district inspectors are head constables, sergeants, acting-sergeants, and constables. The duties of this imperial constabulary consist of the following among other numerous civil services not imposed upon police forces in the United Kingdom: viz., collecting agricultural statistics yearly; taking the census decennially; acting as auctioneers for sale of distress; acting as inspectors of weights and measures; the performance of Custom officers' duties for the prevention of smuggling, and of Excise duties to prevent illicit distillation. A Reserve Force in Dublin was established in '39 for duty, when required, in any part of Ireland. Its authorised strength consists of 4 district inspectors, 8 head constables, and 400 sergeants, acting-sergeants and constables. The headquarters of this body is at the depot in Phoenix Park. This is also the place for recruiting and the professional education of all members of the Constabulary. Recruits must be unmarried, at least 5 ft. 9 in. in height, and between 19 and 27 years of age. The chief officer in command is called the Commandant of the Depot, and is one of the Assistant Inspectors-General. A separate extra force was established by Act of Parliament for Belfast in '65, with an inspector in charge now styled Commissioner of Police, whose salary and half the cost of the extra men was to be paid for by that borough. In '70 a small additional force was appointed to Londonderry, the cost of which was to be defrayed in the same manner. Civil Service examinations are held, where candidates nominated by the Chief Secretary for Ireland compete for cadetships in the force. The vacancies for district inspectors are filled in fixed proportions by cadets or by specially selected head constables of exceptional merit. Candidates for cadetships must be unmarried, at least 5 ft. 8 in. in height, and between 21 and 26 years of age. The Royal Irish Constabulary is the only police force in the United Kingdom which is almost entirely supported from the Imperial funds; the remainder of the cost is met by the comparatively small payments made in various districts when special services of the Constabulary are necessary. An equitable pension system, which has varied very much from time to time, has been established by statute law. Special provisions have also been made for men who are incapacitated from injuries received in the discharge of their duty. Pensions and gratuities are also payable to the widows and children of head constables and other subordinate members of the force who die while serving therein. Payment of gratuities is also authorised to the widows and children of pensioners who die within one year after their superannuation commences.

Dublin Metropolitan Police.—In 1808 Dublin was formed into a district called

the "Police District of Dublin Metropolis." After several changes the police system of this city was in '36 reorganised upon the basis, in a great measure, of the Metropolitan Police Force, as established by Sir Robert Peel's Act of '29. After other statutes had passed for the amendment of the Dublin police it was further assimilated to the Metropolitan Police, and has since continued to be worked as far as practicable on the same lines. The Dublin Metropolitan Police is under the immediate direction of a Commissioner and an Assistant Commissioner, and the offices of Receiver and Secretary are consolidated. The Commissioner submits an annual report to the Chief Secretary for Ireland, accompanied by statistical tables respecting the work of the police, the state of crime, and particulars concerning public and refreshment houses, drunkenness, and hackney carriages. When the duties of the Dublin Metropolitan Police commenced in '38, it consisted of 911 officers and men. At the end of '98 the effective strength of the force was 1166 of all ranks, consisting of 7 superintendents, 24 inspectors, 34 station sergeants, 143 sergeants, and 958 constables. An excellent detective staff exists in the force for the prevention and detection of crime, headed by a superintendent and other officers. The area of the Dublin Metropolitan district is 32·15 square miles, and the population, according to the census of '91, is 352,277. The expenditure of the force for the year ending March 31st, '98, for the Dublin Metropolitan Police Courts and police establishment, was £148,089, of which £52,136 was received as appropriations in aid from local sources, and the balance from the Imperial Treasury. Pensions and gratuities are provided for the force by an Act of Parliament passed in '83.

POLITICAL PARTIES OF THE UNITED KINGDOM.

In the first years of the Parliament of 1868 only two parties were known to the House of Commons—(1) Conservatives, and (2) Liberals, the latter being subdivided into Whigs and Radicals. Irish members who were not Conservative were classed as Liberal, though they occasionally asserted their independence. The Home Rule movement was started in Dublin by the late Mr. Butt in '70, and soon gained considerable support. At the general election of '74, 56 Home Rulers were returned by Irish constituencies, and in '80 the number rose to 63. Almost from the first the party consisted of a moderate and a more forward section, and this division was maintained in the Parliament of '80, the one section giving a general support to the Liberal party, while the second and larger half acted independently of, and in the main hostile to, them under the leadership of Mr. Parnell. At the general election of '85 the moderates disappeared, and Mr. Parnell led a party numbering in all 86. In the spring of '86 Mr. Gladstone, up to that time the acknowledged head of the whole Liberal party, declared himself in favour of Irish Home Rule, and united his forces, or so many of them as he could carry with him in his new departure, with those of the Irish Nationalists led by Mr. Parnell. A considerable minority of Liberals, resenting Mr. Gladstone's action, declined to continue their support, and combined with the Conservatives to form that

Unionist majority which succeeded in defeating the Home Rule Bill. An appeal to the country followed, and in Aug. '86 a new Parliament met, consisting of 85 (afterwards 86) Nationalists or Parnellites, 192 Gladstonians, 77 Liberal Unionists, and 316 Conservatives.

The Conservatives, with the support of the Liberal Unionists, then carried on the government of the country for six years. The Liberal Unionists, although cordially working with and supporting the Conservative Government, retained their independence, and formed themselves, indeed, into a separate party, with a separate organisation, separate leaders, and separate whips. The only Unionist to take office was Mr. Goschen, who, at the greatest crisis in the history of Lord Salisbury's Government, accepted the post (which Lord R. Churchill had resigned) of Chancellor of the Exchequer. Attempts were made to compose the difference between the Gladstonians and Unionists, notably at the famous Round Table Conference, but all failed. In opposition the relations between Mr. Gladstone and the Nationalists were, after he had accepted Home Rule, most cordial. The even course of events was, however, naturally disturbed by the decree made in the Divorce Court proceedings instituted against Mr. Parnell. The result of the memorable discussions in "No. 15" was that 54 Nationalists revolted against his leadership, and 30 remained faithful to him as the exponent of a Home Rule scheme more advanced or complete than, according to his declarations, Mr. Gladstone was prepared to propose. Mr. Parnell died in '91, and Mr. John Redmond became the exponent of his policy and the leader of his following.

The General Election in '92 resulted in the return of 72 Nationalists, 9 Parnellites, 275 Gladstonian Liberals, 46 Liberal Unionists, and 268 Conservatives. From the point of view of party combination the Ministerialists found upon the whole little to complain of during the famous and protracted Home Rule Bill session of '93. Contrary to the expectation of some members of the Opposition, the Liberal and Nationalist alliance held together wonderfully well. In '94 Mr. Gladstone resigned, and Lord Rosebery succeeded to the premiership. Mr. Labouchere, however, and a number of Radicals acting with him, strongly objected to the appointment of a peer as Premier, and urged the claims of Sir William Harcourt to the position. The effect of their opposition, though not noticeable at the time, was seen later. On June 21st the Government were defeated on the ammunition question in committee on Army Estimates; and on the 22nd Lord Rosebery placed his resignation in the hands of the Queen, by whom it was accepted. Lord Salisbury was sent for, and duly formed an administration. His cabinet, as ultimately constituted, consisted of no less than nineteen members, of whom fifteen were Conservative, including Mr. Goschen (who in '93 was announced to be a member of the Carlton) and four Unionists. The latter wing of the Coalition Party also received such a share of the minor appointments as caused no little heart-burning in many Conservative breasts. The dissolution of '95 which followed was notable for one thing, in that it marked the disappearance of Mr. Gladstone from Parliamentary life.

The General Election of '95 resulted in giving the Unionist coalition a majority of 152, the

biggest majority of modern times, instead of a minority of 28. There were 340 Conservatives, 71 Liberal Unionists, 177 Liberals, 70 Nationalists and 12 Parnellites returned. Sharp differences of opinion in the ranks of the Irish party were more than once made manifest in the course of the session. The reverses of the general election left Lord Rosebery leader of the Liberal party, and leader of the Opposition in the House of Lords, Sir William Harcourt being leader of the Opposition in the Commons; and these positions they respectively continued to fill during the session of '96. Very little of note occurred in the House of Lords, but Sir William Harcourt led the Liberal Opposition in the Commons with especial brilliancy and success in the debates on the Education Bill and the Agricultural Rates Act. On Oct. 6th, '96, in the midst of the agitation arising out of the Armenian atrocities, Lord Rosebery resigned the leadership of the party.

During '97 but little change occurred in the mutual relations of the parties in Parliament, or in the internal condition of the parties themselves. Political antagonism was allowed to fall into abeyance during the outburst of patriotic feeling evoked by the Diamond Jubilee; the business in both Houses of Parliament was got through as rapidly and with as little party contention as possible. The two most contentious items were the Workmen's Compensation Act and the Voluntary Schools Act. During the excitement consequent upon the state of affairs in Greece, a section of the Liberals—conspicuous among them being Mr. George Russell—formed a Forward Party advocating a more determined attitude against Turkey on the part of Great Britain.

During '98 the criticism of the Government, which is supposed to be the prerogative, if not the duty, of the Opposition, was performed very largely by the Government's own supporters, notably in the press. The course of affairs, in China in particular, provoked the disapprobation of many Conservatives, and the Liberals were not slow to take advantage of their opportunities. The details were given fully in the article *SESSION*, ed. '99. Later in the year—which all through was characterised by the overwhelming interest of foreign affairs—politicians of all parties patriotically rallied to the support of the Government in regard to the situation in the Upper Nile Valley, and the dispute which arose thereupon; and the Government were somewhat rehabilitated by the firm stand which they made on this question. In Dec. '98, Sir William Harcourt, in a letter to Mr. John Morley, announced, in view of discussions as to the future leadership of the Liberal party which were then in the air, that his resolution was fixed to undertake no responsibility and to occupy no position, the duties of which it was made impossible for him to fulfil. He went on, after describing the course of events, so far as the Liberal party was concerned, from '93 to the time of writing, as follows:—"A party rent by sectional disputes and personal interests is one which no man can consent to lead, either with credit to himself or advantage to the country. You and my other colleagues know well the desire I have ever felt, and the efforts I have made, to secure unity of action in the promotion of the common cause; to reconcile differences of opinion where they might arise;

and to consult the sentiments and the feelings of those with whom it was my duty and my satisfaction to act. In this spirit of cordial co-operation, which I gratefully acknowledge, we have ever since the dissolution carried on the work of the party. It has been whispered by men who neither know nor care to know the truth that I have allowed personal considerations to influence public action. No man knows better than yourself the falsehood of these unworthy insinuations. If personal proscriptions have been insisted upon, as a ground for refusal of common action in the general cause, they have not proceeded from me. In my opinion such pretensions are intolerable, and, in common with my colleagues, I have always refused to recognise them. I am not, and I shall not consent to be, a candidate for any contested position. I will be no party to such a degradation in the tone of public life in this country. I have been content to the best of my ability, in any situation which fell to my lot, to do my duty towards the party which it has been my pride and my pleasure to serve. If I have arrived at the conclusion that I can best discharge that duty in an independent position in the House of Commons, you will, I feel sure, agree that a disputed leadership beset by distracted sections and conflicting interests is an impossible situation, and a release from vain and onerous obligations will come to me as a welcome relief. I shall be glad if you will make this letter known at once in such a manner as you may think fit, in order to remove any misapprehension as to my personal sentiments and position." Mr. Morley, in reply, paid a high tribute to Sir William Harcourt's conduct of the leadership of the Opposition since '95, and concluded thus:—"I know well enough, as you say, that there have been whispers about your singling out this personage or that as men with whom you would not co-operate. I also know how baseless these stories are; how precisely the reverse of the truth they are; how certain it is to anybody in accurate possession of the facts that it was not from you, at any rate, that attempts at proscription, as you call it, have proceeded. You and I have not always agreed in every point of tactics or of policy since you have been the working leader of the Liberal party. For Government and Opposition alike the times have been difficult and perplexing, and diversity of view on sudden issues was not on either side of the House unnatural. But I am confident that every colleague we have, who has shared our party counsels since the disaster of '95, will join me in recognising the patience, the persistency, and the skill with which you have laboured to reconcile such differences of opinion as arose and to promote unity of action among us. We are now asked to dismiss all this from our minds, for no other reason, that I know of, than that you have not been able to work political miracles and to achieve party impossibilities. On the contrary, I for one feel bound to say how entirely I sympathise with the feelings that have drawn this letter from you." The names of Mr. Asquith, Sir Edward Grey, Sir Henry Fowler, and Sir Henry Campbell-Bannerman were all mentioned in connection with the succession to the post of leader of the Liberal party in the House of Commons thus vacated by Sir William Harcourt, but eventually Sir Henry Campbell-Bannerman was chosen, and received the

loyal support of the party throughout the '99 session. Lord Kimberley led the Liberals in the House of Lords. Sir William Harcourt and Mr. Morley both took an active part in the work of the session; but in regard to foreign and imperial policy a distinct difference was to be noted between their attitude and that of the official Liberal party. In regard to the difficulties with the Transvaal in particular this was apparent, and also in regard to Mr. Morley's views on affairs in Egypt and the Soudan. As to the Transvaal, the attitude of the main body of the Liberal Opposition was one of criticism of the method of the negotiations of the Government with the Transvaal, but of hearty support of the measures deemed necessary by the Government for an effective and rapid prosecution of the war. Early in '99 an attempt was made to bring about a conference between the Parnellite party and the Nationalists, but it failed. Another Conference, on Nov. 23rd, '99, appointed a committee to confer with the Parnellites. The state of parties in November is shown under article COMMONS, in the summary table, on page 171.

Political Science, The British Library of. See ECONOMICS AND POLITICAL SCIENCE.

Polytechnic, Regent Street. With the view of further developing the movement on behalf of young men to whom Mr. Quintin Hogg had shown such generosity, he purchased in '80 the old Polytechnic, Regent Street, for £50,000, and converted it into a great technical and recreative school. The institution has been a great success, upwards of 15,000 members and students having attended its classes during the last twelve months. The cost of maintaining it is about £45,000 a year, about £36,000 of which is provided by class fees, etc., and £6000 is contributed from other sources. Previous to '80 the deficit of £9000 was annually made up by Mr. Hogg, who has altogether spent £150,000 upon his scheme. The curriculum embraces over 500 classes weekly in upwards of 80 different subjects, including carpentering, plumbing, metal work, engineering, pottery work, photography, furniture, decorative art, electricity, and numberless other subjects. A Young Women's Institute has also been founded in premises adjoining the Polytechnic, and promises to be as successful as the latter. The Marlborough Rooms, acquired in '92, have been converted into one of the most commodious schools of art in London. Mr. J. E. K. Studd acts as Hon. Secretary, and Mr. R. Mitchell as Director of Education. Continental tours are also a feature of the Institute, over 6000 persons making use of them every year. They include cruises to Norway, visits to the Polytechnic chalets in Switzerland, where a considerable freehold has been purchased, and trips all over the Continent, Baltic, Madeira, etc.

Poor, Aged Deserving. See SESSION, sect. 115.

POOR LAW.

The English Poor Law is contained in a number of statutes, the earliest being that of the 43rd year of Elizabeth, and in innumerable reported cases. The modern system of poor relief was established by the **Poor-Law Amendment Act of 1834**. Under this Act the parishes which had formerly been areas for poor-law purposes were grouped into unions,

a market town being generally taken for the centre. There are about 650 unions in England and Wales, and for each there is a **board of guardians**. In some cases a single parish has a separate board of guardians. The guardians are the local poor-law authority. Their main duty is the care of the poor in their union and the administration of relief; but they have many other duties, such as the enforcement of the Vaccination Acts. By the **Local Government Act, '94**, great changes were made in the constitution of the boards of guardians and the mode of election. Each board of guardians provides a workhouse, in which the poor in their union requiring total relief are maintained. They also give relief to poor persons in their homes where necessary: this is termed "out-door relief," and is given in money, or food, or other necessities. Out-door relief is distributed by the relieving officers. District medical officers are appointed by the guardians, who are required to attend free of charge on poor persons on receipt of an order from the relieving officer. Relief is also given by the guardians in other ways, such as in providing for emigration and apprenticeship; and they are empowered to subscribe to many institutions for the maintenance therein of paupers and the children of paupers. Guardians also have many duties as regards lunatics. The receipt of relief is a disqualification for voting or election at Parliamentary and local elections. A board of guardians employs a large staff of officers, the chief of which are the clerk, the treasurer, medical, vaccination, workhouse, and relieving officers. The workhouse is under the control of a master and matron, has a medical officer attached to it and a special staff of nurses. Boards of guardians are largely controlled by the **Local Government Board** (see **LOCAL GOVERNMENT**), which by its general orders regulates the mode of their election, their procedure, their finance, and their administrative methods, whilst by its special orders it compels observance of the law in particular cases. The accounts of the receipts and expenditure of guardians are strictly audited by auditors of the Local Government Board. The expenses of the guardians and of poor relief generally are defrayed out of poor rates, which are levied by the overseers in each parish. The guardians issue half-yearly precepts to the overseers for the amounts required by them. The poor-rate is levied on houses, buildings, land, and other property, according to a valuation list which is prepared by the overseers of each parish, and after publication is sent to the assessment committee of the guardians, who must hear objections. After altering the list as they think proper, the committee approve and sign it. From the decision of the committee there is an appeal to quarter sessions (see **LOCAL TAXATION** for report of Royal Commission on this subject). Overseers are appointed for each parish by the parish council or meeting, or in urban parishes by the urban district council or the justices. They can give orders for poor relief in cases of sudden and urgent necessity. Boards of guardians receive grants from the county council out of the proceeds of licence and excise duties towards many of their expenses, such as the salaries of officers, maintenance of lunatics, etc. As to the total cost of the relief of the poor, see **POOR RATE STATISTICS, '99**. Other **Poor Law** authorities, who exercise powers

in relation to the relief of the poor, are (1) **The Metropolitan Asylums Board**, who are the managers of the Metropolitan Asylums District, constituted under the Metropolitan Poor Act ('67) for the reception and relief of fever and small-pox patients and the insane poor chargeable to the unions and parishes in the district; (2) **The Managers of two Metropolitan Sick Asylum Districts**, constituted under the same Act; and (3) **The Managers of School Districts** formed under the Poor-Law Amendment Act ('44) for the maintenance of district schools, to which children are sent by certain boards of guardians instead of being maintained in the workhouses. The subject of **Poor-Law Children** has recently received much attention. A somewhat similar system of poor relief exists in Scotland and Ireland, where the central authority is the Local Government Board for Scotland and Ireland respectively. See **OLD AGE PENSIONS**, and **SESSION**, sects. 31 and 90.

POOR RATE STATISTICS, '99.

1. RECEIPTS.

From Part I. of the Local Taxation Returns issued in '99 for the year ended March 25th, '98, it appears that the total amount of **poor rates raised** during the year, including sums received in lieu of poor rates in respect of property in the occupation of the Crown, was £21,410,311. Besides this sum there were receipts in aid as follows:—Sums paid by the Treasury from the Local Taxation Account as grants to Guardians under the Agricultural Rates Act '96, £480,316; other direct receipts from the Treasury to £1178, giving a total from the Treasury of £481,494; sums paid by the County Councils and County Boroughs to Guardians in respect of teachers in Poor-Law schools, registrars of births and deaths, lunatics, costs of officers of Unions, remuneration of medical officers, school fees and other purposes, £1,707,113; sums paid by the London County Council towards the maintenance of indoor paupers, by the relatives or from the property of paupers, from sales of stone, wood, oakum, pigs, etc., rents and dividends, penalties, etc., £961,778; other miscellaneous receipts from local authorities, £44,669. The total receipts from and in aid of the Poor Rate may be summarised as follows:—

Poor Rates raised	£21,410,311
Receipts in aid	3,195,054
Total	£24,605,365

2. EXPENDITURE.

The principal items of the expenditure on the relief of the poor, and purposes connected therewith, were:—

In-maintenance	£2,384,135
Out-relief	2,732,909
Maintenance of lunatics in asylums or licensed houses	1,691,951
Workhouse or other loans repaid	523,172
Interest thereon	315,485
Salaries and rations of officers, and superannuation allowances	1,879,659
Other expenses	1,300,995
Total	£10,828,276

The expenditure on purposes unconnected with the relief of the poor was as follows:—

Payments for county, borough, or police rates	£8,685,478
Payments under the London (Equalisation of Rates) Act '94	245,194
Payments to Highway Boards	65,124
Payments to Burial Boards	124,333
Payments to Rural District Councils for sanitary and highway purposes	1,541,963
Payments to School Boards	1,321,502
Payments to Parish Councils or Parish Meetings	71,994
Payments to Commissioners of Baths and Washhouses	84,601
Payments to Free Library Commissioners	60,820
Payments to Urban District Councils for School Attendance Committee expenses	8,347
Conservators of Commons	8
School Attendance Committee expenses	42,907
Payments on account of the Registration (Births, Deaths, etc.) Acts	96,453
Vaccination fees and expenses	76,676
Parliamentary, municipal, and county registration, and cost of jury lists	209,032
Other expenses	40,020
Total	£12,674,452

The expenditure partly connected with the relief of the poor and also with other purposes was:—

Cost of legal proceedings	£44,725
Valuation expenses under the Union Assessment Committee Acts and the Valuation (Metropolis) Act, '69	136,536
Salaries and superannuation allowances of parochial officers, and other expenses	712,427
Total	£893,698

Miscellaneous payments to other Local Authorities £752 |

The total expenditure amounted to £24,397,168, of which £12,674,452, or more than one-half, was for purposes altogether unconnected with the relief of the poor. Outside the Metropolis the proportion of expenditure for purposes not connected with the relief of the poor was about three-fifths of the total amount of Poor Rates raised. The loans raised by Poor-Law authorities during the year amounted to £1,209,253, and the expenditure out of loans during the year was £1,178,047. The aggregate amount of loans outstanding of Poor-Law authorities at Lady Day '98 was £9,308,378.

3. MISCELLANEOUS STATISTICS.

The gross estimated rental of property in England and Wales liable to contribute to the poor rate in the year ended March 31st, '98, was £206,996,784, and the rateable value £172,065,842. The total number of paupers of all classes in England and Wales in receipt of relief on Jan. 1st, '99, was 821,096, of whom 230,915 were indoor and 590,323 outdoor paupers, plus 142 who received both indoor and outdoor relief. There was a decrease of 873 in the indoor and of 14,984 in the outdoor paupers. The decrease in the total number was 15,817. It was estimated that the proportion of the total number of paupers to the population amounted approximately to 1 in

38. Of the total of 821,382 paupers, 93,357 were insane and 13,366 were vagrants, while of the residue 180,589 were adult males, 318,622 adult females, and 215,304 children under 16 years of age. Of the adults 148,512 males and 250,281 females were not able-bodied.

Pope, The. His Holiness Leo XIII., the 257th Roman Pontiff, son of Count Ludovico Pecci, was b. at Carpineto, 1810. Ed. at the Jesuit Coll. of Viterbo (18-24). Entered the Collegio Romano (24), where he greatly distinguished himself, and proceeded to the College of Noble Ecclesiastics. Having become a Doctor of Laws, he was made by Pope Gregory XVI. Referendary of the Segnatura (37). Took holy orders, and was ordained priest (37) by Cardinal Carlo Odescalchi. The title of "Protonotary Apostolic" was bestowed on him by Pope Gregory, who also appointed him Apostolic delegate in succession at Benevento, Perugia, and Spoleto. Was sent as nuncio to Belgium (43), and created shortly after Archbishop of Damietta; nominated Bishop of Perugia (46); created cardinal (53). Elected Pope Feb. 20th, '78, and took the title of Leo XIII. Among the events of his Holiness's reign may be mentioned the restoration of the hierarchy in Scotland, the contest with Germany, the Kulturkampf, the now famous Falk Laws, and the *rapprochement* with Prince Bismarck. Towards the close of '87 and the beginning of '88 Rome was the centre of great rejoicings, intended to commemorate the 50th year of his Holiness's priesthood. In June '91 he issued an important Encyclical on Labour, which gave rise to much discussion. It is said that the average annual expenses of the Vatican are about £286,400. Of this sum £20,000 are at the Pope's disposal, £28,000 go to the cardinals, £18,400 to poor bishops, £72,000 for administration of apostolic palaces, £40,000 for diplomatic expenses, £60,000 for employés, £48,000 for schools and charities. On the occasion of his episcopal jubilee (Feb. 19th, '93) vast numbers of pilgrims flocked to Rome from all countries. The Pope summoned a conference of the Patriarchs of the Eastern Churches at the Vatican in Oct. '94; and addressed a letter to the English people in April '95, urging them to return to unity with the Church of Rome. The year 1900 will be kept with great solemnity in Rome as a "Holy Year," or year of "Universal Jubilee."

Port Arthur. In March '98 Russia obtained Port Arthur and Ta-lien-wan, with the province of Kwang-tung on the Liao-tong peninsula, on lease from China for the term of twenty-five years, to be extended by mutual agreement. An outlet into the Yellow Sea was thus secured for the Trans-Siberian Railway. The province was put under a Governor-General, subject to the Russian Minister of War, the Governor-General also controlling the Russian Pacific fleet and the Pacific ports. Port Arthur is reserved as a Russian naval port, but Ta-lien-wan is declared a free port for the merchant ships of all nations. A new Russian town, named Dalny, is building in the neighbourhood of Ta-lien-wan. See CHINA (map).

Porto Rico, until '98 a Spanish colony, but then ceded to the United States by the Spanish-American treaty of peace, lies to the east of San Domingo in the West Indies. Its area is about 3688 sq. m., and the pop. 900,000, of whom about 300,000 are negroes and about the same

number mulattoes. The chief towns are: San Juan, pop. 23,414; Ponce, 37,545; and San German, 30,146. The island is mountainous and the climate healthy. The country is generally fertile, and the chief exports are coffee, cacao, sugar, tobacco, and timber. The annual value of the exports is about £3,000,000. In Aug. '99 a hurricane was reported to have caused the death of several hundreds of people, and to have destroyed the homes and belongings of over 100,000 of the inhabitants.

PORTUGAL.

Portugal is a kingdom in the Peninsula in S.W. Europe, under Carlos I. of the House of Braganza. Area (including the Azores and Madeira, which are regarded as an integral part of the kingdom), 36,038 sq. m.; pop. about 5,082,257. Constitution of 1826 (amended in '52, '85, and '95) gives a special moderating power to the king. There are two legislative chambers, the Peers and the Deputies, collectively called the Cortes. By royal decree (Sept. '95) the Chamber of Peers consists of 90 members nominated for life, in addition to the princes of the blood and the twelve bishops of the continental dioceses. The nominated peers may be selected without limitation as to class, but certain restrictions and disqualifications are imposed. The elective portion of the Chamber was put an end to. The second Chamber, under a decree published in March '95, is composed of members elected under a system of universal suffrage every four years, to the number of 146, of whom 6 are elected by Portuguese colonies. The king has no veto on a law that has been twice passed by both houses. The State religion is Roman Catholic, but all others are tolerated. Education, though nominally compulsory, is in a very backward state. The capital, Lisbon, has a pop. of 301,206; and Oporto has a pop. of 138,860. Chief exports: wine, cork, cattle, fish, and copper. There are 1464 miles of railway. Revenue, '98 (milreis at 3s. 0d.), £8,085,000; expenditure, £8,054,375; imports, '97, £6,229,585; exports, £4,517,187. Public debt, '99, £127,000,000. See COLONIES, ETC., of EUROPEAN POWERS, DIPLOMATIC, FOREIGN ARMIES and FOREIGN NAVIES.

Political Parties. The legislature of Portugal is the Cortes Geraes, consisting of two houses, the *Camara dos Pares* and the *Camara dos Deputados*. The deputies are divided roughly into *Conservatives* (also called *Regeneradores*), led by Senhor Serpa Pimentel, *Progressists* (or *Liberals*), *Independents*, and *Republicans*. In '93 another party, the *Miguelistas*, or supporters of Dom Miguel, a pretender to the throne, who was at the time living in Austria, showed renewed activity, and began to press their leader's claims on the people. The general elections in recent years have all resulted in triumphs for the Government, the *Conservatives* being returned with large majorities.

History, '99. Several cases of bubonic plague were discovered in Oporto during August, and officially notified. The infection was apparently carried in goods brought from Bombay. See MEDICAL SUMMARY, '99. The Ministerialists gained a decisive victory at the general election (Nov. 26th).

Portugal, King of. See CARLOS I.

Positivism. The philosophical and religious system of Auguste Comte (1798—1857). The chief

principles of the former side of the system are: (1) The classification of the sciences in hierarchical order, proceeding from the simpler to the more complex, as follows: mathematics, astronomy, physics, chemistry, biology, sociology, morals; and (2) The doctrine of the "three stages" through which the human mind has to pass in the investigation of phenomena: the theological or personifying, the metaphysical or abstract, and the positive or scientific. The religious side of Positivism consists in the cultus of Humanity considered as a corporate being in its past, present, and future. The "positive philosophy" is its theoretical or doctrinal basis, corresponding to the theology of the supernatural religions; but besides this, it consists in a worship requiring for its full development an organised priesthood, temples, etc. Under the "life" or *régime* of positive religion Comte would include the political and social side of his system. The former involves the establishment of an international republic, consisting of the five great nations of Western Europe, which is ultimately destined to lead the whole world; the latter the reorganisation of society on the basis of a double direction—that of the temporal or material authority and that of the spiritual or educating body. Positivism as a religion has achieved some success since Comte's death. In Paris it possesses a periodical, the *Revue Occidentale*, and Comte's apartments, at 10, Rue Monsieur le Prince, are kept as a place of meeting. Other groups exist in other cities of France, or the Continent, of America, both North and South, and in five or six cities in England. In London the principal places of meeting are Newton Hall, Fetter Lane, E.C.; and Chapel Street, W.C. In both of these halls the various Positivist publications may be obtained. In London, also, the *Positivist Review*, edited by Professor Beesly, is issued monthly.

Postmaster-General. The Parliamentary head of the Post Office. His Grace the Duke of Norfolk at present occupies that position. See next article.

POSTAL AND TELEGRAPHIC INFORMATION.

Inland Letter Post.

This includes places in the United Kingdom, Isle of Man, the Orkney, Shetland, Scilly, and Channel Islands. The prepaid rate of postage is as follows:—

Not exceeding 4 oz. 1d.

For every additional 2 oz. ½d.

A letter posted unpaid is chargeable on delivery with double postage; if insufficiently paid, with double the deficiency. No letter may exceed 2 ft. in length, 1 ft. in width, or 1 ft. in depth, unless it be sent from a Government office. No letter is entitled to pass without prepayment of postage unless it is sent exclusively upon the public business. Letters upon public business may be sent to members of the Government at their respective departments, but not elsewhere.

Letters may not be sent in open envelopes. A certain number of persons seem to imagine that if envelopes are left unfastened, letters may be enclosed in them and sent for a postage of ½d. only. It is desirable, therefore, to point out that the minimum postage upon all written letters (which are not written on postcards) is 1d., whether they be opened or closed, and that

all letters posted contrary to this rule are liable to an additional charge of double the deficient postage on delivery.

Registration and Compensation. The ordinary registration fee for each inland letter or other postal packet is *2d.*, which secures compensation against loss or damage up to *£5*. Compensation above *£5* and up to *£120* can be secured upon payment of fees named below:—For *£10*, *3d.*; *£20*, *4d.*; *£30*, *5d.*; *£40*, *6d.*; *£50*, *7d.*; *£60*, *8d.*; *£70*, *9d.*; *£80*, *10d.*; *£90*, *11d.*; *£100*, *1s.*; *£110*, *1s. 1d.*; *£120*, *1s. 2d.* Every article registered must be handed to an agent of the Post Office and a receipt obtained for it bearing an acknowledgment that the fee has been obtained. It must on no account be dropped into a letter box. The sender of an inland registered article can obtain an acknowledgment of delivery of same by paying in advance a fee of *2d.* in addition to the registration fee and postage.

Re-direction. Letters (also book packets, postcards and newspapers) are not liable to additional postage for re-direction, whether re-directed by the post office authorities or by an agent of the addressee after delivery, provided in the latter case that the letters, etc., are re-posted not later than the day (Sundays and public holidays not being counted) after delivery, and that they have not been opened. Re-directed letters, etc., which are re-posted later than the day after delivery will be liable to charge at the prepaid rate. Any which appear to have been opened or tampered with will be chargeable as freshly posted unpaid letters or packets. Whenever it may be deemed necessary, a receipt may be required from the addressee of a re-directed letter or packet at the second address.

Express Delivery Service. Letters and parcels are delivered by a special messenger from any postal telegraph office, and must be handed in at one of these offices. The scale of charge is (not exceeding one mile) *3d.* Any article weighing over *1 lb.* is charged *1d.* per *lb.* in addition to express fee—maximum charge, *1s.* If the sender desires a special conveyance to be used, the actual cost of same must be prepaid in addition to express fee, but no weight charge is then made. If the distance exceeds two miles, and a public conveyance is not available, or if the packet or packets exceed *20 lbs.* (or *15 lbs.* if a public conveyance be not available), the actual cost of a public conveyance must be paid. Hours of posting on week-days are the hours during which the office is open for telegraph delivery, generally from *8 a.m.* to *8 p.m.* There is no express delivery on Sundays, Good Friday, or Christmas Day. Letters can be delivered by express delivery, after transmission by post, from the post office of destination, and can be posted like ordinary letters, but they must be clearly marked "Express Delivery," and have a thick perpendicular line drawn on each side of the envelope. The fees must be paid in postage stamps affixed to the envelope, at the following rates, in addition to the ordinary postage: For every mile or part thereof from the office of delivery, *3d.* For distances exceeding three miles the cost of a special conveyance must be prepaid in all cases where a public conveyance is not available, in addition to the express fee and postage. The sender is responsible for fee and charges.

Delivery on Sundays—Letters only. Express

mail letters for the London Postal District, received in London on Sunday mornings by the night mails from the provinces or posted in London too late for express delivery on Saturday nights, will be delivered from the General Post Office, provided they are marked with a thick perpendicular line from top to bottom, and with the words "Express Delivery on Sunday," and are properly prepaid.

Private Delivery by Special Messenger. Persons or firms who desire to receive their letters, etc., in advance of the ordinary delivery may have them delivered by special messenger on payment of the following fees: Express fee of *3d.* a mile, and *1d.* for every ten or less number beyond the first. Forms of application for such special delivery can be obtained from any post office from which letters or parcels are delivered.

Letters Conveyed by Railway. Letters not exceeding *4 oz.* in weight, and bearing postage stamps to the value of *1d.* are accepted by all the principal railway companies for transmission to any railway station, at a charge of *2d.* for each letter. On arrival at its destination it is posted by the railway officials in the nearest letter-box for delivery by post in due course by the Post Office. Arrangements can be made to have such letters expressly met and delivered by express messenger, through the Post Office.

Foreign and Colonial Letter Post.

The rate of letter postage to all the British Possessions, with the exception of Afghanistan, Australasia, Bechuanaland, Egypt, Grenada, and Rhodesia, is *1d.* per $\frac{1}{2}$ oz.; to all other places abroad, as well as to the above exceptions, it is *2½d.* per $\frac{1}{2}$ oz.

Official Postcards, with an impressed stamp of *1d.*, can be obtained for transmission abroad. Private postcards of the same size and substance as the official ones are admissible when bearing adhesive stamps to the value of *1d.*, and when the words "Post Card" are printed or written on the address side.

Soldiers' and Seamen's Letters (*i.e.*, non-commissioned officers, private soldiers, and sailors), *1d.* per $\frac{1}{2}$ oz. to all parts.

Registration. The fee is *2d.* for all places abroad. Acknowledgment of delivery can also be obtained of any registered article addressed to any place in the Postal Union upon payment of *2½d.* in addition to postage and registration fee.

Insurance. Letters can be insured against loss to certain foreign countries and colonies not exceeding *£120*.

Despatch of Mails. Mails for Canada are made up every Monday and Wednesday evening and Saturday afternoon; for the United States every Wednesday evening and Saturday afternoon; for India, Ceylon, Australia, and Egypt every Friday evening; for South Africa every Saturday afternoon; for the Continent twice or more daily.

Inland Newspaper Post.

Every registered newspaper, whether posted singly or with others in a packet, is charged at the rate of $\frac{1}{2}$ d. each. A newspaper or packet of newspapers posted unpaid is chargeable on delivery with double postage; if insufficiently prepaid, with double the deficiency. No newspaper or cover of a newspaper may bear anything except names and addresses of sender and addressee, and reference to any page of, or

place in, the newspaper, to which the attention of the addressee is directed. In case of any infringement, the newspaper is charged either as an insufficiently paid letter or is transferred to the parcel post, whichever charge is the lower.

Dimensions. Not to exceed 2 ft. in length or 1 ft. in width or depth, or 5 lbs. in weight.

Inland Book Post.

Prepaid rate } .. $\frac{1}{2}d.$ not exceeding 2 ozs.
of postage f

Articles admissible by book post are sketches, drawings, photographs, engravings, maps, plans, charts, and the following documents, whether containing matter in the nature of a letter or not, provided they respectively conform to the following conditions:—

Invoices, orders for goods, advice notes, way bills, bills of lading, receipts, statements of accounts, prices current, market reports.—But nothing shall appear in writing on the documents save dates, the names and addresses of the parties, the particulars and prices of any goods, or the particulars of any sums of money to which the document relates, and the mode of consignment of any such goods or money. Any matter (other than aforesaid) which may be in the nature of a letter shall be wholly in print, and shall relate exclusively to the subject matter of the document, or the terms on which business is transacted by the person or firm from which the document issues.

Manuscripts for press and printed proofs, with corrections and instructions.—Any written or printed matter not forming part of the document itself must refer solely to the arrangement or correction of the type or the execution of the work.

Examination papers with corrections and instructions.—Any written or printed matter not forming part of the document itself must refer solely to the questions put or the answers thereto.

Circulars, that is, printed notices and printed letters, whether separate or on the same sheet of paper with any other document transmissible by book post.—Nothing shall appear in writing except: (1) Correction of errors in the print; (2) date of despatch, name, address, and description of sender and name of addressee; (3) the place, date and hour, when the circular is a notice of meeting or appointment, and, in the case of a notice of meeting, the objects of the meeting; (4) the name and address of voter and his number on register when circular is a polling card.

A book packet may not exceed 2 ft. in length and 1 ft. in width or depth. No circular which is reproduced from or produced after the fashion or in imitation of a type-written document may be sent as a book packet unless: (a) Such circular is handed in at a head or branch post office (not at a sub-office); (b) at least twenty copies of such circular, precisely identical in all respects, are posted at the same time.

Foreign Newspaper and Book Post.

Newspapers, book packets, and printed papers may be sent at the rate of $\frac{3}{4}d.$ per 2 oz. to all foreign countries and colonies. **Pattern Post** same rate as books, with a minimum of 1d. **Commercial papers** same rate as books, with a minimum of $2\frac{1}{2}d.$ To British Colonies or countries not in the Postal Union the dimen-

sions are 2 ft. in length, 1 ft. in width or depth; greatest weight 5 lbs. To countries in the Postal Union the length is limited to 18 in., and weight to 4 lbs. If in the form of a roll, length 30 in., diameter 4 in.

Inland Parcel Post.

In order that a packet may be sent by parcel post it must be presented at the counter of a post office, and should bear the words "Parcel Post" written in the corner. It is very desirable that every parcel should bear the name and address of the sender on the cover, but in such a position as not to be mistaken for the address of the parcel.

The limits of size and weight are: Greatest length, 3 ft. 6 in.; greatest length and girth combined, 6 ft.; greatest weight, 11 lbs.

The rates of postage are:

Not exceeding 1 lb.	3d.
Exceeding 1 lb. and not exceeding 2 lbs.	4d.
" 2 "	"	"	" 3 "	5d.
" 3 "	"	"	" 4 "	6d.
" 4 "	"	"	" 5 "	7d.
" 5 "	"	"	" 6 "	8d.
" 6 "	"	"	" 7 "	9d.
" 7 "	"	"	" 8 "	10d.
" 8 "	"	"	" 9 "	11d.
" 9 "	"	"	" 11 "	1s.

No packet can be accepted by any officer of the Department for transmission by parcel post unless the postage at the above rate is prepaid. The postage should be paid by means of ordinary adhesive postage stamps. A certificate of posting can be obtained at any post office. Any one bringing a parcel to post who desires to secure compensation without registration should fill up a form of certificate, which the officer in attendance will check, date-stamp, and sign, and hand back to the person presenting it.

Parcels to and from the Channel Islands and Isle of Man. Parcels addressed to and sent from the Channel Islands (Jersey, Guernsey, Alderney, and Sark) are received from the public under the same general conditions with regard to size and weight, and at the same rate of postage as parcels for all other portions of the United Kingdom; but as the Channel Islands, under the Custom laws of the United Kingdom, are practically in the same position as a foreign country, such parcels are liable to Customs examination at the port of arrival, and the sender is required to make a declaration of contents upon a form provided for the purpose, at the office where the parcel may be posted. Parcels for the Isle of Man are treated in the same way as parcels for the United Kingdom generally, and the sender is not called upon to furnish a declaration of contents.

Parcels addressed to Post Offices—Demurrage. Parcels may be addressed "to be called for" to any post office at which letters similarly addressed may be received, and under the same general regulations. A parcel addressed to a post office "to be called for," and such a parcel only, is liable to a charge called "demurrage," at the rate of 1d. for every day or part of a day during which it remains in the office, not counting the day on which the parcel reaches the office or the day subsequent to it.

Re-direction of Parcels. A charge at the full rate of postage originally payable is made for every re-direction of a parcel, unless the original address and the corrected address are in the delivery from the same post office and the

parcel is not at the time of re-direction lying at a returned letter office. In such cases no additional charge is made for re-direction. Parcels, like other postal packets, can only be re-directed by the Department upon receipt of an authority duly signed by the person to whom they are addressed. A re-direction form (in addition to the one used for other postal packets) must be filled in before parcels can be forwarded.

Collection by Rural Postmen. Rural postmen, whether on foot or mounted, are required to accept parcels from the public for despatch wherever they collect letters, subject to the following regulations:—A rural postman on foot shall not accept a greater weight than 11 lbs. from one person; a mounted rural postman is not required to accept a greater weight than 21 lbs. from one person. If a parcel is not registered the Postmaster-General will accept liability up to £2 without payment of any fee, provided that a certificate of posting from the officer accepting the parcel is produced when required. The rules relating to the registration of letters apply also to parcels.

Foreign and Colonial Parcel Post.

Parcel post is in operation to nearly all Colonies and foreign countries. Dates and particulars can be obtained at any post office. The two principal exceptions are the United States of America and Russia, to which the parcel post does not extend.

Money Orders.

Inland. The rates of commission are as follows:—Not exceeding £1, 2d.; £3, 3d.; £10, 4d. Money orders are not payable upon the day of issue. Payment of a money order may be deferred for any number of days not exceeding ten days.

Telegraph Money Orders. Money may be transmitted by telegraph between all Post Offices in the United Kingdom authorised to transact telegraph and money order business. Ordinary hours of business 8 a.m. to 8 p.m., week-days only. The rates of commission are: For sums not exceeding £3, 4d.; £10, 6d. In addition to the commission a charge is made at the ordinary rate for the official telegram authorising payment at the office of payment, the minimum charge being 6d. The remitter of a telegraph money order is required to state whether the order is to be delivered at the payer's address or to be called for at the office of payment.

Foreign and Colonial. Money orders are exchanged with nearly every foreign country and the Colonies. The rates of commission are: Not exceeding £2, 6d.; £6, 1s.; £10, 1s. 6d.

Telegraph Money Orders are also exchanged with Belgium, Germany, and Holland. The rates of commission are the same as ordinary money orders, with an additional charge for a telegram of advice at the ordinary rate, viz., 2d. per word, and a supplementary fee of 2d. for each order.

Postal Orders.

Postal orders can be obtained for the following amounts on payment of the equivalent poundage:—1s. and 1s. 6d., $\frac{1}{2}$ d.; 2s. to 10s. 6d., 1d.; 15s. to 20s., $\frac{1}{2}$ d. Postal orders are payable any time within three months after the last day of the month of issue. Payment of a postal order may be deferred for any number of days not exceeding ten, by writing such a request on the face thereof.

Savings Bank.

Any sum, from 1s. upwards (excluding pence) is accepted as a deposit, subject to the following limits:—£50 in one year, and £200 in all, including interest.

Withdrawals can be made from the Savings Bank by forwarding to the Controller a form known as "A Notice of Withdrawal," duly filled up, which can be obtained at any money order office. A notice of one clear day is required. Withdrawals can also be effected by telegraph at a minimum cost of 1s. 3d. Government annuities and life insurances can be purchased through the Post Office. The requisite forms can be obtained at any money order office.

Telegraphs.

Inland. The charge is 6d. for twelve words, and $\frac{1}{2}$ d. for every additional word. Addresses are charged for. Telegrams are delivered free within three miles from the delivering office. When the address is beyond the free delivery a charge of 3d. per mile, or part of a mile, is made. The usual hours of attendance at telegraph offices are: On week-days from 8 a.m. to 8 p.m., and Sundays, 8 a.m. to 10 a.m. At large offices these hours are extended.

Foreign. The charges vary from 2d. per word to Belgium, France, Germany, and Holland; 3d. per word to Italy, Switzerland, Austria, and Norway; $\frac{3}{2}$ d. to Spain, Sweden, and Portugal; 4d. per word to Roumania and Servia; $\frac{1}{2}$ d. to Bulgaria; $\frac{5}{8}$ d. to Russia; 6d. to Malta; $\frac{6}{8}$ d. to Turkey and Greece; 1s. to 1s. 6d. to Canada and United States; 3s. 8d. and 4s. to India; 4s. 7d. and upwards to Australasia.

Poynter, Sir E. J., was b. in Paris in 1836, and is the son of Mr. Ambrose Poynter, an architect. He was ed. at Westminster School and Ipswich Grammar School, and studied art in English schools, and at Paris under Gleyre '56-9. He was elected an Associate of the Royal Academy in '69, and an Academician in '76. In '71 he became a member of the Belgian Water Colour Society, and in the same year and again in '73 was appointed Slade Professor of Art at University College, London. He was Director for Art and Principal of the National Art Training School at South Kensington for some years, and in '94 was appointed Director of the National Gallery. In '96, on the death of Sir John Millais, he was elected to the Presidency of the Royal Academy. His best known pictures are "Israel in Egypt" '67, "Perseus and Andromeda" ('72), "Atalanta's Race" ('76), "The Fortune Teller" ('77), "The Meeting of Solomon and the Queen of Sheba" ('91). He is known not only for his pictures, but as the author of "Ten Lectures on Art" ('79), and as one of the designers of the new coinage issued in '94. Knighted '97.

Preceptors, College of. Established 1846, incorporated by royal charter, '49, "for the purpose of promoting sound learning and of advancing the interests of education, especially among the middle classes, by affording facilities to the teacher for acquiring a knowledge of his profession, and by providing for the periodical session of a competent Board of Examiners to ascertain and give certificates of the acquirements and fitness for their office of persons engaged or desiring to be engaged in the education of youth." Under the powers conferred by the charter, the Council have established schemes of examination. (1) For teachers,

to ascertain their qualifications and fitness to take part in the work of instruction; (2) for pupils, to test their progress, and to afford at once to the teacher and to the public a satisfactory criterion of the value of the instruction they receive. The diplomas granted by the College to teachers are of three grades—**Associate, Licentiate, and Fellow**; and a distinctive feature of the examinations is, that in all cases the theory and practice of education is an obligatory subject for each grade. In '98 the number of candidates examined for certificates was about 16,000. Visiting examiners are also appointed by the College for the inspection and examination of public and private schools. In '73 the Council of the College instituted a **Professorship** (the first established in this country) of the **Science and Art of Education**; and regular courses of lectures for teachers are delivered in the College lecture-hall. The new buildings were opened by H.R.H. the Prince of Wales, March 30th, '87. **Offices**, Bloomsbury Square. **Organ, Educational Times**. **Secretary**, C. R. Hodgson, B.A.

Presbyterianism is church government by presbyters (or elders), and by them only. The Session of a Presbyterian Church consists of the ordained ruling elders, and the pastor or teaching elder of the church, who always presides when present. In case of a church being vacant the pastor of some other church within the bounds of the presbytery is chosen moderator *ad interim*. The **Presbytery** consists of the pastors of churches, and a ruling elder from each congregation within prescribed boundaries. (In the United Presbyterian Church, and in the Presbyterian Church of England, congregations having more than 250 communicants are entitled to send two ruling elders to the Presbytery.) The **Synod** consists of presbyteries within a larger area; and the **General Assembly**, where the size of the church renders one necessary, takes in the whole church, and consists either of the pastors of all the churches, together with a ruling elder from each congregation, or representatives chosen from amongst both pastors and ruling elders. The standards of the Presbyterian Churches are the Westminster Confession of Faith, with the Catechisms, Larger and Shorter. The United Presbyterian Church in Scotland, and some others, receive these with an explanation, especially in respect to Chapter XXIII. of the "Confession." The United Presbyterian Church has adopted a Declaratory Statement in regard to its relation to the "Confession." The Presbyterian Church of England has adopted a similar document together with XXIV. brief "**Articles of the Faith**." See CHURCH OF SCOTLAND, CHURCH IN IRELAND, PRESBYTERIAN CHURCH OF ENGLAND, and WELSH PRESBYTERIAN CHURCH.

Presbyterian Church of England. The revival of Presbyterianism in England in the earlier portion of the present century was due to influence on English Presbyterianism, on the one hand of the Evangelical movement in the Established Church of Scotland which led up to the Disruption, and on the other of the consolidation of the dissenting Presbyterianism of Scotland which led up to the formation of the United Presbyterian Synod in '46. The English section of that Synod united with the older Presbyterian body in England in '76, so forming the Presbyterian Church of England. Of the present congregations 28 trace back their

existence to the seventeenth century, 42 to the eighteenth century, while the remaining 244 have been established within the present century.—**Statistics.** The Church consists of 314 fully organised congregations and 16 preaching stations, providing accommodation for 162,044 persons. Several churches are in course of rebuilding, and consequently their sittings cannot be given. A large number of fully equipped mission stations also exist in connection with town congregations, and these have an average attendance of about 12,000 persons. The number of ministers, including professors, is 328, with 20 ordained and 12 medical missionaries in the foreign field, besides 3 missionary teachers and 25 lady missionaries. There are also 19 licentiates, and about 30 theological students preparing for the ministry. The College has been transferred from London to Cambridge. Its new name is "**Westminster College**." Including the site, it has cost nearly £50,000, and was opened in Oct. '99, free of debt. The property of the Church is estimated at £1,842,532, exclusive of sundry investments for the endowment of the College and scholarships, and for the Sustentation Fund and other schemes of the Church, of the College itself, and of buildings for mission work abroad. The total income of the Church in '98 was £279,151. The backbone of the Church finance is the Sustentation Fund, which since '78 has secured for the body of the ministers, excluding a limited number under special arrangements, a minimum stipend of £200. Under this scheme 94 congregations were aid-receiving in '98 to the amount of £5940 18s. 7d., as against 103 in '78 to the amount of £6443 7s. 6d., the average amount of aid required being at date £63 4s. per congregation, as against £62 10s. in '78. A new Church Building and Debt Extinction Fund was inaugurated by the Synod of '95. The amount contemplated is £50,000, payable over five years, and nearly £34,000 has already been subscribed. The Rev. John Bogue, M.A., is organising secretary of this Fund. **General Secretary**, Rev. J. Thoburn McGaw, M.A., D.D., 7, East India Avenue, Leadenhall St., E.C. : **Financial Secretary**, Mr. John Leggat.

Prime Minister, The, is he who at the summons of the sovereign has succeeded in forming an administration, of which he is the head. Although each member of the Cabinet administers his own department independently of his colleagues, all important departmental matters are submitted to him, the most important being brought before the whole Cabinet, and no appointment of moment is made or recommended to the Crown without his knowledge and concurrence. His own **patronage** is very extensive. In forming an administration, he selects all those who are to fill the various offices, though the appointments are subject to the sovereign's approval. It is upon his advice that as vacancies occur the archbishops, bishops and deans and the highest judges are appointed, and over one hundred **Crown livings** are filled; and upon his recommendation that the most envied temporal titles and honourable distinctions—peerages, baronetcies, and the Garter, for example—are conferred, and such high appointments as the Lord-Lieutenancy of Ireland, the Viceroyalty of India, the principal ambassadorships and colonial governorships, and the lord-lieutenancies of counties, are made by the

Crown. He is the leader of the House of Parliament of which he is a member. Yet as Prime Minister he enjoys no legal precedence over his colleagues, his official existence being indeed not recognised by statute.

Primitive Methodism. See **WESLEYAN METHODIST CHURCHES.**

Primrose League. A league founded in 1883, in support of principles advocated by the late Earl of Beaconsfield, and so called because on the anniversary of his death every member wears a bunch of primroses. The members, who include both sexes, are styled **Knights, Dames, and Associates**, and their branches are called "**Habitations.**" The members of the **Primrose League** took an active part in the last electoral campaign, and exercised considerable influence in favour of the Constitutional-Unionist candidates. The testimony of both candidates and election agents leaves it beyond doubt that the extraordinary development of organised work on the part of the ladies of the **Primrose League** attained a measure of importance and success far greater at the last general election than on any former occasion. **Grand Master**, Marquis of Salisbury, K.G.; **Chairman of Grand Council and Chancellor of the League**, Lord Glenesk. Members enrolled up to Sept. '99 number, including Scotland, 1,494,316, divided among 2372 **Habitations.** **Vice-Chancellor**, George Lane-Fox. **Head Offices:** 64, Victoria Street, S.W. **Official Organ**, *The Primrose League Gazette* (monthly).

Prince Edward Island. A province of the Dominion of Canada. It lies in St. Lawrence Gulf, north of Nova Scotia and between New Brunswick and Cape Breton. **Area**, 2133 sq. m.; **pop.** 109,088. **Capital**, Charlottetown, pop. 11,485. Divided into three counties. **Administered** by a Lieut.-Governor and Executive Council. The people elect a House of Assembly of thirty by manhood suffrage. The Province has four seats in the Dominion Senate and five in the House of Commons. Education is state-aided, free, and compulsory, between the ages of 8 and 13. Entered the Dominion 1873. See **BRITISH EMPIRE** (table) and **CANADA.**

Prison Act '98. The, came into force on Jan. 1st, '99. It makes the Prison Commissioners directors of convict prisons; enables the Secretary of State to make prison rules for the government of local prisons as well as of convict prisons, which are to be laid on the table and are subject to the veto of either House; provides for the appointment of boards of visitors for convict prisons; and enacts that the mode in which sentences of penal servitude or imprisonment with or without hard labour are to be carried out in prison may be regulated by prison rules, and that in making such rules regard shall be had to the sex, age, health, industry, and conduct of the prisoners. Prison rules shall not authorise the infliction of corporal punishment—(a) except in the case of a prisoner under sentence of penal servitude, or convicted of felony, or sentenced to hard labour; nor (b) except for mutiny or incitement to mutiny, or gross personal violence to an officer or servant of the prison; nor (c) except by order of the board of visitors or visiting committee of the prison, after inquiry on oath held by them at a meeting specially summoned for the purpose, and consisting of not less than three persons, two of them being justices of

the peace: provided that the Secretary of State may, if he thinks fit, appoint a metropolitan police magistrate or stipendiary magistrate to take the place of the board or committee, and the magistrate shall in any such case have the same powers as the board or committee. An order under this section shall not be carried into effect until it has been confirmed by the Secretary of State, to whom a copy of the notes of evidence and a report of the sentence and of the grounds on which it was passed shall forthwith be furnished. Such report shall be embodied in the annual report of the Prisons Commissioners. Prisoners not sentenced to penal servitude or hard labour are to be divided into three divisions. Where a person is sentenced to imprisonment without hard labour, the court may, if it thinks fit, having regard to the nature of the offence and the antecedents of the offender, direct that he be treated as an offender of the first division or as an offender of the second division, though if no direction is given the offender is to be treated as an offender of the third division. But any person imprisoned for default in payment of a debt, including a civil debt recoverable summarily, or in default or in lieu of distress to satisfy a sum of money adjudged to be paid by order of a court of summary jurisdiction, when the imprisonment is to be without hard labour, is to be placed in a separate division and treated under special prison rules, and is not to be placed in association with criminal prisoners, nor to be compelled to wear prison dress unless his own clothing is unfit for use. Any person imprisoned for default of entering into a recognisance or finding sureties for keeping the peace, or for being of good behaviour, is to be treated under the same rules as an offender of the second division, unless he is a convicted prisoner, or unless the court direct that he be treated under the same rules as an offender of the first division. Provision may be made by prison rules for enabling a prisoner sentenced to imprisonment, whether by one sentence or cumulative sentences for a period prescribed by the rules, to earn by special industry and good conduct a remission of a portion of his imprisonment, and on his discharge his sentence shall be deemed to have expired. Under sect. 9, where a person is committed to prison for non-payment of a sum adjudged to be paid by the conviction of any court of summary jurisdiction, then, on payment to the governor of the prison, under conditions prescribed by prison rules, of any sum in part satisfaction of the sum so adjudged to be paid, and of any charges for which the prisoner is liable, the term of imprisonment shall be reduced by a number of days bearing as nearly as possible the same proportion to the total number of days for which the prisoner is sentenced as the sum so paid bears to the sum for which he is so liable.

PRISON STATISTICS (ENGLAND AND WALES).

Nearly all the essential information which has been published on this subject appears to be comprised in Part I. of the **Judicial Statistics for '97**: the Reports of the Commissioners of Prisons and the Directors of Convict Prisons for the last three years, and the reports on the operations of Discharged Prisoners' Aid Societies.

Local Prisons.

The number of prisoners received in such prisons during '97-8 and '98-9 were :—

	'97-8.	'98-9.
Under sentence of ordinary courts	153,905	160,059
Soldiers and sailors sentenced by courts-martial	1,077	1,394
Debtors or on civil process . .	10,756	10,873
In default of sureties	1,776	1,673
	167,574	173,999

The population of these prisons on March 31st, '99, was 14,156, as against 14,021 at the corresponding period of the previous year. The average daily population in '98-9 was 14,957, of which 12,285 were males and 2672 were females. In the previous year such population consisted of 14,225—viz., 11,675 males and 2550 females. The average population of local or short-sentenced prisoners was consequently higher by 732 in '98-9 than in the preceding year. As regards the increase or decrease of crime, both absolutely and relatively to the population, the following statement is an index to the number committed to prison and the number committed relative to population since '85 :—

Yearly Average Number of Persons imprisoned in England and Wales.	On Indictment.		On Summary Conviction.	
	Actual Number.	Number per 100,000 of Population of England and Wales.	Actual Number.	Number per 100,000 of Population of England and Wales.
During 5 years ended March 31st, '85	9,962	37'8	149,046	566'4
" " " " '90	9,126	32'7	140,722	505'6
" " " " '95	8,253	28'0	137,291	467'1
" year ended March 31st, '96	7,933	26'1	146,019	480'4
" " " " '97	7,386	24'0	140,727	458'1
" " " " '98	8,044	25'7	145,901	470'0
" " " " '99	8,315	26'4	151,744	483'3
Decrease per cent.	16'5	30'1	—	14'6
Increase "	—	—	1'8	—

It is also important to consider that many new offences have been created recently, and there has been a material extension of the powers of dealing with other offences, and also greater activity by the police and local authorities in prosecuting. This fact is well notified by statistics showing the increase that has taken place in the number of convictions during the last ten years for certain offences of a quasi-criminal kind, including adulteration of food and drugs, cruelty to animals, offences against the Diseases of Animals Act, and in relation to dogs; offences against Highway Acts; offences against the Factory Acts, police regulations, local bye-laws, etc., and against gaming; incorrigible rogues, and "other offences" under the Vagrancy Acts.

The prisoners discharged under the First Offenders Act '87, and the Summary Jurisdiction Act '79, in cases which came before Courts of Summary Jurisdiction, were no less than 45,258 in '97. The new rules for the treatment of juvenile offenders are now in full operation, and are working well. The Governor of Bedford Prison, in a report about two years ago, stated that: "As a result of these rules being carefully applied, strict discipline combined with discretion and kindness and constant employment, it is proved beyond doubt that the imprisonment of these lads has a most salutary effect, which is only realised by a comparison, both as regards their moral and physical state, on reception with their condition on discharge." The Chairman of the Aid Society in their report states that "every effort is made, by a combination of kindness with firmness, to reclaim them from criminal courses; and the prejudice and objections which have arisen to the imprisonment of juvenile offenders would appear to have no reasonable foundation in view of the

new system that has been introduced by H.M. Commissioners of Prisons." The Governor of Warwick Prison in a recent report also speaks highly of the new system, and states "that the physical drill, habits of cleanliness, and implicit obedience, with instruction both in religious and secular knowledge, cannot but bear some fruit in a majority of these poor boys who are at an age apt to learn."

As regards youthful offenders the following table shows the number of young prisoners committed to prison during each of the ten years ended '98-9. Up to '92-3 the statistics include unconvicted prisoners, but since that year only convicted prisoners are included :—

Year.	Under 12 years.		12 years and under 16.		16 years and under 21.	
	M.	F.	M.	F.	M.	F.
'89-90	237	16	3,620	493	20,352	4,667
'90-91	180	14	3,276	402	18,839	4,148
'91-2	230	15	3,235	375	18,877	3,837
'92-3	198	14	3,486	338	19,813	4,373
'93	134	16	2,512	262	17,940	3,645
'94	82	2	1,942	226	18,475	3,568
'95	54	1	1,735	178	16,225	3,273
'96	59	1	1,336	102	13,443	2,924
'97	57	1	1,541	89	14,809	2,697
'98-9	42	1	1,586	93	15,302	2,667

The complete segregation of first offenders from the habitual criminals, which began in '97 by the establishment of the "star class" system in all local prisons, has been continued. During the two years in which the system has been in operation, 17,848 males and 3781 females have been placed in the class, of whom 1132

males and 401 females have been recommitted to prison under new sentences. The advantages of the segregation of the first offenders from other criminals is well described in a report of the Chaplain of Wormwood Scrubs Prison, who states that "frequent personal intercourse with this class on a whole shows that they are not thieves, neither are they criminals as this term is generally understood. They are of a better stamp, both socially, morally, and intellectually, than the ordinary prisoners, consequently one has better material to work upon. I find among them managers, bankers' clerks, insurance agents, clerks to solicitors, in mercantile and other offices, drapers' assistants, men employed in H.M. Post Office, and in similar posts of trust, most of whom have had a fairly liberal education. Now, to most of these imprisonment is a crushing blow, and were it not for the fact that one is able to offer them some helping hand on discharge, would almost overwhelm them. I find them well behaved, free from serious reports, very ready to listen to and receive advice. The very fact that they are in the "star class" and regarded as first offenders at once raises them a step above the ordinary prisoners, a position they are not slow to realise, and yet not to presume upon it. So far, therefore, the scheme is a step in the right direction."

Convict Prisons.

The number of male convicts received in these establishments from local prisons under fresh sentences during the year ended March 31st, '99, was 920, besides 219 with licences revoked or forfeited. The number of female convicts received into the convict prisons from local prisons under fresh sentences and during such year was 32, besides 18 with licences revoked or forfeited. The average length of the sentences of all the convicts in convict and local prisons on March 31st, '99, was 6'76 years for males and 8'34 for females, while on the same date in '98 it was 6'86 years for males, and 8'34 years for females. Since the formation of "the star class" in convict prisons, in '79, up to March 31st, '99, 2435 male convicts have been placed therein, of whom only 24 of those discharged have returned to penal servitude under fresh sentences, and only 25 have had their licences revoked or forfeited. Of 107 females in the class, none have returned to penal servitude.

The following table shows the population of England and Wales, with the number of prisoners sentenced to death, to penal servitude for life, to penal servitude for a term of years, to imprisonment on indictment, and on summary conviction or want of sureties, in each year from '88 to '98 inclusive.

Year.	Population of England and Wales.	Number of Prisoners sentenced to					
		Death.	Penal Servitude for Life.	Penal Servitude for a term of years.		Imprisonment on Indictment.	Imprisonment on Summary Conviction, or for want of sureties.
				By Ordinary Courts.	By Courts-Martial.		
'88	28,135,197	36	4	920	2	9,014	146,925
'89	28,447,014	20	3	915	3	7,857	139,214
'90	28,762,287	24	3	726	1	7,775	134,722
'91	29,002,525	19	4	747	..	7,548	130,803
'92	29,403,346	22	1	893	2	7,780	138,931
'93	29,731,100	28	..	960	..	7,775	149,763
'94	30,060,763	29	..	956	..	7,671	141,673
'95	30,394,078	19	1	803	3	7,448	148,010
'96	30,717,355	33	6	750	4	7,057	142,397
'97	31,053,355	14	4	731	..	7,168	147,737
'98	31,397,078	27	6	785	4	7,498	153,417

The undermentioned particulars relate to penal-servitude prisoners received and discharged during the year ended March 31st, '99, viz. :—

	Males.	Females.	Total.
(1) Number of prisoners received during the above-mentioned year under fresh sentences of penal servitude	697	33	730
(2) Number of the above prisoners who had been previously sentenced to penal servitude	221	9	230
(3) Percentage of those re-convicted to those sentenced	31'7	27'2	31'3
(4) Number of convicts discharged on licence for the year referred to	1011	60	1071
(5) Number of convicts whose licences were revoked or forfeited during such year	224	11	235
(6) Percentage of revocations and forfeitures of licence to licences granted during the year	22'1	18'3	21'9
(7) Number of convicts discharged on expiration of sentence during that year	17	5	22

Prison Industries.

A further advance has been made in the regulation of prison labour by the appointment of paid instructors for these industries which

require special skill and technical qualifications. The Prisons Committee advised that better provision should be made for the supply of skilled workers as teachers, and for the direct

superintendence of industries in each prison, and that workers who acquire sufficient knowledge to supervise skilled work should receive an extra allowance. An increased support compared with '96 has been given to prison trade operations by Government Departments. The Admiralty, the War Office, the Post Office, the Crown Agents for the Colonies, the Office of Works, the Stationery Office, etc., have used prison labour on an extended scale, and their technical officers have in many cases rendered valuable assistance by suggesting improvements made in the details of prison manufactures. Among the supplies have been, brooms and brushes, tin ware, mattresses, bolsters, pillows, sacks, hammocks for wounded men, kit bags, haversacks, baskets, canvas clothing, clothes-bags, bed sacks, sand-bags, nose-bags, mail-bags, leather leggings, beds, drabnet, twine, pouches, packing-cases, crates, rugs, mats, foundry-work, hand-stoves, carpentry, shoe-making, book-binding, upholstery-work, matting, ship-fenders, despatch bags, tool bags, firewood, and washing for the Government Offices in London.

For more than three years oakum-picking has been reduced to a minimum, and has recently been abolished as an occupation for women.

In his report for '98-9 on the Prison Industries, the Comptroller of such states that a wider range of industrial occupations has been established, and that manufactures for the use of other Government Departments have greatly increased, and work for outside trades has been materially discontinued. All newly appointed officers are required to undergo at the training prisons a course of practical instruction in industrial processes, so that they may be competent for teaching trades to prisoners. All unproductive crank and tread-wheel work has been abolished, and about 500 prisoners have been released for labour of a productive kind. During the last three years the value of the prisoners' labour employed in manufactures has been increased 25 per cent.

An interesting experiment is in progress with the binding of books for the Home Office Library, and, it is probable, to undertake work of this kind for other branches of the Government service. A large proportion of the book-binding and printing required for the Prison Commission Office and for the 61 local and convict prisons in England and Wales has been done in prisons. The value of the prisoners' earnings at local and convict prisons for the year ended March 31st, '99, is as under:

Description of Employment.	Total Local Prisons.	Total Convict Prisons.	Grand Total.
Daily average number of Prisoners at productive work	Males . 9824 Females . 2033	Males . 2297 Females - 120	Males . 12,121 Females . 2153
	£ s. d.	£ s. d.	£ s. d.
Manufactures	60,358 16 8	10,691 4 11	71,050 1 7
Farm	—	5,163 7 0	5,163 7 0
Buildings, etc.:—			
Prison Department	12,319 15 4	21,681 10 3	34,001 5 7
Admiralty	—	7,563 19 4	7,563 19 4
War Department	—	5,826 8 1	5,826 8 1
Ordinary service of the Prison . .	57,679 1 1	10,223 8 6	67,902 9 7
Average annual earnings per prisoner at work	10 19 11	25 6 0	13 8 4

The total earnings from the Aylesbury female convict prison amounted to £1844 4s. 5d., of which £863 10s. 5d. was obtained from manufactures, and £980 14s. from the service of the prison.

Discharged Prisoners' Aid Societies.

Many such societies have been formed for the object of the reinstatement in honest life of men and women on release from prison, and where a helping hand or a kindly encouragement on discharge may save from a relapse into crime. Since Jan. 1st, '87, every prison in England and Wales has had a Discharged Prisoners' Aid Society working in connection with it. Some of these societies are well organised and managed, and are doing their work well. There are others, however, which do but little for the purposes for which they exist. In '96 these societies offered to help nearly 26,000 men and women who, out of a total of 169,137, were released from the prisons of England and Wales during the year.

Since March '99 further advance has been made in the appointment of lady visitors to the local prisons whose work is greatly appreciated and very efficacious, and they take much interest in the moral and social welfare of those committed to their care. They are generally regular in their attendance at the prisons, and work in hearty co-operation with the chaplain and other prison authorities; and in numerous instances spare neither expense nor trouble to find employment or to make reformatory provisions for those who have come under their notice.

The new scheme of the Prison Commissioners concerning Discharged Prisoners' Aid Societies has now been in active work for more than two years. The total number of cases taken in hand by the 55 out of the 58 Discharged Prisoners' Aid Societies during the year ending Dec. 31st, '98, was 35,071. This total shows an increase of 6323 cases over the number of cases aided or dealt with the year before. The following return furnishes particulars of what was done:—

1,747	cases were restored to their former employment,
2,720	" " placed in fresh employment,
298	" " sent to sea or abroad,
2,060	" " restored to friends,
7,169	" " supplied with food,
467	" " sent to labour homes or institutions,
500	" " placed in homes or penitentiaries,
2,165	" " provided with lodgings,
6,017	" " " " clothing,
348	" " furnished with tools,
810	" " " " stock or materials,
1,902	" " received their railway fares,
2,851	" " sums of money,
2,984	" " were assisted in different ways, the particulars of which were not tabulated,
1,949	" " considered unworthy of help,
1,084	" " refused the aid offered.
35,071	

From the report by the Visiting Chaplain of Prisons (Mr. Merrick), it appears that such Aid Societies have taken juvenile offenders "under their special care, and what the St. Giles' Christian Mission under Mr. Wheatley has accomplished for them is well known. The boys are taken from the prison gates to their homes, are restored to their parents, are placed in suitable institutions or employment, are provided with clothing or lodgings, or in some way or other are introduced into and helped along the paths of usefulness and respectability." The eight-day missions by the Church Army, which have taken place in many prisons during the last year and a half, have been successful. This Army also, through its scheme of labour homes, offers a good opportunity for the employment of discharged prisoners, which is much appreciated by the Aid Societies.

Miscellaneous.

In '97 more claims were made for the extradition of criminals to foreign countries than in any year since '94, but the number is actually very small. In '93 it was 40, and for four years afterwards 49, 38, 35, and 47. The numbers surrendered have been, during these five years, 33, 30, 25, 23, and 30. The fugitives from this country, whose extradition has been claimed from foreign governments, have numbered 25, 24, 18, 8, and 22, and the numbers of fugitives surrendered are 14, 9, 11, 3, and 9. The number of criminal lunatics received into asylums during '97 was 140, of whom 28 were found insane by the verdict of juries, 138 were certified to be insane after conviction, and 11 were found of unsound mind while under detention on remand or awaiting trial. Fifty-two were received into the Broadmoor Criminal Lunatic Asylum. Of those remaining under detention in asylums at the end of the year, 647 out of a total of 764 were at Broadmoor Asylum. Of the former number, 60 had been confined in this institution five years, 139 ten years, 100 fifteen years, 78 twenty years, and 152 above twenty years. According to the report of the Medical Inspector, the number of persons certified insane shows a decrease for the three

years ending March 31st, '99. The figures for such period are:—

For the year ending March 31st, '97,	164 cases, giving a ratio per 1000 of convicted prisoners of	1'09
For the year ending March 31st, '98,	150 cases, with a ratio per 1000 of	'96
For the year just ended—March 31st, '99—137 cases, with a ratio per 1000 of		'84

Of the 137 cases certified, 85, or more than 62 per cent. of the whole number, were mentally unsound on reception, 20 more showed symptoms of insanity within a month, and of the remaining 32 the cause of the insanity is given in 12 cases, being attributed to senile decay, heredity, alcoholism, and organic changes, leaving only 20 cases with the cause uncertain. The Medical Inspector states that although the persons, the subjects of these cases, became insane during imprisonment, it cannot be proved that they became mentally deranged in consequence of imprisonment, and that probably they would have become certifiably insane if they had not been in prison, as they only required time to develop pronounced symptoms of insanity.

Privileges, Committee for. The petition of every claimant to a title of nobility is referred to the Committee for Privileges of the House of Lords, a body which is composed of the Lord Chancellor, the ex-Lord Chancellors, and the Lords of Appeal, or some of them, the President being the Chairman of Committees. Counsel and witnesses may be heard, and the case is decided by the majority of the members of the committee present.

PRIVY COUNCIL.

A body of persons nominated by the sovereign without any patent or grant, and who, upon taking the oath of office, are at once qualified members. A privy councillor must be a natural-born or naturalised British subject, and as he is created by the sovereign, so he can be removed from the list at her pleasure. It is customary to include in the body the royal princes and the archbishops; several of the principal officers of State and of the Household become privy councillors by virtue of their office; the principal secretaries of state are of course sworn of the Council before they can take part in the deliberations of the select number of the body which we know as the Cabinet Council; the Judge-Advocate-General is always included; and the rank is bestowed upon ambassadors and the principal colonial governors, and frequently upon respected politicians who may never have been in office, as an honorary distinction. Occasionally in recent years a colonial statesman of eminence has been appointed, and in '97 all the premiers of the self-governing colonies, who by invitation officially attended the celebration in London of H.M. Diamond Jubilee, were added. Any privy councillor may act as a justice of the peace. The **Lord President of the Council** is appointed by letters patent under the great seal; his duty is to manage the debates in council, to propose matters from the sovereign at the council table, and to report to Her Majesty the resolutions taken thereon. It is only on rare occasions that the whole body of members assembles, one of those instances being at the demise of the Crown, when it is the duty of

the Privy Council to meet and proclaim the new sovereign. For the ordinary business of the Council only those who are summoned attend, and the number thus called upon is usually very small, and consists generally of members of the party in power. Among other important functions of the Council are the granting of charters of incorporation to public and private bodies, and the bringing into operation by means of orders in council of the provisions of many statutes which Parliament leaves to the executive to enforce, temporarily or permanently, at such time or times as it may deem necessary and desirable. Royal proclamations, summoning or proroguing or dissolving Parliament, and for many other purposes, are made by and with the advice of the P.C. before being issued. Several public departments have grown out of or are even now committees of the Council. The Board of Trade, although it is now an entirely separate department, is still officially entitled the Committee of Council for Trade. The Education Department—for which is about to be substituted a Board of Education charged with the superintendence of matters relating to Education in England and Wales (see Board of Education Act, Session, sect. 41)—with its own vice-president, is a Committee of the Privy Council; and there are besides a Universities Committee, which reviews the statutes made under the Oxford and Cambridge Act, a Scottish Universities Committee, and a Judicial Committee for appellate business. It is provided by statute that certain of the colonial judges, acting or retired, who may have been appointed members of the Privy Council, shall be members of this committee, and two such appointments were made in '97. Included among the powers and duties of the Board of Agriculture (see AGRICULTURE) are many which were formerly discharged by the Agricultural Dept. of the Privy Council.—The Privy Council in Ireland, a smaller body than that in England, advises the Lord-Lieutenant, and exercises some of the powers possessed by the Council in Great Britain, but in relation to Irish affairs only.—As the Privy Council in Great Britain and the Privy Council in Ireland are distinct bodies, though it will be noticed that some persons are members of both, a separate list of each is set out, corrected to Nov. '99. The word "Peer" is intended to signify that some particulars regarding the public life of the noble lord referred to are given under the head of "Peerage"; and "M.P." is meant to refer the reader to our list of the House of Commons. In cases where the Privy Councillor is neither Peer nor M.P. some biographical facts are appended. All Privy Councillors should be addressed as "Right Honourable." See MINISTRY.

Alphabetical List of Privy Council in Great Britain.

Lord President—The Duke of Devonshire, K.G.

Aberdeen, Earl of. (Feb. '86.) Peer.

Acland, A. H. Dyke. (Aug. '92.) Is 2nd s. of the late Right Hon. Sir Thomas Dyke Acland, Bart. B. '47; E. Rugby, and Christ Church, Oxford, and is a Fellow of Balliol College; sat in the Liberal interest for Yorks, West Riding (Rotherham D.), from '85 to '99,

when he resigned in consequence of ill-health; Vice-President of the Committee of Council on Education '92-5; author of a "Handbook on English Political History," and of "Working Men Co-operators." Westholme, Scarborough; 28, Cheyne Walk. S.W. Reform, Athenæum, Cobden.

Akers-Douglas, Aretas. (June '91.) M.P.

Ancaster, Earl of. (Mar. '80.) Peer.

Argyll, Duke of. (Jan. '53.) Peer.

Ashbourne, Lord. (June '85.) Peer.

Ashcombe, Lord. (Mar. '80.) Peer.

Ashley, Hon. Anthony Evelyn Melbourne.

(June '91.) B. '36; s. 7th E. Shaftesbury. Called bar Lincoln's Inn '63; Private Sec. Ld. Palmerston '58 and '59-65; Parliamentary Sec. to Bd. of Trade '80-82; Under Col. Sec. '82-5; M.P. Poole '74-80, I. of Wight '80-85.

Asquith, Herbert Henry. (Aug. '92.) M.P.

Balfour, A. J. (June '85.) M.P. See special biography.

Balfour, J. B. (Aug. '83.) Sat in the Liberal interest for Clackmannan and Kinross from '80-99; s. of the Rev. P. Balfour of Clackmannan. B. '37. E. '28; son of the late Richard Temple, of Kempsey, Worcestershire; entered Bengal Civil Service '46; was Foreign Sec. and Financial Member of Council to Gov.-Gen. of India '68-74; Pres. Statistical Com. '68; directed relief operations during Bengal famine '74; Lieut.-Gov. of Bengal '75; Gov. of Bombay '77-80; M.P. Evesham '83-92; Kingston Div. '92-5; Mem. of London School Board '84-94; Vice-Chm. '85-8; D.C.L. Oxon., etc.
- Thompson, Sir Ralph W.** (July '95.) B. '30. Chief Clerk of War Off. '71-7; Assist. Under-Sec. of State for War '77-8; Under-Sec. for War '78-95; K.C.B.
- Thornton, Sir Edward.** (Aug. '71.) B. '17. Was many years in dip. service; Min. to Argentine Confed. '59, Brazil '65-7, United States '67-81, St. Petersburg '81-4, Constantinople '84-6; was one of the High Comms. for Settlement of Alabama Claims; G.C.B.,
- Thurlow, Lord.** (April '86.) Peer.
- Thynne, Lord Henry Frederick.** (Feb. '76.) B. '32; 2nd son of 3rd Marquis of Bath. M.P. (C.) S. Wilts '59-85; Treas. of Household '75-80.
- Trevelyan, Sir G. O., Bart.** (June '82.) B. '38; E. Harrow and Trinity Coll., Camb. Sat in the House of Commons for Tynemouth '65-8, Hawick Dist. '68-86, Glasgow, Bridgeton Div., '87-97. Commenced his official parliamentary career in '69 as a Lord of the Admiralty; and, in Mr. Gladstone's ministry, became Sec. to the Admiralty ('80-2). After holding the office of Chief Sec. for Ireland, Sir George was app. Chan. of the Duchy of Lancaster (with a seat in the Cabinet) in '84, and held the office of Sec. for Scotland for a month in '86, but being unable to agree with Mr. Gladstone's Irish policy, he resigned his position in the Government (March '86). On the conclusion of the Round Table Conference, at which he represented the Unionist party, he announced that his opposition to the points of disagreement with regard to the Home Rule movement had been overcome, and he rejoined his colleagues on the Front Opposition bench, re-entering the House, after defeat at his old constituency of Hawick Dist., as member for the Bridgeton Div. of Glasgow (Aug. '87). He was Sec. for Scotland again from '92 until '95. Sir George has gained an enviable distinction in the world of letters by his "Life of Lord Macaulay," his uncle. He is also the author of some humorous political verses entitled "The Ladies in Parliament," Wallington,
- Cambo, Northumberland. *Reform and Athenæum.*
- Turner, Sir George.** (July '97.) See special biography.
- Tweedmouth, Lord.** (Feb. '86.) Peer.
- de Villiers, Sir John Henry.** (July '97.) B. '42; called to bar Inner Temple '65; was for many years member of the Legislative Assembly of the Cape of Good Hope; became President in '73; Att.-Gen. Cape Colony '72-4; since when he has been Chief Justice Cape. The right hon. and learned gentleman was one of the Royal Commissioners for the settlement of the affairs of the Transvaal in '81, and represented the Cape at the Colonial Conference at Ottawa in '94.

Established for the purpose of securing the supply of medical attendance and medicine during sickness to the families of the wage-earning classes throughout London by the payment of a weekly sum, regulated by the number in each family. Twenty branches already established. **Chairman**, Mr. W. Bousfield, J.P.; **Secretary**, Chas. H. Warren, 5, Lamb's Conduit St., Bloomsbury, W.C.

Provis, Samuel Butler, Permanent Secretary of the Local Government Board, in the room of Sir Hugh Owen, who resigned in the summer of 1899, is the son of Mr. Samuel Provis. Born at Warminster, Feb. '45; educated at Queen's College, Cambridge; called to the Bar (Middle Temple) '66. Became junior Legal Assistant to the Local Government Board '72; Assistant Secretary '82; created a C.B. '87.

Prussia. The population is about 35,000,000. See GERMANY; and for Ministry, etc., see DIPLOMATIC.

Psychical Research. The Incorporated Society for. Founded 1882, "for the purpose of making an organised attempt to investigate that large group of debatable phenomena designated by such terms as mesmeric, psychical, and spiritualistic." An important branch of the Society has hitherto been the examination of telepathy. Reports of a number of varied

and careful experiments in induced telepathic communication are published in the "Proceedings," and a large collection of spontaneous cases has been published in a book entitled "Phantasms of the Living." The Society has about 800 members and associates; also a branch in the United States of nearly 500 members and associates. **Hon. Secretary**, Mr. F. W. H. Myers. **Offices and Library**, 19, Buckingham Street, Adelphi, W.C.

Quebec, a province of the Dominion of Canada. It lies eastward of Ontario, occupying both banks of the St. Lawrence. **Area**, 344,050 sq. m.; **pop.** 1,488,535; mostly descendants of original French colonists. There are 1,291,969 Roman Catholics in the province. **Capital**, **Quebec**, **pop.** 75,000; a picturesque, impregnable

fortress, with historic associations. **Montreal**, a splendid city, at the head of the St. Lawrence navigation, is the chief seaport and the most populous town in the dominion, with 250,000 inhabitants. Other towns are **St. Henri**, **Hull**, and **Sherbrooke**. **Administered** by a **Lieut.-Governor** and responsible Ministry. A **Legislative Council** of 24 members appointed for

life by the Lieut.-Governor. The Legislative Assembly has 73 members. Quebec has 24 seats in the Dominion Senate and 65 in the House of Commons. Primary education obligatory, free, under local control. There are separate schools for Roman Catholics. All cereals and fruits are produced in abundance; there is a big lumber trade, and manufactures flourish. See BRITISH EMPIRE (table), CANADA, and DIPLOMATIC.

Queen Margaret College is the women's department of Glasgow University. See article on WOMEN, HIGHER EDUCATION OF.

QUEENSLAND.

Until 1859 the territory now comprised in Queensland was administered by New South Wales, as forming part of that colony; but in that year it was raised to the dignity of a separate province. It comprises the N.E. section of the continent, immediately N. of New South Wales. It is 1300 miles from N. to S., and 800 miles from E. to W., including 668,497 sq. m. of area. **Population**, 499,000. The capital is **Brisbane**, pop. 105,734, situated on the river Brisbane, 500 miles N. of Sydney; and is a thriving city, rapidly increasing, and provided with various excellent institutions. Other **leading towns** are Charters Towers, Gympie, Toowoomba, Maryborough, Rockhampton, and Townsville. The colony is separated into three divisions—Southern, Central, and Northern. In the first the bulk of the population reside, 331,253 with 45 representatives in Parliament; the Central district 57,610, with 11 representatives; and the Northern 95,837, with 16 representatives. The railways mostly run east and west, so that communication between the districts is mainly carried on by steamers along the seacoast. Of necessity such a large extent of territory comprises great diversities of soil and climate. The north yields tropical produce of all kinds, and in many of the seaboard districts a most important sugar industry is established, with small proprietors farming limited areas. In the southern portions of the colony products of the temperate zone flourish, and wheat forms an important item of agriculture. The pastoral industry is very large, and mining is a considerable industry—gold, silver, copper, tin, and coal all being worked. **Executive** vested in Governor and responsible Ministry. Parliament consists of two houses: Legislative Council and Legislative Assembly. The former is composed of 41 members, nominated for life by the Governor on the advice of the Ministry. No limit is placed to the number of members. The latter has 72 members elected from 61 electoral districts for three years on a manhood suffrage basis. The members are paid

£300 a year. The colony is represented in the Federal Council of Australasia, but so far has taken no part in the proceedings of the Federal Convention. The principal religious bodies are Church of England, Roman Catholic, Methodist, and Presbyterian. Valuable land grants were formerly made to these bodies, which they now retain free from taxation. Education is free and unsectarian, and is well provided for in every branch. There are about 800 **primary schools**. A permanent artillery force exists, with a strong militia partially paid and called out for annual training and numbering about 2000, and a volunteer force, unpaid and numbering over 800. The chief **exports** are gold, wool, frozen meat, hides and skins, and sugar. There are about 2609 miles of railway open. **Revenue**, '98, £3,768,152; **expenditure**, £3,747,428; **imports**, '98, £5,429,191; **exports**, £9,091,557; **public debt**, £33,598,414. See AUSTRALIA, BRITISH EMPIRE (table); and for Ministry, etc., see DIPLOMATIC.

History, '99. Several members of Parliament for the northern and central districts of Queensland presented a memorial to the Governor, for Mr. Chamberlain, in favour of separation, Dec. 2nd, '98. The Legislative Assembly was dissolved (Feb. 15th), and the Premier, in his electoral address, said that Federation must be accepted by the colony, because if it stood aloof it would not be in a position to obtain that outside financial assistance which, as a producing colony, it needed for the development of its vast but sparsely populated territory. The elections resulted finally (March 25th) in the return of 43 supporters of the Ministry, 8 Opposition members, and 21 Labour members. The Federal Enabling Bill finally passed the Legislature (June 20th). In answer to an offer of troops for service in the Transvaal, the Imperial Government sent their appreciation of so loyal and patriotic an offer, but hoped the occasion would not arise (July 12th). The figures in the popular voting on the Federation question were 38,488 for and 30,996 against the Bill (Oct. 1st). The Governor's offer of a force of 250 mounted infantry for service in South Africa was definitely accepted by the Imperial Government (3rd), the Government undertaking to treat the colonial contingent as an integral portion of the Imperial forces. The Labour party in the House objected to the troops being sent, but they were defeated by 39 votes to 28 (17th). The Government having carried two important divisions, in connection with a Bill for appointing a Parliamentary Standing Committee to deal with the construction of new railways, by a majority of 1 only, resigned (Nov. 25th), and Mr. Dawson undertook to form a new Cabinet (28th).

Queen's Speeches, '99. See SESSION, sects. 2 and 4, and AUTUMN SESSION.

R

Racquets. The following were the results of the principal matches during '99:—The Grand Military Championship Doubles Challenge Cup was won by the King's Somerset Light Infantry, 2nd Batt., who beat the 12th Royal Lancers. Manchester beat Liverpool in the first and return matches. Cambridge University beat

Oxford University in both doubles and singles. The Amateur Championships Doubles were won by H. K. Foster and Percy Ashworth, the Singles by H. K. Foster, who beat E. H. Miles. The Public Schools match was won by Eton over Harrow in the final. Sandhurst beat Woolwich.

RAILWAYS.

- I. RAILWAYS AS PUBLIC SERVANTS.
- II. BRITISH RAILWAYS AS INVESTMENTS FOR CAPITAL.
- III. RAILWAYS AS EMPLOYERS OF LABOUR.

For a general survey of matters relating to railways see eds. '95 and '96. In eds. '97, '98 and '99 more recent developments are dealt with, and the following article shows the present position.

I. RAILWAYS AS PUBLIC SERVANTS.

To what extent and in what relation to size and population the principal countries of the world are provided with railways, may be gathered approximately from the following table, which is compiled from the latest statistics generally available:—

Country.	Length in miles.	Length per 100 sq. miles.	Per 10,000 inhabitants.
North America	209,556	—	—
Europe	163,413	4'35	4'28
Asia	33,993	—	—
South America	26,662	—	—
Australasia	14,292	0'48	32'23
Africa	9,904	—	—
Total of the Earth	454,730	—	—
United States	184,278	6'12	26'21
Germany	29,880	14'32	5'71
France	25,673	12'56	6'71
Russia and Finland	25,003	1'13	2'36
Great Britain and Ireland	21,659	17'88	5'69
British India	21,002	0'97	0'68
Austria-Hungary & Bosnia	20,908	8'05	4'60
British North America	16,684	0'48	32'17
Italy	9,714	8'85	3'11
Argentina	9,422	0'81	20'80
Brazil	8,657	0'16	5'09
Spain	8,021	4'03	4'41
Mexico	7,381	0'81	5'84
Sweden	6,315	3'70	12'73
Belgium	3,661	32'20	5'65
Algiers and Tunis	2,704	0'64	4'28
Chili	2,662	0'81	8'32
Japan	2,504	1'45	0'56
Siberia	2,350	—	4'04
Switzerland	2,264	14'17	7'45
Cape Colony	2,257	0'64	12'85
Netherlands and Luxemb- bourg	1,943	14'17	3'79
Roumania	1,789	2'74	2'92
Egypt	1,754	0'32	1'80
European Turkey, etc.	1,586	1'45	1'68
Denmark	1,579	10'47	6'89
Asia Minor and Syria	1,558	0'16	0'99
Portugal	1,464	4'03	2'86
Dutch India	1,293	0'48	0'44
Norway	1,204	0'97	5'71
Mauritius, Réunion, etc.	1,189	—	—
Uruguay	1,118	1'61	13'41
Cuba	1,104	2'58	6'76

From the above figures it will be seen that the United States has much the largest quantity of railway amongst single nations, and that North and South America together have something more than half the railway mileage of the world. In amount of railway as compared with area, Belgium has by far the most; but, relatively to population, the thinly settled countries naturally show the greatest quantity, Australasia and British North America being about equal in this respect, while the United States is not very far behind. If the Australian colonies are taken separately, South Australia shows 52'3 miles for each 10,000 people, and Queensland 51'9 miles. The increase in the world's railways from '93 to '97 was 37,485 miles, or 8'9 per cent.

The railway system of the United Kingdom on Dec. 31st, '98, had, according to the Board of Trade returns, a total extent of 21,659 miles, the mileage for the three countries separately being, England and Wales 15,007, Scotland 3,476, Ireland 3,176. Of the new lines opened for traffic in '99, vastly the most important was the extension of the Great Central Railway (late Manchester, Sheffield & Lincolnshire) to London, which added 94 miles to the railway system of the country—viz., 92 miles from the junction with the Company's pre-existing system at Annesley to the junction with the Metropolitan Railway Company's system at Quainton Road, and two miles of approach lines to the Great Central's new terminus at Marylebone, London. This new trunk line (for detailed description of which see ed. '99) had, it is true, been used for coal traffic since July '98; but its public opening took place in March '99. On March 9th the opening ceremony was performed by the Rt. Hon. C. T. Ritchie, M.P., President of the Board of Trade, who started the "first train" from Marylebone Station, London, in the presence of a very large and distinguished gathering. On March 15th public passenger traffic began, and on April 11th the line was fully opened for goods traffic. No other of the great trunk railways issuing from London has been opened for traffic in such length at one time, the nearest approach to the event of last year being the opening of the Great Northern Railway from London to Peterborough, 76 miles, in 1850. With the opening of the Great Central's London line, the long-existent partnership between it and the Great Northern for the carriage of traffic between London and Manchester came to an end, and under the terms of the new agreement between the two companies the Great Northern commenced the full exercise of the statutory running powers granted to it over the Great Central's lines north of Nottingham and west of Retford. From July '98 the Great Northern had been running its own goods trains to Manchester, having opened a large goods station in that city; and from March 15th, '99, it commenced to run its own passenger service throughout, not only over the old joint route *via* Retford, but by a new route *via* Nottingham, for the purposes of which it had constructed a junction line, one mile in length, connecting its Nottingham branch with the Great Central's new line in that place, where also the two companies are jointly building a large central station to be opened in 1900. For the reception and discharge of its passengers at Manchester the Great Northern has used, since March 15th, '99, the Cheshire Lines' central station, which is the

joint property of itself, the Great Central, and the Midland, and this fact has enabled it to carry in its trains not only through passengers between its own stations and Manchester, but also passengers between Manchester and places on the Great Central lines over which its running powers are exercised. When such local traffic was commenced by the Great Northern, the Great Central endeavoured to prevent it, on the ground that it was debarred under the terms of the running-power agreement; but the Great Northern carried the case before the Railway Commission, and established its rights as aforesaid. Nevertheless the results obtained from running over the Great Central lines did not prove satisfactory to the Great Northern, and consequently the latter company arranged with the Midland that, from Nov. 1st, '99, it should be allowed to run trains from its Erewash Valley line over Midland rails to Manchester, either by the Midland's main line *via* Ambergate, or by Pye Bridge and the Dore and Chinley line. This route is being used for the present for goods trains only, but as it shortens the distance between King's Cross, London, and Manchester (Central), it is not unlikely to be used for passenger service in the near future. It is a remarkable fact that the openings of the various new routes just mentioned have decelerated, rather than accelerated, the speed of travelling between London and Manchester so far as the Great Northern and Great Central are concerned; but the present services run by these companies cannot be regarded as other than tentative, and the 4½ hours of the old joint service *via* Retford is likely to be resumed, if it is not bettered, by both in the near future. Meanwhile, the public benefits by the fine new rolling-stock which both companies have introduced under stress of their new competition. The Great Central's best trains are, probably, the most luxurious in the United Kingdom. Another new route to Manchester—but one of minor importance—has been formed by the opening of the **London and North-Western's new line** through Derbyshire, between Ashbourne and Parsley Hay, near Buxton. This line, which was opened on August 4th, '99, is 13 miles in length, and it continues the Stockport and Buxton branch of the North-Western southwards to join the North Staffordshire system at Ashbourne. From Ashbourne the North-Western has running powers to Burton, so that *via* Nuneaton, Burton, Ashbourne, Buxton, and Stockport, a new North-Western route is set up between London and Manchester alternative to the older ones *via* Stoke and *via* Crewe. Moreover, the North-Western can now compete with the Midland for traffic between Buxton and the South, and a new part of picturesque Derbyshire is opened out to the railway tourist.

To the railway facilities of the South of England an important addition has been made by the completion of the **Brighton Company's new lines** between South Croydon and Earlswood, 10 miles in length, which were opened throughout for goods traffic on Nov. 5th, '99. From the same date passenger traffic was commenced between South Croydon and Stoa's Nest, 3½ miles, which is a duplication of the existing Brighton line between those points; and the section between Stoa's Nest and Earlswood, 6½ miles, a new line paralleling a South-Eastern line in which the Brighton line has rights of user,

is likely to be fully opened at the beginning of 1900. The whole work forms an important instalment of the Company's plans for providing in the near future a four-track railway between London and Brighton. The Company has resumed, since Oct. 1st, '99, the running of its Sunday "Brighton Limited" train, covering the distance in 60 min.; and an extension of this facility to every day of the week is not unlikely to result from the completion of the afore-mentioned new lines, which give the Brighton a clear run through Redhill, avoiding the congested South-Eastern junction at that place.

The other railway openings of '99 are mainly of local importance. They include the Great Northern's new branch, 4 miles in length, from its main Leeds line at Beeston to the manufacturing suburb of Leeds, Hunslet, with a large goods station at that place; the Midland's new line, 2½ miles, from Stairfoot to Cudworth, in South Yorkshire, and the same company's branch, 4½ miles, from Morecambe to Heysham, in Lancashire; the Great Western's new line, 6 miles, from Letterston to Goodwick in South Wales, which may become of more importance in the future as part of the proposed new route to Ireland *via* Fishguard and Rosslare; the North Cornwall Company's extension, 5½ miles, from Wadebridge to Padstow, the working of which was taken over from its opening by the London and South-Western; and a new branch of the Highland Railway, 2 miles, from Gollanfield Junction to Fort George. The Great Northern has opened a new goods shed at King's Cross, and the North-Western an addition to its Broad Street, London, goods depot; the Great Eastern has completed about 20 miles of widenings in various places, and the Lancashire and Yorkshire about 4 miles. The Great North of Scotland has opened with great success its fine hotel at Cruden Bay (see ed. '99), and has widened its Deeside section for 3 miles between Culter and Park. The extension of the City and South London Electric Railway from the Borough to the Bank and Moorgate Street will probably be opened by the time this article is published.

Amongst railway openings to be expected in 1900, perhaps the most interesting is that of the Central London Railway, which is already some months overdue. This is a deep-level electric line, running east and west under the main arteries of Metropolitan traffic, from the Mansion House to Shepherd's Bush, a distance of 6½ miles, and it will have 14 stations. At the Mansion House it will connect by subway with the terminus of the similar Waterloo and City Railway, opened in '98, and also with the Bank station on the already-mentioned extension of the pioneer deep-level electric line, the City and South London. This last-named company has also in hand extensions southwards to Clapham Common and northwards to Islington, the former of which is to be opened in 1900. Two other deep-level electric railways are under construction in London—viz., the Baker Street and Waterloo, and the Great Northern and City (Finsbury Park to Moorgate Street). The Metropolitan District Company has commenced the works of its important link line between Whitechapel and Bow; and experiments preparatory to working the London "inner circle" underground railways by

electric traction are being conducted by the Metropolitan and Metropolitan District Companies jointly between Earl's Court and Kensington. Powers for providing the Great Central Company with a new access to its Marylebone terminus, alternative to its running powers over the Metropolitan, were obtained in '99, jointly by the Great Central and Great Western, the route being by an entirely new line from Grendon Underwood (a point on the Great Central main line just north of the junction with the Metropolitan at Quainton Road) to Princes Risborough, and thence over previously authorised or constructed lines of the Great Western *via* High Wycombe, Acton, and Northolt. This route is vested in a joint committee of the two companies, and the construction has been commenced on the section of new line, $5\frac{1}{2}$ miles, between Neasden, where junction is made with the terminal lines of the Great Central, and the Great Western at Northolt. In the neighbourhood of London, also, the Great Eastern has commenced its link line, $6\frac{1}{2}$ miles, between Woodford and Ilford, and is making extensive improvements at Stratford; the Great Northern is widening between Finsbury Park and Wood Green, and reconstructing Hornsey and Harringay stations; the South-Eastern and Chatham and Dover (whose amalgamation into a single interest dated practically from Jan. 1st, '99, and was subsequently confirmed by Parliament from Aug. 2nd, '99) has further advanced the widening of its London viaduct from Waterloo Junction to New Cross, $3\frac{1}{2}$ miles; and the North-Western has commenced its enlargement of Euston terminus.

Outside the London area several important new railways, already noted in this annual review, have continued to progress towards completion. These include the North-Western's new line, 14 miles, from Heaton Lodge and Wortley, to provide a new route between Huddersfield and Leeds, and the Great Western's new line of the same length from Stert to Westbury, to provide a new route to Weymouth and the West of England. The opening of both of these may be expected in 1900. The Great Western's "short cut" to South Wales (Wootton Bassett to Patchway, 30 miles), and the Midland's new route to Lancashire (New Mills to Heaton Mersey, 10 miles) are also progressing well. A short line, called the Sheffield District, 3 miles, the undertaking of a company allied to the Lancashire, Derbyshire, and East Coast (whose trains it will admit to Sheffield) is expected to be opened early in 1900, and so, too, is the Great Northern's Leen Valley extension, 4 miles, which is to join the Lancashire and Derbyshire at Langwith. The Great Central is enlarging its Victoria station, Sheffield, widening its main line for about $4\frac{1}{2}$ miles in that neighbourhood, and extending its docks and warehouse accommodation at Grimsby. It is also having a branch, 8 miles, made for it to Banbury by the Great Western. The latter company has commenced its North Cornwall coast line between Newquay and Truro, and has made a good start with its important harbour works at Fishguard, in South Wales. The Midland has made substantial progress with its similar works at Heysham, Lancashire. The Furness is extending its docks at Barrow. The Lancashire and Yorkshire is

extending its Victoria station, Manchester, and has numerous widening and deviation works in hand elsewhere. The North-Eastern has nearly completed its new access to Leeds, and has commenced its Durham coast line, 9 miles; also its Tees-side railways. It is also extending its docks at Middlesbrough and its staiths at Dunston. The Hull and Barnsley has commenced its South Yorkshire extension, 9 miles, from Wrangbrook to Wath-upon-Dearne. The Great Eastern, and the Midland and Great Northern Joint Committee, have in hand a tripartite line, $9\frac{1}{2}$ miles, between Yarmouth and Lowestoft, and the Great Eastern is widening its line to North Walsham, 7 miles, and to Southend, $9\frac{1}{2}$ miles. The South-Western is pushing on with its Meon Valley line, 25 miles (see ed. '99), its Alton to Farnham widening, 8 miles, and its Basingstoke and Alton light railway, 12 miles. It has also commenced a light railway, 10 miles, from Amesbury to Military Camp, and a widening, 8 miles, from Basingstoke to Winchester. In Wales the Cambrian is reconstructing bridges and extending sea-walls, and the Port Talbot Railway and Dock Company is completing its large undertaking. In Scotland the North British has done a great deal of its enlargement of Waverley station, Edinburgh—now the largest station in Great Britain—and is pushing on with its extension of the West Highland line from Banavie to Mallaig. The Caledonian has 29 miles of new lines under construction in three sections, and the Glasgow and South-Western is building a new bridge over the Clyde. The Great North has nearly completed the diversion of its main line between Huntley and Rothiemay. Two new railways are also being constructed in Scotland by new companies. These are the Invergarry and Fort Augustus—24 miles through a thinly populated country—which is expected to be opened in 1900, and worked by the North British; and the Comrie and St. Fillans section, 6 miles, of the Comrie, St. Fillans, and Lochearnhead Railway, the first sod of which was cut in June '99. In Ireland the Dublin, Wicklow, and Wexford has commenced its extension, 14 miles, from New Ross to Waterford. The Belfast and Northern Counties Railway has opened a new hotel at its Belfast terminus, and has added a large new dining-car to the stock of these vehicles acquired by it in '98.

Of new railway schemes authorised in '99 the two most important, viz., the South Eastern and Chatham and Dover amalgamation, and the Great Central and Great Western joint line to London, have already been mentioned. The former of these has already resulted in some improvements in train services, notably as between London and Hastings, and the working of the traffic is further to be facilitated by the new connecting lines between the amalgamated systems, authorised by their New Lines Act of '99. The chief of these is to be at Chislehurst, and their total length is 10 miles. Both the South-Western and the Brighton have obtained powers for great enlargements of their London termini—Waterloo and Victoria—and the latter has also secured Parliamentary assent to another instalment of its scheme for a four-track railway between London and Brighton. In London itself the Great Northern and Strand and North-West London deep-level electric railways have been

authorised; also an extension of the Brompton and Piccadilly Circus line to St. Martin's Lane. The Metropolitan has secured Parliamentary access to Uxbridge, and an old scheme for a line from Latimer Road to Acton has been revived successfully by a new company called the West Metropolitan. A new direct railway between the Midlands and the West has been authorised to the Great Western in the shape of the Cheltenham and Honeybourne line, $21\frac{1}{2}$ miles in length; and the North Pembrokehire and Fishguard Railway (part of the proposed new route to Ireland) has been vested in the same company. The North-Western successfully promoted a new line, $9\frac{1}{2}$ miles, between Wilmslow and Levenshulme, in the neighbourhood of Manchester; the Lancashire and Yorkshire secured powers for the Manchester, Blackley, and Middleton Railway, 5 miles; and the Midland for a branch line to Huddersfield, $4\frac{1}{2}$ miles. The North-Eastern and Hull and Barnsley have obtained powers to make a new joint dock at Hull, and the former company has got authority for a new high-level bridge over the Tyne. In Scotland enlargements of Glasgow central station and Aberdeen joint station have been authorised. In Ireland the Great Southern and Western sought a monopoly of a large district by their Bill to absorb the Waterford, Limerick, and Western; but after a very long fight this was rejected by a Hybrid Committee. The Midland Great Western has since entered the field as rival suitor for the same partner.

In the promotion of light railways, under the Act of '96, great activity continues to prevail. In November '98 54 new schemes were deposited, and in May '99 40 more, whilst another large batch is being prepared as this article goes to press. The schemes fall into two classes—those resembling ordinary railways (some of which are promoted by existing companies) and electric tramways. The local enquiries of the Light Railway Commissioners have extended from Wick to Penzance, and embraced remote places on the east and west coasts of Great Britain. During '98 41 Orders were submitted to the Board of Trade for confirmation, of which 22 were confirmed, and one rejected. Most of the balance have been confirmed since, and probably as many new ones have been received from the Commissioners for confirmation. In cases where opposition is notified, the Board of Trade holds a second hearing at Whitehall. In addition to the already mentioned Basingstoke and Alton line of the South-Western (the first line authorised under the Act of '96 which was commenced in England), a number of other light railways are now under construction. Some of these are of the tramway class; but two, at least—the Isle of Axholme, and the Hulme End and Waterhouses—resemble ordinary railways, though the latter is of 2 ft. 6 in. gauge. The first light railway commenced in Scotland, the Gifford and Garvald, and the Lauder—both lines promoted by the North British Company—are also of substantial design; and so is the Buncrana and Carndonagh line in Ireland. The first sods of all these five lines were cut during '99. The Dundee and Arbroath Joint Committee of the Caledonian and North British Companies is in course of converting its Carmyllie goods line into a light railway for passenger traffic also.

Other railway events of '99 must be very

briefly summarised. The Midland, Great Northern, Great Central, Barry and Port Talbot Companies have been forced by the difficulty of placing orders in this country to obtain locomotives from America. The Caledonian has introduced 50-ton "bogies" waggons for iron ore traffic. The Great Eastern has adopted restaurant cars, and is widening its carriages for suburban service. The Great Western and South-Western have come to an agreement for a joint service between England and the Channel Islands, the boats plying from Southampton and Weymouth on alternate days. The Furness has been compelled by a legal decision to withdraw its "reserved thirds"; and the Great Eastern, Great Northern, South-Eastern and Chatham, and Tilbury have, either as the result of litigation or voluntarily, enlarged their facilities for the conveyance of workmen between London and the suburbs. Changes in the *personnel* of railway management have been exceptionally numerous, and in one case—the North British—a complete "change of government" has taken place. An alliance between the South-Eastern and Chatham and the Metropolitan District is foreshadowed in the notices of the Bill of the former for the session of 1900; and a new and more direct connection between the Great Central and the North-Eastern is being promoted by the former company.

II. BRITISH RAILWAYS AS INVESTMENTS FOR CAPITAL.

The paid-up capital of the British Railway Companies amounted at the close of '98 to over £1,134,000,000, an increase of nearly £45,000,000 over the total of '97. No less than £37,000,000 of this increase, however, was merely nominal, being accounted for by the "conversion" of the stocks of the Midland and other companies. Of the total named above, moreover, £183,500,000 represents such nominal additions, bringing the actually subscribed capital down to £950,500,000, or about £44,000 per mile. This is a figure far above the average of other countries; indeed, comparison shows that the railways of the United Kingdom have cost nearly double as much per mile on the average as the lines of the rest of Europe, and nearly four times as much as railways in other parts of the world. Moreover, owing to the large sums constantly being spent by our companies, particularly in London and other large towns, from which no addition to mileage results, the sum laid out per mile increases year by year. Possibly, however, the activity now proceeding in the construction of comparatively cheap lines under the Light Railways Act in undeveloped districts may tend to reduce the average cost somewhat in the near future.

Meantime it is fortunate, from the point of view of the investor, that the revenue of the companies increases year by year at an even more rapid rate than the constant increases in capital and mileage. Indeed, the official returns, during the forty odd years over which they extend, show an almost uninterrupted growth under the head of "gross receipts," and of late years the ratio of increase has been, thanks to national prosperity, of an exceedingly satisfactory character. The 4-per-cent. gain of '97 was, it is true, reduced to 2·7 per cent. in '98 by the coal strike in South Wales; but the fact that the experience of '93 was not repeated, when

a similar disturbance of the coal traffic caused one of the few gross decreases recorded, is a striking evidence of the healthy expansion of other sources of income. Not only was there no decrease in gross receipts in '98, but the increases registered from passenger and goods traffic were both of respectable proportions, yielding the satisfactory percentage of gain named above, despite a slight reduction in miscellaneous receipts. The gross increase was £2.5 millions, making a total income of £96.2 millions for the year. In passenger traffic there was a trifling decrease of first-class receipts, and striking gains from the other two classes of passengers. The ebbing tide of second-class receipts seems to have turned since '95, and now it is in full flood, an increase of 12.1 per cent. having been registered in '98 on the top of the same ratio of gain in '97. The total recovery from the low limit of '95 is £651,000, or nearly 34 per cent.; and it is one of the features of present-day passenger traffic. While, however, the companies remain liable to pay the 5-per-cent. passenger tax on all fares above 1d. per mile, they cannot properly encourage the higher classes of travel; consequently the "third" remains far and away the most popular class, and the earner of the bulk of the increased passenger revenue. Increase has been the rule in this class of traffic since '85, the average gain of the thirteen years '98 being £670,000. The gain in '98 was £724,000, and therefore above the average, though it fell short of that shown in one or two of the individual years. Season-ticket receipts showed more than the normal gain in '98. Considerably over 1,000,000 ordinary passengers are now carried annually, apart from those travelling with season and periodical tickets. Goods traffic revenue in '98 expanded at a rate not much lower than the passenger increase. The increase in "general merchandise" was at the same percentage as in '97, but the gain in minerals was naturally less than that of the two previous years. The gross increase of '98 on goods revenue (£1,362,000) was considerably in excess of the average of the preceding nine years, in spite of the South Wales coal strike. Taking passenger and goods traffic together, the '98 figure of receipt per train-mile (87.48d.) was the lowest in ten years, with the exception of '93.

Turning now to the other side of the account, we find that in the working expenditure of the companies an increase occurred in '98 nearly as large, both in absolute amount and in percentage proportion, as that which occurred in '97, though the increase in '97 was itself larger than any which had occurred for several years immediately preceding. For the three years '94-6 the proportion of expenses to receipts stood at 56 per cent., in '97 it rose to 57 per cent., and in '98 it again rose to 58 per cent., in spite of the large increase in revenue recorded above. The 57 per cent. of '97 had a parallel in '93; but the 58 per cent. of '98 stands alone as the highest figure yet recorded, and as striking testimony to the increased cost of railway working. So long as this proportion continues to rise, the business conditions governing railway enterprise in this country must be deemed unsatisfactory; and when the details of the increased expenditure are examined, this view is amply confirmed. Thus "rates and taxes" were £130,000 more in '98 than in '97, and the whole increase in this one

item since '91 has amounted to £1,179,000, or 52½ per cent. Again, the expenditure for wages would seem to have increased disproportionately to the work done; and this is attributable to the additional facilities afforded by the companies, to the operation of the Railway Servants' Hours of Labour Act, and to voluntary concessions to the men. A special circumstance, accelerating the increase of expenditure in '97 and '98, was the increase in the cost of materials and fuel. The cost of these had shown a general tendency to decline between '91 and '96, but since then it has continued steadily on the up-grade. The result of this combination of adverse circumstances is that the average expense per train-mile has been increased by over 1d. in two years—i.e. from 2s. 8d., at which it stood from '91 to '97, to 2s. 9½d. in '98. Prior to '90 it stood for some years at 2s. 6d.; but it is probable that it has now been permanently raised by at least 3d., and this despite the decreased receipt per train-mile recorded above. The final result is that the net earnings per train-mile were 3'98d. lower in '98 than in '89.

Coming now to net earnings in the gross, we find that in '98 there was an actual reduction under this head as compared with '97. This, in conjunction with the increase in the total capital recorded above, has caused the proportion of net earnings to capital to decline from 3'73 to 3'55 per cent. A good part of this decline, however, is apparent rather than real, being due to the already-mentioned "conversion" operations of the Midland Company. To this cause alone may be attributed the fall of the average return on debenture stocks from 3'54 to 3'47 per cent., and the fall of the "preference" return from 3'95 to 3'72. But the decline in the average return on the ordinary capital from 3'91 to 3'67 per cent. is a genuine falling off, and indicates the extent to which railway business in '98 failed, as predicted in these columns last year, to preserve the *status quo* of '97. When the figures for '99 are made up, a somewhat more satisfactory general result may be expected.

III. RAILWAYS AS EMPLOYERS OF LABOUR.

Up to the time of writing, the year '99 has been one of comparative peace in the railway labour world; indeed, since the failure of the "national programme" of the Amalgamated Society of Railway Servants (*vide* ed. '99), organised agitations amongst railway workers for improved conditions of employment have taken a relatively mild form, and the men, acting on advice given to them by the Board of Trade, have confined themselves to direct and generally amicable appeals to the directors of their respective companies, with the result that a good many important concessions have been made in regard both to wages and hours of labour. Moreover, as further evidence of the better relations now existing between the railway companies and their men, the report of the Board of Trade respecting its proceedings under the Railway Servants (Hours of Labour) Act of '93, shows that during the year ended July 27th, '99, only 46 cases for inquiry were lodged, which is the lowest number since the passing of the Act, the highest being 156. Of those 46 complaints inquired into, 13 affected the hours of signalmen and 11 those of drivers,

the balance being made up of complaints by the staff employed at stations, 4 by guards and brakemen, 8 by shunters, and 5 by other grades. In addition to this, the Board of Trade, on its own motion, has circularised the companies on the subject of the period of duty of flagmen and watchmen when working in tunnels, with the view of restricting such duty to 8 hours, and replies of a favourable nature have been received. The report as a whole shows once more a further shortening of hours brought about without recourse to legal proceedings; indeed, litigation before the Railway Commission, though provided for in the Act, has not yet been once resorted to.

Signs are not wanting, however, that less amicable counsels may prevail in the near future. Mr. R. Bell, the Secretary of the Amalgamated Society of Railway Servants, has issued a manifesto in favour of a "united movement," on the lines of the "national programme" of two years ago, the object of which is stated to be "to establish the principles of each day standing by itself, time and a quarter for all time worked over each day's standard hours, time and a half for Sunday duty between midnight and midnight, and a guaranteed week." Mr. Bell has at the same time stated that the policy of direct appeals by the men to their respective companies has led to little result except the "victimisation" of about 100 of their representatives, and he urges more complete organisation as the only effective weapon. It is thought in some quarters that it is the intention of the Amalgamated Society to threaten a general strike, as it did two years ago, taking advantage this time of the scarcity of labour caused by the calling out of the army reserve men for the Transvaal war, a good many of whom have been drawn from railway employment. This would be a very unpatriotic policy, especially in view of the liberality with which most of the railway companies are treating the absentee reserve men, and it would so completely alienate public sympathy from the Amalgamated Society that any strike organised on such lines would almost certainly fail for lack of public support.

Apart from these ever-recurring movements to secure better terms of employment, the leading event of '99 in the railway labour world was the appointment of the **Royal Commission on Accidents to Railway Servants** "to inquire into the causes of accidents, fatal and non-fatal, to servants of railway companies and of truck owners, and to report on the possibility of adopting means to reduce the number of such accidents" (see SESSION, sect. 98, and **Royal Commissions** at end of article on SESSION). This Commission consists of Lord James of Hereford (chairman) and 14 other members, two of whom represent the railway companies, two the private waggon owners, and one the Amalgamated Society. The Board of Trade and the Home Office are also represented. The Commission was appointed in May '99, as a result of the failure of the Railway Regulation Bill introduced by Mr. Ritchie, President of the Board of Trade, on behalf of the Government on Feb. 27th. This Bill, which was popularly styled the **Railway Couplings Bill** (just as the Royal Commission is called the **Couplings Commission**) was not mentioned in the Queen's Speech, and its introduction was a complete surprise to the daily newspapers and to the general public. As

early as Dec. 2nd, '98, however, *Transport*, the leading organ of the railway companies, had announced that such legislation was likely as the result of the visit in the previous summer of Mr. F. J. S. Hopwood, head of the railway department of the Board of Trade, to the United States, where he had been much impressed by the system of automatic coupling by impact in vogue in that country and in Canada. Throughout the United States the fitting of all railway waggons with automatic couplings has been made compulsory by an inter-state enactment, and Mr. Hopwood, in a memorandum which was laid before Parliament, recommended similar legislation in this country. The result was the introduction of Mr. Ritchie's Bill, which proposed to give the railway companies and private waggon owners five years in which to find a suitable automatic coupling, at the end of which time the Board of Trade was to have power to order the adoption of coupling by impact on any or all the lines of the United Kingdom. The automatic coupling section of the Bill aroused immediately a storm of opposition. The Railway Companies' Association straightway despatched a deputation to America to collect evidence against the proposal; and meanwhile, at home, the private waggon owners (many of whom would, undoubtedly, have been financially crippled had the provisions of the Bill been enforced) were skilfully allowed to lead the van in a contest in which they speedily enlisted the sympathy of the press and the public on their side. On March 16th Mr. Ritchie received a very strong deputation of private waggon owners at Westminster, and by this time the outcry against legislation without preliminary inquiry had become so strong that the President of the Board of Trade was compelled to yield to the demand for a Royal Commission, which involved the withdrawal of his whole Bill. The Commission heard evidence twice or three times a week publicly from the middle of June to the beginning of August, and since the latter date a committee of it has inquired privately into the merits of the very numerous improved couplings and other safety appliances which have been brought under its notice. The sittings of the Commission recommenced in December '99.

Rainy, Robert, D.D. (Glasgow and Edin.), b. in Glasgow 1826. Ed. Glasgow University, graduated M.A. '43. Having joined the Free Church of Scotland, he studied theology at New College (Edin.) '44 to '48. Ordained minister of Free Church, Huntly, '51. Elected to Free High Church, Edinburgh, '54; Professor of Church History, New College, Edinburgh, '62; Principal, '74. Dr. Rainy takes the first place in Scotland as an ecclesiastical statesman and leader. His chief works are "Three Lectures on the Church of Scotland" ('72), "The Delivery and Development of Christian Doctrine" ('74), "The Bible and Criticism" ('78), and "Epistle to the Philippians" ('92). Address: 28, Douglas Crescent, Edinburgh.

Rayleigh, Lord. See under **PEERAGE**.

Recorder of London. See **LONDON CORPORATION**.

Record Office, Public. The public records and state papers are preserved in this office, which is situated between Chancery Lane and Fetter Lane. Previous to the erection of this building they were stored in the Chapter-house of Westminster Abbey, the Tower, the Rolls

Chapel, the State Paper Office, and the Queen's Remembrancer's Office. Among the more interesting books at the office is the Domesday Book of William the Conqueror. A Record Commission was established in 1800 to search the records, examine their state, and publish such of them as they thought of sufficient interest. Their first publication was made in 1802, and the series is being continued under the direction of this Office. The Master of the Rolls was made keeper of these records in 1838, when this public department was first constituted. There are public search rooms at the Office, where the records and state papers can be consulted by historians and others.

Referendum. A system of legislation which consults all the electors of a state as to whether new laws shall be confirmed. In some cantons of Switzerland a method resembling the referendum has been practised since the sixteenth century. The present form was adopted in the canton of St. Gallen in 1830. In '48, in spite of Conservative opposition, the referendum was, by the action of the Radicals, incorporated in the Swiss Federal Constitution, and in '74 its application was extended. In all the Swiss cantons, except Freiburg, the referendum is now established. According to the Swiss Federal Constitution, all constitutional amendments must be ratified by the Swiss electorate before they become law. Other measures must be submitted to the popular vote, if demanded within ninety days after their publication by 30,000 voters, or by the governments of eight cantons. The referendum has worked so well that it has conquered all opposition to it, and it is now generally regarded as a check on hasty and class legislation. It will be observed that the essence of it is that it submits to the people a single and clear issue upon which they may give their decision. There exists also an Obligatory Referendum in eight cantons, where every law and every expenditure beyond a fixed maximum must be submitted to the mass of the electors, and it is not necessary that a demand for this submission to the electors should be made. In Great Britain what may be termed a kind of local referendum with regard to the "Adoptive Acts" was set up by the Parish Councils Act of '94. The question of the adoption of federation was submitted to a popular referendum in all the Australian colonies during '99.

Reformatory Schools Act. See SESSION, sect. 97.

REGISTRATION, PARLIAMENTARY.

The right to vote in the election of a member of Parliament is confined to those adult males whose names appear on the register of voters in force for some county or borough. Most of the law as to the compilation of the register and the qualifications for enrolment thereon is contained in some **fifty or sixty Acts of Parliament**, but these are subject in some measure to the principles of the common law, and liable to alteration in several particulars by **Order in Council**. The following sketch may afford a good general idea of the different classes of males of full age who are entitled to be registered. There are, besides those set out below, some ancient franchises, such as those enjoyed by the liverymen of the City of London. No man can be registered who has within the twelve months preceding July 15th received parochial

assistance other than medical relief, or who is an alien. In counties the qualifications are as follow: **Freehold** of inheritance or by purchase of the clear annual value of 40s. and upwards. **Freehold** for life must be of the clear annual value of £5, unless the same comes by descent, marriage, devise, or promotion to any benefits or office, in all which cases 40s. clear annual value is sufficient. **Freeholders** by purchase are required to be six months in possession previous to July 15th; by descent, etc., no length of possession is necessary. **Copyhold** of the clear annual value of £5 or upwards. **Copyholders** are subject to the same terms of possession as freeholders. **Leasehold**, if created originally for a term of not less than sixty years, of the clear annual value of £5 or upwards; if for a term of more than twenty, but less than sixty years, the clear annual value must be £30. **Leaseholders** by purchase are required to be twelve months in possession previous to July 15th; by descent, etc., no length of possession is necessary. Persons qualified in respect of any of the foregoing qualifications must send in their claims to the overseers on or before the 20th of July.—**Counties and Boroughs:** **Occupation** as owner or tenant of any land or tenement of a clear yearly value of not less than ten pounds. **Occupation** as owner or tenant of any dwelling-house. The term "dwelling-house" includes part of a house in which the landlord or superior tenant does not reside. When he does reside, his under-tenants are held to be lodgers. **Occupation** by virtue of any office, service or employment, of any dwelling-house which is not inhabited by a person under whom such office, service or employment is held. In the above three classes of occupiers the occupation need not be of the same premises, but may be of different premises, occupied in immediate and unbroken succession in the same constituency. **Occupation** as lodger of any lodgings of a clear yearly value, if let unfurnished, of £10. Successive occupation is also allowed in the case of lodgings, but it must be from one part to another part of the same house. In all cases of occupation, whether as owner or tenant, servant or lodger, twelve months' occupation is required up to the 15th day of July in any year. **Occupiers** need not send in claims unless they find that their names are omitted from the list published by the overseers on the 1st of August, or that in the entry on such list there be a misdescription of some essential particular or particulars, and in case of such omission or misdescription they must send in their names to the overseers on or before the 20th of August. **Lodgers** must claim every year, and when claiming for the first time must send in their claims to the overseers on or before the 20th of August. The revised register comes into operation on the 1st of January in each year.

Any person whose name appears on a list of electors may object to the name of any other person appearing therein. Written notice of such objection must be given both to the overseers and to the person objected to. On a given date the overseers publish a list of the names of all persons who have sent in claims or have been objected to. Copies of all the lists that have been published are then forwarded by the overseers to the clerk of the peace of the county, or (in the case of municipal boroughs) to the town clerk. He prepares an abstract of such lists of claims and objections,

and transmits it to the revising barrister for his district. Revising barristers are appointed every year, for London and Middlesex by the Lord Chief Justice, and for other places by the senior judge of assize. The barrister so appointed makes a circuit and holds open court for the revision of the list in each borough and at or near every polling place in the county. The clerk of the peace, or town clerk, and the overseers, must attend. The revising barrister has power to examine witnesses on oath, to hear claims and objections, and to insert or omit names as he finds just. An appeal lies from his decision to the Queen's Bench Division of the High Court, but no further appeal is possible without its express sanction. The list of voters as settled and signed by the revising barrister is sent, in the case of a county to the clerk of the peace, who must have it printed in a book and delivered to the sheriff; in the case of a borough to the town clerk, who must have it printed in a book and delivered to the returning officer. The clerk of the peace or town clerk must keep printed copies of the register for sale at a fixed price. The register is conclusive evidence that the persons therein named have the qualifications annexed to their respective names. (For further information on the subject see "Rogers on Registration.") In the case of any person not having his name on any list of voters, or in case of his receiving a notice of objection, he should apply to the registration agent for his district of the political party to which he belongs. Such agents are appointed and paid by the various party organisations in most constituencies, and make it their business to know the intricacies of the law on the subject.

Reichsrath. See AUSTRIA-HUNGARY.

Reichstag. See GERMANY.

Reid, The Rt. Hon. G. H., late Premier of New South Wales, was b. at Johnstone, Renfrewshire, 1845, and is the son of a Presbyterian minister. His parents went to Melbourne in '52, and to New South Wales in '59. Mr. Reid embarked upon a legal career, and was called to the New South Wales bar, but soon entered politics, and was elected as member for East Sydney in '80. In '83 he was appointed Minister of Education, and rapidly advanced his influence with his party. He is an enthusiastic free trader. When Sir George Dibbs' ministry was overthrown in '94, Mr. Reid, who had been leading the Opposition since '91, was made Premier, the Governor, to the surprise of many, calling upon him instead of upon Sir Henry Parkes. The country emphatically endorsed Mr. Reid's free trade and progressive policy, and at the '95 general election gave him a big majority to carry it out. He visited England for the Jubilee celebrations in '97, and was made a member of the Privy Council. In '98 he became Q.C. After carrying the Bill through which ensured the colony's adhesion to the Federation movement, though he himself had previously been by no means enthusiastic in its support, he was defeated and resigned office in Sept. '99.

Religious Tract Society, The (instituted 1799), has for its object the circulation of religious books and treatises throughout the British dominions and foreign countries. The Society has published in 229 languages and dialects. The business is conducted by a committee chosen annually in London, and consists of

four ministers and eight laymen, and of six trustees, half the Committee being members of the Church of England and the other half Nonconformists. The Society has in its catalogue some 4000 separate tracts and handbills, books, etc., for adults, besides books and tracts for children. The well-known *Leisure Hour* and the equally well-known *Sunday at Home* are published by this Society, as well as the *Boy's Own Paper* and the *Girl's Own Paper*. Circulation of the Society's publications for '98-9, 59,053,360. Income for '98-9, from subscriptions, donations, etc., £16,109 3s. 9d., including part payment from recipients of grants, £6367 11s. Grants in money, paper, publications, etc., £27,786 11s. 1d. Secretaries, Revs. Prebendary L. B. White, D.D., and Richard Lovett, M.A. Lay Sec. and General Manager, James Bowden, Esq. Association Secs.: England, Revs. R. Cobden Earle, B.A., and W. J. Wilkins; Scotland, Rev. Thos. Boyd, M.A.; Ireland, Rev. William Irwin, D.D.; Corresponding Sec., D. J. Legg, Esq. Cashier, Mr. Geo. T. Betts. Offices, 56, Paternoster Row, E.C.

Repton School, Derbyshire. Founded 1557; reorganised 1874. Pupils, 300. Twenty assistant masters. Head Master, W. M. Furneaux, M.A.

Reserve Forces Act, '99. See SESSION, sect. 99.

Restitution of Conjugal Rights. A suit may be brought for this purpose in the Divorce Division by either husband or wife, not being themselves guilty of a matrimonial offence. It must be preceded by a request to the respondent to resume cohabitation, couched in conciliatory terms. Until '84 a decree for restitution was enforced by imprisonment. Since then, by virtue of an Act known as the *Welldon Act*, passed as a result of the suits of Mr. and Mrs. Welldon, such a decree results in monetary advantages to the petitioner, the respondent being compelled to settle portions of his or her property on the petitioner, and neither party can by imprisonment be compelled to live with the other. A failure to comply with the decree is legal desertion and ground for a judicial separation, or, coupled with adultery, for divorce. See DIVORCE and JUDICIAL SEPARATION.

Rhodes, Right Hon. Cecil, P.C., is a younger son of the late Rev. F. W. Rhodes, Rector of Bishop Stortford. After taking his M.A. degree at Oxford (Oriental College) he went out to Africa, where he at first met with but little success. However, when the *De Beers mine* (with which his name is now so prominently connected) was anything but prosperous, he combined various Kimberley mines under his direction, and amassed a large fortune. Cape politics attracted him, and he represented West Barkly for a short period, and held a position in the ministry of Sir T. Scanlon. On the fall of the Spriggs Ministry, a new government, with Mr. Rhodes as Prime Minister, took office at the Cape (July 17th, '90). He remained in office from that time till Jan. '96, when he resigned in consequence of the Jameson raid into the Transvaal. His gift of £10,000 in support of the cause of Home Rule in '91, when he was in England, attracted much attention. Mr. Rhodes was the prime mover in obtaining mining rights over Matabeleland and Mashonaland, and till '96 he was the Chairman of the British South Africa Company. When the trouble with Lobengula began, in Sept. '93, he went to Fort Salisbury to direct the operations

against him. His policy in this direction was warmly approved at the Cape, as was evidenced at a banquet given to him by the citizens of Cape Town in Jan. '94. Mr. Rhodes, in his speech of thanks, defended his policy, and sketched in outline the United South Africa which he hoped to see in the near future, covering all the country south of the Zambesi, one in the question of tariffs, of railway communication, of law, and of coinage, although possessing full local government in local matters. He was sworn as a member of the Privy Council in Feb. '95. After resigning office at the Cape in '96 he devoted himself to the development of Rhodesia. He took an active part in suppressing the Matabele revolt and in arranging terms of peace, although he gave up his managing directorship of the Company. In Jan. '97 he came to England again, and gave evidence before the South Africa Committee, after which he returned to the Cape and took up his work in Rhodesia, later on resuming his place on the Board of Directors of the Company. He took a leading part in the elections to the Cape Parliament during '98, and was himself returned for two constituencies. He holds the hon. degree of D.C.L. at Oxford, which was given him in '92 and publicly conferred in June '99. When war with the Transvaal broke out in October he went to Kimberley, and remained there during its investment by the Boers, raising and equipping a town guard of 400 men at a cost of £15,000. See CAPE COLONY and RHODESIA.

RHODESIA.

Rhodesia is the name given to that part of South Africa which has been occupied of recent years by the British South Africa Company, acting mainly under the leadership of Mr. Cecil Rhodes. It is bounded on the east by Portuguese East Africa, on the west by Angola and German South-West Africa, on the north by German East Africa and the Congo Free State, and on the south by Bechuanaland and the Transvaal. The whole territory, covering an area of 750,000 square miles, is administered by the British South Africa Company (*q.v.*), which was given a royal charter in Oct. '89. The river Zambesi flows through it, cutting the region into two portions—Southern and Northern Rhodesia.

Northern Rhodesia consists of the whole of the British sphere north of the Zambesi, lying between Portuguese East Africa, German East Africa, the Congo Free State, and Angola, with the exception of the strip of territory forming the British Central Africa Protectorate, which is under direct Imperial administration. The territories to the west of the Protectorate are policed and garrisoned by the Protectorate troops. North of the Zambesi the country has as yet been little prospected. Coal has been found on the shore of Lake Nyasa. The North Charterland Exploration Company, which holds a grant of 10,000 square miles north of the Zambesi, is engaged in trading, agriculture, and stock-breeding operations. A new industry has lately been started in fibre, on which the representative of a large London company has been experimenting with satisfactory results.

At a conference between Captain the Hon. Arthur Lawley, the Deputy Administrator, and King Lewanika of Barotseland, held in June '98, it was agreed that, in addition to

the concessions already granted to the Company, administrative powers over the whole kingdom of Barotseland should be conceded to them. The kingdom was, by the Anglo-Portuguese treaty of '91, left within the British sphere. It is, roughly speaking, as large as the German Empire, and embraces the whole basin of the Upper Zambesi lying between 12° 30' and 18° S. lat., and 20° and 27° 30' E. long. The western boundary between it and Angola has not yet been delimited. Lualaba is the capital, and Mr. R. T. Coryndon is the British representative there.

Southern Rhodesia consists of the two provinces of Matabeleland and Mashonaland. Mashonaland is bounded on the north by a line running roughly in a S.E. direction from Zumbo, on the Zambesi, to the intersection of the river Mazoe with 33° E. long., on the south-west by Matabeleland, and on the east by the Portuguese province of Lorenzo Marques. The capital, and the seat of government of Rhodesia, is Salisbury, with a population of 1800. The other principal townships are New Umtali, Melsetter, and Enkeldoorn. A railway has been built, running inland towards Salisbury from Beira on the coast, and it reached Salisbury in May '99. Salisbury is thus in direct communication with the sea over a line 382 miles in length. It is now proposed to connect Salisbury with Bulawayo. The African Trans-Continental Telegraph Company has constructed a line between Umtali and Tete, and from there on to Blantyre in British Central Africa, and to Zomba, Fort Johnston, Kota Kota, on the western shore of Lake Nyasa, and Karonga, at the north-western end of the lake. The survey on to Lake Tanganyika is completed, and it was announced in Nov. '99 that the line had reached Abercorn, about 10 miles from the southern end of the lake. Matabeleland lies between the Limpopo and middle Zambesi rivers, and is bounded on the north-east by Mashonaland and on the south by the Transvaal and Khama's country. The principal town, and the chief commercial centre in Rhodesia, is Bulawayo, with a population of 5000. Telegraphic communication exists between Cape Town, Bulawayo, and Salisbury, and in the Bulawayo district the telegraph system has been considerably extended. Bulawayo has also telephone communication with the principal stations. The extension of the Cape Government western railway system through Kimberley and Vryburg to Bulawayo was completed in October '97, and officially opened on Nov. 4th. The distance from Cape Town to Bulawayo is 1360 miles. A northern extension line is being pushed on to Gwelo, and to the northern boundary of Rhodesia, and the first sod was cut at Bulawayo in May '99.

The Southern Rhodesia Order in Council, '98, published Nov. 25th, '98, requires that the Administrator shall be appointed and paid by the Company, subject to the approval of the Secretary of State, the Secretary of State, or the Company with his approval, having the power to remove or suspend the Administrator. The Secretary of State may also appoint a Resident Commissioner to be paid by the Imperial Government. The Administrator is assisted by an Executive Council, consisting of the Resident Commissioner, every administrator except the Senior Administrator, and not less than four members appointed by the

Company with the approval of the Secretary of State. The Legislative Council is composed of the Administrator, or Administrators for the time being, the Resident Commissioner, and nine other members; five appointed by the Company with the Secretary of State's approval, and four elected members. All who are educated and occupy a house of the value of £75, or receive wages to the extent of £50 a year, are qualified as electors. The High Court of Southern Rhodesia has full jurisdiction, civil and criminal.

Public roads in Rhodesia have been made to the extent of 2485 miles, and telegraph lines to that of 1923½ miles of line and 2901 miles of wire. Since the pacification of the country considerable tracts of land have been placed under cultivation, and fresh stock, including Angora sheep and Merino goats, is being imported. Throughout the country the conditions of soil and climate are suitable for all kinds of European cereals and vegetables; and, in addition, many trees, shrubs, and plants, peculiar to subtropical regions, can be successfully cultivated. Good results have already been obtained from the introduction of fruit and other trees. Tobacco occurs in a wild state, is grown universally by the natives, and has been produced of excellent quality by white farmers in several districts. Indiarubber, indigo, and cotton are similarly indigenous, and will probably well repay cultivation. The Rhodesian forests produce abundance of hard timber of fine quality, and a company is working this industry with a view to meeting the large demand for building and other purposes in Salisbury and Bulawayo. In addition to gold, silver, copper, coal, tin, plumbago, antimony, arsenic and *kieselguhr* have been discovered. The arrival of the railway at Bulawayo has given an impetus to the mining industry; and many mines have machinery on the ground. An analysis of gold production in Rhodesia for the year ending Aug. 31st, '99, recently published by the Rhodesia Chamber of Mines, shows that 115,924 tons of quartz were crushed, yielding 63,500 oz. of gold, of the value of £224,941. In Southern Rhodesia a company is being formed to develop the indiarubber industry on a large scale. The military forces of the Company are under the direct control and authority of the High Commissioner. See AFRICA, BRITISH SOUTH AFRICA COMPANY, and TRANSVAAL (map).

History, '99.—In March Mr. Rhodes visited Berlin, and had interviews with the German Emperor and his Ministers on the subject of the Cape to Cairo railway and the Trans-African telegraph, which it is proposed shall traverse German East Africa. The details of the negotiations as to the railway did not transpire, but Herr von Bülow said (21st) that the Trans-African Telegraph Co. Ltd. had received permission to construct a telegraph line across German East Africa from south to north at their own cost, the work to be completed in five years. The Company were required to erect, also at their own cost, a further telegraph line joining Rhodesia and British East Africa across German territory, this line to be the property of the German Government, and to be used for the service of German East Africa. Mr. Rhodes further endeavoured to obtain the help of the British Government for the proposed extension of the Bechuanaland Railway north of Bulawayo, in the shape of a Government guarantee

of the interest on the capital which it was proposed to raise, so that the money might be raised at 3 per cent. The Government, however, did not see their way to give this guarantee on terms which the Bechuanaland Railway Company (now styled the Rhodesia Railways, Limited) could accept. The companies holding claims in Rhodesia, however, subscribed £500,000, at 3 per cent., for an immediate extension of 150 miles; and Mr. Rhodes stated at an extraordinary general meeting of the British South Africa Company (May 2nd) that the Bechuanaland Railway Company would raise £3,000,000 at 4 per cent., guaranteed by the Chartered Company, in five equal annual instalments, and that this would enable the remaining 750 miles of the line, up to the boundary of German East Africa, to be laid. The Southern Rhodesia Legislative Council was duly constituted, and met at Salisbury (15th). The expenditure for '98-99 was £783,985, and the revenue £272,955. The estimated revenue for the financial year '99-1900 is £381,000, and the expenditure is estimated at £793,066. Prior to Aug. 1st, '99, all goods were admitted into Southern Rhodesia free of duty. A customs ordinance was, however, passed during the '99 session of the Council, under which certain articles are now liable to duty. No duties are imposed upon any articles produced or manufactured within the South African Customs Union, or upon those specified in the "free list" attached to the Union tariff. The revenue to be derived from this source during the present year is estimated at £60,000. An agreement between the British South Africa Company and the German Government was announced (Nov. 9th), binding the Company not to connect its railway system with the west coast of Africa from Rhodesia or Bechuanaland south of 14° N. lat., save through German territory and from a point on the Anglo-German frontier to be agreed upon with the German Government. The Company further had to undertake not to extend its railways to the west, north of 14° N. lat., till such a line had been built south of that degree through German South-West Africa. As to the Cape to Cairo railway, it was estimated in November that 1400 miles of railway were in operation or under construction (though more or less interrupted by the Transvaal war) northward from Cape Colony, and 1100 miles southward from Cairo were complete, leaving about 3000 miles of intermediate distance. On the outbreak of war with the Transvaal a force under Colonel Plumer was collected at Tuli, and some fighting took place at Rhodes Drift, the British force under Major Wilson being compelled to retire upon Tuli. But the attack was not pressed in this direction, and Colonel Plumer's forces moved westward in the direction of Mafeking, with a view to assisting Colonel Baden-Powell. See CAPE COLONY.

Ripon, Bishop of. See under PEERAGE.

Roberts, Lord. See under PEERAGE.

Robertson, Johnston Forbes, is the son of Mr. J. Forbes Robertson of Aberdeen, and was b. in London Jan. 16th, 1853. He was ed. at the Charterhouse, and at Rouen, and has been an actor since he came of age. He studied his art under Phelps, and for some time took the principal parts at the Bancrofts' theatre and in Mr. Hare's company, but recently has successfully been his own manager. He produced "Romeo and Juliet," and Mr. H. A.

Jones's play, "Michael and his Lost Angel," at the Lyceum in '96, "Hamlet" in '97, and "Macbeth" in '98.

Robinson, Rev. J. Armitage, D.D., appointed Canon of Westminster, and Rector of St. Margaret's, Westminster, Feb. 6th, '99, was educated at Christ's Coll., Camb., and obtained the Winchester reading prize in '80. He was fourth in the first class in the Classical Tripos '81, and won the second Chancellor's medal for classics and a Fellowship at his college. Having been ordained in the diocese of Ely in '81, and appointed an examining chaplain to the Bishop of Bath and Wells, he was Dean of Christ's Coll., '84-90, and preacher at the Chapel Royal, Whitehall, '86-88. He took his B.D. degree in '91, was appointed Norrisian Professor of Divinity at Cambridge in '93, and proceeded D.D. in '96. He also holds the degrees of Ph.D. (Göttingen) and D.Th. (Halle).

Robinson, Sir John R., the manager of the *Daily News* (*q.v.*), is the son of the Rev. R. Robinson, and was b. at Witham, Essex. He has been associated with this newspaper since '56, and was for some length of time editor of the evening paper published by the proprietors of the *Daily News*, under the name of *The Express*. For many years he was a constant contributor to the columns of the American press, especially to the *Boston Advertiser* and the *Chicago Tribune*. Appointed the sole manager of the *Daily News* in '68, he was also editor '87-96. Knighted '93.

Rochester, Bishop of. See under PEERAGE.
Rodriguez. An island in the Indian Ocean, 344 miles east of Mauritius (*q.v.*), of which British colony it is a dependency. It is 18 miles long and 7 broad. Administration is provided for by a Civil Commissioner appointed by the Governor of Mauritius. The population is about 2772. Rodriguez was annexed in 1814. See BRITISH EMPIRE (table).

Rogers, Rev. J. Guinness, B.A., well-known Congregational minister and writer, was ed. at Trin. Coll., Dublin, and graduated at Dublin Univ. in '43, afterwards studying for the ministry at Lancashire Independent College. His first pastorate was at St. James's Church, Newcastle-upon-Tyne ('46), and he went to Ashton-under-Lyne five years later. In '65 he succeeded the Rev. J. Hill at Grafton Square, Clapham, where he celebrated his semi-jubilee in '90. He was elected Chairman of the Congregational Union of England and Wales in '75, and in the annual meetings of the Union he has always taken an active part. His literary labours have been extensive, and in the domain of politics he has always been active; of late years he has worked most energetically for the cause of Home Rule for Ireland. The jubilee of his call to the ministry was celebrated Jan. 12th, '96. Address: 81, Clapham Common, S.W.

ROMAN CATHOLIC CHURCH.

The Roman Catholic Church is the name of that community of Christians who profess the same faith, partake of the same sacraments and sacrifice, and are united under one head, the Pope or Bishop of Rome and successor of St. Peter, and under the bishops subject to him. Its essential parts are the Pope, bishops, pastors—so far as they are priests—and laity. A distinctive characteristic of the Roman Catholic Church is the supremacy of the Papacy. Its doctrines, like those of the rest of Christendom, are chiefly found in the articles of the

Nicene Creed. After the Council of Trent Pope Pius IV. added to the formal Profession of Faith the articles on transubstantiation, invocation of saints, and others which chiefly distinguish the Roman from other Christian communities. The Immaculate Conception of the Virgin Mary and Papal Infallibility were defined as articles of faith in 1854 and '70 respectively. One great and central object of faith and worship is the Mass, which is the mystical sacrifice of the body and blood of Christ, instituted by Himself at the Last Supper, and is essentially the same as the Sacrifice of the Cross. Scripture and tradition are appealed to in support of this and other doctrines—as the Seven Sacraments, the honour due to the Blessed Virgin, Purgatory, Invocation of Angels and Saints, etc. There is a great distinction between what is of doctrine and what of discipline; the former belonging to the deposit of faith taught by Christ and the Apostles, which is invariable, whilst the latter, founded on the decisions and canons of councils and the decrees of popes, is the Church's external policy as to government, and may vary according to times and circumstances.—The Sacred College of Cardinals—70 in number, after the 70 disciples—are the supreme council or senate of the Church and the advisers of the sovereign pontiff, and at the death of a pope they elect his successor. They are also the chief members of the Sacred Congregations, or permanent ecclesiastical commissions (about twenty in number), to which much of the business of the Holy See is entrusted. Among the best known of these congregations are the Propaganda, the Index, the Inquisition or Holy Office, and the Congregation of Rites. The number of cardinals is hardly ever complete; in Nov. '99 there were 61. Including 52 of the cardinals, the patriarchs, archbishops, and bishops, in '99 numbered 1316. There are 10 patriarchates with 14 patriarchal sees, and 192 archiepiscopal and 782 episcopal sees which are termed *residential*. Besides these, there are a number of titular sees, most of which are assigned to archbishops and bishops appointed, either to apostolic delegations, vicariates, or prefectures, or to the office of coadjutor, auxiliary, or administrator of a diocese. There are altogether 9 delegations, 130 vicariates, and 48 prefectures. See ANGLICAN ORDERS.

Statistics.—The total number of Roman Catholics throughout the world, ruled by about 1200 archbishops and bishops, is estimated at 240,000,000. There are in Great Britain and Ireland about 5,500,000 (*i.e.*, about 3,550,000 in Ireland, and the remainder in Great Britain); and in the rest of Europe more than 100,000,000. Ireland is divided into 4 ecclesiastical provinces, subdivided into 27 dioceses, ruled by 4 archbishops and 23 bishops (*v. infra*). The number of priests in Ireland is about 3450, serving 2434 churches and chapels, situated in 1090 parishes. The 25 archbishops and bishops of Great Britain (*v. infra*) consist of: 1st, for England, 1 archbishop (of Westminster), with 14 suffragans, a coadjutor, an auxiliary, and a suffragan bishop for Wales; 2ndly, for Scotland, 2 archbishops (one of St. Andrews and Edinburgh and one of Glasgow), with 4 suffragans and 1 auxiliary. The number of priests of England and Wales in '99 was 2769, with 1509 churches, chapels, and stations; of Scotland 443, with 345 churches, chapels, and stations. The United States has about 12,000,000 Roman

Catholics, 90 archbishops and bishops, about 11,000 priests, 11,600 churches, chapels and stations, and 1960,000 pupils in Catholic schools. In the British possessions of North America there are about 2,600,000 Roman Catholics, 39 archbishops and bishops, about 3000 priests, 2600 churches, chapels and stations. From statistics like these, which can be approximated to in all the other parts of the world by the bishops presiding over the different dioceses or vicariates, and are published occasionally, may be inferred how complete is the organisation of this Church, and how vigorously she exercises the forces at her command for the extension of the Roman Catholic faith. Westminster Cathedral, a vast edifice in the Byzantine style, of which the first stone was laid by Cardinals Vaughan and Logue on June 29th, '95, is rapidly rising, and great efforts have been made to open it on Sept. 29th, 1900, the fiftieth anniversary of the restoration of the hierarchy in England. Internally, the length is 342 ft., the width across nave and aisles and side chapels 150 ft., the width of nave 60 ft., and its height 112 ft. For Papal Ministry see DIPLOMATIC.

Roman Catholic Bishops.—The following is a list of the bishops in the United Kingdom, with their respective sees:—

ENGLAND AND WALES.

Province of Westminster.

NAME.	DIocese.
His Eminence Cardinal Vaughan (Archbishop)	Westminster.
Rt. Rev. Brindle (Auxil.).	
" " Edward Ilesley .	
" " Wm. R. Brownlow .	Birmingham.
" " Thos. W. Wilkinson	Clifton.
" " William Gordon .	Hexham and Newcastle.
" " Thomas Whiteside .	Leeds.
" " Richard Lacy .	Liverpool.
" " John C. Hedley .	Middlesbrough.
" " Arthur Riddell .	Newport.
" " Edward Bagshawe .	Northampton.
" " William Vaughan .	Nottingham.
" " C. Graham (Coadj.)	Plymouth.
" " John Vertue .	
" " John Bilsborrow .	Portsmouth.
" " Samuel W. Allen .	Salford.
" " Francis Bourne .	Shrewsbury.
" " Francis Mostyn .	Southwark.
	Menevia in Wales.

SCOTLAND.*

NAME.	DIocese.
Most Rev. Angus Macdonald (Archbishop) . . .	St. Andrews and Edinb.
Rt. Rev. Æneas Chisholme .	
" " John Smith . . .	Aberdeen.
" " James A. Smith .	Argyll and the Isles.
" " William Turner .	Dunkeld.
Most Rev. Charles Eyre (Abp.)	Galloway.
Rt. Rev. J. Maguire (Auxil.) .	Glasgow.

* The four Bishops of Scotland are suffragans to the Archbishop of St. Andrews and Edinburgh. The Abp. of Glasgow has no suffragans.

IRELAND.

Province of Armagh.

NAME.	DIocese.
His Eminence Cardinal Logue (Abp.), Primate of all Ireland	Armagh.
Rt. Rev. Joseph Hoare . . .	Ardagh and Clonmacnoise.
" " Richard Owens . . .	Clogher.
" " John Keys O'Doherty .	Derry.
" " Henry Henry . . .	Down and Connor.
" " Thomas MacGivern . .	Dromore.
" " Edward Magennis . .	Kilmore.
" " Matthew Gaffney . .	Meath.
" " Patrick O'Donnell . .	Raphoe.

Province of Dublin.

NAME.	DIocese.
Most Rev. W. J. Walsh (Archbishop), Primate of Ireland.	Dublin.
Rt. Rev. N. Donnelly (Auxil.)	
" " James Browne . . .	Ferns.
" " Patrick Foley . . .	Kildare and Leighlin.
" " Abraham Brownrigg .	
	Ossory.

Province of Cashel.

NAME.	DIocese.
Most Rev. Thomas Croke (Abp.)	Cashel.
Rt. Rev. Robert Browne . .	Cloyne.
" " Thomas O'Callaghan .	Cork.
" " John Coffey . . .	Kerry and Ag-hadee.
" " Thomas McRedmond .	Killaloe.
" " Edward O'Dwyer . .	Limerick.
" " Denis Kelly . . .	Ross.
" " Richard Sheehan . .	Waterford and Lismore.

Province of Tuam.

NAME.	DIocese.
Most Rev. John MacEvilly (Archbishop) . . .	Tuam.
Rt. Rev. John Lyster . . .	Achonry.
" " John Healy . . .	Clonfert.
" " John Clancy . . .	Elphin.
" " Francis MacCormack .	Galway and Kilmacduagh.
" " John Conmy . . .	Killala.

Roman Catholic University Education, Ireland. See SESSION, sect. 19.

Röntgen Rays, The. See '99 and previous eds. For the progress of investigations during '99, see ELECTRICITY, '99.

Rosebery, Lord. See under PEERAGE.

Rossall School, Fleetwood, Lancashire. Founded 1844. Royal Charter granted Nov. '90. Two Exhibitions. one of £50 and one of £30 at Oxford or Cambridge, each for three years, offered every year; and the Phillips memorial exhibition for mathematics, of £40 for one year at Oxford or Cambridge. Besides this there are about 14 scholarships tenable at the school, offered each year by examination held about the beginning of April—Foundation, Senior

and Junior. Head Master, Rev. J. P. Way, D.D. The preparatory school, which forms a portion of Rossall, is under the charge of Rev. H. G. D. Tait, M.A., subject to the general supervision of the Head Master.

Roumania. Formerly Moldavia and Wallachia, autonomous provinces of the Ottoman empire; now, with Dobrogea, an independent kingdom under Charles I. of Hohenzollern-Sigmaringen, in whom, with a cabinet of eight and the Prime Minister, resides the executive power. The legislature is composed of a Senate of 120 members, elected for eight years, and a Chamber of 183 members elected for four years by three electoral colleges or classes of voters. These three colleges consist of (1) electors possessed of property insuring an annual income of not less than £50; (2) those paying direct taxes of not less than 20 francs annually, or following a profession; and (3) all Roumanian subjects of full age, most of whom vote indirectly by choosing delegates who vote with the direct electors of the other colleges. The members of both houses are paid. The King has a veto on all measures passed by the two chambers. For local government purposes the country is divided into 32 districts, each under a prefect, a receiver of taxes, and a civil tribunal. Education is free and compulsory, but still in a backward condition. The prevailing religion is that of the orthodox Greek Church. Cereals, wines, and timber are the chief products, the large majority of the population being engaged in agricultural pursuits. Area, 48,307 square miles, with a population estimated at about 5,500,000. **Estimated revenue and expenditure for '98-9, £8,880,000; imports, '95-6, £12,696,500; exports, £11,045,000; debt, '97, £49,620,000.** See **DIPLOMATIC, FOREIGN ARMIES and FOREIGN NAVIES.—History, '99.** The peasantry living in the district between the Olt and the Danube rose in revolt, owing to Socialist agitation in favour of a measure passed by the Lower House, but thrown out by the Senate, for land purchase on easy terms. An encounter took place near Krajova (Feb. 4th), in which two regiments of infantry had to beat a retreat, but quiet was eventually restored. A Parliamentary crisis arose in April through the discovery by the Opposition that M. Sturdza, who had risen to power by his championship of the Roumanians in Hungary, had made a secret arrangement with the Hungarian Government engaging to do all he could for the suppression of the Roumanian national movement in Hungary. There was obstruction in the House, and a mass meeting in Bukharest, and finally M. Sturdza resigned (11th). He was succeeded by M. Cantacuzene, who formed a new Ministry (23rd). At the elections which followed (June 14th) 149 Conservatives, 13 Junimists, and 7 Liberals were returned, while several second ballots were rendered necessary.

Roumania, King of. See CHARLES I.

ROWING, '99.

The following were the results of the principal races during a very satisfactory season:—On Nov. 14th, '98, W. Haines beat G. Bubeur in a race over the Thames championship course for £200. The Open Boat Handicap on the Tyne was won on Dec. 31st by W. Frazer. Balliol was the head boat in the Torpids at Oxford. The Lent races at Cambridge ended in First Trinity again being head of the river.

The Clinker Fours at Cambridge were won by Peterhouse. The Oxford and Cambridge University Race took place on March 25th, over the usual course, in fine weather, with a slight wind from the south-west. Cambridge led at the start, and up to Hammersmith Bridge, which was reached in 7 min. 22 sec., first one boat and then the other led, but from this point Cambridge began to forge in front, and, though rowing a slower stroke than Oxford, their superior power began to tell. At the Old Ship they led by 3 lengths, and at Barnes Bridge by 6 lengths. Here Oxford by some fast rowing reduced the lead, but Cambridge from this point considerably eased their stroke, rowing only 31 towards the finish, and eventually passed the winning post 3½ lengths ahead in 21 min. 4 sec. Oxford are now nine races ahead of Cambridge. The following were the names and weights of the crews:—**Cambridge:** W. H. Chapman (Third Trinity), bow, 11 st. 2 lb.; N. L. Calvert (Trinity Hall), 11 st. 13 lb.; C. J. D. Goldie (Third Trinity), 12 st. 1½ lb.; J. E. Payne (Peterhouse) 12 st. 10½ lb.; R. B. Etherington-Smith (First Trinity), 12 st. 10 lb.; R. H. Sanderson (First Trinity), 12 st. 11 lb.; W. Dudley Ward (Third Trinity), 12 st. 9½ lb.; J. H. Gibbon (Third Trinity), stroke, 11 st. 3½ lb.; G. A. Lloyd (Third Trinity), cox, 8 st. 5 lb. **Oxford:** R. O. Pitman (New), bow, 10 st. 10 lb.; C. W. Tomkinson (Balliol), 12 st.; A. H. Steel (Balliol), 12 st. 11½ lb.; H. J. Hale (Balliol), 12 st. 9 lb.; C. E. Johnston (New), 13 st.; F. W. Warre (Balliol), 12 st. 13 lb.; A. T. Herbert (Balliol), 12 st. 13 lb.; H. Gold (Magdalen), stroke, 11st. 11½ lb.; G. S. MacLagan (Magdalen), cox, 8 st. 1 lb. On May 1st George Towns, the Australian, won the Sculling Championship of England over the Thames course from W. A. Barry, of Putney. T. Sullivan, of New Zealand, beat William Haines over the same course on May 15th, and on May 26th Carter beat Bullman over the same course. New College retained its position as head of the river at Oxford, and First Trinity is again head of the river at Cambridge. Henley was again favoured with magnificent weather, and the booms which had been placed in the river in order to keep the course were a great success, though they had been much criticised before the regatta time. There were representatives of Canada, Holland, and Germany entered, though none of them won any of the prizes. The following were the winners:—Grand Challenge Cup: Leander B.C. (Bucks) 1; London R.C. (Berks) 0; time 7 min. 12 sec. Visitors' Challenge Cup: Balliol College, Oxford (Bucks), 1; New College, Oxford (Berks), 0; time 8 min. 1 sec. Thames Challenge Cup: First Trinity, Cambridge (Bucks), 1; Kingston R.C. (Berks) 0; time 7 min. 25 sec. Wyfold Challenge Cup: Trinity Hall, Cambridge (Bucks), 1; London R.C. (Berks) 0; time 7 min. 57 sec. Diamond Challenge Sculls: B. H. Howell, T.R.C. (Bucks) 1; H. T. Blackstaffe, Vesta R.C. (Berks), 0; time 8 min. 38 sec. Ladies' Challenge Plate: Eton College (Berks) 1; Pembroke College, Cambridge (Bucks), 0; time 7 min. 20 sec. Silver Goblets and Nickalls' Cup: Phillips and Willis, Leander R.C. (Berks), 1; Orme and Pennington, St. George's Hospital R.C. (Bucks), 0; time 8 min. 49 sec. Stewards' Challenge Cup: Magdalen College, Oxford (Bucks), 1; Favourite Hammonia R.C., Hamburg (Berks), 0; time 7 min. 51 sec. The Wingfield Sculls were rowed for

on July 27th over the usual course, when B. H. Howell, Thames R.C., the holder, again won, beating H. T. Blackstaffe and C. V. Fox, in 23 min. 7 sec. The **Amateur Punting Championship** was won at Shepperton by N. M. Cohen. W. C. Romaine and C. R. Mullings won the **Doubles Championship**. **Doggett's Coat and Badge** was rowed for over the usual course, and won by John Lee, Hammersmith, in 27 min. 34 sec. George Haines won the **Professional Punting Championship** over the Maidenhead course. The **Sculling Championship** of the Netherlands, held on the Amstel at Amsterdam on Sept. 17th, was won by H. T. Blackstaffe, Vesta R.C. On Oct. 1st C. V. Fox, Pembroke College, Oxford, won the **Coupe de Paris**, which was competed for over a course of 1 mile 300 yards, at Neuilly-sur-Marne.

Royal Academy of Music. Established in 1822, chiefly owing to the exertions of Lord Burghersh, afterwards Earl of Westmorland, the R. A. M. was incorporated by charter in 1830. Students of all branches of music are catered for, and find ample stimulus to exertion in the large number of scholarships and prizes which are offered for competition. The chief scholarships are the **Westmorland**, open to ladies and gentlemen in alternate years between the ages of eighteen and twenty-four; the **Potter**, also open to ladies and gentlemen; the **Sterndale Bennett**, open to male candidates in any branch of music, and providing free instruction for two years; the **Parepa Rosa**, founded by the late Carl Rosa, for ladies who have not previously been students at the Academy, the successful candidate being entitled to two years' free musical education; the **Sir John Goss**, for organ playing; the **Thalberg**, for pianoforte students; the **John Thomas (Welsh)**, for vocalists and instrumentalists alternately; the **Henry Smart**, for organists and composers; the **Sainton Dolby**, for female vocalists; the **Liszt** for composition and pianoforte playing, the holder being entitled to three years' free tuition, and thereafter to about £80 a year for two years; the **Hine Prize** for composition; and the **Macfarren Scholarship** for composition, providing three years' free tuition; the **Erard Centenary** (2), one for pianists and the other for harpists; the **Sainton**, for violinists; the **Goring Thomas**, for the encouragement of lyrical composition; the **Mence Smith**, for vocalists; the **Dove**, for violinists; and the **Costa**, for composers. **Associates** pass a qualifying examination, and are entitled to the use of the initials **A.R.A.M.** **Fellows** (the number is limited to 100) are elected by the Directors after leaving the Academy. They are solely entitled to use the initials **F.R.A.M.** **Honorary members** are entitled to the initials **R.A.M.** with the prefix **Hon.** Musical composers, performers, and teachers, who have not studied at the Academy, can become **Licentiates** of the Institution by passing a qualifying examination held twice a year,—viz., in September and in the Christmas vacation—successful candidates at which are entitled to the use of the initials **L.R.A.M.** **President**, H.R.H. the Duke of Saxe-Coburg and Gotha; **Principal**, Sir A. C. Mackenzie, Mus.Doc.; **Secretary**, F. W. Renault. The Academy is situated in Tenterden Street, Hanover Square, W.

Royal Academy, The, at Burlington House, Piccadilly, was founded in 1768 by George III., who gave it rooms in Somerset House. Thence

it was removed to Trafalgar Square (1834), and to its present abode, the site of which it occupies rent-free (1869). The **principal objects** of the Royal Academy are (1) the establishment of a well-regulated school or academy of design for the gratuitous instruction of students, and (2) the holding of an annual exhibition open to artists of distinguished merit, where they may offer their performances to public inspection, and acquire that degree of reputation and encouragement which they may be deemed to deserve. The **Royal Academy** is "a private society," supporting a school from its own resources without any grant of public money. The members are under the superintendence and control of the Sovereign, who confirms all appointments and bye-laws; and the Society itself consists of 40 **Royal Academicians**, and at least 30 **Associates**; there may also be not more than four engravers, of whom not more than two may be Academicians. The first president was Sir Joshua Reynolds, and the present occupant of the office is Sir E. J. Poynter (q.v.), elected Nov. 4th, '96. There is a council of 10 members, who succeed by rotation, five retiring every year, the President, the Keeper, and the Treasurer being *ex-officio* members.

The premises of the Royal Academy at Burlington House comprise a grand gallery or range of thirteen halls, besides a central octagon for sculpture, a theatre, and a large room in which the annual banquet is held—the latter always an event of much interest to the artistic world. The basement is devoted to schools of art

* R.A. Elect.

for male and female students. The total cost of the buildings was nearly £150,000, the whole of which was defrayed out of the funds of the Academy. The Royal Academy derives the whole of its funds from the holding of its annual exhibition of the pictures of living artists, which opens on the first Monday in May and continues until the first Monday in August. No works which have previously been exhibited are accepted, and the Council has the right to reject any picture it may please. The Winter Exhibition of art treasures in connection with the Royal Academy was established in 1869, paintings being liberally lent by private individuals. The result is that a really admirable collection of masterpieces is usually brought together. The exhibition remains open from the first Monday in January for a period of ten weeks. The fine library and books of prints belonging to the Academy are open to students and the general public at certain hours. The Diploma and Gibson Galleries, reached by a staircase to the right of the entrance hall, contain the works presented by each member as a specimen of his ability on his election as a Royal Academician; the works of J. Gibson, R.A., bequeathed by him; several interesting pictures of old masters, and some fine pieces of sculpture. See SESSION, sect. 33.

Royal Agricultural Society of England. This, the premier agricultural society of the United Kingdom (though not the first established) was founded by Royal Charter on the 26th March, 1840. The Charter gives a long list of the national objects which the Society was intended to promote, and which have been well embodied in its motto, "*Practice with Science*." The results of the Society's efforts for what the Royal Warrant calls "the general advancement of English agriculture" have been great and striking. It would be impossible in this brief record even to enumerate all the improvements in the different breeds of live stock, and in agricultural machinery, which have arisen from the annual competitions in the Society's showyards, or the advances in scientific knowledge as to the cultivation of the soil, which the Society's experiments and grants to investigators have brought about. It has two sides to its work: (1) The practical, the chief feature of which is its annual shows, to which the best pedigree animals are brought to compete for the valuable prizes offered by the Society, and still more for the honour of being "Royal" prize-winners, and at which also the newest inventions in agricultural implements and labour-saving appliances are exhibited; (2) The scientific, for which purpose it maintains a complete chemical laboratory for the analysis of feeding stuffs, manures, soils, etc., and retains the services of Chemical, Botanical, Zoological, and Veterinary experts in order that its members may have at low rates the best scientific advice obtainable. It controls, moreover, an experimental farm and "Pot Culture" station at Woburn, where elaborate investigations into crops, soils, feeding stuffs, and other matters connected with agriculture are carried on. Its *Journal* has from the first taken high rank amongst scientific publications, and contains in each quarterly number articles by leading authorities on the most important agricultural questions of the day. The R. A. S. has, in conjunction with the

Highland and Agricultural Society of Scotland, instituted annual examinations for the award of National Diplomas in the science and practice of Agriculture and Dairying. It seeks in many other ways to foster the study of agriculture. The governing body of the Society consists of a President (elected annually), twelve trustees, twelve vice-presidents, and fifty members of council, half of whom go out of office each year. The Council meet once a month at the Society's house, 13, Hanover Square, and the business is divided amongst a large number of standing committees. Three general meetings of members are held in each year: one on the 22nd of May (the anniversary meeting); one in the Society's showyard in the summer; and one in December, usually on the Thursday of the Smithfield Cattle Show week. The number of members is about 11,000, including nearly all the chief landowners and practical farmers and stock breeders of the country. Membership of the Society entitles to the use of a large and well-stocked library of standard books on agricultural subjects, and a reading-room, at which the principal agricultural newspapers and other periodicals can be consulted by members. Members may obtain skilled veterinary advice in cases of disease amongst cattle, sheep, or pigs, by arrangements made with the Royal Veterinary College. They can also consult the professors of the College at fixed rates, and have the privilege of sending cattle, sheep, and pigs to the College infirmary. The Society makes annually a considerable grant from its general funds in order that members may obtain at low rates analyses of feeding stuffs, artificial manures, soils, etc., by the Society's consulting chemist (Dr. J. Augustus Voelcker), whom members may also consult either personally or by letter at a small fee. Reports can be obtained by members from the Society's consulting botanist (Mr. W. Carruthers, F.R.S.) on the purity of seeds, and on diseases or weeds affecting farm crops, at a fee of one shilling in each case. Information respecting any animal (quadruped, bird, insect, worm, etc.) which, in any stage of its life, affects the farm or rural economy generally, with suggestions as to methods of prevention and remedy in respect to any such animal that may be injurious, can be obtained by members from the Society's zoologist, Mr. Cecil Warburton, M.A., the Zoological Laboratory, Cambridge, at a fee of one shilling for each case. The sixtieth annual show of live stock, implements, and farm produce was held in the week commencing June 10th, '99, at Maidstone, and the sixty-first will be held at York in the week commencing June 18th, 1900. President for '99-1900, H.R.H. the Prince of Wales, K.G. Secretary, Sir Ernest Clarke, 13, Hanover Square, W. See AGRICULTURE.

Royal Assent. See PARLIAMENT and PARLIAMENTARY PROCEDURE.

Royal Botanic Society. The Society was incorporated in 1839 for the promotion of Botany, and for the formation of Botanical Gardens within the Metropolis. The Gardens, in the Inner Circle, Regent's Park, are about 20 acres in extent, and are beautifully laid out as an ornamental English park. The Society is composed of Fellows and members, admission to the Gardens being by personal introduction or Fellow's order. A School of Practical Gardening has also been established, and is

officially recognised by the Technical Education Board of the London County Council. Over 800 free orders of admission for three months each are issued each year to botanical and art students, and 50,000 cut specimens distributed to the various schools and colleges annually. The public are admitted on Saturdays and Mondays at a charge of 1s. (Bank Holidays, 6d.). Musical promenades are held in the season on Saturdays, also on Wednesdays (admission 2s. 6d.). The public are now admitted, by payment, to the exhibitions and fêtes held in the spring and summer. **President**, H.H. The Duke of Teck, G.C.B.; **Secretary**, Mr. J. B. Sowerby, F.L.S.; **Library and Office**, Inner Circle, Regent's Park, N.W.

Royal College of Music, The, Prince Consort Road, South Kensington, was founded in 1882, under the presidency of H.R.H. the Prince of Wales, and incorporated by Royal Charter in May '83, when the College was opened for the reception of pupils. At its commencement the sum of £126,000 was raised by public gifts, and has all been invested. The pupils are of both sexes, and consist of scholars, exhibitioners and students. The **Open Free Scholarships** are 51 in number; they are gained by competition, and entitle the holder to a thorough and systematic free education in theoretical and practical music. There are also eleven **Close Free Scholarships**, for the benefit of persons residing in certain specified localities, as well as various **Exhibitions and Prizes**. The following are the most important:—The Council Exhibitions, each term, value £20 and £30, for pupils of one year's standing, and those of two years' standing, respectively; the Erard Exhibitions, value £120 each, and tenable for three years; the Savage Club Exhibition, tenable for three years (value £40 a year); and the Charlotte Holmes Exhibition (£15). Various prizes, medals, etc., are also offered from time to time for competition to pupils in the College. **Students** (or paying pupils) are admitted on payment of a fee of £12 12s. per term. **Associates** need not necessarily be pupils or ex-pupils of the College; they have to pass a qualifying examination, which entitles them to use the initials A.R.C.M. (fee £5 5s.). A Junior Department has been opened for students under 16 years of age whose time is also occupied by the necessities of their general education. Fee, £6 6s. per term. The teaching staff includes a large number of musicians of the highest eminence; amongst others the following gentlemen (who constitute the Board of Professors):—Sir J. F. Bridge, Mr. E. Dannreuther, Señor E. Fernandez-Arbo, Sir Walter Parratt, Mr. A. Randegger, Prof. C. Villiers Stanford, Mr. Franklin Taylor, Mr. A. Visetti. **Director**, Sir C. H. H. Parry; **Hon. Secretary**, Mr. Charles Morley; **Registrar**, Mr. Frank Pownall, to whom all communications relating to admission, etc., should be addressed.

Royal College of Science, London. The Royal College of Science at South Kensington is a non-residential institution, supported by the State to supply systematic instruction in the various branches of physical science to students of all classes. While the College is primarily intended for the instruction of teachers, and of students of the industrial classes selected by competition in the examinations of the Department of Science and Art, other students are admitted so far as there may be

accommodation for them, on the payment of fees fixed at a scale sufficiently high to prevent undue competition with institutions which do not receive State aid. The College is administered by a council consisting of the professors, with a dean as chairman, and a registrar. **The Royal School of Mines** is incorporated with the Royal College of Science. Students entering for the Associateship of the Royal School of Mines obtain their general scientific training in the Royal College of Science. The instruction is arranged in such a manner as to give the students a thorough training in the general principles of science, followed by advanced instruction in one or more special branches of science. The course of instruction lasts for three years, and is the same for all the divisions during the first year, after which it is specialised according to the particular division in which the student is working for the Associateship. **The Associateship of the Royal College of Science** is given in one or more of the following divisions: mechanics, physics, chemistry, biology, and geology; and the **Associateship of the Royal School of Mines** in metallurgy and mining. A student obtains the Associateship who passes in all the subjects of the first year, and in the second and third year those subjects prescribed as necessary for the division in which he seeks to obtain his Associateship. No fee-paying student will, except under very special circumstances, be entered for the Associateship course unless he has obtained a pass in the elementary stage of mathematics, mechanics (solids and fluids), chemistry (theoretical), sound, light and heat, and magnetism and electricity, at the examinations of the Department of Science and Art, or has passed the examinations of other recognised institutions or examining bodies. Occasional students in one or more special branches of science may be admitted, providing they possess some preliminary knowledge of the subject they propose studying, and so far as there is room. Application for admission to the College must be made on a form obtainable from the Registrar, and be sent before the end of May for admission in the following October. The fees of students entering for the Associateship course amount to a total of from £105 to £115 in the three years. A certain number of royal exhibitions, national scholarships, and free studentships tenable at the College are awarded by competition at the examinations of the Department of Science and Art. Particulars respecting these will be found in the *Science and Art Directory*. **Dean**, Prof. J. W. Judd, C.B., LL.D., F.R.S. **Registrar and Superintendent of Discipline**—Francis Fladgate, Royal College of Science, South Kensington, W. **Clerk and Librarian**—A. Tillott.

Royal College of Surgeons of England. The Royal College of Surgeons in London was established in the year 1800. By a charter granted in '43 the name of the College was altered to that which it now bears, The Royal College of Surgeons of England. The first building of the College, in Lincoln's Inn Fields, was opened in '13; in '35-6 it was practically rebuilt by Sir Charles Barry. In '90-92 considerable additions were made to the accommodation for both the Museum and Library. The nucleus of the present Museum was the celebrated Hunterian collection; this was purchased by the Government after John Hunter's death, and, under certain conditions, handed over to the College. The Library

(Librarian, V. G. Plarr), which is kept up for the use of Fellows and members of the College, contains about 50,000 volumes. The examination for the L.R.C.P. and M.R.C.S. is held conjointly with the Royal College of Physicians at the Examination Hall, on the Victoria Embankment. That for the F.R.C.S. is held by the College of Surgeons in the same building. Full particulars of all the examinations will be found in the College Calendar. **Secretary, E. Trimmer, 40, Lincoln's Inn Fields, London, W.C.**

Royal Colonial Institute. The growth of the R.C.I. (founded 1868) since its incorporation by royal charter in '82 has been very rapid. In '78 it numbered 800 fellows, with an annual income of £1331. In '99 the number exceeded 4160, with an annual income of over £7000, exclusive of the building fund. The fact that the **Prince of Wales is President** of the Institute has given it much additional prestige. The Council is composed of gentlemen well known in connection with the Colonies; and **Sir Montagu Ommamney**, the senior Crown Agent for the Colonies, is **Treasurer**. The objects of the R. C. I. are thus officially set forth:—"To provide a place of meeting for all gentlemen connected with the Colonies and British India and others taking an interest in Colonial and Indian affairs; to establish a **reading-room and library**, in which recent and authentic intelligence upon Colonial and Indian subjects may be constantly available, and a **museum** for the collection and exhibition of Colonial and Indian productions; to facilitate interchange of experiences amongst persons representing all the Dependencies of Great Britain; to afford opportunities for the **reading of papers** and for holding **discussions** upon Colonial and Indian subjects generally; and to undertake **scientific, literary and statistical investigations** in connection with the British Empire. But no paper shall be read, nor any discussion be permitted to take place, tending to give the Institute a **party character**." Evening meetings are, as a rule, held on the second Tuesday in each month, from November to June, and afternoon meetings are also held from time to time. Amongst the matters which engaged the **special attention** of the Council in '98-9 were contributions by the Colonies to Imperial defence, the **extension of commercial relations between the Mother-country and the Colonies**, the extension of postal and telegraphic communication throughout the Empire, the **Federation of the Australian Colonies**, the establishment of a school of tropical medicine, the disastrous hurricane in the West Indies, the plague in India, the dissemination of authentic information on Colonial subjects to all inquirers, and the payment of income tax in the United Kingdom on income earned and taxed as such in other parts of the British Empire. The monthly *Journal* and *Proceedings* give the papers read during the year, which are always of a valuable and very interesting description. On Sept. 26th, '99, there were 1447 resident and 2721 non-resident Fellows. The **Library** contains over 37,000 volumes and pamphlets, and is made readily accessible by the publication of a new printed catalogue. **Office, Northumberland Avenue. Secretary, J. S. O'Halloran, C.M.G.; Librarian, James R. Boosé; Chief Clerk, William Chamberlain.**

Royal Family, Annuities to, and Civil List. The total amount of the Civil List is £385,000, thus divided: Her Majesty the Queen's privy purse, £60,000; salaries of Her

Majesty's household and retired allowances, £131,260; expenses of Her Majesty's household, £172,500; royal bounty, alms and special services, £13,200; unappropriated, £8040. There are, besides, the Civil List Pensions, which, in the last financial year amounted to £23,773 10s. 8d., making the total amount issued on account of the Civil List £408,773 10s. 8d. Her Majesty, as Duchess of Lancaster, also receives the revenues of the Duchy, which amounted in the year for which the last return has been issued to £60,000. The cost of maintenance and repair of certain of the Royal Palaces is defrayed out of the estimates (see FINANCE, NATIONAL, for the amount voted for '99-1900). Subjoined are the annuities to the Royal Family: H.I.M. Victoria, Dowager German Empress (the Princess Royal), £8000; H.R.H. the Prince of Wales, £40,000; the Princess of Wales, £10,000; Duke of Edinburgh, £10,000—he formerly received £25,000, but renounced £15,000 per annum from Dec. 31st, '93, on succeeding to the Duchy of Saxe-Coburg and Gotha; Princess Helena (Princess Christian), £6000; Princess Louise (Marchioness of Lorne), £6000; Duke of Connaught, £25,000; Duchess of Albany, £6000; Princess Beatrice, £6000; Princess Augusta (Duchess of Mecklenburg-Strelitz), £3000; Duke of Cambridge, £12,000; Prince of Wales's children, £36,000—total, £168,000. The Prince of Wales also receives the revenues of the Duchy of Cornwall, which, in the year for which the last return is available, amounted to £61,243.

Royal Geographical Society, 1, Savile Row, W., was founded in 1830. It annually awards various medals to distinguished workers in the cause of geography, and distributes prizes among training colleges and University extension students for proficiency in this science. It contributes to the maintenance of chairs of geography in Oxford and Cambridge. It subsidises exploring expeditions. It also gives instruction to and lends instruments to travellers in various parts of the world. In '99 the **Founder's medal** was given to Capt. L. G. Binger, and the **Patron's medal** to M. F. Fourceau. During the year 267, and 4 Honorary Corresponding Fellows were elected, and on May 25th, '99, there was a total of 4043 Fellows. The published *Journal* is valuable, as tracing the progress of explorations and discoveries. The **annual report** presented at the anniversary meeting (June 5th) showed that the **income** of the Society during '98 had been £11,297 17s. 6d., and the **expenditure** £10,889 16s. 7d., while the total assets amounted to £49,018 13s. 2d. **President, Sir Clements Markham, K.C.B., F.R.S., etc.; Hon. Secretaries, Major L. Darwin, and J. F. Hughes, Esq.; Secretary, J. Scott Keltie.** See GEOGRAPHICAL PROGRESS, '99.

Royal Indian Engineering College, The, Coopers Hill, is primarily maintained under the orders of the Secretary of State for India in Council, to educate candidates for Government service in the Indian Public Works, in the **Accounts, Indian State Railway, Telegraph and Forest Departments**. About 40 engineer students are admitted yearly to the College. **Candidates for Government appointments** must be between the ages of 17 and 21 years on the 1st day of July of the year of admission. The collegiate year usually begins at the end of September. Applications for admission and for all information should be made at the College, Coopers Hill, Staines. **President, Colonel J. W. Ottley, C.I.E.,**

R.E. **Secretary**, Lieut.-Col. W. J. Boyes. See **INDIAN CIVIL SERVICE**.

Royal Institute of British Architects, The, was founded, in 1834, for the general advancement of architecture and for promoting and facilitating the acquirement of the knowledge of the various arts and sciences connected therewith. It was incorporated by royal charter in '37, and obtained a new charter in '87, conferring greatly extended powers. A *Journal* containing the papers read before the Institute and allied Societies, and articles, reviews, and reports of legal cases affecting architects, is published fortnightly during the session, and monthly in the recess. A *Kalendar*, giving full particulars of the bye-laws, examinations, and prizes, with the Register of members, is published annually in October. **Secretary**, Mr. W. J. Locke. **Offices**, 9, Conduit Street, Hanover Square, W. See **ARCHITECTURE**.

Royal Institute of Painters in Water Colours. This Society was founded in 1831, and formerly held its exhibitions in Pall Mall, but in the spring of '83 moved to more commodious galleries at 191, Piccadilly. There is an annual exhibition of water-colour paintings, commencing the second week in March. The walls are open to artists whose works are approved, and members are elected according to the merit which their productions display. **President**, E. J. Gregory, R.A.; **Vice-President**, E. M. Wimperis; **Secretary**, W. T. Blackmore. **Office**, 191, Piccadilly, W.

Royal Institute of Public Health, The. Patron, Her Majesty the Queen. Founded in 1886, and incorporated in '92 with the following objects:—To carry on the work of the Public Health Medical Society, and thus to provide a means for the association of medical practitioners possessing registrable qualifications in public health, state medicine, or sanitary science, also medical officers of health and others, with the object of promoting, by intercourse or otherwise, the development of all questions having for their object the public health; to aid the theoretical and practical investigation and study of all branches of public health medicine; to issue publications of the transactions of the Association; to found a library, and to publish a journal; to examine candidates, either alone or in conjunction with one or more kindred bodies, and to grant certificates of their having passed an examination as sanitary inspectors. **Chairman of Council**, Sir James A. Clarke, Bart. The '99 Congress was held in Blackpool. The *Journal of State Medicine* is the official organ of the Institute, and is published every month. The **President** is Prof. William R. Smith, M.D., D.Sc., F.R.S.; the **Treasurer**, Brigade-Surgeon W. F. Rutledge; and the **Hon. Secretary**, Henry C. Jones, Esq. **Offices**, 197, High Holborn, W.C.

Royal Institution of Great Britain, The. Founded 1799, incorporated 1800, and enlarged in 1810. Its chief objects are—(1) To promote scientific and literary research; (2) to teach the principles of inductive and of experimental science; (3) to exhibit the application of these principles to the arts; and (4) to afford opportunities for study. The Institution includes **Laboratories** for the promotion of chemical and physical science. In the Laboratories the researches of Thomas Young, Humphry Davy, William Thomas Brande, Michael Faraday, John Tyndall, Edward Frankland, William

Odling, John Hall Gladstone, James Dewar, and Lord Rayleigh have been conducted. It gives **Public Lectures**, holds **weekly meetings** (on Friday evenings) of its members, and supports a model room and a reading-room. The entrance fee is ten guineas, which includes the first year's annual subscription of five guineas; or a life composition of sixty guineas may be paid. The library contains about 60,000 volumes. **House**, Albemarle Street, Piccadilly; **President**, The Duke of Northumberland, K.G.; **Treasurer**, Sir James Crichton-Browne, M.D., LL.D., F.R.S., V.P.; **Hon. Secretary**, Sir Frederick Bramwell, Bart., D.C.L., LL.D., F.R.S., V.P.; **Professor of Natural Philosophy**, The Right Hon. Lord Rayleigh, M.A., D.C.L., LL.D., F.R.S. **Fullerian Professor of Chemistry**, Dr. James Dewar, M.A., LL.D., F.R.S.; **Fullerian Professor of Physiology**, E. Ray Lankester, Esq., M.A., LL.D., F.R.S.; **Assistant Secretary and Librarian**, Mr. Henry Young; **Assistant Librarian**, Mr. Herbert C. Fyfe.

Royal Irish Academy. A scientific and literary society, meeting in Dublin, incorporated by royal charter of George III., 1786, and having 400 members. The Academy publishes "Transactions" and "Proceedings," containing papers on Science and Polite Literature and Antiquities. **President**, Earl of Rosse, D.C.L., LL.D.; **Treasurer**, Rev. M. H. Close, M.A.; **Secretary**, Rev. J. H. Bernard, D.D.; **Secretary of Council**, R. Atkinson, LL.D.; **Librarian**, G. A. J. Cole, F.G.S.; **Secretary of Foreign Correspondence**, R. F. Scharff, Ph.D. **Academy House**, 19, Dawson Street, Dublin.

Royal Masonic Benevolent Institutions and Funds. See **FREEMASONRY**.

Royal National Lifeboat Institution. See **LIFEBOATS**.

Royal Niger Company Act, '99. See **SESSION**, sect. 100.

Royal Normal College and Academy of Music for the Blind, Upper Norwood, London. Established March 1st, '72. Patron, Her Most Gracious Majesty the Queen. **Chairman of Executive Committee**, Right Hon. J. A. Campbell, LL.D., M.P.; **Vice-Chairman**, Sir John Stirling Maxwell, M.P.; **Treasurer**, Rt. Hon. Lord Stalbridge; **Hon. Sec.**, Arthur Miall, Esq.; **Principal**, F. J. Campbell, Esq., LL.D. **Lady Superintendent**, Mrs. F. J. Campbell. The College embraces a **Preparatory School**, a **Grammar and High School**, a **Technical School**, and an **Academy of Music**. The instruction includes (1) general education, and the preparation of those who desire it for the University Examinations; (2) the science and practice of music; (3) the training of teachers; (4) pianoforte-tuning. The founders were convinced that the condition of the blind in this country could be improved by the employment of new and progressive methods of instruction, based upon a thorough course of physical training, and that thus many could be prepared for self-maintenance. The results have more than justified that expectation. Eighty to ninety per cent. of all the pupils who have completed their course of training at the college are now self-sustaining men and women, their earnings during the past year having been about £25,000. It is important to remember that these pupils have, with few exceptions, been drawn from the poorest classes, and if they had not had this practical training would to-day be dependent

upon charity. The work of the institution is not only philanthropic but also eminently economic. From a national point of view, therefore, it is deserving of that liberal support which is indispensable to success. The work is carried on by voluntary subscriptions, and is in need of increased support, especially in the shape of annual subscriptions. Donations and subscriptions can be paid to the Principal at the College, or to the Bankers, Messrs. Barclay & Co., Ltd., 1, Pall Mall East, S.W.

Royal Observatory, Greenwich. The great increase in British maritime trade in the seventeenth century rendered the determination of longitude at sea a pressing necessity. The subject was brought to the notice of King Charles II., who, on understanding that the first requisite was a more accurate knowledge of the positions of the moon and principal stars, founded the Royal Observatory at Greenwich in 1675, on the hill which was formerly the site of a castle built in 1437 by Humphrey, Duke of Gloucester. The first observation was made on Sept. 19th, 1675. The Director of the Observatory is styled the **Astronomer Royal**, and is under the official control of the Admiralty, but receives his appointment directly from the Prime Minister, and holds office by warrant under the Royal sign manual. It has been the fortune of the Observatory to have at its head such men as Flamsteed, Halley, Bradley, Maskelyne and Airy. The present Director is Mr. W. H. M. Christie, C.B., F.R.S. (q.v.). The meridian observations of sun, moon, planets and stars, which constitute the fundamental work, are made with a fine transit-circle of 8 inches aperture. An altazimuth on a new principle with telescope of 8 inches aperture has been constructed to supplement the observations with the transit circle. The largest instrument is a 28-inch refractor, with a spectroscope attached which has been recently mounted. Another fine instrument is the **astrophotographic equatorial** designed for work in connection with the "Photographic Chart of the Heavens." It consists of two telescope tubes rigidly connected and parallel, one carrying a 10-inch telescope lens, the other a 13-inch photographic lens by which the star images are imprinted on the photographic plate. A new equatorial, having on one side of the declination axis a lens corrected for photographic rays of 26 inches aperture, and on the other side a mirror of 30 inches diameter, has recently been presented to the Observatory by Sir Henry Thompson. A photographic spectroscope is mounted on the reflector. There are several smaller refractors used for observing comets, occultations of stars by the moon, Jupiter's satellites, etc. **Photographs of the sun** are taken on every available day, and after being measured are carefully stored for reference. Magnetic and meteorological observations, made continuously, form an important branch of the work. The **chronometers** used in the Navy are purchased, and generally examined, at the Observatory. The average number being tested daily is nearly 400. Hourly and daily time-signals are sent out from the Observatory through the Post Office telegraphs giving Greenwich time to all parts of the country. By the influence of Sir Isaac Newton a Board of Visitors was instituted in 1710 to visit the Observatory and receive the Astronomer Royal's report of the work of the past year. This Board, which is recruited from our lead-

ing scientists, meets at the Observatory each year on the 1st Saturday in June. Persons desirous of visiting the Observatory must satisfy the Astronomer Royal that they are interested in astronomy. Office hours 9 to 4.30.

Royal Scottish Academy, instituted in 1826, incorporated in '38, consists of three orders—viz., Academicians, Associates, and honorary members. A supplementary charter was granted in '91, by which the Academicians were empowered to add to the number of Associates, certain privileges being also granted the latter class. Each member is entitled to exhibit in the annual exhibition five works. **President**, Sir George Reid; **Secretary**, George Hay; **Treasurer**, John Hutchinson; **Librarian**, W. D. McKay; **Clerk**, James Hastings.

Royal Scottish Geographical Society. This Society was founded in '84 to promote inquiry into all subjects of geographical interest, to give special attention to Scottish topography, to form a library, to press for the recognition of geography as a branch of Higher Education, and for other objects. There are 1623 members, including 100 ladies. Monthly meetings are held in Edinburgh and Glasgow; meetings are also held in Dundee and Aberdeen, and lectures and papers are given and read, while the Society publishes monthly the *Scottish Geographical Magazine*. The **President** is the Marquis of Lothian, the **Editor and Librarian** Mr. W. A. Taylor, M.A., and the **Secretary** Lieut.-Col. Fred. Bailey. The **Head-quarters** are at Queen Street, Edinburgh.

Royal Society, Burlington House. A society formed in 1660 for the pursuit of science, now famous throughout the world. Charles II. in 1662 granted the Society a charter of incorporation. This was followed by a second in 1663, giving further privileges. By that the Society was named "The President, Council, and Fellows of the Royal Society of London, for Improving Natural Knowledge." Meetings for reading and discussing scientific papers are held weekly on Thursday afternoons at 4.30 p.m. from November to June. The Society awards the Copley, Rumford, two Royal, Davy, Darwin, and Buchanan, medals, each annually, with the exception of the Rumford and Darwin, which are given biennially, and the Buchanan, which is given quinquennially. The Copley is the most highly prized, and may be awarded to Englishmen or foreigners, and only goes to distinguished savants. Sir William Huggins was the recipient in '98. Among the presidents have been Sir Isaac Newton, Sir Christopher Wren, Samuel Pepys, Sir Hans Sloane, Martin Folkes, Sir Joseph Banks, Sir Humphry Davy, Sir Joseph Hooker, Prof. Huxley, Sir Gabriel Stokes, and Lord Kelvin. The Lord Lister, F.R.C.S., is the present President. There are now upwards of 450 Fellows and 50 Foreign Members. Fellows elected, '99: Prof. William F. Barrett; Charles Booth, D.Sc.; Major David Bruce, R.A.M.C.; Right Hon. Lord Curzon of Kedleston; Henry John Horstman Fenton, M.A.; James Sykes Gamble, C.M.G., M.A.; Prof. Alfred Cort Haddon, M.A.; Henry Head, M.D.; Prof. Conwy Lloyd Morgan, F.G.S.; Clement Reid, F.G.S.; Prof. Henry S. Hele-Shaw, M.I.C.E.; Right Hon. George John Shaw-Lefevre; Ernest Henry Starling, M.D.; Prof. Henry W. Lloyd Tanner, M.A.; Richard Threlfall, M.A.; Alfred E. Tutton, B.Sc.; Prof. Bertram C. Allen Windle, M.D. The rooms of the Society are enriched with busts and

paintings, while the library contains 50,000 volumes, and there is a unique collection of relics, many of which relate to Sir Isaac Newton. **Secretaries**, Prof. Sir M. Foster, K.C.B., M.D., and Prof. A. W. Rücker, D.Sc., Burlington House, Piccadilly, W. **Assistant Secretary**, Robert Harrison.

Royal Society of Painter-Engravers and Engravers, The, was founded in 1881 by Sir Francis Seymour Haden, who has thus stated its object: "The purpose of this Society is not merely the restoration of original etchings, but the re-infusion, into all forms of engravers' work, of those personal qualities which, whatever the process employed, in the hands of the great masters of painting made engraving a fine art." **Annual Exhibitions** of the work of members are held by the Society at the Gallery, 5A, Pall Mall East, in the spring of each year. All forms of engraving on metal, whether by the burin, the etching needle, by mezzotint or aquatint, or by whatever other process, are eligible for exhibition. **Secretary**, Cloudesley Brereton, M.A., L. ès L. The **Offices** of the Society are at 5A, Pall Mall East, S.W.

Royal Society of Painters in Water Colours. The older of the two Water Colour Societies was founded in 1804, and has held exhibitions annually since that date. The Summer Exhibition is opened to the public towards the end of April, and the Winter Exhibition, which chiefly comprises sketches and studies, opens on the 1st of December. The number of members is forty, while the number of associate exhibitors is unlimited. The exhibitions of the Society, which are held at their galleries, 5A, Pall Mall East, S.W., are confined to the works of members and associates. **President**, E. A. Waterlow, R.W.S.; **Secretary**, Percy Edsall. Attached to the Society is an "R.W.S. Art Club," established '84, for the purpose of holding a series of *Conversazioni* to which members are invited to send works of art for exhibition. **President**, H. M. Marshall, R.W.S.; **Secretary**, Aubrey Stewart, 71, Mornington Rd., N.W. **Office**, 5A, Pall Mall East.

Royal Statistical Society, The, was founded in 1834, and incorporated by royal charter in '87. It has accumulated an extensive library (amounting at the present time to upwards of forty thousand volumes), bearing on statistical and economic subjects. Throughout the session papers on statistical subjects are read and discussed at its monthly meetings. Two medals, the Guy and the Howard, are annually offered for competition. The *Quarterly Journal*, now in its sixty-second year of publication, contains a valuable record of the progress of statistical science, to whose development, both at home and abroad, the Society has so greatly contributed. **President**, the Rt. Hon. Sir H. H. Fowler, G.C.S.I., M.P. **Hon. Secretaries**, Noel A. Humphries and J. A. Baines, C.S.I. **Hon. Foreign Secretary**, Major P. G. Craigie. **Assistant Secretary and Editor of the Journal**, Benedict W. Ginsburg, M.A., LL.D.

Royal United Service Institution, Whitehall, S.W., was established in 1831, for the promotion of naval and military art, science, and literature. Being only in quarterly occupation of the buildings in Whitehall Yard, an address was presented to Her Majesty the Queen, Oct. '90, setting forth the request of the Institution that the Banqueting House of the old Palace of Whitehall might be granted to it for a museum. Her Majesty instructed the

Lord Chamberlain, in Dec. '90, to convey to the Institution her compliance with this desire. On Jan. 1st, '95, the transference took place. No interference has been made with the architecture of the structure. The **Museum** contains, besides Rubens' celebrated ceiling, the famous models of Trafalgar and Waterloo, interesting naval and military relics, and models of modern war-vessels. Admission *6d.* daily: April to September, 11 to 6; October to March, 11 to 4. **President**, H.R.H. the Duke of Cambridge. **Chairman of the Council**, Lieut. Gen. Lord Methuen, K.C.V.O., C.B., C.M.G. **Secretary**, Lieut.-Col. R. Holden, F.S.A.

Royal University of Ireland. See IRELAND, ROYAL UNIVERSITY OF.

Royal Victorian Order. See VICTORIAN ORDER.

Rugby School. Founded by Lawrence Sheriff, a native of Rugby (1567), and originally entrusted to two trustees, in place of which twelve gentlemen of Warwickshire were appointed by Commissioners under the Great Seal in 1602. The boys are divided into **foundations** and **non-foundations**. Has, every July, 100r 12 entrance and other scholarships of £100 to £20, and 7 **Leaving exhibitions** tenable at the Universities for 4 years, 3 of £60 and 4 of £30 annual value. **Pupils**, 580; admission at the age of 12. **Head Master**, Rev. H. A. James, M.A., D.D. (*q.v.*). **Motto**, *Orando laborando*. Some distinguished alumni: Sir Ralph Abercrombie; Cave, Dr. Johnson's friend, and originator of *The Gentleman's Magazine*; Macready, the celebrated actor; Dr. S. Butler, afterwards Master of Shrewsbury School; Walter Savage Landor; T. Hughes; Lord Derby; Dean Stanley; Arthur H. Clough; Matthew Arnold; Lord Bowen; Professor T. H. Green; F. C. Selous; G. J. Goschen; Sir H. Drummond Wolff; Lord Davey; Dean Bradley; Dean Vaughan; C. L. Dodgson ("Lewis Carroll"); and Lord Brassey. In '89 it was decided to establish a **Home Mission**, in addition to the Fox Memorial Mastership in India, in connection with the School. Consult *Rugby School Register*.

Rules of Procedure. See PARLIAMENT AND PARLIAMENTARY PROCEDURE.

Rumbold, Sir Horace, Bart., G.C.M.G., H.M. Ambassador at Vienna, is the son of Sir William Rumbold, Bart., and was b. in 1829. He was appointed Attaché at Washington in '49, and served successively at Florence, Paris, Frankfurt, Stuttgart, and Vienna. In '58 he was appointed Secretary of Legation at Peking, and in '62 filled a similar post at Athens. Further promotion led him to St. Petersburg, as Secretary of the Embassy there, in '68, and thence he was transferred to Constantinople in '71. In '72 he became Minister and Consul-General in Chili, and thereafter he acted as Minister at Berne '78, to the Argentine '79, to Sweden and Norway '81, to Greece '84, and to the Netherlands and Luxembourg '88. In Aug. '96 he was appointed to succeed Sir Edmund Monson at Vienna.

Rural Dean. See CHURCH OF ENGLAND. **Rural Labourers' League**, The, was established in May '88. Its **President** is the Right Hon. Jesse Collings, M.P. The objects of the League are: To assist in putting into operation the Allotment Acts of '82, '87, and '90; Small Holdings Act, '92; and the Parish Councils Act, '94. To assist every practical effort to secure a more direct connection of the agricultural population with the soil. To assist in

the promotion of a practical scheme, either by old-age pensions or some other means, by which the agricultural labourer may be relieved of the necessity of ending his days in the workhouse, and may have secured to him a condition of reasonable comfort in old age. **Hon. Secretary,** Mr. Frank Smith. **Offices,** 95, Colmore Row, Birmingham.

Ruskin, John, M.A., LL.D., was b. in London 1819. Educated at Christ Church, Oxford, where he gained the Newdigate prize ('39). Having early developed a taste for art, he studied with great success under Copley Fielding and Harding, and, becoming enamoured of Turner's paintings, he wrote a letter in defence of Turner, in response to an attack made on him in *Blackwood's Magazine*. This developed into the celebrated work "Modern Painters," vol. i. ('43), which obtained a great success, though it evoked some sharp criticism on the part of those who dissented from his views. He resided for some time in Italy, and subsequently published the remaining volumes of "Modern Painters," making five (all issued in '46-60). These contained valuable illustrations by himself, and have run through many editions. He had previously ('49) written "The Seven Lamps of Architecture" and "The Stones of Venice" ('51-3); both books have been frequently reprinted. He has also written extensively on economic and other questions; and more recently was engaged upon his autobiography, which has been brought out at very irregular intervals under the title of "Præterita." A third volume, containing the four last written chapters with a hitherto unpublished part of "Dilecta," was announced at the end of Nov. '99. Address: Brantwood, Coniston.

Ruskin Hall, Oxford. The object of the Hall is to bring the advantages of a university education within the reach of every man and woman in England. The education at which it aims is one which will enable its students to intelligently fulfil their duties as citizens, and to form impartial and educated opinions on the political and social problems which every true citizen is called upon to face. The education is carried on by two methods: first, by the Resident Hall in Oxford, intended for those who are able to leave their work and come to Oxford for a year; and, secondly, by the Ruskin Hall Correspondence School, intended for those who wish to study, but at the same time to continue the employment which forms their means of livelihood. Ruskin Hall will act largely as a training college for the future leaders of the movement. The Ruskin Hall Correspondence School has already gathered within its fold immense numbers of working men. The system of tuition in the latter is too elaborate for detailed description, but it may be said that, by means of forming classes and starting branches in every centre of population, and by individually directing each student, the founders ensure that any man who desires it can gain a thorough education under the personal guidance of the staff of tutors of Ruskin Hall. The movement, although not a year old, has already met with enormous success. The fees for residence at Ruskin Hall are £31 per year, including board, lodging, and tuition. The fees for members of the Correspondence School are 1s. entrance fee, and 1s. a month. Further information can be obtained from H. B. Lees Smith, B.A., Ruskin Hall, Oxford.

Ruskin Society of London (Society of the Rose) was established in '81. It invites the help of all earnest friends of Mr. Ruskin and students of his works, and suggests the establishment of local centres as branches or reading societies. It offers public readings, papers and addresses, in exposition of Mr. Ruskin's writings and teachings, to literary and other associations. It possesses a good library of Mr. Ruskin's works (most of which have been presented to the Society by the author) for the use of members. Subscription, 5s. For information as to the Society apply to Mr. J. P. Smart, jun., 5, Mount View Road, Crouch Hill, N.

Russell, George W. E., the younger son of Lord Charles Russell, and grandson of the 6th Duke of Bedford, was born in London Feb. 3rd, 1852. Educated at Harrow and University College, Oxon., of which he was a Scholar and Prizeman, he became M.P. for Aylesbury in '80, and was appointed Parliamentary Secretary to the Local Government Board '83-5. He returned to the House of Commons as Member for North Beds, '92-5, and held the offices of Under-Secretary of State for India '92-4, and for the Home Department '94-5. He was also an Alderman of the London County Council '89-95. His literary achievements include a memoir on Mr. Gladstone contributed to the Prime Ministers series, and the "Letters of Matthew Arnold," which he edited. In '96 and '97 he was prominent as a leader of the "Liberal Forward" Movement with regard to Armenia and Crete. In '98 published "Collections and Recollections." Address: 18, Wilton Street, London, S.W.

Russell of Killowen, Lord. See under PEERAGE.

RUSSIA.

Russia is one of the largest of the military powers of Europe. It has a European area of 2,095,616 sq. miles, and the total area of the Empire, including the Asiatic possessions, is 8,660,395 sq. miles. The total population is about 130,000,000. The fifty governments of European Russia contain 94,215,415 people, the Vistula Province (Poland) 9,455,943, Finland 2,520,437, the Caucasus 9,248,695, Siberia 5,727,070, and Central Asian possessions (Turkestan and Transcaspia) 7,721,684. The Slavs constitute nearly two-thirds of the population (about 70,000,000), of whom 5,000,000 are Poles; the rest of the population being made up of Lithuanians, Finns, Germans, Tartars, Jews, Armenians, and a variety of Asiatic peoples. The population of the capital, St. Petersburg, is about 1,270,000. The Government is an autocracy, the Czar being the supreme ruler and legislator, and the only source of power in the body politic. He, however, entrusts the administration of the empire to four chief Councils, known respectively as the Council of State, a consultative body, the members of which he appoints, and which is divided into three departments, viz. Legislation, Civil and Church Administration, and Finance; the Ruling Senate, which is a partly deliberative and partly executive body, and promulgates all laws; it also supervises the general administration of the empire, superintends courts of law, and is the high court of justice for the empire; the Holy Synod, which superintends religious matters; and the Committee of Ministers, consisting of the twelve Ministers, with four Grand Dukes, and other functionaries.

For purposes of local government the empire is divided into the five general governments of Finland, Poland, Wilna, Kieff, and Moscow, with 68 governments and 635 districts in European Russia; and into the five general governments of the Caucasus, Turkestan, the Steppes, Irkutsk and the Amur, 10 governments, 17 territories and 3 districts in Asiatic Russia. In European Russia the country is divided into communes, groups of which are united to form cantons. Communal and cantonal affairs are decided by communal and cantonal assemblies. The administration of the districts is to some extent, and in some governments, entrusted to elective district assemblies, called *zemstvos*, in which the land-owning nobles have great power. There are elective administrative bodies in most towns and cities. The State religion is Græco-Russian, called the Orthodox Catholic Faith. The Emperor is the head of the Church, but the Holy Synod is the board of government. The orthodox number 75,000,000; Roman Catholics 8,300,000, Protestants 2,950,000, Jews 3,000,000, Mohammedans 2,600,000. In educational matters Russia is perhaps the most backward country in Europe. There are comparatively few primary schools, though the lack of official information on the subject may make matters seem worse than they are. The administration of justice, though nominally reformed in '64, is very defective. Grain and other agricultural products, timber, naphtha, flax, linseed, and hemp are among the chief products of the country. By an Imperial Ukase, issued Nov. 26th, '97, the currency was established on a gold basis, and the relative value of silver and paper roubles in gold was permanently fixed. There were in '99 29,700 miles of railway opened and working in the empire. **Total revenue**, '97, £150,450,600; **expenditure**, £158,801,054; **exports**, '98, £79,819,871; **imports**, £76,357,609; **total debt**, '98, about £715,000,000, including about £250,000,000 in-

curring in respect of railways. See CHINA, DIPLOMATIC, FOREIGN ARMIES, FOREIGN NAVIES, SIBERIA, etc.

History, '99. The financial estimates for '99 stated that the ordinary revenue would exceed the ordinary expenditure by 6,468,970 roubles, while the extraordinary expenditure would exceed the extraordinary revenue by 98,604,443 roubles, this deficit, and indeed the whole of the extraordinary expenditure, being entirely due to railway development. The reserve fund of the Treasury, it was announced, would cover the deficit, and so no new loan was required. A circular was issued by the Russian Government suggesting a preliminary interchange of ideas between the Cabinets in order to prepare the way for diplomatic discussion of the Czar's proposal. In many districts the distress that prevailed during the spring from famine was said to be greater even than in the great famine of '97. An agreement between Great Britain and Russia upon their respective aims and interests as to railway development in China was come to and signed at St. Petersburg (April 30th) (see CHINA). The Peace Conference was duly opened on the Czar's birthday (May 18th) at The Hague. (A full account is given of the proceedings in the separate article under the heading PEACE CONFERENCE). On the same day his Majesty constituted a Commission, presided over by the Minister of Justice, to consider the question of abolishing the system of transporting criminals to Siberia, this system being regarded as injurious to Siberia itself. The Commission was ordered to consider the substitution of some other kind of punishment, and the improvement of the condition of exiles now in Siberia. The Czarina gave birth to her third daughter, who was named Marie (June 26th). The Grand Duke George, heir to the throne, died (July 10th), and the Grand Duke Michael Alexandrovitch became Czarevitch.

Russia, Czar of. See NICHOLAS.

S

Said Hamud bin Mahomed, the present Sultan of Zanzibar, was placed on the throne by the British Government in August '96. His predecessor, Hamid bin Thwain, died suddenly, and a cousin, Said Khalid, tried to usurp the throne, but was driven from the palace by the British forces and the rightful ruler proclaimed Sultan. He is a man of about fifty, and is well disposed towards Great Britain. See ZANZIBAR.

St. Albans, Bishop of. See under PEERAGE.

St. Andrews University, founded 1411, is thus the most ancient of the Universities of Scotland. It included three separate colleges and corporations: (1) **St. Salvator's** (1450), (2) **St. Leonard's** (1512), and (3) **St. Mary's** (1537). In 1747 the two first-named were united and took the faculties of arts and medicine; **St. Mary's** being devoted to theology. **University College, Dundee** (founded in 1880), was affiliated to and made to form part of the University of St. Andrews by an ordinance which received the approbation of Her Majesty Jan. 15th, '97. **Chancellor**, the Duke of Argyll; **Vice-Chancellor and Principal**, J. Donaldson, M.A., LL.D.

Rector, James Stuart, LL.D., M.P. Jointly with Edinburgh University it returns a representative to Parliament—the present member is Sir William Overend Priestley, M.D., LL.D. **Registrar**, Mr. John E. Williams. **Degrees:** M.A., B.D., D.D., LL.D., M.B., Ch.B., M.D., B.Sc., D.Sc. The Bachelors in the several faculties—divinity, law, medicine, and science—have the hoods of their faculties bordered with white fur instead of lined with white satin. The diploma and title of LL.A. is also granted to women. In Oct. '92 the classes of the University and also the degrees of M.A., B.Sc., M.B., Ch.B., and M.D. were thrown open to women. A number of bursaries are available for women students, and a Hall of Residence has been built on the University grounds for their accommodation. **Warden:** Miss L. I. Lumsden.

St. Asaph, Bishop of. See under PEERAGE. **St. Christopher**, or **St. Kitts**. A British West Indian island, forming with Nevis and Anguilla a Presidency of the federal colony of the Leeward Islands. Area of St. Kitts, 68

sq. miles; pop. 29,137. There is an Executive Council for the Presidency, and a Legislative Council of 10 official and 10 unofficial members, 7 from St. Kitts and Anguilla, and 3 from Nevis. Capital, Basseterre, with a population of about 10,000. For statistics see BRITISH EMPIRE (table).

St. Davids, Bishop of. See under PEERAGE.
St. Deinio's Library, Hawarden, of the foundation of William Ewart Gladstone. The main design of the institution, as declared by the founder, is the promotion of Divine learning in connection with the Church of England. All students, whether clerical or lay, and without restriction of communion or religion, are welcome to the opportunities it offers. The Library, for the sustentation and growth of which provision is made, includes the whole of Mr. Gladstone's personal collection, amounting to nearly 35,000 volumes. It is about equally divided between divinity and humane letters, the latter embracing extensive sections on Homer, Dante, Shakespeare, and ancient and modern literature and history. In the Hostel attached to it, board and lodging are provided at a cost of 25s. per week, and there exists a small student's fund, for the further help of such as may have need of it. The rules are simply those of a common household. Students were first admitted to the Library in the beginning of '94. In Jan. '96 the foundation became vested in trustees. The first stone of the new buildings, to be erected by the nation in memory of the founder, was laid Oct. 5th, '99. Application for admission should be made to the Warden, the Rev. Gilbert C. Joyce.

St. Helena. Is an island in the South Atlantic belonging to Great Britain, 1140 miles from the African coast, and 800 miles S.E. of Ascension, the nearest land. Port and capital is Jamestown. The opening of the Suez Canal and the consequent diversion of shipping from the island have led to its continuous decline of late years. It is administered by a Governor and Executive Council. Area, 47 sq. m.; pop. 4543. An effort is being made to set up a fishing and fish-curing industry. For statistics see BRITISH EMPIRE (table); see also DIPLOMATIC.

"St. James's Gazette." An evening review and newspaper; founded in 1880. In politics the paper has always maintained a somewhat independent and individual line, while giving a general support to the Conservative and Liberal Unionist parties. In addition to articles on the political questions of the day, it contains interesting papers and sketches on social, literary and scientific topics, an epitome of the news of the morning, and the latest sporting, financial and general intelligence of the afternoon. Mr. Hugh Chisholm is the editor, and Mr. Theodore A. Cook is his principal assistant. The **"St. James's Budget,"** a weekly illustrated paper, is published in connection with the *Gazette*. Office, Dorset St., Whitefriars, E.C.

St. Lucia. A British West Indian island forming part of the Crown colony of the Windward Islands, of which it is the most northerly. Area about 234 sq. m.; pop. 47,332. Capital, Castries, the harbour of which is one of the best in the West Indies. The whites are mostly French Creoles; the dominant religion Roman Catholic, and education chiefly so; the law is based on old French codes. The scenery of the island is exceptionally beautiful. Products chiefly sugar, logwood, cocoa, tobacco, and spices. Government in the hands of an

Administrator with an Executive and a Legislative Council. For financial statistics see BRITISH EMPIRE (table).

St. Michael and St. George, the most Distinguished Order of, was instituted in 1818, and enlarged in '68, '77, and '87, and is the order to which subjects of Her Majesty who have taken a distinguished part in colonial and foreign affairs are generally admitted. It consists of the Sovereign, a Grand Master (the Duke of Cambridge), and three classes of members:—

G.C.M.G. . . . Knight Grand Cross.

K.C.M.G. . . . Knight Commander,

C.M.G. . . . Companion.

Members of the first two classes, being Knights, are entitled to the prefix "Sir." The first class is to consist of 65 members, exclusive of honorary members and princes of the blood, the second of 150, and the third of 260 members. Prelate of the Order is Dr. Machray, Bishop of Rupert's Land. The motto of the Order is *Auspicum melioris avi*. See KNIGHTHOODS.

St. Patrick, Most Illustrious Order of. Established in 1783 by George III., and is to consist of the Sovereign, a Grand Master, who is the Lord-Lieutenant of Ireland for the time being, and twenty-two Knights. Its abbreviation is K.P.; its badge is suspended from a sky-blue ribbon, with motto *Quis separabit?* There are, at present, twenty-eight K.P.s, including the sovereign and princes of the blood, and subjoined is a list of them:—

The Sovereign.

Prince of Wales.	Prince Edward of Saxe-Weimar.
Reigning Duke of Saxe-Coburg-Gotha (Duke of Edinburgh).	Earl of Howth.
Duke of Connaught.	Lord Monteaagle.
Duke of York.	Viscount Wolseley.
Duke of Cambridge.	Marquis of Ormonde.
Earl of Cork.	Earl of Erne.
Marquis of Dufferin and Ava.	Earl of Kilmorey.
Earl of Gosford.	Earl of Rosse.
Viscount Powerscourt.	Lord Inchiquin.
Earl of Kenmare.	Lord Iveagh.
Earl of Listowel.	Earl of Cavan.
Earl of Dunraven.	Lord Roberts.
Earl of Carysfort.	Earl of Arran.
	Earl of Lucan.

Grand Master of the Order, the Lord-Lieutenant of Ireland; **Chancellor of the Order,** the Chief Secretary for Ireland; **Ulster King of Arms and Registrar,** Sir Arthur E. Vicars; **Secretary,** G. Francis W. Lambart; **Genealogist,** H. Farnham Burke; **Usher of the Black Rod,** Col. J. Caulfield.

St. Paul's School, London. Founded A.D. 1509 by John Colet, D.D., Dean of St. Paul's. Is governed under the provisions of a scheme of the Charity Commissioners, dated July 4th, '79, which has, however, since been amended. The school consists of 153 foundation scholars, elected by competitive examination, and of so many capitation scholars as the governors may from time to time decide. The capitation scholars pay a tuition fee of £24 9s. a year. The foundation scholars are exempt from fees. There are now about 600 boys in the school, and 34 masters. The governors give annually eight exhibitions for four years, varying in value from £80 to £30, to the scholars proceeding to Oxford and Cambridge, and one exhibition of £50 for two years for a boy proceeding to the Royal Academy, Woolwich. Among the alumni of St. Paul's were Milton,

Marlborough, etc. **Motto**, *Fide et literis*. **High Master**, F. W. Walker, M.A. **Bursar**, S. Bewsher. **Saint-Saëns**, **Charles Camille**, composer, organist, and pianist, was b. at Paris, Oct. 9th, 1835. He distinguished himself at the Conservatoire under Benoist, and was appointed organist of St. Méry, Paris, '53, and of the Madeleine '58-77. He first appeared in London (as a pianist) in '71; since then his visits have been frequent. He has composed several symphonies, symphonic poems, cantatas, sacred and secular, much chamber music, and many songs. His operas include "Samson et Dalila," first heard at Weimar in '77, and brought to Covent Garden Promenade Concerts, Sept. '93, and "Henri VIII." (Paris '83 and London '98). One of his earliest successes in this country was the quaint "Danse Macabre." He received the Mus. Doc. degree at Cambridge in '94.

St. Vincent. A British West Indian island forming part of the Crown colony of the **Windward Islands**. **Area** about 132 sq. m.; pop. 42,000. **Capital**, **Kingstown**, pop. 4547. **Chief products**: sugar, molasses, rum, and arrowroot. The fisheries are abundantly productive. The Government includes an Administrator and a Legislative Council of 4 official and 4 unofficial members. For financial statistics see **BRITISH EMPIRE** (table).

Sale of Food and Drugs Act, '99. See **SESSION**, sect. 101.

Salisbury, **Bishop of**. See under **PEERAGE**.

Salisbury, **Lord**. See under **PEERAGE**.

Salt. See **TRADE**, '99.

Salvation Army, **The**. A home and foreign missionary society with a semi-military organisation, having its general, chief of the staff, commissioners, colonels, brigadiers, majors, and other officers, both commissioned and non-commissioned, with large contingents of soldiers, after the model of the British army, scattered throughout the world. Originated in the year 1865 by the Rev. William Booth, previously a Methodist minister, the movement was called the Christian Mission until, in '78, the present name was adopted. Its objects are to reach, by means of adaptation, the great masses of the people, both at home and abroad, who are either too degraded or too indifferent to be reached by ordinary religious agencies. This it perpetually strives to do by adapting its work to the understanding and tastes of the people it seeks to reach, rather than by appealing or commending itself to the approval of the more refined classes of society; hence in the earlier days of its history its objects seem to have been much misunderstood, which led to some amount of opposition from legal and other authorities. This feeling, however, now appears to have almost entirely passed away. Although, comparatively speaking, so young a missionary society, its growth has been very rapid. Its own supported and separated officers now number 12,913, and these proclaim the gospel in no less than 29 different languages and dialects. There are also some 36,224 voluntary officials specially selected and appointed to take definite work. The Army publishes in the several countries, in the vernacular, 54 illustrated newspapers and magazines, with a total annual circulation of over 45,000,000, the sale of which is mostly entrusted to its own members. The above summary conveys a brief idea of one side of the Army's work. Another side is the **Darkest England Social Scheme** formulated by General Booth, which

has for its object the immediate alleviation of the present misery of the outcast poor and their actual rescue from destitution, keeping always prominently in view likewise that reformation in character which, undoubtedly, is the true secret of permanent improvement. In this branch of the work the Salvation Army goes to the slums, and ministers to the workless, the homeless, the tramps, the starving, the waifs and stray children of the streets; and amongst the outcasts of society in every land, irrespective of creed or colour. For the accommodation of these this department has, in different parts of the world, 490 shelters, homes, labour factories, and other institutions in full operation, under the guidance of 1983 officers, men and women. Arrangements are to be made to found the Oversea Colony, when the most desirable locality has been fully decided upon by the General and the experts who have the matter in hand. The **International Headquarters** are at 101, Queen Victoria Street, London, E.C. The large **International Trading Depot**, formed mainly to supply the needs of its own institutions and followers, is at Fortess Road, Kentish Town, and the **Printing Works and Publishing Offices** are at 98 and 100, Clerkenwell Road, E.C. The offices of the **City Colony of the Social Scheme** are at 20 and 22, Whitechapel Road, E. The **British Farm Colony** is at Hadleigh-on-Thames, Essex.

Samoa Islands. This group, in the western Pacific, consists of ten inhabited and two uninhabited islands, with an area of 1701 sq. m., an aggregate population of 36,000 souls, of whom 200 are British, 120 Germans, and 30 Americans, with about 50 other whites. It lies north-east of the Fiji group (*q.v.*). The largest is **Savaii**, described as being twice the size of the Isle of Wight. The other chief islands are Upolu (in which is the capital, **Apia**) and Tutuila, which has the magnificent harbour of Pago Pago. About 30,000 of the population are to be found on Upolu and Savaii. Great Britain, Germany, and the United States, represented by three consuls, established themselves in the islands and guaranteed their independence till '99. A Supreme Court was established, consisting of one judge, who is known as the Chief Justice of Samoa. The natives are all nominally Christians. When King Malietoa died (Aug. 22nd, '98), the Consuls of the three Powers, with the Chief Justice as President, took over the administration pending the election of a successor. Mataafa, the old rival of the late King, was elected king by certain of the chiefs, but others disputed the election, and the matter was referred to the Chief Justice for decision (Dec. 8th). After full investigation he declared Malietoa Tanu king (31st), but the German Consul refused to recognise the decision, or to co-operate in the dispersal of the natives hostile to Malietoa. Hostilities broke out, and Malietoa was beaten. He took refuge on board the British cruiser *Porpoise*, which also received the Chief Justice on board. Mataafa's followers then looted many houses in Apia and the surrounding country. In order to protect life and property, the British and American Consuls recognised Malietoa as *de facto* king, and a Provisional Government was formed, with a German subject, Dr. Raffel, at its head. He and the German Consul then proclaimed Dr. Raffel Acting Chief Justice. The British and American Consuls thereupon appealed to the captain of the *Porpoise*, who

landed a force of bluejackets to expel Dr. Raffel and reinstate the Chief Justice. Dr. Raffel was recalled to Berlin in February, and the three Consuls took over his duties as President of the Municipality. At a meeting of the Consuls and the naval officers on board the U.S. ship *Philadelphia*, it was resolved to dismiss the Provisional Government, and a proclamation was issued directing the Mataafa chiefs to return to their homes. The German Consul, however, issued a counter proclamation in support of Mataafa, and his party thereupon assembled in force, barricaded the roads, seized the British houses, and attacked Malietoa's supporters. The town was then shelled by the ships, and in a night attack by the rebels three British sailors and an American were killed. Finally, Germany proposed that a Commission of three representatives, one appointed by each Power, should examine and report upon the state of affairs in the islands and temporarily take over their administration, and the suggestion was accepted by the British and American Governments. Malietoa Tanu was crowned as King (March 23rd). An Anglo-American force was caught in an ambush (April 1st), and several officers and men were killed; but instructions were sent out to do nothing till the Commissioners arrived, and Mataafa and his chiefs agreed to preserve the peace till then (25th). The Commissioners arrived (May 13th), and after a general disarmament Malietoa resigned the kingship, and the office of King was thereupon abolished by the Commissioners. A proclamation was issued (June 10th) continuing the Chief Justice in his office, and constituting the three Consuls, with Dr. Solf, the successor to Dr. Raffel, as adviser, as a Provisional Government. The Commissioners in their report recommended that a Governor should be appointed, with a Legislative Council of three members nominated by the Powers, and a native House of Representatives. The report, however, was rendered useless by subsequent events. An agreement between Great Britain and Germany was concluded (Nov. 9th), whereby, subject to the approval of the United States, the Samoa Act was abolished. Upolu and Savaii were assigned absolutely to Germany, and Tutuila and the other Samoan islands E. of 171° E. long. to the United States, Great Britain renouncing all her rights over the islands. In return Germany renounced in favour of Britain all her rights in the Tonga Islands, including the Vavau group and Savage Island, and ceded to her the German islands of the Solomon group situated to the east and south-east of Bougainville and Buka. It was added that the assent of the United States to the agreement was assured. Equality as to freedom of trade was reserved to all three nations in the islands.

Sanderson, Sir Thomas H., Permanent Under-Secretary at the Foreign Office, was, after gaining a competitive examination, appointed a junior clerk in the Foreign Office in 1859. He served as private secretary to Lord Stanley, afterwards Earl of Derby, Secretary of State for Foreign Affairs from '66-68; assisted the late Lord Tenterden in his duties as H.M.'s Agent at Geneva with reference to the *Alabama* claims, Nov. '71; was again private secretary to Lord Derby from '74-78, and to the late Earl Granville, Secretary for Foreign Affairs from April '80 until June '85. He was created a C.B. in '80;

K.C.M.G. Aug. '87; K.C.B. '93; and Permanent Under-Secretary '94. From '89 down to '94 Sir Thomas was Assistant Under-Secretary at the Foreign Office.

San Domingo is the republic which occupies the eastern end of the island of Hayti (*q.v.*). Area, 18,045 sq. m.; estimated pop. 500,000. It is divided into six states or provinces, and five maritime districts, and is governed by a President, chosen by an electoral college for a term of four years, and a National Congress of twenty-two members elected for two years. Capital, **San Domingo**, pop. 15,000. The inhabitants of the island are composed chiefly of mulattoes, and the Spanish language is that which is chiefly spoken. The State religion is Roman Catholic. Education is free and compulsory. There is said to be now some progress, and the country is being opened up by railways. Exports consist of valuable timbers, coffee, tobacco, cocoa, and sugar. Revenue, '97, about £320,000; expenditure (no returns); foreign debt, about £3,400,000; imports, '97, £375,000; exports, £557,000.—History, '99. A man named Ramon Caceres assassinated General Heurieux, President of the Republic (July 26th). The Vice-President, General Figuero, immediately assumed the presidential functions, and was appointed President (31st), but revolutionary disturbances soon broke out and he resigned (Aug. 31st). A Provisional Government, under Señor Vasquez, was then formed.

Sanitary Institute, The, was founded in 1876 and incorporated in '88. The objects of the Institute are "to promote the advancement of Sanitary Science in all or any of its branches, and to diffuse knowledge relating thereto." A congress for the consideration of subjects relating to Hygiene, and an Exhibition of Sanitary Apparatus and Appliances, are held by the Institute periodically. Sessional meetings of the Institute are held in London from time to time, for the reading of papers and for discussions upon subjects connected with sanitary science. Examinations are held, and certificates of competency in sanitary knowledge are granted. The examinations are held in London and also in provincial centres, and as at present arranged are adapted for inspectors of nuisances, and for meat inspectors. Examinations are also held in Practical Sanitary Science and in Practical Hygiene for School Teachers. The **Parkes Museum**, which is maintained by the Institute, and is open daily from 10 a.m. to 6 p.m., and on Mondays to 8 p.m., contains a great variety of the most approved forms of apparatus and appliances relating to health and domestic comfort. There is a large library of sanitary literature, and a reading-room supplied with the principal sanitary periodicals, both home and foreign. Members are elected by ballot by the council. The annual subscription payable by a member is £2 *as.*, but medical officers of health and some others holding sanitary qualifications pay only an annual subscription of £1 *rs.* Fellows and associates are elected by the council. Officers: President, H.R.H. the Duke of Cambridge, K.G.; Treasurer, Professor W. H. Corfield, M.A., M.D. Oxon; Registrar, Sir Guyer Hunter, K.C.M.G., M.D.; Secretary, E. White Wallis, F.S.C. Offices, 72, Margaret Street, London, W.

San Salvador, a republic of Central America, bounded on the south by the Pacific and on

the north by Guatemala and Honduras, is governed by a President and a Congress of seventy Deputies, elected respectively for four years and one year, by married men, or those who can read and write and support themselves. Honduras, Nicaragua, and San Salvador constituted themselves the United States of Central America in '66 for the purposes of foreign affairs, but the arrangement fell through in Nov. '98. Education is free and obligatory. The bulk of the population are engaged in agricultural pursuits. The chief products are coffee, indigo, sugar, and tobacco. **Area**, 7225 sq. m.; **pop.** 803,534. **Capital**, San Salvador, pop. 25,000. **Revenue**, '94, £1,231,000; **expenditure**, £1,224,000; **external debt** estimated at £254,000; **imports**, '96, £1,900,000; **exports**, £1,500,000. See DIPLOMATIC.

Santa Cruz or Ste. Croix. A West Indian island, the largest of the Virgin group. Belongs to Denmark. **Capital**, Christianstadt. It is governed, in connection with St. Thomas and St. John, by an officer appointed by the Danish Crown. The negroes who make up the bulk of the population are chiefly engaged in the cultivation of the sugar-cane. See COLONIES, ETC., OF EUROPEAN POWERS.

Santley, Charles, was b. at Liverpool 1834. Studied in Italy, and on his appearance in London in '57 at once took high rank, his first great success being achieved at Covent Garden in '59, when he took the part of Hoel in *Dinorah*. He has been a favourite baritone on the operatic stage, and is still indispensable at the Handel Festivals. In '89-90 he achieved a series of triumphs in *Australia*, and at the Cape in '93. Published (Nov. '92) his reminiscences, entitled "Student and Singer."

Sarawak. See BORNEO.

Saxe-Coburg, H.R.H. Prince Alfred Alexander William Ernest Albert, Duke of, and 1st Duke of Edinburgh (creat. 1866), K.G., K.T., K.P., G.C.S.I., G.C.M.G., G.C.V.O., was b. 1844; second son of the Queen. Married in '74 the Grand Duchess Marie Alexandrovna, dau. of the late Alexander II. of Russia. Entered the Royal Navy '58; **Admiral** in command of the *Mediterranean Squadron* '86. Late Master of the Trinity House. In June '88 he was promoted to the honorary rank of a **General of Infantry** in the German army. The Duke of Saxe-Coburg and Gotha died Aug. 22nd, '93, and H.R.H., as heir presumptive, succeeded him in the Duchy, and took the oath of loyalty to the constitution in the presence of the Emperor William. The question at once arose of his position in regard to the allowances made him by Parliament, and in regard to the House of Lords and the Privy Council. According to a statement made by Mr. Gladstone in the House (Dec. 22nd), he voluntarily relinquished the annuity of £15,000 conferred on him in '66, but retained the annuity of £10,000 given in '73, stating that he intended to pass a portion of every year in England, and to keep up his establishment at Clarence House. His name was omitted from the Privy Council list, and his position as to the House of Lords was left to the decision of that House. On the death of his son and heir, Prince Alfred, in '99, the Duke of Connaught, the next in order of succession, resigned for himself and his children his rights in favour of the young Duke of Albany, who was then recognised as the heir-presumptive, and went to Coburg to receive a German

education there. Saxe-Coburg has an area of 755 sq. m., and 216,603 inhabitants.

Saxony. Pop. 3,187,688. For Ministry, etc., see DIPLOMATIC.

Schreiner, The Rt. Hon. T., is the son of the Rev. Mr. Schreiner, a Lutheran clergyman of South Africa, and brother of Olive Schreiner the well-known authoress. He was educated at Cambridge, where he studied for the law. Having taken his degree he returned to South Africa, and commenced practice as a barrister at the Cape. He soon obtained a considerable reputation, and when Mr. Rhodes became Prime Minister of the Cape Parliament Mr. Schreiner was appointed Attorney-General. It thus became his duty to advise the Cape Government when the closing of the Drifts to all Colonial traffic was proclaimed by President Kruger in '95; and he then gave it most authoritatively as his opinion that the action of the South African Republic was in direct opposition to the terms of the London Convention. This view being also taken by the Crown lawyers in England, the Imperial Government, supported by the Cape Ministry, including Mr. Schreiner himself, brought such strong pressure to bear upon the South African Republic as nearly resulted in war. In the early part of '97, however, when Mr. Schreiner was examined before the South African Committee at Westminster, he expressed himself as being now of the opinion that arbitration would have been a better solution of the difficulty, though he was still convinced that the closing of the Drifts was a violation of the London Convention. Mr. Schreiner and Mr. Rose Innes are considered the two most able debaters in the Cape House of Assembly. It was on Mr. Schreiner's motion of want of confidence that Sir Gordon Sprigg's Government was defeated (Oct. 11th, '98), and he afterwards became Premier, with the support of the Afrikaner Bond. His position was a most difficult and delicate one during '99 because of the Transvaal trouble. See CAPE COLONY and TRANSVAAL.

Science and Art Department, The, of the Committee of the Council on Education. Under this department are the Royal College of Science, South Kensington (*q.v.*), with which is incorporated the Royal School of Mines, and the Royal College of Art, S. Kensington, numerous schools of science and art, which receive payments on attendance, on results, grants in aid, etc., the Victoria and Albert, Bethnal Green, and Indian Museums, the Science and Art Libraries, the Museum of Practical Geology, Jermyn Street, the Museums of Edinburgh and Dublin, and the Geological Survey of the United Kingdom. The department holds annual examinations to test the science and art teaching in the various elementary, secondary, and special science and art schools in England, Wales, and Ireland, as well as in the colonies. Special examinations for navigation schools may be held. Payments are made for instruction in drawing and science, and for Manual Instruction in public elementary schools and training colleges, and grants are made in aid of technical instruction and of local museums. The sum of money voted annually by Parliament for these purposes is liable to be decreased and eventually discontinued. Grants are intended

to supplement and not to supersede local effort. Every Science and Art school or class must be under the superintendence of managers responsible to the Department. It must not be conducted for private profit or farmed out to the teacher; and it must have local support either in the form of fees and subscriptions or of rates. Where a satisfactory organisation is constituted in a county or county borough it can be recognised as responsible to the Department for Science and Art instruction, and be made the agent of the Department for the distribution of grants within its area. Out of 49 administrative counties and 61 county boroughs, 28 County Councils and 15 Borough Councils or their Technical Instruction Committees have applied to be and have been recognised as organisations accordingly. Where such organisations are approved, grants are only made to the managers of new schools and classes acting in unison with it. (For fuller particulars see the "Directory of the Department, with Regulations for establishing and conducting Science and Art Schools and Classes," published by Messrs. Eyre & Spottiswoode in London, Messrs. Menzies & Co. in Edinburgh, and Messrs. Hodges, Figgis, & Co. Ltd., in Dublin.) The 46th annual report of the Department was issued in Aug. '99. It showed that under the Science division there were, in '98, 2023 schools, 11,723 classes, and 158,370 students, the figures showing a decrease on those of '97, except in the number of classes, which increased by 2621. Of the 2023 schools, 159 were Schools of Science, with 21,193 students. Of the total number, too, 1944 were in England and Wales, and 79 in Ireland. (In '98 the schools in Scotland were transferred for their grants to the Scotch Education Department, and so do not appear in this table.) The results of the May examinations showed that 79,475 students from the schools and 10,635 self-taught students and pupils from classes ineligible for grants had been examined. Including pupils in Scotch schools examined by the Science and Art Department, 150,401 papers were worked, 94,475 papers passed, and 39,800 obtained a first class in the elementary or in the advanced stage. There were also 38,536 papers worked in the day examinations in certain of the science subjects held in '98. The examinations were held at 2058 centres in the provinces, at 165 in the Metropolis, and in the Isle of Man, the Channel Islands, Tasmania, Natal, New Zealand, and South Australia. In the Art division the report showed that 12,041 elementary day schools with 1,458,911 scholars were taught drawing and were examined by the Department in '98. The diminution as compared with previous years resulted from the transfer to the English and Scotch Education Departments, as from March 31st, '98, of the administration of the grants for drawing and manual instruction in public elementary schools in England and Wales and State-aided schools in Scotland. Since that date inspection by those Departments has taken the place of the annual examinations previously held, but the transfer did not apply to reformatory, industrial, and certain other elementary schools which are not public elementary schools within the Education Acts. There were 1191 evening continuation schools examined, in which 50,971 scholars were taught drawing; and classes for manual instruction in connection with 914 elementary day schools were examined. The

number of art schools and classes examined in '98 was 1893, an increase of 44 on the previous year, and the number of students in those schools and classes was 120,771. There were 252 schools and 1314 classes in England, 20 schools and 152 classes in Scotland, and 15 schools and 53 classes in Ireland. The total number of students who sat for examination was 81,869. There were 151,740 exercises worked, 118,675 in elementary stages, of which 75,324 passed, and 32,789 in advanced stages, of which 23,054 passed. Under the head of expenditure the report stated that the total sum of £606,335 was disbursed during the year, including:—Expenses of administration, £58,891; direct payments, prizes, etc., to encourage instruction in science, £182,235, and in art, £89,772; services common to both divisions, £93,736; South Kensington and Bethnal Green Museums, £26,284; payments for instruction in public elementary schools and training colleges in drawing, £61,908; grants to schools of science and art, £271,401. See EDUCATION.

"Scotsman, The." The representative Scottish political daily paper—occupying in Scotland much the same position as the *Times* in England. First number appeared Jan. 25th, 1817. For six years it was a weekly, price 10d., then a bi-weekly, price 7d. Appeared first as a penny daily, June 30th, '55. Editors have been Ch. McLaren, J. R. McCulloch, Alex. Russel, and the present editor, Mr. C. A. Cooper. In politics it is Liberal Unionist. It gives much space to general literature, art, science. Each week, in a single issue, it publishes a greater number of advertisements than any newspaper in Great Britain. From the same office are issued the *Weekly Scotsman* and the *Evening Dispatch*, which latter has earned a wide reputation as a fearless assailant of public and semi-public abuses. **Head office:** Cockburn Street, Edinburgh. **London office:** 45, Fleet Street, E.C.

Scott, Sir Charles Stewart, G.C.M.G., C.B., is a son of the late Major Scott of Wilsborough, co. Londonderry, where he was b. in 1838. He was educated at Cheltenham and Trinity College, Dublin (first honours in classics, '57). Entering the diplomatic service in '58, he served as Attaché at Paris, Dresden, Copenhagen, Madrid, and Berne, and was then appointed Second Secretary in Mexico, '66. After further experience at Lisbon, Stuttgart, Munich, Vienna, St. Petersburg, Darmstadt, and Coburg, in the course of which he was steadily promoted, he became Secretary of Embassy at Berlin in '83, and was frequently *Chargé d'Affaires*. In '88 he was made Minister at Berne. He was one of the Plenipotentiaries

at the Samoan Conference at Berlin in '89, and at the Labour Conference in '90. In '93 he was appointed to Copenhagen, and there served with Count Muravieff, now Russian Foreign Minister. Sir Charles has a thorough knowledge of Russian, and so is particularly qualified for the post which he received in '98 of Ambassador at St. Petersburg.

Scottish Rights of Way and Recreation Society, The, Ltd., Edinburgh, is the society for Scotland which performs the same kind of work as the National Footpath Preservation Society of England. It has been instrumental in vindicating many rights of way in Scotland which were in danger of being lost, and is deserving of the support of all tourists, who have benefited greatly by its operations. The **Secretary** is Mr. C. E. W. Macpherson, C.A., 6, North St. David Street, Edinburgh.

SEA FISHERIES OF THE UNITED KINGDOM.

The figures mentioned below are taken from statistics presented to the Board of Trade, and relate to the quantity and value of fish landed in '98 (exclusive of salmon particularised in the Fresh-water Fisheries Returns), the average price of such at the place of landing, the number of fishing-boats and persons employed, and the exports of fresh and cured fish. The total quantity and value of the fish returned as landed on the coasts of the United Kingdom for '98 are given in the annexed table.

The prime fish not separately distinguished includes brill for England and Wales and all sparing for Scotland. The statistics mentioned under Scotland, Ireland, and total United Kingdom are provisional figures, and are subject to rectification. The average price per pound of soles was 15²⁸d., of turbot 8²⁷d., of prime fish not separately distinguished 5⁸³d., of cod 1⁵¹d., of haddock 1²⁵d., of herrings 5¹⁴d., of ling 1²⁹d., of mackerel 1⁵¹d., of sprats 4⁸d., of fish not separately distinguished except shell fish 1⁸⁹d. The average price of shell fish per dozen was: crabs 2s. 10³d., lobsters 10s. 4³d., and oysters 9³d. The average price of other shell fish was 5⁹d. per pound. The total value of all fish landed on English and Welsh coasts was £4,697,129 on the East coast, £573,204 on the South, and £860,224 on the West, giving a total for all coasts of £6,130,567. The most valuable aggregate cargoes were landed at Grimsby, which amounted to £1,547,194. Hull ranks the next, with £878,181 worth; then London with £795,708, Lowestoft with £558,998, Yarmouth with £198,451, Milford with £263,095, North Shields with £165,444, Fleetwood with £214,505, and Neyland with £124,360.

The number of fishing-boats registered and employed in the Sea Fisheries of the United Kingdom (including the Isle of Man and the Channel Islands) in '97 (latest returns) was 23,968, including 7,595 first-class boats of 15 tons and upwards, 14,170 second-class boats of less than 15 tons navigated otherwise than by oars only, and 4,815 third-class boats navigated by oars only. Undecked boats fishing or dredging on the coasts of England and Wales, and the islands of Guernsey, Jersey, Alderney, Sark and Man, and going outside the distance of three miles from low-water mark along such coasts, or in cases of bays less than ten miles wide, the line joining the headlands of such

bays, are exempted from registration. The number of men and boys constantly and occasionally employed in fishing in the United Kingdom in '96 and '97, including the islands referred to, are mentioned in the next table :

	'96.	'97.
Men and boys constantly employed	71,314	70,734
Other persons occasionally employed	39,608	37,023
Total	110,922	107,757

The following table shows the exports of fresh and cured fish (being British and Irish produce) from the United Kingdom in the three years '96-7-8 :

Years.	Total Value.	Value of Herrings only.	Quantity of Herrings.
	£	£	Barrels.
'96	2,007,505	1,328,662	1,373,827
'97	2,037,794	1,364,374	1,119,254
'98	2,586,752	1,896,540	1,742,448

As regards the quantity of fish carried by railway from United Kingdom ports in '98, 371,285 tons were conveyed from these in England and Wales, 101,135 tons from Scotch ports, and 14,364 from those in Ireland. The value of the fish imported into the United Kingdom, and retained for home consumption, increased from £2,111,721 in '89 to £2,931,764 in '98. The value of the fish consumed in this country during the last nine years has very greatly increased, as it rose from £6,365,000 in '89 to £8,745,000 in '98.

Secondary Education. See EDUCATION.
Secretaries. See INSTITUTE OF SECRETARIES.

Secretary of State. As early as 1253 there was a secretary to the sovereign, but the office was not nearly so important as it afterwards became, and it is doubtful whether before Henry VIII.'s days the holder was a privy councillor. From the time of Elizabeth until the union with Scotland there were two principal secretaries of state, and Anne added a third for Scotch affairs, but this office was abolished some years later. While there were two principal secretaries they divided home affairs between them, and one was at the head of the northern department, which included Denmark, Germany, Russia, and other countries, and the other was at the head of the southern department, which included France, Italy, Spain, etc.—to the elder of the two ministers being also committed Irish and Colonial affairs. A secretary for America or Colonial affairs was added in the reign of George III., but this office was abolished in 1782; the terms northern and southern were discontinued, and the duties divided into Home and Foreign, the affairs of Ireland and the Colonies being included in the former department. A third principal secretary, who was intrusted with War business, was appointed in 1794; in 1801 the business of the Colonies was transferred from the Home Department to that Secretary; and in 1834 a fourth secretary of state was appointed, when the business of

the Colonial Department was separated from the War Department. (See COLONIAL OFFICE.) The Secretary of State for the War Department in the following year took over the duties of the Board of Ordnance and the Secretary-at-War—a financial office in connection with military business which had existed for many years previously, and which was in '63 formally and finally abolished. In '58 a fifth principal secretary of state was appointed, for India, so that there are now five principal secretaries of state. They are appointed without patent, by mere delivery to them of the seals of office by the sovereign; each is capable of performing the duties of the other, and in successive statutes new administrative duties are cast, not upon any one of the five individually, but upon the "Secretary of State," or "one of H.M. Secretaries of State." Each Principal Secretary is assisted by a Parliamentary Under-Secretary and by a Permanent Under-Secretary. The five Permanent Under-Secretaries are: Home Office, Sir Kenelm Digby, K.C.B.; Foreign Office, Sir T. H. Sanderson, K.C.B., K.C.M.G.; Colonial, Sir Edward Wingfield, K.C.B.; War, Sir Ralph H. Knox, K.C.B.; India, Sir A. Godley, K.C.B. Biographies of all these will be found under their proper alphabetical headings. The office of Secretary for Scotland, re-created in '85, is not a principal secretaryship, so that although the holder exercises in Scotland many of the powers and duties of the Home Secretary, he is not by virtue of his office a Cabinet Minister. The Permanent Under-Secretary for Scotland is Sir C. Scott Moncrieff, K.C.M.G. See MINISTRY, IRELAND, HOME OFFICE, etc.

Secret Commissions, Illicit, Bill. See SESSION, sect. 91.

Seddon, Rt. Hon. R. J., P.C., Premier of New Zealand, was b. at Eccleston, Lancashire, in 1845, and emigrated to Australia in '63. His profession is that of a mechanical engineer. Going to New Zealand, he stood for the House of Representatives, and was elected '79. Is now Premier, Colonial Treasurer, Postmaster-General, Minister of Labour, and Minister of Native Affairs; from '91-3 he was Minister of Mines, and was also Minister of Public Works and Minister of Defence from '91-6. He came to England for the Jubilee celebrations, '97, and was made a Privy Councillor, and had the honorary degree of LL.D. conferred upon him by Cambridge University. In '98 he was accused by a member of the Opposition of having been concerned some years ago in a series of frauds; but a committee of inquiry unanimously and absolutely vindicated him from the charge.

Selborne, Earl of. See under PEERAGE.

Select Committees. See PARLIAMENT AND PARLIAMENTARY PROCEDURE.

Self-Help Emigration Society, for benefiting the underpaid and unemployed in Great Britain, by assisting applicants whose character and fitness are assured to emigrate to Canada, Australia, and other colonies. The Society in most cases supplements the funds of the intending emigrant, and assists him to obtain his passage. Introductions are furnished to the Society's correspondents, who are men of position resident in Canada, Australia, New Zealand, Tasmania, and South Africa, and work is usually provided for the emigrants on their arrival. During the past fifteen years more than 6000 persons have been thus located, at a cost of over £34,000.

A large proportion of this cost has been contributed by the emigrants and their friends. In '99 the emigrants assisted numbered 250. The income of the Society exceeded £2000, inclusive of emigrants' contributions. Office, Memorial Hall Buildings, Farringdon Street, London. Applications from intending emigrants should be made to the Secretary, Mr. Edward Wilson Gates.

Senegal, or French Senegambia. A French colony in Western Africa, on the Senegal and Gambia rivers. Capital, **St. Louis**, pop. 20,000. The colony proper consists of various settlements on the river Senegal, but large tracts have been added to it till it now has a coastline stretching from Cape Blanco to the Gambia, and extends into the interior so as to connect with French Guinea and the French Soudan, the greater part of which is now incorporated with it under the Governor-General of West Africa, who is stationed at St. Louis. The total area is about 120,000 sq. m., and the pop. about 2,000,000. Great part of the country is fertile and rich in produce. **Chief exports** are gum, india-rubber, nuts, and skins. Senegal navigable 750 miles up. There is a railway between Dakar, on the coast, just south of Cape Verd, and St. Louis, at the mouth of the Senegal river. The colony is represented at Paris by a deputy, but is administered by a governor-general and a Colonial Council. See COLONIES, ETC., OF EUROPEAN POWERS.

Serjeant-at-Arms. The holder of this office carries the **Mace** (*q.v.*) when the Speaker enters and leaves the House, places it on the table when the Speaker takes the chair, and under the table when the House goes into committee. He, by the messengers, notifies committees when the House is going to prayers. He or his deputy sits within the House, near to the door, and executes any directions of the Speaker for the maintenance of order, even should they extend to the removal of a member who has been ordered to withdraw and has refused to obey the ruling of the chair. Certain of the galleries, corridors, etc., are under his charge. The Serjeant-at-Arms of the House of Lords attends the Lord Chancellor with the mace; but the duty of maintaining order in certain parts of the chamber is one of the functions of Black Rod. Both Serjeants-at-Arms are appointed by the Crown. Mr. H. D. Erskine is Serjeant-at-Arms of the House of Commons, and the corresponding office in the Lords is filled by Major-General Sir Arthur Ellis, K.C.V.O., C.S.I.

SERVIA.

Formerly an autonomous province of Turkey, now a kingdom under Alexander I. of the House of Obrenovitch. The executive power was, by the constitution of '88, vested in the King, and the legislative in the King jointly with the Skuptschina or National Assembly. There was a Senate or Council of State of 16 members, always in session, which examined and elaborated projects of laws, etc. The Skuptschina was elected by the people indirectly once in every three years. Besides this there was the Great Skuptschina, with twice as many members as the National Assembly, which was called when required to decide vital and constitutional questions. All tax-paying citizens were electors. This Constitution was, however, abrogated by the King in May '94, and tem-

porarily replaced by the Constitution of '69. By virtue of this Constitution the Government are entitled to appoint one-third of the members of the Skuptschina, while the electorate for the other two-thirds is greatly restricted, with open voting instead of voting by ballot. Great power over the press is also given to the Government, and the arbitrary power of the Crown is also increased considerably. A special commission is, it appears, to draft a new Constitution. The three political parties in the country are the Radicals, including the bulk of the peasants, who look to Russia for guidance, and hate the ex-King Milan; the Liberals, consisting chiefly of the town population, who are also Russophil; and the Progressives, who look to Austria for support. For local purposes the country consists of 15 counties and 1290 communes. State religion is Greek Orthodox, but others are tolerated. Education is backward, but progressing. It is nominally compulsory and free. Agriculture is practically the only industry, and almost every peasant cultivates his own freehold. Pauperism is practically unknown. The chief exports are agricultural produce, animals, and animal produce, fruits, etc. The capital is **Belgrade**, with about 60,000 inhabitants. **Area**, 19,050 sq. m.; **pop.** 2,314,153. **Revenue**, '98, £2,633,600; **expenditure**, £2,896,000; **public debt**, '99, £16,136,480; **imports**, '98, £1,644,977; **exports**, £2,279,659. See DIPLOMATIC AND FOREIGN ARMIES.

History, '99.—The Russian Minister at Belgrade left abruptly (**March 6th**), his departure being attributed to friction arising from his expression of Russian displeasure at ex-King Milan's continued presence in the city and his tenure of the post of commander-in-chief. An attempt to assassinate the ex-King was made (**July 6th**), four shots being fired at him by a man named Knezevitch, who was at once arrested. A number of leading Radicals were arrested at the same time, including M. Pasitch and M. Taushanovitch, both ex-Premiers. The ex-King charged the Radical party with instigating the outrage, and Knezevitch was declared to have confessed the truth of this, saying that he was the agent of a band of conspirators. As a result of the preliminary inquiry, twenty-nine persons, including M. Pashitch, M. Tausanovitch, Colonel Nikolitch, and M. Protitch, editor of the *Odjek*, were charged with high treason in connection with the outrage (**Sept. 1st**). The trial commenced before a special tribunal (8th), and Knezevitch made contradictory statements, at first saying that he was not the agent of a conspiracy, and the next day retracting, and implicating Colonel Nicolitch and others, but not the Radical leaders. Later on he retracted his retraction. Severe restrictions were put on counsel for the prisoners, as they were not able to consult with their clients nor to see the documents used by the prosecution, and cross-examination of witnesses was not permitted to them. In the result the judges accepted the evidence of Knezevitch, in spite of his solemn withdrawal of it at the last sitting of the Court, condemned Knezevitch to death, ten of the prisoners, including three against whom the only evidence was Knezevitch's depositions, to twenty years' penal servitude, M. Tausanovitch to nine years, M. Pasitch and seven others to five years' imprisonment. Six were acquitted,

and of two who had fled from the country, one, Ranko Tisitch, was condemned to death, and the other to twenty years' penal servitude (25th). Intense disgust was felt and expressed at these sentences, most of them in the teeth of the evidence. M. Pasitch was at once pardoned, but Knezevitch was shot out of hand.

Servia, King of. See ALEXANDER I.

SESSIONS (PARLIAMENTARY).

Feb. 7th—Aug. 9th, and Oct. 17th—27th, '99.

[1] This article gives an outline of some of the principal business transacted and the legislation accomplished during the sessions of '99. As in previous editions, military, naval, and educational matters generally are dealt with under the headings ARMY, NAVY, and EDUCATION in the body of the work; though some points from Mr. Wyndham's statement on the Army policy of the Government are given in sect. 5; the amount of expenditure proposed on military works is shown in sect. 79, and Lord Lansdowne's views as to the Militia are set forth in sect. 80; something of Mr. Goschen's statement in introducing the Navy Estimates will be found in sect. 27; and the Naval Works Act is mentioned in sect. 82. The contents of the Board of Education Act are noticed in sect. 41, and some of the observations of Sir J. Gorst on the Education vote will be found in sect. 13. The Budget statement in brief is included under the heading FINANCE, NATIONAL, in the body of the book; though the provisions of the Finance Act itself are summarised in sect. 57. Some Irish topics are dealt with in sects. 19-22. In order that the narratives may be continuous and complete, foreign and colonial matters are for the most part dealt with under their proper headings in the body of the book, but some space is given to the parliamentary proceedings regarding events in the Transvaal in sect. 34, to East Africa in sect. 12; West Africa, sect. 37; Egypt and the Soudan, sect. 14. The proceedings regarding the Church of England are adverted to in sect. 9, and under Church Discipline Bill, sect. 43; and some of the interesting discussions raised in reference to the treatment of the poor will be found noted under Poor Law, sect. 31; Cottage Homes, sects. 50 and 116; Old Age Pensions, sect. 83; and Aged Deserving Poor, sect. 115. Under PEERAGE and COMMONS will be found biographical lists of Lords and M.P.s; and information as to matters of party policy and voting strength is given under POLITICAL PARTIES. For convenience of reference the subjoined article is broken up into numbered sections and divided into four parts, the first containing the Queen's Speech and having reference to a number of miscellaneous matters of interest; the second being devoted to proceedings on Bills and an analysis of some of the principal Acts passed; the third to Reports of Committees; and a fourth part contains a summary of the proceedings during the Autumn Session. A list of sitting Royal Commissions will be found at the end of the article.

I.—QUEEN'S SPEECH AND MISCELLANEOUS.

[2] The fifth session of the fourteenth Parliament of Queen Victoria was opened by Royal Commission on Tuesday, Feb. 7th, the

Lord Chancellor reading the Queen's Speech as followeth: "MY LORDS AND GENTLEMEN,—My relations with other Powers continue to be friendly. The expedition against the Dervishes, conducted with brilliant ability by Sir Herbert Kitchener and the officers serving under him, has resulted in the fall of Omdurman and the complete subjugation of the territories which had been brought under the dominion of the Khalifa. I am proud to acknowledge the distinguished bravery and conduct of the British and Egyptian troops who have won this victory. My officers are engaged, in conjunction with those of His Highness the Khedive, in the establishment of order in the conquered provinces. The Powers who have been in the occupation of Crete have delegated the authority necessary for the government of the island to His Royal Highness Prince George of Greece. The restoration of peace and order resulting from the establishment of His Royal Highness's Government has been gladly welcomed by the Cretans of both religions. His Imperial Majesty the Emperor of Russia has summoned a Conference to consider the possibility of limiting the vast armaments which impose so heavy a burden on every nation. I have gladly signified my willingness to take part in its deliberations. A profound impression has been created by the appalling crime which has robbed the people of Austria-Hungary of their beloved Empress. A Conference, at which my delegates were present, was summoned at Rome to consider the dangers of the anarchist conspiracy. Though I was not able to concur in all the resolutions proposed at the Conference, some amendments in the present laws of the Realm upon this subject appear to be required, and will be submitted for your consideration. Some of my West Indian Colonies have been visited by a hurricane of extraordinary violence, causing loss of life and great destruction of houses and other property. The consequent distress of the poorer inhabitants was promptly relieved, as far as possible, by the strenuous exertions of the local authorities, aided by contributions of money from other Colonies and from the United Kingdom. I have learned with great satisfaction that the Parliament of the Cape of Good Hope has recognised the principle of a common responsibility for the Naval defence of my Empire by providing for a permanent annual contribution towards that object. In parts of my Indian Empire I grieve to say the plague still continues; and, though it has diminished in some districts previously affected, it has spread to fresh places in Southern and Northern India. Unremitting efforts continue to be made to relieve sufferers from the disease, to check its spread in India, and to prevent its transmission to other lands. I am glad to be able to inform you that the harvests of the past year have been abundant, and that the trade and revenue of the country have recovered with a rapidity and completeness that has surpassed all expectation. GENTLEMEN OF THE HOUSE OF COMMONS,—The estimates for the service of the ensuing year will be laid before you. They have been framed with the utmost economy that the circumstances of the present time permit. MY LORDS AND GENTLEMEN,—A Bill for more fully organising the Government of the Metropolis will be commended to your careful consideration. A Measure for the establish-

ment of a Board for the administration of Primary, Secondary, and Technical Education in England and Wales will again be laid before you. You have already partially considered provisions for simplifying the process of private legislation for Scotland. They will be again brought before you. A measure will be submitted to you for enabling local authorities to assist the occupiers of small dwellings in the purchase of their houses. Bills will also be introduced for encouraging agricultural and technical instruction in Ireland, and for the relief of the tithe rent-charge payer in that country; for providing a more complete distribution of water supply in cases of emergency in the Metropolis; for the regulation of limited companies; for the prevention of the adulteration of articles of food; for controlling the contracts of money lenders; for amending the Factory Acts in certain respects; and for amending the law in respect to agricultural holdings. I pray that Almighty God may have you in His keeping, and guide your deliberations for the good of my people."

[3] **The Address in reply to the Queen's Speech** was moved and seconded in the Lords by the Duke of Bedford and Earl Cawdor, and in the Commons by Captain Bagot and Mr. W. F. D. Smith. In the one House it was, as usual, disposed of in course of a few hours; in the Commons the general debate and the several amendments submitted occupied attention at ten sittings and part of an eleventh, being just over a fortnight of parliamentary time. The leading speakers who took part in the debates of the opening night joined in expressing deep regret at the bereavement Her Majesty had just suffered by the death of Prince Alfred of Saxe-Coburg, only son of the reigning Duke (the Duke of Edinburgh). Sir H. Campbell-Bannerman, on the eve of the session, had been chosen at a general meeting of the Liberal party, held at the Reform Club, to succeed Sir William Harcourt in the leadership of the party in the Commons, and was warmly cheered on rising, after the mover and seconder, to discuss the Address in reply to the Royal Message. Mr. John Morley, on the opening night, selected a seat at the corner of the Front Opposition Bench by the gangway. Sir William Harcourt did not return to the House until the session was some weeks old. The death of M. Félix Faure, President of the French Republic, on Feb. 16th, was made the subject of sympathetic reference in both Houses on the following day; and about a fortnight later it became the melancholy duty of the Prime Minister to pay a tribute, in which the Lord Chancellor and Lord James of Hereford joined, to the public life and character of Lord Herschell, President of the Anglo-American Commission, who had just died across the seas. Sir John Mowbray, "Father of the House," passed away in April; and in the necrology of the session there should also be included Mr. T. E. Ellis, principal Liberal Whip, the duties of whose office were on his decease undertaken by Mr. Herbert Gladstone, at the request of Sir H. Campbell-Bannerman; and Dr. or (as he preferred to be called) "Mr." Wallace, an ex-Presbyterian minister, and formerly editor of the *Scotsman*, and an accomplished and popular debater. The Government took an early opportunity of submitting their proposals respecting London government; but these were materially changed

before they became a part of the statute law of the land. The most contentious measure of the session was that generally known as the Clerical Tithe Bill; it was fought as strongly by the Liberal Opposition as the original measure in relief of English agricultural rates had been, and Mr. George Whiteley, Conservative member for Stockport, who had taken a strong line on the former, felt, on the introduction of the Clerical Bill, unable longer to act with his party, and accordingly crossed the floor of the House, ranging himself with the Opposition as an Independent Liberal.

[4] **The Prorogation Speech**, delivered Aug. 9th, was in the following terms:—"MY LORDS AND GENTLEMEN,—My relations with other Powers continue to be friendly. The Conference summoned by the Emperor of Russia to consider measures for promoting the maintenance of peace has completed its sittings. Although the result of its deliberations has not fully corresponded with the lofty aims which it was summoned to accomplish, it has met with a considerable measure of success. The institution of a permanent tribunal of arbitration cannot fail to diminish the frequency of war, while the extension of the Geneva Convention will mitigate its horrors. I have concluded a convention with the President of the French Republic, by which the spheres of influence of the two Powers over a large portion of Northern Africa have been determined. Such an agreement had become necessary, especially in respect to the Valley of the Nile, in consequence of the successful operations of the Anglo-Egyptian army during last autumn. I have concluded an agreement with the Emperor of Russia for regulating the conditions under which either Government will encourage the development of railway enterprise by its own subjects in China. I have received a petition from a considerable number of my subjects residing in the South African Republic, praying for my assistance to obtain the removal of grievances and disabilities of which they complain. The position of my subjects in the South African Republic is inconsistent with the promises of equal treatment, on which my grant of internal independence to that Republic was founded; and the unrest caused thereby is a constant source of danger to the peace and prosperity of my dominions in South Africa. Negotiations on this subject with the Government of the South African Republic have been entered into, and are still proceeding. From my Indian Empire I have continued to receive satisfactory reports of the rapid recovery of agriculture and trade from the depression caused by the late famine, but during the last few weeks the rainfall has been insufficient over a portion of Western and Central India, and fears are entertained as to the prospects of the harvests in those regions. My officers are carefully watching the situation, and timely precautions to meet any scarcity, should it occur, will be adopted. I regret to add that the plague, though still confined to the areas affected last winter, shows no signs of abatement. GENTLEMEN OF THE HOUSE OF COMMONS,—I thank you for the liberality with which you have provided for the naval and military defence of my Empire. MY LORDS AND GENTLEMEN,—The formal inclusion within my Empire of the territories occupied by the Royal Niger Company will facilitate the good administration of that

region, and the effective defence of its frontier. I have had great satisfaction in giving my assent to a Bill for completing the organisation of Municipal Government in London. I do not doubt that the inhabitants of the various portions of this Metropolis will derive from it the benefits which similar institutions have conferred upon other cities and towns in this country. I have also gladly sanctioned Bills for the simplification of private legislation in Scotland, for the encouragement of agricultural and technical education in Ireland, for the better distribution of the supply of water in the Metropolis, for the removal of an injustice in regard to the incidence of rates under which the benefited owners of tithe rent-charge have too long suffered, and for securing the purity of certain articles of food and drugs. I trust that the Bill which you have passed for consolidating the educational departments, and extending their powers, will tend to the improvement and completion of our educational system. The measures you have passed for facilitating the acquisition of the ownership of small houses by those who occupy them will be of considerable advantage to the working classes in many parts of the country. I pray that the blessing of Almighty God may attend upon the fruit of your labours for the benefit of my people."

[5] **Army.** Mr. Wyndham, in introducing the Army Estimates (March 2nd), made a general statement on the Army policy of the Government. They proposed no heroic changes in the programme of reforms of '97 and '98, which were to have a fair trial. The British Army was raised under certain limitations to effect certain purposes. It must be a voluntary Army, and it must not be extravagantly dear. The purposes were four in number. In the first place they were bound to provide a British Army for India, which, since India paid for it, must be of the standard of efficiency for which India contracted. In the second place, they were bound to provide a garrison for some of their colonies, for their coaling stations, and for some naval bases. In the third place, they must have at their command a small force to despatch whenever a small war arose out of the impact of their civilisation with barbarism. Lastly, they must be ready against the chances of a great war involving the risk of invasion, which he hoped was a very remote contingency; but it was one that their Army must be adapted to meet, as well as discharging the three normal duties. So that they must have a field army and an adequate home defence, and when the command of the sea had been assured, it must be adequate also for delivering a counter-attack. He proceeded to take the three arms—cavalry, artillery, and infantry—and in detail to show how far each might be fitted for discharging this fourfold obligation, his endeavour being to demonstrate with regard to the Army generally that it was in a fair way to effect the purpose for which it had been raised.—Sir C. Dilke stated that in the present financial year the cost of the Army at home and in India was £38,600,000, and adding the 21,000 under the Colonial and Foreign Offices, it amounted to more than £40,000,000. Next year they could not get off for less than £42,000,000, and we should probably spend more than £28,000,000 on the Navy. The expenditure on our imperial defences, therefore, would be about £70,000,000; and the next

country to be compared in extravagance with ourselves was France, with £40,000,000. The War Office ought to show a great increase of men for this vast expenditure on the Army; but what was the case? On Jan. 1st, '95, the regulars, the militia, and the first-class Army reserve amounted to 408,900 men; on Jan. 1st this year they totalled 408,924, the net result being that, in four years after an enormous increase in expenditure, there was an addition of twenty-four men. Sir H. Campbell-Bannerman observed that the constant increase in the Estimates was due to the fact that the demands of the Empire were growing, and the only way to prevent such an increase was to modify in some way the general policy of the country. Mr. Balfour replied that the increase was not due to policy, but to the inevitable responsibilities of Empire. Mr. Labouchere (March 3rd) moved to reduce the number of men—184,853—proposed as the establishment for the year, by 4340. He could see no reason for an increase in the number of our forces in South Africa. Mr. Balfour said the great increase in the establishment was due to the naval requirements of the country, and was only fractionally due to any responsibility which the Government had undertaken with regard to South Africa. The amendment was defeated by 188 to 54, and the vote for men adopted.

Mr. MacNeill (March 17th) moved the reduction of the vote for pay and allowances, in order to call attention to the treatment accorded to a young soldier of the 17th Lancers at Ballincollig barracks, who, he said, died after having undergone severe punishment for breaches of discipline, which he was physically unable to bear. Mr. Wyndham said the man had died from a cause which had nothing whatever to do with the pains of which he had complained. The commanding officer had acted with great zeal and discretion in the matter. There was nothing to lead one to think that the doctor had discharged his duty in a careless manner. As to the larger question, whether the treatment of military prisoners was what it should be, that was engaging the attention of the military authorities. The view of Sir Redvers Buller was that they ought to show a distinction between military crime and civil crime; that the soldier who was a felon should be discharged, and that the soldier who committed a military crime should be punished in a way that was not analogous to the punishment of a felon. The Marquis of Lansdowne informed Lord Monkswell (May 8th) that the War Office was acting on the recommendations of the Departmental Committee on discipline in military prisons. Lord Lansdowne went on to mention, amongst other things, that in the military prisons shot drill had been abolished except as a punishment for prison offences. The use of the crank had not been entirely abolished, but its abolition was provided for in the revised rules. The same remark applied to the case of the barrack cells. The War Office had accepted in part, in the case of military prisons, the recommendations of the committee that soldiers during their imprisonment should have a free choice of library books, by allowing the soldiers that choice after the first fourteen days of their confinement. This concession would also be granted to the provost prisons under the revised rules,

Replying to the Earl of Dartmouth (July 17th), the Marquis of Lansdowne, in reference to the question of **volunteer ranges**, said a corps could now borrow not only to acquire land for ranges, but also to construct the necessary buildings. This change in the law seemed to have had a good result, because in the year before the passing of the amending Act only four corps took advantage of it, and borrowed £8400, whereas last year twenty-one corps came forward and borrowed £129,000. Under the Military Works (Loans) Act '97, £500,000 was obtained for the purpose of ranges. It was true they were primarily intended for the use of the militia and regulars, but the War Office endeavoured to make them accessible to the volunteers. The whole of that money had not yet been spent, as there were enormous difficulties in the way of securing safe ranges. Then, under the Military Works Bill of this year (see sect. 79), they had power to raise £40,000 for the purpose of assisting volunteer corps to provide themselves with ranges. Another way in which it was proposed to give assistance was to increase the travelling allowance from 4s. to 6s., and to reduce the minimum distance from five to two miles. Mr. Wyndham, in course of a reply to observations by Mr. Arnold Forster (July 21st) said a very important suggestion was that they ought to do more than tap the colonies; and where a colony exhibited a great desire to take some share in the defence of the Empire, they were ready to modify the arrangements as far as possible to meet the wishes of the colony. They had been in communication constantly with Canada, and at this moment they had arrived at the stage of having drawn up certain proposals which they hoped to transmit to the country. Since Jan. '97 no less than 12,000 men had been added to the Army, and on July 1st this year there were **411,030 men in the Regular Army, Militia and Reserve**. See "Militia Ballot Bill," sect. 80, "Military Works Act," sect. 79, and "China," sect. 8.

[6] **Ascension Day**. The motion that committees of the Commons should not sit until 2 o'clock was carried (May 10th) by 184 to 68. The motion for the meeting of the House on Ash Wednesday at 2 o'clock instead of at noon was (Feb. 14th) carried by 213 to 142.

[7] **Bishops, Legislative power in the House of Lords**. Mr. Herbert Lewis moved (Feb. 21st), "That the legislative power of Bishops in the House of Peers in Parliament is a great hindrance to the discharge of their spiritual functions, prejudicial to the commonwealth, and fit to be taken away by Bill." Lord Hugh Cecil proposed an amendment, setting forth that the legislative power of Bishops in the House of Peers in parliament "ought to be maintained; but that it is desirable that other life Peers should be added to that House, especially those who would represent the greater religious denominations other than the Church of England." If there was to be a change in the constitution of the House of Lords they should look to a gradual change in it, so as to make it more representative of the better educated bodies, and they had in the Bishops the germ of such a change. The Bishops represented the great body of Church of England feeling, so far as it was organised. Could they not go on and add to the House of Lords a number of life peers to represent other phases of public thought, and so im-

mensely strengthen and improve the House? He believed that the proper way of meeting the Nonconformists was not by an unreasonable *non possumus*, but by reasonable conciliation. Mr. Sharpe seconded the amendment. Mr. Balfour remarked that he had great sympathy with the amendment, and would like to promote many representatives of the great Nonconformist interest to the other House. But he thought that a plain issue should be raised, and would suggest that the amendment should be withdrawn. He admitted that the question raised in it was an important one, and that on another occasion it might well form a proper subject of debate. Lord H. Cecil upon this asked leave to withdraw his amendment, and this being refused, it was negatived, the motion being then rejected by 200 to 120.

[8] **China and Wei-hai-wei**. Sir E. Ashmead-Bartlett moved on the Address (Feb. 10th) an amendment praying Her Majesty to direct her Ministers to take early and effective measures to assist the Chinese Government in maintaining the territorial independence of the Chinese Empire, and especially of the Province of Manchuria, in accordance with the resolution of March 1st, '98, unanimously affirmed by this House. Mr. Brodrick said the Government could not accept an amendment which meant a direct guarantee of the integrity of the Chinese Empire against all Powers. They, however, recognised absolutely the necessity of maintaining British interests in China, and the intention had not been without effectual result. During the past year the non-alienation of the Yang-tse Valley and the opening of its waterways had been obtained, and the four treaty ports mentioned last March had all been opened, or would be opened within a month. The total number of miles of railways granted to British concessionaries in China was 2800, the expenditure on which, taking a moderate estimate, would amount to twenty millions. Sir E. Grey urged that we should endeavour to secure an understanding with Russia. The amendment was withdrawn.

In introducing the Navy Estimates (March 8th) Mr. Goschen said, with reference to Wei-hai-wei, there had been some purchase of land in the island in the present financial year, '98-99, and some money was being taken for Wei-hai-wei in the financial year '99-1900. It was proposed to make it a secondary naval base, to fortify it sufficiently, to have coal stores and small repairing shops, and, above all, to secure a good anchorage by dredging. The captains of our ships, after considerable experience, had come to the conclusion that it is a most valuable anchorage, and would be of great importance to us in any operations in the China Seas. The climate was good, and in every respect they were able to give a good account of the place. Mr. Pritchard Morgan obtained leave (March 13th) to move the adjournment in order to call attention to the fact that Her Majesty's representative at Peking was supporting the demands of Italy for a sphere of influence in Chinese territory, with Sammun Bay as a naval base, notwithstanding the resolution of that House in favour of the maintenance of the independence of Chinese territory. Mr. Brodrick said the position which Italy had taken in this matter was entirely on her own initiative. She desired to negotiate for certain advantages in China, and the British Government had displayed a

friendly attitude which had been strictly limited to proceeding by diplomatic negotiations. The motion was negatived after further discussion. Speaking on April 14th, Lord C. Beresford said the capabilities of Wei-hai-wei were excellent, as it was about the best deep-water harbour in the whole of China. It was infinitely better than Kiao-Chau, and would not require the expenditure of any very large sum of money to put it in order. Mr. Austen Chamberlain entirely concurred in what Lord C. Beresford had said of the natural capabilities of Wei-hai-wei, adding that the course the Government intended to pursue in the matter was to take advantage of these natural capabilities. The idea they had with regard to Wei-hai-wei was that it should be for the China station something like Gibraltar was for the Mediterranean station before the present extension; that it should occupy the same kind of relationship to Hong-Kong as Gibraltar did formerly to Malta. Furthermore, as it was by far the healthiest station which they possessed in that part of the world, they proposed to establish a naval hospital at Wei-hai-wei for the treatment of invalids from the fleet. Mr. Goschen added (April 21st) that the general idea was that Wei-hai-wei was to be a secondary naval base, and that it was to be fortified so far as might put it into a position to enable it to defend itself against a raid, but not to that which would make it a place at which ships might take refuge. The fortifications would be of a comparatively simple kind. The Marquis of Salisbury informed the Earl of Kimberley (May 1st) that the general drift of the agreement with Russia was that it was a railway agreement concerning our fields of operation in China. England had agreed not either to undertake or to encourage any railways by English persons or others north of the Great Wall; and on the other hand, Russia had made an exactly similar stipulation with respect to the basin of the Yang-tse. There were certain detailed provisions with respect to the railway which was to be made to Newchwang, about which there had been a great deal of controversy, and our interests in that respect were, he thought, entirely protected. He was very anxious not to appear to attach to the particular stipulations of this agreement an exaggerated importance; but, of course, he attached very great importance to the agreement, for it seemed to be a sign of good feeling between the Governments of Russia and Great Britain. That was very much to be desired; and what was still more to be desired was that good feeling should grow up between the Russian and English people. But this particular agreement, he believed, would be of value in preventing the possibility of collision between the two Governments in that part of the world, and therefore was a gauge for their future agreements for a long time, and he trusted it would lead to agreements in other matters. Replying to Mr. Lambert (June 8th), Mr. Brodrick said the clause in the Anglo-Russian agreement that the Russian Government was at liberty to support concessions for a railway from the main Manchurian line in a south-westerly direction did not, in the opinion of the Government, cover the question of railway communication with Peking. Lord C. Beresford (June 9th) discussed the China policy of the Government. He considered the China question the greatest problem this country had ever faced, requiring immediate attention, and certainly wiser statesman-

ship than they had seen up to the present. The Government had been shouting very loudly for the "open door," but their line of policy had been all along for "spheres of influence," and they had really been doing nothing at all. Mr. Brodrick in reply said they were endeavouring to secure, and so far had secured, that a full share of railway and mining concessions should fall to British investors on the Yang-tse. They would endeavour to provide, by means of transit passes, that trade should be free from undue taxation, and exempted from *lihin*, and they were working for the laying open of inland waters, besides the Yang-tse, and ports which were not now treaty ports, to trade. Although the Government would not undertake to relieve the Yamen from the responsibilities for the internal government of China, they were not prepared to let British trade suffer or fall into other hands. They proposed, therefore, to hold the Chinese Government responsible for not alienating the provinces bordering on the Yang-tse to any other Power. They further held that the railway between Burma and the Yang-tse should be made whenever British investors were prepared to make it. His noble friend had raised the question of how far the Government were diverging from the policy of the open door to that of spheres of influence. He denied that they had abandoned the one policy or adopted the other. No one could expect that this country could have a monopoly in China, but only its fair share. He was glad to know that an agreement for a railway from Tientsin to Chin Kiang, which passed through the German sphere, was to be carried out, the Germans constructing their part of the railway and British investors constructing the other part. In the same way with France, we had agreed, in regard to the provinces of Szu-chuan and Yun-nan, that no concession should be given that would keep out the other Powers from trade. If there was to be a new departure, it must be made by dealing with doubtful questions in an amicable spirit, and endeavouring to consider that a fair compromise was not a bad bargain. We had great commercial interests which we had no intention of surrendering, and therefore it would be in no spirit of jealousy, but simple in the interest of China, that Her Majesty's Government must declare, if they were pressed, that they would be forced to advise the Chinese Government not to acquiesce in any steps calculated to transfer the Government at Peking to any other Power. As to the question of Waima, they were pressing it on the French Government, and they had the strongest hope that it might be brought to arbitration and settled.—Sir E. Grey considered that Wei-hai-wei was not the most satisfactory position that could have been chosen for the protection of British commerce in China. They did not think the best had been done by Her Majesty's Government, but that some favourable opportunities had been lost. The businesslike proposals of the Under Secretary, however, that night were considerably in advance, and more encouraging than any they had up to the present heard. Speaking on the Appropriation Bill (Aug. 7th), Mr. Brodrick said he did not think they had any reason to complain of the concessions which had been given in the sphere between Manchuria and the Yang-tse Valley. A general agreement with regard to that sphere would be an extremely difficult thing. Undoubtedly, while Manchuria was a sphere in

which Russia was exercising a practical control, they could not suppose that the Peking Government would make a similar admission with regard to the spheres of other Powers. In his opinion there was no reason why they should regard with distrust concessions that had been given to Powers in provinces with which we were not particularly connected. With regard to the important point alluded to respecting a possible co-operation with Germany in China, he thought, with reference to all the questions raised, we might look forward in many parts of the world to good results from friendly co-operation with Germany, for he did not see what divergence of interest there was between ourselves and that Power. He called attention to the immensely improved tone which prevailed now in that House as regarded the position of Her Majesty's Government respecting China, as compared with that entertained when the House separated in '98.

[9] Church, "Lawlessness" in the, Bishops' Veto, Confessional. Mr. Samuel Smith, on the Address (Feb. 8th—9th), moved an amendment representing that, having regard to the condition of lawlessness now prevailing in many parts of the Protestant Church of England, some legislative steps should be taken to secure obedience to the law. Colonel Sandys seconded. After a prolonged debate Mr. Balfour said there was no symptom that the bishops shrank from their duty. He agreed that the law should be obeyed, but pleaded for mutual toleration as between the two parties in the Church, and deprecated legislation. The amendment was rejected by 221 to 89. On the same evening (Feb. 9th) the Bishop of Winchester called attention to statements lately made respecting the action of the bishops in dealing with irregularities in public worship. Sir William Harcourt had, he said, asserted that the courts were closed in the matter of ritualistic practices by the misuse of the episcopal veto. Their lordships would scarcely believe that, with the exception of three insignificant and trifling cases, no living English bishop had exercised this veto at all, so that all this eloquence was launched against an imaginary foe. Only in two instances prior to those instances which he had mentioned could he find that the bishops had vetoed proceedings. He denied that there had been agreement among the bishops not to allow prosecutions. The bishops had always tried to repress excesses even on the part of the best of men in the matter of the observance of ceremonial.—Viscount Halifax said neither the Crown nor the secular courts were competent to settle the ceremonial or the doctrine of the Church, and declared that although they might suffer through it, the Church would not see their rights and liberties sacrificed to popular clamour. The Archbishop of Canterbury ventured to say that the amount of anything like Romanism in the Church was exceedingly small. Although they were determined to bring the ritual of the Church of England within proper limits, they appealed to the laity generally not to expect that that could be accomplished in a few months. Mr. Balfour informed Sir J. Willox (March 2nd) that his attention had been called to the memorial of the English Church Union, and so far as he was concerned, and he believed he could speak also for the Lord Chancellor, he should not recommend any clergyman to a benefice unless he was con-

vinced he was prepared loyally to obey his bishop. Lord Kinnaird (March 3rd) moved for a return of all the cases in which the bishop's veto had been exercised under the Church Discipline Act, '40, and under the Public Worship Regulation Act, '74; and asked the Government whether a return could be obtained showing the number of churches in England belonging to the Church of England in which confessional boxes had been put up. The Archbishop of York said with regard to the veto of the bishops everything that could be ascertained had been ascertained. He himself had discovered by careful research that there had not been ten cases in the last twenty-five years in which any bishop of any diocese in England had refused an inquiry when asked for. The Earl of Dudley said a return under the Church Discipline Act could not be granted, as no record was kept of such cases. A return was being prepared for the Commons under the Public Worship Regulation Act, and this information might be laid before their lordships also. The Home Office could not consent to give a return regarding confessional boxes, as it must be incomplete, because there was no power to compel incumbents to grant the information, and the amount of labour involved would be out of all proportion to the value of the information procured. After further discussion, however, the Marquis of Salisbury expressed the opinion that the great importance which noble lords attached to this matter of confessional boxes, as distinguished from any other aspect of the question, should override the technical objection put forward by the Home Office. Lord Kinnaird's motion was then negatived, and a motion of the Earl of Northbrook that an address be presented for a return showing the number of churches in England belonging to the Church of England in which confessional boxes have been put up, was agreed to. Mr. Sydney Gedge (April 11th) moved "That this House deplores the spirit of lawlessness shown in a memorial which the English Church Union (a society of which more than 4000 clergy of the Church of England are stated to be members) adopted unanimously at a meeting held in London on the 28th day of February last, and of which they directed copies to be sent to the Queen, and to every member of each House of Parliament, and approves of the declaration made in this House on the 2nd day of March last by the First Lord of the Treasury, that neither he nor the Lord Chancellor would recommend any clergyman to a benefice unless convinced that he was prepared loyally to obey his bishop, and, in accordance therewith, confidently hopes that the Ministers of the Crown will not recommend any clergyman for ecclesiastical preferment unless they are satisfied that he will loyally obey the law as declared by the courts which have jurisdiction in matters ecclesiastical"; Colonel Sandys seconded. Mr. Samuel Hoare proposed, and Mr. Thornton seconded, an amendment setting forth "That this House deplores the spirit of lawlessness shown by certain members of the Church of England, and confidently hopes that the Ministers of the Crown will not recommend any clergyman for ecclesiastical preferment unless they are satisfied that he will loyally obey the bishops and the Prayer Book." Mr. Balfour expressed his preference for the amendment, because he thought it a pity they should drag in by name

for censure any particular association, either of churchmen or of any other section of the community; and further, because a resolution passed in such terms had about it all the air of persecution, while it was not persecution that would hurt anybody. The resolution, too, did not cover the whole ground. Mr. Balfour went on to say that the dangers which the English Church was now incurring, and the divisions from which it was suffering, were not questions merely, or even principally, of technical obedience to the law. They were questions of loyalty to an institution. It was for this reason that he did not believe that any effectual remedy could be found for our present troubles merely in increasing the stringency of any existing remedies against lawlessness, and that he so deeply deplored the recent enunciation of policy by certain members of the English Church Union. In another passage of his speech Mr. Balfour said he was one of those who had always desired to see greater spiritual autonomy given to the English Church; he was prejudiced in favour of giving it those liberties which the Scottish Established Church enjoys. Lord H. Cecil said he proposed to support the amendment rather than the resolution. After further discussion, in course of which Sir H. Campbell-Bannerman said he should like to have in the resolution, before he would vote for it, a recognition of the subjection of the points in dispute to the properly established civil courts of the realm, the original motion was negatived, Mr. S. Hoare's amendment then becoming the substantive resolution. Mr. Bartley then proposed to add at the end of this, after "Prayer Book," the words "and the law as declared by the courts which have jurisdiction in matters ecclesiastical." This was seconded by Mr. Gedge. Mr. Balfour thought the addition would be unwise and injudicious. Sir E. Clarke appealed to the right hon. gent. to withdraw his objection. Viscount Cranborne thought the proposed addition very ill-advised. Mr. Balfour replied that he did not at all change his own view that the suggestion of these words by his hon. friend was unfortunate, but the suggestion had been made, and had been taken up by the great mass of the House as if it were a simple declaration carrying no further consequences than an assertion that the law must be obeyed. It was quite clear that if that was the interpretation which the House put on the suggestion, it was impossible for him to ask the House not to accept it. Of course, the law must be obeyed. He thought the amendment was inexpedient, because he did not think that the same interpretation would be put upon it by a body of opinion with which he did not personally agree, not being a High Churchman, but which it was most important at that time not to do anything to alienate. The proposal to add Mr. Bartley's words was put and carried by 200 to 14; and the amended resolution was then put and agreed to as follows:—"That this House deplores the spirit of lawlessness shown by certain members of the Church of England, and confidently hopes that the Ministers of the Crown will not recommend any clergyman for ecclesiastical preferment unless they are satisfied that he will loyally obey the bishops and the Prayer Book and the law as declared by the courts which have jurisdiction in matters ecclesiastical." See also "Church Discipline Bill," sect. 43.

[10] **County Courts Jurisdiction.** Mr. Monk moved (Feb. 28th) "that the time has arrived when Her Majesty's Government may reasonably be expected to initiate or facilitate legislation, having for its object a considerable extension of the ordinary jurisdiction of County Courts in Common Law, Equity, and Admiralty Causes." This was seconded by Mr. Brynmor Jones. The Attorney General, in opposing the motion, said, as something like 80 or 90 per cent. of the cases which came before the High Court were under the limit of £1,000, to which the hon. member had suggested the jurisdiction of the county courts should be extended, the effect of the scheme would be to abolish practically the High Court. The primary object of the county courts was the speedy recovery of small debts and the trial of actions which were not likely to raise difficult questions of law. The burden cast upon a large number of county courts at present was greater than they could bear. At the same time he agreed that the arrangements in the Common Law Division of the High Court required thorough revision. The motion was rejected by 98 to 69.

Derby Day. The House of Commons re-assembled after the Whitsuntide recess, and considered the Education of Children Bill (see sect. 54) in committee.

[11] **Directors of Companies, Ministers &c.** Mr. MacNeill (Feb. 14th) moved on the Address an amendment representing "that twenty-five out of the forty-four Ministers of the Crown who constitute Your Majesty's present administration hold among them no fewer than forty-one directorships in public companies, and that we consider the position of a public-company director to be incompatible with the position of a Minister of the Crown, and that the union of such offices is calculated to lower the dignity of public life." The hon. member stated that of the nineteen members of the Cabinet eleven were company directors. Mr. Birrell seconded. The Chancellor of the Exchequer, in justifying the holding by Ministers of such directorships as were then held by them, said the rules laid down when they accepted office were, first that no member of the Government should enter into any engagement that would take up time properly belonging to the public; second, that he should not undertake any responsibility in connection with public companies that could be supposed to diminish his usefulness or fitness as a member of the Government. In his belief these rules had been rigidly observed. Many directorships had been resigned: he had resigned one himself, and some twenty had been resigned by his colleagues. But he did protest against the view that all directors were corrupt, that there is no honesty in joint-stock enterprises, or that there were no positions of this kind which members of the Government might legitimately hold. Mr. Jeffreys (C) and Mr. Bowles spoke in favour of the principle of the amendment. Mr. Balfour supported the attitude which had been assumed by the Chancellor of the Exchequer. The amendment was defeated by 247 to 143.

[12] **East and Central Africa.** In committee on the Supplementary Civil Service Estimates (Feb. 27th), Mr. Brodrick stated, on the vote of £256,000 for grants in aid for Uganda, British Central and British East Africa, that Colonel Martyr was to explore, and, if possible, plant

posts on the right bank of the Nile, connecting Uganda with the territory which Lord Kitchener's troops have penetrated, the intention being that he shall ultimately join hands with the Sirdar, and that he shall ascertain and occupy the territory to which we are by treaty entitled. Answering the Earl of Camperdown (March 20th), the Marquis of Salisbury said the main object of Major Macdonald's expedition from Uganda was to examine more exactly the frontier which had been agreed upon some time ago between what was then the Italian sphere of influence and our own. That boundary was indicated by the head waters of the Juba. This was not the only object of the expedition. There were rumours at the time of designs on the Upper Nile, which experience had not altogether falsified, and which made the Government anxious to establish our military power at some station of the river. Unfortunately, the mutiny of the Soudanese troops brought this particular branch of the expedition to an untimely end. Certain movements connected with the exploration of Lake Rudolph took place, but a more important point alluded to by the noble Earl was connected with the name of Major Martyr. A considerable portion of Major Macdonald's troops, with other troops in the protectorate, made an expedition from the head waters of the Nile and down the river bank, and had been, on the whole, successful. When Major Martyr arrived at Bor he ascertained that the Dervishes, hearing that the English forces were *en route*, had disappeared. The last they had heard of the Major was that he was at Bedden, where the sudd commenced. Mr. Brodrick informed Sir E. Ashmead Bartlett and Mr. Yerburgh (March 24th) that the agreement came to between Great Britain and France stipulated for equal treatment of British and French trade between the Nile and Lake Chad, which affords access to the Nile territory. The Waima claims were not dealt with in the agreement. Mr. Brodrick stated (April 10th), in course of a debate initiated by Mr. McKenna, that in Pemba and Zanzibar the liberation of slaves was proceeding with as much rapidity as they themselves desired. The progress of the East African Protectorate under Sir A. Hardinge had been satisfactory during past years. The receipts had increased and the expenditure had diminished. They did not intend to send out expeditions, with the exception of that under Colonel Martyr, for the purpose of establishing fresh posts. The connection of the Uganda Protectorate with Lord Kitchener's forces had already been practically achieved, for there were only about 200 miles of river and unoccupied country between the last of the posts that would enable us to connect our possessions in East Africa with the Soudan. Mr. Brodrick, in reply to Commander Bethell (July 10th), regretted to say that in consequence of illness Mr. Berkeley, the Commissioner and Consul-General of the Uganda Protectorate, had been forced to resign his appointment. The Secretary of State, considering that order had now been restored in the Protectorate, and that the railway was far advanced, thought this a fitting time to send a Special Commissioner to Uganda, to report what posts it was desirable to establish, especially in view of Colonel Martyr's advance on the Nile. For this purpose he proposed to avail himself of

the administrative experience of Sir Harry Johnston, who would be appointed with full powers to administer the Protectorate with the same control of the military forces as was given to other governors also holding a special appointment as Commander-in-Chief.

[13] Education, England and Wales. Mr. Lloyd George (March 7th) moved "That the system of Primary Education in England and Wales inflicts upon a large portion of Her Majesty's subjects a serious grievance, which demands the immediate attention of Parliament." Under the present system thousands of children left school before they were twelve years of age, the apparatus in the voluntary schools was defective, their general equipment was bad, the accommodation was insufficient, and in many of the schools in the rural districts the condition of things was perfectly disgraceful. The existing policy drove out board schools and planted voluntary schools in their place, and all this crippling of education in the rural districts was done in the name of religion. The system whereby only 10 per cent. of the places in the training colleges were open to Nonconformists was a serious cause of complaint. Mr. A. Hutton seconded. Mr. Harry Foster moved to insert in the motion after the word "Wales" the words "under which board schools receive a larger grant of public money than voluntary or denominational schools for the same educational work, carried on under the same inspection and under the same educational code, and under which the local burdens for National Primary Education are unequally divided." Mr. Gray seconded the amendment. Sir J. Gorst hoped the House would see that at the present moment there was no such practical religious grievance as demanded the immediate attention of Parliament, to the exclusion of much more important business. He therefore asked the House to negative the motion. As to the amendment, he agreed that it was to the interest of the country that such financial arrangements should be made as to put the managers of voluntary schools in a satisfactory and proper position. Two years ago a Bill was passed giving a large sum of money to the managers of voluntary schools, and they could hardly ask that the attention of Parliament should be again directed to this subject. He hoped that the amendment would be withdrawn, so that the division could be taken on the motion. The amendment was withdrawn, and the motion negatived by 204 to 81. Mr. Jeffreys (April 17th) moved an address praying her Majesty "to withhold her consent to the new portions of Articles 37 and 42 on pages 90 and 91 of the Code of Regulations for Day Schools, which was presented to the House on the 21st day of March last." Article 37 now provided that after Jan. 1st, 1900, no pupil teacher would be recognised in a school in which there were not at least two other adult teachers employed, except with the consent of the Council. That article would have a most disastrous effect on small voluntary schools, and would virtually abolish pupil teachers in them. Article 42 also had reference to pupil teachers. Lord E. Talbot seconded. Sir J. Gorst said the amendments to which the hon. member objected were designed to improve the staffs of rural schools, and to promote the efficiency of those schools; they were recommended by a committee of experts, by the inspectors and the professional advisers of the

Department. But the Government had no intention of forcing a benefit of this kind on a reluctant House, and the amendments would be withdrawn, though they would be returned to on some future occasion. The motion was carried by 147 to 67.

Sir J. Gorst (April 23th) introduced the **Education Estimates**. He was very glad to say that the rate of average attendance, which had for the past three years been slowly declining, had mounted up again, and had reached 81'66, being the largest percentage since the passing of the Education Act of '70. The new return on child labour was a painful and sickening document. In several cases it was reported that children slept during school hours. The champion child, a boy under six, worked in a brickfield at brickmaking, and earned 3s. 6d. per week; whilst a little girl of the same age worked 35 hours a week carrying milk for her parents, and another was engaged as a nurse-girl for 29 hours a week, and was given for wages 2d. and her food. With regard to the kind of occupation of these little white slaves, the greatest number of boys (76,173) were engaged in shops; selling newspapers came next, which industry took up the spare time of 15,182; 8627 knocked up workmen in the morning, took dinners, etc., whilst only 6115 turned their attention to agriculture, and 10,636 did odd jobs. For the girls there was much less diversity of employment: 11,585 looked after babies, 9254 did household and laundry work, and 4019 did needle- and other light work. The hours some of the poor children worked were truly disgraceful. A newspaper boy aged twelve, in Standard VI., worked 100 hours a week, including Sundays; another boy of the same age worked 87 hours a week as a farm labourer, and several, some ten, and others twelve, spent over 70 hours of their week working at different occupations. The girls were a little better off as regards length of hours, the worst case being that of a girl thirteen years of age who worked 72 hours a week in a shop; but there were several who worked 70 hours carrying bark for woodcutters, and of course there would be many who worked in houses for their own mothers, for instance, of whose hours of work no proper return could be obtained. There were one or two particularly flagrant cases, where one would hardly think the poor little victims could do what they did. A greengrocer's boy of twelve years of age started for London every morning at half-past two, and returned home at half-past nine, when he went to school. Was it any wonder that he was only in Standard II.? Another rose every morning between three and four, called workmen until half-past five, started on a newspaper round at six and finished at nine, when he went to school. This boy was often half-asleep during the afternoon. The wages these unhappy children earned averaged about 1s. each child per week, of course very unevenly divided: 47,273 earned between 6d. and 1s.; 40,293 from 1s. to 2s.; 19,757 from 2s. to 3s.; 17,084 earned under 6d. a week, and 8123 earned above 3s. In course of the discussion that followed, Sir H. Campbell-Bannerman remarked that Sir John Gorst showed a want of regard for his own personal dignity in continuing in an office for which he showed his contempt whenever he spoke of it. Sir John Gorst (May 1st), in replying to the observations previously made concerning himself by the

Leader of the Opposition, said the views of the Lord President and his own on the subject of education were entirely in sympathy. He did not pretend that there had never been any difference of opinion: he should be sorry to make the Lord President responsible for everything he had said in the House in debate, but upon major and important questions they were entirely in sympathy, and the general educational policy he had tried to enforce in that House was entirely in accord with his noble friend's views and his own. Further, he denied absolutely that he had ever cast ridicule either upon the Education Department or the Lord President. See also "Board of Education Bill," sect. 41.

[14] **Egypt and the Soudan, and the Grant to Lord Kitchener.** On Feb. 24th, the Commons considered a supplementary Army Estimate of £885,000 for additional expenditure on various military services, including expenditure on the Omdurman expedition, the whole or nearly the whole of which had been repaid by Egypt. Mr. J. Morley moved a nominal reduction of the estimate, taking occasion to say that the Soudan advance had been an error from the first, and strongly condemning the exhumation and ill-treatment of the Mahdi's remains. Mr. Brodrick adverted to the changed state of Egypt, which from being nearly bankrupt in '85 had grown in population and prosperity in a manner unexampled in history. It was confidently expected that, unless important and unforeseen circumstances occurred, a period of some five years would see the Soudan paying its way. Mr. Courtney maintained his previous attitude that the forward policy in the Soudan was a mistake. Sir E. Grey thought the country supported the Government in their forward movement, and that if we had gone too fast it was because the pace was forced on us. Sir H. Campbell-Bannerman supported the amendment as a continued protest against the policy of advance. The amendment for the reduction of the vote was negatived by 167 to 58. Mr. Brodrick informed Mr. Herbert Roberts (Feb. 27th) that as Governor-General of the Soudan Lord Kitchener draws pay at the rate of £1,000 a year, with £500 for travelling allowances. This is in addition to his pay as Sirdar, but he draws no pay from the British Army funds. Mr. Balfour (June 2nd) brought up a message to the House, signed by Her Majesty's own hand, which the Speaker read as follows:—"VICTORIA R. Her Majesty, taking into consideration the eminent services of Major General Lord Kitchener of Khartoum, G.C.B., K.C.M.G., in planning and conducting the recent expedition into the Soudan, and being desirous, in recognition of such services, to confer some signal mark of her favour upon him, recommends to her faithful Commons that she should be enabled to grant Lord Kitchener the sum of thirty thousand pounds.—Balmoral. 1 June, 1899." Mr. Balfour, in a eulogistic speech, moved (June 5th) "That a sum not exceeding £30,000 be granted to Her Majesty, to be issued to Major-General Lord Kitchener of Khartoum, G.C.B., K.C.M.G., as an acknowledgment of his eminent services in planning and conducting the recent expedition in the Soudan." Sir H. Campbell-Bannerman remarked, on his own behalf and on the part of his political friends, that they fully shared the estimate of Lord Kitchener's services which Mr. Balfour had so eloquently expressed. In

our treatment of the Mahdi's tomb and remains there was an element and air of vindictiveness which was unworthy of this great country. He made every allowance for the political desire to do away with the focus of fanaticism, but still it remained that there was what in civilised countries would be considered a most cruel outrage, and he could not help adding a gross blunder. Apart from this criticism, he supported the vote. Mr. J. Morley, however, opposed the vote, and strongly condemned the treatment of the Mahdi's remains. Mr. Balfour justified what had been done, in the circumstances, urging that to have allowed any superstitious reverence for the Mahdi to exist would have been to jeopardise the lives of the European officers who were left in the Soudan with the native troops. The vote was carried by 393 to 51. (Dr. Wallace, being seized with illness while speaking in this debate, was assisted from the House, and died a few hours afterwards.) Mr. Balfour moved (June 8th) "That the thanks of this House be given to Major-General Lord Kitchener of Khartoum, G.C.B., K.C.M.G., for the distinguished skill and ability with which he planned and conducted the campaign on the Nile of 1896-7-8, which culminated in the Battle of Omdurman, the capture of Khartoum, and the overthrow of the power of the Khalifa. That the thanks of this House be given to Major-General Sir A. Hunter, K.C.B., D.S.O.; Major-General Sir H. M. L. Rundle, K.C.B., C.M.G., D.S.O., R.A.; Major-General Sir W. F. Gatacre, K.C.B., D.S.O.; Major-General the Hon. N. G. Lyttelton, C.B.; Major-General A. G. Wauchope, C.B., C.M.G.; Major and Brevet Colonel Sir F. R. Wingate, K.C.M.G., C.B., D.S.O., R.A.; Lieutenant-Colonel and Brevet Colonel C. J. Long, R.A.; Major and Brevet Colonel H. A. MacDonald, D.S.O.; Lieutenant-Colonel D. F. Lewis, C.B.; Major and Brevet Lieutenant-Colonel J. Collinson, C.B.; Commander C. R. Keppel, C.B., D.S.O., R.N.; and to the other officers and warrant officers of the Navy, the British and the Egyptian Army, and the Royal Marines, for the energy and gallantry with which they executed the services which they were called upon to perform. That this House doth acknowledge and highly approve the gallantry, discipline, and good conduct displayed by the petty officers, non-commissioned officers, and men of the Navy, the British and the Egyptian Army, and the Royal Marines during the campaign. That the thanks of this House be given to Lieutenant-General Sir Francis Grenfell, G.C.B., G.C.M.G., for the support and assistance which he afforded to the forces employed in the operations in the Soudan. That this House doth acknowledge, with admiration, the distinguished valour, devotion, and conduct of those other officers and men who have perished during the campaign in the Soudan in the service of their country, and feels deep sympathy with their relatives and friends." Sir H. Campbell-Bannerman seconded the motion, expressing cordial and sincere approval of resolutions which gave expression to the admiration and gratitude of the House. The first resolution, that in reference to Lord Kitchener, was carried by 321 to 20. On the next resolution, comprising the generals and officers, Dr. Farquharson called attention to the neglect to acknowledge the services of medical officers. Mr. Davitt and others could not support the

resolution, but it was carried by 347 to 18. The third resolution, regarding the petty officers, etc., was carried by 355 to 16, and the others were agreed to. Similar resolutions of thanks, and in favour of the grant to Lord Kitchener, were agreed to in the Lords, also, on June 8th. Lord Kitchener of Khartoum, introduced by Lord Roberts of Kandahar and Lord Cromer, took the oath and subscribed the roll of the House of Peers, July 25th.

[15] **Expenditure, National.** Mr. Buchanan moved (April 18th) "That the National Expenditure is excessive, and is capable of reduction without compromising the safety or legitimate influence of the country abroad or the efficiency of home administration." He adverted to the growth of expenditure during the previous four years, as showed in the Budget statement, amounting to an increase of £19,000,000; and said the expenditure, it appeared, would go on increasing. The only matter as to which the Government had attempted any retrenchment of public expenditure had been in the payment of the Debt. The loan expenditure had gone up in an astounding degree, and would be bigger next year than ever. For the naval expenditure the House and the country were responsible, but in this expenditure, speaking generally, they had obtained value for money. Mr. Robinson Souttar seconded. Sir C. Dilke moved an amendment setting forth "That while this House is anxious to provide for the maintenance of the Navy in its existing relative strength, it is of opinion that the national expenditure is excessive," and so forth to the end of Mr. Buchanan's original motion. In considering how expenditure could be reduced, he thought the reduction must be in the case of the Army, and was persuaded that by means of army reform there was the possibility of a great saving of money, combined with no loss of efficiency. Mr. Balfour said the Government could neither accept the motion in its original nor its amended form. If hon. members and the party opposite objected to the expenditure, it would be in their power, when they came into office, to deprive Voluntary Schools of their grant, deprive Ireland of their £700,000 grant, and not to renew the Agricultural Rating Act. With regard to the Army, it had been said that with its increase there had not been sufficient national advantage, but he did not agree with that. Sir C. Dilke's amendment was negatived without a division. Mr. Buchanan's motion being then rejected by 132 to 69.

[16] **Foreign Imports.** Mr. Seton-Karr moved on the Address (Feb. 16th) an amendment expressing the hope that Her Majesty would "direct inquiry to be made into the present large and increasing dependence of the United Kingdom on foreign imports for the necessities of life, and the circumstances that might arise therefrom in the event of Her Majesty becoming involved in war with some foreign Power or Powers, with a view to ascertaining what measures (if any) can be taken to lessen such dependence." This was seconded by Mr. Atherley Jones (L). Mr. Ritchie said the question had been looked into, and contended that if the Navy were kept up to its proper strength there was no prospect of the people of this country being starved in case of war. The amendment was negatived, leave to withdraw it being refused.

[17] **House of Lords Veto.** Mr. Labouchere on the Address proposed (Feb. 13th) an amendment representing "that it is expedient that any Bill which shall have been passed by this House, and shall not have been submitted to your Majesty for your royal assent in the session in which it was passed by this House, shall, if passed by this House in the next ensuing session, be submitted to your Majesty, and, upon your royal assent being signified, forthwith become law." Mr. Lawson Walton proposed to substitute for this amendment another representing "that the power at present possessed by the House of Lords to override the decision of this House urgently demands the attention of Parliament." Sir H. Campbell-Bannerman felt unable to approve the proposal of Mr. Labouchere, and supported the alternative submitted by Mr. Lawson Walton. Mr. Balfour opposed both amendments. The latter of the two propositions was rejected by 257 to 107, after which Mr. Labouchere's was defeated by 223 to 105. In the first of the two divisions Mr. Labouchere and Mr. Mendl told against Mr. Walton's proposal, some thirty members, mostly Radicals, but including a few Irish representatives, voting with them. In the division on Mr. Labouchere's amendment 51 of those who had supported Mr. Walton, and including Sir H. Campbell-Bannerman and Mr. Asquith, did not vote at all, the minority of 109, including tellers, being made up of 31 members who had voted with Mr. Labouchere in the first division, 58 of those who had voted with Mr. Walton, and some who had not in the first division voted at all.

[18] **India (Countervailing Duty on Sugar).** The imposition of countervailing duties on bounty-fed sugar imported into India gave rise to some interesting proceedings. On April 20th there was an animated little episode arising out of questions put by Mr. Maclean and the replies of Lord G. Hamilton, the hon. member at length, in inference to some loud cries of "Oh," and "Order," from his own side, telling his friends that if the Speaker ordered him to sit down he would sit down, or he could go over to the other side if hon. members wished, and thereupon suiting the action to the word. Mr. Maclean wished to discuss the policy of imposing these duties, but was unable to find an opportunity of doing so. Replying to him on May 9th, Mr. Balfour stated that, in the absence of a demand from the authorised leaders of the Opposition, he did not think it would be possible to find a day for the discussion of the question. Sir Henry Fowler at once gave notice that he would move an address praying Her Majesty to disallow the Indian Tariff Amendment Act of this year under which the duty was imposed, and Sir H. Campbell-Bannerman followed this up with a request for a day for the discussion. Mr. Balfour replied that he should be glad to give one, but the particular day must depend on mutual arrangement. The debate was duly taken on June 15th, when Sir H. Fowler proposed the motion of which he had given notice. Mr. Maclean in seconding the motion attributed the passing of the new law in such haste to the influence of the Colonial Secretary. Lord G. Hamilton supported the new law, and felt that he could do so consistently with the free trade principles he had held all his life. Sir C. Cameron (*L*) agreed with the action of the

Government on the matter, and Mr. Courtney from the other side expressed disapproval of it. Mr. Chamberlain said the position of the Government was that countervailing duties were matters of expediency, to be judged in each case on their merits, and that there was nothing in orthodox free trade principles that should exclude their imposition. As to this particular matter, he did nothing beyond conveying to the Secretary for India the feeling of the colony of Mauritius. Sir H. Campbell-Bannerman in supporting the motion said the speeches of Lord G. Hamilton and Mr. Chamberlain showed that it was their intention to apply this policy at some convenient season to this country. The motion was rejected by 293 to 152.

[19] **Ireland (Catholic University Education).** In committee on the vote for the Queen's Colleges in Ireland, Mr. Dillon (June 23rd) raised the question of the establishment of a Roman Catholic University as suggested by the Irish bishops. Mr. Balfour said the House devoted a great deal of money, without the smallest objection from Protestants, to a wide system of primary education, which was practically a denominational education; and a great deal of money went without disguise to support a Roman Catholic college which was denominational in a sense which no university he had ever desired to set up would be. Then there were the training colleges which were avowedly Roman Catholic, and the reformatory schools. It was really ignorance which was at the bottom of the difficulties they experienced, but surely there was some hope that the time must come when by the common consent of men of all shades of opinion they would do for Ireland what had been done so adequately for the rest of the United Kingdom.

[20] **Ireland, Distress in.** Mr. Davitt moved (Feb. 17th) an amendment to the Address, representing "that the frequent recurrence of severe distress in certain districts of Ireland is the source of much suffering to the population of these localities, and calls for the speedy application of an efficient remedy for this social misery and privation by the introduction of legislation during the present session for the enlargement of holdings, and the carrying out of feasible schemes of migration, in accordance with a resolution passed by the Congested Districts Board of Ireland in 1895, asking for compulsory powers to acquire suitable lands with which to provide increased opportunities of employment for the victims of this chronic distress." Mr. G. Balfour said migration had not proved a success generally, though the Congested Districts Board intended to make further efforts in the same direction. The difficulty in regard to the enlargement of holdings was to get suitable land; but where in the immediate neighbourhood of small holdings there was other land that could be divided among them, the Congested Districts Board would undertake the operation. The Board did not now desire compulsory powers, for there was no difficulty about purchasing land for re-sale to tenants. The Government proposed this session to increase the grant to the Board. The amendment was (Feb. 20th) rejected by 203 to 122.

[21] **Ireland, Land Acts.** Lord Inchiquin (July 18th) called attention to a resolution of the Landowners' Convention, held in Dublin on Feb. 22nd, and moved "That the question of com-

pensation to the Irish landowners for injuries inflicted upon them by recent legislation demands the immediate attention of Her Majesty's Government." The Duke of Abercorn joined in expressing the hope that something would be done in the interest of a class brought to such a condition of misery and poverty by various Acts of Parliament. Lord Ashbourne said Lord Inchiquin had not suggested how a remedy was to be found. Everything had been done to carry out the suggestions of the Fry Commission. One great policy was working well in Ireland, and that was the land purchase system. He much regretted the withdrawal of the Tithe Rent-Charge (Ireland) Bill (see sect. 110), and hoped it would be re-introduced next session, when it would have a better fate. The Marquis of Londonderry remarked that previous to the Irish Land Acts Parliament never confiscated property without giving fair compensation. After further discussion the motion was carried against the Government by 39 to 34.

[22] **Ireland, Legislative Independence.** Mr. J. Redmond (Feb. 16th) moved on the Address an amendment declaring that the establishment of popular self-government in local affairs in Ireland had intensified the demand of the people of that country for legislative independence, without which Ireland could never be prosperous or contented, and which, in their opinion, was, and must remain, the most urgent of all questions of domestic policy. Sir H. Campbell-Bannerman declined to accept the amendment for reasons which had been fully stated by Sir W. Harcourt when a similar proposal was put forward in the session of '98. The Liberal party stood in the same position as they had previously done on the question of Home Rule, but they could not support an amendment which was inconsistent with the convictions and plain declarations which had guided their conduct from the first in the controversy on this great question. The amendment was rejected by 300 to 43. The minority of 45, including tellers, who supported the amendment, consisted of 41 Nationalists and Parnellites, and 4 Liberals—Mr. C. P. Scott, Mr. Atherley-Jones, Mr. Labouchere, and Mr. P. Stanhope. Mr. T. M. Healy voted with Mr. Redmond. Mr. Dillon took no part in the division. Seventy-seven Liberals, including the leader of the Opposition and other of its official members, voted with the Government against the amendment.

[23] **Judge, Additional, of the High Court.** Mr. Balfour (July 31st) moved an address to Her Majesty representing that the state of business in the High Court of Justice was such as to require the appointment of an additional judge, and praying that she would be graciously pleased to appoint a new judge of the said High Court in the Chancery Division thereof, in pursuance of the eighteenth section of the Appellate Jurisdiction Act, 1876." In course of the discussion Mr. Asquith, while entirely assenting to the motion, trusted that the Government would not regard that as a final solution of the question, and hoped the Government would before next session see the necessity of reconsidering the whole position of affairs in the High Court. The resolution was carried by 159 to 28. A similar resolution was agreed to in the Lords.

[24] **Land in Towns (Ownership, etc.).** Mr. E. J. C. Morton moved on the Address

(Feb. 10th) an amendment expressing regret that there was no indication in the Queen's Speech that measures would be submitted to the House dealing with the ownership, tenure, or taxation of land in towns. Mr. Chaplin observed that one of the objects of the mover was to compel landlords in towns to contribute more equitably to the rates. That was a matter which was now under the consideration of the Local Taxation Commission. Mr. Asquith regretted the omission from the Government programme of an important measure of social reform. They wanted a system of municipal taxation under which it would be possible to throw a just share of the burden of public works on the owners of the soil. Mr. Balfour said the difficulty of dealing with overcrowding was felt on the continent of Europe and in America, as well as in this country. There was already an Act in force providing for the compulsory purchase of land for the erection of workmen's dwellings, whatever view the owner of the land might hold as to the propriety of erecting workmen's dwellings upon it. If it were necessary to give compulsory powers more liberally for the purchase of land for the erection of such dwellings thereon, that would be a point worthy of consideration. The amendment was in the result rejected by 157 to 123, two Conservatives voting in the minority.

[25] **Mercantile Marine.** Mr. Havelock Wilson moved on the Address an amendment which, as altered at the suggestion of Mr. T. P. O'Connor, expressed regret that there was no indication in the Queen's Speech that the provisions of the Workmen's Compensation Act, '97, would be extended to British seamen. The Home Secretary replied that the Government were not prepared in the present session to propose any amendment or extension of the Act, but they hoped the time would come before very long when it might be extended to seamen. The amendment was negatived by 206 to 125. Mr. R. G. Webster proposed (Feb. 28th) a resolution declaring "That this House views with deep concern the fact that the proportion of British seamen in the Mercantile Marine is rapidly decreasing, and also that pilotage certificates are being issued in increasing numbers in British waters to foreigners, and trusts the Government will take prompt steps to inquire into the cause, in order to secure a remedy for this state of affairs." This was seconded by Mr. C. M'Arthur (C.), and supported by Mr. Havelock Wilson. Mr. G. Bowles saw no cause for anxiety as to the diminution in the number of British seamen, which, he contended, was not so great as was assumed. He did believe, however, that it was correct that "pilotage certificates are being issued in increasing numbers in British waters to foreigners," and asked the President of the Board of Trade to seriously consider whether it was advisable to encourage foreigners to gain a knowledge of our seas. Mr. Ritchie said he did not regard with satisfaction the very considerable increase which was undoubtedly taking place in the number of foreign seamen on board British ships. Every legitimate effort should be made to man our ships with British sailors. He absolutely denied the statement that the British sailor was badly treated, contending that the seaman's lot at the present time, as regards wages, food, lodging, and treatment, was better than it had been at any previous

time. He hoped the shipowners would take advantage of the Merchant Shipping (Mercantile Marine Fund) Act of 1893, and train a large number of boys in the mercantile marine. The Board of Trade had under consideration a scheme for furnishing continuous discharges to seamen, which would enable capable men to secure employment on British ships. He agreed with Mr. Havelock Wilson that the British sailor had no greater enemy than the crimp, and there was nothing in reason he would not do to put an end to the present state of things. As to the employment of foreign seamen, there was no doubt that a great many of them, especially Scandinavians, were extremely good sailors; that they did their work uncommonly well, and perhaps were more sober and more amenable to discipline than British sailors. As far as the motion expressed the concern of the House at the proportion of foreigners employed in the mercantile marine, he was prepared to accept it. The motion was agreed to.

[26] **Muscat.** Lord G. Hamilton informed Mr. Labouchere (Feb. 23rd) that the recently proposed lease of a Muscat port to France by the Sultan of Oman was contrary to treaty, and had not been proceeded with. The Sultan was under a special obligation to the British Government in respect of the alienation or assignment of any part of his territory. The relations of Great Britain and France towards Muscat were based on the treaty of 1862, by which both countries reciprocally engaged to respect the independence of the Sovereigns of Muscat. The Sultan had for years been in receipt of a subsidy from the Indian Government, and had on various occasions received help in maintaining his authority and quieting disturbances in his territory. In answer to Sir E. Ashmead-Bartlett, Mr. Brodrick stated (March 9th) that the site of the proposed French coaling depôt on the Muscat coast had not yet been actually fixed, but the Sultan would be advised only to grant a depôt at Muscat itself. The French Government had now accepted our view of the treaty of 1862, that it precludes either Government from accepting any cession or lease of Muscat territory, and in lieu of their former concession had agreed to accept a coal depôt on exactly the same terms as our own.

[27] **Navy.** Mr. Goschen, in introducing the Navy Estimates (March 9th), adverted to the troublesome months of the preceding October and November, when comparisons as to the relative strength of naval powers were in every one's mind, and commented upon the striking confidence which the people of this country showed in those critical moments in the naval force of this country and in their preparedness to meet any emergency. That confidence was, he submitted, the result and the reward of past expenditure, of the liberality of the House and of the nation as regards the Navy Estimates. They had to make no feverish purchases, no sudden enrolments, to ask for no vote of credit, and it was possible to conduct everything with calmness and quiet. They had, for instance, to purchase no ammunition, and to give no new orders. In course of his explanation, the estimates showing an increase of £2,876,000 for the year '99-1900, the First Lord said he had examined the programmes of other Powers, and that study had not been very reassuring. He had caused to be added up the amount of war-

ships under construction by the six chief naval powers, and found that there were 685,000 tons of men-of-war building, besides 225,000 tons which were projected. The Powers concerned were France, Russia, the United States, Japan, Italy, and Germany. Looking at the ships building over all the world, and on the other hand at our position, he claimed that our increased estimates were forced upon the Government by the acts of other countries. Mr. Goschen went on to say: "I have now to state, on behalf of Her Majesty's Government, that if the other great naval Powers should be prepared to diminish their programme of ship-building we should on our side be prepared to meet such a procedure by modifying ours. The difficulties of adjustment are no doubt immense. Our desire that the Conference should succeed in lightening the tremendous burdens which are now weighing down all the nations of Europe is sincere. But if Europe comes to no agreement, and if the hope entertained by the Czar be not realised, then the programme I have submitted to the House must stand, because it is constructed on the basis on which the House has always expected it to rest." On the vote for 110,640 men and boys for the Royal Navy, including 18,505 Royal Marines, Mr. Labouchere (March 13th) moved a reduction of 4000, but the amendment was negatived by 147 to 19. Mr. Goschen stated (July 21st) in answer to Sir C. Dilke, that there was nothing to show any change of programme on the part of Russia since the estimates were introduced and therefore there was nothing to induce H.M. Government to change their programme brought forward in April. At the same time he saw in the Russian programme no menace against this country in particular.

[28] **Peace Conference.** Speaking on the debate on the Address (Feb. 7th) the Marquis of Salisbury said the Earl of Kimberley had referred to the very remarkable invitation which the Emperor of Russia had addressed to all the Powers of Europe to meet him in conference for the purpose of lightening the terrible burden of armaments laid upon us, and of attempting to avert the ever-present possibility of war. Nobody could doubt the purity and grandeur of the motives which had animated the Emperor in giving this invitation, and every one must heartily wish that his anticipations may be realised. But farther than that he did not think it safe to go. "The constant increase in armaments which is taking place on all sides at the very time we are speaking of and prophesying peace is not encouraging to the ideal dreams in which the Czar has perhaps indulged, and may warn us to prepare for a possible issue less gratifying than that on which he has most naturally and laudably allowed his mind to dwell. There are many difficulties to be surmounted before any such general benefit can be achieved as that which his Majesty has sketched out. I shall myself be satisfied if the results of this conference and of these negotiations are capable of fulfilling a somewhat humbler aim. If by extending the use of the principle of arbitration we are able to diminish the number of causes by which war can be induced, and if by humane and beneficent legislation we can diminish the horrors of that war when it is waged, we shall have done, I think, for our generation a service of which the whole value cannot be appreciated at once, but to which, I think, the future inhabitants of Europe will look

back with gratitude. And if, as I hope, in that more distant time it is developed to a greater and more perfect end, they will have cause to bless the name of the Sovereign to whose imagination and to whose power and courage this result will in a great measure be due." (See also previous section.)

[29] **Peers at Elections.** Mr. J. Lowther (Feb. 7th) again took objection to the renewal of the sessional order against the interference of peers at elections, and proposed an amendment which would have had the effect of restricting the order to Lords Lieutenant of counties, as distinguished from peers. The order it was proposed to renew was a sham and a farce. Sir W. Lawson supported the amendment. Mr. Balfour had not much to add to what he had said in '98 in supporting the order. The amendment was negatived by 359 to 90, and the order duly renewed. Mr. J. Lowther, on Feb. 14th, complained that the Duke of Bedford and Earl Carrington had concerned themselves in candidature of gentlemen for the constituencies of South Beds and South Bucks, and moved to refer the matter to a select committee. Mr. Balfour thought the adoption of the motion would bring about no practical result, and it was defeated by 230 to 119. Mr. Lowther raised a similar question on May 2nd, in relation to a meeting said to have been held at St. Stephen's Club for the purpose of selecting a candidate to fill the vacant seat for Oxford University, and which the Lord Chancellor and other peers attended; and on June 5th in regard to letters said to have been written by the Duke of Devonshire and the Bishop of Liverpool to the electors of Southport at the recent election; and in one case his motion was withdrawn and in the other negatived on a division. (See also sect. 123.)

[30] **Piers and Harbours.** Sir E. Durning Lawrance moved (Feb. 28th) "That in the interests of trade and communication by sea between places on the coasts, and with a view to the protection and development of sea fisheries and the safety of the persons engaged in them, it is desirable that the Government should take immediate steps to extend the existing provision of piers and harbours by cheapening and facilitating the acquisition of powers to construct or improve piers and harbours in the United Kingdom, and to aid where necessary such works by grants of public money." Mr. Ritchie in course of a sympathetic reply said it should not be difficult for the local or county council, if it was convinced that a pier or harbour was required for the interests of the fishing industry, to come forward and obtain a loan from the Treasury at a low rate of interest for the purpose. With regard to the general question, they must adhere to the policy of previous Governments. At the same time, he could not but admit that there were cases in which a harbour was badly required, and in which, having regard to the poverty of the district, it was practically impossible to give any security for a loan; and he had not the slightest hesitation in saying that if cases like these were brought before the Board of Trade he would make representations to the Treasury with a view of endeavouring to obtain some such assistance as had been rendered under similar circumstances to other industries. But this could only be done on the distinct understanding that some authority would see that a

harbour or pier was kept going. The motion was on this assurance withdrawn.

[31] **Poor Law.** The Earl of Wemyss (March 17th) moved, that it is expedient that a Royal Commission be appointed to inquire into the administration and working of the Poor Law. Lord Harris, speaking for the Government, said boards of guardians had been asked to try to do something to make a greater distinction between the deserving aged poor and others, not only in classification, but in giving them greater facilities for seeing their friends, and in attending their own places of worship on Sunday. Later the Board made inquiries as to what attention had been given to these instructions, and the replies were very satisfactory indeed. The Select Committee of the House of Commons to which the Cottage Homes Bill had been referred, and to which also any other Bill of a kindred character would be referred, would in time report, and it would be wise to wait for some result from this inquiry before appointing a Commission. (See sects. 50, 83, 115, 116.)

[32] **Post Office Employés.** Mr. Steadman moved on the Address (Feb. 20th) an amendment representing that in view of the great discontent existing among employees of the postal and telegraph services, immediate inquiry should be made into the causes of complaint. Mr. Hanbury replied that there had already been two inquiries, and if the postal employees were not satisfied with the findings of these there was no special reason why they should be satisfied with the results of a fresh investigation. The amendment was negatived by 159 to 91. Mr. Steadman reverted to the subject (June 1st), and Mr. Hanbury maintained his former attitude.

[33] **Royal Academy.** Replying to a question addressed to him by Lord Stanley of Alderley, June 10th, as to whether the Government would give effect to certain recommendations of a Select Committee and of a Royal Commission with respect to the Royal Academy, the Marquis of Salisbury said the ground fallacy in his noble friend's speech was the impression he appeared to have, that a Commission must always be attended to, and as a matter of fact always was attended to. That was not Lord Salisbury's experience of public life. His noble friend appeared to look forward to a period when the Government would undertake the management of the Royal Academy. Lord Salisbury thought that undertaking was reserved for bolder hands than his. He hoped that if there was to be an artistic party in Parliament which would prescribe what the various artistic bodies were to do, they would organise themselves in such a way that all their recommendations might have a unanimous tendency. He was afraid the dreams of his noble friend and Lord Wemyss were still far apart in the remedies they recommended to Parliament. But the practical point was, were the Government going to introduce any measure this Session to alter the constitution of the Royal Academy? He had been privileged to hear the exposition of the state of public business which his right hon. friend, the Leader of the House of Commons, had that day laid before that body. He thought when his noble friend came to read it he would agree with him that the chance of introducing any such thorny and difficult subject as the reform of our artistic institutions was not likely to be undertaken in the two months which yet

remained of the session. There was no subject which produced such a healthy difference of opinion as questions which related to art, and consequently there was no subject which was likely to make so great a demand on the time of Parliament. He should certainly think it very imprudent for any Minister to undertake such a task unless he was driven by very much greater evils and defects than it was possible to show in the present management of the Royal Academy. On the whole the results appeared to be quite as good as they were likely to be by introducing the Civil Service into the management of the Academy, and he doubted whether any addition of politicians to the governing bodies of our great art institutions would add much to the value and beauty of their work.

[34] **South Africa.** The various events which occurred in the Transvaal, and South Africa generally, were duly noticed in Parliament from time to time. Mr. Chamberlain announced the Bloemfontein Conference and its failure to bring about any agreement between Sir Alfred Milner and President Kruger. The details of this and of all other important events in the Transvaal will be found fully described in the article on the country under its separate heading. Mr. Chamberlain stated in answer to Sir H. Campbell-Bannerman (July 20th) that the Volksraad had adopted a seven-years' retrospective franchise for Outlanders. He had no official information as to redistribution, but it had been stated that the Transvaal Government proposed to give seven new seats to the districts chiefly inhabited by aliens. If this report were confirmed, this important change in the proposals of President Kruger, coupled with previous amendments, led the Government to hope that the new law might prove to be a basis of settlement on the lines laid down by Sir A. Milner at the Bloemfontein Conference. Mr. Chamberlain observed, however, that a number of conditions were still put forward which might be used to take away with one hand what had been given with the other; but the Government felt assured that the President, having accepted the principle for which they had contended, would be prepared to reconsider any detail of his scheme which could be shown to be a possible hindrance to the full accomplishment of the object in view. The situation in the Transvaal was discussed in both Houses on July 28th. At question time Mr. Balfour informed Mr. Maclean that if the unhappy event of war should occur there was no intention of using any but white troops. Sir H. Campbell-Bannerman, speaking on the Colonial Office Vote, made an appeal for moderate language in the controversy; and as to war itself, or direct preparations for actual hostilities, he could see no cause for armed intervention, least of all during recent days or weeks when we were evidently approaching, if only circumstances continued favourable, a solution of this problem. A war with one of the independent states in South Africa would be the direst calamity that could occur, however speedy and successful might be the issue. The best way to act, in order to influence the obdurate reluctance of the Transvaal Government, was to bring to bear upon them the influence of enlightened opinion at the Cape. Mr. Chamberlain, in course of his reply, said the right hon. gentleman had tried to represent this matter as one

of one or two years' difference in the qualification for the franchise. It was nothing of the kind. It was the question of the power and authority of the British Empire. It was the question of the position of Great Britain in South Africa. The nature of the position was recognised everywhere but on the Opposition benches—throughout the Empire, as was proved by the offers of assistance the Government had received from several of our colonies. The convention had been broken in spirit more than in letter, and the distinct promise given in 1881 by the man who was now President, that, so far as burgher rights were concerned, no difference would be made between the burghers and British subjects, had not been kept; and not only had there been no approach to this equality, but every act of the Transvaal Government had tended to make the inferiority more marked and more offensive. Turning to the latest proposal of President Kruger, he said: "The Government are desirous of regarding it as an indication of a conciliatory spirit. We recognise that it is a real advance on previous proposals, and we hope to find in it a basis for a satisfactory settlement. I am not going to insult the President by supposing that this proposal is made otherwise than in perfect good faith. I assume that it is a *bona-fide* attempt to meet the case, but we have to see whether it is likely to give immediate and satisfactory representation. If it does not, I assume that President Kruger will be willing to make such alteration as will make it effective. . . . We think that we are justified in appealing to him, as we have done, for a joint inquiry into these latest proposals, with a view of seeing how far they will give that substantial and immediate representation of the alien population which alone can be considered to be the basis of a satisfactory settlement; and when this inquiry is accepted we hope it will be possible to come to an agreement. In any case we shall press for the necessary alteration in order to secure the object we have in view. We have used no threats up to the present time. But while we intend to exhaust conciliatory methods, we have come to the conclusion that the grievances of the Outlanders are substantial grievances, that the situation is one of Imperial concern. Having taken up the cause, we are bound to see it through, and we shall not rest till a satisfactory conclusion has been reached." Referring to the speech of the Leader of the Opposition, Mr. Chamberlain said the right hon. gentleman recognised the existence of grievances, the danger of the situation, and our right to interfere and to use moral pressure, but thought they must not transform moral pressure into action. Sir H. Campbell-Bannerman, interposing, observed that he said that in South Africa, as in other parts of the globe, circumstances might arise at any time which would compel us to take up arms in protection of our interests. Mr. Chamberlain upon this said he was not certain that there was now any issue between them, though he should have wished the right hon. gentleman's declaration to have been in less general terms. Mr. Courtney agreed that it was very wise to go for the franchise question, but no one in his right senses could say that a mere difference between a five years' and seven years' franchise would constitute a proper *casus belli*. He wished to protest with all his power against even talking of war or preparing for war for

such a flimsy excuse. The Marquis of Salisbury, replying on the same evening on a debate raised by the Earl of Camperdown, concurred with the Earl of Kimberley in thinking that the advances which had been made were to a certain extent hopeful. The Government would be responsible if any undue impatience or irritation on their part should cause any angry termination of what might have been a peaceful solution; but, repeating the words Lord Selborne had used earlier in the debate, they had put their hands to the plough and did not intend to turn back.

[35] **Supply.** The sessional resolution first adopted in '96, and since annually renewed, was again re-enacted (Feb. 23rd), but at the end of the session was held by some members not to have worked quite so successfully as in previous years. Mr. Balfour, replying to Sir C. Dilke and Mr. John Ellis (July 27th), said he would consult with the Chancellor of the Exchequer and the Secretary of the Treasury as to whether it might be possible to carry out the suggestion of the Committee which sat in '88, and to alter the form of the Estimates so as to diminish the number of votes to be taken. If that met with the general assent of the House he thought they would find they could get through the Estimates more smoothly next session. At the commencement of the twenty-second allotted day (Aug. 3rd) there were 65 outstanding votes, of which 37 had been disposed of when "the guillotine fell" at ten o'clock, and divisions were taken against six of the remainder.

[36] **Welsh Questions.** Mr. Herbert Lewis moved on the Address (Feb. 13th) an amendment expressing regret that no reference was made in Her Majesty's Speech to questions specially affecting the interests of the people of Wales. The Home Secretary said the Government regarded Wales as a part of the United Kingdom, and would only propose exceptional legislation in regard to it under exceptional circumstances. Sir H. Campbell-Bannerman considered that Wales had special ground of complaint in the fact that no legislation was promised following the reports of the Agricultural and Sunday Closing Commissions. The amendment was rejected by 194 to 144. Earl Carrington (June 23rd) called attention to the subject of land tenure in Wales and Monmouthshire, and asked whether it was the intention of the Government to initiate any legislation on the subject. The Marquis of Salisbury replied that the Government had not the slightest intention of dealing with the question during the present session, nor could he make any promise as to the future. Such reasons as there were for passing the Irish Land Acts did not in any way apply to Wales.

[37] **West Africa.** On the supplementary vote of £139,425 for Sundry Colonial Services, Mr. Chamberlain (March 10th) stated, in reply to observations by Mr. Weir and Mr. Labouchere, that a conference was about to meet in Brussels to consider the question of the importation of spirits into the Gold Coast, and the Government were prepared to raise the duty to any level to which other countries were prepared to go. The amount of the vote was largely due to the cost of the frontier forces which had been established to safeguard our West African colonies; but the whole of the cost of these forces would ultimately be defrayed from colonial funds. Mr. Hedderwick (Aug. 7th),

on second reading of the Appropriation Bill, called attention to the report of Sir David Chalmers on the rising at Sierra Leone, and contended that it was an absolute condemnation of the policy pursued by the Government in the colony, and that the imposition of the hut tax had led to the insurrection and massacre. Mr. Chamberlain thanked Sir D. Chalmers for the report he had made, and although he had not found himself able to agree with all the conclusions to which Sir David had arrived, he was none the less sensible of his obligations to him for the inquiry. But, although he had appointed Sir David to make the inquiry, he was not bound to accept his report, his position being that of a judge who had to compare the facts. He agreed with the putting down of slavery, but the policy could not be carried out without bloodshed, and the evil caused by slave raiding was so great that a few lives lost in putting it down were well spent in comparison with the number of lives lost in keeping it up. There was a necessity for a frontier force, and this cost a good deal of money; they had to raise the funds, and did it by the hut tax; the alternatives of the salt tax and the tobacco tax were totally insufficient for the cost of the frontier police, while the hut tax was not excessive in amount, being only 1s. per head of the population, and was a tax with which the natives were fully acquainted. The natives had become accustomed to the tax, and to withdraw it now would be interpreted as a confession of weakness, as a justification of rebellion, and it would seriously impair the authority of the government of Sierra Leone. (See also "Royal Niger Company Bill," sect. 100, and "Colonial Loans Bill," sect. 44; and also article FINANCE, NATIONAL, Part III.)

II.—ACTS AND BILLS.

The following is a list of the public Acts of '99: Royal assent March 27th—**Partridge Shooting (Ireland) Act**, '99 (62 Vict. Ch. 1), **Consolidated Fund (No. 1) Act**, '99 (Ch. 2); Royal assent April 27th—**Army (Annual) Act**, '99 (Ch. 3); Royal assent June 6th—**Solicitors Act**, '99 (Ch. 4), **Public Libraries (Scotland) Act**, '99 (Ch. 5), **Supreme Court and Judicature Act**, '99 (Ch. 6), **Metropolis Water Act**, '99 (Ch. 7); Royal assent June 20th—**Infectious Diseases (Notification) Extension Act**, '99 (62 & 63 Vict. Ch. 8), **Finance Act**, '99 (Ch. 9), **Parish Councillors (Tenure of Office) Act**, '99 (Ch. 10); Royal assent July 13th—**Fine or Imprisonment (Scotland and Ireland) Act**, '99 (Ch. 11), **Reformatory Schools Act**, '99 (Ch. 12), **Elementary Education (School Attendance) Act (1893) Amendment Act**, '99 (Ch. 13), **London Government Act**, '99 (Ch. 14); Royal assent Aug. 1st—**Metropolis Management Acts Amendment (Byelaws) Act**, '99 (Ch. 15), **Gordon Memorial College at Khartoum Act**, '99 (Ch. 16), **The Rent-Charge (Rates) Act**, '99 (Ch. 17), **Congested Districts Board (Ireland) Act**, '99 (Ch. 18); Royal assent Aug. 9th—**Electric Lighting (Clauses) Act**, '99 (Ch. 19), **Bodies Corporate (Joint Tenancy) Act**, '99 (Ch. 20), **Seats for Shop Assistants Act**, '99 (Ch. 21), **Summary Jurisdiction Act**, '99 (Ch. 22), **Anchors and Chain Cables Act**, '99 (Ch. 23), **University of London Act**, '99 (Ch. 24), **Land Tax Commissioners' Names Act**, '99 (Ch. 25), **Metropolitan Police Act**, '99 (Ch. 26), **Marriages Validity Act**, '99 (Ch. 27), **Manchester Canonries Act**, '99 (Ch. 28), **Baths and Washhouses Act**, '99 (Ch. 29), **Commons Act**,

'99 (Ch. 30), Public Works (Loans) Act, '99 (Ch. 31), Elementary Education (Defective and Epileptic Children) Act, '99 (Ch. 32), Board of Education Act, '99 (Ch. 33), Expiring Laws Continuance Act, '99 (Ch. 34), Inebriates Act, '99 (Ch. 35), Colonial Loans Act, '99 (Ch. 36), Poor Law Act, '99 (Ch. 37), Telegraph Act, '99 (Ch. 38), Isle of Man (Customs) Act, '99 (Ch. 39), Reserve Forces Act, '99 (Ch. 40), Military Works Act, '99 (Ch. 41), Naval Works Act, '99 (Ch. 42), Royal Niger Company Act, '99 (Ch. 43), Small Dwellings Acquisition Act, '99 (Ch. 44), Patriotic Fund Act, '99 (Ch. 45), Improvement of Land Act, '99 (Ch. 46), Private Legislation Procedure (Scotland) Act, '99 (Ch. 47), Lincolnshire Coroners Act, '99 (Ch. 48), Appropriation Act, '99 (Ch. 49), Agriculture and Technical Instruction (Ireland) Act, '99 (Ch. 50), Sale of Food and Drugs Act, '99 (Ch. 51).

The above list does not include a large number of local Bills which became law during the Session. Particulars of some of those promoted by the London County Council, and of some others of general interest, will be found in "London Bills" (sect. 69). The measures mentioned in the following paragraphs, which were either introduced, or subsequently afforded facilities, by the Government, have prefixed to their titles an *. Where a Bill was withdrawn or dropped, it is so stated, and cases in which the proceedings upon a measure lapsed are notified by the mark (=). The day on which the royal assent was given is signified by the small letters r.a.; and the date upon which the Act came or is to come into force is also notified, though it should be understood that where no date is set down the Act came into operation immediately after it was passed. In the absence of indication in the title or contents of the Bill, the capital letter E. or S. or I. is used to signify that the measure is specifically limited to a part of the United Kingdom.

Adopted Pauper Children (see sect. 90).

Adulteration of Food Act (see sect. 101).

[38] Agricultural and Technical Instruction (Ireland) Act (62 & 63 Vict., ch. 50—r.a. Aug. 9th) creates a new Department of Agriculture and other Industries and Technical Instruction in Ireland, with the Chief Secretary as President thereof, and a Vice-President appointed by, and removable at, the pleasure of one of H.M. Principal Secretaries of State. This Vice-President may sit in Parliament, and is to be *ex officio* a member of the Congested Districts Board. There are to be transferred to the Department, at such dates respectively as the Lord Lieutenant by order appoints, the powers of the Irish Government under the Diseases of Animals Act, Destructive Insects Act, and Fertilisers and Feeding Stuffs Act, powers as to the collection and publication of statistics relating to agriculture, powers under the Weighing of Cattle Acts, as to the administration of the grant for Science and Art, and of the grant in aid of Technical Instruction, powers of the Department of Science and Art in relation to its buildings and property, powers of the Commissioners of National Education in connection with the Albert Institution and the Munster Institution, and the property held by them; and the powers of the Inspectors of Irish Fisheries, the inspectors themselves to be transferred and attached to the Department as officers thereof. The Lord Lieutenant is also empowered, with the consent of the Treasury, by order in Council, to

transfer to the Department other administrative powers and duties of Government departments. The Department may make inquiries and collect information for the purpose of agriculture and other rural industries; and may, with the consent of the Lord Lieutenant and the Treasury, employ a secretary, two assistant secretaries, one in respect of agriculture and one in respect of technical instruction, and such other officers and servants as may be required. The Vice-President is to be paid by the State the annual salary of £1200, together with a residential allowance not exceeding £150. For the purpose of assisting the Department there is to be established a Council of Agriculture, consisting of two persons to be appointed by the county council of each county, and a number of persons resident in each province, equal to the number of counties in the province, to be appointed by the Department, the members representing each province to constitute separate provincial committees on the Council; an Agricultural Board consisting of two persons to be appointed by the provincial committee of each province, and four persons to be appointed by the Department; and a Board of Technical Instruction which is also to be largely representative. The Department has placed at its disposal for the purposes of this part of the Act the annual sum of £78,000 directed to be paid to the Commissioners of National Education out of the Local Taxation (Ireland) Account; out of the Irish Church Surplus, during fifteen years, £70,000 a year, and thereafter such annual sum as may be paid without impairing the security for any liabilities of the fund; a portion of the Sea-coast and Fisheries Fund; £12,000 a year as an equivalent for the salaries of abolished or vacant judgeships, etc.; £6000 a year representing the amount of expenses heretofore paid out of money in connection with instruction given in agriculture; and all sums paid to the Local Taxation (Ireland) Account, pursuant to the Estate Duty Act of '96, which are not required for the purposes of the Local Government Act. Lord Ashbourne stated that the new Department will have between £160,000 and £170,000 per annum at its disposal, and this sum would, he believed, enable it to do excellent work in developing the resources of the country. There is a provision enabling the Department to appear before the Railway and Canal Commissioners, and it is to exercise, at the request of the Congested Districts Board, powers with respect to congested districts counties. For the purpose of co-ordinating educational administration there is to be established a consultative committee, consisting of the Vice-President of the Department, who is to be chairman thereof, one person to be appointed by the Commissioners of National Education, one by the Intermediate Education Board, one by the Agricultural Board, and one by the Board of Technical Instruction. The Act comes into operation on April 1st, 1900, though the Vice-President may be at any time previously appointed, and the Department is thereupon to be deemed to be established. The Bill was introduced by the Chief Secretary May 8th, and was discussed on second reading July 5th, when Sir C. Dilke remarked that it was part of the policy which had been described as "Killing Home Rule by Kindness," and which might in time tend to

become a scheme for killing Home Rule by jobbery. His particular objection to the measure was one common to several other measures which had from time to time been proposed: it added to the already large number of Ministers having seats in the House. Mr. J. Redmond, in supporting the Bill, said the more prosperous and better educated the people of Ireland became the stronger and more irresistible would become the demand for Home Rule. Second reading of the measure was agreed to, and it was considered and amended by the Grand Committee on Trade, and read a third time amid cheers (July 24th). While the Bill was before the Lords an amendment was made striking out the provision giving to the Chambers of Commerce and the Trade Councils of Dublin, Belfast and Cork a representative each on the Board of Technical Instruction, the Trades Councils part of the provision having been carried against the Government in Grand Committee. The Lords' amendment was agreed to by 69 to 47, when the Bill was returned to the Commons.

[39] **Allotments (London) Bill** was presented by Earl Carrington, the object being to facilitate the provision of allotments by the London County Council, and the measure being similar to that rejected in '98. The Bill was opposed on second reading by Lord Harris, but supported by the Earl of Kimberley, and rejected (May 12th) by 58 to 16.

***Anchors and Chain Cables Act** (62 and 63 Vict., ch. 23—r.a. Aug. 9th), was introduced by Mr. Ritchie, to simplify and amend the law relating to the testing and sale of anchors and chain cables.

[40] **Baths and Washhouses Act** (62 & 63 Vict., ch. 29—r.a. Aug. 9th), was introduced by Mr. Bigwood. It repeals a proviso of the Act of '78 under which no covered or open swimming bath, when closed, may be used for music or dancing; though it is required that the necessary music or dancing licence shall be obtained by the Commissioners before the bath is in future so used, that the premises be let for such purpose only occasionally, and that no money be taken at the doors. [E.]

Bills of Exchange (see sec. 57).

[41] ***Board of Education Act** (62 & 63 Vict., ch. 33—r.a. Aug. 9th), provides for the establishment of a Board of Education for England and Wales, which is to consist of a President and of the Lord President of the Council (unless he is appointed President of the Board), H.M. Principal Secretaries of State, the First Lord of the Treasury, and the Chancellor of the Exchequer. The existing Vice-President of the Committee of the Council on Education is also to be a member of the Board, but on the next vacancy the office is to be abolished. The Board is to be deemed to be established on the appointment of the President thereof. It is to take the place of the Education Department (including the Department of Science and Art), and Her Majesty may, by order in Council, transfer to or make exercisable by the Board any of the powers of the Charity Commissioners or of the Board of Agriculture in matters appearing to relate to education. Her Majesty may, by order in Council, establish a consultative committee, consisting, as to not less than two-thirds, of persons qualified to represent the views of Universities and other bodies interested in education, for

the purpose of—(a) framing, with the approval of the Board of Education, regulations for a register of teachers, which shall be formed and kept in manner to be provided by order in Council: provided that the register so formed shall contain the names of the registered teachers arranged in alphabetical order, with an entry in respect to each teacher showing the date of his registration, and giving a brief record of his qualifications and experience; and (b) advising the Board of Education on any matter referred to the committee by the Board. The draft of any order proposed to be made under the Act is to be laid before each House of Parliament for not less than four weeks during which that House is sitting, before it is submitted to Her Majesty in Council. The Board may by their officers, or, after taking the advice of the consultative committee, by any University or other organisation, inspect any school supplying secondary education and desiring to be so inspected, for the purpose of ascertaining the character of the teaching in the school and the nature of the provisions made for the teaching and health of the scholars, and may so inspect the school on such terms as may be fixed by the Board of Education with the consent of the Treasury: provided that the inspection of schools established by scheme under the Welsh Intermediate Education Act, '89, shall, subject to regulations made by the Treasury under sect. 9 of that Act, be conducted as heretofore by the Central Welsh Board for Intermediate Education, and that the said Board shall be recognised as the proper organisation for the inspection of any such schools as may be desirous of inspection under this section. The council of any county or county borough may out of any money applicable for the purposes of technical education pay or contribute to the expenses of inspecting under this section any school within their county or borough. Provision is made for the appointment of secretaries, officers, and servants of the Board, and the President is to receive, unless he hold another salaried office, such annual salary not exceeding £2000 as the Treasury may determine. The office of President is not to render the person holding it incapable of being elected to or of voting in the House of Commons. After the abolition of the office of vice-president, one of the secretaries of the Board shall not by reason of his office be incapable of sitting in the House of Commons. The Act comes into operation April 1st, 1900. The Bill was presented by the Duke of Devonshire (March 14th), who then explained that in the first instance no attempt would be made to impose upon the secondary schools anything like uniformity in their course of instruction. Although the Government were unable to ask Parliament to vote funds for the inspection of schools which were mainly for the benefit of the upper or middle classes, they recognised that in the case of the poorer schools the cost of inspection might properly form a charge on the funds placed at the disposal of the counties for educational purposes. The organisation of the Science and Art Department was to be thoroughly revised, and the task would be undertaken by a departmental committee; and as the work would occupy a considerable amount of time the Act would not come into operation until April 1900. His Grace also pointed out that the creation of local authorities, with adequate powers to

make provision, or to control the provision if already made, for secondary education was the essential feature of any complete measure; but the creation of such local authorities ought to be preceded by the constitution of a central authority, not for the purpose of unduly controlling the action of such local authorities, but mainly for the purpose of giving them such information, advice, and guidance as they would not be in a position to obtain from the present isolated and detached departments. Bill read a second time (April 24th), after discussion, in course of which the Duke of Devonshire said he saw no insurmountable reason why a measure dealing with the local authorities might not be introduced next session. Second reading agreed to in Commons (June 26th), and Bill sent to Grand Committee on Law; considered as amended and read a third time (Aug. 1st), after some criticism, mainly from the point of view that the measure left too much in the hands of the Department. (The departmental committee above referred to was duly appointed.) [E.]

[42] *Bodies Corporate (Joint Tenancy) Act (62 & 63 Vict., ch. 20—r.a. Aug. 9th), was presented by the Lord Chancellor. The object of the measure was to repeal a rule of law, the survival of which caused many practical difficulties, especially in the case of trusts. It was repealed as to bank stock by sect. 6 of the National Debt (Stockholders' Relief) Act 1892 (55 & 56 Vict., ch. 39), and as to the shares and stocks of various railway companies by their private Acts. As many other companies had asked for the repeal, it was considered desirable to deal with the matter by general legislation. The Act accordingly enables bodies corporate to hold property in joint tenancy. [U.K.]

Children, Education of (see sects. 53, 54, and 90).

[43] Church Discipline Bill. Second reading of this measure was (May 10th) moved by Mr. C. M'Arthur, who remarked that there was a considerable section of the clergy of the Church of England which was in a state of open revolt, not only as regards the Articles and formulas of the Church, but against the law of the land. This had produced a condition of lawlessness and anarchy, and had led to violent dissensions which had threatened to rend the Church asunder; the object being to undo the work of the Reformation and restore the Church of England to the condition she was in prior to that great turning-point in her history. The courts had been closed by the exercise of the Episcopal veto. The object of the Bill was to secure conformity and uniformity in the Church. The first clause laid down what were the actions constituting offences, such as the use of the word Mass, or private confession, or the use of any form, rite, ceremony, or practice, not prescribed in the Book of Common Prayer. The second clause said that when an offence had been committed, an action might be brought by two members of the Church who had resided in the diocese for a year. Notice was to be given to the bishop, and if a month afterwards the offence was repeated, then the matter might be brought before the Court, which would consist of a judge of the Supreme Court who was a member of the Church of England. There would be an assessor, usually the bishop of the diocese in which the offence was committed, but he would not be a member of the Court. If the offence was proved, the bishop would

inhibit the respondent from discharging any clerical functions, and, unless within three months he gave an undertaking not to repeat the offence, the benefice, preferment, and licence would become *ipso facto* vacant. The Bill was not perfect, no doubt, but its principle was good, and at any rate it was better than a mere abstract resolution. An amendment was moved by the Attorney-General, on behalf of the Government, in the following terms:—"That this House, while not prepared to accept a measure which creates fresh offences and ignores the authority of the bishops in maintaining the discipline of the Church, is of opinion that, if the efforts now being made by the archbishops and bishops to secure the due obedience of the clergy are not speedily effectual, further legislation will be required to maintain the observance of the existing laws of the Church and realm." He believed that the Bill would lead to as many prosecutions against those whom his honourable friend called loyal members of the Church as against those whom he thought disloyal. Lord H. Cecil could not support either the Bill or the amendment. He had placed on the paper a motion for the rejection of the Bill, and should have preferred that to have been the issue. As legislation was referred to in the amendment of the Attorney-General, he would say that if legislation was brought forward which removed the authority over the Church from the bishops to a lay tribunal it would be strenuously and uncompromisingly resisted by him and those who thought with him. The Prayer Book gave the bishops authority and responsibility. Sir. W. Harcourt said that in October last the Archbishop of Canterbury promised to deal with existing evils; we were now in May, and absolutely nothing had been done to put an end to them. He would vote for the second reading, but if the Bill were defeated there was, as regards the amendment, at least this satisfaction, that on the part of the Government there was a recognition that a great evil existed which demanded the attention of the House. Mr. Balfour remarked that the amendment contemplated the possibility that further legislation might be necessary, but he had a firm conviction that the action of the bishops might render such legislation wholly unnecessary. The Bill was rejected by 310 to 156, the Attorney-General's amendment being then agreed to. (See also sect. 9, *supra*.)

[44] *Colonial Loans Bills. The Colonial Loans Fund Bill, introduced by the Chancellor of the Exchequer (Feb. 24th), provided for the creation of a Colonial Loans Fund, and the raising of guaranteed colonial stock or bonds, out of which, by the authority of a separate Act in each case, loans could be made for terms not exceeding in any case fifty-five years, such loans to be charged on the general revenues and assets of the colony, with priority over any subsequent charges. Read a second time May 12th, in committee June 8th, withdrawn July 27th. Colonial Loans Bill brought in on the same date by the Chancellor of the Exchequer, who stated that the former measure, which had been before the House in two sessions, had unfortunately been met with much opposition, and the amendments on the paper rendered it impossible to pass it this session. He now asked leave to introduce what Mr. Balfour had described as the daughter Bill, which had been substituted only for the purpose of certain

particular loans. The money for these loans is to be derived out of the Local Loans Fund, instead of the Colonial Loans Fund proposed to be established by the former measure, and consists of the following advances, which are to be made at such interest, being not less than $2\frac{1}{2}$ per cent., as the Treasury shall determine, for a period not exceeding 50 years:—Gold Coast Colony, for railways, £578,000; for Accra Harbour Works, £98,000; Niger Coast Protectorate, for Harbour Works, £43,500; Jamaica, for Public Works, £65,000; in Aid of Revenue, £150,000; Completion and Equipment of Railway, £110,000; Interest on Railway Debentures, £88,000; and Waterworks, £40,000; Lagos, for Railways, £792,500; Sierra Leone, for Railway, £310,000; Trinidad, for Railways and Public Works, £110,000; Malay States, for Railways, £500,000; Barbados, for Hurricane Loan, £50,000; St. Vincent, for Hurricane Loan, £50,000; Seychelles, for Roads and Survey, £20,000; Cyprus, for Harbour and Railways and Irrigation, £314,000; Mauritius, for Public Works, £32,820; total, £3,351,820. On second reading, Sir H. Campbell-Bannerman (July 31st) complained of a Bill of such importance being brought forward so very late in the session. The Chancellor of the Exchequer replied that the measure was brought forward in performance of a promise, and it was always understood that it would be introduced towards the close of the session. Mr. Buchanan alleged that it was a distinct breach of the statement made in introducing the Colonial Loans Fund Bill, that each of these loans was not the subject of a separate Bill. The hon. member moved the rejection of the measure, but his amendment was defeated by 118 to 66, the second reading being carried on a further division. The Chancellor of the Exchequer informed Mr. Buchanan (Aug. 1st) that sums amounting to £1,148,000 had been recently borrowed by the Crown Agents of various colonies in anticipation of the issue of loans which did not require the consent of the Treasury. The issue of these loans was, in consequence of the introduction of the Colonial Loans Fund Bill, deferred, and it was now proposed to substitute for them loans under the Bill now before the House. Mr. Chamberlain, in course of the proceedings in committee (Aug. 2nd), said the Gold Coast was in a most prosperous condition. But for the Ashantee war and the expenses necessary in connection with the French proceedings, there would have been a surplus instead of a deficit. The colony added to the volume of British trade to the extent of £2,400,000. The consumption of spirits was decreasing, and although the revenue from that source had not decreased proportionately it was because the duties had been raised. Until better communication was made there could not be a proper development of the gold industry. The Bill passed without amendment, and as the **Colonial Loans Act* (62 & 63 Vict., ch. 36) received r.a. Aug. 9th.

[45] *Commons Act* (62 & 63 Vict., ch. 30—r.a. Aug. 9th) was presented by Lord Burghclere; its main object is to provide simpler and less expensive machinery for regulating commons. At present a common cannot be regulated or placed under local management without a provisional order or a scheme confirmed by Act of Parliament. A district council may, under the first part of the Act, make a scheme

for the regulation and management of a common with a view to the expenditure of money on the drainage, levelling, and improvement of the same, and to the making of bye-laws for the preservation of order. The council must give three months' notice of their intention to make a scheme, and send to the Board of Agriculture a copy of the draft and plan. During the three months any person may obtain copies of the draft on payment of a sum not exceeding 6d. per copy, and may inspect the plan, and may make to the Board of Agriculture any objection or suggestion with respect to the scheme or plan. The Board of Agriculture may in their discretion direct an inquiry into the scheme to be held by an officer of the Board, and may by order approve the scheme, subject to such modifications, if any, as they may think desirable, and thereupon the scheme is to have full effect. If, however, at any time before the Board have approved the scheme, they receive a written notice of dissent either from the person entitled as lord of the manor or otherwise to the soil of the common, or from persons representing at least one-third in value of such interests in the common as are affected by the scheme, and such notice is not subsequently withdrawn, the Board shall not proceed further in the matter. No interest or right of a profitable nature in any common is, except with the consent of the person entitled thereto, to be taken away or injuriously affected by any scheme under the Act, without compensation. A district council may acquire the fee simple in any common regulated by a scheme under the Act, by gift, purchase, or agreement. A scheme under this part of the Act is not to apply to any common which is, or might be, the subject of a scheme made under the Metropolitan Commons Acts, or is regulated by a provisional order under the Inclosure Acts, or has been acquired under the Corporation of London (Open Spaces) Act. The expression "common" includes any land subject to be inclosed under the Inclosure Acts, and any town or village green. Part II. of the Act makes some minor amendments in the Inclosure Acts, and in the enactments relating to open spaces and recreation grounds, and repeals certain enactments relating to commons which are either obsolete or inconsistent with modern legislation. [E.]

[46] *Companies Bill*. Presented by the Earl of Dudley, and was the measure which had been before the House for three years. Again sent to a select committee and reported with amendments May 18th. The committee made no special report. The amendments so proposed by the select committee were made in committee or the whole House, the Lord Chancellor explaining, on the motion to go into committee, that the action of the select committee had been to frame provisions with the object rather of preventing, if possible, the formation of fraudulent companies, than to inflict pains and penalties upon individuals after the mischief had been done. They had thought that the best way of dealing with the evil was to see that precautions were adopted in the initiative of companies, especially in regard to that which had been the main cause of the catastrophes that had occurred, namely, the commencement of business with insufficient capital. That had been provided against by requiring that a company should not proceed

to allotment till a certain proportion of the capital had been subscribed for; and it had also been thought right that those persons who were put forward as directors should by some act of their own acknowledge the responsibility of their undertaking. The committee had arrived at practical conclusions upon the important subject on which they had spent so much time. Among the changes made in the measure was a proposal of Lord Macnaghten, which is embodied in the following clause:—"In a voluntary winding-up an application under sect. 138 of the Companies Act, 1862, may be made by any creditor of the company. In the winding up of any company under the Companies Act, 1862, and the Acts amending the same, all debts owing by the company to its trade creditors and incurred in the ordinary course of its trading within the period of three months before the date of the winding up shall be entitled to the same priority as the debts referred to in sect. 2 of the Preferential Payments in Bankruptcy Amendment Act, 1897, and shall be paid accordingly, but after payment of such last-mentioned debts." The Bill was sent from the Lords to the Commons August 4th (=).

[47] ***Congested Districts Board (Ireland) Act** (62 & 63 Vict. ch. 18—r.a. Aug. 1st) amends certain provisions of the Land Law (Ireland) Act, '96, affecting the Congested Districts Board, and makes further provision for the expenses of that Board, by a parliamentary grant as from October 1st, '99, subject to Treasury conditions, of an annual sum not exceeding £25,000.

[48] **Constructive Murder Amendment Bill**, to amend the law of murder with reference to the doctrine of constructive or implied malice, was introduced by Mr. W. Ambrose (since resigned), and proposed that upon a trial of murder, no constructive or implied malice should be imputed to the accused merely because it was shown that he caused the death of the deceased by or in the course of the commission of or attempt to commit some other felony. The bill was designed to "prevent juries from having to find verdicts that are untrue in fact, and will relieve the Home Secretary from having to intervene to prevent death sentences being carried out when there was no real murder." (Dropped.)

[49] **Copyright Bills.** Lord Monkswell (April 18th) introduced the Copyright (Artistic) Bill and the Copyright Bill, the latter being to amend and consolidate the law relating to literary copyright. The former was described as intended to simplify and amend the law relating to copyright in artistic works, and its main features are: to secure greater uniformity in the terms and conditions of copyright; to reserve to the artist (subject to certain exceptions) the copyright until expressly assigned or disposed of by him; to make registration of copyright (subject to certain exceptions) and of all dealings therewith compulsory; and to improve the remedies for infringement. Both Bills were duly read a second time and referred to a select committee, who, in a report laid on the table late in the session, and published during the recess, say they had met nineteen times, and examined many witnesses, and had ordered the Bill relating to literary copyright to be reported with many important amendments. Among the subjects upon which the committee took evidence was included the

question of colonial copyright, and clauses were inserted which, it was hoped, would be found acceptable to the colonies. The committee did not suggest that the House should proceed further with the Literary Bill this session, having regard to the numerous difficult and contentious matters with which it deals. The memorandum annexed to the Bill was prepared by Lord Thring, who at the request of Lord Herschell's committee of '98 drafted the Bill as introduced. With regard to the Artistic Bill, the committee had not completed the evidence, and accordingly reported the evidence submitted to them in case the House should think fit to again refer the Bill to a select committee. The memorandum of Lord Thring on the Copyright Bill, referred to above, is a very interesting and important document. He states that the alterations made by the Bill in the existing law are in the main based on the report of the Copyright Commission which was appointed in '75 and reported in '78. The memorandum is too lengthy for extensive quotation here, but it may be stated with regard to General Provisions as to Copyright, that under clause 3, "Description of Copyright," "in addition to the exclusive right of multiplying copies, copyright is made to expressly include abridgments, translations, novelisation of dramas, dramatisation of novels, and adaptations of music. As to abridgments the existing law allows certain abridgments, but excludes others. The distinctions are most puzzling, and the Copyright Commission recommends, par. 67, that no abridgments should be allowed. Translation appears to be an infringement of copyright in England, though it was originally held otherwise in the United States till altered there by statute. It seems better to make the point clear. It seems that novelisation of a drama is not an infringement of the copyright, and dramatisation of a novel does not appear to be effectually protected. The doctrine of English law that the employment of intellectual labour on the work of another author with some additional matter makes the creation of such labour a new work appears to have led to great confusion. The true rule would seem to be that a substantial appropriation of the ideas or work of another is an infringement of copyright, and ought to be so treated, and of this opinion is the Copyright Commission, par. 76." In regard to clause 4, "Conditions and Duration of Copyright," the memorandum says: "The term given by the existing law is the life of the author and seven years afterwards, or forty-two years, whichever time is the longer. The Bill adopts the recommendation of the Copyright Commission, see pars. 23—42, Digest, c. 2, Art. 5, and makes the term of copyright in a book to last during the author's life, and thirty years after the end of the year in which he dies, and no longer." The provisions of clause 12, "Protection of Newspapers," will be read with wide-spread interest. The memorandum sets out that the clause "is important: it provides that the proprietor of any newspaper or news agency shall be entitled for eighteen hours to the exclusive right of publishing foreign news which he has obtained specially and independently, and imposes a penalty of £2 on every copy of a newspaper in which such news is published within the eighteen hours without the assent of the proprietor who has obtained the news. This clause adds to the law by making 'news,' independently of

the form in which it is conveyed, the subject of copyright and imposing an efficient penalty for its infringement. . . . A similar provision to that in the Bill has been enacted in Natal, New Zealand, and Tasmania. There seems no reason why news acquired by the exercise of great ability on the part of special correspondents and at great expense should not be protected by copyright as much as a letter or article commenting on the news so acquired." Lord Thring states that the memorandum to which we have referred was written by him at the request of the select committee, but owing to the lateness of the session had not been submitted to them for approval.

[50] **Cottage Homes Bill**, to authorise the provision of cottage homes for the aged deserving poor. Local authorities were to be empowered to provide such homes, and any person wishing to reside in one of them would make application, and if the local authority were of opinion that the applicant was at least sixty-five years of age and necessitous, and had lived an industrious and deserving life, and that there was room in the home, they would order such applicant to be admitted. A power of classification was given to the county council. The inmates of the homes were to be treated with regard to food and other comforts with suitable consideration, and provision was made for the admission of paying inmates. The council of a county or county borough was to contribute three-fourths of the cost of maintenance of the homes, and the Treasury was to make a grant of £5 per annum for every aged person to whose maintenance the council had contributed. The Bill did not extend to Scotland or Ireland, nor to the administrative county of London. Second reading of the measure, which had been introduced by Mr. Joseph A. Pease, was proposed (Feb. 22nd), in his absence abroad, by Mr. J. Hutton, and after discussion Mr. Chaplin announced that he was in favour of the principle of the measure without committing himself to its details, and suggested that the bill should be sent to a select committee. Bill read a second time, and committed; and reported without amendment, July 7th. For special report of committee, see sect. 116.

[51] **Criminal Law and Procedure (Ireland) Act (1887) Repeal Bill**, brought in by Mr. Dillon, and proposed to repeal the well-known "Crimes Act." Was opposed by the Government and rejected (April 19th) by 220 to 141.

Ecclesiastical Assessments (Scotland) Bill, brought in by Mr. Gordon, and proposed to amend the law with regard to ecclesiastical assessments in Scotland. Discussed April 26th, supported in principle by the Government, and second reading carried by 177 to 122. (Withdrawn.)

Education Department (see sect. 41).

Education of Children Bill (see sect. 54).

[52] ***Electric Lighting Clauses Act (62 & 63 Vict., ch. 19—r.a. Aug. 9th)**. The provisional orders granted by the Board of Trade under the Electric Lighting Acts, with a few exceptions follow the same model form, the modifications or additions required to meet special cases being rarely very numerous. The object of this Act is to enable the provisions of the model forms to be incorporated in the orders in the same way as the various "clauses" Acts, without reprinting those

provisions in each case. For this purpose the provisions of the model forms are placed in a schedule to the Act, and the enacting part of the Act incorporates them in any electric light provisional order, subject to the variations and exceptions contained in the order itself. It will be possible in this manner to save the repeated printing of an immense amount of absolutely identical matter in each of the many provisional orders granted in each year by the Board of Trade under the Electric Lighting Acts. (Introduced by Mr. Ritchie.) [U.K.]

[53] ***Elementary Education (Defective and Epileptic Children) Act (62 & 63 Vict., ch. 32—r.a. Aug. 9th)**, empowers a school authority to determine what children, not being imbecile, and not being merely dull or backward, are defective or epileptic, and requires such authority in making arrangements under the Act to provide facilities for enabling any parent, who is of opinion that his child ought to be dealt with under this Act, to present it to the school authority to be examined. For the purpose of ascertaining whether a child is defective or epileptic, a certificate to that effect by a duly-qualified practitioner, approved by the Education Department, is required in each case. Where the school authorities have ascertained that there are in their district defective children, they may make provision for their education by all or any of the following means:—(a) by classes in public elementary schools certified by the Education Department as special classes; or (b) by boarding out, subject to the regulations of the Education Department, any such child in a house conveniently near to a certified special class or school; or (c) by establishing schools, certified by the Education Department, for defective children. Where a school authority have ascertained that there are in their district epileptic children, they may make provision for the education of such children by establishing schools, certified by the Education Department, for epileptic children. The Department is not to certify any establishment established after the commencement of this Act for boarding and lodging more than fifteen defective or epileptic children in one building or comprising more than four such buildings. A school authority may provide guides or conveyances for children who, in the opinion of the school authority, are, by reason of any physical or mental defect, unable to attend school without guides or conveyances. The parent is, where a certified special class or school is within reach of the child's residence, to cause such child, being over seven years of age, to attend, and the parent is not to be excused from this duty by reason only that a guide or conveyance for the child is necessary. The Department may give aid from the parliamentary grant to a school in respect of education given to defective or epileptic children. The parent is made liable to contribute towards the expenses of the child incurred by a school authority under the Act, just as the parent of a blind or deaf child is already liable to contribute. For the purpose of the Education Acts a child is under this Act to be deemed a child until the age of sixteen years, without total or partial exemption from attendance until that age. The child is to be periodically examined in order to ascertain whether it has attained such a mental and physical condition as to be fit to attend ordinary school classes. [E.]

[54] **Education of Children Bill.** Mr. Robson introduced a Bill containing one short operative clause, enacting that the earliest age at which a child should be permitted to leave school should be twelve instead of eleven years, from and after January 1st, 1900, with a saving proviso preventing the measure from having any operation with regard to those children who on that date had already obtained total or partial exemption from attendance. Discussed on second reading March 1st, when the measure was supported by Mr. Kenyon (C), and its rejection was moved by Mr. G. Whiteley. Sir J. Gorst, in giving his support to the measure, thought its effect on town children should be considered totally apart from country children, and that in regard to the former—those who worked in the mills as half-timers—the honour of the people of Great Britain was rather pledged by what took place at the Berlin Conference. Agricultural children, however, were not contemplated in the Conference, and employment in the fields stood on a different footing, light employment there being really a benefit to growing children. Mr. Asquith also supported the measure, second reading of which was carried by 317 to 59. Considered in committee on May 31st (being Derby Day), when the Commons reassembled after the Whitsun recess. An amendment of Mr. G. Whiteley to postpone the commencement of the Act from January 1st, 1900, to 1905, was defeated by 163 to 10. On the motion of Mr. Robson a proviso was inserted in reference to children employed in agriculture; and on the motion of Mr. Rutherford a further proviso was added enabling a child to obtain partial exemption on attaining the age of twelve if the child has made three hundred attendances in not more than two schools during each year for five preceding years. Bill reported as amended June 7th, read a third time June 14th, passed Lords without amendment. As the **Elementary Education (School Attendance) Act (1893) Amendment Act (62 & 63 Vict., ch. 13)** Bill received r.a. July 13th. It enacts that on and after January 1st, 1900, the Elementary Education (School Attendance) Act, '93, shall have effect as if "twelve" were substituted therein for "eleven." It is, however, provided that nothing in this Act shall apply in the case of any child who at the said date is, under the byelaws then in force in the school district in which he resides, exempt, wholly or partially, as the case may be, from the obligation to attend school. Under another proviso the local authority for any district may, by byelaw for any parish within their district, fix thirteen years as the minimum age for exemption from school attendance in the case of children to be employed in agriculture, and in such parish such children over eleven and under thirteen years of age who have passed the standard fixed for partial exemption from school attendance by the byelaws of the local authority shall not be required to attend school more than 250 times in any year. Such byelaw shall have effect as a byelaw made under sect. 74 of the Elementary Education Act, '70, and all Acts amending the same. The local authority is to be the local authority fixed by sect. 7 of the Elementary Education Act, '76. Furthermore, a child is to be entitled to obtain partial exemption from school attendance on attaining the age of twelve years if such child has made 300 attendances in not more than two schools

during each year for five preceding years, whether consecutive or not. [E.]

[55] **Evicted Tenants (Ireland) Reinstatement Bill.** Mr. O'Malley (April 12th) moved second reading of this measure, the objects of which were, he explained, to re-enact sect. 13 of the Land Purchase Act of '91; to empower the Land Commission, on the application of the landlord or of the former tenant, or both jointly, and after due inquiry, to make an order for restoring the former tenant in the holding; to enable the Land Commission to advance money for rebuilding and other purposes, and to provide funds for this purpose to the amount of £250,000 out of the Irish Church Temporalities Fund. Mr. G. Balfour, in opposing the measure, pointed out that the Government had already refused to accept one far milder in character. The Bill was thrown out by 167 to 69.

[56] **Factory Bill.** Mr. M'Kenna asked (April 10th) whether the Factory Bill of the Government would contain provisions for prohibiting the use of lead for glazing earthenware in those particular kinds of ware in which it had been proved to be unnecessary; for prescribing the use of lead in the form of fritted double silicate; for prohibiting the use of raw lead; and for prohibiting the employment of young persons and women as dippers, dippers' assistants, ware cleaners after dippers, and glost placers in factories where lead-glaze was used. Mr. J. Collings replied that in a Bill the Home Secretary had prepared to amend the law relating to this matter it was proposed to give further power to the Secretary of State to deal under certain conditions with all the points mentioned by the hon. member. In the course of a discussion on the Home Office vote (July 7th), Sir C. Dilke raised the question of dangerous trades, and the Home Secretary said special rules would be necessary in the case of lead and phosphorus, and he was endeavouring to frame them in consultation with the employers. He hoped to introduce a comprehensive Factory Bill next session, although he could not give a definite pledge.

[57] **Finance Act.** The Budget was introduced April 13th (see FINANCE, NATIONAL), the main proposals being in regard to the Sinking Fund, involving a reduction of the fixed charge for the National Debt, certain stamp duties, and increased wine duties. On second reading of the Finance Bill, Sir H. Fowler (May 1st) moved its rejection, criticising the alteration in the wine duties, and contending that it was the duty of the Chancellor of the Exchequer to reduce the Debt as far as he could, and not to lessen the fixed charge. The Chancellor of the Exchequer, in course of his reply, said if they did not reduce the fixed charge for the Debt it would not be long before it would become practically impossible to purchase Consols to extinguish the Debt. Mr. Courtney (May 2nd) and Sir W. Harcourt also criticised the Government proposals, second reading of the Bill being in the result carried by 280 to 155. In committee (May 11th), a proposal of Mr. Broadhurst to reduce the duty on tea from 4d., the rate at which it was to be continued, to 2d., was defeated by 246 to 125. On the clause proposing that on wine (other than still wine in bottle) not exceeding 30° the duty per gallon should be 1s. 6d.; on wine exceeding 30°, but not exceeding 42° 38'; on sparkling wine an additional duty of 2s. 6d. the gallon; and on still wine in bottle 3s. the gallon,

Sir H. Vincent moved to exempt colonial wines; but the amendment was negatived by 192 to 37. Mr. Courtney proposed that the duty should be the same on wines of the same quality, whether imported in bottle or in cask. The Chancellor of the Exchequer felt, after consideration, that he had put the duty on bottled still wine too high, and accepted the amendment with a view to later on placing a surtax of 1s. per gallon on still wine instead of the present proposal. The effect would be a reduction of 6d. per gallon on what he had proposed. The same surtax would, however, be put upon spirits imported in bottle. The amendment was agreed to. On an amendment submitted by Mr. Harwood providing that wine (other than still wine in bottle) not exceeding 26° should pay a duty of 1s. per gallon, the Chancellor of the Exchequer said that he would modify his proposals so far that, instead of asking for an additional 6d. on the lower scale of duties, he would ask for only 3d. This concession was accepted. A modification in the stamp duty on certain foreign and colonial share warrants, reducing it from 5s. to 1s., was also made, following a suggestion of Mr. Henderson. The clause reducing the permanent annual charge for the Debt was carried by 154 to 77. A new clause proposed by Sir S. Montagu, reducing the duty on bills of exchange drawn to be payable out of the United Kingdom, but negotiated within it, was added to the Bill. On June 6th the Chancellor of the Exchequer promised Lord Alwyne Compton a departmental committee, with a view possibly to legislation next year, on the question of aggregating property for estate duty in certain cases. The **Finance Act** (62 & 63 Vict., ch. 9—r.a. June 20th) continues the tea duty at 4d. per lb., and fixes the customs duties payable on wines as follows:—

	s.	d.
Not exceeding 30 degrees of proof spirit, the gallon	1	3
Exceeding 30, but not exceeding 42, degrees of proof spirit, the gallon	3	0
And for every degree, or part of a degree, beyond the highest above charged, an additional duty, the gallon	0	3
Sparkling wine in bottle, an additional duty, the gallon	2	6
Still wine in bottle, an additional duty, the gallon	1	0
In addition to the customs duties payable on spirits, there are to be charged on:		

	s.	d.
Spirits in bottle, enumerated and tested, and sweetened spirits in bottle, unenumerated and tested, the proof gallon	1	0
Perfumed spirits, liqueurs, cordials, mixtures, and other preparations in bottle, entered in such a manner as to indicate that the strength is not to be tested, the liquid gallon	1	0
The measure also enacts a stamp duty on foreign and colonial marketable securities, on which duty was not hitherto payable, assigned, transferred, or in any manner negotiated in the United Kingdom, and on share warrants or stock certificates to bearer, by means of which any foreign or colonial shares or stock is so assigned, etc., in the United Kingdom, of 1s. for every £10 or fractional part of £10; on every instrument to bearer not being a share warrant or stock certificate to bearer charged under the foregoing provision, by means of		

which any share or stock is assigned, etc., a stamp duty of 3d. for every £25 or fractional part of £25 of the nominal value of the share or stock; and extends the stamp duty on share warrants issued under the Companies Act, and the stamp duty charged on stock certificates to bearer, to any instrument to bearer issued by any company formed in the United Kingdom. Instruments passing by delivery in pursuance of usage are, for the purposes of this Act, deemed a marketable security transferable by delivery or an instrument to bearer, as the case may be. Five shillings is substituted for 2s. as the *ad valorem* stamp duty on the statements with regard to the capital of companies; and local authorities, corporations, or companies proposing to issue any loan capital are, on the statement of the amount proposed to be secured by the issue, to pay an *ad valorem* stamp duty of 2s. 6d. for every £100 and any fraction of the same. The stamp duty chargeable on letters of allotment and renunciation is increased from 1d. to 6d. where the nominal amount is not less than £5. The duty on foreign bills of exchange negotiated in the United Kingdom where the amount exceeds £50, is reduced so as to be, where the amount exceeds £50 and does not exceed £100, 6d.; and where the amount exceeds £100, 6d. for every £100 and every fractional part of that amount. The stamp duty on bills of exchange expressed to be payable at a period not exceeding three days after date or sight is 1d. The provisions of the Stamp Act in reference to accident assurance policies are extended to policies of insurance or indemnity against liability incurred by employers in consequence of claims made upon them by workmen who have sustained personal injury, when the annual premium does not exceed £1. The income-tax is continued at its former rate of 8d. The amount of the permanent annual charge for the National Debt is reduced from £25,000,000 to £23,000,000. The Treasury may exchange the existing terminable annuities created in pursuance of sect. 4 of the National Debt and Local Loans Act, 87, for new terminable annuities of equivalent capital value, and terminating in the year ending on March 31st, 1912. They may convert the sum of £15,000,000 Consolidated Stock held by the National Debt Commissioners on account of trustee and Post Office Savings Banks into a terminable annuity of equivalent capital value, and terminating in the year ending on March 31st, 1923; and they may convert the charge for £13,000,000 created by sect. 1 of the National Debt (Conversion of Exchequer Bonds) Act, '92, into a terminable annuity terminating in the year ending on March 31st, 1923, of such amount as will be sufficient to repay within the period of its currency the said amount, with interest at the rate of £2 15s. per cent. per annum.

[58] **Fine or Imprisonment (Scotland and Ireland) Act** (62 & 63 Vict., ch. 11—r.a. July 13th). The Prisons Act, '98, contains a provision that where a person is committed to prison in default of the payment of a sum of money, he may, on payment of a part of the fine, be granted a remission of sentence bearing the same proportion to the whole term as the sum paid does to the full sum. That Act, however, does not apply to Scotland or Ireland, and the object of this Act is to extend to these countries the same reform in that respect which that measure enacted for England. The Bill was introduced by Sir Charles Cameron.

[59] **Fire Brigades Bill**, introduced by Mr. Guy Pym, with the object of promoting the efficiency of the fire brigades throughout the country. Discussed April 12th, but withdrawn on the proposal of Mr. Chaplin that there should be an inquiry into the matter by select committee. It was ordered (April 26th), on the motion of Mr. Pym, that a select committee be appointed to inquire and report as to the existing arrangements for the provision of fire brigades (including both staff and appliances) in England and Wales, excepting the Metropolitan Fire Brigade; the adequacy of such arrangements for the due protection of life and property from destruction or injury from fire; and the amendments, if any, which are necessary or desirable in the law on the subject. The committee took evidence, and reported (July 25th) that it would not be in their power to make a full report in the present session, and recommending that the inquiry be resumed in the next session.

Food, Adulteration of (see sect. 101).

[60] ***Gordon Memorial College at Khartoum Act** (62 & 63 Vict., ch. 16—r.a. Aug. 1st) enables the executive committee and trustees of the Gordon Memorial College at Khartoum to invest the trust funds now, or at any time, in their hands or under their control, in the stocks, bonds, or obligations of the Egyptian Government, or in investments guaranteed by that Government, or in other Egyptian securities, or in the purchase of property in the Soudan or other parts of Egypt, that may be required for the purposes of the college, etc.

[61] ***Improvement of Land Act** (62 & 63 Vict., ch. 46—r.a. Aug. 9th). The objects of this Act are to extend the period for the repayment of charges under the Improvement of Land Act, 1864, from 25 years to 40 years; to allow such charges to be imposed not only on the land improved but also on other land in which the same persons are interested; to enable the improvement companies to adopt as improvements authorised by their private Acts the improvements authorised by the public Improvement Acts; to authorise the extension of the period of repayment of existing charges incurred in respect of planting woods and trees; and to extend to Scotland the additions to the improvements authorised by the Act of '64 contained in Acts which do not extend to Scotland.

[62] ***Inebriates Act** (62 & 63 Vict., ch. 35—r.a. Aug. 9th) enacts that the expenses of any prosecution on indictment under sect. 2 of the Inebriates Act, '98 (which provides for the detention of habitual drunkards), shall be payable as, in cases of indictment for felony, and where any case under that section is dealt with summarily the expenses of the prosecution shall be payable in manner provided by sect. 28 of the Summary Jurisdiction Act, '79, or, in Ireland, by sect. 14 of the Criminal Justice Act, '55. Where by any regulations made in pursuance of sect. 6 of the Inebriates Act, '98, with respect to inebriate reformatories, a breach of the regulations is made punishable by fine or imprisonment, the breach shall be an offence which may be prosecuted summarily. [U.K.]

[63] **Infectious Disease (Notification) Extension Act**, '99 (62 & 63 Vict., ch. 8—r.a. June 20th), extends the Act of '89 (which provides for the notifications of infectious disease to local authorities), after the commencement of

this Act on Jan. 1st, 1900, to every urban, rural, and port sanitary district, whether that Act has or has not been adopted therein. [E.]

[64] **Intoxicating Liquors (Sunday Closing) Bill**, introduced by Mr. Tritton, and backed by Sir William Houldsworth, Colonel Williams, Mr. Hazell, Sir Edward Gourley, Mr. Howard, Mr. Jacoby, Mr. W. F. Lawrence, Mr. Samuel Smith, Mr. Biddulph, Mr. Allison, and Sir James Woodhouse, proposed that, subject to any order made under its provisions, all premises in which intoxicating liquor is sold by retail should be closed during the whole of Sunday, Christmas Day, and Good Friday, and that the licensing authority might make an order permitting "off" sales during a period not exceeding two hours on any such day. The measure came on rather unexpectedly on June 7th, when second reading was moved by Mr. Tritton, who explained that the Bill had been drawn up after long and careful consideration by the Church of England Temperance Society. Mr. Nussey moved an amendment declaring that no Bill to restrict the sale of intoxicating liquor on Sunday is satisfactory unless it embodies the principle of local option. After further discussion Mr. Galloway moved the adjournment of the debate, and this was seconded by Mr. G. Bowles and carried by 95 to 85.

[65] ***Land Tax Commissioners' Names Act** (62 & 63 Vict., ch. 25—r.a. Aug. 9th) is an Act to appoint additional commissioners for executing the Acts for granting a Land Tax and other rates and taxes.

[66] ***Licensing Exemption (Houses of Parliament) Bill**, to exempt the sale of intoxicating liquor in the Houses of Parliament from the Licensing and Excise Acts, was introduced by Lord Stanley, then chairman of the Kitchen Committee. (Withdrawn. July 17th.)

[67] **Lincolnshire Coroners Act** (62 & 63 Vict., ch. 48—r.a. Aug. 9th) was presented by Lord Heneage, and constitutes the divisions of Lincolnshire separate counties for the purposes of the Coroners Acts.

[68] **Liquor Traffic, Local Veto (Scotland) Bill**, to enable electors to have effectual control over the liquor traffic in their respective areas in Scotland, was introduced by Mr. Colville, and Mr. J. Wilson (Govan) moved second reading May 3rd. The rejection of the measure was proposed by Mr. Faithfull Begg. Sir H. Campbell-Bannerman said Scotland was greatly in advance of England in this matter of temperance reform; he was bound frankly to say, though in so doing he was finding fault with his own conduct when a member of the last Cabinet, that he thought it would have been wiser and more effective if the late Government had confined their action to bringing forward a Local Veto Bill for Scotland, where the people were prepared for such legislation. If they had done that, the experience of some years in Scotland might have had an effective operation upon opinion in England. The Bill was rejected by 217 to 143. It was estimated that amongst the Scotch members who took part in the division there voted "Aye," 37 Liberals, 2 Unionists, and 1 Conservative; and "No," 11 Conservatives, 4 Unionists, and no Liberals; so that, according to the votes of the Scotch members alone, the second reading was carried by nearly three to one.

[69] **London Bills**. The London County Council had several private Bills before Par-

liament; the first being the very important measure to empower them to make a new street from Holborn to the Strand, to widen Southampton Row, to widen High Street, Kensington, and to make other street improvements and works, etc., in the administrative county. This Bill was passed subject to certain conditions, which included, so far as regards the Strand and Holborn improvements, that the land south of the Strand and some other special properties shall be excluded from the betterment area. The time limited for the purchase of land is seven years, and for completion of works ten years. Betterment cannot be applied until after the completion of the improvement. The estimates of the amount which the Council will require to expend on capital account for the purposes of this Act (being in each case calculated to cover the original cost of purchasing lands and executing the works without any allowance in respect of returns for resale or letting of lands which will be ultimately available for that purpose) are as follow:—

New street (Holborn to Strand)	£4,862,500
Southampton Row (widening)	272,000
Wandsworth Road, Lambeth (widening)	63,000
High Street, Kensington (widening)	308,500
Cat-and-Mutton Bridge, Shoreditch (reconstruction)	71,800
Old Gravel Lane Bridge (St. George-in-the-East) (reconstruction)	14,000
	<hr/>
	£5,591,800

The General Powers Act of the Council enables them to construct railway sidings at Horton Asylum (Surrey), to purchase lands for various purposes, and provides for the acquisition of the Golders Hill estate, adjoining Hampstead Heath. The Bill originally contained provisions to enable the Council to purchase by agreement the freehold of the land forming the site of Spitalfields Market and some adjoining property, but these were struck out in the Lords. The Money Act of the Council proposes to enable them to raise on capital account during the financial period April 1st, '99, to Sept. 30th, 1900, the large sum of £11,310,210; but, as there are included in this sum amounts which are re-grants of borrowing powers previously granted of in all no less than £6,024,088, the net aggregate new borrowing powers proposed work out at £5,286,122, of which £2,950,523 is for the Council and £2,335,599 for other bodies. There was passed as a public Act a measure in reference to London drainage by-laws, for which see sect. 74. The Council promoted legislation for the acquisition of the undertakings of eight metropolitan water companies; the Bill was postponed from time to time, and at length withdrawn in view of the fact that the Metropolitan Water Commission had not reported. On second reading of another measure of the Council, to empower them to collect and store water in Wales as a new source of supply to London, an amendment moved by Mr. Whitmore declaring it to be inexpedient that the measure be read a second time before the Royal Commission on London Water Supply had presented its report was (March 21st) carried by 206 to 130. The East London Water Company brought in a Bill to empower them to take further water from the Thames and to spend £1,400,000 on new works;

but on behalf of the London County Council it was urged in committee that the only justification for such a measure was necessity, and that there was no necessity in this case; and the opposition to the measure was successful. For the provisions of the ministerial Metropolis Water Act see sect. 75. In regard to railway measures affecting the Metropolis, provision was made for an extensive enlargement of Victoria Station at a cost of something like £1,500,000; for a further enlargement of the Waterloo terminus; for a new access to London for the Great Central Railway under a scheme promoted jointly by that company and the Great Western Railway; the West Metropolitan Railway Company was empowered to construct a branch line from Latimer Road to Acton, where it will run into the Great Western station; the Baker Street and Waterloo Railway Company was empowered to extend its authorised lines so as to connect with Paddington and Euston, and thus to bring these stations, together with the terminus of the Great Central, in direct communication with Waterloo; by another Act a new company is empowered to make an underground electric railway from the Great Northern station at Wood Green to the Strand, the last section of which will be beneath the new street which is to be made from Holborn to the Strand; other enactments provide for a working union of the South-Eastern and the London, Chatham and Dover Railway Companies, and, in connection with that arrangement, empowers them to construct certain new lines. Special provisions were inserted providing cheap trains for the working classes. An Act was passed for incorporating the North-West London Railway Company and for empowering them to construct underground railways from the Marble Arch to Cricklewood; and a measure became law authorising agreements between the Charing Cross, Euston, and Hampstead Railway Company, and the Midland, South-Eastern, and London and North-Western. The London School Board obtained powers to compulsorily acquire a number of sites for School Board purposes in different parts of the Metropolis; and in this connection, and generally in connection with the taking of houses belonging to the working classes, certain restrictions were imposed on the Board, and a wiser definition was generally given to the word "house," extending it in effect to tenements, and thus further limiting the power of removing persons of the labouring class. A Bill of the Gas Light and Coke Company for raising additional capital, etc., passed the Commons, but was thrown out in the House of Lords. As regards electric lighting, an Act was passed to confirm a provisional order made by the Board of Trade enabling the Strand and Charing Cross Electric Lighting Company to supply electric light in the City area, and the power was given in certain cases to companies to acquire lands and work generating stations outside their area of supply.

[70] *London Government Act, '99 (62 & 63 Vict., ch. 14—r.a. July 13th), comes into operation on the day on which the members of the metropolitan borough councils to be first elected under the Act (on Nov. 1st, 1900) come into office, or such other day not being more than six months earlier or later, as the Lord President of the Council may appoint, either generally, or with reference to any particular provision of the Act; and different days may

be appointed for different purposes and different provisions of the Act, whether contained in the same section or in different sections, or for different boroughs. The Act is one to make better provision for local government in the administrative county of London by the division of the county (exclusive of the City of London) into metropolitan boroughs, each with a municipal council. In introducing the Bill on Feb. 23rd, Mr. A. J. Balfour explained that London, apart from the City, was locally governed by some 30 vestries with administrative powers, and 12 administrative district boards, each of which represented two or more smaller and non-administrative vestries. It was proposed by the Bill to convert these 42 vestries and district boards into a less number of municipal councils, each with, practically, the powers of a provincial municipal council, with such modifications as fitted the peculiar circumstances of London, and the preservation to the County Council of its central administration for county purposes. Certain of the proposed new boroughs would be scheduled in the Bill, as they were identical with existing vestry areas; the other parts of the Metropolis would be referred to a commission to determine in what form they should be dealt with. The areas proposed to be scheduled in the Bill were the parishes of Battersea, Camberwell, Chelsea, Fulham, Hammersmith, Hampstead, Islington, Kensington, Lambeth, Lewisham, Paddington, St. Marylebone, St. Pancras; the districts of Poplar and Wandsworth; and the area of the ancient parliamentary borough of Westminster, consisting of the parishes of St. Margaret and St. John, Westminster, the parish of St. George, Hanover Square, the parish of St. James, Westminster, the parish of St. Martin-in-the-Fields, and the district of the Strand Board of Works. Each municipal area would be divided into wards by an Order in Council, and each council would have a mayor, aldermen and councillors; the elections would be held in November of each year, one-third of the councillors being elected annually after the first elections. The number of aldermen and councillors would be fixed by the Order in Council, but would not exceed 70. The new councils would not be linked, by representation or otherwise, to the County Council. As to powers, the new authorities, like other municipalities, would have the power of promoting and opposing Bills in Parliament, subject to the Borough Funds Act, and the powers existing under the adoptive Acts—baths and washhouses, libraries, and burial boards. These were all the powers actually transferred in the Bill, but it provided further machinery by which new powers might be granted by the London County Council. If any municipality agreed with the County Council for the transfer of a power, that power would be transferred subject to the revision of the Local Government Board. This privilege was safeguarded as follows:—If the London County Council were asked by a particular municipality to hand over certain powers to it, and were of the opinion that the terms agreed upon were financially too favourable to the council to whom the powers were to be granted, a *locus standi* was given to any other municipality to object to the terms upon which the power was proposed to be transferred to the new municipality. It was further provided that

when a power had been granted by the London County Council to a new municipality, any other municipality might require the same power on the same terms; and in order to prevent the London County Council being left with the administration of certain powers over a comparatively small area, the London County Council was given the right to require that, when a new power had, under the provisions just described, been transferred to more than one-half of the existing municipalities, the minority should take over that power also. There would be a simplification of rating under the Bill: the ratepayer would be asked for all his rates in a single demand-note, and upon that demand-note all the objects for which he is asked for the rate would be clearly set forth. For each municipality there would be but one single rating authority, and that single rating authority would be appointed by the municipality; the municipality appointing the overseers who were responsible for making the rates. To this rating authority every local body which had a right to spend the rates would send its precepts direct—in other words, the absurdity was swept away by which the London County Council sent its precepts to the overseers through the medium of the guardians, while the London School Board sent its precepts to the overseers by means of the vestry. Further, the lighting and sewer rate, which, in many districts, was obliged to be a separate rate, would be abolished. The Bill did not disturb the equalisation of rates effected under the Act of '94; and the audit of the local accounts would not be altered. **The Bill was read a second time** on March 24th by 245 votes to 118—majority 127, the opposition to it being led by Mr. Herbert Gladstone, and supported by Mr. Asquith and Sir Henry Campbell-Bannerman, and based on the contention that the Bill sought to impair the authority of the County Council, and to destroy the corporate unity of the administration of the Metropolis. In the course of the debate Mr. Balfour stated that women would be eligible for election as councillors. The Bill went into committee on April 24th, when an amendment of Mr. Haldane's to include the City within the scope of the Bill was rejected by 208 to 103—majority 105. On April 26th, an amendment of Mr. J. Stuart's to divide London in "districts" instead of "metropolitan boroughs" was defeated by 242 to 130—majority 112. Mr. Pickersgill's proposal that there should be no aldermen was rejected on April 27th by 245 to 140—majority 105. On the same day a long discussion took place on the question of admitting women to the offices of mayor, alderman, and councillor. Mr. Boulnois sought to make the sex ineligible for all these offices, but he was defeated by 127 to 101; then the House adopted, by 179 to 77, an amendment declaring that no woman should be eligible for the office of mayor, but when the succeeding words were put that "neither sex nor marriage shall be a disqualification for the office of alderman or councillor," a proposal of Mr. R. G. Webster's to omit "alderman," and thus disqualify women for that position, was carried by 155 to 124. The effect of the previous amendment was thus destroyed, and the amendment from beginning to end was abandoned, leaving the whole matter open for consideration on the report stage of the Bill.

On May 4th the Government agreed, on the representations of Mr. Sydney Buxton, to insert words in the Bill giving the council of any of the new boroughs an option, by a two-thirds majority, of applying to the Local Government Board: to have all the councillors elected once every three years instead of one-third annually. The committee refused, on May 8th, to extend the hours of polling beyond 8 o'clock. On May 18th the schedule of areas enumerated in the Bill was increased by the addition of Hackney, Tower Hamlets (outside Poplar district), Rotherhithe and Bermondsey (combined), West Southwark and Newington (combined), Holborn, East and Central Finsbury (combined), Bethnal Green, Shore-ditch, Deptford, Greenwich, and Woolwich. On the report stage on June 6th an amendment of Mr. Courtney's, declaring that no person should be disqualified by sex or marriage from being elected or being an alderman or a councillor, was carried by 196 to 161; and on June 8th the parish of Stoke Newington and the urban district of South Hornsey were added to the schedule to form one municipal borough. On the **third reading**, on June 13th, an attempt was made by the Hon. A. Elliot to recommit the Bill in respect to the provision concerning women, but the proposal was negatived. The **second reading** was agreed to in the **Lords** on June 20th, and in committee on June 26th the Earl of Dunraven carried, by 182 to 68, an amendment, omitting the words inserted in the Commons enabling women to be aldermen and councillors, and substituting therefor words declaring that no woman shall be eligible for the offices of mayor, alderman, and councillor. The Marquis of Salisbury supported, and the Lord Chancellor and the Duke of Devonshire opposed, the decision of the Commons. On June 27th Lord Monkswell carried against the Government, by 65 to 50, an amendment enabling every borough council to appoint a finance committee for regulating and controlling the finances of the council. On report on July 3rd it was agreed, on the motion of Lord Glenesk, to insert a new clause, declaring that a Committee of the Privy Council might, by an Order in Council, detach Kensington Palace from the borough of Westminster and attach it to the borough of Kensington; and in reply to the Duke of Westminster, the Duke of Devonshire promised that a proposal to designate the new Westminster a city instead of a borough should not be overlooked. (This promise was redeemed in August, when the Queen, by Royal Charter, conferred upon Westminster the title and dignity of a city.) The Bill was **read a third time by the Lords** and passed on July 4th. When the Lords' amendments were considered in the Commons on July 6th, Mr. Courtney protested against the disqualification of women as aldermen and councillors, and he proposed a compromise whereby the disqualification should attach to the office of alderman but not to that of councillor. Mr. Balfour, however, deprecated the "provoking of a useless contest" with the Lords, and Mr. Courtney's amendment was rejected by 246 to 177, and the Lords' amendments were accepted by 243 to 174.

It is provided by sect. 1 that the council of each borough shall consist of a mayor, aldermen, and councillors; "provided that no woman shall be eligible for any such office;"

that the number of councillors, the number and boundaries of the wards and the number of councillors to each ward, shall be fixed by an Order in Council; that the number of aldermen shall be one-sixth of the number of councillors; that the total number of aldermen and councillors shall not exceed seventy; that, except as otherwise provided by or under the Act, the provisions of the Local Government Act, '88, with respect to the chairman of the County Council and the county aldermen respectively shall apply to the mayor and aldermen of a metropolitan borough respectively, and for this purpose references in that Act to the chairman of the County Council and to county aldermen shall be construed as references to the mayor and aldermen of the borough; that, except as otherwise provided by or under the Act, the law relating to the constitution, election and proceedings of administrative vestries, and to the electors and members thereof, shall apply in the case of the borough councils under this Act and the electors and councillors thereof, and sect. 46 of the Local Government Act, '94, relating to disqualifications, shall apply to the offices of mayor and aldermen; that the quorum of the borough council shall be one-third of the whole number of the council; that the mayor and an alderman of a metropolitan borough shall be required to accept office within the same period as is allowed in the case of a councillor; that the Local Government Board may, on request made by a borough council in pursuance of a resolution of the council passed by a majority of two-thirds of the members present and voting at a meeting of the council duly convened for the purpose, provided that such majority is not less than the majority of the whole council, make an order directing that the whole of the councillors shall retire together on the ordinary day of election in every third year, and may on like request rescind any such order. Sect. 3 provides that the first elections of all borough councillors under this Act shall be held on Nov. 1st, 1900, or on such later day, as soon as practicable thereafter, as may be fixed by the Lord President of the Council, who shall also fix a corresponding date for the first elections of mayor and aldermen; that the ordinary day of election of borough councillors shall be Nov. 1st, or if that day is Sunday, then the following day; that the ordinary day of election of the mayor and aldermen shall be Nov. 9th, or if that day is Sunday, then the following day; that the revised lists of voters in each borough shall in each year after the year 1900 be printed, and signed before Oct. 20th, and come into operation as the register for the purpose of borough elections on Nov. 1st. By sect. 4 it is provided that on the appointed day, which falls as explained above, every elective vestry and district board in the county of London shall cease to exist, and, subject to the provisions of the Act, and of any scheme made thereunder, their powers and duties, including those under any local Act, shall, as from the appointed day, be transferred to the council for the borough comprising the area within which those powers are exercised, and their property and liabilities shall be transferred to that council, and that council shall be their successors, and the clerk of the council shall be called the town clerk, and shall be the town clerk within the meaning of the Acts

relating to the registration of electors; provided that in the case of borrowing powers so transferred, if the London County Council refuse their sanction, or do not within six months after application made give their sanction, to a loan, or attach conditions to their sanction, an appeal shall lie to the Local Government Board, whose decision shall be final. It is provided that where any of the adoptive Acts (relating to the establishment of free libraries, burial boards and baths and washhouses) is adopted within a borough, the borough council shall be the authority for administering the Act; and where any such Act has been adopted before the appointed day, and is administered by commissioners or a board, a scheme under this Act shall abolish the commissioners or board, and transfer their powers, duties, property, and liabilities to the borough council; and any of the adoptive Acts may be adopted in a metropolitan borough in like manner as in a borough outside London, and not otherwise, and when any of the adoptive Acts adopted before the appointed day does not extend to the whole borough, the Act may be adopted in the rest of the borough in like manner as if it were a separate borough and the borough council thereof. The effect of this provision will be that if a borough council desires to establish free libraries in the borough it may do so by resolution of the council, instead of having to take a poll of the ratepayers. Under sect. 5 the **powers and duties of the London County Council** in respect of the following are, from the appointed day, transferred to each borough council as respects their borough: the licensing of wooden structures and the power to take proceedings in regard thereto, under sect. 84 of the London Building Act, '94; the authority under sect. 134 of the same Act in relation to the removal of unauthorised sky signs; the removal of obstructions in streets, as provided by sect. 109 of the same Act; and the power under sect. 28 of the Public Health (London) Act, '91, of registering dairymen. It is also provided that the following powers of the **London County Council** may be exercised by each borough council in relation to its own borough: the power of demolition of buildings under sect. 170 of the London Building Act in cases where the borough council have obtained the conviction; the power to take proceedings in respect of timber or other articles piled, stacked, or stored, in contravention of sect. 203 of the same Act; the powers under sects. 17 to 25 of the Metropolitan Water Act, '71, with respect to regulations of water companies; the power under sect. 7 of the Railway and Canal Traffic Act, '88, to make or appear in opposition to certain complaints; the powers under sect. 65 of the Local Government Act, '88, relating to the acquisition of land; the power to adopt Part III. of the Housing of the Working Classes Act, '90; and the power to make by-laws under sect. 23 of the Municipal Corporations Act, '82, as applied by sect. 16 of the Local Government Act, '88. Also it is provided that the Local Government Board may, if they think fit, on the application of the London County Council, and of the majority of the borough councils, make a provisional order for transferring to all the borough councils any power exercisable by the County Council, or for transferring to the County Council any power exercisable by the borough councils;

and the Local Government Board may also, on the joint application of the London County Council and the Common Council of the City of London, make a provisional order transferring any power from the County Council to the Common Council, or *vice versa*. Some further powers are conferred by sect. 6, including acquisition and maintenance of main roads, embankments, and roadways and footways of bridges; the power to stop up roads (after notice to contiguous borough authorities); the enforcement of by-laws and regulations with respect to dairies and milk, slaughterhouses, knackers' yards, and offensive businesses; the alienation of land vested in the council; and the powers of promoting and opposing Bills in Parliament. Sect. 7 settles the expenses incidental to the transfer of powers or duties. By sect. 8 it is provided that any committee appointed by a borough council for the purpose of the Public Libraries Acts, '92 and '93, may consist partly of persons not members of the council, but they may not spend money beyond the amount authorised by the council; every borough council is to appoint a finance committee to regulate all expenditure, and no liability exceeding £50 is to be incurred except upon a resolution of the council passed on an estimate submitted by the finance committee; sect. 57 of the Local Government Act, '94, is applied to borough councils. By sect. 9 all payments are to be made to and by the borough treasurer, and all payments by the council are to be made on the council's order, signed by three members of the finance committee present at the meeting of the council and countersigned by the town clerk. By sect. 10 all expenses of a borough council are to be paid out of the general rate, which is to include poor rate, and is to be assessed, made, and levied together by the borough council as one rate, called the general rate. Under sect. 11 the council of each borough are appointed overseers of their own borough, provided that the duties and powers and liabilities of the overseers with regard to the preparation of voters' lists and jury lists shall be undertaken by the town clerk. Precepts issued by other administrative bodies for the purpose of obtaining money to be raised by a rate are to be sent to the council at their office addressed to the town clerk; and all the rates collectable by the borough council are to be levied on the one demand note. Tenants who are entitled to deduct the sewers' rate from their rent have this right continued to them by sect. 12. **Assessment committees** are to be appointed by the council (sect. 13); and the accounts of the borough councils are to be audited in the same way as those of the London County Council (sect. 14). Sect. 15 provides for the appointment of a **committee of the Privy Council** to appoint commissioners to prepare such orders and schemes as are required for carrying the Act into effect. The following was the committee appointed (July 14th) for this purpose: the Lord President of the Council, the Secretary of State for the Home Department, the President of the Local Government Board, Lord James of Hereford, the Right Hon. C. T. Ritchie, M.P., the Right Hon. J. Lloyd Wharton, M.P., the Right Hon. E. R. Wodehouse, M.P. The commissioners appointed by them were Sir Hugh Owen, late Secretary of the Local Government Board; Sir Samuel Johnson, late Town Clerk of Notting-

ham; and Mr. A. T. Lawrence, Q.C. Before any Order in Council forming an area into a borough is made, the draft of it is to be laid before each House of Parliament for a period of not less than 30 days during the session of Parliament. Sect. 16 defines the provisions which may be dealt with under any scheme; sect. 17 makes rules as to borough and parish boundaries, and sect. 18 provides for the absorption of detached parts of parishes. Sect. 19 converts the local board of Woolwich into a borough council, and reserves certain powers now enjoyed by that authority; by sect. 20 Penge is handed over to the commissioners to be dealt with; by sect. 21 Kensington Palace may be detached from the borough of Westminster and attached to the borough of Kensington, and by sect. 22 the Inner and Middle Temples are deemed to be within the City of London. Sect. 23 **separates the ecclesiastical from the civil powers** of the vestry, and provides that none of the former shall be taken over by the borough council; the churchwardens will cease to be the overseers; and nominees of the borough council are to be substituted for overseers as the trustees of any charity. By sect. 24 the mayor of a borough becomes a justice of the peace, and shall not be disqualified by reason of being a solicitor practising in London, but he may not practise as a solicitor before any justices of the county of London. Sect. 25 provides for the appointment of a deputy town clerk in the absence of the town clerk. Sect. 26 defines the procedure on an application for the alteration of the number of wards in a borough. By sect. 27 it is provided that an Order in Council shall (a) give each of the metropolitan boroughs an appropriate name; and (b) fix the days, years, and times for the retirement of the first aldermen and councillors; and (c) give such directions as to the first meeting of the borough councils, and make such other temporary modifications of the provisions of this Act, as may appear to Her Majesty to be necessary or proper for making those provisions applicable in the case of the first constitution of a borough council. It is also provided that an Order in Council under the Act may make such provisions as appear necessary for adapting the enactments relating to the registration of electors to the provisions of the Act with respect to the powers and duties of the town clerk and overseers, and in particular for applying, so far as appears necessary, the law regulating the registration of electors in a municipal borough outside London; and that an Order in Council under the Act shall provide for the revised lists of voters in the administrative county of London outside the City being, in the year 1900, printed and signed before Oct. 20th, and coming into operation as the register for the purpose of borough elections on Nov. 1st, and may provide for such adjustment of the lists of voters and registers with respect to any alteration under the Act of parish boundaries as may appear to be required for the purpose of those elections. On the day on which the first borough councillors elected under the Act come into office, the persons who are then members of elective vestries or district boards, and the auditors and overseers of any place to be included in a borough, shall cease to hold office, and until that day the persons who are at the passing of the Act members of elective

vestries or district boards, and auditors and overseers, shall continue in office as if the term of office for which they were elected or appointed expired on that day, and, except for the purpose of filling casual vacancies, no further election or appointment shall be held or made. By sect. 28 it is provided that sects. 297 and 298 of the Public Health Act, '75, shall apply under certain conditions to any provisional order made under this Act. Sect. 29 provides that where doubts arise concerning the transferability of any duty, power, or liability, or as to the possession of any property, it may be submitted to the High Court for decision. The interests of existing officers are protected by sect. 30. By sect. 31 the construction of certain Acts is defined, and the Equalisation of Rates Act and the London School Board are declared to be exempt from the provisions of this Act. By sect. 32 borough councils are prevented from alienating open spaces. By the first schedule the **28 areas which are to be boroughs** are thus defined: the parishes of Battersea, Bethnal Green, Camberwell, Chelsea, Fulham, Hackney, Hammersmith, Hampstead, Islington, Kensington, Lambeth, Paddington, St. Marylebone, St. Pancras, Shoreditch; the area consisting of the parishes of Mile End Old Town and St. George's-in-the-East and the districts of the Limehouse and Whitechapel Boards of Works, including the Tower of London and the liberties thereof; the district of the Poplar Board of Works; the district of the Wandsworth Board of Works; the area consisting of the parishes of St. George the Martyr, Christchurch, Southwark, St. Saviour, Southwark, and Newington; the area consisting of the parishes of Rotherhithe, Bermondsey, Horselydown, and St. Olave and St. Thomas, Southwark; the area of the parliamentary division of Holborn; the area consisting of the parliamentary divisions of East and Central Finsbury; the area of the parliamentary borough of Deptford; the area of the parliamentary borough of Greenwich; the area of the parliamentary borough of Lewisham; the area of the parliamentary borough of Woolwich; the area of the ancient parliamentary borough of Westminster, comprising the parishes of St. Margaret and St. John, Westminster, the parish of St. George, Hanover Square, the parish of St. James, Westminster, the parish of St. Martin-in-the-Fields and the district of the Strand Board of Works, and including the Close of the Collegiate Church of St. Peter, Westminster, and the Liberty of the Rolls; and the area consisting of the parish of Stoke Newington and of the Urban District of South Hornsey, or so much thereof as may be incorporated with the county of London under this Act. These practically cover the available areas; and the commissioners will only have to determine some questions of boundaries and the adjustment of some points as to the detached areas.

[71] ***Lunacy Bill**, which was presented by the Lord Chancellor, proposed to amend the Lunacy Acts in respect of urgency orders and numerous other matters. Passed Lords, and sent to Commons. (Withdrawn.)

[72] **Manchester Canonries Act** (62 & 63 Vict., ch. 28—r.a. Aug. 9th). Its object is to equalise the income of the canons, and, after so doing, to allow the balance of the proceeds of sale of the houses of residence to be applied to pur-

poses connected with the service and administration of the cathedral. Was presented by Earl Egerton.

[73] **Marriages Validity Act (62 & 63 Vict., ch. 28—r.a. Aug. 9th)** was presented by Lord Macnaghten, and enacts that no marriage solemnised, or to be hereafter solemnised, in any church in England or in Ireland, after publication of banns in such church, shall be or be deemed to have been invalid by reason only that one of the parties to such marriage was, in the case of a marriage in England, resident in Ireland, or, in the case of a marriage in Ireland, resident in England, and that banns may have been published in any church of the parish or place in which such party was resident, according to the law or custom there prevailing, and not in the manner required for the publication of banns in the part of the United Kingdom in which the marriage has been solemnised.

[74] **Metropolis Management Acts Amendment (Bye-laws) Act (62 & 63 Vict., ch. 15—r.a. Aug. 1st)**, presented by Lord Monkswell, enacts that the powers of the London County Council for making byelaws under sect. 202 of the Metropolis Management Act, '55, shall extend and apply to authorise the Council to make byelaws for the following purpose:—Requiring persons about to construct, reconstruct, or alter the pipes, drains, or other means of communicating with sewers, or the traps and apparatus connected therewith, to deposit with the sanitary authority of the district such plans, sections, and particulars of the proposed construction, reconstruction, or alteration as may be necessary for the purpose of ascertaining whether such construction, reconstruction, or alteration is in accordance with the statutory provisions relative thereto, and with any bye-laws made under the said section. It is, however, provided that any such bye-laws shall not require the deposit of any plan or section in the case of any repair which does not involve the alteration or the entire reconstruction of any such pipe, drain, or other means of communicating with sewers or the traps and apparatus connected therewith; and that any such bye-laws shall not require the deposit of plans, sections, and particulars before the work is commenced in any case in which the alteration of the drains must be carried out at once, though the bye-laws may require such deposit to be made within a limited time from the commencement of the work.

[75] ***Metropolis Water Act, '99 (62 Vict., ch. 7—r.a. June 6th)**, enables and requires the metropolitan water companies to supply each other with water in cases of emergency. It is to be their duty, if required by the Local Government Board, to submit schemes for works enabling the companies to supply each other and to construct such works as may, in the opinion of the Board, be necessary for that purpose, and whenever, in the opinion of the Board, a case of emergency has arisen or is likely to arise, to supply at a reasonable cost such water as may be required and may be available after the requirements of the district of the supplying company have been satisfied. The money for the cost of constructing the necessary works is to be raised by the issue of debenture stock, but the Local Government Board is to make it a condition of their consent to the raising of such stock that the stock be raised in accordance with the provisions contained in

the most recent Act for the time being with reference to the issue of debenture stock by a metropolitan water company. Provision is made for the payment by the company receiving water to the company supplying it. The companies are not required to carry to a sinking fund a percentage on the amount of money for the time being raised by the issue of debenture stock created under the Act. If the undertaking of any of the companies is compulsorily purchased within seven years of the passing of the Act by any public body or trustees, nothing in this Act shall authorise the company to bring into account, or to make any claim in respect of, any advantages conferred on them by or resulting from the passing of the Act. Mr. Chaplin, in introducing the Bill (Feb. 20th), remarked that its object was to make impossible the recurrence of any curtailment of the water supply in any part of the Metropolis—a curtailment which in the past had resulted in so much inconvenience, amounting in some cases almost to suffering, on the part of many of the poorer inhabitants of London during the drought and excessive heat of last summer. The Bill was duly brought in, and after second reading (March 9th) referred to a hybrid committee, which took evidence and reported the measure with amendments. On the order for third reading, Mr. J. Stuart moved the recommittal on the grounds that the Bill gave unlimited powers of borrowing to the companies, and made no provision for a sinking fund. Amendment negatived and Bill read a third time after a discussion, in course of which Mr. Cripps, speaking as a member of the committee which considered the Bill, denied that the Bill gave the companies unlimited powers of raising capital, and stated that, in the opinion of the Royal Commission, this was not a case in which a sinking fund should be enforced. The committee of Peers to which the Bill was subsequently referred amended it by omitting the proviso that a [water] company should not be required to carry to a sinking fund a percentage on the amount of money for the time being raised by the issue of debenture stock created under the powers of the measure, and inserting a new clause making provision for a sinking fund in regard to any such debenture stock. On the Bill being returned from the committee to the House of Peers, Lord James of Hereford proposed the omission of the sinking fund clause inserted by the select committee. Lord Ribblesdale, as chairman of the select committee, pointed out that the sinking fund clause had been inserted in every London Water Bill since '86, and now applied to some £9,000,000 of capital. To leave it out of this Bill would create an inconvenient precedent. The motion for the omission of the clause was carried by 51 to 20.

[76] ***Metropolitan Police Act (62 & 63 Vict., ch. 26—r.a. Aug. 9th)** amends the law with respect to the salaries and allowances of the Commissioner, Receiver, and Assistant-Commissioners of the Metropolitan Police. Came into operation Oct. 1st, '99. There is to be paid to the Commissioner of Police of the Metropolis and to the Receiver of the Metropolitan Police District, out of money provided by Parliament, such salaries as the Secretary of State, with the approval of the Treasury, may appoint. There is to be paid to the Assistant Commissioners of Police of the Metropolis

such salaries as the Secretary of State may appoint, and those salaries are to be paid either out of money provided by Parliament or out of the Metropolitan Police Fund, or apportioned between money provided by Parliament and the Metropolitan Police Fund in such manner as the Secretary of State, with the approval of the Treasury, may appoint. But the amount to be paid out of money to be provided by Parliament shall not exceed the sum of £1200 in any one year. The Act is not, except so far as it relates to the funds from which salaries are payable, to apply to any existing officer who within one month of the passing of this Act signifies in writing to the Secretary of State his desire to continue to receive the salary and allowances of which he was in receipt on Jan. 1st, '99, in lieu of the salary appointed under this Act, and is not to affect any salary payable to any existing officer as registrar of anthropometric measurements.

[77] **Metropolitan Streets Act ('67) Amendment Bill.** Replying to Mr. Pickersgill and others (Feb. 16th), the Home Secretary said he had no reason to suppose that the effect of the police action in prohibiting sandwichmen from perambulating the Strand, Piccadilly, and Bond Street had been to throw out of employment a large number of poor men who had no other means of obtaining a livelihood. In regard to cabs (which had been prohibited from "crawling" in the Strand), the instructions to the police were that they should enforce the law against loitering or plying for hire in the streets where this was likely to lead to congestion of the traffic. Mr. T. Healy asked whether the conductors of 'buses would be prevented from plying for hire in the Strand as well as the drivers of cabs. The Home Secretary replied that the present law did not apply to 'buses. He was going to seek some further powers with regard to them. The Home Secretary, in asking leave (Feb. 20th) to introduce a Bill to amend the Metropolitan Streets Act, '67, said the object of the measure was to give the police increased powers of dealing with congested street traffic in London by amending Clause 2 of the Act so as to enable the making of regulations prescribing the routes to be observed by omnibuses and other special kinds of vehicles, and giving discretionary powers to prohibit certain lines of omnibuses using certain streets. The Bill also proposed to amend sects. 11 and 14 of the Act by abolishing the special limit of the Act, and making the general limit applicable to the whole of the Metropolis. Mr. Lough regarded the provisions of the Bill as very disappointing. The Bill was brought in and read a first time. [Withdrawn July 17th.]

[78] **Midwives Bill.** The chief object of this measure was to carry into effect the recommendations of the select committee of the House of Commons relating to the training and practice of midwives by promoting the training of women as midwives, and by providing for the regulation of their practice. Mr. de Tatton Egerton moved second reading in course of a Wednesday sitting (April 12th). Mr. T. P. O'Connor proposed the rejection of the measure. Sir W. Priestley said it was true that the Bill had met with a certain amount of opposition from a section of the medical profession, but in his opinion the dangers of passing it had been greatly exaggerated. The hon. member was speaking at the hour for the adjournment of the debate. [Dropped.]

[79] ***Military Works Act (62 & 63 Vict., ch. 41 —r.a. Aug. 9th)** empowers the Treasury to issue, in addition to the sums authorised by the Act of '97, such further sums not exceeding in the whole £4,000,000 as may be required for military works, the payment or repayment of the money to be spread over a period of years by terminable annuities. The Act provides £1,000,000 for defence works, £2,770,000 for barracks, including completion of large camps, £1,600,000 of this amount being set down for new barracks for infantry and artillery at Salisbury Plain, £40,000 for ranges, including accommodation for manœuvring and mobilisation, and £190,000 for staff and contingencies. As £5,458,000 was provided in the Act of '97, the total provision made by the two Acts is £9,458,000. The Bill was introduced by Mr. Wyndham, who, in his preliminary statement, observed that the complete scheme for large camps and barracks, at home and at foreign stations, was estimated to cost £5,254,000, of which £2,770,000 was taken in the present Bill. From a paper presented to Parliament it appears that the total amount required to complete the War Office scheme is £6,900,000, of which £4,000,000 is provided in the above Act; but, adding to that sum the money provided by the Act of '97, it would seem that the whole estimates, from first to last, work out at £12,358,000.

[80] **Militia Ballot Bill.** The Marquis of Lansdowne, in presenting (July 7th) a bill to amend the law relating to the ballot for the militia in England and Wales, though with no intention of pressing it forward this session, reminded the people of this country of their obligation in case of necessity to some form of compulsory service for the defence of these islands. Under the provisions of the Bill the total number of men wanted would, of course, have to be determined by Parliament; then the lords-lieutenant of the counties, as under the existing law, would put the machinery of the Act into motion, and the preparation of the lists would be left to the overseers. All men from 18 to 35 would be required to serve in the following classes:—(1) Unmarried men above 18 and not more than 25; (2) married men above 18 and not more than 30, having a wife living, but no child; (3) all men liable to the ballot and not included in the previous classes. Each county would be credited with the number of voluntary soldiers it had produced, and then the deficiency would be divided between the different divisions. The exemptions from ballot would be Members of Parliament, all efficient volunteers (but the establishment of the volunteers must be restricted, otherwise there would be a great influx into the volunteers to avoid the ballot), officers and men in Her Majesty's service, members of the police force, seamen and sea-faring men, persons in holy orders, ministers of religion, and duly-qualified medical practitioners. Substitutes would not be allowed, and no one would be able to escape service by a nominal penalty or fine. He insisted upon this—that the present Bill did not involve any fundamental alteration in the present militia law, but would simply have the effect of bringing that law into harmony with present conditions. He had always believed that at a crisis a larger number of men than could be made use of would voluntarily flock to our standard, and that this Bill would only be enforced in a remote contingency. The Earl of Wemyss expressed his satisfaction

at the introduction of the Bill, which he hoped before long would become law. The Bill was then read a first time (=). The Marquis of Lansdowne informed Lord Braye (July 10th) that if under the Army Order of May '99 a militia unit were registered as available for special service on not less than 75 per cent. of the total number of officers and men present at the training voluntarily agreeing to accept that liability, none of the men who did not accept liability would be held to have assumed liability.

[81] ***Money-Lending Bill.** Lord James of Hereford, in presenting (Feb. 20th) the Government Bill dealing with money-lending, said the report of the committee of the House of Commons on this subject (see 1899 edition, SESSION, sect. 105) disclosed great evils, and suggested certain remedies. The principal finding of the committee was that they unhesitatingly came to the conclusion that the system of money-lending by professional money-lenders at high rates of interest was productive of crime, bankruptcy, unfair advantage over other creditors of the borrower, extortion from the borrower's family and friends, and other serious injuries to the community. Her Majesty's Government had come to the conclusion that this report was well founded, and they felt that it was their duty to attempt to deal with the evils by practical legislation. The Bill proposed that every person who carried on the business of a money-lender should be registered. The question arose as to what was a money-lender, and the greatest difficulty had been found in finding a definition. It was proposed that "the term money lender shall include every person who carries on the business of money-lending or advertises or announces himself or holds himself out in any way as carrying on that business, but shall not include any pawnbroker or banker or other person carrying on a commercial or general financial business, in the course of, and for the purpose of which, he may lend money." The object was to protect the legitimate lenders of money, and the Government would be glad to receive any suggestions with that end in view. Having registered these gentlemen, the Government proposed that they should trade under one name only, that they should take security in their own name only, and that the security should bear on the face of it the real name of the lender. The Bill also provided that every security should be given in writing, and contain on its face the entire contract with the money-lender, and that a copy of such contract should be given to the borrower. Where the interest charged in respect of a loan exceeded the rate of 10 per cent., or the amount charged for expenses, inquiries, bonuses, renewals, etc., was excessive, the court might re-open the transaction and take an account as between the money-lender and the person sued, and might, notwithstanding that a statement of account had been settled, reopen such settled accounts and find a fair amount, having regard to the risks and circumstances of the case. Power was also given to registrars in bankruptcy to fix the amount for which the claim of a money-lender might be admitted. Bill read a second time, after discussion, March 16th. In committee (May 1st) Lord James said he had, by certain amendments placed on the paper, endeavoured to meet the

views expressed by the Writers to the Signet, and the Incorporated Law Society. He proposed to exclude from the operation of the Bill loan societies, building societies, and societies which lent money to their own members. He had endeavoured to alter the definition of those who would come within the term of money-lenders, so that bankers, insurance companies, solicitors, and all who did not make the lending of money their primary object, should be exempted from the operation of the Bill. He had endeavoured to narrow the application of the Bill to those persons who notoriously carried on their business under conditions which were injurious to the public welfare. In Clause 2, which enabled the Court to review the transactions of money-lenders when the interest charged exceeded 10 per cent., he proposed to omit the words "10 per cent." and to insert a schedule providing that the rate of interest on sums not exceeding 40s. should be 25 per cent., exceeding 40s., but not exceeding £10, 20 per cent., and exceeding £10 15 per cent. He proposed to make a money-lender's non-registration the subject of penalty only to the man who ought to have registered, so that an innocent assignee and holder of security for value would be protected. Bill read a third time, and sent to Commons, where it was withdrawn.

Music or Dancing, Use of Baths for (see sect. 40).

National Telephone Company (see sect. 107).

[82] ***Naval Works Act** (62 & 63 Vict., ch. 42—r.a. Aug. 9th) makes provision for the expenditure to be incurred during the financial years '99-1900 and 19 0-1 on the works authorised by the Acts of '95, '96, and '97, though certain new works are added for the first time. There is actually to be issued under the Act £3,100,000. The total estimated cost of all the naval works under the successive Acts is now £23,636,922. Of this £2,368,068 was expended to end of March '98, and it was estimated that £1,227,252 would be expended to end of March '99, the estimated expenditure for the two financial years 1899-1901 being £4,010,000. Mr. Austen Chamberlain, in moving second reading of the Bill (July 25th), said during the past year the progress made with the works had been satisfactory, and narrated in some detail what had been accomplished in connection with various improvements. The proposed expenditure on the new works, included in the Bill for the first time, amounted to something over £6,000,000, in addition to that which had already been provided for. The expenditure was divided into two classes, the first consisting of additions to existing estimates for hospitals and barracks, and the second being connected with the provision of five new docks. A great expansion of the fleet needed a corresponding extension of dock accommodation. In committee on the measure, Mr. E. Robertson moved an amendment with the object of insuring that this scheme of naval works should be carried out under annual Bills, according to the original intention of the programme, instead of under biennial Bills. He therefore moved a reduced amount in substitution for the sum in the Bill. Though the lower figure would not, he said, unduly limit the powers of expenditure of the Admiralty during the year, it would compel them to come to Parliament for renewed authority in the next financial year. Mr. Austen

Chamberlain said experience had shown that an annual Bill was not the most convenient arrangement from the administrative point of view. The amendment was rejected by 168 to 95. Mr. Lloyd-George moved to omit the first clause as a protest against this expenditure, but the clause was carried by 159 to 48.

Niger Company (see "Royal Niger Company").

[83] **Old Age Pensions.** There were introduced in the Commons an Old Age Pensions Bill (by Sir F. Flannery), Old Age Pensions No. 2 (Sir J. Rankin), Old Age Pensions No. 3 (Mr. Bousfield), Old Age Pensions (Friendly Societies) (Mr. Strachey), Old Age Provident Pensions (Mr. Bartley), Outdoor Provident Relief (Mr. Bartley), Pensions (Old Age) (Mr. H. Whiteley), Pensions (Old Age), No. 2 (Sir W. Foster). The only one of these which came on for discussion, and that late on a Wednesday afternoon (March 22nd), was the first mentioned, which was backed by Mr. L. Hardy, Sir J. Rankin, Mr. L. Holland, Mr. E. Flower, Mr. Bousfield, Mr. Carlile, and Mr. Rothschild. Mr. L. Holland, in proposing second reading, said that generally speaking its object was that a person who had from the age of twenty-five contributed to the funds of a friendly society for sick pay and funeral expenses should be entitled to a pension of 5s. a week on arriving at the age of sixty-five. Mr. Chamberlain said the Government entirely accepted the principle of the measure, though there were objections to it in detail, and omissions which would have to be supplied before it could become a practical measure. They would have been very glad to send it to a committee, but they could hardly hope to get the second reading that day, therefore they intended immediately after Easter to propose the appointment of a select committee, to which the whole subject would be referred. The debate stood adjourned at the usual hour. The committee was duly appointed (see "Aged Deserving Poor," sect. 115; and in connection with the same subject, "Cottage Homes," sects. 50 and 116).

[84] ***Oysters Bill.** Lord Harris presented a bill for the protection of public health against dangers arising from the consumption of unwholesome oysters, and in moving second reading (May 18th) explained that it was meant to be another step in the legislative process, as seen in the Contagious Diseases (Animals) Act and other measures, for securing more sanitary surroundings for creatures designed for the food of man. The cause which rendered this Bill necessary was primarily the grave suspicion attaching to the oyster, where raised in contaminated waters, as a means of communicating typhoid and enteric fever and cholera. The Bill empowered any county council to send their officer to oyster layers on the coasts within their jurisdiction for the purpose of sampling the water. If on his representations the council considered that the water was in an insanitary condition, or likely to become so because of its surroundings, then they might prohibit the removal of oysters from the layers for ten days. They had to give ten days' notice to the owner of the layer before they prohibited the removal. During that period he could appeal to the Local Government Board, and the Board could go into the merits of the question. Another clause gave the Local Government Board power to act if any county council failed to carry out

their powers. A further clause gave powers to her Majesty in Council to prohibit the importation of oysters from any reasonably suspected place. Bill read a second time and referred to a select committee, of which Lord Harris was chosen chairman, and which, after hearing evidence, reported the Bill with amendments, one of which threw the duty of inspection of oyster layings, etc., on the sea fisheries district's committees, instead of on the councils of counties and boroughs. The Bill, Lord Harris afterwards stated in the House (July 31st), went back to the Local Government Board for consideration, and on consultation with the Board of Trade, which is concerned with fisheries, the latter advised, as did also the Irish Office, that the change was impracticable. Lord Harris at first proposed to move to restore the Bill to its former shape, but having regard to the lateness of the session the President of the Local Government Board decided not to proceed further with it.

[85] ***Parish Churches (Scotland) Bill.** Presented by Lord Balfour of Burleigh, and proposed to confer additional powers on the Court of Teinds in Scotland with reference to the alteration of the sites of parish churches, and of the districts attached, and with reference to collegiate charges. Passed Lords with some amendments, and sent to Commons, where it was withdrawn (July 17th).

[86] **Parish Councillors (Tenure of Office) Act** (62 & 63 Vict., ch. 10—r.a. June 20th) was introduced by Mr. Lambert, and by repealing as from Jan. 1st, 1900, subsects. 3, 4, and 7 of sect. 3 of the Local Government Act, '94, enables parish councillors to hold office for three years. On April 15th, 1901, and on the same day in every third year then following, parish councillors are to go out of office, and their places are to be filled by the newly-elected councillors. The parish council is required in every year, on or within seven days of April 15th, to hold an annual meeting. [E.]

[87] **Partridge Shooting (Ireland) Act, '99** (62 Vict. ch. 1—r.a. March 27th) changes the date of the season for partridge shooting in Ireland from Sept. 20th—Jan. 10th to Sept. 1st—Feb. 1st.

[88] ***Patriotic Fund Act** (62 & 63 Vict., ch. 45—r.a. Aug. 9th) enacts that the surplus of the Patriotic Fund, and all other funds referred to in sect. 4 of the Patriotic Fund Act, '81, and the contributions referred to in sect. 3 of the Patriotic Fund Act, '86, and any other funds which are after the commencement of this Act placed under the administration of the Commissioners of the Patriotic Fund, shall, if and so far as any supplemental commission so directs, and without prejudice to any existing powers of the Commissioners, be applicable for the benefit not only of widows and children, but of other dependants of officers and men of her Majesty's military and naval forces. [U.K.]

[89] **Petroleum Bill**, introduced by Mr. Reckitt, and backed by Mr. Ure, Mr. Compton Rickett, Viscount Chelsea, Mr. John Burns, and other members, the purpose of the measure being to raise the flash point from 73° to 100°. Mr. Reckitt moved second reading (March 15th) and Mr. Alexander Cross seconded the motion. Mr. Kimber proposed the rejection of the Bill. Mr. Jesse Collings, in opposing the measure on behalf of the Government, said the ministerial Bill was now in a forward state. They could not deal with the question in a Bill of one clause,

but he was sanguine that they would be able to introduce a Bill which would settle it. The measure would deal with most of the recommendations of the committee. One of those recommendations was passed by a bare majority, and this was the one dealt with in the present proposal. The Bill was rejected by 244 to 159. (The ministerial measure was not brought in.)

[90] **Poor Law Act (62 & 63 Vict., ch. 37—r.a. Aug. 9th)** amends sect. 1 of the Poor Law Act, '89, and sect. 4 of the Pauper Inmates Discharge and Regulation Act, '71. With regard to the former point the new Act prescribes that "where a child is maintained by the guardians of a poor law union and (i.) the child has been deserted by its parent; or (ii.) the guardians are of opinion that by reason of mental deficiency, or of vicious habits or mode of life, a parent of the child is unfit to have the control of it; or (iii.) a parent is unable to perform his or her parental duties by reason of being under sentence of penal servitude or of being detained under the Inebriates Act, '98; or (iv.) a parent of the child has been sentenced to imprisonment in respect of any offence against any of his or her children; or (v.) a parent of the child is permanently bedridden or disabled, and is the inmate of a workhouse, and consents to the resolution hereinafter mentioned; or (vi.) both the parents, or in the case of an illegitimate child the mother of the child, are or is dead; the guardians may at any time resolve that until the child reaches the age of eighteen years all the rights and powers of such parent as aforesaid, or, if both parents are dead, of the parents, in respect of the child shall, subject as in this Act mentioned, vest in the guardians, and thereupon those rights and powers shall so vest accordingly, and shall continue so vested whether the child does or does not continue to be maintained by the guardians. Provided that the guardians may rescind the resolution if they think that it will be for the benefit of the child that it should be rescinded, or may permit the child to be, either permanently or temporarily, under the control of the parent, or of any other relative, or of any friend, or of any society or institution for the care of children. A court of summary jurisdiction, if satisfied on complaint made by a parent or if there is no parent by the guardian of a child that there was no ground for the resolution, or that it is for the benefit of the child that it should be either permanently or temporarily under the control of its parents or guardian, or that the resolution of the guardians should be determined, may make an order accordingly, and the guardians shall comply with any such order, and if the order determines the resolution, the resolution shall be thereby determined as from the date of the order, and the guardians shall cease to have the rights and powers of the parent as respects the child." The Act imposes a penalty on persons assisting any such children to escape from the control of the guardians, etc. In the case of any child who is deemed to be maintained by guardians within the meaning of subsect. 3 of sect. 1 of the Poor Law Act, '89, and who is with their consent adopted by any person, the guardians shall for three years after adoption cause the child to be visited at least twice in each year by some competent person appointed by them for the purpose. The guardians may at any time during such period revoke consent to the adoption, and thereupon the child shall

be forthwith returned to them. The Pauper Inmates, etc., Act of '71 is amended by extending the powers to detain paupers from 72 hours, if a pauper has "in the opinion of the guardians discharged himself frequently without sufficient reason," to 168 hours. [E. and L.]

[91] **Prevention of Corruption Bill.** Lord Russell of Killowen (April 20th) called attention to the subject of illicit secret commissions, and presented a Bill entitled "An Act to Check Corruption." His lordship referred to a report of the London Chamber of Commerce, whose efforts in the matter he characterised as worthy of all praise, and stated that the special committee of that body arrived at certain conclusions to the effect that secret commissions in various forms were prevalent in almost all trades and professions; that in some cases the practice had increased and was increasing, and was producing grave evil alike to the morals of the community commercially and to the profits of honest tradesmen; and that the practice was rendered more oppressive by combination between blackmailers. The committee, although recognising the difficulty of dealing with the matter by legislation, urged the necessity of adopting legislative measures. Lord Russell mentioned a series of cases noted in the report of the special committee, and also drew upon his own professional experience for a striking instance of the practice, and went on to say that what Parliament was asked to do by the Bill was to extend to transactions of the kind he had been describing a principle already on the Statute Book in the case of public bodies, which made the giving of bribes to employees or officials of those public bodies a criminal offence. The object of the Bill, in short, was to check, by making them criminal, a large number of inequitable and secret payments which tended to shake confidence between man and man, and to discourage honest trade and enterprise. In the first place the Bill declared that certain specific transactions were corrupt unless the contrary could be shown. But what went to the root of the matter was that the receipt of these commissions created a conflict between interest and duty. There were of course other cases in which advice was given from A to B to deal with C, and C paid A without the knowledge of B. In the case of doctors, undertakers, brokers, and solicitors, and in certain other cases as well, it might be the practice was so universal and so well-known that all parties assented to it without demur. Another clause of the Bill was aimed at the prevention of giving false receipts, which were the results of making deductions in lieu of bribes. A further provision had regard to the enormous difficulty of getting evidence in cases of this kind. It was accordingly provided that although a witness might give answers tending to criminate himself, it would be in the discretion of the judge to grant him a certificate of indemnity. Another question was, should the provisions of this Bill be enforceable by any person? He had come to the conclusion that, as in the case of the Act of '89, it should be enforced with the preliminary fiat of the Attorney-General. He believed that one of the most important effects of the Bill if it became law would be that many men would be glad to have it as an answer when demands were made upon them by blackmailers. In moving second reading (June 6th) Lord Russell said the Bill had been widely discussed in the

Press and by chambers of commerce, trading associations and co-operative societies. Those bodies had not merely discussed the principle but the Bill itself, which he had circulated freely, and there was a unanimous opinion in favour of the principle of the Bill, and of a stringent application of the principle. He did not say that all the details of the Bill were assented to, but a great majority of the authorities he had alluded to expressed a general approval, and reasonable alterations could be made in committee when they were found necessary. The Lord Chancellor said that, though there were provisions in the Bill which might be misunderstood and might work injustice, the Government heartily concurred in its general object. Second reading agreed to. Several amendments made in the standing committee (=).

[92] ***Private Legislation Procedure (Scotland) Act** (62 & 63 Vict., ch. 47—r.a. Aug. 9th) is a measure "to provide for improving and extending the procedure for obtaining parliamentary powers by way of provisional orders in matters relating to Scotland." When any public authority or any persons desire to obtain such parliamentary powers they are to petition the Secretary for Scotland praying him to issue a provisional order in accordance with the terms of a draft order submitted to him, or with such modifications as shall be necessary. The application is to be previously advertised, and due notice is to be given to those affected by the scheme. The chairmen of the two Houses of Parliament are, if the two Houses think fit to so order, to report upon the provisional order, and if they report that the matter ought to be dealt with by private Bill, the Secretary for Scotland is to refuse to issue the provisional order. There are to be formed an extra-parliamentary panel and parliamentary panels of members of each House, and from both or one of the latter two panels, or if the chairmen shall be unable to appoint from them, then from the extra-parliamentary panel, the commissioners who are to inquire locally into the scheme are to be chosen. Should their decision be adverse to the order, that would veto it; should they not report against it the Secretary for Scotland may issue the order as prayed, or with modifications. All orders so issued require confirmation by Parliament, and if opposed are to be considered by a joint committee of the two Houses. The Lord Advocate, in introducing the Bill, said the Government felt that the key to the situation lay in the fact that legislation of this kind must be capable of extension to other parts of the United Kingdom, and repeated this statement on an instruction proposed on the committee stage, though he did not think the time for that extension had yet arrived. In committee the Lord Advocate made a concession by inserting the provision that in every case of a provisional order there should be a confirmation Bill. The Act is to commence to have effect from and after the end of the ordinary session of 1900.

[93] **Public Health Acts Amendment Bill**, introduced by Sir Alfred Hickman, and backed by Sir Walter Foster, among others. In an explanatory memorandum attached to the Bill there is quoted the reiterated suggestion of the Police and Sanitary Committee (see sect. 122), "whether the time has not arrived for the inclusion in a public Bill of many of the clauses which are so frequently introduced into private

Bills, and which have almost invariably been accepted by Parliament. It appears to your committee that much trouble and expense might be saved if the necessity for application to Parliament for such powers by individual authorities were rendered unnecessary." The object of this Bill, framed upon the principle of the Public Health Acts Amendment Act, 90, and to be read as one with that Act, is to enable local authorities, by following the mode of procedure of that Act, to adopt the benefit of many clauses which, having been introduced in private Bills of recent years, have been accepted by Parliament. The clauses selected for embodiment in the Bill relate chiefly to sanitary powers, parks and recreation grounds, streets and buildings, street traffic, street advertisements, and common lodging-houses. Bill read second time and referred to select committee of which Mr. T. W. Russell was appointed chairman. Committee took evidence and reported (June 28th) that it had been established before them that many of the powers of the Bill might with advantage be given by a general statute which might be adopted by local authorities, and that other clauses further amending the Public Health Acts might with equal advantage be embodied in such statute. They were, however, of opinion that the proposals of the Bill were of such magnitude and complexity that they should only be accepted in a measure more complete than that referred to them. They were, therefore, not prepared to advise parliamentary sanction being given to it. They recommended that the subject, considering its great importance, should have the consideration of the Government with the view to the introduction by them of a Bill at the earliest possible date in the next session of Parliament. They were of opinion that the provisions of the law relating to public health ought to be speedily consolidated.

[94] **Public Libraries (Scotland) Act** (62 Vict., ch. 5—r.a. June 6th) provides that where the Public Libraries Act has been adopted for any two or more neighbouring burghs or parishes, the magistrates and council or board, as the case may be, of each such burgh or parish may, by agreement, combine for any period in carrying the said Act into execution. Was introduced by Sir Robert Reid.

[95] ***Public Works Loans Act** (62 & 63 Vict., ch. 31—r.a. Aug. 9th) provides that for the purpose of local loans there may be issued by the Public Works Loan Commissioners any sum or sums not exceeding in the whole the sum of £7,000,000; and by the Commissioners of Public Works in Ireland any sum or sums not exceeding in the whole £800,000.

[96] **Rating of Machinery Bill**, to amend the law relating to the rating of hereditaments containing machinery, brought in by Mr. Strachey, and backed by Sir W. Houldsworth and others. Sir W. Houldsworth was moving the second reading on Wednesday, May 17th (the day on which the Queen laid the foundation stone of the new Victoria and Albert Museum, South Kensington), when, according to the official record, "notice being taken at half-past twelve that 40 members were not present, the House was told by Mr. Speaker, and 24 members only being present, Mr. Speaker retired from the chair until four of the clock, when the House was again told by Mr. Speaker, and 34 members only being pre-

sent, the House was adjourned by Mr. Speaker without a question first put." [Dropped.]

[97] **Reformatory Schools Act** (62 & 63 Vict., ch. 12—r.a. July 13th) was presented by Lord Leigh. Under the Reformatory Schools Act, '93, a court was empowered to order that, in certain cases therein stated, a youthful offender shall be sent to a reformatory school. The scheme of this Act is, that where a court orders a youthful offender to be sent to a reformatory school, that offender shall not in the first instance be sent to a prison, but direct to the reformatory. [E. & S., ?1.]

[98] ***Regulation of Railways Bill.** Mr. Maddison moved (Feb. 20th), on the Address, an amendment representing the urgent need of extending the powers of the Board of Trade in order to establish efficient inspection of the working of the railways of the United Kingdom, and of the introduction of a Bill for the greater safety of the men engaged in shunting operations. The amendment was seconded by Mr. Schwann. Mr. Ritchie announced that he had drafted a Bill dealing not only with automatic couplings but also with hand-brakes on waggons. The amendment was withdrawn. Mr. Ritchie, in introducing the Regulation of Railways Bill (Feb. 27th), said the measure was brought in for the purpose of devising some means by which, if possible, the number of accidents which happen to railway servants in the performance of their duties could be reduced. It was proposed to give the Board of Trade, at the end of five years, power to call upon the railway companies to supply the whole of their rolling stock with automatic couplings. No company would, after the expiration of that time, be allowed to draw any truck, whether belonging to a private owner or not, which had not automatic couplings. After two years the Board could also order steam-brakes to be put on all engines. Hand-brakes should also be supplied to both sides of the trucks, so as to render it unnecessary for a man to go from one side of the truck to the other. The same provision was also to be made with regard to the labelling of trucks. After the expiry of two years all trucks should be provided with labels on both sides. The Bill also made provision that in two years communication between passenger and guard should be applied to all trains, however shortly they ran. The Bill also contained a provision under which any railway company ordered to provide any appliances or execute any works under the Act, which would be properly chargeable to capital account, should be able to meet the expenses by the issue of debenture stock. Bill read a first time. Mr. Ritchie informed Mr. Coghill (March 27th) that it was clear from the opposition which had been evinced to it, that it was impossible to pass the Bill into law this session, having regard to the other business before the House. He proposed, however, to proceed with an inquiry into the question without delay. What form this inquiry should take was now under his consideration. It was very desirable, if possible, that the tribunal to which the inquiry was referred should be one acceptable to all parties concerned. Mr. Ritchie informed Mr. Bryce (April 27th) that a Royal Commission would be at once appointed to make inquiries into the causes of accidents to servants of railway companies and private truck-owners, and the possibility of reducing the number of casualties. The Royal Commis-

sion ("Accidents to Railway Servants") was duly appointed. Bill withdrawn June 19th.

[99] ***Reserve Forces Act** (62 & 63 Vict., ch. 40—r.a. Aug. 9th) enacts that where a soldier of the regular forces, when entitled to be transferred to the reserve, is serving out of the United Kingdom, he may, at his own request, be transferred to the reserve without being required to return to the United Kingdom, but subject to such conditions as to residence, as to liability to be called out for annual training or on permanent service or in aid of the civil power, or as to any other matters, as may be prescribed by regulations under sect. 20 of the Reserve Forces Act, '82.

[100] ***Royal Niger Company Act** (62 & 63 Vict., ch. 43—r.a. Aug. 9th). The preamble of the Bill recites that the National African Company, Ltd. (now called the Royal Niger Company) was, by a charter dated July 10th, 1886, incorporated with power among other things to make treaties and to administer territories. It was proposed to transfer to the Crown the administrative powers of the said company, and the benefit of the treaties made by the company, and the land, property, and mining and other rights acquired by the company, but to reserve to them, subject to certain exceptions, their plant and trade assets and their stations, buildings, wharves, and workshops, and the sites thereof, and to revoke the charter of the company, and to make certain payments in consideration of the said transfer, and for meeting liabilities attaching to the territories administered by the company; and the Bill accordingly made provision for the payments so to be made. The Act empowers the Treasury to issue out of the Consolidated Fund such sums not exceeding in the whole the sum of £865,000 as may be required for making the said payments. The Treasury may, for the purposes of the Act, borrow to the extent of £820,000 by means of terminable annuities for a period not exceeding 30 years, the annuities to be paid out of the money annually provided by Parliament for the foreign and colonial services. Until the money issued out of the Consolidated Fund has been wholly repaid to the Exchequer all receipts from the territories administered by the company at the passing of the Act in excess of the necessary expenses of administration are to be paid into the Exchequer, save so far as those sums are, with the approval of the Treasury, applied towards the development and improvement of the territories in question. In explaining the provisions of the Bill, on the preliminary money resolution, the Chancellor of the Exchequer (July 3rd) said the Niger Company as a trading company had been successful; it had extended its protectorate over an area of 600,000 sq. miles, containing a population of 30,000,000; it had put down slave-raiding and massacring over a great area of territory; had abolished the legal status of slavery, and checked the trade in spirits with the natives. The real ground which justified the proposed change had been the circumstances which had occurred in that region between France and this country. They were all glad that the strained relations that arose between the two Governments had been put an end to by the treaty ratified by the French Government. Under this Act the company would be reduced to the position solely of a trading company. The Government proposed to redeem a debenture debt of £250,000, which

had been raised on the grant of customs dues to the company, by paying £300,000 for it at once, and to pay them for unexhausted improvements £300,000 more; to pay the company for its land and mineral rights, and also by way of compensation for the dislocation of its business, £150,000; and £115,000 was to be paid for the buildings, steamers, war material, etc., which were to be taken over, making a total of £865,000, of which £820,000 was to be raised by loan, the remainder being charged on the revenue of the year. Mr. Labouchere thought the sum to be paid was too large. The resolution was, after further discussion, carried by 223 to 101. Mr. Chamberlain explained (July 6th), in reference to a statement in certain newspapers, that his total investment in the Royal Niger Company was less than £3000, that when the question of a possible revocation of the charter came before the Government he informed the Prime Minister and his colleagues that he had some interest in the company, and begged to be excused offering any opinion whatever on the transaction, or taking any part whatever in any negotiations which might subsequently take place. Accordingly these negotiations had been entirely in the hands of the Chancellor of the Exchequer. He voted on the preliminary resolution on the 3rd inst. in the belief that it was merely a formal proceeding intended to introduce the matter to the consideration of the House. On second reading Mr. Chamberlain said it was intended that, after the negotiations had been completed, three Governments should be formed—the Government of Lagos, the Government of Southern Nigeria (which would include the lower portion of the Niger Company's territory and the whole of the Niger Coast Protectorate), and the Government of Northern Nigeria. The present Governments of the Niger Coast Protectorate and Lagos would remain to administer these territories, and it was proposed to appoint Col. Lugard to be Governor of Northern Nigeria. At the same time, the whole of the customs for the three districts would be rendered identical, and no customs barrier would exist between the coast district of Northern Nigeria. The receipts from the customs would be pooled and divided from time to time in proper proportions between the three administrations. It was true that in the first instance there would be a deficit upon the total revenue and expenditure of the three Governments. He did not think it would be large even at first, and they had every reason to hope that with the increase of trade that deficit would disappear. At the present moment the returns from Lagos and the Niger Coast Protectorate were very satisfactory, and the trade there was rapidly increasing. It was intended that the duty on spirits should be, as in fact it had recently been made, identical over the coast district; and, so far as Northern Nigeria was concerned, the sale of spirits would be absolutely prohibited. Second reading was agreed to. In committee (July 26th) Mr. Dillon moved to insert £400,000 in place of the sum of £865,000 in the Bill; but the amendment was rejected by 143 to 57. The Bill passed through committee without amendment, and third reading was (July 27th) carried by 181 to 81. On July 31st a supplementary estimate for the year '99-1900 to the amount of £75,000 was passed as a grant in aid of the local revenues of the Niger Territories, to meet expenses of ad-

ministration, to pay interest on the public debt of the Territories pending its redemption, and to provide for new buildings and new vessels and equipments which are required in addition to those to be purchased from the Royal Niger Company.

[101] *Sale of Food and Drugs Act, '99 (62 & 63 Vict., ch. 51—r.a. Aug. 9th—commences Jan. 1st, 1900), is an amending Act, and deals chiefly with agricultural products. For this reason it was placed in charge of Mr. Walter Long, the Minister for Agriculture, instead of in the hands of the President of the Local Government Board, which previously was the authority that administered the Sale of Food and Drugs Act of '75. In moving the second reading of the Bill, on March 6th, Mr. Walter Long declared that its provisions were based on the report of the select committee in '96. Among its special provisions was a power to take samples at the port of entry of imported articles of dairy produce, such as cheese, butter, and milk, so that, instead of taking samples from the retailers, proceedings might be taken against the adulterator through the importer. The administration of the old Acts would be strengthened by the assistance of the Board of Agriculture, and by introducing a uniformity of administration that was not now experienced. It was proposed to limit the amount of butter in margarine to 10 per cent., but it was not proposed to interfere with the colouring of margarine as recommended by the select committee. The provisions of the Margarine Act were extended to margarine cheese, and additional restrictions were placed on the manufacture of margarine products. The penalties for offences under the Acts were proposed to be increased, and it was proposed that a warranty or invoice should not be available as a defence unless the defendant had, within seven days after the receipt from the purchaser of notice of his intention to take proceedings, sent to the purchaser a written notice stating that he intended to rely on the warranty or invoice, and specifying the name and address of the person from whom he received it. It was also proposed that a warranty or invoice given by a person resident outside the United Kingdom should not be available as a defence to any proceeding under the Sale of Food and Drugs Acts, unless the defendant proved that he had taken reasonable steps to ascertain the accuracy of the statement contained in the warranty or invoice. The Bill went before the Standing Committee on Trade on Feb. 28th. Mr. Strachey moved an amendment to prohibit the colouring of margarine to resemble butter, and was defeated by 32 to 11; and an attempt by Mr. Heywood Johnstone to procure the fixing of a statutory limit to the quantity of fusel oil in whisky was negatived. Mr. Hobbouse, however, carried against the Government, by 21 votes to 17, an amendment providing that "any officer of the Board of Agriculture shall have power to enter at all reasonable times any manufactory of margarine and margarine cheese, and to inspect any process of manufacture therein, and to take samples for analysis." Mr. Long, under pressure, increased the maximum penalty for selling condensed, separated, or skimmed milk not labelled as such, from £2 to £10. Mr. R. G. Webster also carried against the Government, by 20 votes to 16, an amendment declaring that "for the purpose of

sect. 25 of the Sale of Food and Drugs Act, 1875, an invoice shall be deemed a warranty without the addition of express words of guarantee," this amendment prefacing the provision in the Bill already quoted above. On the motion of Mr. Bartley, a new clause defining "food" was added, as follows: "For the purposes of the Sale of Food and Drugs Act the expression 'food' shall include every article used for food or drink by man, other than drugs or water, and any article which ordinarily enters into or is used in the composition or preparation of human food; and shall also include flavouring matters and condiments. The definition of 'food' contained in sect. 2 of the Sale of Food and Drugs Act, 1875, is hereby repealed." Mr. Kearley moved a new clause dealing with cases of obstruction to an officer in discharging his duties, which was accepted, as follows: "Any person who wilfully obstructs or impedes any inspector or other officer in the course of his duties under the Sale of Food and Drugs Acts, or by any gratuity, bribe, promise, or other inducement, prevents, or attempts to prevent, the due execution by such inspector or officer of his duty under those Acts, shall be liable, on summary conviction, for the first offence to a fine not exceeding £20, for the second offence to a fine not exceeding £50, and for any subsequent offence to a fine not exceeding £100." On the report stage, on July 17th, a protest was made by some members of the committee that Mr. Long had not accepted necessary amendments, and a good many of those moved in the committee were brought up again; but, beyond a concession in the shape of a provision including adulterated or impoverished milk among the penalised articles, Mr. Long resisted all attempts at amendment. The Bill was read a third time on July 20th.

The Act as finally passed prohibits (sect. 1) the importation of margarine or margarine cheese, except in cases conspicuously marked; adulterated or impoverished butter, milk, or cream, except in packages or cases indicating how the article has been treated; condensed, separated, or skimmed milk, except in tins inscribed "machine-made skimmed milk," or "skimmed milk," as the case may require; or any adulterated or impoverished article of food unless in a package or case with a name and description of the true contents. The maximum penalties for contravention are—first offence, £20; second, £50; third or subsequent, £100. Power is given by sect. 2 to the Local Government Board or the Board of Agriculture to direct an inspector of either Board to procure samples. Under sect. 3 it is competent for either Board to put the Acts in force in any case where a local authority neglects to employ the Acts by appointing a public analyst and by taking samples. There are more stringent regulations to be observed by the manufacturers of, and wholesale dealers in, margarine and margarine cheese; for the proper labelling of mixtures; the taking of samples in course of delivery, and extra penalties. Imprisonment for not more than three months is added to the penalty of a fine where the offence was committed through the personal act, default, or culpable negligence of the person accused (sect. 17); there are provisions as to the time for proceeding, regulation as to summons, and as to the use of the warranty (see above); and it is provided that

a certificate of analysis by a public analyst shall be accepted as evidence without the analyst's attendance. Comes into operation Jan. 1st, 1900. [U.K.]

[102] **Seats for Shop Assistants.** A Bill to provide for seats being supplied for the use of shop assistants in Scotland was introduced by Mr. Souttar, and backed by Sir J. Leng, among others. It passed its several stages in the Commons, with some amendments, being read a third time April 26th. On second reading in the Lords (May 4th), Lord Shand proposed the rejection of the measure, and the Marquis of Salisbury objected that the measure introduced an entirely new field of legislation. In such matters as facilities for standing up and sitting down they had hitherto trusted to the instincts of humanity. But if they were to say when people ought to sit down, and that proper opportunities were to be provided for sitting room, he did not see any logical reason why they should confine that to warehouses and shops. Why should they not extend it to every housemaid in every household, so that she might sit down in comfort? To carry out this Bill an army of inspectors would be required. He looked, for the only safe and effective cure for such evils, to the gradual working of civilised opinion, which is carrying the work of philanthropy to the hearts of everybody. The Bill was rejected without a division. Sir J. Lubbock had meanwhile (May 2nd) introduced a similar measure in respect of England and Ireland; this was read a second time May 31st, and a third time June 9th. When it reached the Upper House, the Duke of Westminster took charge of it. Lord Shand opposed this measure also, characterising it as grandmotherly legislation. The Marquis of Salisbury urged the noble duke to withdraw the Bill until next session, when the Government would institute a thorough and searching inquiry into the matter. The Earl of Kimberley hoped the question would not be shelved for another year. Second reading was carried by 73 to 28. Among the supporters of the measure were the Bishops of Winchester and Ripon. An instruction of Lord Ribblesdale empowering the committee on the Bill to extend its scope to Scotland was agreed to (July 13th), and the Bill amended accordingly. Some other amendments were also made. As the **Seats for Shop Assistants Act** (62 & 63 Vict., ch. 21), the Bill received royal assent Aug. 9th. It comes into force Jan. 1st, 1900, and is to be read and construed as one with the Shop Hours Acts; and it enacts that "in all rooms of a shop, or other premises where goods are actually retailed to the public, and where female assistants are employed for the retailing of goods to the public, the employer carrying on business in such premises shall provide seats behind the counter, or in such other position as may be suitable for the purpose, and such seats shall be in the proportion of not less than one seat to every three female assistants employed in each room." Any person failing to comply with the provisions of the Act shall be liable, on summary conviction, for a first offence to a fine not exceeding £3, and for a second or subsequent offence to a fine not less than £1 and not exceeding £5. [U.K.]

[103] **Service Franchise Bill,** to amend the service franchise, was brought forward by Sir Blundell Maple, Mr. Banbury, Mr. Marks, and

others, to so alter the law as to prevent persons being deprived of the franchise by reason of the restricted interpretation put on certain provisions of the Representation of the People Acts in some recent decisions of the court. The measure had special reference to the occupation of cubicles. On second reading (March 8th), Sir C. Dilke moved an amendment declaring "that this House refuses to add to the complexity of our present franchise system, which, in its opinion, can be remedied only by the adoption of a single simple and uniform franchise." He gave the most unqualified denial to the statement that the decision of '96 affected the majority of the police of this country. As a matter of fact, not a single policeman in his own constituency had been affected by that decision, and he did not think his division was peculiar. He considered that Sir Blundell Maple was mistaken in believing that any person who was under a restriction was deprived of his vote. The Solicitor-General suggested that the House should agree to the second reading of the Bill, which restored to a number of people a privilege which for a great many years they enjoyed—and, as they believed, rightfully—and which did not in any way deter subsequent reform. The amendment was rejected by 188 to 88, second reading being then agreed to. In committee on the Bill (June 7th) Mr. M'Kenna moved an amendment with the object of insuring that the fact of an employer living on his business premises should not disqualify his assistants from voting. The amendment was carried by 58 to 40, and the Bill passed through committee. On the report stage (June 14th) the previous decision was reversed by 171 to 154, words being re-inserted, on the motion of Sir Blundell Maple, restricting the operation of the Bill to persons living in a house which was not occupied by any person under whom such man served in such office, service, or employment. In the absence of further time or facilities the report stage was not concluded (=).

[104] **Shops.** Mr. Steadman brought in a Bill to amend the Shop Hours Act, '92, but could find no opportunity of discussing it on second reading. It proposed that a young person should not be employed in or about a shop for a longer period than sixty hours, including meal times, in any one week. (Dropped.) Sir C. Dilke introduced a Shops Bill to amend the law relating to shops, and containing some twenty clauses, enabling the local authority to fix the closing hours for each day, subject to certain exemptions, prescribing that sitting accommodation should be provided for women, fixing the length of employment, including meal-times, at no more than sixty hours in any one week, etc., but it came on late one night in February, and the debate stood adjourned at midnight. (Dropped.) On the same evening Sir J. Lubbock moved second reading of his Shops (Early Closing) Bill, to provide for the earlier closing of shops; but objection was taken, and the business went over. (Dropped.) See "Seats for Shop Assistants," sect. 102.

[105] ***Small Dwellings Acquisition Act (62 & 63 Vict., ch. 44—r.a. Aug. 9th).** A local authority for any area are empowered to advance money to a resident in any house within the area for the purpose of enabling him to acquire the ownership of that house. The local authorities for the purposes of this Act are the councils of

counties and county boroughs, but it is provided that the council of any urban district, not being a county borough, or of any rural district, shall become the local authority in their district for the purpose of the Act, to the exclusion of any other authority on passing a resolution undertaking to act under the statute. Any urban district containing a population of less than 10,000 requires the consent of the county council to the resolution, and, if the latter refuse to give it, the district council may appeal to the Local Government Board, who may, in their discretion, give their consent. In the application of the Act to the county of London any sanitary authority is to have the same powers as an urban district council. Before making an advance under the Act the local authority is to be satisfied that the applicant is resident or intends to reside in the house, and is not already the proprietor, within the meaning of this Act, of a house to which the statutory conditions apply; that the value of the ownership is sufficient; that the title to the ownership is one which an ordinary mortgagee would be willing to accept; that the house is in good sanitary condition and good repair; and that the repayment of the advance is secured by an instrument vesting the ownership in the local authority subject to the right of redemption by the applicant. The advance by the local authority is not to exceed (a) four-fifths of that which, in the opinion of the local authority, is the market value of the ownership; nor (b) £240; or, in the case of a fee simple or leasehold of not less than ninety-nine years unexpired at the date of the purchase, £300; and an advance shall not be made for the acquisition of the ownership of a house where, in the opinion of the local authority, the market value of the house exceeds £400. Every such advance shall be repaid with interest within such period not exceeding thirty years from the date of the advance as may be agreed upon. The interest shall be at such rate as may be agreed upon, not exceeding 10s. above the rate at which the local authority can at the time borrow from the Public Works Loan Commissioners the money for the advance. The repayment may be made either by equal instalments of principal or by an annuity of principal and interest combined, and all payments on account of principal or interest shall be made either weekly or at any periods not exceeding a half-year, according as may be agreed. Provision is made for the repayment by the proprietor of a house of the whole of the outstanding principal, or any part thereof being £10, or a multiple of £10, at any of the usual quarter days, after a month's written notice. Where the ownership of a house has been acquired by means of an advance under the Act, the house, until the advance has been fully paid, is to be held subject to various conditions, including that the proprietor shall reside in it, and that it shall be kept insured and in good sanitary condition. There is a power of transfer with permission, and power to the local authority to take possession where default is made in complying with the statutory condition as to residence, etc., and in certain other cases they may either take possession or order the sale of the house without so doing; but when possession is taken the proprietor is to be paid either an agreed sum, or a sum settled by arbitration, representing the value of the

property after deducting the amount of the advance, etc. The condition as to residence may be suspended if the applicant undertakes to begin residence within such period not exceeding six months from the date of the advance as the local authority may fix; and the proprietor may be permitted by letting or otherwise a house to be occupied as a furnished house during a period not exceeding four months in any twelve months, or during absence in the performance of any duty in connection with his employment, or where the proprietor of the house dies, the period in this case being twelve months from death, or any earlier date, at which the personal representatives transfer the ownership or interest of the proprietor in the course of administration. For the purposes of the Act, "ownership" is defined to be such interest or combination of interests in a house as, together with the interest of the purchaser of the ownership, will constitute either a fee simple in possession, or a leasehold interest in possession of at least sixty years unexpired at the date of the purchase. If in any local financial year the expenses payable by a council and not reimbursed by the receipts under this Act exceed in a county a sum equal to one halfpenny, and in a county borough or urban or rural district a sum equal to one penny, in the pound upon the rateable value of the county, county borough, or district, deducting in the case of a county the rateable value of any urban or rural district in the county, the council of which have become a local authority under this Act, no further advance under this Act shall be made by that council, until the expiration of five years after the end of that financial year, or if those expenses at that date exceed one halfpenny or one penny in the pound, as the case may be, on the rateable value for the time being, until they fall below such sum. (The Act applies to England, Scotland, and Ireland.) In introducing the measure (March 14th) Mr. Chamberlain said the subject had been again and again before the House, and had been discussed and approved, and could not be called one of party controversy. The provisions of the measure were substantially the same as the Bills of Mr. Wrightson, Sir H. Vincent, Sir A. Hickman, and Lord Londonderry, and it was voluntary upon the workman, the owner, and the local authority. The Bill did not define who were to take advantage of it by any reference to their class or employment, and the value of the house was increased from £200 to £300, the limit of the advance being raised too from three-fourths to four-fifths, being a maximum of £240 upon £300. On second reading (April 17th), Mr. McKenna moved an amendment, setting forth "that in any measure for facilitating the acquisition of the ownership of small houses public money should not be advanced except upon the terms that the freehold should vest in public bodies and not in the individual, and that it is undesirable to discuss any such measure until the recommendations of the Local Taxation Commission on the subject of the taxation of ground values have been received." This was seconded by Mr. Logan. Sir J. Pease said this was a Bill for which there was no practical demand. As an objection he pointed out that many workmen had to follow their trade from place to place. Mr. Bartley was afraid that if the measure was

to be a success it would inflict a serious blow on building societies. Mr. Asquith thought that over by far the greater part of the United Kingdom there was no demand for the measure. Mobile labour was the rule, and immobile labour the exception, among the industrial population of the country, and it was a comparatively small section who would be prepared to mortgage their future and take advantage of the measure. He would not vote against it, because the Government of which he was a member in '93 supported its principle; but he deeply regretted that the Government had not taken the opportunity, while legislating on the question, of going to the real crux of the problem, and that was the housing of the working classes. The amendment was rejected by 249 to 69, and second reading agreed to. Bill considered by the Grand Committee on Law, where amendments were made, the limit of value of £400 being, for instance, inserted. On consideration as amended, a clause providing that where the local authority made any advance under the Act they should cause the ownership to be registered under the Land Transfer Acts, and pay half the cost of registration out of the advance, was omitted at the instance of Mr. Chamberlain, and a clause inserted enabling the local authority to keep a detailed account of the transactions it entered into.

[106] *Solicitors Act, '99* (62 Vict., ch. 4—r.a. June 6 h) enacts that the Master of the Rolls in England shall have power to order that the name of any solicitor who has been, either before or after the commencement of this Act, struck off the roll under the provisions of sect. 32 of the *Solicitors Act, '43* ("solicitors acting as agents for persons not qualified, etc., shall be liable to be struck off the roll and imprisoned for a year"), shall be replaced upon the roll; and the Lord Chancellor of Ireland is to have the like power regarding a solicitor who has been struck off under the provisions of a similar section of the *Solicitors (Ireland) Act, '98*.

[107] *Summary Jurisdiction Act* (62 & 63 Vict., ch. 22—r.a. Aug. 9th) was introduced by Mr. Bryn Roberts, and includes in the first schedule of the *Summary Jurisdiction Act, '79* (which relates to indictable offences that may be dealt with summarily), the offence of obtaining or attempting to obtain any chattel, money, or valuable security with intent to defraud, in the case of adults consenting not exceeding the value of 40s.; and the offence of setting fire to woods, heath, etc., there being the same limit of value also in the case of adults. But where a court proposes to deal summarily with a charge of obtaining by false pretences, it shall explain or state in effect that a false pretence means a false representation by words, writing, or conduct that some fact exists or existed, and that a promise as to future conduct not intended to be kept is not by itself a false pretence, and may add any such further explanation as the court may deem suitable to the circumstances. [E.]

[108] *Supreme Court of Judicature Act, '99* (62 Vict., ch. 6—r.a. June 6th) enacts that if all parties to an appeal or motion before the hearing file a consent to the appeal or motion being heard and determined before two judges of the Court of Appeal, it may be heard and determined accordingly, subject, nevertheless, to the same right, if any, of appeal to the House of Lords as if the hearing and determination had been before three judges. The sanction

of the court is however necessary in causes or matters to which any infant or person of unsound mind, or person under any other disability is a party. If two judges having heard an appeal or motion differ in opinion, the case shall, on the application of any party to the appeal, be reargued and determined by three judges before appeal to the House of Lords. [E.]

[109] *Telegraph Act, '99 (62 & 63 Vict., ch. 38—r.a. Aug. 9th) provides for a grant of £2,000,000 "for the improvement of telephonic communications and otherwise with respect to the telegraphs." The resolution authorising the expenditure of this sum was submitted by Mr. Hanbury, the Secretary to the Treasury, on March 6th, when he made an important statement revealing a new departure by the Government in the matter of telephone development, based upon the recommendations of the Select Committee of '98, over which Mr. Hanbury presided. He announced that the Government were of opinion that the claim of the National Telephone Company to the exercise of a monopoly in every area into which they had entered was groundless, and that the Post Office was free to compete with it in developing the telephonic communication of the country. The Post Office, therefore, would at once enter into competition with the company in the London area by establishing a popular service at a small annual rental and a tariff of so much a call; as to the provinces, the larger municipalities would be enabled to open systems of their own (and to incur expenses on that account on the security of the rates) under licence from the Postmaster-General, and thus to compete against the National Company in places where that company had already a system in operation. A Bill based upon the resolution was introduced, giving the necessary authority for the expenditure of the money by the Post Office on the establishment of exchanges in London and elsewhere, and for the payment of the expenses of the establishment of local systems by county borough councils in England and Ireland, and royal or parliamentary boroughs with a population of over 50,000 in Scotland. The proposals of the Bill aroused considerable opposition from those members who regarded them as unfair to the National Company, as well as from others who considered the provisions inadequate; and when the Bill was sent up to the Grand Committee on Trade the power of setting up a municipal supply was extended to urban district councils, and fresh conditions were prescribed to new companies, which are to be allowed to compete with existing companies as well as to initiate new systems. At the same time elaborate provisions were inserted for the protection, in part, of the existing privileges of the National Company under certain conditions. The conditions were not accepted as satisfactory by the friends of the company, and the Bill was subjected to further criticism when it came to be discussed on the report stage. Frequent negotiations took place between Mr. Hanbury and representatives of the company while the Bill was before the House, and further modifications were agreed to. Ultimately the Bill was read a third time on July 24th. In their amended and enacted form the provisions concerning the National Company secure for it equality of treatment in any area in which a competing system may be established. The Act provides that where it is proposed to grant a new licence

to the local authority or to a new company in an area already supplied by an existing company, and it in such a case the existing company agrees not to give a preferential service to any one and not to exceed the maximum rates or fall below the minimum rates authorised by the Postmaster-General, it shall be a condition of the grant of a new licence that any powers acquired by the existing company for the laying down of underground wires shall continue for the period specified in the new licence on the terms and conditions specified in the agreement except so far as they may be varied by any subsequent agreement with the local authority. Where an existing company is, at the passing of the Act, supplying telephonic communication in any exchange area a new licence shall not be granted to any person or body other than the borough or urban council, unless it is shown to the satisfaction of the Postmaster-General that the application is approved by the council. An existing company may not without the consent of the Postmaster-General open an exchange in any exchange area in which it had not, before the passing of the Act, established an effective exchange. A local authority or new company that provides a system in the whole or part of an exchange area in competition with an existing company must give a similar undertaking to that exacted from an existing company as to preferential treatment and rates, as mentioned above; it is also provided that in such a case the licence of the existing company shall, within the whole of the exchange area in question, be extended and continue for the period specified in the new licence of the local authority or new company. If the licence of an existing company is, under the foregoing provisions, extended in respect of any exchange area for a period of not less than eight years beyond the term existing at the passing of the Act, the company shall, at the request of any other licensee of the Postmaster-General in the same area or any part of it, afford all proper facilities for the transmission, on terms to be settled by an order of the Postmaster-General, of telephonic messages between persons using the system of the company and persons using the system of such other licensee, provided that the licensee so requiring intercommunication shall in any such case afford similar facilities. The effect of this Act is to place the National Company in a very much stronger position than it was before the Bill was introduced. Then its licenses were determinable by the Postmaster-General, at his option, in 1904, and absolutely lapsed in 1911; under the terms of the new Act some of its licenses may be extended to 1925 or longer. In every case it is provided by a Treasury minute that on the lapse of a company's licence the Post Office will purchase the efficient plant of the company. [U.K.]

Telephones (see previous sect.)

[110] Tithe Rent-Charge (Ireland) Bill. Mr. G. Balfour (May 12th), in asking leave to introduce a Bill to amend the law relating to tithe rent-charge in Ireland, said it proposed to place the two classes of tithe rent-charge payers in Ireland, ecclesiastical and lay, upon a more equitable footing, and accordingly to do away with the distinction created by the Irish Church Act between ecclesiastical and lay tithe rent-charge. Mr. Dillon said the Bill proposed to take from the Irish Church Fund, if there were any assets left, an indefinite sum,

and to divide it among the supporters of the Government in Ireland. The motion for leave to bring in the bill was carried by 205 to 113. [Withdrawn.]

[111] ***Tithe Rent-Charge (Rates) Act (62 & 63 Vict. ch. 17—r.a. Aug. 1st)** enacts that the owner of tithe rent charge attached to a benefice shall be liable to pay only one-half of the amount of any rate to which this Act applies, which is assessed on him as owner of that tithe rent-charge, and the remaining one-half shall, on demand being made by the collector of the rate on the surveyor of taxes for the district, be paid by the Commissioners Inland Revenue out of the sums payable by them to the Local Taxation Account, on account of the estate duty grant. The Act applies in the case of any person liable to pay rates in respect of any payment in lieu of tithe, as in the case of the owner of tithe rent-charge; and also applies to every rate as defined by sect. 9 of the Agricultural Rates Act, '96 (except any rate which the owner of tithe rent-charge is liable, as compared with the occupier of buildings, to be assessed to or to pay in the proportion of one-half or less than one-half), which is made after Sept. 15th, '99, and during the continuance of the Agricultural Rates Act, '96. [E.]

The above is the text of the Bill as introduced, as well as of the Act, for no change was made in its provisions during its passage through Parliament. In asking leave to bring in the measure, Mr. Long (June 22nd) said the Royal Commission on Local Taxation had issued an interim report, signed by 12 out of 15 of the commissioners, stating that, pending the issue of the final report, this grievance might properly be met by some special form of relief. It was proposed that the owners of tithe rent-charge attached to a benefice should pay in future one-half only of the rates to which they were at present liable. The sum estimated to be required was £87,000, and it was to be furnished out of the surplus of the Local Taxation Grant. Sir H. Campbell-Bannerman, while sympathising with the clergy, characterised this as nothing but a fresh endowment of the Church of England to the extent of £87,000. If the incomes of the clergy were insufficient, as in many cases they were, they were the servants of the richest Church in this country, yet they came to the ratepayers to make good this little deficiency. There was not a free and independent church in the country so mean and so poor that would not scorn to do it. The motion for leave to bring in the Bill was carried by 247 to 169. Mr. Long informed Mr. Billson (June 26th) that between 10,000 and 11,000 clergymen would benefit by the Bill, and told Mr. C. Williams that the Bill was not based on the fact that the value of the tithe rent-charge had been diminished by agricultural depression, but on the excessive burdens which clerical owners had to bear, as compared with other classes of ratepayers. It therefore applied to all payments in lieu of tithes, whether based on the price of agricultural produce or not. On second reading (June 27th) Mr. Asquith proposed the rejection of the measure, observing that the man who was to get the highest amount of relief was the clergyman who paid the highest rates, while in the case of the poor clergy the relief would be very small. Mr. G. Whiteley, Conservative member for Stockport,

who also strongly opposed the Bill, consistently with his previous attitude on the question of "doles," felt so strongly on the question that he subsequently left his party and took his seat on the opposition benches as an Independent Liberal. Among the other opponents of the Bill were Mr. Courtney and Sir W. Harcourt. Second reading was in the result carried (June 29th) by 314 to 176. In committee (July 10th—13th) numerous amendments were proposed, but, as stated above, none was actually made. An amendment of Mr. Lloyd-George, proposing to restrict the relief under the Bill to owners of tithe rent-charge under the annual value of £100, was rejected by 251 to 155. An amendment of Mr. Nussey, for excluding from the benefits of the measure the owners of tithe rent-charge which is derived from urban land, was negatived by 181 to 98. An amendment of Mr. Lambert, to restrict the operation of the Bill to tithe rent-charge to which no addition was made at the time or commutation as an equivalent of rates and taxes, was rejected by 264 to 151. Mr. D. Thomas moved an amendment with the object of providing that the rate should be paid according to a graduated schedule which would give the largest relief to the poorest clergy, but this was negatived by 228 to 125. Mr. L. Holland proposed an amendment with a view of throwing the cost of remitting half of the rate on clerical tithe on the ratepayers of the district instead of on the ratepayers generally, the complaint being that in London especially the ratepayers were in effect asked to pay an increased rate, not for the benefit of any necessitous clergy in their own district, but to enable other ratepayers rather less heavily taxed to continue to pay less than their fair share of their own local rates. Mr. Balfour justified the distribution of the burden on the general taxpayers throughout the country. The amendment was negatived by 257 to 157. Third reading carried by 182 to 117 (July 20th), after discussion, in course of which Mr. Balfour stated that a large majority of the clergy who would be relieved had very small incomes, and that only a few had gross incomes of more than £500. In the Lords the rejection of the measure, on second reading, was (July 24th) proposed by Lord Ribblesdale, but the principle of the Bill was affirmed by 113 to 23.

[112] ***University of London Act (62 & 63 Vict., ch. 24—r.a. Aug. 9th)** applies the Act of last year to Holloway College, in like manner as it applies to the South-Eastern Agricultural College at Wye; in other words, Holloway College is to be brought within the scope of the scheme, and is to have such privileges as it would have had if situated within the administrative county of London. See also FINANCE, NATIONAL, Part III., and headed article UNIVERSITY OF LONDON.

[113] **Wine and Beerhouse Acts Amendment Bill.** Mr. Lloyd-George moved second reading of this Bill (June 7th), the object of the measure being to give to licensing authorities the same discretion in dealing with beerhouses to which licences were granted before '69 as they possess with regard to fully licensed public-houses. Mr. J. Collings said it was impossible for the Government to accept this or any other measure dealing with the same subject pending the report of the Licensing Commission. The Bill was rejected by 183 to 138.

[114] **Youthful Offenders Bill.** The Home

Secretary informed Mr. W. F. D. Smith that in a Bill he had prepared relating to youthful offenders, and which he hoped would be shortly introduced in the other House, he had inserted provisions which would give effect to the bulk of the recommendations of the Departmental Committee on Reformatory and Industrial Schools, '95-6, with regard to the payment of contributions by parents. Bill introduced by Lord James of Hereford, who, in moving second reading (June 19th), said its object was to keep children and young persons out of gaol. Among the many incidents that had occurred during the present reign probably none would be looked upon with greater satisfaction than the great diminution that had taken place in our criminal classes. If they wished to do greater work in this direction they must deal in some way or other with the habitual offenders; and probably the only way to deal effectually with that class was to destroy the recruiting power, to deal with the class from which the habitual offender is recruited, and to prevent the child or the youth from becoming criminals at all. A great deal had been done of late years in diminishing the number of youthful offenders committed to prison, but a great deal still remained to be done. In '93 there were 2924 young persons under the age of 16 who were committed to prison, and of these 150 were children under 12 years of age. In '97 the number of young persons under 16 committed to prison was 1630, and the number of children under 12 committed to prison was only 58. But there was, unfortunately, a cause which was increasing, and might increase still more, the number of young persons committed to prison, and that was the enforcement of local byelaws—in many cases involving only breaches of regulations rather than acts representing any moral offence—as to which the machinery of the law required remedying. In cases of children varying from 11 to 13 years of age committing such offences the child was fined, and, not being able to pay, was sent to prison with hard labour, and bore the same penalty for the period as a person who had committed a positive crime. The object of the Bill was to keep youthful offenders away from prison life. The first clause of the Bill provided for an extension of the power given under the Summary Jurisdiction Act, '79, to deal summarily with youthful offenders in all offences other than homicide, but of course by consent in cases of indictable offences. The second clause enacted that where a child or young male person was convicted, either on indictment or summarily, of any offence other than homicide, the court might, in substitution for any other punishment, or instead of committing him to prison for non-payment of any fine, costs, or damages, order him to be privately whipped with a birch rod by a constable in the presence of an inspector or other police-officer. The number of strokes should not exceed 6 in the case of a child, 11 in the case of a boy who appeared to the court to be under the age of 14 years, and 18 in any other case. The Bill also provided that in the case of a child or young person being remanded or committed for trial the court might order that he should be placed while under remand or committal in the custody of a fit person who was willing to receive him, instead of committing him to prison. There was a further provision in the

Bill amending the Reformatory Schools Act, '93, so that in future a magistrate would not be compelled to send a boy to prison before ordering him to be detained in a reformatory school for a specified period. The Bill was read a second time after some discussion, passed the Lords, and sent to the Commons (≡).

III. COMMITTEES.

[115] **Aged Deserving Poor** (see "Old Age Pensions Bills," sect. 83). Sir W. Walrond moved April 24th "That a select committee of seven members be appointed to consider and report upon the best means of improving the condition of the aged deserving poor, and of providing for those of them who are helpless and infirm; and to inquire whether any of the Bills dealing with old age pensions, and submitted to Parliament during the present session, can with advantage be adopted either with or without amendment." Mr. Chamberlain, replying to a speech by Mr. Asquith, did not believe that it was in the power of any party then to propose a scheme which would be a final settlement of the question. They must be content to go step by step. At the same time he did not think it was unreasonable to hope that it might be possible for the committee to make a recommendation to the House on which the Government might base legislation. The Government intended to deal with the matter before they left office, but they could not do that at the earliest until next session. Mr. Lecky thought it a mistake not to drop the subject of old age pensions altogether, as a thing not likely to work. Mr. Logan moved as an amendment "That having regard to the fact that a Royal Commission and a Special Committee have within the last four years reported upon the condition of and the providing pensions for the aged poor, this House considers that further inquiry is not likely to shed further light on the subject, and that the Government should undertake the responsibility of making such proposals as they may deem good." This was seconded by Mr. Mendl. Mr. Balfour said if the Government were not able to find some method of either solving or making a step towards the solution of the problem, neither committee nor commission would protect them from the consequences. He felt, if it were impossible to do anything for the aged poor in this Parliament, that the hope he had held out to his constituents would have proved, either through the fault of the Government, or by circumstances altogether outside their power, to be illusory. Sir W. Foster notified that he would vote for the committee. The amendment was negatived by 263 to 93, and the motion agreed to after further discussion. On May 1st divisions were taken against two of the names of the proposed committee, but in the result the committee was nominated as follows:—Mr. Anstruther, Mr. Chaplin, Mr. Cripps, Mr. Davitt, Lord E. Fitzmaurice, Sir Fortescue Flannery, Sir Walter Foster, Mr. Hedderwick, Mr. Samuel Hoare, Mr. Lionel Holland, Mr. Lecky, Mr. Llewellyn, Mr. Lloyd-George, Mr. A. K. Loyd, Sir James Rankin, Mr. William Redmond, and Mr. Woods. The committee so constituted met on May 5th, when Mr. Chaplin, President of the Local Government Board, was called to the chair. On May 9th it was resolved, on the motion of the chairman, that in any

provision to be made by legislation or otherwise for the aged poor discrimination should be made in favour of those who are deserving; that the needs of many of the aged and deserving poor will not be met by any scheme for old age pensions only, and that some provision should be made for them by the reform of poor law administration, in other words by "improved poor relief," as well as by old age pensions. Mr. Lionel Holland moved that the committee proceed to take into consideration the question of old age pensions first, and this was carried by 11 to 4, the minority consisting of Mr. Anstruther, Mr. Cripps, Mr. Lecky, and Mr. Llewellyn. On May 11th it was resolved that universal pensions without regard to merit or to need are outside the scope of the inquiry; that the committee exclude from their consideration schemes involving the principle of compulsory contributions as unsatisfactory; and that the terms of reference exclude schemes for the universal grant of pensions. At subsequent meetings of the committee evidence was taken from numerous witnesses. On July 6th it was resolved that "instead of adopting any one of the Bills before the committee, the committee will recommend the general principles on which they consider that a scheme for providing old age pensions for aged and deserving poor may be framed; and that the committee adhere to the resolution of May 9th, but will await the report of the Cottage Homes Committee before making any recommendations with regard to the reform of the poor law." A copy of this report was duly laid before the committee (see sect. 116). On July 20th the chairman submitted a draft report, which was read a first time, a draft report proposed by Mr. Lecky being also read a first time. The latter is a very interesting document; its full text would fill some pages, but here are one or two extracts. Mr. Lecky sets out by concurring "in the opinion expressed by the majority of the Royal Commission presided over by Lord Aberdare and by the committee presided over by Lord Rothschild, that no one of the schemes apart from the poor law that have been devised for the purpose of supporting out of State funds the aged and deserving poor can be safely recommended, and is not likely to produce greater evils than it would cure. It does not appear to me that the evidence brought before the present committee gives any reason for modifying this conclusion. There is, as it seems to me, a fundamental and most dangerous misconception which the term old age pension tends to accredit. The pensions, largely of the nature of deferred pay, given by the State or by private employers, for specific services duly rendered, to those who have been in their employment or under their control, have no real analogy to the proposed State endowment of all old persons, or at least of all respectable old people who, at the close of a life of independent industry, find themselves insufficiently provided with the means of livelihood. Such an endowment drawn from the taxation of the country would be essentially of the same nature as poor law relief. However much it may be disguised by other names, it would be an eleemosynary grant resting on no foundation of natural right. There is no real ground for the assertion that because an industrious man has failed to earn a sufficiency he has a moral right to be rewarded for his industry out of the proceeds of a tax levied

upon his neighbours to whom he has rendered no service, or none which has not been paid for in wages." The universal endowment of all aged persons would impose upon the nation a perpetual tax which would certainly not be less than double the amount by which the interest of the National Debt has been diminished since the Peace of 1815, and which would inevitably tend to increase. It would impose upon it an obligation from which, if once undertaken, it would be impossible to recede without producing a terrible catastrophe. He could hardly conceive anything more certain to discourage thrift and to sap the robust qualities of the English people than that the belief should grow up among the whole working population, including the most industrious, the most respectable, and the most independent, that they should look forward to the State, and not to their own exertions, to support them during their old age. The more reasonable and moderate proposals were those intended to distinguish the thrifty from the thriftless. The objections to schemes of this kind are in his view very formidable, and Mr. Lecky discusses them in detail. After touching upon other points in the controversy, Mr. Lecky concludes: "It is by an extended and more clearly defined system of poor law classification that the problem before us seems to me to be best met. As far as the aged and deserving poor in the workhouses are concerned such a classification as that recommended in the report to which I have just referred [that on Cottage Homes] would, as it seems to me, fully meet the case. It would no doubt involve some increase of poor law expenditure, but this would be trifling in comparison to the schemes of old age pensions which have been brought before us. To open a new and ever-increasing fund, amounting to many millions a year, derived from compulsory taxation, and employed in directly subsidising the poor, would, in my opinion, be a most retrograde and dangerous step. It would reproduce, in a slightly different form, the evils of the old poor law as it existed before the reform of 1834. It would certainly arrest that steady decline of pauperism which has been one of the happiest features of our time. It would check the growth or destroy the efficiency of voluntary organisations and arrangements which are of inestimable value. It could scarcely fail to weaken the habits of providence and thrift which have been rapidly growing among the poor, and which are a vital element in national prosperity, and in many other ways which I have endeavoured to indicate it would prove in a very high degree detrimental to the interests of the empire." The question was proposed in the committee, that the draft report of the chairman be read a second time paragraph by paragraph; whereupon Mr. Lecky moved to leave out the words "the chairman" and insert the words "Mr. Lecky." The amendment was negatived by 10 to 1, Mr. Lecky himself being the "one," and the committee accordingly proceeded with the chairman's draft, on which numerous amendments were considered in due course. Among them was one by the chairman proposing that the amount of the pension should not be less than 3s. instead of not less than 5s., but this was rejected by 8 to 6. The report as amended was tabled and ordered to be printed (July 27th). In narrating the course of the inquiry the committee say that in considering

the reference, they came to the conclusion at a very early period that the needs of many of the aged and deserving poor would not be met by any scheme for old age pensions only, and that some provision should be made for them by the reform of poor law administration; in other words, by improved poor relief, as well as by old age pensions. They further decided on the same occasion to begin by examining into that branch of the subject which related to pensions. Acting upon this decision they investigated and discussed the provisions of the seven different Bills which were referred to the committee, and they subsequently agreed that instead of accepting, either with or without amendments, any one of these measures, it was desirable to formulate for themselves the general principles upon which any measure dealing with the question might be framed. The committee next proceed to summarise the evidence of the witnesses they examined, and state that from a careful examination of this they had formed the opinion that the success of the Danish old age pension scheme on the one hand, and on the other the satisfactory results of the pension schemes which had for many years been established in England by the Charity Commissioners, afford *prima facie* evidence that it is practicable to create a workable system of old age pensions for the United Kingdom. In view of the foregoing and other considerations, they thought that the attempt should be made, and they had carefully considered what the nature of the scheme should be, in examining the various methods which had been suggested in the course of their inquiry; influenced by certain considerations (which they indicate), and by the wisdom of following, where practicable, the experience of such schemes as those of the Charity Commissioners, the results of which have proved, after many years of trial, to be productive of good effects. See separate article on OLD AGE PENSIONS for the conditions laid down for the framing of such a scheme.

Companies Bill (see sect. 46).

Copyright Bills (see sect. 49).

[116] **Cottage Homes** (see "Cottage Homes Bill," sect. 50). The committee on this Bill was appointed April 28th, and Mr. T. W. Russell, Parliamentary Secretary to the Local Government Board, was in due course chosen chairman. Evidence was taken, and the committee, on July 4th, presented their first special report. They stated that they had unanimously resolved to report the Bill without amendment to the House. The full text of the report is too long for quotation here, but the following is a summary of the recommendations of the committee:—"(1) That it is desirable so to classify the inmates of workhouses that the aged and respectable poor shall not be forced to mix with those whose character or habits are bad or disagreeable; (2) That in order to make room for proper classification all children, other than infants, be provided for outside and apart from the workhouse premises; (3) That it should be the duty of the county councils to provide suitable accommodation in separate institutions for the proper treatment of all pauper imbeciles and epileptics; (4) That the aged and deserving poor, so far as it is possible, should receive adequate outdoor relief, and that where they are in the workhouse they should constitute a special class and receive special treatment and privileges; (5) That

guardians should provide special cottage homes within the unions, or other suitable accommodation, for married couples and respectable old persons whose poverty is not their own fault but the result of misfortune." On July 7th the committee agreed to a second special report, in which they state that they had been engaged in inquiring into the premature publication of verbatim extracts from the chairman's draft report by the *Times* newspaper on June 28th. In view of the repeated publication of such documents, the committee recommended that the Lobby representative of any newspaper who publishes privileged documents should be excluded from the precincts of the House.

Fire Brigades Bill (see sect. 59).

[117] **Houses of Lords and Commons Permanent Staff.** A joint committee of Lords and Commons was appointed to inquire into the salaries of the permanent staff of both Houses of Parliament, and into the present method of appointment or nomination by any officer of either House, and to report what changes, if any, are suitable in respect thereto. The committee reported in July, giving much detailed information on the subject referred to them. As regards clerks on the establishment of the two Houses, the committee thought it not advisable to dispense with the system of selection of candidates and to substitute a system of open competition, and they considered that the examinations should be the same as that of Class I. clerkships of the civil service, and that at least four candidates should be nominated for each vacancy. In all appointments to vacancies in the libraries of the two Houses regard should be had to training in library work. Having regard to their duties, the number of clerks is not excessive, and the salaries allotted to them (which begin at £100, instead of £200, as is usual in other offices) are certainly not higher than those which are given in the principal departments of the civil service, and not susceptible of reduction.

[118] **House of Lords Offices.** The select committee of Lords on these offices notified the retirement, on December 31st, '99, of Mr. Read Thoms, Reading Clerk and Clerk of Outdoor Committees, and one of the Examiners for Standing Orders, who had been for more than forty-seven years in the service of the House. It was also stated, in reference to the bequest of the late Sir William Fraser to the library of the House of Lords of his collection of Gillray's caricatures in eleven folio volumes, with directions that they should be handed over in an ornamental case with glass doors, to be furnished at the expense of his estate, that the Clerk of the Parliaments had expressed to the executors his confidence that the House would accept with much gratification the interesting and valuable gift so bequeathed to it.

[119] **Kitchen and Refreshment Rooms (House of Commons).** The statement of purchases and sales from January 1st to July 29th, '99, shows, to goods purchased during period, £3,542; by sales during period, £12,160. During the session to July 29th there were served 11,941 luncheons, 21,986 dinners, 347 suppers, 32,263 teas, and 5,671 meals at bars, making a grand total of 72,203 meals served in the House.

[120] **Metropolitan Gas Companies.** A select committee was appointed (March 9th—16th), on the motion of Mr. Cohen, "to inquire into the powers of charge conferred by Parliament on

the metropolitan gas companies, and to report as to the method in which those powers have been exercised, having regard to the differences of price charged by the various companies." The committee took evidence, and presented their report July 24th. Adverting to the history and position of the companies, they show that the gas supply of the Metropolis was formerly in the hands of nine companies, but amalgamations reduced these to three—namely, the Gas Light and Coke Company, the Commercial Company, and the South Metropolitan Company. "These three remaining gas companies are practically under the same laws and regulations, with the exception that the Gas Light and Coke Company and South Metropolitan Gas Company are obliged by their Acts of '76 to raise all their new capital by public auction or tender, whereas the Commercial Company is not under that obligation, its Act having been obtained in '75. Also the standard price laid down for the South Metropolitan Gas Company is 3s. 6d. per 1000 cubic feet of gas, whereas the standard price for the Gas Light and Coke Company and the Commercial Company is 3s. 9d. per 1000 cubic feet. The standard dividend is, in all cases, 10 per cent. The arrangement of the sliding scale, as it is called, enables the companies to increase their dividend above the standard rate by $\frac{1}{4}$ per cent. upon the ordinary stock of the company for every penny of decrease in the price of gas below the standard price, and obliges the companies to decrease their dividend by $\frac{1}{4}$ per cent. below the standard dividend for every increase of a penny or part of a penny in the price of gas above the standard price. This arrangement has, on the whole, had an excellent effect upon the companies, and has given them a strong motive to keep down the price of gas, and has also operated to the advantage of the consumers; while, on the other hand, the companies have reaped an enormous advantage by being able to divide large sums over and above the 10 per cent. dividend to which they were formerly limited. The auction clauses which compel the companies to sell their stock and their loans to the highest bidders have had the effect of enabling the companies to obtain their capital at a much less rate than if the stock had been offered to each shareholder at par, which was the usual custom before '76, and thus the charge for interest on capital has been largely reduced. Expert evidence upon this matter seems to be entirely in its favour." The price charged by the Gas Light and Coke Company north of the Thames to its private consumers has never been below 2s. 9d. per 1000 cubic feet in any year except in '89 and the first half-year of '90, when it was 2s. 6d.; since then it has varied from 2s. 9d. to 3s. 1d., and is now (July '99) 3s. The Commercial Company has since '76 varied in its charge per 1000 cubic feet from 3s. 9d. to 2s. 4d., but since '83 has never been above 2s. 9d., and for the last five years has been 2s. 6d. The South Metropolitan has never since '76 been above 3s. 2d.; and since '86 has been under 2s. 7d., and is now 2s. 2d. It is also a fact that as compared with most of the small suburban companies round London, some of which supply gas within the Metropolis, the price charged by the Gas Light Company is very high. The committee having very fully considered all the evidence submitted to them, and after giving due weight to the reasons

offered by the Gas Light and Coke Company in explanation of the higher price charged for their gas, express the opinion that the affairs of the company have not been well managed. The benefit to the consumers which was contemplated when the standard price was fixed nearly a quarter of a century ago has not been obtained. The committee make the following recommendations:—"(1) That whenever any of the metropolitan gas companies again come to Parliament for an extension or alteration of their capital powers, a revision of the sliding scale should take place, and that the standard price should be reduced to 3s. 3d. to carry the standard dividend of 10 per cent., and that the existing scale of increase and decrease for dividend of $\frac{1}{4}$ per cent. for every penny of decrease or increase of price below or above 3s. 3d. be maintained, and that a secondary or additional scale be imposed which should permit of an increase or decrease of dividend over and above that regulated by the present scale of $\frac{1}{4}$ per cent. for every complete 3d. of decrease or increase below or above the standard price of 3s. 3d.; (2) That the area south of the river Thames, at present part of the district of the Gas Light and Coke Company, acquired by them from the absorption of the London Gas Company in '83, should be transferred from the Gas Light and Coke Company to the South Metropolitan Gas Company, fair and reasonable price being paid by the latter to the former company for their property in the southern area; (3) That the charge made by the Gas Light and Coke Company for the rents of automatic meters and stoves should be the same to consumers north and south of the Thames for fittings of the same quality and capacity, and that the prices charged by all the companies for these slot meters and fittings require regulation, having regard to the fact that the business is a new one and has extended with extraordinary rapidity throughout the Metropolis; (4) That capital powers should not be granted to any gas company for more than five years if and when new capital is required, and that Parliament should revise the sliding scale, either by way of increase or decrease, when any application for new capital is made, if the circumstances of the times or the conditions of the company appear to require it; (5) That an effort should be made by any company having obsolete or unproductive capital to redeem such capital by sinking fund or otherwise."

Metropolitan Water Companies (see sect. 75).

[121] **Municipal Trading.** A motion stood for some time on the Commons paper in the name of Sir W. Walrond, principal Government Whip, proposing "That a select committee of five Members of this House be appointed to join with a committee of the Lords to consider and report as to the principles which should govern powers given by Bills and provisional orders to municipal and other local authorities for industrial enterprise within or without the area of their jurisdiction"; and also that a message be sent to the Lords requesting that their lordships would be pleased to appoint an equal number of lords to be joined with the members of this House. The committee was, however, never actually appointed, and Mr. Balfour informed Mr. Cohen (July 4th) that he hoped the Government would be able to appoint it early next session.

[122] **Police and Sanitary Regulations.** This

committee, under the presidency of Sir S. Northcote, considered numerous private Bills promoted by municipal and other local authorities, and in their report, presented July 10th, "desire strongly to reiterate the suggestion previously offered for the consideration of the House, whether the time has not arrived for the inclusion in a public Bill of many of the clauses which are so frequently introduced into private Bills, and which have almost invariably been accepted by Parliament. It appears to your committee that much trouble and expense might be saved if the necessity for application to Parliament for such powers by individual authorities were rendered unnecessary."

IV. AUTUMN SESSION.

Oct. 17th—27th, '99.

[THE WAR.]

[123] **Queen's Speech and Miscellaneous.** The Government decided, in view of the state of affairs in South Africa, that Parliament should be summoned to meet; and the Queen's Proclamation convening it was signed on October 7th, together with two others, one directing the continuance in Army service, until discharged or transferred to the Reserve, of soldiers whose term of service had expired or was about to expire; and the other ordering the Army Reserve to be called out on permanent service. The Transvaal ultimatum was presented to the British Agent on Oct. 9th, and was received in London Oct. 10th. On the latter day Great Britain replied that the conditions demanded were such as could not be discussed. The time for the acceptance of the ultimatum expired Oct. 11th, and on the following day Natal was invaded by the Boers. (For details see headed article in body of book.)

The sixth session of the present Parliament was duly opened by Royal Commission on Oct. 17th, the **Queen's Speech** being in the following terms:—"MY LORDS AND GENTLEMEN,—Within a very brief period after the recent prorogation, I am compelled by events deeply affecting the interests of my Empire to recur to your advice and aid. The state of affairs in South Africa has made it expedient that my Government should be enabled to strengthen the military forces of this country by calling out the Reserve. For this purpose the provisions of the law render it necessary that Parliament should be called together. Except for the difficulties that have been caused by the action of the South African Republic, the condition of the world continues to be peaceful. GENTLEMEN OF THE HOUSE OF COMMONS,—Measures will be laid before you for the purpose of providing for the expenditure which has been or may be caused by events in South Africa. The Estimates for the ensuing year will be submitted to you in due course. MY LORDS AND GENTLEMEN,—There are many subjects of domestic interest to which your attention will be invited at a later period, when the ordinary season for the labours of a parliamentary session has been reached. For the present I have invited your attendance in order to ask you to deal with an exceptional exigency, and I pray that, in performing the duties which claim your attention, you may have the guidance and blessing of Almighty God." Mr. J. Lowther, as before (see sect. 29),

anticipated the real business of the evening by moving to confine the operation of the sessional order relative to the interference of peers and others at elections to lords-lieutenant of counties, and was defeated by 337 to 76. The original intention of the Government was that these sittings should be only the commencement of a new session, to be continued after an interval extending until the ordinary time of meeting, the effect of such an arrangement being that there would be no second Queen's Speech at the reassembling, and in consequence only a limited opportunity of discussing the legislative programme then to be put forward. On its being pointed out that hon. members would thus lose the privilege of generally discussing in February public affairs, including, it might be, some matters of great moment, Mr. Balfour gave way, though on the understanding that the debate on the Address at these sittings should be confined to the specific matter alluded to in the Royal Message. The sittings accordingly became in due course one session in itself, the business being almost entirely confined to the war and the proceedings leading up to or arising out of it. The interest in the debates, notably on the occasion of Mr. Chamberlain's speech, was quite phenomenal. On the morning of the prorogation there was carried in the House of Lords against the Government by six votes to four—a limited attendance for the transaction of business, which the forms of their Lordships' House permit—on the motion of the Earl of Hardwicke, a resolution declaring it to be inexpedient that memorial statues should be erected within the precincts of the Palace of Westminster without the sanction of Parliament. The motion was, of course, against the erection in the gardens on the western side of Westminster Hall of the statue of Cromwell, which has since been set up there, this appropriation of the site having been first sanctioned by the First Commissioner of Works in the late Government, whose action was endorsed by the present First Commissioner. No public money has been expended on the work, the statue being the gift of an anonymous donor. The peers voting with Lord Hardwicke were Lords Wemyss, Sidmouth, Barrington, Crofton, and Malmesbury. Among the personal incidents of the sittings was the retirement of Mr. Davitt from the representation of South Mayo.

The Prorogation Speech, read Oct. 28th, was as follows:—"MY LORDS AND GENTLEMEN,—I am happy to be able to release you from the exceptional duties which have been imposed upon you by the exigencies of the public service. I congratulate you on the brilliant qualities which have been displayed by the brave regiments upon whom the task of repelling the invasion of my South African Colonies has been laid. In doing so, I cannot but express my profound sorrow that so many gallant officers and soldiers should have fallen in the performance of their duty. GENTLEMEN OF THE HOUSE OF COMMONS,—I acknowledge with gratitude the liberal provision which you have made to defray the expenses of military operations in South Africa. MY LORDS AND GENTLEMEN,—I trust that the Divine blessing may rest upon your efforts and those of my gallant Army to restore peace and good government to that portion of my Empire, and to vindicate the honour of this country."

[124] Debates on the Address. Lords Kimberley and Salisbury, Sir H. Campbell-Bannerman and Mr. Balfour.—Speaking in the House of Peers on the Address, which was moved and seconded by the Marquis of Granby and Lord Barnard, the **Earl of Kimberley** remarked that whatever might be their opinion as to the mode in which the negotiations with the Transvaal had been conducted, or as to the past history of this melancholy question, they were as ready as the supporters of the Government on the other side to give all their support to whatever measures were necessary to vindicate the honour and support the interests of this country. They might view with unmixed satisfaction the way in which the Reserves had responded to the call made upon them. At the same time there were points in the history of the negotiations which had led up to the present difficulty which they could not view with any satisfaction. He failed to understand the advantages of the new mode of conducting negotiations which were fraught with danger and difficulty—a mode which was practically *coram populo*. Nothing could have been more unfortunate, he would almost say disastrous, than the publication of the famous telegram of April 5th from Sir A. Milner. He did not find fault with the High Commissioner, but thought his despatch should have been treated for the time as confidential. With regard to the reassertion of the claim to the suzerainty over the Transvaal, Lord Kimberley said he was as much responsible as any man for the introduction of the term suzerainty, but he was also responsible for the interpretation in the blue-book. The only interpretation he ever attached to it was that it was thought by the Government of the day to be a convenient mode of expressing generally that certain stipulations existed in the Convention which limited the sovereignty of the Transvaal State, and that, to the extent of those limitations contained in this particular provision of the Convention of '81, there was constituted what might be called in general terms a suzerainty. But in the present case it seemed to him that the word had been used in order to set forth a vague and undefined kind of claim, and the result had been that they had had a fertile cause of the unfortunate suspicions which the Transvaal Government had entertained throughout of our intentions. He granted that by a fine-drawn argument the word suzerainty might be preserved. But if it were so, the general scope of the statements made in this House by Lord Derby, the then responsible Minister, and the whole course of the affair, must have led the Boer Government to suppose that in point of fact the word suzerainty, and what might lie under it, were abandoned, except so far as by the conditions of the Convention of '84 they were confirmed. It was not necessary to brandish the word suzerainty in the face of the Boers. It was sure to provoke irritation and suspicion, and it was needless, because there was a safe foundation for our claim to interfere on behalf of the Outlanders. This was the right that every State possesses to protect its subjects in another State from wrong, and it was a right we possess in an unusual degree in South Africa. Besides that, he deprecated some of the speeches made by the negotiator from time to time. In speech after speech words were used, some concerning the President of the Transvaal himself, the very in-

cisiveness of which, the eloquence with which they were spoken, and the manner in which they were received by the admirers of the Minister, conduced to make the negotiations less likely to succeed. He acknowledged fully, however, the calmness and moderation of the tone in which the last and perhaps most important communication of the Government was couched. The **Marquis of Salisbury**, in reply, said the Boer Government had done that which no provocation on our part could have justified. On the question of the "new diplomacy" he asked how was it possible that the Colonial Minister in this case could proceed with the carefully secret methods of the older diplomacy. He was not doubting the superiority of the older system, but if they had to appeal for popular support the older diplomacy would not do. He did not understand how a Minister responsible for conducting negotiations could afford either to ignore the feelings of the British party on the spot, or to keep them in ignorance, and therefore deprive them of the opportunity of assisting him and those who were willing to sustain the policy of this country. A great deal too much had been made of the supposed provocation contained in the language of the Milner despatch. His belief was that the desire to get rid of the word suzerainty, and the reality which it expressed, had been the dream of Mr. Kruger's life, and that during these last years he had seen that in the Outlander population he had some one beneath him whom he could oppress, and that he had used the oppression of the Outlander population as a screw by which to obtain some concessions from us on the subject of the suzerainty. To the state of things established by the Convention of '81 and '84, whatever it might have been, they could never revert. With regard to the future there must be no doubt that the sovereign power of England was paramount; there must be no doubt that the white races would be put upon an equality; and that due precaution should be taken for the philanthropic and kindly and improving treatment of those countless indigenous races, of whose destiny, he feared, hitherto they had been too forgetful. Lord Loch said that on no occasion had he met President Kruger without the latter endeavouring to obtain concessions which were inconsistent with the letter and spirit of the Convention. After further discussion, in course of which the Earl of Selborne, Under-Colonial Secretary, joined, the Address was agreed to.

The Address in the Commons was moved by Captain Sir Alexander Acland-Hood, and seconded by Col. Roysds. **Sir H. Campbell-Bannerman**, in a speech running on similar lines to that of the Leader of the Opposition in the Upper House, said a message had been received from the Government of the South African Republic making demands and couched in language such as it would have been impossible for the Government of any self-respecting country even to take into consideration. There would be no disposition in that part of the House to place any obstacle in the way of granting such supplies or such powers to the Queen as might be requisite in order to secure a rapid and effective prosecution of the war. Reserving for the present detailed criticism of the negotiations, he asked how it was that the attempt at a peaceful settlement had failed, and said it seemed to him that the Government had been engaged in a game of

bluff, which was not a very worthy game for a great country at the best, but was an impossible game on so large a scale as this. When the Boers heard week after week that a further detachment of troops was under orders for the Cape, and in other ways it was made clear to them that we were really intending to fight, the result was to irritate without in the least intimidating them. The same observation applied to certain speeches which were delivered and to certain despatches that were published; and the raising of the question of suzerainty, utterly inept and unnecessary as it was, did more than anything else to remove any chance of success in the negotiations. He asked what were the reasons why, when on Sept. 22nd the door was shut upon the franchise proposals, so long a delay occurred before the other door as to the fresh proposals which were promised in that despatch was opened? Not only the Transvaal, but we ourselves, were up to that day entirely in ignorance as to what those proposals were. Mr. Balfour, in reply, said they were congratulated that they had not hurried on the formulation of their final proposals, and on leaving the door, if not open, still ajar; and he therefore failed to understand why the Leader of the Opposition had singled out for criticism one act, not of commission but of omission, which, if it had any effect at all upon the ultimate result, would tend to peace rather than war. The Boers claimed to be a wholly independent State, externally and internally, quite inconsistently with the two Conventions; and in reply Mr. Chamberlain did reiterate the undoubted rights of this country to control the foreign relations of the Republic, and did use, as he had a right to use, the word suzerainty. The right hon. gentleman disapproved the sending of detachments of troops to South Africa, but where should we have been at this moment if we had not sent them? Would it not have been said that the Government had failed in their duty to defend the Empire from invasion? How would he have the Government act? Not to send out troops was to betray the country, to send them out was to play the game of bluff and brag. Between these alternatives the Government had to choose, and they had chosen the right one. If there was a criticism to be levelled against the Government it was not that they had acted too quickly or done too much, but that their hope of peace—their anxiety lest anything should unduly hurry on or provoke war—made them most reluctant to do anything which the most suspicious and the most irritable of politicians could translate into a threat.

[125] **Arbitration.** Mr. Dillon moved an amendment, which was seconded by Mr. Labouchere, representing "that the state of war now existing between Great Britain and the South African Republic has been caused by the assertion of claims to interfere in the internal government of the Republic, in direct violation of the terms of your Majesty's Convention of '84 with the Government of the South African Republic, and by the massing of large bodies of British troops on the frontiers of the Republic. And we further humbly represent to your Majesty that before more bloodshed takes place proposals should be made in the spirit of the recent Peace Conference at the Hague, with a view to finding in an independent and friendly arbitration a settlement of the difficulties between the two Governments, and

that an ignominious war may thus be avoided between the overwhelming forces of your Majesty's Empire and those of two small nations numbering altogether but 200,000 souls." This was rejected by 322 to 54. More than forty Liberals, including Messrs. Asher, Asquith, Wentworth-Beaumont, Sydney Buxton, Crombie, Sir W. Dunn, Messrs. Munro-Ferguson, Goddard, Sir Edward Grey, Messrs. Ellis Griffith, Haldane, Brynmor Jones, Sir John Kinloch, Sir James Kitson, Sir J. Leese, Messrs. W. McArthur, C. B. McLaren, Sir S. Montagu, Mr. Fletcher Moulton, Sir C. Palmer, Messrs. Paulton, J. W. Philipps, Rickett, C. E. Shaw, Ure, and F. W. Wilson, voted with the Government. Mr. Dillon's amendment was supported by twenty Radicals, among whom were Messrs. Atherley-Jones, Burns, Burt, Channing, Sir W. B. Gurdon, Messrs. Leuty, Lough, McLeod, Maddison, Pickersgill, Souttar, Philip Stanhope, Steadman, H. J. Wilson, and J. Wilson (Durham), the remainder voting in the minority consisting of Nationalists of one or other section.

[126] **Conduct of the Negotiations.** Mr. Philip Stanhope moved (Oct. 18th) an amendment representing "our strong disapproval of the conduct of the negotiations with the Government of the Transvaal which have involved us in hostilities with the two South African Republics." Mr. Samuel Evans, in seconding, said every Liberal must have blushed when they read the belated letter of Lord Rosebery. Sir W. Harcourt said the duty, of course, of the House was to support the Executive Government in maintaining the integrity of the dominions of the Queen; and it would be discharged equally by that side of the House as by the other. At the same time the Opposition was constitutionally entitled to discuss the policy of the Government which had resulted in the war. The Opposition did not accept the claim of Mr. Balfour that the course of the Government throughout the whole of the negotiations was that which properly and naturally tended to a peaceful conclusion. There were salient circumstances which had not tended to a peaceful solution; though he was not charging against the Government that it was their object to avoid a peaceful solution. There was no justification whatever for saying that there had been obstinate resistance on the part of the Boer Government. They offered nearly everything the right hon. gentleman wanted, and the franchise differed only in regard to two years from the proposal of Sir A. Milner. Mr. Chamberlain, interposing, said that was only in regard to the franchise: what Sir A. Milner asked for at Bloemfontein, and what they had asked for since, up to the last moment, was such a substantial and immediate representation of the Outlanders as would enable them to work out their own salvation. Sir W. Harcourt, continuing, entirely accepted that; but at the same time said it was acknowledged that the law passed by the Transvaal with regard to the franchise only differed from the proposal of Sir A. Milner by a matter of two years, and subject to an inquiry as to its sufficiency. It was quite true that the Government of the Transvaal objected at that time to an inquiry. But this objection was afterwards withdrawn, and they agreed to a general inquiry. Was that criminal obstinacy? He maintained that until the Government shut the door on these negotiations the Transvaal were

step by step, due to the wise advice of the Free State and the Government of the Cape, steadily yielding to pressure. The Colonial Secretary only three years ago told the House that the Imperial Government had nothing to do with the internal affairs of the Transvaal. In Feb. '90, Mr. W. H. Smith said the London Convention of '84 contained no expressed reservation of the Queen's right of suzerainty, and that, although Her Majesty retained under the Convention the power of refusing to sanction treaties made by the South African Republic with foreign States and nations, and with certain native tribes, it was a cardinal principle of that settlement that the internal government and legislation of the Republic should not be interfered with. This answer, Sir William had no doubt, was founded on the views of the Law Officers of the Crown. He regretted that the proposal of Aug. 19th was rejected, and although he desired to say nothing that could be personally disagreeable or offensive to the Colonial Secretary, the right hon. gentleman must pardon him for expressing regret that, having before him the best offer that had been made by the Transvaal Government, he should have thought it right and necessary to denounce it in a speech just after that offer was made, and before it had been discussed, and before the official answer had been sent. He confessed that he did not think that a practice of that kind was likely to lead to a favourable and peaceful conclusion. He had never been able to understand why Her Majesty's Government objected to the offer of the Transvaal Government being made a *prima-facie* basis of settlement. If they had gone into the proposed inquiry they would have been able to show that it was insufficient, and to have convinced the world that it was so. Every one was convinced that the question of suzerainty was dropped in '84; it was never put forward as a basis of action in an official document addressed to President Kruger until '97. The really cardinal point which led to the breach was the despatch of Sept. 22nd, in which Her Majesty's Government declined to go on with any discussion upon the franchise clause because they said it was useless; but they would formulate their own proposals for a final settlement, and communicate them in a despatch. He had not been able to understand from the Leader of the House why these proposals were never made to the Transvaal Government, or laid before this House. He saw no reason why we should not have gone on with the inquiry under the Joint Commission, or why the fair and reasonable proposals which would have recommended themselves to all mankind should not have been made known.—Mr. Chamberlain replied (Oct. 19th) in a speech of nearly two hours and three-quarters' length. Dealing first with Mr. Philip Stanhope's imputation that he and Sir A. Milner had determined in their own minds some months ago that war was the only solution of this difficulty, and that they, therefore, made up their minds to that, he said there was no parliamentary language that could express his reply; that it was a monstrous charge for which not one scrap, not one reference, not one fact, not one quotation, had been given by way of proof. Turning to Sir W. Harcourt's speech, he explained that what he meant in his '96 speech, and what he now repeated, was that unless the Convention was broken the Government had not any claim for interference in the

internal affairs of the Transvaal. But if their fellow-subjects were injured by the conduct of internal affairs in the South African Republic, that gave them at once the right of interference, even under international law, which is entirely independent of all conventions, of suzerainty, or any other of the points in dispute. Having most carefully considered all the circumstances in the light of most recent events, in the light of the ultimatum, in the light of most recent speeches by President Kruger and others, he had now come to the conclusion that war was always inevitable. It was only a conclusion at which he had recently and most reluctantly arrived. From the first day that he came into office he hoped for peace, and at the same time, and in the earlier period, down to the most recent period, he believed in peace; but he again emphatically declared to the House that from first to last in these negotiations, while he had put foremost in his mind the determination at all cost to secure justice for British subjects, and to secure the paramountcy of this country—while he had done that, he had within those limits striven to the best of his poor ability for a peaceful settlement. We were going to war in defence of principles upon which the Empire had been founded, and on which alone it can exist:—Firstly, if we were to maintain our position in regard to other nations, if we were to maintain our existence as a great power in South Africa, we were bound to show that we were both willing and able to protect British subjects everywhere when they were made to suffer from oppression and injustice; secondly, in the interest of South Africa, and in the interest of the British Empire, Great Britain must remain the paramount power in the two Republics and the British colonies of South Africa. The main lines of the policy of the Government and of the Opposition had been the same, and the whole point of difference between the two sides was in the details of the negotiations. He assured Sir William Harcourt that, although it might be true that the desire to get rid of the suzerainty was one of the great objects, one of the motive springs of the Boers, the insistence on the suzerainty by this country did not in itself in any way affect the conduct of the negotiations. No Secretary of the Colonies from Lord Kimberley in '81 had ever said that the suzerainty was abolished. Lord Derby stated in the House of Peers that the condition of things which was implied by the words of the Convention of Pretoria remained, and, although the words were not actually employed, we had kept the substance. Although the particular word was not used in the Convention of '84, the suzerainty was never renounced. He agreed with the Leader of the Opposition—What did the word matter? We were not going to fight about a word, but was that right hon. gentleman willing to fight about the substance? Suzerainty, predominance, paramountcy, call it what you will, he did not care so long as they left the substance. When they talked of the independence of the Transvaal, they always meant that independence limited by the Conventions. The term suzerainty was perhaps better than paramountcy to describe our position as regards the Transvaal, and the latter was better with regard to the Free State. The name of suzerainty was called for by the action of the Boers in attempting to undermine

the substance of suzerainty. Lord Derby refused to abolish the suzerainty, and although the second Convention did not mention it, nevertheless existed. The second Convention substituted for such and such articles of the first Convention other articles, and the preamble of the first Convention remained; and if it remained it was not necessary to put it in the second Convention. As to the publication of the Milner despatch he had telegraphed asking Sir Alfred to give him his views in order to publish them; and the despatch was published as it was received. The Government agreed to accept a five years' franchise as a basis, subject to an inquiry. The Transvaal Government attached to it three conditions. The first was that we should agree to a scheme of arbitration. We accepted that. They then proposed that we should not insist on the suzerainty, and we accepted that, and that we should drop the controversy. The third condition of the Transvaal Government was that there should be no further intervention in their internal affairs; but Her Majesty's Government, with their experience of the Transvaal, having in view the possibility that some difficulty of a similar character might arise, felt it impossible to say that under no circumstances and at no time would they intervene. The reply of the Government to the Transvaal despatch was an acceptance upon every point, except that instead of giving a pledge never again to interfere they expressed their fondest and earnest hope that if these measures were carried out there would be no reason for intervention. The Transvaal went back from their own proposals. As to the new proposals of the Government he fully expected they would be communicated early, but the delay that occurred left the door open to Mr. Kruger, and gave him a last chance. In the interval the Government communicated with President Steyn, and wished to see the result before they committed themselves to their ultimatum. That ultimatum was now dead and buried and would not be raised again, and the situation at the conclusion of hostilities would be quite different. In all the long history of the facts, despatches, and negotiations, there was not in any of them any sign of provocation for bloodshed, or desire for war, or any conspiracy to bring about war. Herepudiated any such suggestion, and was very much more afraid of being told he had been too patient, and moderate into the extreme.—Sir Edward Clarke expressed his opinion that there had been blunders in the negotiations, and that this was an absolutely unnecessary war. For any British Minister, since '84, to assert that this country had a suzerainty over the Transvaal was not only a statement made in defiance of fact, but also a breach of the national faith. The word "suzerainty" was to be found in the Convention of '81, but not in that of '84. There was a deliberate abstention in '84, after the Conference, and an agreement between the Government and the delegates of the Transvaal that that word should be omitted from the Convention. The Convention of '84 was a new one, and had a preamble of its own, and by that Convention the Transvaal was recognised as an independent sovereign State. The British Government got rid of the proposal for a five years' franchise by not accepting the conditions attached to it, and then refused to

go back to the discussion of the seven years' franchise. From that time the case was hopeless. If Parliament had been sitting in August and September there would have been no war with the Transvaal; we should have secured without war the five years' franchise law which Sir Alfred Milner had declared to be better than any of the proposals which Great Britain had made, or we should have had the seven years' franchise with inquiry by Joint Commission and arbitration upon all other points. Mr. J. Morley said it appeared from Mr. Chamberlain's speech that we were not now going to war for the franchise or for suzerainty, but we were going to war for something he called paramountcy. He expressed regret at the tone of Lord Rosebery's letter, with special reference to the Majuba passage of it, and announced that he would vote for the amendment. Mr. Courtney also spoke in its favour. Mr. Stanhope's amendment was in the result negated by 362 to 135, the Address being, before the House rose, agreed to. The majority included the following fifteen Liberals: Sir T. Gibson-Carmichael, Sir Henry Fowler, Sir Edward Grey, Mr. Haldane, Mr. Evershed, Mr. Munro-Ferguson, Sir A. Holden, Messrs. Johnson-Ferguson, Kearley, Wentworth Beaumont, Dr. Douglas, Messrs. Mendl, Paulton, C. E. Shaw, and Sir W. H. Wills. The minority was constituted of, including the tellers (Mr. Stanhope and Mr. S. Evans), 94 Liberals, among whom were Messrs. William Allan, (Gateshead), Atherton Jones, Thomas Bayley, Augustine Birrell, Sir J. T. Brunner, Messrs. J. Bryce, T. R. Buchanan, Burns, Burt, Sir C. Cameron, Mr. Channing, Dr. Clark, Sir Charles Dilke, Messrs. John Ellis, Fenwick, Sir W. B. Gordon, Sir William Harcourt, Mr. Seale-Hayne, Sir J. Kinloch, Mr. Labouchere, Sir Wilfrid Lawson, Messrs. Lloyd-George, T. Lough, M'Kenna, M'Laren, Maddison, John Morley, Fletcher Moulton, Pickard, Sir R. Reid, Messrs. J. Samuel, C. P. Scott, Thomas Shaw, Souttar, Steadman, J. Stuart, Whitaker, F. W. Wilson, H. J. Wilson, J. Wilson (Durham), John Wilson (Govan), and S. Woods; 41 Nationalists; and 2 Unionists, being Mr. Courtney and Mr. Maclean.

[127] **The Raid—Delagoa Bay.** Mr. Chamberlain told Mr. MacNeill (Oct. 19th) that it was proposed to the Transvaal Government that the claim for material damage arising out of the Jameson Raid should be submitted to arbitration, but that Government, in its reply received on July 29th, declined to abandon its claim to moral and intellectual damage. Steps were being taken to prepare a deed of submission of the matter to arbitration—excluding the claim for moral and intellectual damage, and any claim in respect of the disturbance at Johannesburg in '95-6—which required to be settled in concert with the British South Africa Company previous to further communication with the South African Republic—but the progress of events prevented further action. It was impossible to anticipate the situation at the conclusion of hostilities. Mr. Balfour informed Sir E. Ashmead Bartlett (Oct. 26th) that no arrangement had been made with the Portuguese Government with regard to the purchase of Delagoa Bay.

[128] **Army, Militia, Reservists.** A Royal Message was (Oct. 18th) read, declaring "that the state of affairs in South Africa having constituted, in the opinion of Her Majesty, a case

of great emergency within the meaning of the Act of Parliament, Her Majesty deems it proper to provide additional means for the military service, and therefore has thought it right to communicate to the House of Commons that Her Majesty is by proclamation about to order the embodiment of Militia, and to call out her Militia Reserve Force, or such part thereof as Her Majesty shall think necessary, for permanent service." Mr. Balfour (Oct. 20th) moved an Address thanking Her Majesty for her gracious Message. Mr. Wyndham, replying to Sir H. Campbell-Bannerman, said the only immediate and probable step which might be taken in pursuance of this gracious Message was the embodiment of the Militia, and not the calling out of the Militia Reserve. Personally, he could not contemplate the possibility of calling out the Militia Reserve, but Parliament having been called together for a particular purpose, and it being within the competence of no man to predict what would be the issue of a war, the Government felt that it was right at the same time to take all the power which might, although they hoped it might not, be called forth by the prosecution of our operations in South Africa. Mr. Dillon moved an amendment representing "that inasmuch as there are only about 4,000 adult males in the two South African Republics, and that these are not trained soldiers, the embodiment of the Militia Reserve is unnecessary, and that the forces already at the disposal of your Majesty are amply sufficient for the emergency." Mr. Davitt seconded. The amendment was rejected by 299 to 36, and the Address agreed to.

Army Supplementary Estimates for '99-1900 had been presented, proposing in effect (1) that a further number of land forces, not exceeding 35,000 of all ranks, be maintained for the service of the United Kingdom of Great Britain and Ireland at home and abroad during the year ending on the 31st day of March, 1900; and (2) that a supplementary sum, not exceeding £10,000,000, be granted to Her Majesty, to defray the charge which will come in course of payment during the year ending on the 31st day of March, 1900, for additional expenditure in consequence of the military situation in South Africa, in respect of the following Army services, viz. :—

Vote 1. Pay, etc., of the Army . . .	£1,000,000
" 2. Medical Establishments : Pay, etc.	50,000
" 3. Militia : Pay, etc.	250,000
" 6. Transport and Remounts . . .	4,900,000
" 7. Provisions, Forage, and other Supplies	1,900,000
" 8. Clothing Establishments and Services	650,000
" 9. Warlike and other Stores . . .	1,150,000
" 10. Works, etc. : Cost (including Staff for Engineer Services)	100,000
Total	£10,000,000

Mr. Wyndham, in reply to Sir C. Dilke (Oct. 20th) said the 35,000 men was the outside limit of the whole number of men who in any capacity might be called to the colours in addition to the establishment of the home Army. In moving the vote for men, Mr. Wyndham explained that they had to cover the 5800 men they had borrowed from the Indian establishment, and the men who would be retained with

the colours when the mobilisation took place, but who would otherwise have passed into the Reserve. They had called back out of the whole strength of the Reserve—81,000—25,671 men, of whom 22,579 put in an appearance, and took up arms for their country. This was really a magnificent response. Behind the Army Reserve was the Militia Reserve, which would not be called up until the Army Reserve had been exhausted. The 35,000 men being voted formed the whole amount of the margin the Government thought it wise to take, and the embodiment of the Militia had nothing to do with that figure. The vote would, he thought, be sufficient for any possible contingency. After a defence of the short service system, and a detailed statement of the measures taken to reinforce the garrison of South Africa, and for the despatch of an Army Corps (for details, see headed article ARMY), Mr. Wyndham remarked that by despatching thirty-three battalions of Infantry they broke up the organisation of brigades, and they therefore proposed to embody as many battalions of Militia, so as to strengthen the home Army; and provision was also made for strengthening the cavalry and artillery, so as to put us where we were before the war broke out. He warmly acknowledged the spontaneous offers of help made by all our self-governing colonies, and tendered to the employers of labour in this country, for their consideration in regard to the Reservists, the thanks of the Secretary for War and Commander-in-Chief. Sir H. Campbell-Bannerman having spoken in high terms of the extraordinary way in which the Reserve men had come forward, the vote was carried by 230 to 35. On the war vote of £10,000,000 there was further discussion, in course of which Mr. W. Redmond was, after the chairman had called the attention of the committee to continued irrelevance on his part, directed to discontinue his speech, and, on persisting in addressing the committee, ordered to withdraw during the remainder of that day's sitting. The vote was carried by 271 to 32. Replying (Oct. 26th) to Sir H. Vincent, Mr. Wyndham stated that of the Reservists summoned to the colours, 98·04 per cent. rejoined, and 91 per cent. accounted satisfactorily for their absence, leaving 1·05 per cent. as failing to report themselves; of the Reservists who rejoined 7·11 per cent. were found unfit for service. The posts under Government vacated by Reservists would be kept open for them, and a maintenance allowance for their wives and children would be granted. In the Royal Welsh Fusiliers six Reservists were unaccounted for; and so far the Royal Scots had been the only regiment in which all were accounted for, though in four others there remained but one each who had not answered the call.

The Chancellor of the Exchequer (Oct. 23rd) explained how the money for carrying on the war was to be provided (for details see article FINANCE, NATIONAL). Sir H. Campbell-Bannerman acquiesced in the proposal to raise £8,000,000 by Treasury Bills, and a motion for so raising that sum was carried by 336 to 28, the minority consisting of Irish members and one English Radical, Sir W. Lawson. On the report of the supply vote of £10,000,000, Mr. P. O'Brien was "named" by Mr. Speaker for refusing to withdraw a disorderly expression which he had used in the debate, and a motion for his suspension was carried by 316 to 26.

[129] Further War Debate—Mr. Davitt Resigns.

On the second reading of the Appropriation Bill (Oct. 25th), Mr. Dalziel expressed the opinion that one of the greatest difficulties against arriving at a settlement with the Transvaal Government had been that Mr. Chamberlain had had charge of the negotiations. Mr. Davitt denounced the war as a criminal one, and asserted that the Boers were absolutely in the right. As a final protest against the war he intended to ask the Chancellor of the Exchequer to-morrow to relieve him from attending the House. Mr. Labouchere remarked that he could not believe that the Colonial Secretary would eventually find that his war policy had brought him in such an amount of popularity as he anticipated. Sir W. Harcourt remarked that Mr. Chamberlain had not explained how it was that at the Highbury garden party on August 26th, two days before he sent a reply in qualified acceptance of President Kruger's offer of Aug. 19th, he made a speech ridiculing and condemning President Kruger's successive concessions as being like the outcome of a squeezed sponge. Mr. Chamberlain, in reply, would not admit that the speech in question was a provocative one; in no proper sense of the word was it so intended. It was intended to be a plain speech that no one could misunderstand. If he claimed anything for the diplomacy which was called his, but was really the diplomacy of the whole Cabinet, it was that from first to last there was not the slightest justification for the statement that President Kruger had been in any doubt as to the objects the Government had in view, as to the methods they were pursuing, and as to their determination to carry those objects out. The speech was an unofficial warning that no further dilatory proceedings of the kind they had had to encounter during the three months' negotiations would be tolerated. Mr. Courtney remarked that the plain speech anticipated the unplain letter by two days, and prevented the latter from being understood. Second reading of the Bill was carried by 224 to 28. Second reading of the Treasury Bills Bill was agreed to after Sir W. Harcourt had criticised the Chancellor of the Exchequer's finance. The bills passed through committee on Thursday, and were read a third time on the following day (Oct. 27th) after a discussion, in course of which Mr. G. Bowles characterised the war as lamentable and abhorrent, and regretted it as, while it could lead to no good, it might bring this country into great calamity.

The only three Bills which became law during the autumn session were—(a) the Consolidated Fund (Appropriation) Act, (b) Treasury Bills Act, and (c) Second Session Explanation Act. The first applies a sum of £10,000,000 out of the Consolidated Fund to the service of the year ending March 31st, 1900, and appropriates the supplementary supplies granted in the autumn session for the Army; the second empowers the raising of any sum not exceeding £8,000,000 by means of the issue of Treasury Bills; and the last enacts that references in any Act passed in the preceding session of Parliament to the session next ensuing after that session shall be construed as references to the session beginning in the year 1900. Parliament was prorogued on Oct. 28th until Jan. 15th.

ROYAL COMMISSIONS.

The following Royal Commissions have been appointed, and had not (Dec. 1st) presented their reports.

Accidents to Railway Servants (see sect. 98, *supra*).

Historical MSS. (see headed article).

Indian Finance (see headed article **INDIAN EXPENDITURE**).

Local Taxation (see headed article **LOCAL GOVERNMENT**).

London-Government Act Commission, see sect. 70, *supra*.

London University Commission (see headed article **LONDON UNIVERSITY**).

London Water Supply.

Sewage Disposal (see headed article).

Accidents to Railway Servants.—A Royal Commission was appointed, May 30th, '99, "to inquire into the causes of accidents, fatal and non-fatal, to servants of railway companies and of truck owners, and to report on the possibility of adopting means to reduce the number of such accidents, having regard to the working of railways, the rules and regulations made, and the safety appliances used by the railway companies." Lord James of Hereford, P.C. (chairman), Viscount Hampden, G.C.M.G., Hon. Ailwyn Fellowes, M.P., Sir George E. Paget, Bart., Sir G. L. Molesworth, K.C.I.E., Sir J. Wolfe-Barry, K.C.B., Sir Alfred Hickman, M.P., Sir Charles Scott, Mr. John Ellis, M.P., Mr. Fenwick, M.P., Mr. W. M. Acworth, Professor A. C. Elliott, Mr. H. S. Cunyngame, Mr. Walter Hudson, Major-Gen. C. S. Hutchinson, R.E., C.B. Secretary, Mr. Alfred H. Higgins.

Sewage Disposal of. A Royal Commission was appointed during '98 to inquire and report on—(1) What method or methods of treating and disposing of sewage (including any liquid from any factory, or manufacturing process) may properly be adopted, consistently with due regard for the requirements of the existing law, for the protection of the public health, and for the economical and efficient discharge or the duties of local authorities; and (2) if more than one method may be so adopted, by what rules, in relation to the nature of the volume of the sewage or the population to be served, or other varying circumstances or requirements, should the particular method of treatment and disposal to be adopted be determined; and (3) to make any recommendations which may be deemed desirable with reference to the treatment and disposal of sewage. Earl of Iddesleigh (Chairman), Sir Richard Thorne Thorne, K.C.B., F.R.S., Medical Officer of the Local Government Board, Major-General C. P. Carey, Chief Engineering Inspector Local Government Board, C. P. Cotton, Esq., Sir Michael Foster, K.C.B., F.R.S., Professor of Physiology, Cambridge, Col. T. W. Harding, T. W. Killick, Esq., W. Ramsay, Esq., F.R.S., Professor of Chemistry, University College, London, J. B. Russell, Esq., M.D., and Frederick J. Willis, Esq., Secretary.

Seychelles Islands, or Mahé Archipelago, are situated in the Indian Ocean, about 935 miles north of Mauritius, of which British colony they are politically a part. Pop. 16,603. The chief and largest island is Mahé, upon which is Port Victoria, the capital, harbour, and headquarters of H.M. East African squadron. Government is administered by a Governor and

Executive and Legislative Council, subordinate to the Governor of Mauritius. **Exports:** coconuts, coconut oil, sperm, vanilla, coffee, and cloves. For financial statistics see BRITISH EMPIRE (table).

Shah of Persia. See MUZAFFER-ED-DIN.

Sherborne School, Dorsetshire. Refounded by Edward VI. (the earliest school founded by that monarch), 1550, reorganised 1870. Accommodation for 300 pupils. An Exhibition to either Univ. of £40 for four years falls vacant every year; pupils may also compete for **Huish Exhibitions** of £50 for four years; this privilege is allowed to three other public schools only. There are also numerous Foundation, House, and other Scholarships and Prizes. **Head Master,** Rev. F. B. Westcott, M.A., late Fellow Trin. Coll. Camb. **Clerk to Governors,** Mr. James Douglas. **Motto** (royal arms of Ed. VI.), *Hon soit qui mal y pense.* **Some Alumni,** Vice-Chancellor Knight-Bruce, Rt. Hon. Montague Bernard, Sir Lewis Morris, Dr. J. M. Neale, Sir D. Forsyth, Wm. Forsyth, Q.C., Prebendary Sadler, Canon C. E. Hammond, Bishop Whitehead, of Madras, Mr. T. R. Buchanan, M.P., Colonel A. G. Hammond, V.C., etc.

Shipbuilding. See TRADE, '99.

Shipping. See MERCANTILE MARINE, and TRADE, '99.

Shipping of the United Kingdom, The Chamber of. This consists of twenty-five Shipowners' Associations, located in London and the chief ports of the United Kingdom. Its work is largely parliamentary, but it also communicates with the chief Government Departments on all matters affecting the interests of British Merchant Shipping. The affairs of the Chamber are managed by an **executive council**, to which each affiliated association elects one member. This Council is presided over by a **president** and **vice-president**, annually elected at a meeting held in London in February. **President,** Hon. James C. Burns, Glasgow; **Vice-President,** Right Hon. W. J. Pirrie, London; **Secretary,** Mr. W. H. Cooke. **Offices,** 5, Whittington Avenue, Leadenhall Street, E.C.

Shop Assistants, Seats for, See SESSION, SECT. 102.

Shorthand. Recent educational legislation has given a remarkable impetus to shorthand teaching, especially in evening continuation schools. In many higher grade schools and colleges there are facilities for learning, and shorthand schools meet the needs of different classes of students. Shorthand is included in the subjects for both Oxford and Cambridge Junior Local Examinations, for the College of Preceptors' certificate examinations, and for the London Chamber of Commerce examinations. The system almost universally taught is Pitman's shorthand. In the autumn of '97 the Sexagenary of Phonography was celebrated in London, the system identified with his name having been introduced by the late Sir Isaac Pitman in '37. The seventh **International Shorthand Congress** will be held at Paris in the summer of 1900; the general secretary is M. Depoin, 150, Boulevard Saint-Germain, Paris. Of periodicals published in the interests of shorthand, the oldest extant is the weekly **Phonetic Journal**, established in '42. Throughout the country about 100 associations exist for the practice and propagation of Pitman's system, and shorthand writers are represented by the following societies:—The

Incorporated Phonographic Society, established '90, of which Mr. Alfred Pitman is president, has established districts in many large towns, and has examined and granted diplomas to 600 shorthand teachers. The secretary is Mr. H. W. Harris, 100, Mattison Road, Finsbury Park, N. The **Institute of Shorthand Writers**, practising in the Supreme Court of Judicature (registered), established '82, has for its object the promotion of efficiency in note-taking in connection with legal proceedings, and admits members by examination. The hon. secretary is Mr. M. Levy, and the office 4, Serle Street, Lincoln's Inn, W.C.

Shrewsbury School. Founded by King Edward VI. in 1551, augmented by Queen Elizabeth in 1571. One of the seven schools reorganised by the Public Schools Act in '68. The school was moved to a new site (covering an area of 58 acres) in '82. Since '82 its numbers have increased from 170 to 300. **Head Master,** Rev. H. Whitehead Moss, M.A. **Motto,** *Intus si recte, ne labora.* **Distinguished alumni** include, among others: Sir Philip Sidney, Lord Brooke, Marquis of Halifax, and, in the present century, Charles Darwin, Dr. Fraser (Bishop of Manchester), Professor B. H. Kennedy, Dr. Scott (Dean of Rochester), Dr. Thomson (Archbishop of York), the late Bishop of Wakefield, Sir D. Lysons, Lord Thring, Sir C. T. Newton, Earl Cranbrook, and many others.

SIAM.

Siam is a kingdom embracing part of the Indo-Chinese and part of the Malay peninsula. Its territories have dwindled very much in recent years, through the action of France. Agreements made between Siam and France in '93, and between Great Britain and France in '96, recognised as belonging to Siam all the region lying between Burma and Tenasserim on the west and the Mekong on the east, roughly speaking. Kiang Sen, on the Mekong, marks the northernmost point of Siamese territory, and from a point just below Stung-Treng the boundary leaves the river and passes in a S.W. direction to the coast. The two Powers agreed not to operate by their military or naval forces, except in concert for the maintenance of the independence of Siam, within that portion of Siam which is comprised within the drainage basin of the Menam, and of the coast streams of a corresponding longitude. They also undertook not to acquire within that area any privilege or commercial facilities which would not be extended to both of them. It was expressly stated that, though this portion of Siam was marked out for special treatment, no doubt was thrown upon the complete title and rights of the Siamese to the remainder of their kingdom. **Area** about 200,000 sq. miles; **pop.** estimated at 12,000,000, including Siamese 2,500,000, and Chinese and Malays about 3,000,000. **Capital, Bangkok,** pop. about 250,000, situated on the delta of the river Menam, the great natural and economical centre of the kingdom. The royal dignity is nominally hereditary, but each sovereign appoints his own successor. The ruling sovereign is Chulalongkorn. **Executive power** is exercised by the King in conjunction with a Council of Ministers. The Legislative Council consists of the Ministers, certain members appointed by the King, and six princes of the royal house. There are forty-one provinces, each administered by a governor. The country is very

inadequately developed, chiefly owing to the condition of the inhabitants, who are virtually serfs, and to a system of debt-slavery which obtains. Foreign trade centres at Bangkok, and is almost wholly in the hands of foreigners. The first railway in Siam—the Bangkok-Paknam line (narrow gauge), 25 miles long—was opened by the King in April '93. The Bangkok-Khorat railway, 163 miles in length, was inaugurated by the King, March 27th, '97, and, it is hoped, will be finished by the end of 1900. Chief exports: rice, teak-wood, pepper, and fish. The standing army is small, but there is a general enrolment of males as militia. Buddhism is the prevailing religion. Western ideas of civilisation are spreading to some extent, and a few of the Siamese youths are sent to Europe for their education. Moreover, Europeans are now very largely employed in the administration of the country, an Englishman, Mr. Rivet-Carnac, being the King's chief financial adviser. Revenue, '97-8, £1,488,000; expenditure, £1,416,000. Imports, '97, £2,485,807; exports, £3,203,218. See DIPLOMATIC, and INDO-CHINA.

Siberia. A Russian province, larger than Europe, which is only separated from the rest of the empire by the low-lying Ural hills, a slender barrier which is now being broken down by the extension of the Russian railway system into Siberia, and by incorporating the West Siberian governments with the European Russian administrative system. A uniform system of public justice was instituted in July '97 by order of the Czar, in place of the existing arbitrary administration of autocratic officials. Trial by jury was not conceded, but justices of the peace are appointed by the Crown, and they also act as *juges d'instruction*. The higher tribunals consist of eight circuit Courts in the towns of Tomsk, Tobolsk, Chita, Krasnoyarsk, Irkutsk, Yakutsk, Blagovestchensk, and Vladivostok, and a Court of Appeal or Palace of Justice above these at Irkutsk. Area, 4,833,496 sq. m; pop., '97, 5,727,090. Valuable goldfields have been discovered in the Government of Yeniseisk, and in the basins of the Obi, Lena and Amur rivers, 50,000 men being employed in mining. Of recent years thousands of Russian peasants have emigrated hither, and nearly all the fertile soil free of forest and outside the steppes has been occupied. A new sea route through the Kara Sea to Siberia has been lately opened up, chiefly by English enterprise, Captain J. Wiggins being the pioneer. The railway connection between Russia and Siberia forms the greatest railway scheme in the world. After considerable deliberation the Government Railway Commission decided in favour of a complete railway. The total cost, including rolling stock, etc., has been variously estimated between 53 and 55 millions sterling. The first sod was cut at Vladivostok, on May 24th, '91. To facilitate the work of construction, the line was divided into three parts. The first starts from the European frontier in the Ural, and runs eastward; the second from Vladivostok, on the Pacific, running west; while the third is the middle section, near Lake Baikal, and is to join the other two. A *Times* telegram from Vienna, June 8th, '98, gave a report of an interview with M. de Walujeff, Director of the Siberian Railway, who said that on its completion in 1904 it would be possible for a traveller to go round the world in thirty days. As to

the Manchurian deviation, we gave details in our '98 edition of the concession granted by the Chinese Government (for 80 years) to the new concern, under Russian auspices, known as the Eastern Chinese Railway Co.; and the particulars were also contained in a despatch from the British Ambassador at St. Petersburg, published early in '98. The Peking correspondent of the *Times* on March 7th gave a long and elaborate description of the whole undertaking. The *Times* of Oct. 29th, '98, printed a long article by Mr. Arnot Reid, of the *Straits Times*, Singapore, describing a journey from Irkutsk to Moscow, which he carried out between Sept. 28th and Oct. 9th—three hours less than twelve days and nights of continuous travel for the 3700 miles. He journeyed from Peking by the tea-caravan route, and struck the railway works at Masova, on the eastern side of Lake Baikal. Mr. Reid, who reached Moscow on the fiftieth day after leaving Peking, observed a large influx of immigrants along the railway. According to a report dated St. Petersburg, Jan. 22nd, '99, and published by the *Globe* of Jan. 25th, the Russian Government had decided to constitute Port Arthur, instead of Vladivostok, the Pacific terminus of the line. An estimate of the length of the whole line from St. Petersburg, including the portion in Manchuria, printed by *Engineering* on May 26th, gave a total alignment of 5682 miles. It was made up as follows: Western Siberian line, 888 miles; Central Siberian line, 1149 miles; Trans-Baikal line, 737 miles; Eastern Chinese line, through Manchuria, 1043 miles; and Ussuri line, terminating at Vladivostok, 141 miles: total Siberian, 3958. The Trans-Siberian line commences at Tscheliabinsk, which is 1724 miles from St. Petersburg. The whole length of rails from St. Petersburg to Vladivostok will, accordingly, be 5682 miles. The Imperial Commission or Committee held their 32nd meeting on Feb. 8th, '99, and their deliberations and report appear to be well summarised in the British Consular report published in this country in the autumn. This stated that by the commencement of the year regular goods and passenger traffic had been established to Irkutsk, 3830 miles from St. Petersburg. The committee decided in February to spend, in addition to the ordinary provision made for the year, £8,794,376 for the improvement of the western and central sections. The work to which this large sum is devoted consists in relaying the whole of the central and Transbaikal sections and a length of 40 miles of the western portion of the line with rails 72 lb. to the yard, in lieu of the 56-lb. rails with which the line was originally provided; in replacing 1429 wooden bridges by solid structures of stone and iron, inclusive of an iron bridge over the Irkutsk river; in establishing 91 new sidings; rebalasting the greater portion of the permanent way; and in adding to the existing rolling stock 342 engines, 162 passenger carriages, 631 cars of a common type for the conveyance of emigrants and troops, and 8358 goods trucks. The necessary expenditure for relaying the rails and building solid bridges is to be spread over eight years, while the other portions of the work are to be completed within a period of three years. It is hoped that, with the rebalasting of the permanent way and providing it with heavier rails, a maximum speed of 33½ miles an hour for passenger trains will be attained. At present the rate is only 13½ miles for passenger trains

and 8 miles for those carrying goods. The statistics published by the committee show that the passenger traffic increased yearly on the western section on an average at the rate of 50 per cent., while the increase in the quantity of goods transported amounted to 200 per cent. during the second year, to 100 per cent. during the third year, and to 50 per cent. during the fourth year. The goods carried westward on the line consisted to a great extent of grain, while those transported from Russia to Siberia have as yet been inconsiderable in quantity—iron, machinery, hardware, manufactured goods, sugar, salt, and mineral oil constituting the bulk of such goods. The committee hope that in a few years Chinese goods, and especially tea, will be transported westwards through Siberia by the railway. The total quantity of coal which the railway will be called on to carry at no distant time is estimated at no less than 258,000 tons annually.

Sierra Leone, a British colony on the West African coast, founded in 1807. It includes two districts called British Quiaah and Sherbro, the Isles de Los and Mannah. Sierra Leone proper is a peninsula, containing about 300 square miles, but the colony has a coast-line of 180 miles in length. Area, with the Protectorate in the *hinterland*, 34,000 sq. m.; pop. about 350,000. It is bounded on the north by the Grand Scarcies river, which separates it from the French settlements, and on the south by Liberia. On the east the frontier was settled by an agreement made between Great Britain and France in Jan. '95. All possibility of British extension to the east was by this agreement done away with; the colony relinquished all control of the head waters of the Niger, and became inclosed on every side. The interior is divided into 5 districts—Karene, Ronietto, Bandajuma, Koinadugu, Pangoma, each under a District Commissioner. The leading tribes are the Timmanis in the north, the Mendis in the south, and the Yonnis in the middle districts. A railway from Freetown to Songstown (32 miles) was opened in '99, and is to be extended to Rotofunk and Moyamba; and a loan was made of £310,000 by the Imperial Government to cover the cost, under the Colonial Loans Act, '99. The capital is Freetown, with a population of over 30,000. It is the headquarters of Her Majesty's forces on the west coast, consisting of a battalion of the West India Regiment, with detachments of engineers and artillery, and a company of native artillery, besides the West African Regiment, controlled by the War Office, which has recently been raised. The chief exports are palm oil, palm kernels, hides, and rubber. The colony is administered by a Governor, an Executive Council of six members, and a Legislative Council consisting of the Executive and four nominated members. See **BRITISH EMPIRE** (table), and **DIPLOMATIC—History**, '99. The late Sir David Chalmers presented his report on the rising in the Protectorate early in the year, and his decision was on the whole strongly adverse to the policy and administration of Sir F. Cardew, the Governor at the time of the rising. Mr. Chamberlain sent a dispatch (July 7th) deciding that the native police should be retained in the ordinary administration of the Protectorate, that the hut tax should be maintained, the Government having power to remit it either wholly or partially in special cases, the headmen of the towns and groups of

villages being given a commission to collect it, in addition to the commission already given to the paramount chief. These decisions were not in accordance with Sir David Chalmers' advice, but Mr. Chamberlain pointed out that actual experience had shown that the tax was being satisfactorily collected, that the fighting had ceased, an amnesty been proclaimed, and confidence and peace restored.

Silver Question, The. See **BIMETALLISM**.

Skating. The art of figure skating has been very much cultivated during the last few years, and the figures themselves have been greatly elaborated and enlarged in number. Owing to the mild winter all the competitions which were to have come off in England had to be abandoned, but in the Engadine they were in full swing. The St. Moritz week began in the second week in January, when the tobogganing and skating championships were held. Mr. C. Edgington, of Oxford, succeeded in creating a record by covering 19 miles 348 yards in one hour; although he fell twice and dislocated his shoulder, yet with great pluck he finished the course in the above time. Mrs. MacLaren won the Ladies' Bowl. The Symonds Cup for Swiss toboggans was won by S. Allemann. The European Championship Meeting was held at Davos, when the 1000 metres race was won by Peter Oestlund, of Trondhjem, in 1 min. 38 sec., the world's record. He also won the 500 metres in 47½ sec., the 5000 metres in 9 min. 2½ sec., the 1500 metres in 2 min. 27½ sec., and the 10,000 metres in 18 min. 38½ sec. The Freeman Trophy for Ladies' Tobogganing was won by Miss Turner, the Symonds Shield by Mr. B. J. Day. The English Skating Bowl, for figure skating, was won by Mr. A. L. Dinn. In the National Skating Association contests, on Loch Leven, J. Bayne won the One Mile Championship of Scotland in 3 min. 45½ sec. The contests for the Speed Championships of the World were held at Berlin at the beginning of February, but owing to the very bad ice and the unsatisfactory track, the results were very disappointing; however, P. Oestlund won the 500, 5000, and 1500 metres races, J. C. Greve winning the 10,000 metres race. The Figure Skating Championship of the World was contested at Davos on Feb. 12th, when G. Hügel, somewhat to the surprise of those present, was proclaimed the winner over Salchow. The governing body in this branch of sport is the **National Skating Association of Great Britain**, founded in 1879 at Cambridge, and transferred in '94 to London. The Presidents are the Duke of Devonshire, the Earl of Leicester, and the Lord Lieutenant of Cambridgeshire; the Acting President, W. Hayes Fisher, Esq., M.P.; and the Hon. Secretary and Treasurer, Mr. H. Ellington. Offices, 6, Suffolk Street, Pall Mall, S.W.

Sladen Douglas, the son of Mr. Douglas Brooke Sladen, was b. in London, Feb. 5th, 1856, and educated at Cheltenham College and Trinity College, Oxford, where he took a first-class in history. He also holds the degrees of B.A. and LL.B. from Melbourne University, and has held the Chair of History at the University of Sydney, N.S.W. He is well known as an author and reviewer, and in his literary work there are evidences of his extensive travels in Japan, China, Australia, Canada, the United States, and South Europe. He is a constant contributor to the *Queen*, the *Literary World*, and other papers, and amongst his

books are "The Admiral," "On the Cars and Off," "The Japs at Home," "A Japanese Marriage," "Australian Lyrics," "A Poetry of Exiles," "Edward the Black Prince," "Lester the Loyalist," "The Admiral," etc. He has edited "Australian Ballads and Rhymes," "A Century of Australian Song," "Younger American Poets," and, until '99, edited "Who's Who." He is hon. secretary of the Authors' Club and joint hon. secretary of the New Vagabonds Club. Address: 32 and 34, Addison Mansions, Kensington, W.

Small Houses Acquisition Act, '99. See SESSION, sect. 105.

Smith, Goldwin, D.C.L., was b. at Reading, Berks, 1823. Ed. at Eton and Oxford, graduating first class in classics '45; Fellow of Univ. Coll. Oxford '46. He was **Assistant Sec. of the Royal Commission of Inquiry** into the condition of the Univ. of Oxford '50, **Secretary** to a subsequent Commission, under which important University reforms were introduced, and a member of the Education Commission in '58. **Regius Professor of History** ('58 to '66) at Oxford, and was brought prominently into notice by his lectures, which were characterised by great vigour and originality. He championed the cause of the North in the American Civil War, at the conclusion of which he visited the United States on a tour. In '68 he accepted an honorary **Professorship of History** at Cornell Univ., New York, of which University he is now an Emeritus Professor. Since '71 he has resided at Toronto, where he has led an active literary life. During '91 he published "Canada and the Canadian Question," "A Trip to England" in '92, a "History of the United States" in '93, "Oxford and her Colleges," "Bay Leaves: Translations from Latin Poets," "Specimens of Greek Tragedy," "Essays on Questions of the Day," in '94, and "Guesses at the Riddle of Existence" ('96).

SOCIALISM.

Socialism, primarily and broadly, is the name given to the doctrine which proclaims the equal right of all to the material conditions of existence—that is, to the enjoyment of the necessities, comforts, and luxuries of life—and at the same time the equal duty of all to labour in relatively equal proportion (so far as may be needful) for the maintenance of those material conditions. Socialism is thus, in its first intention, an economic doctrine. But by most schools of Socialists this has been, and is, regarded as the necessary foundation of a reconstruction of human life generally—i.e., of a complete readjustment of political, religious, and domestic relations, involving the abolition of their present forms. In the following article the Socialist organisations in England and abroad are briefly reviewed.

England.—The English societies representative of Socialism are: the **Social Democratic Federation**, Sec., H. W. Lee, 337, Strand, W.C.; the **Fabian Society** (*q.v.*), Sec., E. R. Pease, 276, Strand, W.C.; and the **Independent Labour Party**, Sec. John Penny, 53, Fleet Street, E.C. The Social Democratic Federation had in '97 134 branches in existence, with a membership of 11,000. The **Independent Labour Party** was formed at a conference held in Bradford early in '93, and attended by delegates from various Independent Labour organisations already formed, from branches of the Social Democratic Federation, and from the Fabian Society. The

object of the party is the realisation of an industrial commonwealth founded upon the socialisation of land and capital. Its political creed is summed up in the single sentence, "The Independent Labour Party is in favour of every proposal for extending electoral rights to both men and women and democratising the system of government." Stringent regulations have been drawn up for the guidance of candidates elected to the House of Commons, and also to guard the movement against being financed in the interests of any other party. Over the greater part of Lancashire and in other parts of the country branches have for part of their constitution a clause prohibiting members from voting for any candidate put forward by the Liberal, Liberal Unionist, or Conservative Parties. The organisation claims to have over 200 branches and 12,000 members. **Chairman**, Mr. Keir Hardie; **Treasurer**, Mr. France Littlewood; **General Secretary**, Mr. John Penny. The Social Democratic Federation has declared that there was no need for the separate existence of the Independent Labour Party, the proper place for conscientious Socialists being inside a revolutionary Socialist organisation like the Social Democratic Federation.

Germany.—The Socialists of Germany are known as the Social Democrats, and are led by Herren Liebknecht, Bebel, Vollmar, and Singer. They form the strongest political party in the empire, and their aim is avowedly to replace the existing capitalistic order of society by one in which land, capital, and all the means of production and distribution will be owned and worked by the community for the benefit of all its members. They polled 2,120,000 votes, 30 per cent. of the total votes recorded, at the '98 election, an advance of 334,000 since '93, and secured the return of 56 members to the Reichstag. The number of party organs is 76, 22 of which are dailies. They denounce the so-called State Socialism as a system of half-measures dictated by fear, and aimed merely at undermining the hold of the Social Democracy over the working classes by means of petty concessions and palliatives. State Socialism, they say, is Conservative; Social Democracy essentially revolutionary. Therefore the two are irreconcilably opposed. At the '97 Congress Herr Bebel carried a resolution repealing the party regulation which prohibited Social Democrats from taking part in elections for the Prussian Chamber, but it was plainly laid down that no compromise or alliance with any other party should be made. See GERMANY, POLITICAL PARTIES OF.

France.—French Socialists are organised into at least four distinct bodies. The first of these is called the Workmen's party, and is led by M. Jules Guesde, who is an ardent follower of Marxist and collectivist theories. It took its rise from the National Workmen's Congress at Marseilles in '79, and its programme is "the political and economical expropriation of the capitalist bourgeoisie and the socialisation of all the forces of production." In '96 at the Lille Congress this was put a little differently, thus: "The abolition of the capitalist system by means of the conquest of political power by the proletariat, the substitution of social for capitalist property, and the international agreement of working men." It recognises no national obligations that would interfere with its objects, and is at one with most of the

Socialists on the Continent. It claims to include 450 associations, with about 300,000 members, and its strength has been proved in municipal and parliamentary elections. The Possibilist party derives its numbers almost entirely from Paris, and is practically a segment of the Workmen's party, from which it separated in '82. The Blanquist party is also a Parisian society, and derives its title from the old revolutionist Blanqui. It professes itself "atheist, materialist, transformist, republican, revolutionist, communist, and finally internationalist." Its organ is the *Parti Socialiste*, and its members call themselves Communists, as a distinctive title from the collectivist Workmen's party. There are about 10,000 members. The Socialist Republican party consists of Radicals who have evolved into Socialists. MM. Millerand and Goblet are its most prominent members, and its organ is the *Petite République*. An International Socialist Congress is to meet at Paris in 1900.

Austria.—In Austria the Socialist party is strongly organised. There is a powerful propaganda carried on through the Press, and the influence of the party is very marked in the elections. In Bohemia and Silesia the movement has made great way, but not so much in the Alpine districts, though in Feb. '98 it was reported that an anti-clerical and socialistic body, called the Styrian Peasants' League, had 10,000 members. The party is split up into two sections—one led by Dr. Adler, with the *Gleichheit* as its special organ, and the theories of Karl Marx as its creed; and the other led by Herr Hanser, with the *Volkspreste* as its organ. It should be said that a great incentive to the spread of Socialism is the determination to improve their material condition which exists amongst the working classes in all parts of the empire. Therefore Socialism in Austria is very much of a political force, rather than a theoretical adherence to Communistic principles.

Belgium.—The grant of universal suffrage in Belgium brought the Socialists of the country into great and unexpected prominence at the general elections in Oct. '94. No less than 29 Socialist and Radical candidates were returned, chiefly amongst the Walloons. The Socialists have since well maintained their ground in spite of the efforts directed against them by the Clericals.

Denmark.—Socialism in Denmark is of the Marxist order; but here again, as in Austria, political discontent has driven many to join the Social Democratic Federation. These form the moderate section, and tend to join the Radicals, the extreme revolutionary section being very small in numbers.

Sweden and Norway.—The Socialist movement has made little impression on these countries, but the party in Norway numbers about 56 unions, with a total membership of 6000. Its avowed aims are to abolish the private ownership of land and of the instruments of production. In the towns of Sweden the movement has made some little headway, but it languishes for lack of funds. A tacit alliance exists between the Socialists and the Radicals of Norway.

Netherlands.—The Socialist Revolutionary party is the leading body in this country. By a decree of the Cour de Cassation the Socialist League was dissolved in '94 as an illegal asso-

ciation; but 52 branches of it united to form the new body.

Society for Promoting Christian Knowledge. This Society was founded in 1698, and has during the last 200 years originated and supported a number of agencies in this country and abroad for promoting Christian knowledge. The following are some of the chief departments of its work: the Society is the Bible and Prayer Book Society of the Church; it is a Church of England Tract and Pure Literature Society; a Home Church Mission and Education Society; a Foreign and Colonial Missionary Society; and an Emigrants' Spiritual Aid Society. The Society has founded a training college for one hundred school-mistresses, at Tottenham, and maintains a Training College for Lay Workers in the East of London. Upwards of £15,000 (exclusive of grants of publications) was voted last year for Home Education work. The Society has voted a portion of its funds to aid in the establishment and development of Medical Missions and for the training of medical missionaries, lay and clerical, in India and other parts of the world. The total amount of the money and book grants during the last financial year was £55,706 os. 11d. Secs., Revs. W. O. B. Allen, M.A., and E. McClure, M.A. Organising Secs., (Northern Province) Rev. W. Robinson, 26, St. Andrew's Place, Bradford; (Southern Province) Rev. W. B. Taylor. Office, Northumberland Avenue, London, W.C.

Society of Accountants and Auditors. The, was incorporated in '85. Its objects are to provide a central organisation for accountants and auditors, and generally to do all such things as from time to time may be necessary to elevate the status and procure the advancement of the interests of the profession, and to provide for the better definition and protection of the profession by a system of examinations. Candidates for membership (unless they have been in public practice since '85) must pass the examinations prescribed by the Council. President: Andrew Wallace Barr, London; Vice-President: James William Bray Brown, Birmingham; Solicitors: Norton, Rose, Norton, & Co.; Secretary: James Martin, 4, King Street, Cheapside, London, E.C.

Society of Oil Painters, The, until '98 called the Institute of Painters in Oil Colours, has its headquarters in Piccadilly, W. Founded 1883. The Exhibitions, which are held annually, commencing in November, are open to all artists, and the principle of selection is the same as at the Royal Academy (*q.v.*). President, Frank Walton, R.I.; Vice-President, S. Melton Fisher; Secretary, W. T. Blackmore.

Sociology. This is the science of the origin, organisation and development of human society. Of individual workers in sociology Herbert Spencer undoubtedly stands first in this country. The completion of his great systematic work was accomplished during '96 by the publication of the third volume of "Principles of Sociology." In America many of the universities have organised separate schools or departments of sociology. Apart from individual workers and the teaching of the Positivist societies, respectively headed by Dr. Congreve and Mr. Frederic Harrison in this country, and the special societies concerned with anthropology and economics—apart from these there are as yet few successful attempts to found schools of sociology. The

Paris and the **Edinburgh Schools** were fully described in the '94 ed. (*q.v.*), and the **American School** at Hartford in the '95 ed. (*q.v.*). The **International Institute of Sociology** is an association founded by the most eminent sociologists of different countries in '93. The General Secretary is Dr. René Worms, 35, Rue Quincampoix, Paris. The fourth international congress of Sociology in connection with the Paris Institute will be held at Paris at the Sorbonne in 1900. An institution bearing the title of **The London School of Economics and Political Science** was started in Oct. '95, with the co-operation of a number of the leading English economists, and with the aid of the Society of Arts and the London Chamber of Commerce. All communications, either in regard to the School or the Library of Political Science connected with it, should be addressed to the Director, 9, John Street, Adelphi, London, W.C. A bibliography of contemporary productions in sociologic study and research is given each month in the *Revue Internationale de Sociologie* (price 20 fr. per annum), published in Paris (16, Rue Soufflot), and in the *American Journal of Sociology* (price 2s. 6d. per number), published by the University of Chicago Press. Since '96 there has been published (at 16, Rue Soufflot, Paris) the *Bibliothèque Sociologique Internationale*, written by sociologists of all countries. Twenty volumes have already appeared.

Socotra. A large island lying 150 miles off Cape Guardafui, at the entrance of the Gulf of Aden. **Area**, 1382 sq. m.; **pop.** 4,000. Formally annexed by England '76, and now governed from Aden, Capital, **Tamarida**. **Products**: aloes, and also exports dragon's blood (a dye resin), dates, figs, etc. See **BRITISH EMPIRE** (table).

Sodor and Man, Bishop of. See under **PEERS**.

Solicitors' Act, '99. See **SESSION**, sect. 106.

Solomon Islands. The British Islands lie in the Western Pacific, between 7° 30' and 13° S. lat. and 150° and 163° E. long., and include Guadalcanar, San Christoval, Malaita, New Georgia, Gela and Tulage. British protection extends over all the islands between the Solomon and the Torres groups. **Area** about 8400 sq. m. The chief exports are copra, ivory nuts, pearl-shells, etc. The sago palm grows in vast numbers. The German Islands until '99 included Isabel, Bougainville, and other islands; but by the Samoa agreement with Great Britain (concluded Nov. 14th, '99) all the islands, except Bougainville and Buka, were ceded to Great Britain. The islanders are in demand as labourers in Queensland and in New Guinea, and Germany reserved her right to hire them for such purposes.

Somali Coast Protectorate. The British sphere of interest in Somaliland and on the coast of the Gulf of Aden, which has existed since '84, is known by this name. It is administered under the Foreign Office by an Administrator and Consul-General. It has about 400 miles of coast, and extends inland 200 miles, its total area being about 68,000 sq. miles. Within this territory lie the ports Zeila, Bulhar, and Berbera. The boundaries were fixed by agreements with Italy in '94, and with Abyssinia in '97. The chief town of the district is **Berbera**, which has about 30,000 inhabitants. The products are chiefly cattle,

skins and hides, ostrich feathers, ivory, and gum. See **EGYPT** (map).

Somaliland. The country occupying the eastern horn or promontory of Africa. The bulk of it is under the protection of Italy, according to the Anglo-Italian agreement of '91, though there is a British Protectorate on the coast of the Gulf of Aden, and France has a footing at Obok. **Italian Somaliland** is separated by the river Juba from the East Africa Protectorate (British), and has a coastline extending from the Juba to Cape Guardafui, and then along the coast of the Gulf of Aden to the Somali Coast Protectorate (see article above), also British. The area of Italian Somaliland is 89,000 sq. miles, and the population about 450,000. A Convention with the Italian Trading Company of Benadir, whereby the Company undertook the administration of the towns of the territory and of the hinterland was approved (Nov. 28th, '99). As to the French settlement see **FRENCH SOMALILAND**. See also **COLONIES**, etc., OF EUROPEAN POWERS, and **EGYPT** (map).

Somerville Hall. See **WOMEN**, **HIGHER EDUCATION OF**.

SOUDAN.

The Soudan is that section of Africa which lies immediately south of the Sahara. Its limits are variously defined. It may be said to be bounded by the Sahara on the N., by the Abyssinian highlands on the E., by the lands draining to the Congo basin on the S., and by French West Africa on the W. Within these limits it has an area of 2,000,000 sq. miles, and a pop. estimated at from 80 to 90 millions. Lying mainly between 5° and 18° N. lat., it is entirely within the tropics. **Western and Central Soudan** are divided into the states of Gando, Sokoto, Adamawa, Bornu, Bagirmi, Wadai and Kanem. These have now all been absorbed into the provinces carved out by the European Powers. Gando, Sokoto, and part of Bornu are included in Nigeria, under British rule. Kuka, on the western shore of Lake Chad, is the capital of Bornu, and has a population of about 60,000. It is a great meeting-place of caravan routes. Adamawa falls in the Cameroons, a German territory; Bagirmi lies mostly within the limits of French Congo, and by the Anglo-French agreement of March 21st, '99, given in detail below, Wadai and Kanem were recognised as being reserved to France. Wadai extends from Darfur to Kanem, and from French Congo to the Sahara. It has an estimated area of about 150,000 sq. miles, and a pop. of about 1,000,000. The **Mabas**, a Mahomedan negro race, are the ruling tribe; but there are many Arabs also, and these carry on a wide commerce. It was reported in Jan. '99 that the old Sultan, Useph, had died and been succeeded by Abu Said, a son of the former Sultan Ali. A special correspondent of the *Daily Chronicle* stated (Nov. 23rd) that the new Sultan had accepted Turkish suzerainty, and predicted a great Mahomedan rising in Central Africa, inspired by the Sultan of Turkey, who has refused to recognise the Anglo-French agreement of March 20th, '99, and led by the Mahdi-es-Senussi, the head of a sect which is by far the most powerful in the Mahomedan world of Africa. The Tuareg are Senussi Mahomedans; so are the men of Wadai, and Rabah is with them. **Kanem** is a vassal state lying between Wadai and Lake

Chad, with an area of about 30,000 sq. m. and a pop. of about 100,000. Rabah, a former slave of Zebehr Pasha, has established himself in part of Bornu and Bagirmi. His capital is Dikwa in Bagirmi.

Eastern Soudan comprises Darfur, Kordofan, Senaar, the Equatorial Province, and the rich Bahr-el-Ghazal Province. The whole territory, covering an area of 900,000 sq. miles, with a population of over 10,000,000, was under Egyptian rule more or less until '82, when the revolt of the Mahdi alienated it, and broke it up into various districts. After the death of the Mahdi, one of his lieutenants, known as the Khalifa, succeeded to his power, and with Omdurman as his capital, ruled over the revolted provinces, though Darfur and other districts at times asserted their independence of him. The Bahr-el-Ghazal province consists of the entire district watered by the southern tributaries of the Bahr-el-Arab and Bahr-el-Ghazal. It said to be the richest and most fertile province in the Soudan, ivory and rubber being abundant. British influence, by agreements concluded with Germany and Italy in '90 and '91, and apart from her position in Egypt, extends over Darfur and the greater part of the Equatorial Province. Indeed, the Anglo-German agreement of '90 recognised the British sphere as extending from Uganda as far as the confines of Egypt. In '98 the power of the Khalifa was utterly broken, and Khartoum and Omdurman were recaptured. France, however, had for some time been credited with a desire to establish herself in the Eastern Soudan, and in '97, from the Ubangi province of French Congo and from Obok on the Red Sea, expeditions were despatched towards the Nile, and it was arranged that they should meet at Fashoda, the port of Southern Kordofan. The expedition from Obok failed, but the other, led by Major Marchand, succeeded; and when the British forces beat the Khalifa a gunboat expedition, which was sent down the river, found Major Marchand precariously established at Fashoda. His retreat was cut off by a British force, which was at once posted there, and the settlement of the matter was left to the Governments of France and Great Britain. The two Governments agreed in Nov. '98 that Major Marchand should evacuate Fashoda, and on March 21st, '99, an agreement was signed containing the following provisions:—“1. H. B. Majesty's Government engages not to acquire either territory or political influence to the west of the line of frontier defined in the following paragraph, and the Government of the French Republic engages not to acquire either territory or political influence to the east of the same line. 2. The line of frontier shall start from the point where the boundary between the Congo Free State and French territory meets the water-parting between the watershed of the Nile and that of the Congo and its affluents. It shall follow in principle that water-parting up to its intersection with the 11th parallel of north latitude. From this point it shall be drawn as far as the 15th parallel in such manner as to separate in principle the kingdom of Wadai from what constituted in '82 the province of Darfur; but it shall in no case be so drawn as to pass to the west beyond the 21st degree of longitude east of Greenwich (18° 40' east of Paris), or to the east beyond the 23rd degree of longitude east

of Greenwich (20° 40' east of Paris). 3. It is understood in principle that to the north of the 15th parallel the French zone shall be limited to the north-east and east by a line which shall start from the point of intersection of the Tropic of Cancer with the 16th degree of longitude east of Greenwich (13° 40' east of Paris), shall run thence to the south-east until it meets the 24th degree of longitude east of Greenwich (21° 40' east of Paris), and shall then follow the 24th degree until it meets, to the north of the 15th parallel of latitude, the frontier of Darfur as it shall eventually be fixed. 4. The two Governments engage to appoint Commissioners who shall be charged to delimit on the spot a frontier line in accordance with the indications given in paragraph 2 of this declaration. The result of their work shall be submitted for the approbation of their respective Governments.” It was further agreed that equality of treatment in commercial matters should be mutually conceded in the territories situated to the south of the 14° 20' parallel of north latitude, and to the north of the 5th parallel of north latitude, between the 14° 20' meridian of longitude east of Greenwich (12th degree east of Paris) and the course of the Upper Nile. As the result of Col. Martyr's expedition northwards from Uganda in '99 there are only about 350 miles of the Nile which have not been explored and occupied by a British force. Col. Martyr reached as far north as Regat, and a British force is stationed at Fashoda, and between the two places there are about 200 miles of clear water and 150 miles of sudd, preventing the passage of steamboats. See EGYPT (map).

French Soudan includes the whole *hinterland* of Senegal, and the countries to the north of the Niger Territories. By an agreement made with Germany in '94 a line of communication with French Congo was secured, and the Anglo-French agreement of '99 definitely recognised the territory to the east and north of Lake Chad as French. The Niger Convention, which was signed in '98, finally settled the boundaries between French territory and the Gold Coast, Lagos, and Nigeria. (For details see articles under those special headings.) The territory is by no means organised, and consists chiefly of protectorates, covering an area of about 300,000 sq. m., with a pop. of 5,000,000. In '94 the French reached Timbuctoo, and established themselves there. The administration was till '99 in the hands of a Military Commandant, under the control of the Governor of Senegal; but in October '99 the territories were divided between Senegal, French Guinea, and Dahomey, all these colonies being placed under the Governor-General of West Africa at St. Louis. In consequence of complaints made by Lieut. Peteau to the French Colonial Office as to the cruel treatment of natives and abuse of their power by a column under the command of Captains Voulet and Chanoine, which was marching towards Lake Chad, Lieut.-Colonel Klobb was ordered to go with Lieut. Meunier and a small escort, and investigate the complaints. He left Kaye on April 18th, and overtook the column of Captain Voulet at Sinder, in Damangar, half-way between the Niger and Lake Chad (July 14th). Captain Voulet refused to allow him to approach, threatening to fire on him. Lieut.-

Col. Klobb nevertheless advanced, declaring that he would not fire, and he was received with a volley which killed him and several of the escort. The survivors returned to Dosso, to the east of Sarg, and reported the circumstances. The mission was at once outlawed; but in October news came that both Captains Voulet and Chanoine had been shot by their own subordinates. The column then returned to the west, and reported itself to the authorities. Lieutenant Meunier, though severely wounded, recovered. Other expeditions, under M. Foureaux and Major Lamy, and M. Gentil and M. Bretonnet, were at the same time making their way to Lake Chad, but the latter was broken up by Rabah, apparently about the beginning of August, and sinister reports were received as to the fate of the former, though these proved later to be unfounded. See EGYPT and NIGERIA (maps), and SESSION, sect. 14.

South African Republic. See TRANSVAAL.

SOUTH AUSTRALIA.

South Australia is a colony comprising the central section of Australia, and stretching across the entire continent from north to south. The older portion, South Australia proper, lies between 129° and 141° E. long., and from the sea to 26° S. lat. To this was added in 1863 the **Northern Territory**, lying between 129° and 138° E. long., stretching up to the Indian Ocean, and containing an area of 523,620 sq. m. The capital is Palmerston, on the noble harbour of Port Darwin. The Territory possesses a coast-line, counting the chief inlets, of 2000 miles. Mineral and agricultural resources considerable. The population is estimated at about 1600 Europeans, 3400 Chinese, and 20,000 aborigines. Local administration is in the hands of a Resident and officials appointed by Government of the mother colony. Various islands on both the south and north coasts belong to the colony. The whole colony, thus constituted, contains 903,690 sq. m.; pop. 362,897. Capital, **Adelaide**; pop., with surrounding suburbs, 146,125. The settled part in the south of the colony is divided into 44 counties, and 3 pastoral districts. About 200 miles north of Adelaide begins a dry region separating the fertile south from the farther north, which is subject to tropical rains. Three considerable mountain chains traverse this part. There is much fair pasture-land; but the soil and climate of the south are chiefly adapted for the growth of wheat, which has already made the colony the "granary of Australasia," and for vine and olive, both of which are now extensively planted. The mulberry thrives, but sericulture has yet to be introduced. Climate of the south one of the most agreeable and healthy in Australia. The chief minerals are copper, gold, silver, and lead, copper being easily first. Executive, the Governor and responsible Ministry. Parliament consists of Legislative Council and House of Assembly. Council consists of twenty-four members, who sit for four electoral districts, and are elected for 9 years, two from each district retiring every 3 years. £50 freehold or £20 annual leaseholds, or £25 annual rent with a 6 months' registration qualifies for the franchise. The Assembly contains 54 members, representing 27 electoral districts, and is elected triennially by adult suffrage. Members of both Council and Assembly are paid £200 per annum. For local govern-

ment purposes there are 33 municipal and 141 district councils. The colony is represented in the Federal Council of Australasia. The Church of England, the Roman Catholics, and Wesleyans, are the principal denominations. Education is secular, free and compulsory. There is a garrison of about 165 men for the forts protecting Adelaide, and a field force of about 1200 men, mounted rifles, artillery and infantry. Wool is the staple export. There are 1867 miles of railway and 14,280 miles of telegraph. **Revenue**, '98, £2,612,730; **expenditure**, £2,590,390; **imports**, '98, £6,184,805; **exports**, £6,795,774; **public debt**, £24,408,535. See AUSTRALIA, BRITISH EMPIRE (table), and DIPLOMACY.

History. '99.—A Bill lowering the franchise qualification for the Legislative Council from £25 to a household franchise was passed by the Assembly in November; and it was announced that if the Council should throw the Bill out it would be submitted by referendum to the electorate at the next general election. Lord Tennyson arrived at Adelaide (April 10th), and took up his duties as Governor. The referendum on the amended Federal Enabling Bill showed 65,990 votes for and 17,000 against (May 4th). The referendum referred to above on the question of household suffrage for Legislative Council elections resulted in 5,200 votes for and 33,900 against the proposal (23rd). Parliament decided to dispatch a force to aid the mother country in the war with the Transvaal (Oct. 12th). The Government were defeated on a motion of want of confidence proposed by the leader of the Independent Party by one vote (Nov. 28th), and Mr. Solomon formed a new Ministry.

Southwell, Bishop of. See under PEERAGE.

SPAIN.

Alfonso XII. of the House of Bourbon, the late monarch, died in '86, and his posthumous son, Alfonso XIII., born May 17th, '86, will, when he comes of age, be King. Meanwhile the kingdom is under the Queen Regent Maria Christina, who governs during the minority of her son. By the constitution of 1876, Spain is declared a constitutional monarchy, with executive power vested in the King, and the legislative power in the Cortes with the King. Cortes consist of Senate and Congress. The Senate is composed of three classes: those who sit by right of birth or official position, members nominated by the Crown (these two classes not numbering more than 180 together), and 180 elected by the largest taxpayers of the kingdom and certain corporate bodies. The Congress contains 401 deputies, elected by citizens of 25 years of age who have enjoyed full civil rights in any municipality for 2 years. Each province has its own parliament, and each commune its own elected ayuntamiento presided over by the alcalde, for municipal and provincial administration. Religion, Roman Catholic. Public worship of any other creed forbidden. Education is free but inefficient. The principal products are wine, cereals, minerals, and cotton textiles. By the war with the United States in '98 Spain lost Cuba and all her West Indian possessions, besides the Philippine Islands in the Pacific. **Area**, including the Balearic and Canary Isles, each considered a province, 197,670 sq. m.; estimated pop. 17,650,234. **Estimated revenue**, '97-8, £43,591,638; **expenditure**, £42,997,469; **public**

debt, £369,678,700, including over £76,000,000 of Cuban debt; imports, '97, £31,733,644; exports, £36,997,441. See COLONIES OF EUROPEAN POWERS, DIPLOMATIC, FOREIGN ARMIES, and FOREIGN NAVIES.

Political Parties.—Parties have been for years much broken up and intermingled. The Liberals under Señor Sagasta won the general election of '93, and held office for two years. Their adherents numbered 322. Opposed to them were 48 **Conservatives**, led by the late Señor Canovas del Castillo, 15 dissident **Conservatives**, 23 extreme **Republicans**, 16 moderate **Republicans** or **Possibilists**, led by Señor Castelar, and 6 **Carlists**. The **Possibilists** afterwards joined the Liberals, and soon after Señor Castelar gave up politics and retired into private life. Disagreements in Señor Sagasta's Cabinet led to the accession to office of Señor Canovas del Castillo in '95. At the General Election in April '96, about 300 **Conservatives**, 100 **Liberals**, 10 **Carlists**, 10 **Independents**, 8 dissident **Conservatives**, and 3 **Republicans**, were returned. Party distinctions were to a large extent obliterated afterwards by the difficulties in which the country found herself owing to events in Cuba and the Philippines. On the death by assassination of Señor Canovas del Castillo in '97, there was considerable disagreement among the Conservative majority, and a Liberal Cabinet under Señor Sagasta eventually took office. This Cabinet held office through the war, and conducted the peace negotiations, but was evidently weakened by the humiliations thus necessarily inflicted on the country. It was succeeded in March '99 by a Conservative Government under Señor Silvela, and the general election in April resulted thus:—**Ministerialists**, 213; **Ultramontanes**, 30; **Liberals**, 86; **Gamazo Liberals**, 30; **Republicans**, 15; **Carlists**, 4; followers of the Duke of Tetuan, 18; and of Señor Robledo, 5. The **Carlists** apparently lost a good chance in the early months of the year, when the people were still sore at the disasters the war had brought upon them.

History, '99.—The issue of an internal loan of a million of pesetas at 4 per cent. was decreed by the Queen (Nov. 24th, '98). The treaty of peace with the United States was signed at Paris (Dec. 10th), the Spanish Commissioners recording their protest against the refusal of the Americans to give up the sureties deposited in the treasuries of Cuba and Porto-Rico by private Spaniards; against the ultimatum demanding the cession of the Philippines, notwithstanding that this question was not included in the protocol; against the position in which those Spaniards were placed who desired to remain in Cuba; and against the paragraph of President McKinley's Message relating to the blowing up of the *Maine*. Porto Rico and the other Spanish islands in the West Indies, the Philippines, and Guam in the Ladrone, were ceded to the United States, and all sovereignty over and title to Cuba were relinquished. On the reassembling of the Cortes (Feb. 20th), Señor Sagasta read the Bill for the cession of the Philippines, and heated debates on the conduct of the Spanish generals followed. The Government majority having dwindled to a very low figure, the Cabinet resigned (March 1st). Señor Silvela then succeeded in forming a Ministry. The sittings of the Cortes were suspended (6th), and a general election followed, at which the sup-

porters of Señor Silvela obtained a majority over any other party, but not an absolute majority over all parties (April 17th). At the reopening of the Cortes, the Queen Regent announced that a convention for the cession of the Caroline, Pelew, and Ladrone Islands to Germany had been signed, and that a Bill dealing with the matter would be submitted to the Chambers (June 2nd). The price paid by Germany was officially said to be 25,000,000 pesetas, or about £800,000, and Spain retained a coaling station in each group. The Government's financial proposals were made known (17th). The revenue for the current year was estimated at 937,930,415 pesetas, and the expenditure at 937,178,134 pesetas. The Minister of Finance presented a memorandum in which he estimated that the payments made in connection with the colonies from the commencement of the insurrection in Cuba up to March '99 amounted to 1,796,269,462 pesetas for Cuba, 7,697,493 pesetas for Porto Rico, and 165,988,259 pesetas for the Philippines, or 1,969,355,214 pesetas in all. The net debt represented by the loans of the Colonial Department and thus left on the hands of the Government amounted to 1,445,279,787 pesetas, involving an annual charge for interest and redemption, including the interest charges previously paid by the colonies, of 259,056,960 pesetas. It was proposed to introduce a measure for the settlement and conversion of this debt, and to increase the revenue by an income tax, the reform of the octroi tariffs in all the towns and villages, export duties on iron and copper ores, new taxes on the manufacture of sugar and alcohol, a tax on salt works, increases in the price of tobacco, and other reforms as to the sale of stamps, succession duties, and so on. The Chamber approved the Bill ceding the Caroline and other islands to Germany (19th), and accepted the offer of the Queen to give up 2,000,000 pesetas of her civil list (July 13th). The Bill for the reorganisation of the public debt, and authorising the Bank of Spain to issue notes to the value of two milliards of pesetas, was finally approved by the Chamber (28th); but the other proposals of Señor Villaverde for the financial regeneration of the country had to be abandoned. Great dissatisfaction was shown in the Cortes because the Government showed no sign of effecting the military and naval economies that most of the Deputies held to be necessary. It appeared that the Government were influenced by the large numbers of unemployed soldiers and officers brought back from Cuba and the other colonies, the War and Marine Ministers alleging that trouble would probably arise if any attempt were made to cut down the *personnel* of the services. Señor Villaverde, on the other hand, insisted that great reductions in the military and naval estimates must be made. Eventually General Polavieja, the War Minister, resigned, and was succeeded by General Azcarra. A Catholic Congress was held at Burgos in September, at which the Liberalism of the Constitution was denounced as the cause of the misfortunes of the country, and it was declared that "the capital error of Liberalism consists in substituting private judgment for the authority of the Church." It was further urged that religious tolerance should be restricted to the narrowest limits allowed by the Constitution, and that all non-Catholic associations should be forbidden.

In various parts of the country, notably at Barcelona, where a state of siege was declared, the citizens generally, and associations of traders particularly, refused to pay the heavy taxes imposed by the Government, and serious disturbances broke out. At a Cabinet Council (Nov. 16th) the Premier declared that the Chambers of Commerce were fighting not so much against the Government as against the State; but the Government would deal energetically with them and with the malcontents at Barcelona, where martial law had been declared because of the refusal of the citizens to pay their taxes.

Spanish Colonies. See COLONIES, ETC., OF EUROPEAN POWERS.

Speaker. The title of the presiding officer of a legislative assembly. The Speaker may hold office until a dissolution. Should the office become vacant during a session, the new Speaker then elected is presented for the royal approbation, but does not claim the privileges of the House. This great officer has a residence in the Palace of Westminster, and receives a salary of £5000 per annum; he ranks as first Commoner, and is usually awarded upon retirement a pension of £4000 and a peerage. There was no contested election for Speaker from 1839 to '95. The following have filled the office since the meeting of the first reformed Parliament: Sir C. Manners-Sutton (first elected '17), '33-5; Mr. J. Abercromby, '35-9; Mr. C. Shaw-Lefevre (the late Viscount Eversley), '39-57; Mr. J. E. Denison (afterwards Viscount Ossington, and since deceased), '57-72; Sir H. Brand (the late Viscount Hampden), '72-84; Mr. A. W. Peel, now Viscount Peel, '84-95; Mr. Gully since April '95. The Chairman of Ways and Means acts as deputy Speaker in the unavoidable absence of Mr. Speaker. The Speaker of the House of Lords is the Lord Chancellor for the time being. The Chairman of Committees and several other peers are authorised by commission to act as deputy Speaker in the absence of the Lord Chancellor; and should none of these be present any lord may be chosen to act. See COMMONS, HOUSE OF, and PARLIAMENT AND PARLIAMENTARY PROCEDURE.

Spencer, Herbert, was b. at Derby 1820. Ed. by his father, a teacher of mathematics at Derby, and by his uncle, a clergyman. Became a civil engineer, subsequently devoting himself to literature and journalism. He was for five years subeditor of the *Economist*. His first work of importance, "Social Statics, or the Conditions essential to Human Happiness Specified, and the first of them Developed," appeared in '51 (abridged edition '92). In '55 appeared the "Principles of Psychology," afterwards enlarged into 2 vols., and in '61 "Education—Intellectual, Moral, and Physical," which has had a sale of over forty thousand in England, and has been translated into many languages, the most recent being into Sanscrit. In '82 he visited the United States. Among his other important works are: "First Principles"; "Principles of Biology," 2 vols.; "Principles of Sociology," 3 vols.; "Principles of Ethics," 2 vols.; "The Study of Sociology"; "Essays," 3 vols.; "The Man versus The State." The third volume of the "Principles of Sociology," completing the scheme of the great philosophical work—a System of Synthetic Philosophy—which he had set himself, was published in Nov. '96; and

a number of distinguished men of letters and of science combined to mark the occasion by requesting Mr. Spencer to sit for his portrait to Mr. Herkomer, with a view to its being placed in one of the national collections. Mr. Spencer consented to the request. The portrait was exhibited at the Academy exhibition '98. Despite chronic ill-health, Mr. Spencer is now completing the preparation of a revised and enlarged edition of his "Principles of Biology," of which the first volume appeared in '98. Mr. Spencer has always declined academic and other honours. Address: The Athenæum, S.W., and 5, Percival Terrace, Brighton.

Spiritualism. The London Spiritualist Alliance, Ltd., was founded in 1884, in succession to other societies of the same nature, which had preceded it; and was incorporated in '96. The chief work of the society has been to maintain and expound the principles of Spiritualism, viz., a belief in the existence and life of the spirit apart from, and independent of, the material organism, and in the reality and value of intelligent intercourse between spirits embodied and spirits disembodied. While it has listened to other investigators who expound other views, and has offered a free platform at its meetings to those whose opinions, however interesting, it does not feel able to accept, it has been the nucleus of old Spiritualists, who have proved their faith, and desire to maintain it. To their body has been added year by year a gradually increasing number of new inquirers. The Offices of the Alliance are at 110, St. Martin's Lane, W.C. The organ of the Society is *Light*, founded in 1881, the recognised exponent of educated thought in this country on the subjects of which it treats. Circulating in every country, the world through, it conveys an impression, which nothing else can, of the rise and progress of Spiritualism. The first President of the London Spiritualist Alliance and editor of *Light* was, until his decease, Mr. W. Stainton-Moses, M.A. (Oxon.), whose writings, "Psychography," "Spirit Identity," "Spirit Teachings," etc., etc., are well known. The present President of the Alliance, and editor of *Light*, is Mr. E. Dawson Rogers. A valuable library of works on psychic science is available at the offices at St. Martin's Lane. Meetings are held for the discussion of matters of interest to students of psychology, and information can always be obtained by inquirers. It is impossible to say how many Spiritualists there are in Great Britain, but there are local organisations in almost all towns of any importance.

"S. P. G." (Society for Propagation of the Gospel in Foreign Parts). The oldest Missionary Society connected with the Church of England, being incorporated by royal charter in 1701. On the Society's list there are 787 ordained missionaries, including 12 bishops; and of these 252 are labouring in Asia, 192 in Africa, 42 in Australasia and the Pacific, 211 in North America, 51 in the West Indies and South America, and 39 (chaplains) in Europe—the number of languages in which the Gospel is preached being 54. In the Society's colleges there are about 3200 students; and 2900 lay teachers are employed in the various Missions. Nearly 40,000 children are receiving instruction in the Mission Schools in Asia and Africa. The income for '98 was £132,356. Office, 19,

Delahay St., Westminster. **Secretary**, Rev. H. W. Tucker, M.A.

Sprigg, The Rt. Hon. Sir John Gordon, P.C., K.C.M.G., D.C.L. (Oxon.), is a son of the late Rev. James Sprigg, A.M., of Ipswich, and was born in 1830. After working in the House of Commons as a member of Messrs. Gurney's staff, he went for reasons of health to South Africa in '58 and settled there. Elected in '69 to represent East London in the Cape Parliament, he soon gained office, and has been three times Prime Minister of the colony. His second term of office closed in '90, when Mr. Rhodes succeeded him; but in '93 he became Finance Minister under Mr. Rhodes, on whose fall in Jan. '96 he became Prime Minister for the third time. He came to England as the representative of the Cape at the Jubilee festivities in '97. He resigned with his fellow-Ministers after a vote of want of confidence had been carried by a majority of 2 votes by the House on reassembling after the general election in '98.

Stalker, Rev. James, D.D., was born in 1848 at Crieff, and educated at Edinburgh University, where he graduated M.A. His theological studies were carried on at the New College (Edin.), and at Berlin and Halle. In '74 he was ordained minister of St. Brycedale Free Church, Kirkcaldy, and after a very successful pastorate was translated to Free St. Matthew's, Glasgow, in '87. Dr. Stalker is one of the most popular religious writers of the day. His works are: "The New Song," "Life of Christ," "Life of St. Paul," "Imago Christi," "The Preacher and his Models" (being the Yale Lectures on Preaching), "The Four Men," "The Trial and Death of Jesus Christ," and "The Two St. Johns." Address: 6, Claremont Gardens, Glasgow.

"Standard, The." First published in 1827. It is in the front rank of the political journals that rose into importance almost immediately after the abolition of the Paper Duty ('61). Its political principles are Conservative; but it reserves, and often exercises, the right of sharply criticising the action of the Conservative party. During the American Civil War, the letters of its correspondent "Manhattan" were very popular. Among its war correspondents have been Mr. G. A. Henty and Mr. Cameron, the latter of whom was killed in the Bayouda desert. The present editor is Mr. W. H. Mudford. *The Evening Standard* (1857) is an evening edition of the morning paper.

Standing Committee. See PARLIAMENT AND PARLIAMENTARY PROCEDURE.

Standing Orders. This term was originally applied to certain Orders made by either house of parliament to regulate its own procedure. Orders made by either house may in respect of their time for remaining in force be classified under three heads. (1) Standing Orders, which are permanent regulations, although liable to be suspended upon extraordinary occasions—*e.g.*, to secure the rapid passing of bills of a pressing nature. (2) Sessional Orders, which continue in force only during the session in which they were made, although they may be renewed from year to year. (3) Orders indefinite in their duration. Of these three classes the Standing Orders are the most important for purposes of procedure. The **Roll of Standing Orders of the House of Lords** has been regularly published at intervals. But until 1854 the Standing Orders of the House of Commons, with the exception of those relating

to private bills, had never been published by authority. The Commons Standing Orders relative to public business were revised and reprinted in '88 (see PARLIAMENT AND PARLIAMENTARY PROCEDURE) and the Lords Standing Orders were considered and amended in '89.

"Star, The." A Radical evening paper, devoted to the interests of the advanced Democratic movement both in Great Britain and Ireland. It first appeared Jan. 17th, '88, and has attracted attention by its promptness in obtaining information, its outspoken articles, large size, and wide circulation. The daily sale was certified in June '96 to exceed 210,000 copies. **Office**, Stonecutter Street, E.C.

State Children's Association. The object of this Association is to obtain individual treatment for children under the guardianship of the State. It therefore seeks to obtain the dissolution of large aggregated schools, so that the children may be brought up, where possible, in families; to dissociate the children from all connection with the workhouse and the officials who have to deal with a pauper class; and to obtain for the State further powers of control over neglected children. **Chairman**, the Right Hon. Earl Grey; **Hon. Sec.**, Mrs. Francis Rye; **Sec.**, Miss F. P. Philp; **Office**, 58, Old Broad Street, E.C.

State, Great Officers of. (1) The Lord High Steward, (2) The Lord High Chancellor, (3) The Lord High Treasurer, (4) The Lord President of the Council, (5) Lord Privy Seal, (6) Lord Great Chamberlain, (7) Lord High Constable, (8) Earl Marshal, and (9) the Lord High Admiral. They are always of the Privy Council, and the first five take precedence of all dukes who are not of the blood royal, while the others have place of all peers of their own degree. Nos. 1 and 7 when existing, and Nos. 6 and 8, have no share in the government of the country, and the duties of Nos. 3 and 9 have long been performed by commission. See CHANCELLOR, TREASURY, and other articles.

State Pensions. For an exhaustive article on this subject, see eds. '93 and '94. See also OLD AGE PENSIONS.

Stationery Office (Princes St., Westminster) provides the public offices and Parliament with books, stationery, etc., and arranges for the greater part of the printing required by them. In Oct. '88 the Controller of the Stationery Office was appointed by Letters Patent, under the Great Seal, to exercise all rights and privileges in connection with copyright, the property of Her Majesty. **Controller**, T. D. Pigott, C.B. (£1500); **Assistant Controller**, E. P. Plowman (£750).

Stationery Office Publications. The vast number of papers issued to the public under the superintendence of Her Majesty's Stationery Office renders it impossible to enter much into detail; but they comprise books affecting the military, naval, and civil services, reports of the scientific results of the voyage of H.M.S. *Challenger*, calendars of State Papers, chronicles and memorials, and publications of the Record Commissioners, rules under the various Acts of Parliament, papers issued by, or affecting, the Board of Trade, the Education, and Science and Art Departments, and the Local Government Board, Explosive and Factory Books and Forms, Customs Forms, Survey publications, and numerous miscellaneous books. The following are a few of the most important books issued since our last edition: Vol. xiii. of **The**

Revised Statutes, covering the years 1868 to 1871, and containing all the unrepealed Acts of that period; **Statutory Rules and Orders** of a public and general character issued during 1897; and the cheap edition of the **Public General Acts** passed in 1898. On **Geology** we have **Memoirs** on **Berwick-on-Tweed**, **Bognor**, **Bournemouth**, and on **Soils and Subsoils** from a **Sanitary Point of View**. **Papers** and **books** of passing and permanent interest, from all departments, have been constantly appearing. The **Board of Trade Journal** (monthly) contains useful information for merchants and others, while the **Kew Bulletin** (monthly) ought to interest a large circle, containing as it does such valuable notes on **Economic Produce and Plants**; and the **Journal of the Board of Agriculture** and the **Labour Gazette** appear regularly. Of the **Record Office** publications we have **Calendars of the Reign of William and Mary**, vol. ii.; **State Papers on Venice**, vol. ix.; **Treasury Papers**, vol. vii., and several vols. of **Patent and Close Rolls** of **Edward I.**, **Edward II.**, and **Edward III.**; and **Acts of the Privy Council of England**, vol. xvii. The publishers, who also supply all Parliamentary publications, including the **Reports of the Historical Manuscripts Commission**, are **Messrs. Eyre & Spottiswoode**, **East Harding Street, London, E.C.**; **Messrs. Menzies & Co.**, 12, **Hanover Street, Edinburgh**, and **Messrs. Hodges, Figgis & Co., Ltd.**, 104, **Grafton Street, Dublin**. **Free Public Libraries** are supplied by these agents at a discount of 25 per cent. from published prices. The **Admiralty Charts** and other **Hydrographic Publications** are obtainable from **Mr. J. D. Potter** (sole agent for the sale of the **Admiralty Charts**), 31, **Poultry, E.C.** The **Geological Survey Maps** are published by **Mr. E. Stanford**, **Charing Cross, London, S.W.** **Messrs. Menzies & Co.**, 12, **Hanover Street, Edinburgh**, and **Messrs. Hodges, Figgis, & Co., Ltd.**, 104, **Grafton Street, Dublin**. **Patent Specifications** are only to be obtained at the **Patent Sale Office**, **Cursitor Street, Chancery Lane, London, E.C.**

Statistical Society. See **ROYAL STATISTICAL SOCIETY**.

Stead, William Thomas, is the son of **Rev. W. Stead**, **Congregational minister**, **Howdon-on-Tyne**, and was b. **July 5th, 1849**; married '73; ed. privately and at **Silcoates**; apprenticed ('63) to commercial house at **Newcastle Quay**. Appointed editor of the **Northern Echo** '71; and assistant-editor ('80) to **Mr. John Morley** (then editor of the **Pall Mall Gazette**); succeeded him as editor-in-chief '83; interviewed **Gordon** at **Southampton** (Jan. '84); wrote "The Truth about the Navy" (Oct. '84), "The Maiden Tribute to Modern Babylon" (July '85), "No Reduction no Rent," a record of a visit to **Ireland** in the autumn of '86, "The Langworthy Case" ('87), "Truth about Russia," written after a visit to that country in **May and June '88**, and "A Guide to the Paris Exhibition" ('89). Went in **October** to **Rome**, to gather material for a series of "Letters from the Vatican," published in book form under the title of "The Pope and the New Era." Resigned the editorship of the **Pall Mall Gazette** on his foundation of the **Review of Reviews**, of which he is the editor, and of which three independently edited editions are published in **London, New York, and Melbourne**. In **July '93** he published a new periodical, **Borderland**, devoted to the subject of **Psychical Research**, but this was suspended in **Oct. '97**. In '95 he

began the publication of the "Masterpiece" Library, with a weekly issue of the **Penny Poets**, of which in the first four months 2,000,000 copies were sold. The **Penny Popular Novels**, of which more than 9,000,000 have been sold, followed. His **Christmas publications** in '96 and '97 dealt with the **Jameson Raid** and the **State of New York**. In '98 and '99 the **Peace Conference** and the war with the **Transvaal** absorbed his energies. He energetically worked on behalf of the former and against the latter.

Steyn, Martinus Theunis, President of the **Orange Free State**, is the third son of **Martinus Steyn**, of **Bloemfontein**, and a member of the **Executive Council** there, and was b. at **Winbury, Orange Free State**, on **Oct. 2nd, 1857**. He was educated at **Grey College, Bloemfontein**, and in **Holland**, and on **Nov. 17th, '82**, was called to the **English Bar (Inner Temple)**. During the following seven years he practised as an advocate at **Bloemfontein**. In '89 he was appointed **State Attorney**, and some months afterwards raised to the **Bench** as second puisne judge. In '96 he was elected **President of the Orange Free State** by universal suffrage, and since then the relations between the **Orange Free State** and the **Transvaal Government** have been closer. In '97, as the result of the deliberations of a joint federal council, consisting of five members from the **Free State** and five from the **Transvaal**, the franchise was granted to the burghers of both States, and the two Republics agreed to stand by each other if either should be attacked. **President Steyn** invited **Sir Alfred Milner** and **President Kruger** to meet in **Conference** at **Bloemfontein** in **May '99**, and thenceforward was intimately connected with the negotiations which ended in war. See **TRANSVAAL** and **ORANGE FREE STATE**. He is married to a daughter of the **Rev. J. Colin Frazer**.

Steel. See **TRADE**, '99.

STOCK EXCHANGE MOVEMENTS, '99.

The year opened, as the previous year had closed, with a good tone all round. Money, which had ruled rather high in consequence of the disturbance caused by the **Spanish-American war**, and the various political disturbances in **Europe**, had eased to such an extent that on **Jan. 19th**, the **Bank rate** was reduced from 4 per cent., at which it had remained since the previous **October**, to 3½. **Investment stocks** were in strong demand, and **Consols** had recovered to over 111, and in every direction a very hopeful feeling manifested itself throughout the **Stock Markets**. This was fairly well maintained for two or three months, until the unsettled state of affairs in the **Transvaal** began to be felt. **Business** was interrupted, and prices gradually receded, an immediate recovery taking place on the actual outbreak of hostilities in **October**. On **October 3rd**, however, something very near a panic took place on the **Stock Exchange**, where in many instances the lowest prices of the year were touched, **Consols** on that occasion changing hands at 102½, a figure not quoted since **November '94**. The cause of this fall was not entirely due to politics, but concurrently with the tension in the **Transvaal** there was a sudden collapse in the money market in **New York**, where short loans were effected at the unpre-

cedented rate of 4 per cent., our Bank rate being at the same time advanced on an unusual day, viz., Tuesday, from $3\frac{1}{2}$ to $4\frac{1}{2}$ per cent. Immediately afterwards, however, the markets steadied, and prices recovered, this being especially noticeable in the shares of the South African mines. On the whole the year was a very unsettled one on account of the sudden monetary and political changes, although economic conditions were generally good, the trade returns and the railway traffics, both here and in America, being excellent. The fluctuations in prices, were, however, with a few exceptions by no means great, and were to a certain extent nominal, for during the whole year the public were inclined to hold aloof, preferring to wait until things appeared to be more settled, and they were the more encouraged in this abstention owing to the better return obtainable for money left on deposit with the banks. The year '99 cannot, therefore, be regarded as at all a satisfactory year, so far as Stock Exchange business is concerned. Consols and the investment class of stocks depreciated in value; railway stocks did not improve as the large increase in their receipts would have seemed to warrant; American rails were constantly disturbed by the machinations of the wire-pullers and the moneyspasms in New York; foreign stocks were almost a dead letter, with the exception of the movements in Spanish stock; while, in mines, Africans were feverish, but better as regards prices than might have been expected, and Westralians were for the most part neglected, with the exception of certain specialities. On the whole, however, prices did not towards the end of the year compare unfavourably with those of the earlier part.

Consols.—A feature in the Stock Market was the steady depreciation in the price of Consols, which in spite of an occasional rally fell away from $111\frac{1}{2}$ in March to $102\frac{1}{2}$ in October, the subsequent recovery being to but little over 104. This fall was primarily due to the suspension of the Sinking Fund as proposed by Sir Michael Hicks-Beach in his Budget, but partly, of course, to the war, although the immediate expenses of the war were met by the issue in November of three millions of Treasury Bills. At the same time all investment stocks depreciated, although not to the same extent as Consols, this being most marked in the English railway debenture and preference stocks, and least in the Colonial loans, the new issues

offered in the early part of the year being fairly well taken up. Rupee paper was at one time in demand, and changed hands at about 68 in the month of March, but afterwards gradually receded until it reached 61, afterwards recovering to nearly 65.

Foreign Loans.—First class stocks, such as French, Russian, Hungarian, etc., varied very little during the year in spite of politics and money, but they gave way somewhat towards the end of the year, including **Egyptian Unified**, which receded when the Bank rate advanced. The prospect for **Spanish** was regarded as doubtful more than once during the year, as the question whether the interest should be paid in full or not came up for discussion, but in the end no deduction was made, and the price of 66 reached in June was quite recovered by the end of November. **Portuguese** rose smartly in March and again in June, as the reports of an arrangement between the Portuguese and British Governments in regard to the cession of Delagoa Bay gained credence, but after all there was little change. **Argentines**, **Brazilians**, and **Chilians** improved towards the middle of the year, but afterwards receded, and the same would apply to **Mexicans**.

Home Railway Stocks.—In the early part of the year, railways were favourably influenced by the improvement in the political situation, by cheap money, and by dividend anticipations; and as the declarations for the second half of the previous year were satisfactory and the traffics continued to improve, prices advanced until after the dividends for the first half of '99 were announced, but when it was found that in nearly every case the increased takings were almost, and in some cases quite, absorbed by the additional cost of working, prices began to give way, and as the political situation became clouded over, the depreciation became more marked, the fall being greater in October. At no time was business brisk in this department, in spite of the phenomenal receipts, but towards the end of the year there was a moderate improvement, the movements being irregular, however. In the case of the **Great Eastern** there was a steady advance, which at one time carried the price to 138, the traffics being very good indeed; but this is almost the only stock which maintained any advance worth mentioning, while, on the other hand, **North-Eastern** and **South-Western** actually receded, although here also the receipts were excellent. **Great Northern**

deferred at one time rose to 72, but failed to hold, and fell back again to the quotation of the beginning of the year. Great Central deferred,—which road was opened for full traffic in August,—rose to 24, but soon gave way, and fell back to 19. The beginning of the year saw the practical completion of the working arrangement between the South-Eastern and the Chatham, by which the two roads agreed to pool their receipts, and divide in the

proportion of 59 and 41 per cent. The ratification of the arrangement was the signal for a relapse in South-Eastern, which, after rising to 114 $\frac{1}{2}$ for the "A" stock, went back to 108; but Chatham stock, with occasional sets back, managed to maintain the greater part of its rise, at one time reaching 28 $\frac{1}{2}$, while Brighton "A" moved within the comparatively narrow limits of 171 and 185. Metropolitan, after keeping steady during the first three months,

eased and remained dull for the rest of the year. Districts had one or two sharp movements, reaching nearly 43 in the middle of the year, when an arrangement which contemplated the taking over of the road by the Great Western was nearly carried through, but, a hitch occurring, the matter fell through, and the price dropped back to 29, and, although it was again talked about, a fresh recovery only left the price about the same figure as it stood at in January. Great Western was very strong in April, rising to 185, but afterwards fell back again to its old figure of 167, although

in this case the traffic for the first six months showed an increase of £440,000, and for five months of the second half of £400,000, these figures being enormous even when compared against the strike traffics of the previous year. Scotch stocks were at no time very buoyant, and ultimately both Caledonian and North British were quoted below the figures of the end of the previous year. Throughout the year there was little speculation in any railway stocks with the exception of District and Chatham ordinary and second preference, which latter received a dividend of 2½ per cent. in June.

Colonial Railways.—For the first three months of the year, both Grand Trunks and Canadian Pacifics were dead and neglected, but then both began to improve, the latter reading 102½ at the end of May, and this with some fluctuations was pretty well maintained, some disappointment, however, being caused when the directors declared a dividend of 2 per cent. only, the receipts apparently warranting something better. Grand Trunks, with the exception of a smart relapse in October, were well supported, the profits for the year '98 giving the first preference 3 per cent., and for the first half of '99 1 per cent., the price of this stock rising to 88, and of the second preference to 60.

Foreign Railways.—Mexican showed a good appreciation up to the end of May, when there came a relapse, and the market remained dull until the announcement of a dividend on the first preference stock at the rate of 3½ per cent., when there was a fresh advance, but not to anything like the 97½ reached in May. Argentine rails showed a considerable improvement, and were rather freely bought, but here, as elsewhere, the best prices could not be maintained. Nitrate rails improved during the first three months of the year, then reacted, and finally again advanced on the better prospects of the road, the highest price touched being 9½, whereas last year the price fell as low as 48.

American Rails.—This market was inclined to be dull at the beginning of the year, having hardly recovered from the effect of the war, but as trade improved and the Money Market became more settled there was a steady and almost continuous advance, any relapse being usually quickly recovered, although towards the end of the year the monetary position became very disturbed, a fact which has already been referred to. The dividend distributions were not so good as had been expected, considerable sums being spent in betterments, while directors showed a very conservative disposition in retaining large balances in hand. The most noteworthy changes were in New York Central, which advanced from 127 to 147, in Central Pacifics from 43 to 64, in Louisvilles from 66 to 90, in Southern Preferred from 43 to 59, in Norfolk Preferred from 65 to 76, and in Norfolk Common from 18 to 29, the prices towards the end of the year being but little below the best.

Mines.—South African.—For the first two or

three months the South African market was brisk and hopeful, and prices advanced smartly, but in April matters in Johannesburg began to look bad, and prices gave way, although not to any great extent, for until the middle of September great hopes were entertained that a peaceful solution of the Uitlander question would be found. By the end of that month the whole market had broken, but, even at the worst, only in a few instances was the whole of the previous advance lost, and as soon as war actually broke out there was an immediate recovery. Rand Mines, which were regarded as the key of the market, after being quoted at over 45 fell in about one week from 42 to 27½, and recovered almost as rapidly to the same figure, other Kaffir and Rhodesian shares following suit, the market during the latter part of October and November being active and almost buoyant. West Australians during the early part of the year received some attention, but business was mainly confined to specialties, amongst which Lake View, Boulder Perseverance, Associated, Kalgurli, and Brownhill Extended were conspicuous, attention being mostly given to the mines of the Calgoorlie district. After the middle of the year the market became sluggish, nor was there any renewal of the buoyancy of the early months, although the advances were fairly well maintained. At one time Copper Shares attracted a considerable amount of attention, Rio Tintos advancing from 26 to 50, and Anacondas from 7 to nearly 14; but when the price of the metal receded the prices of the shares gave way. De Beers did not alter very much, and were only slightly affected by the outbreak of the war and the investment and isolation of Kimberley by the Boer troops. Indian Mines attracted little notice, and the same may be said of the Klondike Group. Attempts were made to create an interest in American Mines, especially those of the Cripple Creek district, but they met with very moderate success—in fact the Kaffir market overshadowed all others.

The Gold Output from the three popular gold fields showed a steady if somewhat irregular, increase during the year, the returns from the Transvaal being practically stopped after September. In addition to these, the yields from other parts of Australia, the Yukon, and British Columbia were all largely in excess of any previous year.

Stonyhurst College, near Blackburn. Directed by the Jesuit Fathers. First founded in 1592 at St. Omers in Flanders; transferred to Stonyhurst in 1794. **Rector**, the Rev. J. Browne, S.J. The course of studies includes classics, mathematics, science, philosophy, modern languages, preparation for the Oxford and Cambridge Certificate Examinations, the London University degrees, and for the Army. **The Observatory** attached to the College turns out excellent solar and other work. The centenary of the College's existence at Stonyhurst was celebrated in July '94.

Straits Settlements. A British Crown colony in the Malay Peninsula, deriving its name from the Straits of Malacca, which separate the Malay Peninsula from Sumatra, and form the great trade route between India and China. Area about 1542 sq. m.; pop. 580,563. The capital of the colony and seat of government is Singapore. The Governor is assisted by Executive and Legislative Councils, the first consisting of nine official members, and the second, of these with seven non-official members, two of whom are nominated by the Chambers of Commerce of Singapore and Penang. The constituent parts are as follows:—**Singapore**, an island off the southern extremity of the Malay Peninsula, area 206 sq. m., pop. 184,554. It is hilly and forested, fertile, and not unhealthy for Europeans. Chief local products, pepper and gambier. The city of Singapore is a great commercial centre for the East. It has a commodious harbour, protected by fortifications. It is the headquarters of H.M. military and naval forces in these regions. The usual garrison consists of a battalion of infantry and two batteries of artillery.—**Penang**, or **Prince of Wales' Island**, lies 360 miles north of Singapore, and about two miles off the coast of Province Wellesley. Area 107 sq. m., pop. 123,886. The port and capital is Georgetown, better known as Penang. A Resident Councillor controls the administration. **Province Wellesley** is politically one with Penang. It stretches 45 miles along the coast of the mainland. Area 288 sq. m., pop. 108,117. **The Dindings**, about 80 miles south of Penang, consist of the island of Pangkor and a small strip of territory on the mainland. Politically this settlement is a part of Penang. Area about 265 sq. m.—**Malacca** is a town and territory 240 miles south of Penang. Its coast, rocky and barren, extends 42 miles. Area 659 sq. m., pop. 92,170. It is ruled by a Resident Councillor, subject to the Governor of the colony.—Included in the administration of the Straits Settlements are the **Cocos** (or **Keeling**) **Islands**, a small coral group lying some 700 miles S.W. of Java (area 9 sq. m., pop. 560), and **Christmas Island**, which lies 200 miles S.W. of Java.—**The Protected States.** On the mainland there are several protected Malay States which, though not part of the colony, are subject to the supervision of the Governor. These countries are rich in natural resources, and for several years Perak and Selangor have exported the greater part of the Straits tin. The soil is fertile, and there are vast areas of forest land available for conversion into plantations; but mining at present makes agriculture a secondary consideration. **Perak**, on the western coast of the peninsula; area 10,000 sq. m., pop. 214,254. **Capital Taiping.** The ports are Taluk Anson and Port Weld. **Selangor**; area 3500 sq. m., pop. 81,592. The capital is Kwala Lumpur.

Sungei Ujong and **Jelebu**, together with **Negri Sembilan**, the name given to a federation of nine small states lying to the north and east of Malacca, are administered by one Resident. Area 3000 sq. m., pop. 68,000. Planting, especially of coffee, is progressing here. **Pahang**, the latest acquired of the Malay States, contains a lot of gold, but needs funds for its development. Area 10,000 sq. m., pop. 64,000. **Johore** is an independent Malay State under Sultan Ibrahim, at the southern extremity of the peninsula. Area 9000 sq. m., pop. about 200,000. **Capital Johore Bharu.** **Perak**, **Selangor**, **Pahang** and **Negri Sembilan** agreed to form one administrative federation under a British Resident-General in July '96. See **BRITISH EMPIRE** (table) and **DIPLOMACY**.

Street Ambulance. See **HOSPITALS ASSOCIATION**.

Street Nuisances, Society for the Suppression of. Secretary, H. J. Johnson; Office, 10, Basinghall Street, E.C.

Stubbs, The Very Rev. C. W., D.D., Dean of Ely, comes of the same Yorkshire stock as his kinsman Bishop Stubbs, and was born at Liverpool in '45. He was educated at the Liverpool Royal Institution School, and Sidney-Sussex College, Cambridge, of which he was an exhibitioner. He took his degree in Mathematical Honours in '68. He also took the Le Bas University prize for an English essay. He was ordained in '68, and became a curate at St. Mary's Church, Sheffield. In '71 he was appointed vicar of Grandborough, Bucks, in '84 vicar of Stokenham, Devon, and in '88 rector of Waver-tree, near Liverpool. He was select preacher at Cambridge in '81, '94, and '96, Lady Margaret Preacher '96, select preacher at Oxford in '83 and '98-9, and has attracted much attention by his sympathy with the workers of the country and his sermons on social subjects. He is a Broad Churchman and a well-known Liberal. His published works include "God and the People," a volume of selections from the writings of Mazzini, "Village Politics," "Land and the Labourers," "Christ and Democracy," "For Christ and City," "Christ and Economics," "Christus Imperator!" a "Creed for Christian Socialists," "Historical Memorials of Ely Cathedral," "Charles Kingsley and the Christian Social Movement," "Bryhtnoth's Prayer and other Poems."

Submarine Boats. See **FOREIGN NAVIES (France)**.

Suez Canal. (For history of the canal see previous eds.) The traffic for '98 exhibited a large increase over '97, being 84,094,507 fr. as against 72,897,635 fr. The number of steamers passing through the canal in '97 was 2986, with a net register tonnage of 7,398,981. For '98 the figures were 3404 steamers, aggregating 9,186,912 tons. During '99 a paper on the Suez Canal, by Sir Charles Hartley, was read by Sir J. Wolfe Barry before the British Association at Dover. The aggregate revenue collected in the first nine months of '99 was £2,803,266, as compared with £2,595,447 in Sept. '98. The number of vessels which passed through the canal in the first three quarters of the year was 2793, as compared with 2696. At the meeting of the Company at Paris on Nov. 9th, the amount of excess dividend to be paid on various coupons falling due on Jan. 1st, 1900, was fixed as follows:—On ordinary shares, 47'50 fr. gross, 43'556 fr. net; on "actions de jouissance," 35 fr. gross, 31'923 fr. net; on

founders' shares, 19718 fr. gross, 18248 fr. net. A colossal bronze statue of Ferdinand de Lesseps was unveiled by the Khedive at Port Said on Nov. 17th, '99.

Suffragans. See BISHOPS and CHURCH OF ENGLAND.

Sugar. See TRADE, '99. For Indian duty on it, see SESSION, sect. 18.

Sullivan, Sir Arthur Seymour, was b. in London, 1842. His father was a military bandmaster. As a choir-boy at the Chapel Royal he gained the "Mendelssohn Scholarship" at the Royal Academy of Music, in '56, and there continued his musical education. He went to Leipzig from '58 to '61. His music to Shakespeare's "Tempest" at once attracted public favour on his return in '62. Constantly writing cantatas ("Kenilworth," '64, etc.), oratorios ("Prodigal Son," '69; "Light of the World," '73), anthems, songs, etc., he yet remained without any specially extensive popularity, till he hit upon a vein of burlesque operetta, which he produced in conjunction with W. S. Gilbert, who wrote the librettos. The first of these was "Trial by Jury" ('75), followed by "The Sorcerer" ('77); "H.M.S. Pinafore" ('78), which ran for 700 consecutive nights, and was undoubtedly the greatest success in England and in the United States of any work of the kind; "Pirates of Penzance" ('80); "Patience" ('81); "Iolanthe" ('82); "Princess Ida" ('84); "Mikado" ('85), revived in '88; "Ruddigore" ('87); and "The Yeomen of the Guard" ('88). For the Leeds Festival, in Oct. '86, he wrote the "Golden Legend," "Ivanhoe" was produced in '91, and in Sept. '92 a new opera, "Haddon Hall," the libretto of which was written by Mr. S. Grundy, was brought out at the Savoy, and gained fresh distinction for the great composer. The association with Mr. Gilbert was resumed in '93 with "Utopia Limited," and in '96 with "The Grand Duke." In '95 "The Chieftain" was produced at the Savoy, the libretto being by Mr. F. C. Burnand, and in '98 "The Beauty Stone," the libretto by Messrs. Comyns Carr and A. W. Pinero. Sir Arthur was knighted in '83: he also possesses the Legion of Honour, the House of Coburg Royal Order, the Medjidieh, and the Royal Victorian Order. He received the honorary degree of Mus. Doc. of Cambridge in '76 and of Oxford in '79.

Summary Jurisdiction Act, '99. See SESSION, sect. 107.

"Sun, The," is an independent Unionist evening paper, circulating widely in London and suburbs. The Editors are Mr. Arthur Brasher and Mr. Sidney Lamert, who have joint control. It devotes much attention to sport and finance, as well as to general and political news, and its cricket and football editions have achieved much popularity.

Sunday Closing Bill. See SESSION, sect. 64.

Sunday School Association, The, founded in 1833, exists in connection with the Unitarian and Free Christian Churches. Its objects are the publication of suitable books for Sunday-schools, and the promotion generally of Sunday-school education. It seeks to teach the young that the discoveries of modern science and the results of the best Biblical criticism are not foes to be resisted but friends to be welcomed. **President**, Mr. Stephen S. Tayler; **Hon. Secretary**, Mr. Ion Pritchard; **Business Manager**, Mr.

B. C. Hare. **Office**, Essex Hall, Essex Street, Strand, W.C.

Sunday School Union. This Union was founded in 1803, and its objects are to stimulate and encourage Sunday-school teachers, at home and abroad, to greater exertions in the promotion of religious education; by mutual communication to improve the methods of instruction; to ascertain those situations where Sunday schools are most needed, and promote their establishment; to supply the books and stationery suited for Sunday schools at reduced prices. **President for 1900**, Albert Spicer, Esq., M.P.; **Chairman of Council**, F. F. Belsey; **Secretaries**, W. H. Groser, B.Sc., J. Edmunds, and C. Robottom. **Treasurer**, Mr. S. Hope Morley. **Organ**, *Sunday School Chronicle* (Benevolent Department), 56, Old Bailey, E.C.; (Publishing and Retail Departments), 57 and 59, Ludgate Hill.

Sunday Society, The, was founded in '75, to promote the opening of museums, art galleries, libraries, and gardens on Sundays. In '96 H.M. Government arranged for the Sunday opening of the great National Museums and Galleries in the Metropolis. These institutions continue to be opened on Sundays, and in addition there are now over a hundred museums, art galleries, libraries, and gardens opened every Sunday by the municipal authorities throughout the country. By the Sunday opening of the National Museums in London the first object of the Society has been secured, but as the Lord's Day Act of Geo. III. stands in the way of Science and Art collections being opened, lectures delivered, or concerts given, on Sundays by private enterprise, the Society is now advocating a repeal of this old statute, and the passing of a new Act that will give freedom for the enjoyment of literature, science and art, whilst safeguarding Sunday from becoming an ordinary working day. **President**, Mr. Hodgson Pratt. **Deputy-President**, Rev. Canon Barnett, M.A. **Hon. Secretary**, Mark H. Judge, A.R.I.B.A., 7, Pall Mall, S.W.

Supply. The sums necessary to defray the charges for the Army, Navy, Civil Services, Customs, Post Office, etc., are voted annually by the House of Commons in Committee of Supply. The sums required are granted for the financial year ending on March 31st; and although a vote or votes on account are sometimes granted during the session for a part of the year, the whole sum voted during the session or in a case like that of '95 in the two consecutive sessions, for any service is for the full period of twelve months. The Estimates, framed by the respective departments and approved by the Treasury, are laid upon the table soon after the commencement of each session, and any items which may be subsequently found insufficient, or any unforeseen charges, are provided by the Supplementary Estimates. **Votes of credit** for military and naval expenditure of an urgent character are also voted in Committee of Supply. On the resolution embodying the vote for the number of men for the army is founded the Army (Annual) Bill, which provides, during twelve months and no more, for the discipline and regulation of that force. The system of granting supplies for only twelve months involves a meeting of Parliament every year, and provides at once a safeguard against the permanence of the military establishment and a means of continuing it periodically in such strength as the

House itself may deem to be necessary. A new rule for discussions in Committee of Supply was adopted in the Session of '96, and was again adopted in '97 and '98. Supply is made the first order of the day on Friday, unless the House order otherwise, directly the Committee of Supply is appointed. Twenty-three days are allotted for the business of Supply, and if these have all been given and occupied by Aug. 5th, all outstanding Votes are put forthwith by the Chairman on the morning of the twenty-second day, and on the twenty-third day the Speaker puts all the outstanding reports of Supply. The great merit of the scheme is that it gives private members an opportunity during the effective parliamentary months of bringing important questions forward and having them discussed. For the Civil Service estimates for '99-1900 see FINANCE, NATIONAL; see also SESSION, sect. 35.

Supreme Court of Judicature. The Supreme Court was formed by the consolidation of all the superior courts of the kingdom of England, excepting only the House of Lords and the Judicial Committee of the Privy Council. It replaces (a) the Courts of Common Law, the Queen's Bench, Exchequer and Common Pleas, together with the Court of Appeal known as the Court of Exchequer Chamber; (b) the Court of Chancery and the Court of Appeal in Chancery; (c) the Court of Admiralty; (d) the Court of Probate and Court for Divorce and Matrimonial Causes, which replaced the old ecclesiastical courts dealing with similar matters; (e) the London Court of Bankruptcy; (f) the Court of Common Pleas at Lancaster and the Court of Pleas at Durham. The Supreme Court replaces all these by a single court of first instance known as Her Majesty's High Court of Justice, and a single court of appeal known as Her Majesty's Court of Appeal. The High Court of Justice, again, is organised in three divisions—(a) the Queen's Bench Division, in which have been merged the Courts of Queen's Bench, Exchequer, and Common Pleas. It consists of the Lord Chief Justice of England, who is the president, and fifteen puisne judges; (b) the Chancery Division, under the presidency of the Lord Chancellor of England, and having five puisne judges; (c) the Probate, Divorce, and Admiralty Division, consisting of two judges, the senior acting as president, and the junior ranking as a puisne judge. All puisne judges appointed since the foundation of the Supreme Court bear the same title and receive the same salary. Her Majesty's Court of Appeal consists of the Lord Chancellor as president, the Lord Chief Justice, president of the Probate Division, and Master of the Rolls, who are members *ex officio*, and of five ordinary members, known as the Lords Justices. As the three dignitaries first named are usually engaged elsewhere, the working Court of Appeal commonly consists of the Master of the Rolls and the five Lords Justices. The distribution of business between the several divisions of the High Court rests on the general principle that any action may be brought in any one of them. But this rule is modified by law and practice as follows:—(a) The criminal jurisdiction of the Court is exercised solely by the judges of the Queen's Bench Division. (b) Jurisdiction over causes of the following classes is exercised solely by judges of the Chancery Division: (i.) actions for the administration of the estates of deceased

persons; (ii.) actions for the dissolution of partnerships; (iii.) actions for redemption or foreclosure of mortgages; (iv.) actions for the raising of portions or other charges upon land, or the sale of land subject to any charge; (v.) actions to enforce execution of trusts; (vi.) actions for the rectification, setting aside or cancelling of written instruments; (vii.) actions to enforce specific performance of contracts; (viii.) actions for the partition or sale of real estates; (ix.) actions concerning infants and their estates. (c) Jurisdiction over all such causes as would have come before the old Courts of Admiralty, Probate, and Divorce is exclusively exercised by the judges of the Probate Division. To the above general rule there are other exceptions of less importance. The procedure of the High Court has been formed by a process of selection and improvement out of the different forms of procedure observed by the old Courts which have been merged in it. The only differences of procedure now to be observed in the different divisions are such as have a practical value in the despatch of their different business. In all divisions every cause is as far as possible dealt with by a single judge, in whom are vested all the ordinary powers of the Court. The same forms of pleading are prescribed by the rules, although not adopted in practice by all the divisions alike. In all the divisions evidence is given by word of mouth or by affidavits, as may be most expedient. Trial by jury is becoming infrequent in all civil causes, although still most infrequent in the Chancery Division. The Court of Appeal is the same for all causes, and observes an absolutely uniform procedure, although for the more rapid despatch of business it is divided into two courts, each commonly consisting of three members. The procedure of the High Court and Court of Appeal is set out at large in the Rules of 1883. These, although irregular in form and incomplete in substance, constitute our nearest approach to a code of civil procedure. In the year preceding, the various branches of the Supreme Court were for the first time housed in a single building. See JUDGES, and LAW, '99; also SESSION, sect. 108.

Surinam, or Dutch Guiana, is a colony on the north coast of South America, bounded on the east by French Guiana, on the west by British Guiana, and on the south by the mountains which separate it from Brazil. It is governed by a governor and council of four members, all appointed by the sovereign. There is a representative body called the Colonial States, partly elected. A modification in the government and financial arrangements was announced by Queen Wilhelmina in opening the States-general Sept. 20th, '98. The capital is Paramaribo. The chief products are sugar, cacao, fruits, coffee, rice, etc. Some gold mining is carried on also. Area, 46,060 sq. miles. Pop., about 65,000. See COLONIES OF EUROPEAN POWERS.

Surveyors' Institution, The, incorporated by royal charter to secure the advancement and facilitate the acquisition of that knowledge which constitutes the profession of a surveyor—viz., the art of determining the value of all descriptions of landed and house property, and of the various interests therein; the practice of managing and developing estates; and the science of admeasuring and delineating the

physical features of the earth and of measuring and estimating artificers' work. The Institution has over 3000 members, and consists of fellows (F.S.I.), professional associates (P.A.S.I.), associates, honorary members, and Colonial fellows, with a class of students attached. The annual subscriptions are: Students, £1 1s.; associates and professional associates, £2 2s.; and fellows, £3 3s. An entrance fee of £3 3s. is paid by both classes of associates, and one of £5 5s. by fellows. **President**, Mr. Thos. M. Rickman; **Secretary**, Mr. Julian C. Rogers. **Offices**, 12 and 13, Great George Street, Westminster, S.W.

Swaziland. A small native state in South Africa, almost surrounded by the Transvaal on the north, west, and south, but bounded on the east by the Delagoa Bay territory of Portuguese East Africa and Tongaland, which intervene between it and the coast. **Area**, 8,500 sq. m.; **pop.** 60,000. It is a mountainous tract stretching along the Limpopo range, with richly fertile valleys, and its mineral wealth is great, valuable fields of gold and coal being included in it, while its agricultural and pastoral resources are also great. The Swazi are a section of the Zulu race. At the conclusion of the war with the Transvaal Boers, their boundary was carefully delimited, and the independence of Swaziland agreed to. The Transvaal, however, claimed that the country was theirs by a convention made in '81, whereby it was ceded to them in consideration of their preventing all Boer *treks* into Mashonaland. Ultimately, by the convention of Dec. '94, the Transvaal Government was secured "in all rights and powers of protection, legislation, jurisdiction, and administration over Swaziland and the inhabitants thereof," and a Special Commissioner was appointed to superintend the administration. The young King Bunu, however, was recognised as paramount Chief, and it was agreed that the management of the internal affairs of the natives should be administered by the native chiefs in accordance with their own laws and customs, and the natives were guaranteed in their continued use and possession of their land and of all their grazing and agricultural rights. Provision was also made against the imposition of any excessive hut tax, and against the sale or supply of intoxicating liquors to the natives. The capital is Embekelwini. A proclamation was issued (Feb. 26th, '98) repealing all former laws with two small exceptions, and applying the Transvaal laws, except as to customs, to the country. See TRANSVAAL (map).

SWEDEN AND NORWAY.

Under Oscar II., of the house of Bernadotte, in 1815, the kingdom of Sweden was indissolubly united with the kingdom of Norway without prejudice to separate constitution, government, and the laws of either. If the throne become vacant, the Diets of both kingdoms elect, and in default of agreement an equal number of Swede and Norse deputies make an absolute nomination. Affairs common to both kingdoms are administered by a Council of State, on which both nations are represented. —**Sweden.** Under the Swedish Constitution of 1809 the executive power is lodged in the king, who also possesses legislative power in matters of political administration; in other respects such power is exercised jointly by the Diet,

which possesses a veto on all legislation, and the sole right of taxation. Diet consists of two chambers, the first of 150 members (elected by provinces and municipalities for nine years), the second of 230 members (150 representing rural and 80 urban constituencies), elected directly on a property qualification for three years. Local affairs are administered through representative bodies elected in the communes and in the 24 governments into which the country is divided. The State religion is Lutheran; all others, except the Jesuits, are tolerated. Elementary education is compulsory, free, and well organised. The chief exports are timber, cattle, minerals, and corn. **Area**, 172,876 sq. m.; estimated **pop.**, '98, 5,009,632; estimated **revenue and expenditure**, '99, £6,855,167; **debt**, '97, £15,971,762; **imports**, '97, £22,685,126; **exports**, £19,899,748. —**Norway.** The Norse Constitution of 1814, several times modified since, vests the legislative power in the Storting, which has 114 members, who are elected indirectly, the people choosing delegates who elect the Storting. For business purposes it is divided into the Odelsting, composed of three-fourths of the members, and the Lagthing, consisting of the remainder; all new bills originate in the former. If the two divisions do not agree, the combined house deliberates, and the measure must be passed by a two-thirds majority. The King has the right of vetoing the laws passed by the Storting, but if the same bill pass three Storthings separately and subsequently elected, his veto is overridden. The executive power is in the hands of the King with a Council of State. For local government the country is divided into twenty counties, and these into urban and rural communes, all with representative government. The State Church is Lutheran. Education is compulsory, the towns chiefly providing the cost, with subsidies from the state. Of the total area, 26,320 sq. miles are under forest, and only 3 per cent. is cultivated. Timber, animal produce, skins, and tallow are the chief exports. **Area**, 124,495 sq. m.; estimated **pop.** 2,098,400. Estimated **revenue and expenditure**, '99, £4,810,657; **debt**, £10,074,371; **imports**, '97, £14,651,010; **exports**, £9,316,483. See DIPLOMATIC, FOREIGN ARMIES, FOREIGN NAVIES, and NORWEGIAN POLITICAL PARTIES.

Political Parties.—A grave constitutional struggle has arisen between the two countries, from the demand for greater independence for Norway in her foreign policy, which is energetically backed by the Liberals, led by M. Steen. In June '92 the Storting passed a resolution in favour of independent consulates, which King Oscar refused to sanction, and the ministry in consequence resigned. A deadlock ensued, and in July a resolution was passed asking M. Steen to remain in office, and deferring the consulate question *sine die*. In '93 M. Steen resigned, and M. Stang, the Conservative leader, succeeded him, although he was in a minority. The general election of '97 resulted in the return of 79 Radicals and 35 Conservatives and Moderates, as against 59 Radicals and 55 Conservatives in the former Storting. In Sweden there are three parties—the Conservatives, the Radicals, and the Moderates, who incline to the Conservative side and strongly oppose the Norwegian demands.

History, '99.—The King refused his sanction to the resolution of the Storting for a separate flag for Norway without the emblem

of union upon it (Dec. 13th, '98), and the measure was therefore promulgated without his consent. In Oct. '99 the Norwegian Radicals adopted as part of their electoral programme a separate Norwegian Ministry for Foreign Affairs and a separate Norwegian consular system, so as to secure Norway's independence. If their aspirations are realised, the King will be the only bond between the two countries.

Sweden and Norway, King of. See OSCAR II.

Swedenborgians. See NEW JERUSALEM CHURCH.

Swimming, '99. The following are the results of the principal races. On Nov. 23rd, '98, J. H. Derbyshire established a record for 100 yards by swimming that distance in 1 min. $\frac{3}{4}$ sec., his own best and the record previously having been $\frac{3}{4}$ sec. slower. The **Serpentine Christmas Handicap** was won on Christmas Eve by E. Harrison, of Cambridge University Club. Cambridge University beat Oxford University in the swimming matches. On July 8th J. A. Jarvis, the holder, won the **Long Distance Amateur Championship**, which took place in the Thames between Kew Railway Bridge and Putney Pier, the time being 1 h. 9 min. 45 sec. The **City of London Championship** was won by J. H. Helling. On July 15th J. A. Jarvis swam 1000 yards at Walsall in the record time of 14 min. 16 sec., 1 min. 14 sec. faster than the previous fastest, M. A. Holbein, a well-known professional cyclist, on July 25th, swam in the Thames from Blackwall to Gravesend and back, a distance of 43 miles, in 12 h. 27 min. 42 $\frac{3}{4}$ sec. The **Half-Mile Amateur Championship** was won on July 22nd by J. A. Jarvis, the holder, in 12 min. 45 $\frac{3}{4}$ sec., a time which beat his own hitherto record of 12 min. 52 sec. The 100 yards Championship of Ireland was won by C. R. W. McCabe in the Irish record time of 1 min. 10 sec. The 220 yards Amateur Championship was won at Brighton by E. C. V. Lane, the Australian Amateur Champion, in the record time of 2 min. 38 $\frac{3}{4}$ sec. At Leicester, on Aug. 8th, J. A. Jarvis won the **Half-Mile Amateur Championship** in the world's-record time of 25 min. 13 $\frac{3}{4}$ sec., being 55 sec. faster than the previous fastest. The 1000 yards Northern Counties Amateur Championship was won by T. Wildgoose in 15 min. 10 sec. M. A. Holbein, on Aug. 14th, swam in the Solent a distance of about 46 miles, being in the water 12 hours. J. A. Jarvis swam $\frac{1}{4}$ mile in the record time of 5 min. 50 $\frac{3}{4}$ sec. The **$\frac{1}{4}$ -Mile Salt Water Amateur Championship** was won by F. C. V. Lane in 6 min. 30 $\frac{3}{4}$ sec. On Sept. 18th, at Blackpool, F. C. V. Lane swam 300 yards in the record time of 3 min. 47 $\frac{3}{4}$ sec. At the **Bootle S.C. Major W. Taylor** plunged 82 ft., thus beating W. Allason's previous record in '95 by 15 $\frac{1}{2}$ in. J. H. Derbyshire won the 100 yards Amateur Championship at Sunderland, on Sept. 18th, by 60 $\frac{3}{4}$ sec. The **Ulph Challenge Cup** at Yarmouth was won by J. A. Jarvis in the record time of 9 min. 8 sec. The 500 yards Amateur Championship was won by J. A. Jarvis, the holder. On Oct. 2nd, at Paisley, J. A. Jarvis covered 1000 yards in 13 min. 43 sec.; and two days later, at Edinburgh, he swam a $\frac{1}{2}$ -mile in 5 min. 51 $\frac{3}{4}$ sec., an amateur record. F. C. V. Lane and J. H. Hellings, representing Australia, and J. A. Jarvis and J. H. Derbyshire, representing England, swam some matches against each other at the West-

minster Bath on Sept. 30th, which resulted in the defeat of England. The 150 yards Championship of London was won by J. H. Hellings. In **Water Polo**, England beat Scotland, Wales, and Ireland; Wales beat Scotland and Ireland; Cambridge beat Oxford; North beat Midlands; Surrey beat Devon; Surrey v. Middlesex drawn; Sussex beat Kent; Polytechnic S.C., who are the Champions of Middlesex, won the Southern Counties Championship; Manchester Osbornes won the Northern Counties Championship.

Swinburne, Algernon Charles, son of Admiral Swinburne, was b. in London 1837. Ed. at Balliol Coll., Oxford ('57). Visited Florence, and passed some time there. His first productions were two plays, "Queen Mother" and "Rosamond" ('61). These were followed by two tragedies, "Atalanta in Calydon" and "Chastelard," and "Poems and Ballads," which met with severe criticism. His later works are "A Song of Italy," "William Blake, a critical essay"; "Songs before Sunrise" ('71), in which he glorifies Pantheism and Republicanism; "Studies in Song" ('81); "A Century of Rondels" ('83); "Life of Victor Hugo" ('86); a poem on "The Armada" ('88); "A Study of Ben Jonson" ('90); "Astrophel, and other Poems," "Studies in Prose and Poetry" ('94), and "The Tale of Balen" ('96).

Switzerland. A Confederation of nineteen entire and six half cantons, which have been united for Federal purposes since 1848. The constitution of 1874 vests supreme legislative and executive authority in two chambers—viz. (1) a State Council of 44 members, chosen two for each canton and one for each half-canton for three years; and (2) a National Council of 147 delegates of the Swiss people, chosen also for three years, directly by manhood suffrage, one deputy for every 20,000 of the population. The united chambers form the Federal Assembly, to which is confided the supreme government. The executive authority is deputed to a Federal Council of seven members, elected for three years by the Assembly, the president and vice-president of which are elected annually, and are the first magistrates of the republic. The principles of the Referendum (*q.v.*) and of the Initiative are in force. The latter signifies the right of any 50,000 citizens to demand a direct popular vote on any constitutional question. Civil and criminal law, justice, police, public works, and schools are all left under the jurisdiction of the cantonal authorities, while labour legislation may be initiated either by the Confederation or by the cantons. Complete liberty of conscience prevails. Education is free and compulsory. The neutrality of the country is guaranteed by the Treaty of Vienna as indispensable to the general interest of Europe. The Swiss agree to this, but yet claim the right to make alliances, and even to declare war. The chief occupation is agriculture, though there is much manufacturing industry. The principal exports are textiles, silk, clocks and watches, and food produce. **Area**, 15,976 sq. m.; **pop.**, '95, 2,986,848. **Revenue**, '97, £3,662,261; **expenditure**, £3,492,694. The various cantons have their own budgets or revenue and expenditure, and their own debts, the latter always covered by cantonal property, chiefly in land. The **aggregate cantonal debts** amounted, in '97, to £3,234,830. **Imports**, '98, £42,231,405 **exports**, £28,938,333. See FOREIGN ARMIES and for Council see DIPLOMACY.—

History, '99. A law introducing compulsory insurance for workpeople against sickness and accident was passed by both Chambers, and will come into operation on Jan. 1st, 1903.

Sylviculture. See AFFORESTATION.

Szell, Koloman, Prime Minister of Hungary, was b. on July 8th, 1845, at Gosztorig, in the kingdom of whose affairs he now has charge. He graduated at the National University of Budapest, and in '68 entered Parliament, his

political sponsor being the well-known Francis Deák. He founded one of the great Hungarian banks, and is eminent as a financier. After being appointed president of the Parliamentary Committee on Finance he became Minister of Finance in '75, but after the occupation of Bosnia he relinquished that position. He became Premier of Hungary early in '99. Madame Szell is a daughter of the poet Vörösmarty.

T

Ta-lien-wan. See PORT ARTHUR.

Tasmania. An island south of Australia, separated from it by Bass's Straits, 120 miles across. Formerly called **Van Diemen's Land**. Extends 210 miles north to south, and 200 miles west to east, containing 26,375 sq. m., with a pop. of 177,340. Capital, **Hobart**, pop. 40,000, in the south. Second city, **Launceston**, pop. 25,000. Several groups of islands are looked upon as being within the colony, including the Furneaux group, King Island, and Bruce Islands. As to religion, the Church of England, Roman Catholic and Wesleyan Methodist are the chief denominations, numbering respectively 30,810, 87,348, and 11,639 adherents. Education is unsectarian, and compulsory for all children between 7 and 14. Small fees are levied upon those able to pay. Ruled by a Governor and responsible Ministry. There are also a Legislative Council of 19 members elected for a term of six years, and a House of Assembly of 38 members elected for three years. Members are paid £75 per annum. The colony is represented in the Federal Council of Australasia, and a popular vote on the question of Federation showed 13,496 votes for the Federation Bill and 2900 against it (June 4th, '98). For local government there are municipal councils, town boards, and road and water trusts. There is a volunteer force of about 1800 officers and men. The climate is most healthy and temperate. The minerals found are gold, tin, coal, and silver. Wool, wheat, oats, and hay are largely produced, and agriculturists are beginning to turn their attention to fruit and hops. **Revenue, '99**, £946,780; **expenditure**, £856,600; **imports, '98**, £1,650,017; **exports**, £1,803,368; **public debt**, £3,412,904. See **BRITISH EMPIRE** (table); and for Ministry, etc., see **DIPLOMATIC**.—**History, '99.** The Federal Enabling Bill finally passed the Legislature (July 7th), and the popular vote on the question showed 12,931 for Federation and only 779 against. Captain Miles, Minister of Lands, resigned his portfolio and his seat (Oct. 3rd) in consequence of the report of a Select Committee of the Assembly, which found that, while Master Warden of the Strahan Marine Board, he had been personally interested in two tenders for the construction of a breakwater, and had used his position to secure the acceptance of the higher tender. As a consequence of this the position of the Government was shaken, and a vote of want of confidence was carried (8th), a new Cabinet ultimately being formed. H.M. Government, in response to an offer of aid in

the war with the Transvaal in October, gladly accepted the services of a contingent of 125 men, undertaking to treat them in all respects as an integral part of the Imperial forces.

Taylor, S. Coleridge, composer, was born in London, 1875. His father, a West African, studied medicine at King's College, London; his mother was English. He greatly distinguished himself at the Royal College of Music, where his masters were Professor Stanford (composition), Mr. Henry Holmes (violin), and Mr. Algernon Ashton (pianoforte). Several of his works attracted attention at the college students' concerts, but to the general public he first became known through the "Orchestral Ballade in A Minor," written for Gloucester (Three Choirs) Festival, '98. His cantata "Hiawatha's Wedding Feast," was warmly welcomed in '99, when also he composed for provincial festivals a "Solemn Prelude" for orchestra (Worcester), the overture to the "Hiawatha" trilogy (Norwich), and the second part of the trilogy "The Death of Minnehaha" (Hanley).

Tea. See **TRADE**, '99.

Teachers' Guild, The, was established as a registered society in 1885. The members of the Guild number about 4250, of whom about 1800 are in the Central Guild and the rest in the 30 local branches. The work upon which the Council are at present especially engaged is the attempt to raise teaching to the rank of a learned profession through registration, and the establishment of an efficient test of teaching power, and to provide for the organisation of Secondary Education in harmony with the views of teachers. **Chairman**, The Rev. Canon the Hon. E. Lyttelton, M.A., **Head Master** of Haileybury College; **General Secretary**, H. B. Garrod, M.A.

Telegraphs. See **POSTAL AND TELEGRAPHIC INFORMATION**.

Telephones Act, '99. See **SESSION**, sect. 109.

Telephones. Under the provisions of the Telegraph Act, '92, the Post Office authorities have acquired the ownership and control of all the trunk wires throughout the kingdom. They also have the sole right of constructing new ones, and the intention is ultimately to provide a complete system of communication between all the important towns in the kingdom. At present the telephonic communication in the towns themselves—which accounts for about 98 per cent. of all messages sent by telephone—is mostly in the hands of the National Telephone Company, which has gradu-

ally absorbed all other telephone companies into itself. The Company holds a licence which expires in 1911. The Company now has 900 exchanges and 1961 call offices in the United Kingdom, with upwards of 130,000 subscribers, transmitting annually some 546,000,000 messages over its wires. The upshot of considerable discussion in and out of Parliament, and of an inquiry made by a Parliamentary Committee, presided over by Mr. Hanbury, M.P., in '98, was the introduction of the **Telegraph (Telephones) Act, '99**, in the '99 Session. See **SESSION**, sect. 109.

The following table gives the telephone rates in the different countries of Europe, and states whether the telephones are in the hands of private companies or of the state :—

Country.	Whether Private or State.	Price of yearly subscription.
Austria . .	State . . .	£8 to £14.
Hungary . .	State . . .	£12.
Switzerland	State . . .	£4 16s., with limit of 400 calls per annum.
France . .	State . . .	£16.
Italy . . .	State and private	£6 14s. to £9.
Sweden . .	State and private	State, £4 8s. Private Co., £5 11s.
Norway . .	Private . .	£4 8s.
Spain . . .	Private . .	Not given.
Holland . .	Private . .	Not given.
Belgium . .	State and private	£10.
Denmark . .	Private . .	Not given.
Germany . .	Mostly State	£7 10s.
England . .	Private . .	In provinces, £3 10s. and £5 to £10. In London, £10 to £17.

Temperance Legislation. See **LICENSING LAWS COMMISSION**.

Tenant and Landlord. See **LANDLORD AND TENANT**.

Tenniel, Sir John, artist, was b. 1820. Showing the possession of artistic taste at an early age, he may be considered as entirely self-taught. He was a successful candidate in one of the cartoon competitions for the decoration of Westminster Hall ('45), and painted a fresco for the Palace at Westminster. His illustrations of books, although not comprising many, have always been characterised by great taste. When "Alice in Wonderland" made its appearance, some portion of the notice it obtained may fairly be attributed to Mr. Tenniel's illustrations. In '51 he joined the staff of **Punch**, with which newspaper he has ever since been connected, and for which he draws the cartoon. Knighted in '93. He lives at 10, Portsdown Road, Maida Hill, W.

Ternina, Milka, the celebrated dramatic soprano, is a native of Croatia. After studying under Dr. Josef Gansbacher, of Vienna, she acquired experience in Leipzig, Graz, and Bremen. In '90 she became *prima donna* in Munich, where her success was great. Her talents have been recognised throughout Germany, and she is a favourite in Russia and America. She first appeared in England at Covent Garden Opera House as Isolde in '98,

and further attracted attention by exceptionally fine impersonations of Brünnhilde and Fidelio.

Terry, Miss Ellen, was b. at Coventry, Feb. 27th, 1848, and made her first appearance on the stage during Charles Kean's Shakespearian revivals in '58, playing the parts of Mamillius in "The Winter's Tale" and Prince Arthur in "King John." When only fourteen she was a member of Mr. Chute's Bristol company, which included Miss Kate Terry, Mr. William Rignold, Mr. George Rignold, Mr. Charles Coghlan, Mrs. Kendal, Mrs. Labouchere, Kate Bishop, and several other now prominent members of the profession. She reappeared in London March '63, as Gertrude in "The Little Treasure," and until Jan. '64 played Hero in "Much Ado about Nothing," Mary Meredith in "Our American Cousin," and other secondary parts. In that year she married and left the stage, but reappeared again in Oct. '67, in "The Double Marriage," at the New Queen's Theatre, London. She afterwards joined Mr. and Mrs. Bancroft at the Prince of Wales's Theatre, where she acted the part of Portia. On Dec. 30th, '78, she made her first appearance at the Lyceum, and has since, in conjunction with Mr. Irving, played in the longest runs ever known of "Hamlet," "The Merchant of Venice," "Romeo and Juliet," and "Much Ado about Nothing." She has also appeared as Viola in "Twelfth Night," as Marguerite in W. G. Wills' "Faust," as Lady Macbeth, as Lucy Ashton in "Ravenswood," as Queen Catherine in "Henry VIII.," as Cordelia in "King Lear," as Rosamonde in "Becket" ('93), and as Imogen in "Cymbeline" ('96). Miss Terry's son plays under the name of Gordon Craig, and her daughter under that of Edith Craig.

Thames Conservancy. The Conservators of the River Thames were constituted a body corporate by Act of Parliament in 1857, and their powers extended by various Acts from time to time. In '94 an Act was passed to amend the constitution of, and consolidate, amend, and extend the statutory powers of the Conservators, to make further provision for the preservation and improvement of the river for purposes of navigation for profit and pleasure, and as a source of water supply for the Metropolis and the suburbs thereof, and for other purposes. The Act increases their powers in several respects, especially with a view to the prevention of pollution. The Conservators have now for this purpose jurisdiction over all the tributaries of the river within its catchment area (extending over 3800 square miles) except a part of the river Lea, and may board and inspect vessels on the river. All the provisions of the existing law as to rights of navigation, removal of obstructions, piers, and landing-places, beacons and lights, pleasure boats, steam launches, house boats, etc., are re-enacted, and in some cases strengthened, and power to dredge as far as the Nore is conferred. No further powers of taking water from the Thames than might previously be legally exercised are given by the Act to the Water Companies; but they are to contribute an additional amount to the sums formerly paid by them. The constitution of the Conservators consists of the following thirty-eight members: The County Councils of Middlesex, Surrey, Kent, Essex, Oxfordshire, Berks, Bucks, and Herts each appoint one Conservator; the Gloucestershire and Wilts County Councils jointly appoint one; the County

Boroughs of Oxford, Reading and West Ham each appoint one, and the Metropolitan Water Companies, one, the Admiralty two, the Board of Trade two, Trinity House two, ship-owners three, owners of sailing barges, lighters, and steam tugs two, dock-owners one, wharfingers one, Corporation of London six, and London County Council six. The offices of the Conservancy are on the Victoria Embankment, near Blackfriars Bridge, E.C.

THEOLOGY, '99.

Nothing has been so remarkable during '99 as the popularity of the works of the Rev. C. M. Sheldon, an American writer. They have been sold by millions in England, and have been read in circles not usually open to religious writings. Probably one cause of this amazing popularity lies in the fact that these books follow the religious trend of the time, and embody in tales of modern life ideas that threaten to become dominant in the Protestant churches. The tendency of these ideas is not merely to depreciate theology, but to ignore dogma. They are concerned with those who are wronged rather than with those who have sinned; they perceive in philanthropy the secret of salvation; they pass over the great acts of redemption (the Crucifixion and the Resurrection), and find in the Sermon on the Mount the highest gift that Jesus gave to humanity. The cry "**Back to Christ**" is increasingly heard in all the churches, and is loudly echoed in Mr. Sheldon's books. Amongst other influences that have produced this cry, that of the higher criticism holds a foremost place. Its results are more and more gaining acceptance, and are fast destroying the belief in the infallibility of the Bible. In this respect, indeed, Protestantism is changing its ground and adopting a new position. The Reformation substituted the authority of an infallible Book for the authority of a Church which had been found not infallible. Now when belief in the infallibility of the Bible is disappearing, Protestants are finding in an infallible Christ the final and supreme authority in religion and morality. This at least is true of the British churches, but judging from the utterances of American divines at the Congregational Council (Boston, Sept. '99) and at the Pan-Presbyterian Council (Washington, Sept. '99), the churches there still cling to the old position and reject the conclusions of the new criticism. In **Anglican theology** stress is laid more and more on the Incarnation. This is strikingly shown in Archdeacon Wilson's book on the "**Gospel of the Atonement**." He says in effect that the Incarnation is the Gospel of the Atonement. The ritual controversy in the Church of England is proving detrimental to progress in theology.

The death of Principal Caird has directed attention to the waning influence of the **Hegelian School**, which he and his brother Edward (now Master of Balliol College, Oxford) did so much to foster in Scotland. It has ceased to be an active power in Scottish theology, and seems perilously near extinction. It is a spent force even in the Established Church, while in the dissenting communions what little influence it had has entirely ceased. Amongst the churches that follow the teaching of Calvin an attempt is being made to rehabilitate his doctrine. This **rehabilitation of Calvinism** gives a very different aspect to the system, and undoubtedly gets rid

of features that were found particularly objectionable by its opponents. The old phraseology is retained, but the religious significance of the terms employed is greatly changed. The starting-point, for example, is different, although the method of interpretation is the same. That method is the recognition of God as the sole Author of man's salvation, but whereas the old starting-point was the Divine Sovereignty, the new is the Divine Fatherhood. This important difference affects the aspect of all the special Calvinistic doctrines. The old conception of the Atonement was that Christ bore our punishment; the new that He bore our sins. The old view of justification was that God, for Christ's sake, pronounces the sinner righteous; the new that God, through Christ, makes the sinner righteous. The old conception of election was that there was no reason for it save in the good pleasure of God; the new regards it as an election not to special favour, but to special duties and responsibilities. So far there have been no attempts to embody these views in definite creeds that will supersede the old standards; but recent Assemblies, Synods, and Conferences have shown that the bonds of the old confessions are strongly felt, and that efforts may soon be made to loose them.

The revival of **catechetical instruction** is one of the most notable features of modern church life. The Church of Rome has never ceased to recognise the importance of this method, nor has the Lutheran Church; but among other communions it has long been in abeyance. The Church of England, however, is showing an increased interest in this matter, and is learning from the Roman rather than from the Lutheran Church, following especially the method of St. Sulpice as taught by Bishop Dupanloup. In '99 the National Council of the Evangelical Free Churches issued a catechism containing fifty-two questions, dealing with the Church, sacraments, ministry, and the relations of Church and State. This catechism is unique in this respect, that its tone is irenic and not polemical, and it has been compiled to emphasise agreements and not differences. The Council intend that their catechism shall be used by religious bodies only, for they strongly object to the action of the Liverpool School Board, who wished it taught in their schools. During '99 the **Anglo-Jewish community** has been much agitated over a proposal to keep the Sabbath on the first instead of the seventh day of the week. The Chief Rabbi and most of the synagogue officials have strenuously resisted the proposal, on the ground that the seventh day is of Divine appointment. To this Mr. Claude G. Montefiore has replied that there is no divine seventh day at all, and one day can be regarded as a seventh day as well as another. Victory at present rests with the party opposed to change, but the Reformers commenced Sunday services on Nov. 5th in the Cavendish Rooms, London.

Theosophy. The chief agent in founding the Theosophical Society was Madame H. P. Blavatsky, who, with Col. H. S. Olcott, Mr. W. Q. Judge, and others, established it in New York in '75. The headquarters was in '79 transferred to Madras, and much arduous but successful work was accomplished in India. In '87 the movement received a fresh stimulus from the presence of Madame Blavatsky in London, from which epoch dates the great literary activity that has recently characterised

it. There are now over 300 branches in Europe, India, America, and the colonies, and a large literature. The Society has three declared objects: viz.,—(1) To form a nucleus of the universal brotherhood of humanity, without distinction of race, creed, sex, caste, or colour; (2) to encourage the study of comparative religion, philosophy, and science; (3) to investigate unexplained laws of nature, and the powers latent in man. The society is therefore quite unsectarian, and no articles of faith need be subscribed to by an adherent, the only condition of membership being an assent to the first object. No dogmas are forced upon members, as is the case with religions, and the teachings which are promulgated are merely propositions which can be verified by the student in the course of his progress in the study of occultism. Any individual member has a right to make any declaration of personal belief he pleases, on the understanding that the Society is not implicated. Some of the more important teachings of the Society will be found summarised in eds. '95 and '96. The chief books on Theosophy are: "The Secret Doctrine," "Isis Unveiled," "The Key to Theosophy," by H. P. Blavatsky; "Esoteric Buddhism," "The Occult World," and "The Growth of the Soul," by A. P. Sinnett; "Theosophical Manuals" Nos. I., II., III., IV., and VII., "The Ancient Wisdom," "The Self and its Sheaths," "The Building of the Kosmos," and "The Birth and Evolution of the Soul," by Annie Besant; "Theosophical Manuals" Nos. V. and VI., by C. W. Leadbeater. Information may be obtained in Europe from the Secretary, 27, Old Burlington Street, W.; in America from the Secretary, 5, University Place, New York City, U.S.A.; in India from the Secretary, Benares, N.W.P.; in Australia from the Secretary, 42, Margaret Street, Sydney, N.S.W.; in New Zealand from the Secretary, Mutual Life Buildings, Lower Queen Street, Auckland; in the Scandinavian from the Secretary, 12, Jorstenonogatau, Stockholm; and in Holland from the Secretary, 76, Amsteldijk, Amsterdam.

Thibet is an Asiatic country, which, in spite of all explorers' efforts, still remains practically unknown to Europeans, and unexplored by them. It lies on the slopes of the Himalayas, between Kashmir and the Chinese province of Sze-chuen. It is a dependency of China. Its area is 650,000 sq. m., and its population about 6,000,000. The capital of the country is Lhasa. The people are of the mildest character, but they obstinately refuse to allow travellers to explore their country, which—by reason of its physical characteristics alone, its great mountains, and its height above the level of the sea, which has caused it to be called the roof of the world—is of extreme interest. The country is under the rule of the lamas or priests, and the religion is that of Buddha. There are two Chinese Residents at Lhasa, who represent the Chinese Government in the country. By virtue of a treaty of commerce concluded with Thibet early in '94, Yatung, a town on the Indian-Thibet frontier, was opened for trade, with an Indian Government official and a Chinese official stationed there. By the terms of the treaty, all articles, except munitions of war, drugs, and intoxicating liquors, are to pass free of duty for the first five years. The import of tea from India is prohibited for the same period. A considerable export of wool from

Thibet is anticipated in due course. The chief imports are cotton and woollen goods, metals, maize, and tobacco. See INDIA.

Thistle, The most ancient and most noble Order of the. Originally established in 1540, and remodelled in 1687, and again in Queen Anne's reign (1703). It was by the statute of 1827 declared that this Order should consist of the Sovereign and 16 knights. Its abbreviation is K.T., and its badge a green ribbon, with motto *Nemo me impune lacessit*. There are at present twenty-one K.T.s, including the Sovereign and princes of the blood, the subjoined being a list of them:—

The Sovereign.

Prince of Wales.	D. of Connaught.
Duke of Saxe-Coburg and Gotha	D. of York.
(D. of Edinburgh).	D. of Cambridge.
D. of Argyll.	D. of Buccleuch.
E. of Howe.	M. of Lothian.
E. of Stair.	D. of Montrose.
D. of Athole.	D. of Fife.
E. of Southesk.	E. of Galloway.
M. of Lorne.	E. of Crawford and Balcarres.
L. Colville of Culross.	E. of Rosebery.
M. of Bute.	M. of Tweeddale.

Dean of the Order, Very Rev. James Cameron Lees, D.D.; Secretary, Sir Duncan Alexander Campbell, Bart.; Lyon King of Arms, J. Balfour Paul; Gentleman Usher of the Green Rod, Hon. Alan David Murray.

Timber. See TRADE, '99.

"Times, The." The chief English political daily paper (price 3d.). First published under the title of *The Daily Universal Register*, Jan. 1st, 1785, at 24d., which name was changed to *The Times* Jan. 1st, 1788. Editors have been:—Dr. Stoddart, Thomas Barnes, J. T. Delane, Prof. Thomas Chenery, G. E. Buckle (q.v.) (present editor), 1884. The Centenary of *The Times* occurred in Jan. '88. The news-matter (exclusive of advertisements) in an average number of *The Times* is estimated to consist of about 108,500 words, or in the 313 days of the year nearly 34,000,000 words. *The Mail* (2d.), published three times each week, furnishes a summary of the contents of *The Times* for two days; the *Times Weekly Edition* (2d.) contains a summary of the week's news; and *Literature*, an International Literary Journal (6d.), edited by H. D. Traill, is a weekly literary review. In connection with *The Times* are issued, in a convenient form, the *Times* law reports, and separate reports of commercial cases, and occasional summaries of subjects of special public interest. During '95 an admirable Atlas, known as "The Times Atlas," was issued in 15 weekly parts, and during '98 *The Times* reprint of the ninth edition of the "Encyclopædia Britannica." In '99 the "Century Dictionary" was issued; also a new and enlarged edition of "The Times Atlas" in 26 parts. Palmer's "Index to *The Times*" provides a convenient means of identifying any particular subject or event from the year 1820 to date; while Bailey's "Index to *The Times*," published monthly from Jan. '99, is still more detailed.

Tithe Rent-charge (Rates) Act, '99. See SESSION, sect. 111. For Tithe Rent-charge (Ireland) Bill, see SESSION, sect. 110.

Tobacco Statistics. From returns compiled by Messrs. Cope Bros. & Co., of Liverpool, it appears that in '98 3,423,081 lbs. weight of manufactured tobacco and 70,371,116 lbs. of unmanufactured tobacco were imported for home consumption in the United Kingdom, giving a total of 73,794,197 lbs. The rate of duty on unmanufactured tobacco is 2s. 8d. per lb. The net revenue derived from duties on tobacco, snuff, and cigars is £10,692,998. The consumption of tobacco is 1'84 lb. per head of the population.

Tobago, a small island in the British West Indies, now attached to Trinidad, from which it is distant only 18 miles, but formerly connected with the Windward Islands. **Area**, 114 sq. m.; **pop.** 19,534. Scarborough is the chief town; and the staple crop is sugar, though the cocoanut palm, coffee, and cocoa are also being cultivated. The island is administered by a Commissioner appointed by the Governor of Trinidad, and its financial arrangements are kept separate. For statistics see BRITISH EMPIRE (table).

Togoland. A German protectorate on the Slave Coast in Upper Guinea, between the Gold Coast Colony on the west and Dahomey on the east, proclaimed in 1884. The protectorate includes Little Popo and Porto Seguro, and is administered by an Imperial Commissioner, assisted by a local council representative of the merchants. The coast-line is only 32 miles long, but inland it broadens considerably. **Area**, 33,000 sq. m.; **pop.** 2,500,000. The capital is Lome, but Togo is the chief native town, and has 8000 inhabitants. Chief exports, palm oil and ivory. A Convention with France, signed in July '97, gave to Togoland the fertile country of Sansane Mangu, in the hinterland, and a geographical frontier in the neighbourhood of the coast. By the Samoa agreement of Nov. 14th, '99, the neutral zone in the *hinterland*, agreed upon between Great Britain and Germany in '88, was divided between Togoland and the Gold Coast Colony. The boundary line agreed on was the river Daka to its intersection with 6° N. lat., and thence a line leaving Morozugu, Gambaga, and Mamprusi to the Gold Coast and Yendi, and all the territories of Chakosi to Togoland. See NIGERIA (map).

Tolstoi, Count Lyof Nikolaivitch, usually called Count Leon Tolstoi, the most eminent living Russian novelist, was b. Aug. 28th, 1828, at Yasnaya Poliana, in the government of Toula, where he still lives. Entered the army when 23, served in the Caucasus and at Sebastopol. First made literary reputation by his vivid sketches from Sebastopol. Leaving the army soon after the close of the Crimean war, he devoted himself to literature. His "*War and Peace*," a tale of the invasion of Russia by Napoleon in 1812, is regarded by Russians as his masterpiece; but his "*Anna Karenina*," which appeared in '76, is better appreciated abroad. "*The Cossacks*" is another admirable work. He has written much on education, and published many short tales and reminiscences of childhood and youth. Latterly he has devoted himself to religious teaching. He makes "*Resist not evil*" the keystone of the Christian faith, and insists that the literal interpretation of the Sermon on the Mount is the only rule of the Christian life. His religious views are set forth in "*Christ's Christianity*" and "*My Religion*." Translations of his "*Kreutzer Sonata*" appeared in '90. In Oct. '92 he deposited his

Memoirs and Diaries with the Curator of the Rumyantsov Museum on the condition that they should not be published till ten years after his death. In November he legally made over his whole fortune, including his real and personal estate, to his wife and children. He married in '61, and has nine children living. During '93 he wrote "*The Kingdom of God Within Us*," an important work on the social question; in '94 a powerful criticism of the Franco-Russian alliance, entitled "*Patriotism and Christianity*," appeared; and in '95 he published "*The Four Gospels Harmonised and Translated*" by himself.

Tonbridge School was founded 1553, and was reorganised '80. The new buildings were opened in Oct. '95. **Governors:** the Worshipful Company of Skinners. Four exhibitions from £90 to £60 for four years fall vacant annually, and are tenable at any place of higher education that the Governors may approve of; four others are tenable only at Oxford or Cambridge. **Pupils**, 450. **Head Master**, Rev. Joseph Wood, D.D. **Motto**, *Deus dat incrementum*.

Tonga Isles, The, in the Friendly Islands, are governed by an hereditary monarch and a legislative assembly of two orders—viz., 31 nobles, and 31 elected representatives of the people, with an executive consisting of a ministry nominated by the King. Three groups of islands, called Tonga, Haapai, and Vavau, constitute the kingdom. By the Samoa agreement, '99, Germany renounced in favour of Great Britain all her rights over these islands, including Savage Island (pop. 5000). The trade of the islands is mainly with Australia and New Zealand. **Area** 385 sq. m.; **pop.** 23,000. Capital, Tongatabu.

Tonquin. A country of Indo-China, which was formerly a province of Annam, but was made a French colony in 1884. The name is also spelled *Tong-king*. It is situated to the north of Annam, and lies to the east of the Shan States of Burmah, and to the south of the Chinese province of Yunnan. **Area**, including the Leos territory taken from Siam in '93, 135,000 sq. m.; **pop.** 12,000,000. Capital, *Hanoi*, on the Hanoi or Song-koi river, pop. 150,000. Principal port and chief seat of trade, Hai-phong. At Hongay, near Hai-phong, and at Kebao, there are coal mines worked by French companies. The chief products of the country are silk, sugar, cotton, and rice. The country is ruled by a Resident under the French Council of Indo-China. The army of occupation is about 19,000 strong. See ANNAM, CHINA (map), COLONIES, ETC., OF EUROPEAN POWERS, and INDO-CHINA.

Tortola. A West Indian island of the Virgin group, and chief of the Presidency of the Virgin Islands, in the British federal colony of the Leeward Islands. **Area**, 26 sq. m.

TRADE, '99.

This article deals with the trade of the year under its principal divisions. Broadly speaking, it may be said that business is and has been in a very satisfactory condition. All branches of industry have been well employed, though our trade with the United States is still suffering from the Dingley tariff. The year, however, has been less affected than its predecessors by political causes. We have had no disputes with any important power. The war with the Transvaal, serious as it is in many respects, has no great commercial

importance relatively. We append the figures of the exports and imports month by month, which show that the movement has in both categories been satisfactory. Imports show a pretty steady increase, especially as regards metals and raw materials for sundry industries. There has been a slight decline in the imports of raw materials for textile manufactures due to special causes which will be noticed later in dealing with the textile industry. As regards exports, progress has been continuous. At the same time the home trade has been good in all directions, so that the general position is very satisfactory. There seems no reason to anticipate any immediate check to this state of prosperity in the absence of causes at present unforeseen.

Month.	Imports.	
	'97-8.	'98-9.
November . .	£41,166,146	£42,069,569
December . .	41,334,536	45,332,608

September .	19,945,085	22,374,807
October . .	19,863,019	23,629,021
Total . . .	£231,685,927	£258,637,517

Butter.—The demand for butter during the past year has shown an improvement, while prices have on the whole been higher than in '98. It cannot be said, however, that home producers are manifesting any ability or disposition to recover the large amount of trade which has now passed into other hands. The home production, though slightly larger than in the three previous years, is still only at the same level as in '95, while the imports continue to increase. During the first ten months of the year they amounted to 2,869,158 cwts., as compared with 2,687,888 cwts. in the corresponding period of the previous year. Canada is making great strides in this article, the imports in '99 being nearly three times as much as in '98. About one-seventh of our total production comes from the colonies, and about half from foreign

countries, principally Denmark. French exports show a considerable falling off. As we have previously pointed out the British farmer will be more and more outrun in this important trade unless he adopts the method of co-operative production which has been so successful elsewhere.

Coal.—There has been a remarkably firm tone in coal throughout the whole of the past year. The activity of manufacturing industries, both here and abroad, has involved a considerable increase in the demand, while at the same time labour has been more costly. There have fortunately been no strikes this year, though possibilities of disagreement in South Wales exist. The price early in November '98 for best Walsend was 17s.; in the middle of that month the quotation temporarily fell to 16s., the lowest point in the year. The decline was, however, almost immediately recovered, and there was no further change until the middle of January, when the price rose to 17s. 6d. At that figure, with very unimportant variations, it remained until October. The price in the middle of November was 20s. 6d. As regards exports the increase has been very considerable. For the first ten months of the year shipments amounted to 36,107,649 tons, as compared with 29,555,049 tons during the same period of '98. France is our best customer, and increased its takings this year by about 33 per cent. Germany and Brazil, which are the next largest buyers, also ordered much more freely. In fact, in the case of almost every country there has been an increase. There is no present prospect of prices falling, and during the winter they are almost certain to be higher.

Copper.—The rise in price which we ventured to predict last year has not only taken place, but has been of a more important character than most people foresaw. In the early part of Nov. '98 the quotation for G.M.B. was £56 2s. per ton, in itself a considerable rise on the average of the previous twelve months. A slow advance took place during November and December, followed in January by a sharp upward movement, which carried prices to over £70 per ton. They have remained at that level or above it ever since, the price in the middle of November being £74 12s. 6d. At the same time it is to be noted that the highest point was reached in May, and though there has not been much diminution since that time, there has been no further advance. Visible supplies have also increased, a number of new mines having been opened up in view of the high prices current, and the output for '99 will be very greatly in excess of that for '98. At the same time also, in consequence of high prices, business has received of late months a very decided check, the sales, which were as much as 53,450 tons in January, falling to only 12,125 tons in August. It is probable, therefore, that the height of the boom is past, and that we may see in the near future a fall in quotations. It is not likely to be rapid, as there is a powerful combination in America which supports the market in case of need; but the ultimate result of increased supplies must necessarily be to bring down quotations.

Cotton.—During the past year prices have been fairly high on the average, mainly owing to the improvement in the demand for piece goods generally, and to the considerable expansion in a manufacturing direction in the United States. In the early part of November

'98 middling Uplands stood at 3d. This was the lowest point touched throughout the year, prices mostly varying between 3½d. and 4d. At the end of May and again at the end of July the prices touched 3½d., but this was the lowest rate experienced during '99. In October and November there was a decided upward movement, partly on unfavourable reports as to the coming crop; and the price in the middle of the latter month stood at 4½d., the highest point touched in the year. Below will be found particulars of the American and Indian crops, the former for the season ending on Sept. 1st and the latter for that ending on June 30th.

Year.	United States.	India.
	Bales.	Bales.
'91-2	9,038,707	2,867,000
'92-3	6,717,142	2,841,732
'93-4	7,527,211	2,950,000
'94-5	9,892,766	2,688,546
'95-6	7,162,473	3,296,046
'96-7	8,714,111	2,999,087
'97-8	11,180,960	2,843,612
'98-9	11,235,383	3,532,680

The great increase in the American crop during the last two years points to a much greater yield in the future than ever in the past. The following figures are interesting as showing the distribution of the American crop. They show five-year averages in the first three lines:—

Proportional Distribution of American Cotton Crops.

	Great Britain.	Continent.	United States.
	%	%	%
'80-5	42'83	25'53	31'64
'85-90	41'23	25'94	32'83
'90-5	37'28	29'67	33'05
'95-6	31'54	31'52	36'94
'96-7	32'90	33'52	33'58
'97-8	31'35	36'90	31'75
'98-9	32'14	32'70	35'16

As regards our exports, deliveries of cotton yarn and twist have shown a considerable decline, the total for the first ten months of '99 being 179,778,500 lbs. as compared with 205,982,800 lbs. in the same period of '98. Germany is by far our largest customer, and there was very little diminution in the shipments there. There was, however, a great falling off as regard Holland, through which country some of the German orders are delivered. China and the Far East proved much worse customers; Turkey also took less, to the extent of 15 per cent. In piece goods, on the other hand, there has been an increase, though not a very large one. The total for the first ten months of '98 was 4,289,106,600 yds., and for the same period in '99 it amounted to 4,572,356,200 yds. A very large part of the improvement was due to larger deliveries to India, our most important customer. Shipments to China also showed a considerable increase, but deliveries to Japan were much smaller. A very gratifying improvement is shown in the case of the United States, where there was an increase of about 50 per cent. As regards South America, a better trade was done with Chili, but the demand from Brazil showed an immense falling off; Argentine shipments were about the same as in '98.

Iron and Steel.—The past year has been one of unusual activity in the iron trade. Not merely in this country, but all over the world, and especially in the United States, makers have been so busy that they have in many cases been obliged to refuse further orders, and this has led to the placing of contracts abroad which would under ordinary circumstances have come to this country. In such circumstances it is not astonishing that the Scotch iron market, always a speculative one, has been in nearly a feverish state during the whole of the year. In the early part of November '98 the quotation for Scotch warrants stood at 49s. 6d., and the fluctuations up to the end of that year were unimportant. With the beginning of '99, however, prices began to show a decided upward movement, touching 55s. early in February. With some fluctuations they stood at that level for nearly three months, but towards the end of April an advance to 63s. 6d. was registered. The market continued active as time went on, and in the middle of July the price of 72s. was touched. In August there was a slight decline, but in September prices showed another upward tendency. The quotation in the early part of October was about 71s. 6d. per ton, and in the middle of November 72s. 7d. Considerable apprehensions have been expressed in many quarters as to an actual scarcity of iron ore, and as to the demand for pig iron gradually exceeding the supply. It can hardly be doubted that there is some risk in this direction, but up to the present the fears expressed have not been realised. One of the great features of late in the iron trade has been the enormous increase in the output of the United States, which amounted to 11,250,000 tons in '98, and was over 6,250,000 tons during the first half of '99, while our own output is considerably below these figures. Twenty years ago we produced 50 per cent. of the world's pig iron, and now supply less than 25 per cent. As regards our export trade, shipments of hardware and cutlery show an improvement on '98, though they are still below the figures for '97. It is gratifying to find that there is a marked increase in the takings of the United States, of India and Australasia. A falling off as regards South Africa is not unnatural, while the unfavourable state of affairs in South America accounts for a decline in shipments to Chili, Argentine, and Brazil. Pig iron shipments show a very large increase, the figures for the first ten months of '99 being 1,132,579 tons, as compared with 889,672 tons in '98. There has been a slight falling off as regards Russia and Denmark, and the exports to Australasia remain practically stationary. On the other hand, Germany, by far our largest customer, has increased its purchases very largely, and the export to France has been very nearly doubled. Railway materials again show a decline, but the export of hoops, sheets, and boiler-plates is better than in '98, though somewhat poorer than in '97. More business has been done in galvanised sheets, but the tin-plate industry continues to show a decline, which was very marked in the case of the United States, formerly our best customer. That country now itself produces tin-plates in large quantities. Machinery of all descriptions shows a very great advance, especially as regards locomotives. The export of cycles continues rapidly to decline, being only about two-thirds

as large as in '98, which in its turn showed a considerable falling off as compared with '97.

Jute.—We pointed out last year that there was a prospect of shortage of supplies, and this has actually occurred, causing the level of quotations to be considerably higher than in the previous year. They stood at £14 10s. up to the early part of August '99, when there was a rise to £15 10s., followed in the middle of September by an increase to £17 10s. The price in November was about £14 17s. 6d. The shipments of jute from Calcutta during the past six years have been as follows:—

Year.	Bales.
'93-4	2,216,000
'94-5	2,917,000
'95-6	2,990,000
'96-7	2,785,446
'97-8	3,594,915
'98-9	2,295,612

The final Government estimate for the coming season anticipates a production in India of about 5,000,000 bales. This will probably leave a deficit of from 500,000 to 1,500,000 bales. Some trouble has been experienced at Dundee during the year in the matter of labour, and the position of the industry generally is not in a very satisfactory state. Our exports of jute yarn fell off slightly as compared with '98. There was an improvement as regards shipments of piece goods, but the exports for '99 are still considerably below those of '97. This is mainly accounted for by the great diminution during the last two years in shipments to the United States. A very largely increased trade has been done with the Argentine Republic, but deliveries to Germany and France have greatly fallen off.

Linen and Flax.—The flax market has been uneventful during the greater part of the year, but the tendency since the early part of August has been towards an upward movement in price. The quotation in November '98 was £24 10s., and in November '99 stands at £26 per ton. A combination of linen thread manu-

facturers is being formed, which is regarded as likely to have a beneficial effect on this branch of the trade. The exports of linen yarn during the first ten months of '99 were in excess of those during the same period of '98. A proportion of the increase was due to a very great expansion of the shipments to Spain. As regards piece goods the shipments during the first ten months amounted to 146,032,700 yards, as compared with 124,058,400 yards in the same period of '98. There has been a slight improvement as regards the United States and France, and a very great development in the trade with the foreign West Indies. Australasia and Canada were also better customers.

Shipping and Shipbuilding.—Though trade has been very active during the past year, the number of vessels competing for business has prevented any high rates ruling in freights. Black Sea quotations, for instance, touched the minimum of 6s. 3d. in July, and were in no case above 12s. per ton, the minimum and maximum during '98 being 8s. 6d. and 12s. 6d. respectively. Rates from Australia to the United Kingdom have ranged from 32s. 6d. to 37s. 6d. Atlantic grain rates were highest in December at £3 10s. per ton, and fell as low as £2 3s. in April. Since then they have moved gradually upwards. The Bombay rate was at 11s. in the summer, but has since recovered to 14s. 6d. On the other hand, the River Plate rate is now only about 10s., as compared with 14s. 9d. in October. Owing to the Government demands in connection with the transport of troops to South Africa there was a general upward movement in October. As regards shipbuilding the vessels under construction at the end of September, though rather smaller than at the same date in '98, are still very considerable. It seems hardly probable that the present boom in shipbuilding can last much longer, though the quantity of foreign orders being placed, especially for the Far East, is in favour of active business in the immediate future.

Total	455	884,336	598	1,364,250	558	1,347,549

Sugar.—With a sound statistical position throughout the year, prices of sugar have been well maintained in the neighbourhood of 9s. 6d. per cwt. for 88 per cent. beet. In April, May, and June, indeed, prices were considerably higher, running at one time to as much as 11s. 3d. per cwt., but a good deal of this advance has been lost, and the price in the middle of November was 9s. 1d. The interest of the moment centres in the crop prospects for the beetroot product. Last year's crop was 4,930,000 tons, and it is probable that this year's will exceed 5,000,000 tons. This will not be at all an excessive quantity, as the cane crops are likely to show a deficiency. The outlook is for the present rate of quotations being fully maintained.

Tea.—Throughout the bulk of the past year tea has been very steady in price, and since the middle of August a marked upward movement has been in progress. More attention is now being paid in the Indian gardens to the production of quality, and this, if largely carried out, will necessarily result in higher average rates than have ruled of late. The Indian tea industry will be somewhat unfavourably affected this year by a land-slide in Darjeeling which has done severe injury to gardens in certain localities. A dispute in the London tea trade occurred between producers and dealers on the question of the draft or margin on each package of tea. The growers withdrew this draft, and the dealers then boycotted the auctions. The matter, however, after dragging

on several weeks was ultimately compromised. We give below our usual figures showing the derivation of the supplies for home consumption. Not only have India and Ceylon practically monopolised our market, but they are with increasing success developing trade in other parts of the world. The danger, therefore, of excessive production is considerably lessened, especially as the Indian tea growers are less inclined than formerly to go in for large expansions of cultivated areas.

Tea entered for Home Consumption.

Timber.—Throughout the year the building trade in this country has been active, with the result that our imports of timber in '99 are very largely in excess of those in '98, and nearly as considerable as in '97. Sawm timber continues to form the larger portion of the trade, and it is satisfactory to find in this article a very considerable increase in the case of Canada, which is now approaching the figures of Sweden and Norway. Mahogany has been imported comparatively sparingly. The trade in West Australian hard woods continues to develop very rapidly, and there are now a number of limited companies in the field dealing with this industry. No special statistics are given with regard to it in the Board of Trade returns, and it would be interesting if they were separately classified, thus rendering it possible to gauge the growth of the trade.

Tin.—The tin market has been marked by a very strong upward movement during the past year. Early in November '98, the price of English ingots was a little over £88 per ton, and there was no variation up to the end of the year. In January, however, the price rose to £113, and to £117 in the early part of February. During the next two months there was somewhat of a lull, but since then, with some fluctuations, prices have again been advancing, especially since the beginning of July. £154 was touched at the end of September, and the price in the middle of November '99 was £127. That this rapid upward movement has much justification is obvious from a glance at the statistics. Production has considerably declined, amounting to only 68,814 tons in '98 as compared with 74,981 in '95, while at the same time consumption has risen from 68,522 tons to 78,436 tons. The visible supply at the end of September '99 was only 18,254 tons as compared with 31,596 tons on Sept. 30th, '97. Naturally this considerable advance in quotations has favourably affected the Cornish tin industry, which, after being in a most unsatisfactory condition for many years, is now in a comparatively active state. There is no evidence at

the present time pointing to any material reduction in quotations.

Wool.—Speaking generally, the position of the wool market during the past year has been that on the one hand, largely owing to the continued drought in Australia, there has been a deficiency in supplies, while on the other, the consumptive demand has been increasing owing to the general prevalence of good trade. This, as will be seen from the details that we give of the various London sales, has led to a very decided upward movement in prices. The sixth series of '98 opened on Nov. 29th and closed on Dec. 13th. The offerings were comparatively small, amounting to a little over 150,000 bales, the better classes of merino wools being particularly short. The consequence was that these qualities advanced about 5 per cent. on the rate of the preceding series. Medium descriptions were very firm, but did not advance, and poorer classes were slightly weaker than at the previous sale. Fine crossbreds were in good demand, but medium and low crossbreds, being in good supply, had an average fall of about 10 per cent. The first series of '99, opened on Jan. 17th, closing on Feb. 1st. Australian merinos again advanced in price from 7½ to 10 per cent. Fine crossbreds were firm and in better request, while medium descriptions were also a little higher. South African sorts met with a good demand. French and home buyers operated freely, but the German demand was somewhat irregular. The second series opened on March 2nd, closing on the 22nd of that month, with offerings of about 170,000 bales, the main support of the market being Germany, French buyers showing more reserve than at the previous series, owing to their being well supplied with direct imports. Good merino qualities were from ½d. to 1d. per pound higher. Medium descriptions advanced about ½d., and poor classes were a shade lower. In crossbreds, the relative positions of the different classes were about the same as in the case of merinos. The third series opened in May (2nd), when about 185,000 bales were catalogued. Both French and German buyers operated freely, and there was a steady demand from home consumers; the result was that an immediate and considerable advance took place, which was fully maintained throughout. There was an advance of about 20 to 25 per cent. on merino qualities, and from 15 to 20 per cent. on crossbreds, the extent of the movement causing general surprise, though some advance was certainly anticipated. The fourth series, which opened on June 27th, had larger offerings than its predecessors, its total amounting to 223,000 bales. After some hesitation on the opening days prices again rose for most descriptions, good merinos being as much as ½d. to 1d. per pound higher, and good crossbreds ½d. per pound higher. Medium and inferior crossbreds suffered a little, though not to the extent of the advance in the previous series. The fifth series, which opened on Sept. 19th, had 195,000 bales catalogued. The home trade were the best operators, but a fair amount of purchases were made by the United States of crossbreds. The result was a further advance all round, especially marked in the case of crossbreds, fine descriptions of which were as much as 2d. per pound higher, and coarse descriptions ½d. As an indication of

* Ten months only.

the advance which has taken place during the past year it may be mentioned that Port Phillip unwashed, which was quoted at 8½d. in October '98, now stands at 12½d., an advance of nearly 50 per cent. As it is certain that supplies will be short for at least a year to come, it is probable that present quotations will be maintained, while there is a possibility or even further advances. We append our usual table showing imports of wool into the United Kingdom for a series of years:—

Year.	Colonial.	Foreign.
	Bales.	Bales.
'84.	1,285,641	318,998
'86.	1,366,647	375,361
'88.	1,534,343	468,617
'90.	1,599,666	432,220
'92.	1,765,904	505,638
'94.	1,693,062	465,381
'95.	1,802,269	565,884
'96.	1,674,878	492,181
'97.	1,647,052	616,180
'98.	1,556,388	526,596

Woollens and Worsteds.—Our exports of woollen and worsted goods during '99 have on the whole shown an improvement over '98, but the amount which was lost in the United States trade by the passing of the Dingley tariff has not to any appreciable extent been recovered. Woollen yarns were sent abroad in much larger quantities, though one of our principal customers, Germany, took considerably less. Worsteds also showed a great improvement, there being a great expansion in the demand from Germany, which absorbs considerably more than half of our total exports. In woollen piece goods there was an increase over '98, the total for the first ten months being 41,542,800 yards, as compared with 39,361,500 yards in '98. There was a considerable improvement in the case of the United States, but the figures are still below those of previous years. Germany, Holland, and Belgium were all better customers, but there was a slight falling off in the case of France, and a considerable one in the case of Japan. China bought more freely from us, and so did the East Indies, Australasia, and Canada. The trade from South America was considerably poorer in woollen piece goods. There was also an improvement in worsted piece goods, the figures for the first ten months of '99 being 86,741,100 yards, as compared with 80,726,600 yards in the first ten months of '98. Shipments to the United States again showed a decline, and those to Canada were also smaller, but a much better trade was done in Australasia, India, and China. Continental countries as a whole took less, but there was an increase of nearly a million yards in the case of France. The carpet trade has shown considerable expansion, 7,028,800 yards having been exported in the first ten months of '99, as compared with 6,368,600 yards in '98. A considerable falling off in the shipments of blankets is somewhat unaccountable. On the whole, the woollen and worsted industry has not had its fair proportion of the active trade of the last few years, but it appears now to be in a better position and likely to do well during the coming year.

TRADE, BOARD OF.

The first Committee for Trade appears to have been appointed in the year 1622, during the reign of James I. It was reconstituted by Charles I., and held meetings from time to time from 1625 to 1640. During the Commonwealth the Council of State, which was constituted in 1649-50, passed a resolution directing "the whole Council or any five of them to be a Committee for Trade and Plantations." In 1660 Charles II. instituted a Council for Trade and another Council of Foreign Plantations. These were amalgamated in 1672, but in 1675 their duties were transferred to the Privy Council. In 1695, under William III., and from time to time afterwards, the Council was revived; but on the motion of Burke it was abolished in 1782. In 1786 a permanent Committee was formed under an Order in Council, which still regulates the legal constitution of the Board. Acts have since been passed making the salary of the **President** (Mr. Ritchie, M.P.), £2000 a year, and of the **Parliamentary Secretary** (the Earl of Dudley), £1200 a year. There is also a **Permanent Secretary** (Sir Courtenay Boyle, K.C.B.). The working of the Department is now assimilated to that of the other great offices of State, its work being done by the President aided by a permanent staff. The work of the Department has enormously increased since 1786; for instance, by the growth of joint stock companies, the establishment and development of railways, the increase in shipping, and other industrial developments which have imposed new administrative duties upon it. It may be mentioned, as an illustration of this, that the **Permanent Establishment** consisted in 1840 of 30 persons at an annual cost of £14,716; in '53 of 66 persons at an annual cost of £26,353; in '67 of 150 persons at an annual cost of £44,378; and in '98 of 211 persons at an annual cost of £114,277, excluding the cost and staff of the Registrar-General of Seamen's Office, the Patent Office, and the Bankruptcy Offices. At the present time the work of the Board is divided amongst several departments, as follows:—

Commercial, Labour, and Statistical Department. (Comptroller-General, A. E. Bateman, C.M.G.) This Department gives advice to other Government Departments upon commercial matters, and prepares annually the **Statistical Abstract of the United Kingdom**, the **Statistical Abstract for the Colonies**, the **Statistical Abstract for Foreign Countries**, and the **Digest of Colonial Statistics**. It supervises the monthly and annual trade accounts, and, with the assistance of other Departments, prepares monthly and annual accounts of shipping and navigation, railway statistics, cotton statistics, emigration statistics, alien immigration statistics, and fishery statistics. It edits the **Board of Trade Journal** of tariff and trade notices, instituted in July '86, giving details as to changes in Customs' tariffs and regulations, information about trade movements, and periodical returns. Questions as to sugar bounties and other matters relating to trade and commerce are also dealt with. The **Commercial Intelligence Department** was appointed as a branch under this Department to provide the public with accurate information on all tariff and trade matters, and was opened in Oct. '99. Through the Labour Department it collects and publishes statistics of wages, hours of labour,

the state of the labour market, and the condition of the working classes, and publishes the monthly *Labour Gazette* and annual statistical reports on trade unions, strikes and lock-outs, and labour subjects generally. It is concerned with the administration of the Conciliation Act, '96, for the prevention and settlement of labour disputes.

Bankruptcy Department. (Inspector-General, John Smith, C.B.) This was constituted in '83, in consequence of the Bankruptcy Act, '83. It is under an Inspector-General, whose duties are described in the separate article on BANKRUPTCY (*q.v.*). The Companies (Winding-Up) Act, '90, imposed further duties on the Department in regard to the control of provisional and official liquidators appointed to wind up insolvent companies.

Railway Department. (Assistant-Secretary, P. S. J. Hopwood, C.B.) This Department, formed in '40, inspects railways and their works before they are opened for public traffic, inquires into railway accidents, investigates complaints as to the hours of work of railway servants, approves bye-laws of railway and canal companies, authorises the construction of railways and the raising of additional capital, considers and confirms provisional orders granted by the Light Railway Commissioners, endeavours to effect amicable settlements of complaints as to unfair or unreasonable rates or unreasonable or oppressive treatment on the part of railway and canal companies and as to increased railway rates, grants provisional orders authorising tramway, gas, and water undertakings, inspects tramways before they are opened for traffic, issues regulations controlling steam, electric, and other forms of mechanical traction, and approves bye-laws made by tramway undertakers, controls matters connected with the Metropolitan gas companies, such as the appointment of the gas referees and the chief gas examiner, administers the Notice of Accidents Act, '94, as amended by the Factory Act, '95, performs various duties under the Copyright and Merchandise Marks Acts and Acts relating to art unions, industrial exhibitions, and commercial charters, reports to Parliament under the standing orders on the proposals in Bills with regard to level crossings on railways, and the tolls, rates and charges on railways, tramways, and canals, etc., and prepares annual and special returns connected with railways, tramways, canals, gas undertakings, etc. Under this Department are the following Sub-Departments: The **Patent Office**, controlling the duties relating to patents, designs, and trade marks; the **Joint Stock Companies Registration Office**; and the **Standards Department**, transferred from the Exchequer in '66, which tests and examines weights and measures used in trade and for scientific purposes, keeps the standards of weight and measurement at the Standards Office, 7, Old Palace Yard, and performs various duties under the Coinage Act, '70, the Sale of Gas Act, '59-60, and the Petroleum Act, '79.

Marine Department. (Assistant-Secretary, Walter J. Howell.) The business of this Department, created in '50, mainly consists of the administration of the Merchant Shipping Act, '94, which consolidated all previous legislation relative to merchant shipping. It administers the rules relating to tonnage

admeasurement, national and international, examines masters, mates, and engineers, suppresses crimping and arranges for the transmission of seamen's wages, deals with the relief of distressed seamen so far as questions of principle are concerned, inspects the health of crews, crew spaces, and ships' provisions, deals with matters of discipline on merchant ships, establishes Local Marine Boards, controls Mercantile Marine Offices as to engagement and discharge of seamen, deaths at sea, etc., surveys emigrant and passenger ships, controls regulations as to the rule of the road at sea, ships' lights and signals, and prepares the Code Book of International Signals, inspects the life-saving appliances carried by ships, arranges as to assigning and marking load-lines on vessels, detains unseaworthy ships, institutes inquiries into and deals with shipping casualties and charges of misconduct against certificated officers, gives rewards for saving life at sea, appoints the staff of surveyors of ships, supplies rocket life-saving apparatus on the coast of the United Kingdom, and conjointly with the Admiralty deals with the Royal Naval Reserve. It prepares Parliamentary returns, and publishes the Annual Wreck Register. A Sub-Department is the **General Register and Record Office of Shipping and Seamen**, and the Registrar-General of Shipping and Seamen is charged with the special duties as to the registration of ships, the issue of certificates to officers in the mercantile marine, the custody of official logs, etc., and also performs certain duties in connection with the Royal Naval Reserve.

Fisheries and Harbour Department. (Assistant-Secretary, Hon. T. H. W. Pelham.) This was originally a subdivision of the Marine Department, but now exists separately. It has charge of the foreshores belonging to the Crown, and sees that no injury is done to navigable harbours and channels; it manages the harbours at Holyhead and Ramsgate, controls the lighthouse funds of the Trinity House, the Commissioners of Northern Lighthouses and the Commissioners of Irish Lights, and manages all Colonial lighthouses in the hands of the home Government. It deals with questions affecting the registry of ships, wreck and salvage, foreign lighthouses, pilotage, and navigation. It considers applications for loans of public money for shipping purposes, makes provisional orders under the General Pier and Harbour and Pilotage Acts, and considers applications from County Councils in Scotland to construct small harbours under the Western Highlands and Islands (Scotland) Works Act, '91. It examines and reports upon private Bills affecting tidal waters, settles bye-laws made by harbour authorities as to the shipment of petroleum and other explosives, and deals with questions affecting harbours, navigation, and dues of ships or goods carried in ships arising in foreign parts. It gives notice to British shipping of all foreign quarantine regulations. Since '96 it has dealt with applications for electric lighting provisional orders, and licences authorising the supply of electrical energy under the provisions of the Electric Lighting Acts, '82-90. Since '86 it has exercised the powers and duties of the Secretary of State and of the Home Office under the Salmon and Fresh-Water Fisheries Acts in England and Wales, and also fulfils all the duties relating

to the protection of the fisheries in both inland and territorial waters, the carrying out of treaties and conventions in this respect with foreign powers, and the collection of statistics as to fisheries.

Finance Department. (Assistant-Secretary, Cosmo Monkhouse.) This Department, established in '51, prepares the annual estimates for Parliament, manages the Mercantile Marine Fund and the Ramsgate Harbour Fund, and controls the expenditure of the various lighthouse authorities. The accounts of the whole Board of Trade establishment and its subordinate offices are kept and examined, and prepared for the Exchequer and Audit Office by this Department. It also deals with the Merchant Seamen's Fund, pensions to merchant seamen from Greenwich Hospital Fund, seamen's savings banks, the transmission of seamen's wages both at home and abroad, the issue and payment of seamen's money orders, the wages and effects of deceased seamen, and the relief of distressed seamen. It receives, examines, and presents to Parliament the accounts of life assurance companies, and to it have been assigned the arrangements necessary for the receipt and payment of moneys in connection with the Bankruptcy Estates Account, under the Bankruptcy Act, '83, and the Companies (Winding-Up) Act, '90.

TRADE MARKS.

By the Trade Marks Registration Acts, '75, '76 and '77, the trade mark, and even certain trade names, might be registered, and for the first time, and upon such registration, the right to the mark or name became the property of the inventor. All the last-mentioned statutes have been repealed; but their provisions are re-enacted with amendments in the **Patents, Designs and Trade Marks Acts, '83**. By sect. '76 of this statute, it is provided that the registration of a person as proprietor of a trade mark shall be *prima facie* evidence of his right to the exclusive use of this symbol, and shall, at the end of five years from the date of the registration, be conclusive evidence of his title to the sole use of the mark. This mark, however, is only to be registered for particular goods or classes of goods, and is assignable and transferable only in relation to the goodwill of the business concerned with these goods, and ends with that goodwill. A register of trade marks is established, and by an **amending Act, '88**, a corresponding register has been established in Sheffield for Sheffield ware. By this same Act it is provided that for a trade mark to be registered thereunder, it must consist of, or contain certain essential particulars, which are mentioned in detail in this statute. The proprietor of a trade mark or trade name duly registered may now without proof of fraud obtain an injunction and damages for the unauthorised use of his trade mark or trade name, but the registration of such a mark when it has been registered without sufficient cause may be ordered to be expunged on the application of any person aggrieved thereby. Trade marks remain in force the same time as patents—viz., 14 years; but the former may be renewed, as a matter of course, at the end of every 14 years on the payment of certain fees. By

the **Merchandise Marks Act, '87**, it is provided that the forging of any registered trade mark or its false application to goods like those in regard to which the mark has been registered, as well as several other incidental acts of a similar false and fraudulent character, are punishable as criminal offences, unless it was shown that there was no intention to defraud. Every article or thing by means of, or in connection with which, the offence has been committed is to be forfeited to the Crown, and these may be ordered to be destroyed or otherwise disposed of as the Court thinks fit. By the **Merchandise Marks Act, '91**, the customs' entry respecting inspected goods is for the purposes of the Merchandise Marks Act, '87, to be deemed to be a trade description applied to the goods. Again, the Board of Trade is empowered to prosecute offenders under this statute in cases affecting the general interests of the country or of a section of the community or of a trade. By the **Merchandise Marks (Prosecutions), Act '94**, the Board of Agriculture is empowered to prosecute offences under the '89 Act, relating to agricultural and horticultural produce. A Select Committee of the House of Commons on Merchandise Marks reported in Oct. '97. According to this report, the Merchandise Marks Act of '87 has stopped to a great extent the fraudulent practices against which it was directed. Although the competition of improperly marked foreign goods is sometimes injurious, "the balance of the evidence is in favour of retaining the greater portion of the Act." Important statements are annually published from the Comptroller-General of Patents, Designs and Trade Marks concerning these symbols. See LAW, '99.

Trade Union Congress, '99. See LABOUR MOVEMENT.

Transcaspia. A Russian province in Central Asia, including the Turkoman region between the Caspian and the Oxus. Area, 214,237 sq. m.; pop. 345,000. The administrative centre is Askabad. The Transcaspian Railway (see ENGINEERING) traverses the country, connecting Samarcand with the Caspian. See TURKESTAN.

TRADE UNIONS.

The growth of Trade Unionism in recent years can be to some extent measured by the membership represented at the annual gathering of Unionists known as the Trade Union Congress. At the first congress, in '68, 118,367 were represented; in '78, 623,957; in '88, 674,634; in '90, 1,470,191; in '92, 1,219,934; in '94, 1,080,545; in '96, 1,076,000; in '98, 1,176,896; and in '99, 1,120,164. From '68 to '94 the members represented included the members of Trades Councils, but since then the real representation of fully-paid-up members of Trade Unions has been insisted upon. Accurate statistical data of all the unions of the United Kingdom are not, however, even now obtainable. The figures given on next page, which have been revised and corrected to date as far as possible, relate only to the principal Trade Unions throughout the kingdom; and it must not be forgotten that there is a very large number of smaller Unions with less than five hundred members. Consult Reports of Trades Union Congresses, published by the Trades Union Parliamentary Committee. See LABOUR MOVEMENT.

TRANSVAAL.

The Transvaal is officially known as the **South African Republic**. It lies N. of the Vaal river and S. of the Limpopo river. It is bounded W. by Bechuanaland; E. by Portuguese East Africa and Zululand; S. by Natal and Orange Free State. Swaziland, on the south-east, is a protectorate of the Republic. A map clearly showing its position is given on p. 659. **Area**, 119,139 sq. m.; **pop.** 1,094,156, of whom some 345,000 only are whites. Of the whites about 70 per cent. are Uitlanders. The country was first occupied by the Boers, who made their great "trek" from the Cape in 1836. The **Sand River Convention**, '52, recognised their right to manage their own affairs according to their own laws. They managed them badly, and in 1877 the country was annexed by the British Government. It turned out that the majority of the Boers were opposed to annexation, and they ultimately revolted. Majuba Hill and the **Convention** of '81 followed, giving the Transvaal complete self-government under the suzerainty of the Queen, and subject to the terms of that Convention. The Transvaal

Government complained of these terms, and the Convention of '84 was signed, whereby it was declared that the articles of the new Convention should be substituted for the articles embodied in the '81 Convention. Under Article IV. of the '84 Convention it was laid down that the Transvaal should conclude no treaty or engagement with any state or nation, except the Orange Free State, nor with any native tribe lying to the east or west, without the approval of H.M. the Queen. Another most important article of the Convention was Article XIV., as follows:—"All persons, other than natives, conforming themselves to the laws of the South African Republic (1) will have full liberty, with their families, to enter, travel, or reside in any part of the South African Republic; (2) they will be entitled to hire or possess houses, manufactories, warehouses, shops, and premises; (3) they may carry on their commerce either in person or by any agents whom they may think fit to employ; (4) they will not be subject, in respect of their persons or property, or in respect of their commerce or industry, to any taxes, whether general or local, other than those which are or may be imposed upon citizens of the said Republic." The Transvaal is ruled by a President (Mr. Kruger), elected by first-class burghers only for five years, with a Council of five members elected by the first Volksraad. Legislation is effected by a Parliament of two Chambers, each of 27 members, called the First and Second Volksraad. Bills passed by the Second Chamber must be approved by the First before becoming law. The members of the First are elected for four years from and by first-class burghers—i.e., all male whites resident in the Transvaal before '76, or who fought in the war of independence in '81, or various campaigns since, including the Raid, and their children from the age of sixteen. The members of the Second Volksraad are elected for 4 years by and from the first- and second-class burghers—i.e., the naturalised alien males and their children from the age of sixteen. Naturalisation can be obtained after two years' residence. Second-class burghers can become first-class by resolution of the first Volksraad twelve years after naturalisation. From '76 till '81 one year's residence qualified for the franchise. In '82 the period was raised to five years, and in '90-94 the regulations now in force were carried. The country is divided into twenty districts. The capital is Pretoria. In '97 the average number of children attending Government schools of all kinds was 11,436. In '86 gold was discovered on the Witwatersrand range of hills, and these are now, after a first rush and the collapse that inevitably followed, proving of immense value. (See GOLD FIELDS AND PRODUCTION.) The centre of the gold fields is Johannesburg, which has a population of over 100,000, including over 50,000 whites, most of whom are debarred from the franchise, although the revenue of the State is almost entirely derived from them. The political discontent amongst the Uitlanders reached a crisis in Dec. '96. The National Union of Johannesburg issued a manifesto setting forth the Uitlanders' grievances, and claiming an equitable franchise and fair representation for all residents in the Transvaal, with other administrative reforms. It was pointed out that, though the Uitlanders constituted the majority of the state, owning more than half the

land and at least nine-tenths of the property, yet in all matters affecting their lives, liberties and properties they had absolutely no voice. The Administration was charged with the grossest extravagance, bribery and corruption, and with an intense hostility to the English. The leaders of the Union were prepared to fight for their rights, and, as it appeared that the Boers were about to attack the town, the central committee of the National Union constituted themselves a provisional government pledged to reform, and men were enlisted in large numbers, while an appeal for intervention was also sent to the Imperial Commissioner. At this juncture came Dr. Jameson's raid from British Bechuanaland, and his subsequent defeat, followed by the disarmament of Johannesburg. The members of the National Reform Committee were arrested, but afterwards released on the payment of heavy fines. A claim was made in respect of the Raid for material damage £677,938 3s. 3d.; and for moral or intellectual damage £1,000,000, which the British Government were asked to pay or to cause to be paid (Feb. 17th, '97). The British South Africa Co. suggested that the matter of the claim should be referred to arbitration, but only so far as the claim for material damages was concerned. Estimated revenue, '96, £4,462,193; expenditure, £3,582,696; exports of wool, cattle, hides, grain, ostrich feathers, ivory, butter, gold, etc.; imports, '95, £9,816,304. See DIPLOMATIC, and SWAZILAND.

History, '99.—The Magatoland rebellion was completely suppressed early in Dec. '98, and the chief, Mpefu, fled across the Limpopo to the north, where he was captured by the Chartered Company's police and sent to Bulawayo. But the chief events of the month were the arrests of British coloured subjects by Field-Cornet Lombard, who was arrested on the complaint of the British Agent, but afterwards declared innocent of the charges made against him and reinstated in his post, and the shooting by a Boer policeman of a British subject named Edgar. This last affair roused the Uitlanders thoroughly, and a petition to the Queen asserting that British subjects in the Transvaal were subjected to innumerable acts of petty tyranny at the hands of the police, and praying for relief, was signed by nearly 5000 persons. Owing to a technical irregularity, this petition was not accepted by the British Agent, and Mr. Webb, the Chairman, and Mr. Dodd, the Secretary, of the South African League were thereupon arrested by the Government for, as it was alleged, their share in getting up the petition, but nominally on a charge of contravening the Public Meetings Act. A public meeting was held at Johannesburg to protest against their arrest (Jan. 14th, '99), but was broken up by the police and other employes of the Government. A second petition to Her Majesty was then prepared. It was signed by 21,000 British subjects in the Transvaal, and was duly received by the British Agent and forwarded to the High Commissioner (March 24th). The petitioners claimed that, in spite of the promise of President Kruger after the Raid to introduce reforms, nothing had been done, except to aggravate their position: as, for instance, by the Immigration of Aliens Act, '96, which had been withdrawn at the instance of the British Government, the Press Law, '96, the Aliens Expulsion Law, '96, which, in the opinion of

the petitioners, contravened the '84 Convention, the enforced submission of the High Court to the Raad, and the fact that trial by jury meant trial by Boers. Forts had been built at Johannesburg and Pretoria to terrorise British subjects; the police, as the Edgar case showed, were no protection, but a positive danger, to the community, and the condition of British subjects was intolerable. The petitioners prayed for an inquiry into their grievances, the reform of abuses, and the recognition of their rights under guarantee from the Boer Government. At the same time the mining community endeavoured to arrange with the Boer Government for various reforms, but the negotiations had no satisfactory result. Counter petitions, signed by over 20,000 Uitlanders, were presented to the Boer Government in May, denying that the Government gave no protection to life and property and that the general administration was bad, and alleging that the petition to the Queen was got up by capitalists, and not by the public. A number of men, of whom the majority were said to be English, were arrested at Johannesburg on a charge of high treason (15th). It was said that they were enlisting men to serve against the Transvaal in case of war. The charges against them, however, were afterwards withdrawn, and it was shown that at least two Government detectives acting as *agents provocateurs* were amongst those arrested, while the whole thing smacked of conspiracy. On May 9th Mr. Reitz sent a dispatch in reply to one from the Secretary for the Colonies declaring the inability of H.M. Government to admit Dr. Leyds' denial of the existence of British suzerainty, or his assertion that the preamble of the '81 Convention was repealed by the '84 Convention. Mr. Reitz went further than Dr. Leyds. He not only declared that the '81 Convention was entirely abrogated and superseded by that of '84, but asserted that the "now existing right of absolute self-government of the Republic is not derived from either the Convention of '81 or that of '84, but simply and solely follows from the inherent right of this Republic as a sovereign international State." Mr. Chamberlain on July 13th replied that this contention was "wholly inadmissible."

The Imperial Government had meanwhile communicated their views on the Uitlanders' petition to the High Commissioner, stating that they could not permanently ignore the exceptional and arbitrary treatment to which their fellow-countrymen and others were exposed, and expressing the hope that the Transvaal Government would redress the grievances complained of. They suggested a meeting between the High Commissioner and President Kruger, and, a similar suggestion having been put forward by Mr. Schreiner and Mr. Hofmeyr, the leaders of the Afrikaner party at the Cape, a conference was finally arranged between the President and the High Commissioner at Bloemfontein on President Steyn's invitation. The President had meanwhile put certain franchise proposals (which were not publicly specified) before the First Raad (23rd), and that body resolved that they should be published in draft and submitted to them at the next ordinary session. Sir Alfred Milner and President Kruger met at Bloemfontein (31st), but separated (June 5th) without, unfortunately, having come to any agreement.

Sir Alfred Milner during the conference laid stress chiefly upon the franchise question, believing that an acceptable franchise would put the Uitlanders into a position to remedy their principal grievances themselves. He proposed that the full franchise should be given to every foreigner who (1) had been resident for five years in the Republic; (2) declared his intention to reside permanently; (3) took an oath to obey the laws, undertake all obligations of citizenship, and defend the independence of country; the franchise to be confined to persons of good character possessing a certain amount of property or income; finally, some increase of seats should be granted in the district where the Uitlanders principally resided. The number of these was a matter for discussion, but it was essential that they should not be so few as to leave the representatives of the new constituencies in a contemptible minority. The President objected that this was tantamount to handing over his country to foreigners, but Sir Alfred Milner pointed out that the old burghers would still have a large majority in the Volksraad. The President made the following counter-proposal, conditioning it, however, upon the satisfactory settlement of existing grounds of difference and the agreement to settle future difficulties by arbitration, and on his request for incorporation of Swaziland being submitted to H.M. Government. Subject to this he undertook to submit to the approval of the Volksraad and people these detailed proposals:—New comers registering themselves within fourteen days after arrival to obtain naturalisation after two years on complying with following conditions:—(1) Six months' notice of intention to apply for naturalisation; (2) two years' continuous registration; (3) residence in the S.A. Republic during that period; (4) no dishonouring sentence; (5) proof of obedience to the laws, no act against government or independence; (6) proof of full State citizenship and franchise or title to it in former country; (7) possession of fixed property to value of £150, occupation of house to annual rental of £50, or yearly income of at least £200, Government to have the power of granting naturalisation to persons not satisfying this condition; (8) oath similar to Orange Free State. Persons so naturalised would, five years after naturalisation, obtain the full franchise on the following conditions:—(1) Continuous registration for five years after naturalisation; (2) continuous residence during that period; (3) no dishonouring sentence; (4) proof of obedience to law, etc.; (5) property qualification as above; (6) residents in the S.A. Republic before '90 getting naturalised within six months from promulgation of this proposed law and giving six months' notice of intention to apply for naturalisation to obtain full franchise two years after naturalisation on complying with conditions for full franchise mentioned above, substituting two for five years, those not getting naturalised within six months to fall under already mentioned conditions for new comers; (7) those already resident for two years or more to be allowed immediate naturalisation on above-mentioned naturalisation conditions for new comers and to obtain full franchise five years after naturalisation on compliance with above-mentioned full franchise conditions; (8) those already naturalised to obtain full franchise five years after naturalisation on last-mentioned conditions.

Sir Alfred Milner admitted that this proposal

was a considerable advance on the existing franchise law, but he felt that it was quite inadequate, for no man not already naturalised could under the scheme get a vote for the First Volksraad in less than 2½ years from the passing of the new law, even if he had been in the country for 13 or 14 years. The President refused to consider any suggestions as to giving the Uitlanders powers of local self-government, but offered to recommend an increase of the representation of the goldfields from two to five members. The First Raad met soon after and endorsed the President's proposals, and the Government was instructed to prepare an amendment to the franchise law on his terms. This was done (13th), and the Raad accepted the proposals, with one or two alterations, and resolved to refer them to the people. The tension in regard to political affairs proved very prejudicial to business on the Rand, and thousands even at this stage left Johannesburg. The **Uitlander Council** issued a formal declaration (July 4th), approving Sir A. Milner's proposals, but declaring that (1) it was essential to fix at the outset conditions under which all persons qualified should obtain the franchise without unnecessary expense, trouble, or delay, and without intimidation; (2) those who got the franchise should be able to use it effectively; (3) redistribution should take place periodically by an automatic arrangement, so that representation should bear some definite relation to the number of electors. Further, the settlement should be guaranteed by an understanding between the Imperial and the Boer Governments that a Reform Act should be passed providing for no disability by reason of creed; the recognition of English equally with Dutch as the official language; the establishment of an independent High Court; the right of public meeting and freedom of speech and the Press; elections by ballot, with stringent provisions against bribery and intimidation. Lengthy conferences of a private and unofficial character took place during July, in which Mr. Hofmeyr, the leader of the Afrikaner Bond, Mr. Herholdt, one of the Cape Ministers, and Mr. Fischer, a member of the Executive of the Orange Free State, took part. The result was that new franchise proposals were laid before the Raad (7th), the effect of which was that persons who came to the country before the passing of the proposed new law would get the franchise in nine years from the time of their arrival, or five years from the passing of the law provided that the period of their residence was not less than seven years. It was also proposed that the children of aliens should get the franchise on attaining their majority, and that four additional members for each Raad should be given to the goldfields. The proposals were referred to a commission of five members. When they came before the Raad the nine years' period was reduced to seven years (18th). The other proposals, with minor alterations, were passed. They were duly communicated to the British Government, and Mr. Chamberlain announced in the House of Commons their intention to ask for a joint inquiry as to how far the scheme would give adequate representation to the Uitlanders. They were determined to see that a satisfactory arrangement should at last be arrived at (28th). A communication was accordingly telegraphed through the British Agent at Pretoria (Aug. 2nd), and delivered by

mail (23rd), inviting the President to send delegates to a Joint Commission to discuss with British delegates whether the new franchise law would give substantial and immediate representation to the Uitlanders.

After discussions and negotiations between the British Agent and Dr. Smuts, the State Attorney, the **Boer Government** replied (Aug. 19th) by suggesting the following alternative proposal:—“(1) The Government are willing to recommend to the Volksraad and the people a five years' retrospective franchise, as proposed by the High Commissioner on June 1st, '99. (2) The Government are further willing to recommend to the Volksraad that eight new seats in the First Volksraad, and, if necessary, also in the Second Volksraad, be given to the population of the Witwatersrand, thus with the two sitting members for the goldfields giving to the population thereof ten representatives in a Raad of thirty-six, and in future the representation of the goldfields of this Republic shall not fall below the proportion of one-fourth of the total. (3) The new burghers shall equally with the old burghers be entitled to vote at the election for State President and Commandant-General. (4) This Government will always be prepared to take into consideration such friendly suggestions regarding the details of the franchise law as H.M. Government, through the British Agent, may wish to convey to it. (5) In putting forward the above proposals the Government assumes:—(a) That H.M. Government will agree that the present intervention shall not form a precedent for future similar action, and that in the future no interference in the internal affairs of the Republic will take place. (b) That H.M. Government will not further insist on the assertion of the suzerainty, the controversy on the subject being allowed tacitly to drop. (c) That arbitration (from which foreign element other than Orange Free State is to be excluded) will be conceded as soon as the franchise scheme has become law. (6) Immediately on H.M. Government accepting this proposal for a settlement, the Government will ask the Volksraad to adjourn for the purpose of consulting the people about it, and the whole scheme might become law, say, within a few weeks. (7) In the meantime the form and scope of the proposed tribunal are also to be discussed and provisionally agreed upon while the franchise scheme is being referred to the people, so that no time may be lost in putting an end to the present state of affairs.” An addition to the despatch sent separately (21st) declared that the proposals as to franchise and representation were expressly conditional on the acceptance by H.M. Government of paragraph 5 (see p. 663).

H.M. Government's reply to this offer (Aug. 30th) was that they assumed that the five years' franchise proposal was not hampered by any conditions which would impair its effect, and agreed that the British Agent and other persons appointed by the High Commissioner should make the investigations necessary to satisfy H.M. Government on this point. The reply proceeded as follows:—“With regard to the conditions of the Government of the S.A. Republic—first, as regards intervention, H.M. Government hope that the fulfilment of the promises made and the just treatment of the Uitlanders in future will render unnecessary any further intervention on their behalf; but

H.M. Government cannot of course debar themselves from their rights under the Conventions nor divest themselves of the ordinary obligations of a civilised power to protect its subjects in a foreign country from injustice. Secondly, with regard to suzerainty, H.M. Government would refer the Government of the S.A. Republic to the second paragraph of my despatch of July 13th. Thirdly, H.M. Government agree to a discussion of the form and scope of a tribunal of arbitration from which foreigners and foreign influence are excluded. Such a discussion, which will be of the highest importance to the future relations of the two countries, should be carried on between the President and yourself, and for this purpose it appears to be necessary that a further conference, which H.M. Government suggest should be held at Cape Town, should be at once arranged. H.M. Government also desire to remind the Government of the S.A. Republic that there are other matters of difference between the two Governments, which will not be settled by the grant of political representation to the Uitlanders, and which are not proper subjects for reference to arbitration. It is necessary that these should be settled concurrently with the questions now under discussion, and they will form, with the question of arbitration, proper subjects for consideration at the proposed conference."

The Transvaal Government replied (Sept. 2nd) that they observed with the deepest regret that H.M. Government had not been able to decide on accepting the proposal for a five years' franchise and extension of the representation of the Witwatersrand with the conditions attached thereto, the more so that from semi-official discussions [with the British Agent] they had thought the proposal would be acceptable. As a consequence the Government considered the proposal had lapsed. As to a unilateral inquiry, its findings, especially when arrived at before the working of the law had been tested, would be premature, and thus probably of little value. As to intervention, the Government did not ask nor intend that H.M. Government should abandon any right which they might really have, either under the '84 Convention or under international law, to intervene for the protection of British subjects. As to suzerainty, its non-existence had been already clearly stated by the Transvaal Government in its despatch of April 16th, '98, by which it still stood. With reference to the suggestion for holding another Conference, the Government would await further information from H.M. Government. Reverting to the invitation of Aug. 2nd, the Government asked how H.M. Government proposed the Commission of delegates from both Governments to inquire into the new franchise law should be constituted, and what place and time for the meeting was suggested. Mr. Pakeman, editor of the *Johannesburg Leader*, was arrested (3rd) on a charge of high treason, afterwards reduced to offence against the Press Laws, and an attempt was made to secure Mr. Monypenny, the editor of the *Star* and correspondent of the *Times* also, but he got away. This stimulated still further the exodus of British subjects; business almost ceased, and workmen, both natives and whites, left the mines in large numbers. The State Attorney emphatically disclaimed all responsibility for these arrests, though it was alleged that he had telegraphed explicit in-

structions in regard to them. Mr. Pakeman was admitted to bail, but failed to appear, and a warrant was issued for his rearrest. Following on a debate in the Raad, a request was sent to the High Commissioner through the British Agent for information as to the meaning of the massing of troops on the Transvaal borders (6th). The reply (7th) was that the High Commissioner did not know what the State Secretary meant by the massing of troops. It was a matter of common knowledge that the British troops in South Africa, as to the position and numbers of which there was no secret, were there for the protection of British interests and to make provision against eventualities. An official statement was issued by the Transvaal Government (8th) that, acting on the advice of the Free State and the Bond leaders, they desired to add to their despatch of Sept. 2nd an intimation of their acceptance of H.M. Government's invitation (sent on Aug. 2nd) to appoint delegates to a Joint Commission to inquire into the new franchise law.

The Imperial Cabinet met in London (Sept. 8th), and the following despatch was sent:—"H.M. Government understand the Note of the S.A.R. Government of Sept. 2nd to mean that their proposals made in their note of Aug. 19th are now withdrawn because the reply of H.M. Government contained in their Note of Aug. 30th with regard to future intervention and suzerainty is not acceptable. H.M. Government have absolutely repudiated the view of the political status of the S.A. Republic taken by the Government of the S.A. Republic in their Note of April 16th, '93, and also in their Note of May 9th, '99, in which they claim the status of a sovereign international State, and they are therefore unable to consider any proposal which is made conditional on the acceptance by H.M. Government of these views. It is on this ground that H.M. Government have been compelled to regard the last proposal of the Government of the S.A. Republic as unacceptable in the form in which it has been presented. H.M. Government cannot now consent to go back to the proposals for which those in the Note of Aug. 19th are intended as a substitute, especially as they are satisfied that the law of '99 in which these proposals were finally embodied is insufficient to secure the immediate and substantial representation which H.M. Government have always had in view, and which they gather from the reply of the Government of the S.A. Republic that the latter admit to be reasonable. Moreover, the presentation of the proposals of the note of Aug. 19th indicates that the Government of the S.A. Republic have themselves recognised that their previous offer might be with advantage enlarged, and that the independence of the S.A. Republic would be thereby in no way impaired. H.M. Government are still prepared to accept the offer made in paragraphs 1, 2 and 3 of the Note of Aug. 10th taken by themselves, provided that the inquiry which H.M. Government have proposed, whether joint—as H.M. Government originally suggested—or unilateral, shows that the new scheme of representation will not be encumbered by conditions which will nullify the intention to give substantial and immediate representation to the Uitlanders. In this connection H.M. Government assume that, as stated to the British

Agent, the new members of the Raad will be permitted to use their own language. The acceptance of these terms by the Government of the S.A. Republic would at once remove the tension between the two Governments, and would in all probability render unnecessary any further intervention on the part of H.M. Government to secure the redress of grievances which the Uitlanders would themselves be able to bring to the notice of the Executive and the Raad. H.M. Government are increasingly impressed with the danger of further delay in relieving the strain which has already caused so much injury to the interests of South Africa, and they earnestly press for an immediate and definite reply to their present proposal. If it is acceded to, they will be ready to make immediate arrangements for a further conference between the President of the S.A. Republic and the High Commissioner to settle all the details of the proposed Tribunal of Arbitration, and the questions referred to in the Note of Aug. 30th, which are neither Uitlander grievances nor questions of interpretation, but which might be readily settled by friendly communications between the representatives of the two Governments. If, however, as they most anxiously hope will not be the case, the reply of the S.A.R. Government is negative or inconclusive, H.M. Government must reserve to themselves the right to reconsider the situation *de novo*, and to formulate their own proposals for a final settlement." This despatch was received and read in the Volksraad (12th), and the Afrikaner party at the Cape were understood to have strongly urged its acceptance. Undoubtedly in Great Britain public opinion generally approved of the despatch.

The reply of the Transvaal Government (16th) was as follows:—"This Government wishes to state that it learns with a feeling of deep regret that it must understand that H.M. Government withdraws from the invitation sent in their letter of Aug. 23rd [i.e. the telegraphed communication of Aug. 2nd] and accepted by this Government, and substitutes in its place an entirely new proposal. The proposal, which has now lapsed, contained in the letters of this Government of Aug. 19th and 21st, was induced by suggestions given by British Agent to State Attorney, and these were accepted by this Government in good faith, and on express request, as equivalent to an assurance that the proposal would be acceptable to H.M. Government. It was in no way the object of this Government either then or now to make any needless recapitulations of its contention about its political status as an independent State as defined by Convention of London '84, but only to try to put an end to the state of tension by meeting H.M. Government upon a proposal which it supposed to be constituted both in spirit and in form, in such a way as it was given to understand to be satisfactory to H.M. Government. This Government cannot disguise from itself that in making the proposals contained in its note of Aug. 19th it probably ran the danger, not only of its being disclaimed by S.A.R. Volksraad and people, but also that its acceptance might affect the independence of the State by, as therein proposed, giving an immediate vote in the Legislature of the State to a large number of inpouring Uitlanders; but it set against that the continuous threatening and undoubted danger to its highly prized

independence, arising from claim of suzerainty made by H.M. Government, from the interference of that Government in the internal affairs of this Republic, and from the want of an automatically working manner of regulating differences between H.M. Government and this Government, and was in consequence prepared to recommend to the S.A.R. Volksraad and to the people to run the danger attached to offer made in order to avoid the certainty of the greater danger. Inasmuch, however, as the conditions attached to the proposal, the acceptance of which constituted the only consideration for its offer, have been declared unacceptable, it cannot understand on what grounds of justice it can be expected that it should be bound to grant the rest; and with a view to the assurance given by the Secretary of State for the Colonies that he would not consider the said offer as a refusal in answer to his invitation to a joint inquiry based upon existing franchise law and scheme of representation for Witwatersrand gold-fields, it cannot understand why, as soon as this invitation was accepted (as was done by this Government in its note of Sept. 2nd), H.M. Government declares that it cannot any longer agree to the inquiry on this subject and for purposes which that Government itself proposes. It is also not clear to this Government on what grounds H.M. Government, after having recently by means of its invitation intimated that it could not declare without an inquiry whether franchise law and resolutions taken about representation would afford immediate and substantial representation to the Uitlanders in S.A. Republic, is to-day in a position, without having made any inquiry so far as this Government is aware, before the law can have been tested in its operation, to declare that the measure just mentioned is insufficient for the object contemplated. It trusts that it will clearly appear from the foregoing that H.M. Government is under a misunderstanding if it supposes that this Government has ever recognised that it has considered the lapsed proposal contained in letter of Aug. 19th without the conditions imposed therein and repeated in the Note of Aug. 21st, as a reasonable proposal, or made it as a proposal; and still less that this Government was or is of opinion that its earlier proposal could be extended with advantage to the Republic without observance of those conditions, or that the Republic would not suffer any violation of its independence. However earnestly this Government also desires to find an immediate and satisfactory course by which existing tension should be brought to an end, it feels itself quite unable, as desired, to recommend or propose to the S.A.R. Volksraad and people the part of its proposal contained in paragraphs 1, 2, and 3 of its Note of Aug. 19th, omitting the conditions on the acceptance of which alone the offer was based, but declares itself always still prepared to abide by its acceptance of the invitation of H.M. Government to get a Joint Commission composed as intimated in its Note of Sept. 2nd. It considers that if conditions are contained in the existing franchise law which has been passed, and in the scheme of representation, which might tend to frustrate the object contemplated, it will attract the attention of the Commission, and thus be brought to the knowledge of this Government. This Government has noticed with surprise the assertion that it had intimated to British

Agent that the new members to be chosen for S.A.R. Volksraad should be allowed to use their own language. If it is thereby intended that this Government would have agreed that any other than the language of the country would have been used in the deliberations of the Volksraad, it wishes to deny same in the strongest manner. Leaving aside the fact that it is not competent to introduce any such radical change, they have up to now not been able to understand the necessity or even advisability of making a recommendation to the Volksraad in the spirit suggested. Hence also the immediate and express denial given to British Agent by State Attorney to any question of that nature. Inasmuch as the proposal for any further Conference has been made specifically dependent on the acceptance of a proposal which this Government does not feel at liberty to recommend to Volksraad, it would perhaps be premature to deal with it further at the present time. It merely wishes, however, to remark that it has not yet been made clear to it which are the definite questions which would be discussed at proposed Conference, and which could not be subjected to arbitration, but it is pleased to see that H.M. Government thinks that they could readily be settled by means of friendly discussions; while it further welcomes with much pleasure prospect disclosed by H.M. Government of the introduction of a Court of Arbitration for the decision all points of difference and points to be discussed at the Conference, and is ready and willing to co-operate towards the composition of such a Court, and that the more as it is its firm intention to abide entirely by the Convention of London, '84, as its efforts have been continuously to do. Finally this Government continues to cherish hope that H.M. Government on further consideration will feel itself free to abandon idea of making new proposals more difficult for this Government and imposing new conditions, and will declare itself satisfied to abide by its own proposal for a Joint Commission, as first proposed by Secretary of State for Colonies in Imperial Parliament, and subsequently proposed to this Government and accepted by it. If H.M. Government is willing and feels able to make this decision, it would put an end to the present state of tension, race hatred would decrease and die out, the prosperity and welfare of the S.A. Republic and of the whole of South Africa would be developed and furthered, and fraternisation between the different nationalities would increase." **The President of the Orange Free State** (21st), in addressing the Free State Raad at the opening of its session, accused Mr. Greene, the British Agent at Pretoria, of eliciting from the Transvaal the offer of a five years' franchise, and declared that the Free State was bound by treaty to afford assistance to the Transvaal in case of war. **The charge against Mr. Greene** was repeated in a Green Book issued by the Transvaal Government. Dr. Smuts, the State Attorney, stated that Mr. Greene had told him the Imperial Government would accept the offer of the five years' franchise and the conditions accompanying it if it were made. He also denied that he promised Mr. Greene that the new Volksraad members would be allowed to speak in their own language. Following on a Cabinet Council the Colonial Secretary sent a despatch (22nd) protesting against this charge of breach of faith, and refuting from the despatches that

had passed between the two Governments the various statements made in support of the charge. The facts are as follows:—On Aug. 12th the State Attorney, Dr. Smuts, approached the British Agent with a view to find out if H.M. Government would waive the Joint Commission of Inquiry if the Transvaal Government put forward a more liberal scheme of Uitlander representation. The scheme was with one exception identical with that set out in the formal proposal of Aug. 19th; but the first of the conditions accompanying it was, that H.M. Government "will agree that their present intervention shall not form a precedent for future similar action, and that in future no interference in the internal affairs of the Republic *contrary to the Convention* will take place." The other two conditions were identical with the conditions in the formal proposal. A further variation in the first condition appeared in the additional despatch of Aug. 21st, where the condition read thus: "H.M. Government in future not to interfere in internal affairs of the South African Republic." The one exception in the franchise scheme referred to above was that for clause (4) the proposal as made to Mr. Greene by Dr. Smuts read thus: "The simple details of franchise law to be discussed with British Agent. He may have his legal adviser. Any other points which may arise to be discussed in the same way."

On the same day the reply to the Transvaal Government's despatch of Sept. 16th was sent, and H.M. Government expressed their profound regret that that despatch was a refusal to accept the offer of H.M. Government. The reply proceeded:—"H.M. Government have on more than one occasion repeated their assurances that they have no desire to interfere in any way with the independence of S.A. Republic, provided that the conditions on which it was granted are honourably observed in the spirit and in the letter, and they have offered as part of a general settlement to give a complete guarantee against any attack upon that independence either from within any part of the British dominions or from the territory of a foreign State. They have not asserted any rights of interference in the internal affairs of the Republic other than those which are derived from the Conventions between the two countries or which belong to every neighbouring Government (and especially to one which has a largely predominant interest in the adjacent territories) for the protection of its subjects and of its adjoining possessions; but they have been compelled by the action of Government of the S.A. Republic, who have in their Note of May 9th, '99, asserted the right of the Republic to be a Sovereign international State, absolutely to deny and repudiate this claim. The object which H.M. Government have had in view in the recent negotiations has been stated in a manner which cannot admit of misapprehension—viz., to obtain such a substantial and immediate representation for the Uitlanders in the S.A. Republic as H.M. Government hoped would relieve them from any necessity for further interference on their behalf, and would enable the Uitlanders to secure for themselves that fair and just treatment which was formally promised to them in '81, and which Her Majesty intended to secure for them when she granted the privilege of self-government to the inhabitants of the Transvaal. As was stated in my telegram of Sept. 8th,

H.M. Government are of opinion that no conditions less comprehensive than those contained in their offer of that date can be relied upon to effect this object. The refusal of the Government of the S. A. Republic to entertain the offer thus made, coming as it does at the end of nearly four months of protracted negotiations, themselves the climax of an agitation extending over a period of more than five years, make it useless to further pursue a discussion on the lines hitherto followed, and H.M. Government are now compelled to consider the situation afresh, and to formulate their own proposals for a final settlement of the issues which have been created in South Africa by the policy constantly followed for many years by the Government of the S. A. Republic. They will communicate to you the result of their deliberations in a later despatch."

The Orange Free State Raad resolved that, while endeavouring to maintain peace, the Government should assist the Transvaal in case of war (27th). The Transvaal Government meanwhile made every preparation for war. Burghers were sent in large numbers to the frontiers, the High Court was closed, many of the mines were shut down, and the rush to leave the country became more eager than ever. The week's shipment of gold to England, amounting to £800,000, was seized in transit by order of the Government and taken to Pretoria (Oct. 3rd). It was stated that the banks concerned would be indemnified by the Government, and that all gold produced in the mines in future would be commandeered by the Government, enough minted coin for wages and working expenses being returned to the managers (5th). A belated Green Book was issued (6th) containing the reply of the Government to Mr. Chamberlain's despatch in May calling attention to the Uitlanders' petition to the Queen. The Government claimed that under the '84 Convention it had sole control of its internal affairs, and could not see any reason to justify the interference of the British Government, which was a breach of the Convention. The grievances of the Uitlanders were "chimerical," and therefore the Government declined to notice the allegations contained in the petition or to discuss the observations made thereon by the Imperial Government, while stating that it would highly appreciate any hints in the interests of British subjects in the Republic. The Imperial Parliament was summoned to consider the situation (7th), and the Army Reserves, to the number of about 25,000 men, were called out the same day.

On Oct. 9th the Transvaal Government presented a Note to the British Agent requesting H.M. Government to give it the assurance: (1) That all points of mutual difference shall be regulated by the friendly course of arbitration or by whatever amicable way may be agreed upon by this Government with H.M. Government. (2) That the troops on the borders of this Republic shall be instantly withdrawn. (3) That all reinforcements of troops which have arrived in South Africa since June 1st, '99, shall be removed from South Africa within a reasonable time, to be agreed upon with this Government, and with a mutual assurance and guarantee on the part of this Government that no attack upon or hostilities against any portion of the possessions of the British Government shall be made

by the Republic during further negotiations within a period of time to be subsequently agreed upon between the Governments; and this Government will, on compliance therewith, be prepared to withdraw the armed burghers of this Republic from the borders. (4) That H.M. troops which are now on the high seas shall not be landed in any port of South Africa. The Note concluded thus:—"This Government must press for an immediate and affirmative answer to these four questions, and earnestly requests H.M. Government to return such an answer before or upon Wednesday, Oct. 11th, '99, not later than 5 o'clock p.m.; and it desires further to add that in the event of unexpectedly no satisfactory answer being received by it within that interval it will with great regret be compelled to regard the action of H.M. Government as a formal declaration of war, and will not hold itself responsible for the consequences thereof; and that in the event of any further movements of troops taking place within the above-mentioned time in the nearer directions of our borders this Government will be compelled to regard that also as a formal declaration of war." The reply of H.M. Government was to the effect that they had received with great regret the peremptory demands of the Government of the S.A. Republic. The conditions demanded by the Government of the S.A. Republic were such as H.M. Government deemed it impossible to discuss.

A Proclamation summoning all burghers domiciled outside the Republic without permission from the Government to return for commando service, on penalty of fines or imprisonment with confiscation of their property, was issued (10th), and an official manifesto addressed to all Afrikaners in South Africa and signed by Mr. Reitz charged Great Britain with aiming at overthrowing the independence of the Transvaal on account of the gold-mining industry on the Rand, and appealed for support to resist the unjust British demands. The British Agent left Pretoria (12th). The commandoes assembled on the frontiers crossed into Natal and Bechuanaland, General Joubert personally directing the movements on the Natal side. Charlestown and Newcastle were occupied, but no important events occurred here during the first few days of the war. Mafeking and Kimberley on the western border were closely invested, and their railway and telegraph communication was cut both north and south. An armoured train with two guns was captured near Mafeking (12th). The first severe fighting, however, took place in Natal (q.v.). A combined movement was directed against the British advanced force at Glencoe, and a strong column under Commandant Lucas Meyer attacked Glencoe (20th). The British commander, General Symons, promptly assumed the offensive, carried the hill on which the Boers had established themselves, captured their guns, and drove them off in confusion; but unfortunately he himself was mortally wounded and died a day or two afterwards. A detachment of Hussars while pursuing the retreating foe was captured by the Boers. Meanwhile another Boer column had seized the railway between Glencoe and Ladysmith, and was only dislodged after a stubborn fight at Elandslaagte (21st), in which Commandant Viljoen was killed and two guns were taken by the British. The attempt to isolate the British

force at Glencoe thus failed; but, as the Boer columns at last joined hands and threatened another attack, it was compelled to retire on the main body at Ladysmith, leaving the wounded at Dundee. To cover this retirement General Sir George White had to fight again at Rietfontein (24th), and again the Boers were dislodged, though both sides lost heavily. The fighting on the western border was not so important, though some loss was inflicted upon Cronje's command in a brilliant sortie and bayonet charge on the trenches by the force under Colonel Baden-Powell at Mafeking (28th). British Bechuanaland and Griqualand West were proclaimed to be part of the Transvaal after Vryburg and some other towns had been occupied. Ladysmith was meanwhile being gradually invested by the combined forces under General Joubert, and a severe blow was inflicted on the British (30th), when a column of about 1000 men, consisting of the Royal Irish Fusiliers and the Gloucestershire Regiment, with No. 10 Mountain Battery, was surrounded at Nicholson's Nek, and forced, after having lost heavily, to capitulate. The captured column formed the left flank of a British force employed in an attack on the Boer positions outside Ladysmith, and had during its advance lost all its reserve ammunition and the guns through the mules stampeding. Artillery fighting formed the chief feature of the events of the next few days; but the British troops at Colenso were forced to retire over the Tugela bridge (Nov. 2nd), and all communication between Ladysmith and the south was cut off. Simultaneously the bridges over the Orange River into Cape Colony were seized, and one or two captures of Cape Colony police were made. Aliwal North, Jamestown, and Colesberg were occupied (18th), and a considerable number of colonists appeared to have joined the Boer forces at this time. But a few days after the British advance from the south began. Lord Methuen, commanding at Orange River, pushed on to Belmont and completely defeated a strong Boer force there (23rd). Sixty-four waggons were taken and burned, and 50,000 rounds of ammunition with 750 shells were blown up. Another blow was dealt the Boers at Enslin, near Graspan, six miles farther north (25th), the British Naval Brigade suffering heavily before the position was carried. Lord Methuen protested against the use of the white flag by the Boers, and the firing on the British troops by wounded Boers. After "one of the hardest and most trying fights in the annals of the British Army," the passage of the Modder River was forced by Lord Methuen (28th) in face of 8000 Boers. Lord Methuen himself was slightly wounded in this action. In Natal, Colenso was occupied by the Boers, and other detached Boer forces seized the main line at Highlands, a point south of Estcourt, and Mooi River, while a large body, said to be under General Joubert, was reported to be only 25 miles from Howick. British troops were stationed at this time at Estcourt and Mooi River as well as at Ladysmith. As the result of an attack in force made by General Hildyard from Estcourt (23rd) upon the Boer position on Beacon Hill, General Joubert had to withdraw his forces in the direction of Colenso and Ladysmith (26th), and Sir Redvers Buller appearing on the scene ordered a general advance upon Colenso. Ladysmith

was still reported all well (Dec. 1st), and the Boers were falling back before the British advance.

The British forces in South Africa before the outbreak of war probably did not much exceed 11,000, excluding the troops sent from India during September, but by the end of October the number had been raised to 24,000, without counting the colonial troops of South Africa, amounting to nearly 15,000. The army corps and additional troops sent out subsequently approximately numbered 50,000, and the contingents from Australia and Canada 2500, giving a grand total of the force under Sir Redvers Buller of over 90,000. Another division, the sixth, was ordered to be mobilised for service at the end of November. The strength of the Boer forces it was impossible to estimate exactly. All previous calculations as to their numbers seemed to be falsified, and probably the extent to which they were joined by Cape and Natal Dutch colonists added to the confusion; but the number may be roughly put at about 60,000.

Treasury. The Lord High Treasurer, who, when existing, is the third great officer of State, had of old the appointment of all officers employed in collecting the revenues of the Crown, the nomination of all escheaters, and the disposal of all plans and ways relating to the revenue; and power to let leases of Crown lands. This definition of his powers and duties still holds good, to a great extent, in regard to the Treasury Board; although the management of the Crown lands has long since passed into the hands of the Commissioners of Woods and Forests. The Treasury has control over the management, collection, and expenditure of the public revenue (see FINANCE), and exercises a general supervision and control over all the public departments, and no increase of salaries or additions to or material changes in the civil establishments can be made without its authority. All exceptional cases in matters of revenue are referred to it, and it settles all questions regarding the amount of compensations, allowances, and pensions to be awarded in exceptional cases. It audits the civil list, and is the accounting department to the House of Commons for a number of civil service votes, including those for rates on Government property, secret service, criminal prosecutions, revising barristers, learned societies, suppression of the slave trade, subsidies to telegraph companies, and for temporary commissions. Since the days of George I. the powers and duties of the office of L. H. T. have been invariably executed by commissioners, consisting of the First Lord of the Treasury, the Chancellor of the Exchequer, and three Lords Commissioners, who are usually designated Junior Lords. The First Lord, if he fill that office only, has no share in the management of the department; but some minor duties, such as recommending for Civil List Pensions, appertain to his position. A number of appointments are in his gift, and he is an *ex-officio* trustee of the National Gallery and British Museum. For nearly eighty years prior to 1885 the office of First Lord was invariably held by the Prime Minister (*q.v.*) of the day. The departmental duties of the three junior lords are almost nominal. The Patronage Secretary to the Treasury is principal Government whip (see COMMONS). The commissioners forming the Treasury Board seldom if ever meet; and in fact

the real work of the department is performed by the **Chancellor of the Exchequer**, who is its effective head, aided in matters of detail by the **Financial Secretary**, and the **Permanent Secretary**, Sir Francis Mowatt (see separate biography). The Chancellor of the Exchequer sees that the estimates sent in by the spending departments are framed with due regard to economy, is made acquainted with the views of the revenue departments regarding probable receipts, and then prepares and introduces his budget; appointments in the National Debt Office are in his gift, and not only questions affecting public revenue and expenditure, but the **National Debt**, and the best methods of reducing it, and the advances made by the National Debt Commissioners for local loans are all matters within his special cognisance (see FINANCE). He is master of the Mint, and he presides at the nomination of sheriffs. Like the First Lord of the Treasury, he is provided with an official residence at Downing Street. In connection with the Treasury there is a **Parliamentary counsel** who drafts Government Bills, and a solicitor who acts for the Government in certain legal prosecutions, and is the Crown's nominee when Her Majesty becomes entitled to the personal estate of an intestate, and administration is granted by the court; and who is also **Queen's Proctor** for Divorce Interventions and **Director of Public Prosecutions**.

Trevelyan, Right Hon. Sir G. O., Bart.
See PRIVY COUNCIL.

Trinidad. An island of rectangular shape, with an area of about 1754 sq. m., pop. 260,000, separated from the mainland of Venezuela by the Gulf of Paria. In '89 the island of **Tobago** (*q.v.*) was separated from the Windward Islands and joined with Trinidad. The capital is Port-of-Spain, in the north-eastern corner of the island, which possesses the best harbour in the West Indies. The products are sugar, cacao, asphalt, coconuts, and fibre. The asphalt output, which is the product of the Pitch Lake, the property of the Crown, is about 100,000 tons per annum, on which the payment to the Government is about £42,000. The Government consists of a Governor, an Executive Council of 7 members, and a Legislature composed of the Governor, 9 official and 17 unofficial members, all appointed by the Crown. A reciprocity treaty with the United States was concluded during '99, by which, in return for certain reductions in the import duties on American products, the colony obtained reductions of 12½ per cent. in the duties upon sugar and asphalt entering American ports. Under the Colonial Loans Act '99 the Imperial Government advanced £110,000 for harbour and other works, and the extension of the Government railway. See BRITISH EMPIRE (table), DIPLOMATIC, and WEST INDIES.

Tripoli. A Turkish province in Africa on the Mediterranean coast, bounded on the west by Tunis and Algeria, on the east by Egypt, and on the south-east and south by the Sahara. The estimated area, with Bengazi, is about 400,000 sq. miles, and the population about 1,300,000. Tripoli is the chief town, with a population of 30,000. The trade of the province practically all passes through Tripoli and Bengazi. Italy is understood to expect that in time the province will become hers.

Truck Act, '96. This Act (59 & 60 Vict., ch. 44) received the royal assent Aug. 14th,

'96, and came into operation Jan. 1st, '97. Sect. 1 enacts that an employer shall not make any contract with any workman for any deduction from the sum contracted to be paid by the employer to the workman, or for any payment to the employer by the workman, for or in respect of any fine, unless the terms of the contract are contained in a notice kept constantly affixed where it can be easily seen, read, and copied; or the contract is in writing signed by the workman; and the contract specifies the acts or omissions in respect of which the fine may be imposed, and the amount of the fine or the particulars from which that amount may be ascertained; and the fine imposed is in respect of some act or omission which causes, or is likely to cause, damage or loss to the employer, or interruption or hindrance to his business; and the amount of the fine is fair and reasonable, having regard to all the circumstances of the case. His employer is not to make any such deduction or receive any such payment unless written particulars showing the acts or omissions and the amount of the fine are supplied to the workmen when a deduction or payment is made. This section of the Act applies to the case of a shop assistant in like manner as it applies to the case of a workman. Sect. 2 enacts that an employer shall not make any contract for any deduction, or payment to him, in respect of bad or negligent work, or injury to the materials or other property of the employer, unless the terms of the contract are exhibited as in the previous section; or the contract is in writing signed by the workman; and the deduction or payment does not exceed the actual or estimated damage or loss occasioned by the act or omission of the workman, or of some persons over whom he has control, or for whom he has by the contract agreed to be responsible; and the amount of the deduction is fair and reasonable, having regard to all the circumstances of the case. The deduction or payment is not to be made or received unless written particulars are supplied as in the previous section. Sect. 3 makes similar provisions in respect of the use or supply of materials, tools, or machines, standing room, light, heat, or in respect of any other thing to be done or provided in relation to the work or labour of the workman. Any workman or shop assistant may recover any sum deducted or paid to his employer contrary to the Act, provided that the proceedings are commenced within six months from the date of the deduction or payment, and that where he has consented to or acquiesced in the payment or deduction he shall only recover the excess which has been deducted or paid over the amount, if any, which the court may find to be fair and reasonable having regard to all the circumstances of the case. A register of deductions or payments made under sect. 1 of the Act is to be kept, and is to be open to inspection by one of Her Majesty's inspectors of factories or of mines. Contracts under the Act are not liable to Stamp Duty. The Secretary of State, if satisfied that the provisions of the Act are unnecessary for the protection of the workmen employed in any trade or business, may, by order under sect. 9 of the Act, exempt them from provisions of the Act; but every such order is to be laid before Parliament, and may, within forty days thereafter, be annulled by resolution of either House. The duties of inspectors to enforce the provisions of the former Truck Acts are by

sect. 10 of this Act extended to the case of a laundry, and to places where work is given out by the occupier of a factory or workshop, or by a contractor or sub-contractor.

Tuberculosis. See **MEDICAL SUMMARY**, '99.

Tunis. One of the Barbary States of Northern Africa, lying east of Algeria, and bounded on the north and east by the Mediterranean, and on the south by the Sahara. **Area**, 51,000 sq. miles; **pop.** 1,902,000, including 102,000 Europeans and 1,800,000 natives. **Capital, Tunis**, **pop.** 153,000. Bedouin Arabs and Kabyles form the majority of the population, the French numbering at the outside 27,000. The French troops invaded the country in '81, and established a protectorate '82. There is a French Resident, who practically carries on the administration, and the military maintained in the country number 16,000 men. An agreement was concluded in Sept. '97 between Great Britain and France, whereby the British Government renounced for its consuls, its subjects, and its establishments in Tunis other rights and privileges than those secured for it in France. The most-favoured-nation treatment and the reciprocal enjoyment of the lowest customs tariff were mutually guaranteed for a period of years. It was provided, however, that cotton goods, the produce of the United Kingdom and of British colonies and possessions, should not be subject to import duties higher than 5 per cent. *ad valorem* from Dec. 31st, '97, until Dec. 31st, 1912, and after that date until the expiration of six months from the day on which one of the contracting parties shall have notified to the other its intention of terminating its operation. **Chief products** are wheat, barley and olive oil. **Revenue**, '97, £962,450; **expenditure**, £962,420; **public debt**, £5,702,000; **imports**, '96, £1,857,620; **exports**, £1,001,030. See **COLONIES**, ETC., OF EUROPEAN POWERS, and **DIPLOMATIC**.

Turkestan. From Central Asia, or what was formerly known as Independent Tartary, Russia has formed two provinces—**Turkestan** and **Transcaspia** (*q.v.*). The former comprises the khanates and deserts annexed by Generals Tcherniaeff and Kaufmann between '60 and '75. **Area** about 257,134 sq. miles, with 3,800,000 inhabitants. The principal town is **Tashkent**, **pop.** 100,000; **Bokhara** and **Khiva** are under the control of a governor-general. The old military road from Orenburg to Tashkent is now abandoned, reinforcements and stores being sent to Turkestan from the Caspian by Samarcand by railway. —**Turkestan, Afghan.** Is an Afghan province north of the Hindoo Koosh, consisting of 70,000 sq. m., and a population, mostly non-Afghan (Uzbeg), of nearly 1,000,000. Principal town, **Mazar-i-Sherif**, **pop.** 25,000, near the ruins of ancient Balkh. —**Turkestan, Eastern.** China's westernmost province, formerly known also as **Kashgaria**, a state established by the rebel Mussulmans under Yakoub Beg, the Atalik Ghazi. Includes the towns of **Yarkand**, **Kashgar**, and **Khoten**.

TURKEY.

An empire possessing extensive territories in Europe, Asia, and Africa, governed by

Sultan Abdul Hamid II. The Asian possessions are Asia Minor, Armenia and Kurdistan, Mesopotamia, Syria, and Yemen and the Hedjaz in Arabia. In Africa Tripoli and Bengazi belong to Turkey. The commands of the Sultan are absolute, unless opposed to the express direction of the Koran, a legal and theological code upon which the fundamental laws of the empire are based. The legislative and executive authority is exercised through the Grand Vizier and the Sheik-ul-Islam, who are appointed by the Sultan, the latter with the nominal concurrence of the Ulema or general body of lawyers and theologians. The Grand Vizier is assisted by the Medjliss-i-Hass or Cabinet of Ministers, and for administrative purposes the empire is divided into 30 vilayets or governments, subdivided further into provinces, districts and communities. Nominally subject to Turkey are Bulgaria, Bosnia-Herzegovina, Samos, and Egypt. It was also agreed, in '96, that Crete should be given autonomy, and by '98 the Turkish troops and Governor had been cleared out of the island. There are, it is estimated, about 16,000,000 Mahomedans and 5,000,000 Christians within the empire, besides those of other faiths. Agriculture is largely carried on, but in very primitive fashion. Tobacco, cereals, cotton, coffee, wine, silk and fruits are the chief productions. There are about 2500 miles of railway open. The capital is **Constantinople**, with a population of about 875,000. The **area** of Turkey, without the states nominally subject to it, is estimated at 1,111,741 sq. m.; and the **total population** at about 23,834,500. **Revenue**, £16,828,475; **expenditure**, £16,754,019. **Consolidated public debt**, '98, £92,007,616. **Imports**, '94, £21,890,420; **exports**, £12,403,452. See **ALBANIA**, **ARMENIA**, **CRETE**, **DIPLOMATIC**, **FOREIGN ARMIES**, **FOREIGN NAVIES**, **MACEDONIA**, **SOUDAN**, **TRIPOLI**, etc.

Turkey, Sultan of. See **ABDUL HAMID II.**

Turner, Right Hon. Sir George, K.C.M.G., ex-Premier of Victoria, is a solicitor. He has only been in active political life since 1889, when he was elected to represent St. Kilda in the Legislative Assembly, and still represents that constituency. He took office as Commissioner of Customs and Minister of Health in '91, and held those portfolios in the Munro Ministry and that of Mr. Shiels. In '92 he became also Solicitor-General. He was chosen as the leader of the Opposition in '94, and it was on his motion that the Patterson Ministry was overthrown. At the general election of '94 his supporters secured a majority, and he was placed in power as Premier. His forte is organisation. He was one of the guests of the Imperial Government in London on the occasion of the Jubilee festivities in '97, and was then made a Privy Councillor. He resigned office Dec. 1st, 1899.

Typewriting. Most of the leading companies provide instruction in the use of their machines, with tuition in shorthand; and typewriter examinations to test efficiency are conducted by the Society of Arts, the National Union of Typists, and other bodies. The **National Union of Typists** (registered), 29, Old Queen Street, Westminster, S.W., has been established to promote the professional interests of typists. **Secretary**, Mr. F. D. Pepper.

U

Uganda Protectorate, The, includes not only Uganda proper, but Unyoro, Usoga, and other countries westwards up to the boundary of the Congo Free State. Uganda itself is a large tract of country situated to the west and north-west of Lake Victoria Nyanza. Its area is about 90,000 sq. miles. An active missionary propaganda has been carried on in the country of late years, with the result that the people are divided into two parties, the Protestants and the Catholics, who each claim about 3000 baptised adherents. There are also, of course, the heathen and the Mahomedan sections of the population. The population is estimated at from 300,000 to 500,000. The capital of the country is Mengo. A military force under British officers holds the country, the Government having taken over the administration from the Imperial British East Africa Company in '94, and made the country a protectorate. This force also in some degree looks after British interests on the west side of the Nile and in the Eastern Soudan. The civil administrator resides at Port Alice on the Victoria Nyanza. The development of the country has progressed wonderfully in the last year or two, and will doubtless go on still faster when the railway from the coast is completed. This undertaking has made considerable progress, as to which see **EAST AFRICA PROTECTORATE**. See also **EGYPT** (map).—**History**, '99. Major Martyr, D.S.O., after having reorganised the Soudanese troops in the Protectorate, started at the end of Aug. '98, on an expedition, with instructions to occupy certain ports within the British sphere of influence in the equatorial provinces. The most advanced posts at that time were Foweira and Fajao, on the Nile, about 140 miles north of the capital of Uganda. Major Martyr, however, established an effective occupation (so it was reported in Aug. '99) as far north as Refaj. Strong garrisons were put into posts at Wadelai, Affuddo, about sixty miles farther north, and Fort Berkeley. Between Fort Berkeley and Fashoda, a distance of 350 miles, there extends the swampy part of the river, where the sudd prevents navigation; but north and south of the sudd there is clear water, 120 miles at the north end and 80 at the south end. In April '99 full details were made public of the results of Colonel Macdonald's East African expedition. The expedition explored and mapped a district to the north of Uganda, and extending to the north even of Lake Rudolf, much larger than the Protectorate in area, and entered into friendly relations with the tribes inhabiting it. Unfortunately, Captain Kirkpatrick, one of the officers, was treacherously murdered by the Nakwai tribe, on the borders of the Karamoyo country. Mombasa was reached on the return journey in March '99. In April also, Kabarega and Mwanga having joined forces, were attacked and routed by Lieut.-Col. Evatt on the east bank of the Nile. Both chiefs were taken prisoners.

Unitarians. The name commonly given to Christians who do not accept the doctrine of the Trinity, or the Deity of Christ. **Congregations** number about 250 in England, besides 20 mission stations, 32 in Wales, 10 in Scotland, 40 in Ireland.

The **British and Foreign Unitarian Association** is not representative of the churches, but consists of independent subscribers desirous of promoting "the principles of Unitarian Christianity." The writings of Dr. W. E. Channing, Theodore Parker, Dr. James Martineau, and others, have made Unitarian thought familiar to many outside the limits of the denomination. The only technically Unitarian College is that of the **Unitarian Home Missionary College in Manchester**, which educates for the ministry students who are not able to enter **Manchester College (q.v.)**, recently removed to Oxford, where most of the leading Unitarian ministers are trained. There is a triennial **Conference of non-subscribing congregations**, which consists almost entirely of Unitarians. The professedly Unitarian congregations of the **United States** number 350; of these 232 are in New England, many of them being old Puritan foundations. (See also **SUNDAY SCHOOL ASSOCIATION**.) The *Inquirer*, which is a weekly newspaper (established '42), is described as a "Journal of Liberal Religious Thought and Life." The present editor is the Rev. V. D. Davis, B.A. Office, Essex Hall, Essex Street, Strand, W.C.

United Service Institution. See **ROYAL U. S. INSTITUTION**.

UNITED STATES.

The United States are a confederation of forty-five North American sovereign states united together by a federal bond for Imperial objects, the local administration being reserved to each state. By the constitution of 1787 and subsequent amendments the government is intrusted to three separate authorities—the executive, the legislative, and the judicial. The first is vested in a **President** elected on the Tuesday after the first Monday in November every leap year for four years by electors appointed by each separate state. The number of such electors is equal to the number of senators and representatives to which the State is entitled in Congress; but no senator or representative can be an elector. The President is commander of the national forces, and has a veto on all laws passed by Congress, although a bill may become law in spite of his veto, on being afterwards passed by a two-thirds majority of each House of Congress. The administration is conducted under the immediate authority of the President by eight ministers chosen by him, and holding office at his pleasure, though confirmed by the Senate. A **Vice-President** is chosen in the same manner as the President; he is *ex-officio* President of the Senate, and in case of the death or resignation of the President he assumes his office for the remainder of the term, and the Senate elects a temporary vice-president. The legislative power is vested in Congress, which consists of (1) the **Senate**, of 90 members—two chosen by each state legislature for six years—who ratify or reject all treaties made by the President, confirm or reject all appointments made by the President, and who constitute a court of impeachment, with power only to remove or disqualify from office; (2) the **House of Representatives**, of 357

members, chosen every two years by all adult male citizens duly qualified according to the laws of their respective states, and apportioned among the states according to population. In addition to the representatives, delegates from "territories" (districts not organised into states) are entitled to debate on matters pertinent to their interests, but must not vote. Congress may propose an amendment to the constitution if two-thirds of both houses deem it necessary; and such amendment shall be deemed to be incorporated in the constitution when ratified by the legislatures of three-fourths of the several states. All members of Congress are paid \$5,000 per annum. The judicial power is confided to a **Supreme Court** (the members of which are nominated by the President for life) with power to interpret the constitution, to decide all disputes between the Federal Government and the individual states, and to hear all causes arising under the federal laws, etc. The constitutions and modes of administration of the various states bear a close resemblance to each other—the executive being confided to a governor and the legislative to two elective chambers. Roughly speaking, each state has voluntarily surrendered to the central Government all federal matters, including taxation for federal purposes only, while reserving the right to administer all local affairs and to impose local taxes at its pleasure. The soil of the United States not included within the boundaries of an individual state is divided into "territories," the districts of Columbia, Alaska, and three Indian territories, containing about 250,000 Indians. When duly qualified by population, etc., it is competent for the confederacy to form the territories into new "states" and admit them into the Union. The "district of Columbia" is a neutral territory under the direct government of the confederacy, in which is situated the capital, **Washington**, with a pop. of 177,624. The population of New York is over 1,200,000. During '98 Hawaii (*q.v.*) was annexed and declared a territory, also Porto Rico (*q.v.*) and other Spanish possessions in the West Indies, and the Philippine Islands (*q.v.*), with Guam in the Ladrões, were ceded by Spain. Tutuila, one of the Samoan islands, became American territory in '99. Cuba is for the present administered by the United States Government. Perfect equality is accorded to all religions in the United States. Education is free and general, although backward in some of the former slave states, the cost being met from state or local funds, and the Federal Government contributing a portion. Uninhabited and uncultivated land is held to be national property, and titles to stated portions may be acquired under the homestead laws and the timber-culture Acts. Cereals, sugar, cotton, tobacco, live stock, timber, iron, silver, gold, coal and other minerals are the chief products, and there are many large and flourishing manufacturing industries. There are over 184,000 miles of railway in operation, and about 16,600 miles of street railways and traction lines, of which over 14,000 miles are worked by electricity. The total area of the Union is 3,501,409 sq. miles; the population, at the census of '90, was 62,654,302, of whom 32,067,880 were males, and 30,554,370 females. The whites numbered 54,983,890, and the coloured 7,638,360. The proportion of the foreign-born was 14'77. In '93 the population was computed to be about 68,000,000. The wealth

of the country was estimated by the Census Office at, for real property, \$39,544,544,333; and for personal property at \$25,492,546,864, giving a total of \$65,037,091,197, or £13,000,000,000. Revenue, '98, £82,753,106; expenditure, £90,521,085; exports, '98-9, £250,554,440; imports, £142,328,020. The national debt in '98 amounted to £366,791,950. For Ministry, etc., see DIPLOMATIC; see also BEHRING SEA QUESTION, CUBA, FOREIGN ARMIES, FOREIGN NAVIES, HAWAII, PHILIPPINE ISLANDS, and PORTO RICO.

Political Parties.—Until '92 practically the only parties in American political life were the **Republicans** and the **Democrats**. In that year, however a third party, first known as the **Farmers' Alliance** and afterwards as the **Populist or People's Party**, was founded, advocating public ownership and control of the railways and tramways of the country, and the direct issue of currency to the people by the Government without the intervention of any of the national banks. All its members are therefore silver men and bimetalists. They contend that the other parties are bound up with and support the three great monopolies of the country—the banking, speculating, and railway interests. At the '92 Presidential election the voting was as follows: **Democrats** 277, **Republicans** 145, **Populists** 22. The election was fought on two points mainly, the tariff and the silver question, the Democrats being for the repeal of the M'Kinley and the Sherman Acts, and the Republicans of course strongly upholding both Acts. The general election in Nov. '94 resulted in a crushing defeat for the Democrats. During '95 and '96 important and startling changes took place in the relations of parties. The lines of division between Republicans and Democrats were broken down in two ways. On the one hand there were men of both parties who sympathised with the Free Silver policy, which was energetically pushed during these two years; and on the other there was, as it proved, a majority, also made up of members of both parties, in favour of the preservation of a gold standard. In the Republican party the gold standard triumphed, and its preservation was adopted as a plank in the party platform, though they expressly pledged themselves to promote international bimetalism. The Democrats, on the contrary, were captured by Silverite and Populist influences, and adopted a platform which included the free coinage of silver, at the ratio of 16 to 1, and many points of the Populist programme. This was too much for the Democrats in favour of a gold standard, and with the explicit approval of President Cleveland, they split from the majority, and held a Convention and named a candidate of their own. There were in all no less than seven nominations for the Presidency, but three of these nominations, by the Democrats, the Populists, and the Silverites, were of the same man, Mr. Bryan. The Republicans nominated Mr. M'Kinley, and the gold standard Democrats General Palmer, while two comparatively insignificant sections, the Prohibitionists and the Socialists, indulged in candidates of their own. The real fight lay of course between Mr. M'Kinley and Mr. Bryan, or rather between the two policies as to the currency which they represented. The tariff issue was also involved, but very little was heard of it during the contest, the result of which was a victory for Mr. M'Kinley. Congress officially declared

the voting to be as follows (Feb. 10th, '97): Mr. M'Kinley 271, Mr. Bryan 176. The popular voting showed an aggregate of 7,123,234 votes for Mr. M'Kinley, and 6,499,365 for Mr. Bryan, while a small number of votes were cast for the other candidates, amounting in all to 276,203. Early in '98, before the war with Spain began, the Bryanites seemed to be gathering strength again, but the war brought a number of entirely new issues before the nation, particularly those relating to a foreign policy, and in face of these, currency questions were, to a large extent, forgotten or lost sight of. The elections for the House of Representatives were held in Nov. '98, and the Silver party were placed in a hopeless minority. The successful conduct of the war, in spite of the defects in administration complained of, also operated in favour of the Republican party. During '99, particularly in the earlier months of the year, there was much controversy as to the war in the Philippines, Mr. Cleveland, Mr. Bryan, and the representatives of other sections of the Democrats, strenuously opposing a policy of foreign expansion, while the Republicans, on the whole, warmly supported it. The Republican party and the President seemed, however, somewhat discredited by the scandals which were associated with the administration of the War Office till Mr. Alger, the Secretary for War, resigned. But the State Legislatures Elections in November resulted in good big majorities for the Republicans, nevertheless.

History, '99.—The President's Annual Message was presented to Congress (Dec. 5th, '98). The main question dealt with was naturally the war with Spain, but the government and future position of Cuba and the Philippines were not discussed, such discussion being postponed till after the conclusion and ratification of the peace treaty. It was, however, declared that Cuba would be directed to form an autonomous government at the earliest possible moment. Congress was asked to appoint a Committee to study the industrial and commercial conditions in China, especially as a market for American products. As to Anglo-American relations, it was the earnest wish of the Government to remove all sources of discord and irritation in their relations with Canada. The acquisition of Hawaii, Porto Rico, and the Philippines compelled the adoption of a maritime policy, and a permanent increase of the military forces. The Spanish and American Commissioners finally agreed on the terms of the Treaty of Peace at Paris. Spain relinquished all sovereignty over and title to Cuba, and the United States undertook the usual international and other obligations as to the protection of life and property resulting from the fact of her occupation of the island for the term of the occupation. Porto Rico and the other Spanish possessions in the West Indies were ceded to the United States, with the island of Guam, in the Ladrões. The Philippine Islands were also ceded on the terms agreed upon, viz.—the payment of \$20,000,000. The United States undertook to admit Spanish ships and merchandise for ten years to the Philippine ports on the same terms as ships and merchandise of the United States. The House passed the Army Reorganisation Bill, raising the regular army to a maximum strength of 95,000 and a minimum of 57,000. The Nicaragua Canal Bill, providing

for the construction of the canal by the Nicaragua Maritime Canal Company, was passed by the Senate (Jan. 21st, '99). The Bill lays it down that the United States shall build and perpetually control the canal, and own all the stock except $7\frac{1}{2}$ per cent. given to Nicaragua and Costa Rica. Each of these will have one director, the United States appointing five. The neutrality of the canal is guaranteed by the United States, and it is to be used by all nations at equal tolls. It is to be completed within six years, at a cost of not more than \$115,000,000, and not more than \$20,000,000 are to be expended annually. The Peace Treaty with Spain, which had been submitted to the Senate, and had by them been considered for some time, was finally ratified by 57 votes to 27 (Feb. 6th) and signed by the President (10th). The Commission appointed to investigate the alleged abuses in the commissariat and hospital arrangements during the Cuban War reported (13th) exonerating Mr. Alger, the War Minister, and most of the other officials already condemned by public opinion. The House of Representatives passed a Bill for appropriating \$20,000,000 for the payment to be made to Spain according to the terms of the Peace Treaty (20th). Mr. Gorman carried in the Senate an amendment proposed by him to the Army Bill, reducing the strength of the army after July 1st, 1901, to the strength before the war—about 27,000 (28th). Other amendments to the Bill reduced its original scope very considerably, and limited the maximum strength to about 65,000 men, instead of the 100,000 at first proposed. The military court appointed at Mr. Alger's suggestion to inquire into the charges made by General Miles and others as to the food supply during the Cuban war, made an inconclusive report, in which General Miles came in for censure because his charges were not made sooner, and Mr. Alger was exculpated (May 8th). The American press generally condemned the report. An order was issued (July 6th) for the enlistment of ten regiments of volunteers for service in the Philippines. Mr. Alger at last resigned, to the country's great relief (19th), and Mr. Elihu Root was appointed to succeed him. A grand naval parade was organised in honour of Admiral Dewey (Sept. 29th) on the occasion of his return to the States from Manila, and the next day the Admiral reviewed over 30,000 troops. Extraordinary enthusiasm prevailed. Elections of members of the State Legislatures and officers in eleven states took place (Nov. 7th), and showed unexpectedly large Republican majorities, on the whole. It was reported during the month that the Government had asked Russia and the other Continental Powers interested in China for an assurance that the policy of the "open door" should prevail there. Under the Samoa Agreement between Great Britain and Germany (14th) both those Powers renounced, in favour of the United States, all their rights over Tutuila and the other islands of the Samoan group (except Upolu and Savaii, reserved to Germany). See SAMOA. At the time of going to press a supplementary agreement between Great Britain and the United States, putting on record the points affecting them, was being negotiated. Mr. Garret Hobart, Vice-President of the United States, died (21st). Some amazing revelations as to the way in which New York is governed under the influence of Tammany Hall were made before a Committee appointed by the State

Legislature and presided over by Mr. Mazet, which sat during the year.

United States, President of the. See M'KINLEY, WILLIAM.

University College, London, founded 1826, was opened in '28 under the title of "The University of London." In '36 it was thought desirable to separate the College from the University, and the former was incorporated in that year as "University College, London," by royal charter, which was annulled in '69, and the College re-incorporated with additional powers. There are, therefore, two distinct institutions—the one a teaching body and the other an examining body. The curriculum includes courses in arts, law, science, engineering, theoretical and applied, medicine, and the fine arts. There is also University College Hospital, with upwards of 200 beds. President of the College, Rt. Hon. Lord Reay, G.C.S.I.; Vice-President, Sir Ughtred Shuttleworth, M.P. Deans: Professors W. P. Ker, M.A.; Vaughan Harley, M.D.; Herbert Spencer, M.D. Secretary, J. M. Horsburgh, M.A. The students number about 1000.

University College of North Wales (Bangor). The is one of the constituent colleges of the University of Wales. Opened 1884. It received a royal Charter in '85, and it is in receipt of a Government grant of £4000 per annum, besides an annual grant in aid of its Agricultural Department. There are a large number of entrance scholarships connected with the institution. The College possesses a valuable library containing over 20,000 volumes. Secretary, J. E. Lloyd.

University College of South Wales and Monmouthshire (Cardiff), The, is one of the constituent colleges of the University of Wales. Established by royal charter in 1884. All students entering the College must be at least sixteen years of age, and all the classes are open to both sexes. There is a special place of residence for women students at Aberdare Hall, the principal of which is Miss Hurlbatt. There is a large number of exhibitions and entrance scholarships connected with the College. The total number of students is 511, and of these about 178 are women. President, Lord Tredegar; Principal, J. Viriamu Jones, M.A. (Oxon.), B.Sc. (Lond.), F.R.S.; Registrar, J. Austin Jenkins, B.A.

University College of Wales (Aberystwyth), The, is one of the constituent colleges of the University of Wales. It was supported for many years by freewill offerings, but since '86 it has been in receipt of a Government grant of £4000 per annum. Besides the ordinary courses in Arts and Science, the College has a Department of Agriculture and a Normal Department. A department for the training of secondary teachers has also been organised. The total number of students during the session '98-9 was 424, of whom 191 were women, nearly all residing at the Alexandra Hall of Residence under the superintendence of Miss E. A. Carpenter. President, Lord Rendel; Principal, T. F. Roberts, M.A. Oxon.; Registrar, T. Mortimer Green.

University College School, Gower Street, established 1832, is completely unsectarian—a modern school with classical department. Prepares for University College and London matriculation, as well as for Universities, Woolwich, etc. Pupils, 330. Motto, *Paulatim sed firmiter*. Head Master, J. L. Paton, M.A.

Secretary, J. M. Horsburgh, M.A. Amongst its alumni are the Rt. Hon. Joseph Chamberlain, Lord Leighton, Sir George Lewis, Professor Michael Foster, Lord Justice Lindley, Sir Arthur Charles, Rt. Hon. J. W. Mellor, Sir G. Faudel-Phillips, Bart., and Rt. Hon. W. C. Gully, Speaker of the House of Commons.

UNIVERSITY EXTENSION.

The object of this movement is to provide "the means of higher education for persons of all classes and of both sexes engaged in the regular occupations of life." It commenced in '72 with the University of Cambridge; about four years later Oxford took it up—abandoning it, however, until '85; and in '76 was formed the London Society for the Extension of University Teaching within the Metropolitan area. Durham University was for a time associated with Cambridge in forwarding the work in Northumberland and Durham; Victoria University is also in the field; and the Scotch Universities worked on a similar plan for some time. The University of Sydney, New South Wales, adopted the scheme in '87. An American Society for the Extension of University Teaching has been formed at Philadelphia and Chicago, and several other American universities have begun work on similar lines. Such is a general view of the present position of this movement; an insight into its working is afforded from the following details regarding the Cambridge, London, and Oxford schemes.

Cambridge.—The external work of the University—the Local Examinations and the Local Lectures (University Extension)—is controlled by a syndicate of eighteen, appointed by the University Senate. The Preliminary, Junior, and Senior Local Examinations are intended for children of school age, and are held in December, while the Higher Local, for adults of both sexes, is held in June. Under the Local Lectures (University Extension) Scheme there are two principal terms in the year—September to December, and January to March—and a course of twelve lectures is given in each term. Lectures are also given less often in the summer term—April to July. At the end of each term a special examination is held and certificates awarded on the joint report of examiner and lecturer. Sessional Certificates are awarded for a session's work consisting of two terminal courses in educational sequence, and the Vice-Chancellor's Certificate of Systematic Study is awarded to students for four sessions' work, under certain conditions. Of the whole number of centres connected with Cambridge, eight are affiliated—viz., Derby, Exeter, Hull, Newcastle-on-Tyne, Norwich, Plymouth with Stonehouse and Devonport, Scarborough, and Sunderland. (See previous eds. for the privileges given to affiliated students.) A town may come under the operation of the ordinary scheme by providing a place of meeting for the lectures and classes and an inclusive fee of £50 per course to the University. All the local expenses are met by the local committee, who also fix and receive the fees. In connection with the Norfolk County Council courses on scientific subjects, bearing on agriculture, have been given annually by lecturers of the Syndicate since '91, followed in the summer by courses of practical work in the University Laboratory attended by Norfolk Teachers holding County Council scholarships. For this work the system is variously modified to suit local needs. Full

particulars as to the Local Examinations may be obtained from the **Secretary for Examinations** of the Local Examinations and Lectures Syndicate, Syndicate Buildings, Cambridge, and as to the Local Lectures from the **Secretary for Lectures** at the same address.

London.—This organisation comprises a council of 34 members; **President**, the Rt. Hon. Sir John Lubbock, Bart., D.C.L., F.R.S., M.P.; **Chairman**, the Rt. Rev. the Lord Bishop of London. Bedford College, Birkbeck Institution, City of London College, College for Men and Women, Gilchrist Educational Trust, Joint Grand Gresham Committee, King's College, Technical Education Board of the London County Council, London Institution, National Union of Teachers, Queen's College, Royal Institution, University College, University Extension Local Centres Association (London), and the Working Men's College, each nominate a member of the council; the remaining 20 are elected by members of the Society. Any one may become a member of the Society by paying an annual subscription of £1 1s., or £50 for a life membership. These subscriptions and voluntary subscriptions constitute the Society's revenue. The council is assisted and advised on educational matters by the **Universities' Joint Board**, which consists of three representatives from each of the Universities of Oxford, Cambridge, and London; **Chairman**, James Stuart, M.A., LL.D., M.P. The Joint Board nominates the lecturers and examiners and awards certificates. The **scheme of work** is as follows—two terms in the winter, each of ten weeks, weekly lectures followed by a conversational class, weekly papers for the lecturers, and final examinations. A summer course of five weeks completes the session of twenty-five weeks. Certificates are awarded for the work of a term, of a session, and of a period of four sessions. The **Local Centres** are managed by local committees, who fix and receive the students' fees. The Society provides lecturers and examiners, the charge being £30 for a course of ten, and £35 for a course of twelve lectures, £2 to £10 being added in the case of courses illustrated by experiments—chiefly in Chemistry and Physics. The **students' fees** vary from 1s. to £1 1s., according to the locality and the discretion of the local committees. The total number of students in '98-9 was 12,429, who attended 166 courses of lectures at 64 centres. The Council submitted evidence to the Royal Commission on a University for London (*g.v.*), showing that the work done by the London organisation is worthy of recognition by the New University. **Secretary to the Society**, C. W. Kimmins, M.A., D.Sc.; Assistant Secretary, Percy M. Wallace, M.A.; Office, Charterhouse, E.C. Consult *University Extension Journal* (Constable & Co., 2, Whitehall Gardens, S.W.; 2s. 6d. per annum, post free).

Oxford.—The University first took an active part in educating non-matriculated students by means of University Extension Courses in '78. In '85 the system was reorganised on its present lines. Local committees at 108 centres acted last year ('98-9) in concert with the Oxford University Delegates, and arranged 156 courses. The number of lecturers was 34, and of lectures given 1219. Much of the work hitherto done by University Extension Lectures has been of an experimental nature, but there are many gratifying signs that

while the early enthusiasm of the movement is not spent, its educational efficiency is steadily increasing. At Reading the University Extension College (of which Mr. Mackinder, M.A., Student of Christ Church, is Principal) has 799 regular students (besides 2000 who attend occasional lectures) and over 20 teachers. Of 727 students who entered for final examinations, 268 candidates received certificates of distinction, and 402 satisfied the examiner. Though in these examinations they only write one paper, the standard for distinction is identical with that required (but on several papers) in the Final University Examinations for B.A. The method of University Extension work is (except in class work in languages or laboratory work in Natural Sciences) invariably the lecture, followed or preceded by a class supplemented by weekly exercises corrected by the lecturer. The next summer meeting will be held in Oxford in August 1901. All information can be obtained from the **Secretary**, Mr. J. A. R. Marriott, M.A., Examination Schools, Oxford.

University of London Act. See SESSION, sect. 112; and LONDON UNIVERSITY.

University Settlements. It is the object of University settlements to bring together the large body of wage earners and the philosopher who is attacking social problems, and to make out of them an efficient instrument for national progress. Settlements were started, as Canon Barnett has explained, "without the equipment of an endowment, and without any sectarian or political object. They were to be simply club-houses, in which men and women of the University status should live their own lives in the midst of industrial districts. . . . The first intention has been modified by circumstances. Some settlements have now been attached to missions, and some have become identified with sectarian objects." The first of these settlements was **Toynbee Hall** (Canon Barnett, M.A., warden), opened in Commercial Street, Whitechapel, in '84. This was an Oxford movement, in which Balliol College took a leading part. The settlement was named after Arnold Toynbee, a tutor in Balliol College, who in '75 had taken rooms in Whitechapel, and had helped in parish work in St. Jude's for the purpose of studying economic problems. The **Oxford House**, in Bethnal Green, Incorporated, is a Church of England movement, founded in '84. The aims of the house, which is in Mape Street, are thus stated: "The Oxford House in Bethnal Green is established in order that Oxford men may take part in the social and religious work of the Church in East London; that they may learn something of the life of the poor; may try to better the condition of the working classes as regards health and recreation, mental culture and spiritual teaching; and may offer an example, so far as in them lies, of a simple and religious life." Associated with the House are the "Oxford House Working Men's Club" with 300 members, the "University Club for Working Men" with 750 members, the "Webbe Institute for Working Lads" with 400 members, and the "Repton School Club" with 100 boys as members. There is a Ladies' branch working at St. Margaret's House, Victoria Park Square. The Head of the House is the Rev. B. R. Wilson, M.A. There is a Mission House and Settlement at Battersea carried on by Gonville and Caius College, Cambridge with headquarters

at **Cains House**, Battersea Square (warden, Rev. Arthur Shillito). The Settlement comprises a Church, a Hall for entertainments, and a large Club-house for men, boys and girls. **Mansfield House**, Barking Road, Canning Town, E. (Percy Alden, M.A., warden), commenced by students of Mansfield College, Oxford, works on religious (unsectarian) as well as on social and educational lines. A new residence, at 89, Barking Road, was opened in Dec. '97; it contains rooms for 17 men, besides offices and a reception hall. There are also a meeting hall and men's club at 143-7, Barking Road; the "Youths' Institute and Lads' Club," 310-14, Barking Road, just building at the cost of £8000, a Public Refreshment Room and Restaurant, at 316, Barking Road, and the "Wave" Lodging House, with 156 beds, at 235, Victoria Dock Road, under the control of the Settlement. The **Bermondsey Settlement** (Rev. J. Scott Lidgett, M.A., warden) in Farncombe Street, Jamaica Road, the Women's Branch being at 149, Lower Road, Rotherhithe, S.E., is largely supported by Methodists (but is undenominational in general character), and "**Browning Hall**," York Road, Walworth (Rev. F. H. Stead, M.A., warden), by Congregationalists. Closely connected with University settlements are the settlements of **women workers**. Mayfield House (Miss Corbett, resident Head), started in Bethnal Green in the autumn of '89 (a settlement of old Cheltenham College girls), has now removed to Shoreditch. St. Margaret's House, Bethnal Green (Miss Harington, resident Head), a women's branch of Oxford House. At first the workers resided in Mayfield House, but they separated in '92, taking their name from St. Margaret of Scotland. Two branches have been formed, one at Stratford, E., under Mrs. Crossley and Miss Yatman, which works in conjunction with Oxford Trinity College Settlement, Tenby Road, Stratford (Rev. E. Mosley, warden), and another in the Isle of Dogs, E. The women's settlement in Canning Town, E. (Miss R. H. Cheetham, resident Head), works upon a religious though unsectarian basis. Amongst its agencies is a medical mission and hospital, with a resident lady physician (Dr. Margaret Pearse). A committee elected by the women students of the Uni-

versities manage a well-arranged and thriving Settlement, known as the **Women's University Settlement**, at 44, 45, and 46, Nelson Square, Blackfriars Road, S.E.: Warden, Miss Sewell. Courses of training are arranged here in social work amongst the poor, and resident students are received. Fees from £30 to £35 per annum; for students, £50.

Uppingham School. Archdeacon Johnson's School, founded 1584; reorganised '75. Three leaving exhibitions of £60, £50 and £40 offered every year, and 16 of about £22 each to Cambridge. Entrance scholarships, two of £70, two of £50, two of £30 annually. There are 420 boys in the School and 30 masters, and 6 assistant music masters. There is also a Lower School. **Head Master**, Rev. E. Carus Selwyn.

Uruguay. A republic on the east coast of South America, south of Brazil. Capital, **Monte Video**, pop. 250,000, at the mouth of the Rio de la Plata. The Executive is vested in a president elected for four years. The legislature is composed of a Senate of 19 chosen for six years by an electoral college, one-third retiring every two years, and a Chamber of 69 members elected for three years, one for each 3000 of population. In the recess a permanent committee of two senators and five deputies assume legislative power and control of general administration. State religion Roman Catholic, but all others tolerated. Education obligatory; cost partly borne by the State. Cattle and sheep form the chief wealth of the country, but there is a future for agriculture. There are over 1000 miles of railway open. **Area**, 72,110 sq. miles; **pop.** 900,000. **Estimated revenue**, '98-9, £3,317,820; **expenditure**, £3,291,505; **debt**, '98, £21,380,960; **imports**, '98, £5,273,270; **exports**, £6,441,908. For Ministry, etc., see **DIPLOMATIC**. — **History**, '99. The elections to the legislature, which concluded on Nov. 27th, '98, gave a large majority to the Government, and the situation appeared to be peaceful. Señor Cuestas was unanimously elected President of the Republic (**March 1st**) amidst general popular rejoicings. The Budget for the year '99-1900 was presented (**June 16th**), and showed an estimated revenue of \$15,977,990 and an expenditure of \$15,969,698. Of the total expenditure \$9,120,209 were set aside for "national obligations,"—i.e., the service of the foreign debt, the railway guarantees, grants, and pensions.

V

VACCINATION.

The enforcement of vaccination has for many years been a subject of much controversy. The Boards of Guardians, who are the local authorities for carrying out the Vaccination Acts, have been most diverse in their action, and while some Boards have rigorously enforced the law and prosecuted defaulters at every opportunity, others have abstained altogether from taking proceedings against persons who did not have their children vaccinated. An anti-vaccination league aroused much opposition to the practice of vaccination, founding their objection chiefly on the risk of communication of diseases by means of vaccination. In '75 the Local Government Board, who are the central authority under the Vaccination Acts, obtained a *mandamus* against one Board

of Guardians to compel them to enforce vaccination in their Union, and some of the guardians were imprisoned before they withdrew their opposition; but this method of compulsion was not satisfactory. On the other hand, some Boards of Guardians were doing much harm to the cause of vaccination by repeated prosecutions of the same offenders. In '89 a Royal Commission on Vaccination was appointed, with the late Lord Herschell as chairman. The Commission, by an interim report in '92, recommended that repeated penalties for non-vaccination should not be imposed. The final report was issued in Sept. '96. (For details see '99 and previous eds., and the '98 Act below.) For some time the statistics of vaccination had shown a great falling off in the numbers vaccinated, and

this had particularly been the case during the period while the Royal Commission were sitting. An idea had been prevalent that compulsory vaccination was to be abolished, and many Boards of Guardians had altogether abstained from prosecuting. In '96, out of 914,205 children born, 602,922, or nearly 66 per cent., were successfully vaccinated; 10 per cent. died unvaccinated; while of the rest about 200,000, or over 22 per cent., seem to have escaped vaccination. The proportion of default had risen from 4 per cent. in '83. In London the proportion who escaped vaccination was higher than the average—viz., 26 per cent.—and in some districts in particular there was little vaccination: thus in Bethnal Green, Hackney, and Mile End about one-third only of the children born during the year were vaccinated. In the provinces the smallest amount of vaccination occurred in the counties of Leicester, Bedford, and Northampton, where in several Unions less than one-fifth of the children were vaccinated. On the other hand, in many places, e.g. Liverpool, Huddersfield, Portsmouth, and Birkenhead, nearly all the children were vaccinated. Vaccinations are performed free of charge by public vaccinators appointed by the guardians; and during the year ended Sept. '98 about 28 per cent. of the children born that year were vaccinated at public vaccination stations at the cost of the rates. In '81 the proportion was 61 per cent.

The Vaccination Act, '98, effected great changes in the law as to vaccination, following closely many of the recommendations of the Royal Commission. The three most important changes were the substitution of domiciliary vaccination for vaccination at public stations, the use of glycerinated calf lymph, and the exemption from penalties of conscientious objectors. The Act did not deal with the subject of revaccination. Under the Act the period within which a child is required to be vaccinated was extended to six months from the date of birth, and it was provided that a person can only be prosecuted twice in respect of the same child for neglecting to have it vaccinated, and the second prosecution can only be after the child is four years old. The public vaccinator of the district is required to call at the home of each child within a certain time after its birth, and vaccinate it if the parent raises no objection. The old system of arm-to-arm vaccination with human lymph, which was probably the source of much disease, was abolished, and public vaccinators are now required to use glycerinated lymph supplied by the Local Government Board. The lymph, which is obtained from specially selected calves, is considered to be quite innocuous as regards the spreading of disease. Any parent who satisfies two justices, or a stipendiary magistrate, that he conscientiously believes that vaccination would be prejudicial to the health of his child can receive from them a certificate to this effect, and then becomes exempt from penalties for non-vaccination. The effect of this recognition of the conscientious objection is practically to make vaccination optional, but those who do not avail themselves of this means of escape become liable to prosecution where the child is not vaccinated within six months of birth. During the period from the passing of the new Act (Aug. 12th) to the end of '98, certificates of conscientious objection were issued in respect of 230,147 children; but in spite of this the new Act has

been followed by a slight increase in vaccination. Thus, in the first six months of '99 the number of successful vaccinations in England and Wales was 355,987 as against 278,588 during the corresponding period of '98—an increase of about 28 per cent. Persons committed to prison for the non-vaccination of their children, or the non-payment of fines imposed, are treated as first-class misdemeanants. On Oct. 18th, '98, the Local Government Board issued an order regulating the duties, remuneration, etc., of public vaccinators and vaccination officers, and repealing all previous regulations as to vaccination. Vaccination officers, who are appointed by the Boards of Guardians, have the duty of enforcing the Vaccination Acts: they issue notices to parents, keep records as to vaccination of all the children in their district, and institute proceedings in cases of default. Both public vaccinators and vaccination officers are paid by fees for every birth registered in their district in addition to fees for successful vaccinations.

During '99 the subject of the control of vaccination officers attracted a great deal of attention, and gave rise to not a little difficulty. Previously it had generally been considered that Boards of Guardians were required to give special directions to the vaccination officer, to enable him to prosecute defaulters, and that without these directions he could not take proceedings; but the regulations issued in '98 contained no provision on the point, and the Local Government Board hold that, looking to the decision of the Queen's Bench Division in the case of *Bramble v. Lowe*, and to certain opinions given by the law officers of the Crown, it is the duty of a vaccination officer to take proceedings quite independently of and without any directions of the Guardians. The effect of this view is to take prosecutions out of the hands of the Guardians, while by the regulations they are required to pay the expenses of the vaccination officer in prosecutions conducted by him; and many Boards of Guardians have objected to their not having the power to decide whether or not persons should be proceeded against. A Conference of representatives of more than forty Boards of Guardians was held in London in the early part of the year to protest against the position of matters, and it was contended that a pledge had been given by the Government during the passing of the recent Act to the effect that prosecutions should be subject to the directions of the Guardians. By further way of protest certain Boards declined to appoint a vaccination officer, or appointed him with a condition that he should prosecute only under their instructions, though such an appointment is of doubtful validity. As the law stands, Guardians are required to appoint a vaccination officer; and in one case (Leicester), where there was a refusal to appoint, the Local Government Board applied to the High Court, and a *mandamus* was issued to compel the Guardians to perform their duty. In Oct. '99 a Conference of Guardians and other local authorities was held at Leicester, when resolutions were passed in favour of giving Guardians greater powers of control over public vaccinators and vaccination officers.

"Vanity Fair." This pioneer of the so-called society journal was founded by Mr. T. Gibson Bowles (now M.P. for King's Lynn) in Nov. '68. It has always been noted for its literary pretensions, and for its weekly caricature, which

is *sui generis*. The chief artist is Mr. Leslie Ward ("Spy"), who most ably occupies the position so long held by the late Carlo Pellegrini ("Ape"). Its politics are Conservative and Imperialistic. It devotes considerable space to Service matters. *Vanity Fair* changed hands for the second time in its history in March '95, but the **Editor** and **Manager** is still Mr. Oliver A. Fry. **Office**, 7, Essex Street, Strand, W.C.

Vaughan, His Eminence Herbert Cardinal, Roman Catholic Archbishop of Westminster, and successor of Cardinal Manning as head of the Roman Catholic Church in England. He was b. at Gloucester, April 15th, 1832, and is the eldest son of the late Lieut.-Colonel Vaughan, of Courtfield, Herefordshire. He was educated at Stonyhurst College and in Belgium. Then, abandoning his first intention to enter the army, he went to Downside, and afterwards to Rome, where he entered the *Accademia dei nobili Ecclesiastici*, and studied for some time with the future Cardinal Manning. He was ordained priest at Lucca, Oct. 28th, '54, and afterwards, returning to England, he joined the oblates of St. Charles (a congregation of secular priests founded by the late Cardinal Manning at Bayswater), and was sent to St. Edmund's College, near Ware, of which he was Vice-President till '62. Having resolved to found a Missionary College, he went in '63 to North and South America to gather funds; and afterwards bought a house and land at Mill Hill, near London, where he began the College with only one student. The first stone of the present College at Mill Hill was laid in '69, and the College has now a large number of students. He was appointed Bishop of Salford in '72. On the recommendation of the *Propaganda* he was elected by the Pope to the see of Westminster, April 8th, '92, took possession of the see May 12th, and received the pallium Aug. 16th. In Jan. '93 he was made a member of the Sacred College of Cardinals, with the title of Cardinal Priest. On June 29th, '95, he laid with much solemnity the first stone of the Westminster Cathedral, a vast and stately edifice in the Byzantine style, which is now in course of erection. The Cardinal took part in Sept. '07 in the great celebration by the Roman Catholics of England, of the 13th Centenary of the landing of St. Augustine.

Vegetarian Federal Union, The, is an association of such Societies throughout the world as may be willing to unite together for mutual counsel and the promotion of Vegetarianism—i.e. abstinence from the flesh of animals (fish, flesh, and fowl) as food, and the encouragement of the use of cereals, pulses, seeds, grains, fruits, nuts, and all the wholesome products of the vegetable kingdom. The **Vegetarian Society**, which celebrated its jubilee year in '96-7, is the oldest Vegetarian Society in Great Britain. The Secretary is Mr. Alfred Broadbent, and the offices are at 16, Oxford Street, Chorlton-on-Medlock, Manchester. The official organ of the Federal Union is *The Vegetarian* (weekly). Literature and lecturers are sent free. There is a Vegetarian Hospital, with 20 beds in connection with it, at Oriole, Loughton, Essex. **President**, Mr. A. F. Hills, D.L.; **Treasurer**, Mr. T. Anderson-Hanson; **Secretary**, Mr. Harry Phillips. **Offices**, Memorial Hall, 16, Farringdon Street, London, E.C.

Venezuela. A republic in South America,

consisting of thirteen federal states, a Federal District, and two territories. It is bounded on the north by the Caribbean Sea, on the south by Brazil and Colombia, on the west by Colombia, and on the east by the Atlantic and British Guiana. It is governed by a President, who holds office for two years, assisted by a Federal Council of 19 members appointed by Congress every two years. Congress consists of a Senate nominated by the legislatures of each province, and a House of Representatives of 52 members, elected directly, one member to every 30,000 of population. The constituent states have each their own legislature and executive. Roman Catholicism is the state religion, but private exercise of all others is permitted. Education is in a backward state, but is compulsory and free. La Guayra is the chief port of the Republic, and is connected with Caracas by a railway which is a marvel of engineering skill. There are over 500 miles of railway being worked. The chief products are coffee, cocoa, timber, cattle and hides. The long-standing boundary dispute between Great Britain, representing British Guiana, and Venezuela, attracted universal attention during '96, and led to some friction between Great Britain and the United States. Venezuela based her claims on those put forward by Spain, to whose rights she succeeded on gaining her independence in 1821. The British, on the other hand, took over their claims from the Dutch, by whom the colony was ceded to them in 1814. In '39 the Schomburgk line was surveyed, and in '41 marked out as a reasonable basis for a settlement of the dispute. This line was not meant as indicating the extreme limit of the territory over which British rights extended, but simply as a reasonable compromise. However, Venezuela refused to accept it, and subsequent negotiations, including offers from both sides, came to nothing. In '81 a modified Schomburgk line was drawn, including rather more territory than the original line. This was in response to an offer from Venezuela of a boundary line running from the coast at the mouth of the Maracaibo west to 60° W., and thence due south. Diplomatic relations were suspended in '87, and in '90 Great Britain declared that the modified Schomburgk line was the minimum of her demands. Aggressions by Venezuelan troops in '94 and '95 on British officials at Uruan, in the Cuyuni district, led to more trouble, for the United States then took up the question, representing England's policy as one of unjustifiable aggrandisement. It was, however, agreed in Nov. '96 to settle the dispute on the principle that British Guiana should be treated as if it were an individual, and that fifty years' holding, whether by political control or actual settlement, should give a good title, all the other points being decided by arbitration. The Arbitration treaty was signed Feb. 2nd, '97, and diplomatic relations with Great Britain were restored. The late Lord Herschell (Lord Russell succeeded him on his death in '99) and Mr. Justice Collins were appointed arbitrators for Great Britain, and Chief Justice Fuller and Justice Brewer for the United States, with the right to choose a fifth arbitrator, failing which appointment, King Oscar of Sweden was to name the man for the position. In accordance with the terms of the treaty the arbitrators met at Paris in June '99, Lord Russell of Killowen having been substituted for Lord Herschell. Sir Richard Webster

(Attorney-General) opened the case for Great Britain on June 15th, and spoke thirteen times. He was followed, on July 21st, by M. Severo Mallet Prevost, for Venezuela, who also spoke thirteen times, and was followed by M. Soley, on the same side. Sir Robert Reid (who occupied three sittings) and Mr. G. R. Askwith next spoke for Great Britain. They were followed by M. Tracey (who spoke five and a-half days) for Venezuela. Sir Richard Webster then replied for Great Britain, and Mr. Harrison (ex-President of the United States) made the final speech for Venezuela. The case for Venezuela was based on a prior and paramount title to the lands in question acquired by Spain. Great Britain opposed this claim by insisting upon rights derived from the Dutch. Venezuela offered the Essequibo as the eastern frontier, and Great Britain the Schomburgk line. The territory in dispute amounted to over 60,000 square miles. The award, which was delivered on Oct. 3rd, '99, was made unanimously, was regarded by both sides as a compromise, and gave Great Britain the Schomburgk line, with the exception of Barima point, at the mouth of the Orinoco, and a strip of territory between the rivers Wenamu and Cuyuni; but it was decided that the mouth of the Orinoco should be open to the British, and both banks of a part of the river Cuyuni, where the Schomburgk line has given them only one bank. The British goldfields of Guiana remained uncurtailed, and the dispute which so seriously impeded developments was ended by the sacrifice by Great Britain of only a few hundred of the 60,000 square miles which she claimed. A revolutionary movement broke out in August under General Castro, who was said to have 10,000 men under his command, and made such headway that the President personally took the field against the insurgents (Sept. 12th). Negotiations were afterwards entered into, and it was suggested that the President should resign to make way for General Castro. Eventually the President fled, and General Castro assumed the control of affairs (Oct. 20th).

Area (previous to arbitration award), 594,165 sq. m.; **pop.** 2,507,345. **Capital**, Caracas, **pop.** 72,429. **Revenue**, '98, £1,323,255; **expenditure**, £—; **imports**, '97-8, £1,737,968; **exports**, '96-7, £3,690,940; **public debt**, interior, £5,008,894; exterior, £2,960,181. **Army** about 7280, exclusive of militia (about 60,000 strong). For **Ministry**, etc., see **DIPLOMATIC**.

VICTORIA.

Victoria is the smallest in size and southernmost in position of the colonies in Australia. It occupies the south-eastern corner, and is divided from New South Wales on the north by the Murray river, and from South Australia on the west by the 141st meridian of E. long. **Area**, 87,884 sq. miles; **pop.** 1,179,029, including 9000 Chinese and 565 aborigines. The capital is Melbourne, the largest city in Australia (pop. 458,610), situated on Hobson's Bay and the river Yarra. Executive is vested in the Governor and responsible Ministry. There are two Houses of Parliament, the upper the **Legislative Council**, and the lower the **Legislative Assembly**. The Council consists of 48 members, elected for six years by male citizens possessing freehold property worth £10 per annum or leasehold with tenure of at least five years, worth £25 per annum, or

occupying as tenant property of the same annual value, unless possessed of educational qualification, such as university graduates, clergy, schoolmasters, doctors, lawyers, or officers of army or navy. The Legislative Assembly of 95 members, representing 84 districts, is elected triennially by ratepaying qualification or manhood suffrage. Members of the Lower House are paid £300 a year. Victoria is represented in the Federal Council of Australia. For local government the colony is divided into 58 urban and 150 rural municipalities. The chief religious denominations are the Church of England, Presbyterians, Methodists and Roman Catholics. Education is compulsory, and is free and secular. The University of Melbourne is both an examining and a teaching body. Agriculture, mining and manufactures, employ the bulk of the population. The chief products are gold, wool, wheat, and butter. There are 3130 miles of railway in operation. **Revenue**, '98-9, £7,378,842; **expenditure**, £7,027,415; **imports**, '98, £16,768,904; **exports**, £15,872,246; **public debt**, £50,379,276. See **AUSTRALIA**, **BRITISH EMPIRE** (table), and **DIPLOMATIC**.

History, '99. — While the Estimates were under consideration in the Legislative Assembly, an amendment was carried against the Government on Nov. 30th, '98, owing to their resistance to a demand from the Labour members for an increase of pay to a portion of the police force. The vote was, however, rescinded (Dec. 2nd), and accordingly the Government did not resign. The Legislative Council passed the Federal Enabling Bill (July 5th). The Premier's Budget statement showed that the estimated revenue for the current year was £7,156,225, and the expenditure £7,136,755 (Aug. 9th). A Bill for giving women the suffrage was thrown out in the Legislative Council by 27 votes to 17 (Sept. 6th). The Government's offer to the Imperial Government of a contingent of troops for service in South Africa was approved with enthusiasm by the Assembly (Oct. 11th), and the troops were afterwards sent. The Ministry resigned (Dec. 1st), having been defeated by a majority of 4 votes, and the Hon. Allan McLean was summoned to form a new Cabinet.

Victoria Alexandrina, Queen of Great Britain and Ireland and Empress of India, was b. at Kensington Palace May 24th, 1819. She is the only child of the late Duke of Kent, third son of George III., by Louisa Victoria, Princess of Saxe-Coburg, and sister of Leopold I., King of the Belgians. The young princess, whose father died when she was only nine months old, was brought up under the care of her mother and of the Duchess of Northumberland, who superintended her education. She succeeded her uncle William IV. June 20th, '37, and was crowned in Westminster Abbey, June 28th, '38. She married, Feb. 10th, '40, Prince Albert of Saxe-Coburg Gotha, who died of gastric fever Dec. 14th, '61. Her mother, the Duchess of Kent, died March 16th in the same year. For many years after the death of the Prince Consort, the Queen lived in seclusion, though she regularly performed her official duties. On Jan. 1st, '77, in accordance with an Act of Parliament, adopted during Mr. Disraeli's Administration in the previous session, Her Majesty was proclaimed Empress of India by the Viceroy at Delhi. On several occasions prior to her marriage the Queen was subjected to annoyance at the hands of insane

admirers; and several other attempts have at different times been made upon Her Majesty's life. In '69 she published "Leaves from the Journal of Our Life in the Highlands," an interesting account of the happy days spent at Balmoral with her husband and family. In '85 a second volume was issued by her under the title of "More Leaves from the Journal of our Life in the Highlands." The Jubilee of Her Majesty's reign was celebrated with great splendour in '87. In Sept. '96 the Emperor and Empress of Russia arrived at Balmoral on a visit to the Queen, which was prolonged till Oct. 3rd. During '97 Her Majesty completed the sixtieth year of her reign, and thus passed the longest limit previously attained by any English sovereign. A lengthy description of the Commemoration of the Diamond Jubilee will be found in the article JUBILEE CELEBRATIONS, in the '98 ed.) The usual visit was made to the south of France in the spring of '99, and Her Majesty returned in May in time to lay the foundation stone of the Victoria and Albert Museum at South Kensington (17th), in the presence of a brilliant assembly. The eightieth birthday of Her Majesty was celebrated a few days afterwards (24th), both in London and the country, and throughout the Empire with impressive and enthusiastic demonstrations of loyalty and affection. The Queen herself was at Windsor Castle at the time, surrounded by the members of the Royal Family. Later in the year she displayed wonderful vigour, both at her inspection of the Guards prior to their departure for South Africa, and on the occasion of a visit to Bristol. In November also she received a visit at Windsor Castle from the German Emperor and Empress.

Victoria and Albert, Royal Order of, was instituted in 1862, and enlarged in '64, '65 and '80; is for Ladies, and consists of four classes. **Registrar**, Sir A. W. Woods.

Victoria Institute. This society, which has now been in existence for 33 years, was founded to associate together men of science and all interested and qualified persons, in investigating "impartially and fully the most important questions of philosophy and science, especially those that bear upon the great truths revealed in Holy Scripture"; "to examine and discuss all supposed scientific results with reference to final causes, and the more comprehensive and fundamental principles of philosophy proper, based upon faith in the existence of one Eternal God"; and to bring together the results of such labours in the printed transactions of the Society. All desirous of belonging to or supporting a society having these aims are admitted as associates. The number of members and associates is 1490, one-third of whom reside abroad and in the colonies. **President**, Sir George Stokes, Bart.; **Secretary**, Captain F. Petrie, Adelphi Terrace, W.C.

Victoria University, founded and incorporated by royal charter 1880, grew out of **Owens College**, Manchester (*q.v.*), which was established '51. Besides Owens College it now comprises University College, Liverpool ('84), at which the new Victoria buildings, erected at a cost of £53,000, were opened in Dec. '92, and the Yorkshire College, Leeds ('87); and consists of a federation of colleges, not necessarily situated in the same district, as at Oxford and Cambridge. **Chancellor**, Earl Spencer, K.G.; **Vice-Chancellor**, Nathan Bodington,

Litt.D. Registrar, Alfred Hughes, M.A. Undergraduates about 1100 in number. Grants technical, commercial and literary certificates to properly qualified candidates, and certificates to women, and examines schools. Its **Degrees** are: **B.A., M.A., B.Sc., M.Sc., LL.B., M.B. and Ch.B., Ch.M., Mus.B., Litt.D., D.Sc., LL.D., M.D., Mus.D.**

Victorian Order, The Royal, was created and instituted by Her Majesty, by letters patent under the Great Seal, April '96. Those admitted to the order are to be British subjects who may have rendered important or personal services to the Sovereign; or foreigners upon whom Her Majesty may think fit to confer the distinction, and who are to rank as honorary members. Members of the order are divided into five classes:—

Knights Grand Cross G.C.V.O.
Knights Commanders K.C.V.O.
Commanders C.V.O.

Members of the Fourth Class

Members of the Fifth Class

Members of the first and second classes receive the honour of knighthood, and a list of those admitted Nov. '98—Nov. '99 will be found under **KNIGHTS**. The first three classes rank after the corresponding classes of the order of the Indian Empire. **Chancery of the Order**, St. James's Palace; **Chancellor**, The Lord Chamberlain for the time being; **Secretary**, The Keeper of Her Majesty's Privy Purse for the time being.

Virgin Islands. An archipelago in the West Indies, lying immediately to the east of **Puerto Rico**. Of the principal islands, Denmark possesses Santa Cruz, St. Thomas, and St. John, and England owns Tortola, Virgin Gorda, and Anegada. The latter form a presidency of the British federal colony of the **Leeward Islands**. Total area of the presidency, which embraces in all about 32 islands, 58 sq. m.; total pop. 4635. See **BRITISH EMPIRE** (table).

VOLUNTEERS.

The Volunteers celebrated on July 8th, '99, the fortieth year of their incorporation by a review of the London corps on the Horse Guards Parade. The force maintains both its efficiency and popularity, and progress continues to be made. Early in the year the returns presented for '98 gave the full total of 224,300 efficient. The men now pass a much more severe musketry test than formerly. The force for the second time since '90 showed a decrease. The enrolled strength has been as follows since the establishment of the force: '60, 119,146; '61, 161,239; '62, 157,813; '63, 162,935; '64, 170,544; '65, 178,484; '66, 181,565; '67, 187,864; '68, 199,194; '69, 195,287; '70, 193,893; '71, 169,608; '72, 178,279; '73, 171,937; '74, 175,387; '75, 181,080; '76, 185,501; '77, 193,026; '78, 203,213; '79, 206,265; '80, 206,537; '81, 208,308; '82, 207,336; '83, 209,365; '84, 215,015; '85, 224,012; '86, 226,752; '87, 228,038; '88, 226,469; '89, 224,021; '90, 221,048; '91, 221,046; '92, 225,423; '93, 227,741; '94, 231,328; '95, 231,704; '96, 236,059; '97, 231,796; '98, 230,678. The authorised establishment, inclusive of permanent staff, was 262,550. Difficulty continues to be experienced in finding officers, but the force is far more efficient than formerly was the case.

Organisation. Volunteer corps are raised under the Volunteer Act 1863 (26 & 27 Vict., c. 65). They are subject to the provisions of that Act and any Acts amending it, and like-

wise to all regulations made with regard to volunteer corps by the authority of Her Majesty's principal Secretary of State for War. The Volunteer (Military Service) Act of '96 provides that "Whenever an order for the embodiment of the Militia is in force, any member of a Volunteer corps may offer himself for actual military service, and if the services of such numbers of any corps as, in the opinion of the Secretary of State, is sufficient to enable them to be separately organised are accepted, then those members may be called out either as a corps or as part of a corps." The Volunteers, like the Militia, form junior battalions attached to the line regiments in their respective districts. Their own organisation as a cohesive and independent fighting force is still imperfect, for they have not the auxiliary services, and it is not possible to ensure that all trained volunteers shall go through, even once a year, the exercises necessary to make them really efficient soldiers. To give them greater cohesion they have been formed in 33 brigades, but the organisation is as yet rudimentary, for the officers commanding volunteer infantry brigades do not in all cases inspect the battalions in their command, and the scheme of mobilisation is imperfect. But an excellent spirit is shown by both officers and men, as is proved by the general efficiency, the increase in the mounted and cyclist infantry, the energy shown by the Railway Volunteer

Staff Corps, and a movement recently set on foot to establish a Volunteer Reserve, composed of those who have been compelled to leave the ranks, but cherish their connection with the corps, and retain their devotion to its service. Constant efforts are being made to increase the efficiency of the force. It is hoped that the new grants to officers will bring a good class to the force. They are made contingent upon the attainment of proficiency.

The Latest Returns.—Arms were distributed thus: Light Horse, 206; Artillery, 42,022; Engineers and Submarine Miners, 12,492; Rifles, 174,615; Medical Staff Corps, 1343. A total of 6388 officers and 13,652 sergeants are returned as having earned the Government grant of 50s.; 1694 officers have passed in tactics or artillery; 10 officers and 17 non-commissioned officers have earned the grant for signalling; and 14 officers and 25 non-commissioned officers that for supply and transport duties. The number present at inspection in '98 was 198,376, a slight increase on '97.

Expenditure.—The gross sum upon the estimates of '98-9 for the pay and allowances of volunteer corps was £614,200, as compared with £627,200 in '97-8. The expenditure on the force is as follows: pay of adjutants, £76,200; pay of sergeant-instructors, £98,500; capitation grants to volunteer corps, £259,500; allowances in aid of volunteer camps, £135,000; miscellaneous charges, £45,500.

W

Wakefield, Bishop of. See under PEERAGE.

Waldeck-Rousseau, Pierre M., Premier of France, was born in 1846, becoming in due course a barrister. He practised at Rennes for several years until he joined the Paris Bar, where he soon attained to a considerable and lucrative practice, being engaged in, among other *causes célèbres*, the Panama case, in which he was counsel for M. de Lesseps. His Parliamentary career dates from '79, when he was returned for Rennes and entered the Chamber of Deputies as a Gambettist. In the short-lived Cabinet of '81-2 he filled the post of Minister of the Interior, and held the same office again in the Ferry Administration of '83-5. He continued to represent Rennes until '89, when he was elected to the Senate. In June '99, after the fall of M. Dupuy's Ministry, he responded to a request of President Loubet that he should form a Ministry, and successfully undertook the task. In spite of many difficulties his Ministry had appreciably strengthened its position by Nov. '99. His father before him was, like himself, a prominent politician and lawyer.

Wales, H.R.H. Albert Edward, Prince of, was b. at Buckingham Palace, Nov. 9th, 1841; created Prince of Wales and Earl of Chester, by patent under the Great Seal, on Dec. 4th of the same year; baptised at St. George's Chapel, Windsor Castle, Jan. 25th, '42. Ed. at Christ Church, Oxford (D.C.L. '68), and at Trin. Coll., Camb. (LL.D.), and Edin. Univ. (LL.D.); also LL.D. Dublin ('68), and Calcutta ('74). Prince of the United Kingdom of Great Britain and Ireland, Prince of Wales,

Duke of Saxony, Prince of Saxe-Coburg and Gotha, Great Steward of Scotland, Duke of Cornwall and Rothesay, Earl of Chester, Carrick, and Dublin, Baron Renfrew, and Lord of the Isles, K.G., K.T., K.P., G.C.B., G.C.S.I., G.C.M.G., G.C.I.E., P.C. He is personal A.D.C. to Her Majesty the Queen, a field-marshal of the forces, colonel-in-chief of 1st and 2nd Life Guards and Royal Horse Guards, colonel 10th Hussars, hon. colonel of the Oxford and the Cambridge University Corps, of the Middlesex Civil Service Corps of Rifle Volunteers, of the 3rd Batt. Gordon Highlanders, and the Sutherland Highland Rifle Volunteers, hon. admiral of the Fleet. Holds the rank of field-marshal in the German army, and is colonel-in-chief of the 5th Pomeranian Blücher Hussars. He is also colonel of the Austro-Hungarian 12th Regt. of Hussars. Admitted to the Middle Temple, called to the bar and to the bench of that Society (Oct. 31st, '61). H.R.H. is an Elder Brother of Trinity House; also Grand Master of the United Grand Lodge of Freemasons of England ('74); President of the Society of Arts and of St. Bartholomew's Hospital. Married (March 10th, '63) H.R.H. the Princess Alexandra Caroline Mary Charlotte Louisa Julia, eldest dau. of Christian IX., King of Denmark, and sister of the Empress of Russia and the King of Greece. On her marriage the House of Commons voted her an annual allowance of £10,000, and £30,000 in the event of her surviving the Prince. The Prince and Princess celebrated their silver wedding, '88. In the winter of '71, while staying with his family at his country seat, Sandringham, Norfolk, the Prince was attacked with typhoid fever,

which it was feared would prove fatal, but after several weeks' prostration he recovered, and on Feb. 27th, '72, he attended a public thanksgiving in St. Paul's Cathedral. He visited Canada and the United States in '60, and the Holy Land in '62, and went on a tour through India in '75-6. In company with the Princess he made a tour through Ireland ('85), where he met with a cordial reception. He evinced an active interest in the promotion of the late series of Exhibitions held at South Kensington, and despite not a little opposition succeeded in establishing the Imperial Institute (*q.v.*). In '93 he became a member of the Poor Law Commission; and in '94 did important service to his country at St. Petersburg, whither he went on the death of the Czar in November. During '96 H.R.H. won the Derby and the St. Leger, the former victory exciting a scene of unparalleled enthusiasm at Epsom. In the Jubilee Celebrations of '97 the Prince took a prominent part, especially in regard to the Prince of Wales's Hospital Fund for London. A somewhat serious accident befel him in '98, his knee being injured in a fall. In Nov. '99 the German Emperor and Empress paid him a visit at Sandringham.

Wales, The University of, is a federal teaching University. Its constituent colleges are the University College of Wales, Aberystwith, the University College of North Wales, Bangor, and the University College of South Wales and Monmouthshire, Cardiff, all of which will be found noticed under their separate headings. It has powers to confer degrees in the faculties of Arts or Letters, Science, Technical or Applied Science, Law, Music, and Theology. The charter passed under the Great Seal on Nov. 30th, '93, since which time the task of getting the machinery of the University into working order has proceeded with. On Jan. 12th, '94, a large and influential deputation of persons interested in Welsh education waited upon the Chancellor of the Exchequer, with a view to secure the requisite funds. The demand for the first year was for £3000, which Sir William Harcourt was able to grant. Since '94 a slightly increased grant has been paid by the Treasury. The first meeting of the supreme governing body, the University Court, was held in the Privy Council Chamber, Downing Street, on April 6th, when the chair was taken by the Earl of Rosebery, as Lord President of the Council. The Prime Minister, in addressing the Court, referred to the democratic character of the new University. At this and subsequent meetings, statutes were adopted, a Theological Board was formed, nine Welsh theological colleges were recognised as institutions in which candidates for theological degrees in the University might receive instruction, and the general work of organisation was proceeded with. The University Senate, which is composed of the heads of departments in the three constituent colleges, has settled upon the courses of study for the initial degrees of the University in Arts and Science. The matriculation examinations are held each year in June. The number of candidates for matriculation in '99 was over 490. The candidates for degrees are annually increasing, and in '99 they were over 70. The chief officers of the University are: Chancellor, H.R.H. The Prince of Wales, K.G.; Senior Deputy Chancellor, Dr. Isambard Owen; Vice-Chancellor, Principal Viriamu Jones, University

College of South Wales and Monmouthshire; Registrar, Mr. Ivor James, Brecon.

Walfisch Bay is a dependency of Cape Colony situated on the west coast of Africa, in the middle of the coast line of German South-West Africa. Area, 430 sq. m.; pop. 768. See CAPE COLONY.

Wallace Collection. This famous collection of works of art, generously bequeathed to the nation by the late Lady Wallace, was vested in a body of Trustees appointed by the Treasury, consisting of the Earl of Rosebery, Sir Edward Malet, Sir J. S. Maxwell, Sir Arthur Ellis, Mr. Freeman Mitford, Mr. A. C. de Rothschild, and Sir J. Murray Scott. Mr. Claude Phillips has been appointed Keeper of the collection, which is permanently arranged in Hertford House, Manchester Square, in which very extensive alterations have been carried out for the purpose.

Ward, Mrs. Humphry, is a daughter of Thomas Arnold, author of the well-known "Manual of English Literature," a niece of Matthew Arnold, and granddaughter of Dr. Arnold of Rugby. She married in 1872 Mr. Thomas Humphry Ward, at that time a tutor of Brasenose Coll., Oxford, now a member of the staff of the *Times*, and editor of a well-known edition of the English poets. Mrs. Ward displayed deep interest in the establishment ('90) of University Hall, now merged in the Passmore Edwards Settlement, Tavistock Place, of which she is Hon. Sec. In '84 she published "Miss Bretherton," in '88 "Robert Elsmere," in '92 "David Grieve"; in '94 "Marcella" appeared; a short story, "Bessie Costrell," in '95, "Sir George Tressady," a sequel to "Marcella," in '96, and "Helbeck of Bannisdale" in '98. She has also published various literary and historical essays, and a translation of H. F. Amiel's "Journal." She resides at Stocks House, Aldbury, near Tring, Herts, and in London.

War Office. See ARMY, THE BRITISH. See also SECRETARY OF STATE AND MINISTRY.

Warren, Lieut.-Gen. Sir Charles, G.C.M.G., K.C.B., is a son of the late Major-Gen. Sir Charles Warren, K.C.B., and was born at Bangor Feb. 7th, 1840. Educated at Cheltenham, Sandhurst, and Woolwich, he entered the Royal Engineers in '57, and became Assistant Instructor of the Surveying School of Military Engineering '66. He has done good work for the Palestine Exploration Fund, and has seen considerable service in Africa. He was a Boundary Commissioner in Griqualand West '76-7, took part in the Kaffir war '78, and the Griqua and Bechuana campaigns '79; went on special service in the Egyptian campaign '82, successfully led the Bechuanaland Expedition in '84-5, and has since been Chief Commissioner of the Metropolitan Police '86-8, and seen service in the Straits Settlements. He commanded the Thames District troops '95-8, and was appointed to command the 5th Infantry Division sent for service in South Africa (Nov. '99).

Water Colours. See ROYAL SOCIETY AND ROYAL INSTITUTE OF PAINTERS IN WATER COLOURS.

Water Supply of London. See LONDON WATER SUPPLY.

Waterworks Engineers, British Association of. Established in April '96. The objects of the Association are to promote the interchange of information and ideas amongst its members, to receive and discuss communica-

tions from members and others as to waterworks engineering, management and finance, to originate and promote improvements in the law relating to waterworks, and to promote the interests of members. The qualifications for membership are the holding of posts as engineers or managers of waterworks undertakings. Engineers or their assistants may become associates in Class A, and persons of kindred professional knowledge or experience in Class B. There is also provision for hon. members and students. Members pay an entrance fee of £2 2s. and an annual subscription of £1 1s.; and associates in Class A an entrance fee of £1 1s. and a subscription of 10s. 6d., and in Class B an entrance fee of £2 2s. and subscription of £1 1s. The fourth annual meeting was held in London, June 5th, 6th and 7th, '99. **President**, Mr. W. Watts, C.E., F.G.S., Langrett, near Penistone. The **secretary** and **editor** of Transactions is Mr. W. H. Brothers. **Offices**, 54, Parliament St., Westminster, S.W.

Watson, William, was born in Wharfedale, Yorkshire; and even in his early youth gave evidence of the powers which have since ripened so splendidly. For long, however, he met with little but apathy and lack of public recognition. But in '92 a poem by him entitled "Wordsworth's Grave" put his name into all the critics' mouths, and everything he has since published has been eagerly sought after. He has well stood the test. His "Lachrymæ Musarum" contained a memorial poem on Tennyson, which was one of the finest tributes paid to the late Laureate. He has also published a collection of "Love Lyrics," and among his earlier efforts are "Epigrams of Art, Life, and Nature," and "The Prince's Quest." Early in '93 "The Eloping Angels," a poetical caprice, and an admirable volume of essays, "Excursions in Criticism," were published. His most important volume, thus far, entitled "Odes, and Other Poems," was published in Dec. '94. "The Father of the Forest" in '95, a volume of sonnets on the Armenian question entitled "The Year of Shame" in '96, and "The Hope of the World, and Other Poems," in '97. His "Collected Poems" appeared at the end of '98. A Civil List pension of £100 a year was conferred upon him in '95. Address: Devonshire Club.

Watts, George Frederick, R.A., was b. 1817. In '43 his cartoon of "Caractacus led in Triumph through the Streets of Rome" obtained one of the three highest-class prizes of £300 at Westminster Hall. Three years later, in a similar competition, his colossal oil pictures, "Echo" and "Alfred inciting the Saxons to prevent the landing of the Danes," secured him one of the three highest-class prizes of £500. Mr. Watts executed one of the frescoes in the Poets' Hall of the Houses of Parliament, and painted in fresco the west end of Lincoln's Inn Hall. He became a full member of the Royal Academy in '67, but retired in '96. His paintings of ideal subjects, such as "Love and Death," "Hope," "Orpheus and Eurydice," have justly given him a world-wide fame. A baronetcy was offered to, but refused by, him in '86, and the offer was renewed by Mr. Gladstone in '94, but again declined. In '95 he gave to the National Portrait Gallery 15 oil portraits and two drawings. A further gift of 18 pictures was made by Mr. Watts on the opening of the National Gallery of British Art, '97. On his 80th birthday (Feb. 23rd, '97)

a handsomely illuminated address of congratulation was presented to him by many of his friends and admirers.

Ways and Means. The Committee of Ways and Means of the House of Commons (1) considers any proposals relative to old or new taxes and duties submitted to it by the Chancellor of the Exchequer (see FINANCE), and (2) votes sums of money from the Consolidated Fund sufficient in amount to make good the supplies granted for the maintenance of the services of the year. Resolutions relative to taxation may be acted upon by the proper officers as soon as passed. At the end of the session a measure which on the one hand applies out of the Consolidated Fund the whole sum granted to Her Majesty for the service of the financial year, and on the other hand appropriates the supplies in accordance with the votes already passed in Committee of Supply, is passed, and is known as the Appropriation Bill. See CHAIRMAN OF WAYS AND MEANS.

Webster, Sir Richard, Bart., M.P. See under COMMONS.

Wei-hai-wei, which was leased to Great Britain by China by a Convention signed at Peking in July '98, is a city situated in a deep bay about 18 miles in circumference. The city is on the Shantung promontory, about 40 miles east of Chefoo, and lies nearly opposite Port Arthur, which is situated on the northern side of the entrance to the Gulf of Pechili. Wei-hai-wei Harbour is sheltered, and can accommodate a large number of vessels. The city of Wei-hai-wei is in the north-west corner of the bay, and is walled in. Forts command the entrances to the harbour. With the city and harbour there passed under British jurisdiction the island of Liu-Kung, on the north side of the bay, and all other islands and waters in the bay, together with a belt of land 10 miles wide along the entire coast-line of the bay, the Chinese population of which is about 350,000. The territory is administered under the Admiralty department. The enrolment of a battalion of Chinese, 1000 strong, for service under British officers at Wei-hai-wei, was ordered (Nov. 18th, '98). See CHINA (map).

Weingartner, Felix, composer, conductor, and writer on musical subjects, was b. at Zara, Dalmatia, June 2nd, 1863. At Graz studied under Dr. W. Mayer, and at Leipzig, in '81, obtained a scholarship from the Austrian Government. At Franz Liszt's instigation his opera, "Sakuntala," was brought out at Weimar on March 23rd, '84. From '84 to '89 was conductor at Königsberg, Danzig, and Hamburg, and in '91 was appointed Court conductor at Berlin. He has composed several symphonic poems, a second opera ("Malawika," produced in Munich in '86), and many songs. Conducted a concert at Queen's Hall, London, May 17th, '98.

Welldon, Rev. James Edward Cowell, is the son of the Rev. Edward Welldon, master of Tonbridge School, and was born at Tonbridge in 1854, and ed. at Eton and King's Coll. Cambridge. He was Senior Classic and Senior Chancellor's medallist '77, and in '78 was elected a Fellow of King's. After taking his M.A. in '80, he was ordained deacon in '83 and priest '85, Master of Dulwich College '83-'85, and elected Headmaster of Harrow School '85. He was the select preacher at Cambridge in '85, '88, and '93, and at Oxford in '86-'87, Hulsean Lecturer at Cambridge '97. He was Honorary

Chaplain to the Queen '89-92, and since then has been one of H.M.'s Chaplains in Ordinary. Among his publications are: "Translation of the Politics of Aristotle," '85; the "Rhetoric of Aristotle, with Analysis and Notes," '86; "The Nicomachean Ethics, with Analysis and Notes," '92; "Sermons '85, '86, to Harrow Boys," '87, a second series '91; "The Spiritual Life," '88; and "Gerald Eversley's Friendship," '95. In '98 he was appointed Bishop of Calcutta and Metropolitan of India and Ceylon.

Wellington College (Wokingham, Berks). Founded in 1856, in memory of the great Duke of Wellington. The foundation consists of ninety nominations for the sons of deceased officers, who are educated for £10 a year. There are, as a rule, ten open scholarships, and a limited number of officers' sons (coming under 13½ without previous application or over 13½ after application) are educated at £95 a year. Sons of civilians are also received at a charge of £110 if boarded in the principal building, of £132 if boarded in a master's house. There is a classical school, in which boys are prepared for the Universities, etc., and a modern side where boys are educated for the army, etc. Average number of pupils, 450. *Motto*, "*Hæroum filii*." **Chairman of Governors**, H.R.H. the Prince of Wales. **Master**, Rev. Bertram Pollock, M.A. **Bursar**, M. S. Forster, B.C.L., M.A.

Welsh Calvinistic Methodist (or Presbyterian) Church. **History.** This is the largest Nonconformist Church in Wales, and the only one of native origin. It began through a purely spiritual movement. In the middle of the eighteenth century a layman and two clergymen of the Established Church named Howell Harris, Daniel Rowlands, and Howell Davies, led the way in a great revival of religion in North Wales. They formed their converts into societies on Methodist lines, but as they rejected Wesley's Arminian doctrines, they leant more and more towards the practices of the Presbyterian Churches. In 1823 a Confession of Faith was adopted embodying the theological principles of the founders of the Church. Since that date the Presbyterian system has been more fully adopted, and Methodist and Congregational elements have been eliminated from the constitution of the Church. It is now a member of the Presbyterian Alliance, and is in federal union with the Presbyterian Church of England. The Welsh tongue is still used in all the courts and official transactions of the Church, and in the worship of most of the congregations, but the use of English is steadily increasing.—**Statistics.** Synods, 2; presbyteries, 24; churches, 1339; chapels and preaching stations, 1523; ministers, 792; local preachers, 408; deacons, 5506; communicants, 153,712; income, £246,365. There are two theological colleges, one at Trevecca and one at Bala, and mission work is carried on in Brittany and India. **Moderator for '99**, Rev. Evan Phillips, Newcastle Emlyn.

Welsh Questions. See **SESSION**, sect. 36.

WESLEYAN METHODIST CHURCHES.

Wesleyan Methodists are the followers of John and Charles Wesley. The first Society of the Methodist Church was formed in 1739. The official returns show that there are

in Great Britain 2152 ministers and 480,181 class-members of the Wesleyan Methodist persuasion; in Ireland 248 ministers and 28,281 members. The Foreign Missions of the Church employ 362 ministers, and number 57,881 members. The French Conference has 36 ministers and 1902 members; the South African Conference, 203 ministers and 81,108 members; the West Indian Conferences have 100 ministers and 46,864 members; and the Australasian Conferences (at the last General Conference) 667 ministers and 91,011 members. The Wesleyan Conference was held in July '99 in London. The **President** is the Rev. Frederic Wm. Macdonald, and the **Secretary** the Rev. Marshall Hartley. (For foreign mission statistics see **MISSIONARY SOCIETIES**.) The **London Wesleyan Mission** is the outcome of the interest aroused by "The Bitter Cry of Outcast London," issued in '85 by the Congregational Union. Work is now going on vigorously at St. George's-in-the-East under the Rev. Peter Thompson; at the Leysian Hall, Errol Street, E.C., under the Rev. J. Ash Parsons; at St. John's Square, Clerkenwell, under the Rev. John E. Wakerley; in the West End at St. James's Hall and other places under the Rev. Hugh Price Hughes, Mark Guy Pearse, and other ministers; and in the South under the Rev. J. H. Hopkins. The **General Secretary** is the Rev. W. D. Walters, 58, Cromwell Avenue, Archway Road, London, N.

In 1797—six years after Mr. Wesley's death—the **Methodist New Connexion** was formed. Alexander Kilham had headed a movement which sought to place the governing power in the hands of the members instead of in the hands of ministers. In the heat of controversy he made statements respecting ministers which could not be sustained, and for this he was ostensibly expelled by the Conference of 1796. He was followed by 5000 seceders, who formed themselves into the new body. In numerical strength this Connexion now ranks third amongst the denominations that have sprung out of the parent body. It has 208 ministers, 1179 lay preachers, and 41,558 church members.

In 1834 a serious division took place on the proposal of Conference to open a training college for ministerial students. Other questions, however, were at issue also. Protest was made against the power wielded by the ministers. Dr. Samuel Warren and Mr. Robert Eckett led the movement. Dr. Warren was excluded in '35, and 20,000 members followed him, forming the **Wesleyan Methodist Association**. Serious as was this division, another, much more serious still, commenced in '44. "Fly Sheets," unsigned, but probably written by the Rev. J. Everett (the fact was not actually proved), were sent to every Wesleyan minister. The outcry was against "centralisation," and Dr. Bunting, who had for a generation been a leader in the denomination, was especially attacked. In '47 Conference required every minister who had not taken part in the dissemination of the "Fly Sheets" to sign a document to that effect. Two hundred and fifty-six ministers refused. Two years later, Everett, with two fellow-workers—the Rev. Samuel Dunn and the Rev. William Griffith—were excluded from Conference. Meetings of sympathisers followed, concessions—especially the admission of lay representatives to Conference—were asked for, and a petition signed by 50,000 Methodists was

forwarded to Conference itself. The petition was not received, and concessions were refused. In that year alone ('50-'51) 56,000 communicants left the denomination, and in five years the number of seceders had increased to 100,000. They took the name of "Reformers." This was the latest as well as the most serious of the divisions in the ranks of Methodism.

Attempts at reunion have been numerous, and not without success. The suggestions that the Old Connexion should be absorbed into the Church of England have not led to the result desired, nor has the wish—often expressed—that the denominations which have sprung from the Old Body should rejoin it, been realised. In September '81, however, an Ecumenical Methodist Conference—intended to be the first of a series—was held in Wesley's Chapel, City Road, London. The Methodist Episcopal Church of the United States had made the suggestion. There were 400 delegates, representing 28 branches of Methodism and 5,000,000 Church members. Ten years later a second Conference was held in America, and in 1901 a third is to be held in Wesley's Chapel, City Road. A remarkable instance of reunion is seen in the case of the **United Methodist Free Churches**. First, the Protestant Methodists united in '36 with the Wesleyan Association. Next year a small body in the Midlands (the Arminian Methodists) was absorbed, and in the following year the Independent Methodists of North Wales. In '57 these amalgamated bodies (with a membership of 21,000) were joined by 19,000 Reformers, and the name **United Methodist Free Churches** was adopted. The Reformers who refused to amalgamate became **The Wesleyan Reform Union**, the membership of which is now only between seven and eight thousand—about a thousand less than the membership of the **Independent Methodists**. With regard to the **United Methodist Free Churches**, a different denomination from the smaller body just named, it stands, with respect to numbers, next to the **Primitive Methodists**. At home and abroad there are 399 ministers and 40 supernumeraries, with 3369 local preachers and 91,674 church members. The "foreign districts" are in China, East and West Africa, Jamaica, Australia, and Tasmania. Attempts have been made to carry the union of churches still further by the amalgamation of the **United Methodist** body with the **New Connexion**. These attempts have not yet succeeded. In '92 the **United Methodists** held their annual assembly, on an invitation from the parent body, in Wesley's Chapel, City Road, London. At the close of the sittings a special resolution was passed, expressing satisfaction at the general feeling existing in the different Methodist bodies in favour of closer union, and adding that "it is much to be desired that the question of union, which has been for so many years before the churches, may, at an early period, be mutually and permanently settled by the holding of a Federal Conference at fixed periods; and in other ways making manifest a happy union of all the branches of the great Methodist family." After the Conference a member of the **United Methodist Free Churches** presented a stained glass window to the chapel to commemorate the gathering. At the present time the Bible Christians and the **Primitive Methodists** are discussing the question of amalgamation. It has been suggested that if the amalgamation

should take place, the new body should be called "**The Presbyterian Methodist Church**," or "**The Methodist Union Church**." The **Primitive Methodists** took steps, in connection with this movement, to ascertain the views of the **New Connexion**, and of the **United Methodist Free Church** denominations, with reference to an amalgamation of all the minor Methodist bodies. In Australasia the **United Methodist Free Churches** have joined with other branches of the Methodist family to form one church. They are all at one with each other, and with the parent body, in doctrine. The differences refer almost entirely to the position of the ministers, and their relation to the laity in church government. In the old Wesleyan body the "Legal Conference" is supreme, and this "Hundred" must be composed of ministers. Its position was not altered by the admission of laymen in '77 to the Representative Conference. The **Primitive Methodists**, on the other hand, place power in a Conference in which there are two laymen to one minister. The **New Connexion** and the Bible Christians take a middle course—one layman to one minister—whilst the **United Methodist Free Churches** are unfettered in their choice of representatives. Another distinguishing feature in the government of the last-named Churches is their **Circuit Independence**. Their annual assembly has no power to revise the decisions of Circuit Courts in circuit matters. It is claimed for this denomination that its churches enjoy the freedom of Congregationalism whilst the whole body has the cohesion of Methodism.

The greatest development of Methodism has been in the **United States of America**, where it is now the leading denomination, numerically and financially. The **Methodist Episcopal Church** of the Northern States has a membership of 2,886,389, and 17,500 ministers. The **Methodist Episcopal Church South** has 1,482,665 members and 5900 ministers. Other Methodist bodies in America are the **African Methodist Episcopal Church**, with 630,550 members and 4825 ministers; the **African Methodist Episcopal Zion Church**, 503,075 members and 2641 ministers; the **Methodist Protestant Church**, 183,260 members and 1600 ministers; the **Coloured Methodist Episcopal Church**, 161,958 members and 1687 ministers; the **Free Methodist Church**, 28,135 members and 938 ministers; and some few smaller churches with about 200,000 more members. In **Canada** the **Methodist Church** has 282,259 members and 2029 ministers. These figures being added to the number of Methodists in the **United Kingdom** and in the Colonies, give a total of 7,386,315 members, mostly heads of families, from which it is computed that the total number of persons attending Methodist churches throughout the world is about 30,000,000.

Primitive Methodism is sometimes referred to as a "growth" rather than a "secession," because the first "class" formed was composed of persons who had not previously belonged to any church. Mr. Hugh Bourne, who had been a local preacher amongst the Wesleyans, took charge of this class, and proceeded to form other classes. This was in Staffordshire in 1810. Two years before this, Mr. Bourne had been excluded from the Methodist body because he would not conform to the regulations of Conference respecting Camp Meetings. The Conference of 1807 had

decided against Camp Meetings; but Mr. Bourne, and afterwards William Clowes, refusing to be ruled on this question, were excluded. The first Conference of this body was held in 1820. It is now the largest of all the bodies that have sprung from the Methodists. It has missions in Southern, Western, and Central Africa; in South Australia, New Zealand, and Queensland. It has a training college for ministers at Manchester, and colleges for youths at York and Birmingham, also an orphanage at Alresford. It has, too, a training school for native evangelists in South Africa. **Latest statistics:** Members, 198,930—increase for the year, 1748; ministers, 1102; local preachers, 16,617; class leaders, 10,604; places of worship and rented rooms, etc., 4985; hearers, 626,172; value of Connexional property, £3,664,253; debt upon Connexional property, £1,009,187; Sabbath schools, 4341; teachers, 61,015; scholars, 467,884. **Missionary Secretary,** Rev. Richard W. Burnett; **General Com. Secretary,** Rev. John Hallam; **General Book Steward,** Rev. T. Mitchell; **General Sunday School Secretary,** Rev. Danzy Sheen; **Editor of the Monthly Magazines,** Rev. H. B. Kendall, B.A.; **Principal of the Theological Institute,** George Parkin, B.D.; **Editor of the Quarterly Review,** Rev. John Watson, D.D.

The Bible Christians ("Bryanites") arose in 1815. William O'Bryan was a Cornish local preacher who threw himself into evangelistic work in such thoroughgoing fashion that he was declared to be "irregular." Upon this the new denomination was formed. The preachers at first did not take the title of "Reverend." They, however, (like the Primitive Methodists) license women to preach as well as men. In England the denomination is strongest in Cornwall and in the Western counties. Numerically it is almost as large as the New Connexion, having nearly 35,000 members, and ranking, in this particular, fourth amongst the minor bodies of Methodists. The Protestant Methodists were organised in 1829, when more than 1000 members separated from the Leeds societies, because by order of the Conference and against the wishes of the trustees and class leaders an organ was placed in Brunswick Chapel.

Western Africa, British Possessions. See under the respective alphabetical headings, as LAGOS, NIGERIA, SIERRA LEONE, etc.

WESTERN AUSTRALIA.

Western Australia is a colony comprising all the western half of Australia beyond the 129th meridian of E. long. It is 1480 miles N. to S., and 1000 E. to W., and has a coastline of 5200 miles. **Area,** 975,920 sq. m.; **pop., '99,** 170,069. Divided into 31 magisterial districts. **Capital, Perth,** pop. 43,000; chief port Fremantle, pop. 15,000. Representative government was first given to the colony in '70 in a limited form; but in '90 the Imperial Parliament gave a new constitution, vesting the administration in a Governor and Parliament. The Legislative Council, or Upper House, contains 24 members elected for six years; the Legislative Assembly, or Lower House, contains 44 members elected for four

years. Electors to the Council must by the Constitution Act of Oct. '93 have resided in the colony for 12 months, and possess £100 freehold or £25 per annum leasehold, or be householders to the value of £25, or occupy or mine Crown lands rented at £10 per annum. The qualifications of electors to the Assembly are 6 months' residence in the district; or the possession of £50 freehold or £10 leasehold, or holding a house of the value of £10, or leasing Crown lands at £5 per annum. Education is compulsory, though not free. Grants in aid are given to denominational schools. For defence there is a permanent artillery force and a volunteer corps, the total combined strength being about 800 men. The climate varies considerably, for the colony stretches over twenty degrees of latitude, but the inhabitants laud it as the healthiest in the world. The products of the colony are gold, wool, pearl shells, pearls, timber, sandal wood, and guano. The gold is found at Kimberley, in the N.W., Yilgarn, in the S.W., and at several points between these two districts. The chief fields are the Murchison, the Ashburton, and the Pilbarra, but the reefs extend for about 1200 miles. The Coolgardie field, in the S.W., became famous during '95. The export in '90 was only £86,000, but in '93 it amounted to £421,385, in '97 to £2,564,976, and in '98 to £3,990,697. There are 1361 miles of railway open and 276 under construction; 6948 open, 263 under construction of telegraph. Great efforts are being made to promote the construction of railways on a grand scale on the "land-grant system," and so to open up back country. **Revenue, '98-9,** £2,478,800; **expenditure,** £2,590,357; **imports, '98,** £5,241,960; **exports,** £4,060,000; **debt, '99,** £10,372,824. See AUSTRALIA, BRITISH EMPIRE (table), and DIPLOMATIC.

History, '99. In opening Parliament the Governor said that gold mining was expanding beyond the most sanguine anticipations. The production in '99 was expected to be £6,000,000 (June 21st). A measure of electoral reform, which included a provision for one man one vote, was thrown out by 17 votes to 10 in the Assembly (Sept. 13th). The joint committee of the two Houses, to which the Commonwealth Bill had been referred, reported that before the colony could safely agree to Federation, amendments were essential regarding the election of Senators, a trans-continental railway to connect Perth with the railway system of South Australia, and the right of the colony to impose special Customs duties on imports from the rest of the States in the Federation as well as from other countries. In his annual Budget statement (27th) the Premier said that the colony had recovered from the temporary depression caused by the over-capitalisation of mining and other companies, and land settlement had increased very considerably. In response to an offer of aid H.M. Government gladly accepted the help of a contingent for service in South Africa, undertaking to treat them in all respects as an integral portion of the Imperial forces. The contingent left Perth for South Africa (Nov. 6th) amidst the utmost popular enthusiasm. The Legislative Assembly carried a proposal of the Premier to submit the Federation Bill to the electors in a dual form—viz., as approved by the Conference of Premiers, and as amended by the Joint Committee of the Westralian Houses of Parliament (9th).

WEST INDIES.

The name given by Columbus to the islands surrounding the Caribbean Sea. They are divisible into the Bahamas, the Greater Antilles, and the Lesser Antilles. The last are also divided into Windward and Leeward groups; and to them may be added the islands off the Venezuelan coast. The total area is estimated at upwards of 90,000 sq. m., and the total pop. at 5,000,000, of whom two-thirds are negroes. Those of the islands which are important enough will be found treated separately under their respective alphabetical headings. A terrible hurricane occurred (Sept. 10th, '98), which did enormous damage, especially in St. Vincent, St. Lucia, Barbados, the Grenadines, St. Kitt's-Nevis, Montserrat, Anguilla, and Barbuda. It was estimated that several hundred people perished and many thousands were rendered homeless and destitute of food. The coasts were strewn with wrecks, and whole towns were destroyed. In Barbados, for instance, 11,426 labourers' houses were swept away, and 4918 damaged. It was computed that there alone £40,000 was required immediately to re-house destitute persons. The Lord Mayor of London at once opened a relief fund, and aid was promptly rendered by the Imperial authorities. Another hurricane devastated Montserrat and Nevis (Aug. 7th, '99).

During '97 a **Royal Commission**, consisting of Sir Henry Norman, Sir David Barbour and Sir Edward Grey, investigated the condition of the **sugar industry** in the West Indian colonies, and specially the causes of the existing depression. The report of the Commission was published as a bluebook, Oct. 2nd, '97. The Commissioners had to dismiss the best remedy, the abandonment of the bounty system by Continental nations, as quite improbable. They were divided in opinion as to the imposition of countervailing duties on bounty-fed sugar imported into the United Kingdom, the chairman, Sir Henry Norman, supporting, and his two colleagues opposing, such a course. Various special remedies or measures of relief were, however, recommended as follows: (1) The settlement of the labouring population on small plots of land as peasant proprietors; (2) the establishment of minor agricultural industries and the improvement of the system of cultivation, especially in the case of small proprietors; (3) the improvement of the means of communication between the different islands; (4) the encouragement of a trade in fruit with New York, and possibly, at a future time, with London; (5) the grant of a loan of £120,000 from the Imperial Exchequer for the establishment of central factories in Barbados. The expenditure which these measures would involve was estimated as follows: (1) A grant of £27,000 a year for ten years, to carry out the special remedies recommended in (2), (3), and (4); (2) a grant of £20,000 a year for five years for the smaller islands; (3) immediate grants of £60,000 and £30,000, or £90,000 in all, to clear off the floating debt in some of the smaller islands, and to make roads and settle the labouring population on the land in Dominica and St. Vincent; (4) a loan of £120,000 to Barbados for the establishment of central factories. As to the expenditure which might be necessary for relieving distress (especially in British Guiana and Barbados), in

promoting emigration, and in supporting and repatriating East Indian immigrants, the Commissioners were unable to form any estimate, but it might be very great, if there occurred a sudden and general failure of the sugar industry in Barbados and British Guiana. In such a contingency neither British Guiana nor Barbados would be able to meet the necessary cost of administration for probably a considerable number of years. A free grant of £90,000 was made to various West Indian islands by the Imperial Parliament in the '98 Session in aid of floating deficits; and £30,000 was advanced to the Governments of St. Vincent and Dominica, to make roads and settle labourers on Crown lands as small cultivators. A supplementary grant of £41,500 was made in the same Session, £20,000 in aid of local revenues, and the balance for the establishment of an Agricultural Department under Dr. Morris, steamer subsidies, and the formation and working of central sugar factories. Further advances were made in '99 under the Colonial Loans Act, '99 (see SESSION, sect. 44). Sir Thomas Lipton sent out an agent to Barbados early in '99, to inquire into the situation with a view to investing a large sum in the restoration of the sugar industry there. Reciprocity treaties with the United States, the details of which are given in the separate articles on each colony, were concluded in the summer of '99 by Barbados, Bermuda, Jamaica, and Trinidad. Special advantages were thus given to West Indian sugar, so far as the American market is concerned.

"**Westminster Gazette.**" On Jan. 31st, '93, the first number of this paper was published. It was practically a revival of the old *Pall Mall Gazette*, which, it may be remembered, changed owners and politics during '92. The editor, and almost his whole staff, resumed work on the new organ, which was founded and financed by Sir George Newnes. The present editor is Mr. J. A. Spender, and the assistant editor Mr. F. Carruthers Gould, whose political cartoons have won him such fame. The "**Westminster Budget**" has similarly revived the traditions of the old *Pall Mall Budget*, under the editorship of Miss Friederichs. It is published at 3d. weekly, and is profusely illustrated. Offices, Tudor Street, E.C.

Westminster School, or the Royal School of St. Peter's, Westminster. Re-founded 1560, reorganised 1868. Foundationers, 40; 15 annual vacancies. The **Westminster Play**, an annual representation of a Latin comedy by the scholars, is of some celebrity. There are a number of close scholarships and exhibitions at **Christ Church, Oxford**, and of exhibitions at **Trinity College, Cambridge**. Head Master, Rev. W. Gunion Rutherford, M.A. Motto, *Dat Deus incrementum*. Bursar, J. Tyson, B.A.

Weyman, Stanley John, was b. at Ludlow, Shropshire, Aug. 7th, 1855, and ed. at Shrewsbury School and Christ Church, Oxford, taking his B.A. degree in '77. He was called to the bar at the Inner Temple in Jan. '81, joining the Oxford Circuit. On this circuit he practised till '89, when his first work, "The House of the Wolf," a romance of French history, was published. His health compelled him to spend some time abroad, and finally led him to abandon his practice. In '90 "The New Rector" appeared. "The Story of Francis Cludde" followed; and then came, in '93, the book which has gained him

favour with all lovers of romance, "A Gentleman of France." This novel has been translated into French, German, and Swedish, and has proved one of the most successful of recent novels. In '94 he published "Under the Red Robe" and "My Lady Rotha," in '96 "The Red Cockade," in '98 "Shrewsbury," and in '99 "Castle Inn." Mr. Weyman is married, and lives at Llanrhydd, near Ruthin, Denbighshire.

White, Sir George Stuart, G.C.B., G.C.S.I., G.C.I.E., V.C., was b. in 1835, and entered the army in '53. He has had a brilliant career, and won his V.C. at Charasiab in '79, and at Kandahar Sept. '80, by his conspicuous personal bravery. He served in the mutiny, in the Afghan campaign '79-80, in the Nile expedition '85, and in the Burmese expedition '85-7 as commander of the forces there, when he gained his promotion to the rank of Major-General. In '89 he was appointed to the command of a first-class district in India, and in '93 he succeeded Lord Roberts as Commander-in-Chief in India. He was appointed Quartermaster-General of the Army in '98, following Sir Evelyn Wood in that office, and in '99 was sent out to take command of the British forces in Natal in connection with the Transvaal troubles. The troops under his command gained some brilliant victories early in the struggle, but he was then closely invested at Ladysmith (see NATAL and TRANSVAAL). He is a D.L. and J.P. for the county of Antrim. Address: Whitehall, Broughshane, co. Antrim.

Whyte, Rev. Alexander, M.A., D.D., was b. at Kirriemuir, Forfarshire, 1837; ed. at Aberdeen University (M.A. '62) and Free Church College, and ordained at Glasgow in '66. Four years later he became minister of Free St. George's, Edinburgh, the premier Presbyterian church in Scotland, and this position he still holds. He is a D.D. of Edinburgh University. In '98 he was elected Moderator of the Free Church General Assembly. Works: "Commentary on the Shorter Catechism," "The Four Temperaments," "Bunyan Characters" (3 vols.), "Samuel Rutherford's Correspondents," etc.

Wilberforce, Canon Albert Basil Orme, is the youngest son of the late Bishop Wilberforce of Oxford and afterwards of Winchester, and was ed. at Exeter College, Oxford, where he graduated B.A. in '65, M.A. in '66, D.D. in '94. He was curate of Cuddesdon '66-7, chaplain to the Bishop of Oxford '66-70, curate of St. Jude, Southsea, '61-71, and rector of St. Mary's, Southampton, '71-94. In '94 he was given the living of St. John's, Westminster, and made a Canon of Westminster. The Speaker appointed him as his chaplain in Jan. '96. He is famous for his eloquence in the pulpit and as a temperance advocate. Address: 20, Dean's Yard, Westminster Abbey.

Wilhelmina I., Queen of the Netherlands, was b. 1880. She is the daughter of William III., of the Netherlands, by his second wife, the Princess Emma Adelaide Wilhelmina Theresa. Her mother is sister of H.R.H. the Duchess of Albany, being daughter of Prince George Victor of Waldeck-Pyrmont. Queen Wilhelmina succeeded to the throne on the decease of her father, in Nov. '90, but her mother acted as Queen-Regent till the young Queen came of age (Aug. 31st, '98), and, amidst the enthusiasm of her people, was installed as Sovereign.

William II., King of Prussia and German Emperor, is the eldest son of the late Emperor Frederick III., by Victoria, Princess

Royal of England, and was b. Jan. 27th, 1859. He succeeded his father June 15th, '88. Ed. at the gymnasium of Cassel, and submitted to the ordinary discipline of that establishment until '77, when he entered the University of Bonn. He married on his twenty-second birthday, in '81, the Princess Augusta Victoria, of Schleswig-Holstein-Augustenburg, a niece of Prince Christian. An International Labour Conference was inaugurated by the Emperor in '90. A state visit to Heligoland and to Amsterdam in '91 preceded his Majesty's arrival in England, accompanied by the Empress, in July. They were entertained at a series of splendid festivities, and the Emperor was presented with the freedom of the City of London. His Majesty sent a congratulatory telegram to President Kruger when Dr. Jameson's force was defeated in Dec. '95, an act which caused considerable surprise in Great Britain, though it was afterwards explained that His Majesty had no unfriendly intent towards this country. At all events, he atoned by sending a friendly telegram to the British 1st Royal Dragoon Regiment, of which he is hon. Colonel, on their departure for South Africa in Oct. '99, and in November gave £300 for relief of their widows and orphans. In October and November '98 he paid a visit, with the Empress, to Constantinople, where their Majesties stayed some time as the Sultan's guests, and went on subsequently to Palestine and Jerusalem. On Nov. 21st, '99, their Majesties, with two of their sons, paid a visit to H.M. Queen Victoria at Windsor Castle, afterwards going on (25th) to H.R.H. the Prince of Wales at Sandringham. See also GERMANY and YACHTING.

Wills. It should be borne in mind that the object of making a will is to make provision for the personal estate and effects of the person to whom they belong going to people other than those amongst whom they would be distributed by law in the event of no will being made. A will may be quite simple—couched in ordinary language; and though the intention of the testator is always sought for in construing the meaning of the will, yet if he make use of technical or legal terms, those terms will be taken in their legal sense, which may be quite contrary to the testator's intention. A will must be in writing, and must be signed, or, if already signed, must be acknowledged, by the testator in the presence of two witnesses, who must each sign the will in the presence of the testator and in the presence of each other. If a witness be a legatee he will lose the gift left to him, and his legacy will fall into the residuary estate; but the fact of a witness being a legatee will not invalidate the will. Property acquired after the date of the will passes under it, as the will is said to speak from the date of the testator's death and not from the date of the will. The last will in point of date is the one which will be admitted to probate. A will may be revoked in the following ways: (1) By the marriage of the testator; (2) By destruction of the will; (3) By a subsequent will, or portions of a former will by a codicil. The testator must appoint an executor or executors to carry out the provisions of the will, or it will be necessary for the Probate Court to appoint an administrator *cum testamento annexo* (with the will annexed) in order to do so. Immediately upon the testator's death the executor becomes entitled to all the testator's

personal property. He is bound first of all to bury the deceased and prove his will, then to pay out of it any debts due by the testator; and then to distribute the property, so far as it will go, in accordance with the will. Wills may be proved either at the Principal Registry, Somerset House, or at the District Registry of the district in which the testator had his permanent abode at the time of his death. Executors may prove the will personally without the aid of a solicitor. (For the Legacy and Succession duties payable, see **DEATH DUTIES**.) Should there be more than one executor, each can exercise all the powers of the office, except that all must join in bringing any action respecting the estate. The office continues to the survivors or survivor. Should the executor renounce, or die, before taking out probate, or not appear when cited to take probate, his rights of executorship cease entirely. But when the last surviving executor dies, then his executors are also executors of the original testator. If the executor is an infant, the Probate, Divorce, and Admiralty Division of the High Court will grant administration to his guardian or some other person who becomes administrator *durante minore ætate* ("during the minority"). An executor merely in virtue of his appointment is released from any debts due from him to the testator, and may retain out of the assets any debt due from the testator to him in priority to all other debts of the same degree; but this provision is so guarded in equity as to be practically of no effect. Any person who takes upon himself to be executor without having been appointed, is said to be an executor *de son tort* ("of his own wrong"), and is not allowed to derive any benefit from the office. Should no executor be available, the Court will grant letters of administration *cum testamento annexo* ("with the will annexed"), as distinct from the ordinary letters of administration granted when a person dies without making a will.—**Letters of Administration**. In the event of a person having personal property dying without a will, application is made, generally by the deceased's relatives, or sometimes by a creditor, to the District Registrar of the Probate Court, who thereupon grants letters of administration to the person proposed for the office, who will have to make affidavits of the assets and debts, and sign the prescribed oath. He will then pay the debts owing by the deceased, and distribute the remainder of the estate in accordance with the various Acts dealing with the property of intestates. Copies of all wills that have been proved can be seen at Somerset House by any one on payment of the fee of 1s. See **LAW**, '99.

Winchester, Bishop of. See under **PEERAGE**.

Winchester College, the oldest of our public schools, founded (1387) by William of Wykeham, as a nursery for the "New College" he had recently founded at Oxford. It is certain, however, that some years before that date Wykeham was maintaining and educating poor scholars, and the actual date of the opening of the College was March 26th, 1393. About a dozen vacancies yearly occur for **foundations**, who are elected by the governors after open competition. Her Majesty gives two gold and two silver medals to be competed for. Tenable at the Universities are four **exhibitions** of £50 for four years, and at New College, Oxford, six **scholarships**. The quincenary

of the College, its 500th anniversary, was observed on "Domum Day," July 25th, '93. **Head Master**, Rev. W. A. Fearon, D.D. **Motto**, *Manners maketh man*.

Windward Islands, The, so called in distinction from the Leeward Islands (*q.v.*), with reference to the trade winds, form part of the Lesser Antilles. They include Grenada, the Grenadines, St. Vincent, and St. Lucia (all of which see under their respective alphabetical headings). Barbados and Tobago, which formerly belonged to the group, were separated in '85 and '89. All the islands are under one governor, but each has its own administrator and separate constitution. See **BRITISH EMPIRE** (table), **DIPLOMACY**.

Wingfield, Sir Edward, Permanent Under-Secretary at the Colonial Office, recently succeeded the late Sir Robert Meade, having been promoted from the position of Assistant Under-Secretary, which he had held since 1878. He is the fourth son of Mr. John Muxloe Wingfield, of Walcot, Bath, and was b. in '34. He was educated at Winchester and New College, Oxford, of which he was a fellow from '50 until '72. In '59 he was called to the Bar at Lincoln's Inn. He was created a K.C.B. in Jan. '99.

WIRELESS TELEGRAPHY.

This method of telegraphic signalling involves the absence of continuous wires, but only between the stations selected, and to this feature it owes its name. Professor O. Lodge, F.R.S., says it insists on calling itself "wireless," and the term, it must be admitted, is a misnomer. As, however, it shows every intention of staying with us, the amiable criticisms of eminent electricians must perforce remain ineffectual. Wireless telegraphy is a remarkable instance of the development and interpretation of laboratory experiments. The scientific investigations of Hertz, based upon Clerk Maxwell's splendid theoretical assumptions, culminated in '87 in the discovery and demonstration of the existence of electro-magnetic radiation. Electric wave motions, like waves of light, can be reflected, refracted, and polarised; while beyond this they can pass through rock masses and certain other intervening substances. Electro-magnetic wave-telegraphy is one of the mechanical analogues of these travelling, propagating, electric waves. Our space will only permit a very short description of the apparatus by means of which this electric force is detected, intensified, and transmitted in trains of waves, to be finally expressed in the terms of a code. The *rationale* of the method may be conveniently studied elsewhere, as indicated at the foot of this article. A large number of workers have busied themselves with developments, notably Lodge, Branly, Righi, Marconi (see separate biography), and others. The last-named is, however, particularly identified with the method now in use. It was he who studied the subject with a view to commercial utilisation, covering his various appliances by patent rights. His specification is headed—"Improvements in transmitting electrical impulses and signals, and in apparatus therefor." According to the preamble, "electrical actions or manifestations are transmitted through the air, earth, or water, by means of electric oscillations of high frequency." An exciter (transmitter) and detector (receiver) are essen-

tial features of his apparatus. As regards the exciter, imagine two fairly large solid brass spheres placed side by side in suitable fixtures; on either side, in the same horizontal line, two small brass spheres, the whole forming one piece of apparatus. From each of the two small spheres runs a wire connecting up with that well-known induction instrument, the Ruhmcorff coil; this again in turn being excited by an electrical battery, thrown in and out of circuit by a Morse key. Now, what happens is, that this transmitter in electrical action conveys trains of rapid electric wave impulses into space. We can reflect and refract them, and screen them off if we choose. Now take the receiving station, where is the delicate detector, often called *coherer* apparatus. Its essential feature is a hermetically sealed glass tube containing a metallic powder. When the space waves impinge on the tube, the particles agitate themselves, and rearrange—or, as it is called, *cohere*—and then decohere, and electrical continuity is set up. This enables the operator to gather up and interpret this electrical force by means of a dot-and-dash signal. If a long vertical wire is run up from the base line, where the receiving apparatus is being worked, the sensitiveness of the coherer to atmospheric waves is enhanced.

In '96 Signor Marconi, under good Italian credentials, was able to prevail upon the British Telegraph Department to allow him to make experiments in the system; and from the first he derived encouragement from the sympathetic attitude of Mr. (now Sir W. H.) Preece, then chief electrician to the Post Office. Early work was done on Salisbury Plain, across the Bristol Channel, and between Alum Bay and Bournemouth (a distance of 16 miles). Then followed a considerable extension of the Marconi trials. At the close of '98, under the auspices of the Wireless Telegraph and Signal Co., and with the permission of the Trinity House, experiments were set on foot between the South Foreland lighthouse and the East Goodwin lightship, distant 12 miles the one from the other, and communication was established. The *Times* of March 20th, '99, contained a notification of the first message exchanged between France and England. It ran thus:—"Wimereux, March 28th. Communication between England and the Continent was set up yesterday morning by the Marconi system of wireless telegraphy. The points between which the experiments are being conducted are South Foreland and Wimereux, a village on the French coast, two miles north of Boulogne, where a vertical standard wire, 150 feet high, has been set up. The distance is 32 miles. The experiments are being carried on in the Morse code. Signor Marconi is here conducting the trials, and is very well satisfied with the results obtained." It will be seen that a very important stage in experimental work was here reached. It was immediately followed by successful demonstrations made during the '99 Naval Manœuvres. The meeting of the British Association was also the occasion for trials, during an evening lecture on Sept. 18th, at the hands of Professor Fleming, F.R.S., and these were eminently successful. Messages passed from the Town Hall, Dover, where the telegraph installation had been effected, across the Channel to Wimereux, thence by ordinary wire to the Electrical Congress sitting at Como. A similar message sent to Wimereux was

passed on by telephone to Boulogne to the French Association. For reference sake, and as exemplifying what time may show to be the most useful and practical outcome of the system, it may be recorded that Professor Fleming caused the transmitter to send the following question to the East Goodwin lightship at 10 p.m. from the lecture room: What kind of night is it on Goodwins? Are you all right? Do you want the lifeboat sent? Reply at once. Town Hall, Dover." Ten minutes or so afterwards the answer came, and was interpreted to the audience. These pretty and successful experiments brought into prominence many side issues, as it were, of the system, among which were the parallel influences set up by the transmitted signals. Professor Fleming informed the public through the *Electrician* that, as certain occasional signals were received and recorded at the Marconi station established at Chelmsford, the evidence seemed to show that they had made their way from Wimereux. Careful tests were made, which resulted in the transmission of excellent signals and messages from Wimereux to Chelmsford, this distance being about 85 to 90 miles. It was stated that a year or two hence wireless telegraphy over 500 miles might not be an unfamiliar thing. While we are thus promised so much, it is well to observe reservations. Wireless telegraphy certainly cannot be expected to replace the older, convenient, and confidential continuous wire, or metallic-circuit system. At present a submarine cable can transmit a message at the rate of 600 words per minute, whereas the Marconi telegraph is limited to about 20 words per minute. So far as one can foresee, its applications to practical purposes will be restricted, but they are nevertheless of the highest importance. Developments may be expected in connection with communications between the shore and lightships or moored vessels and lighthouses on the mainland. The tardy movements of officialism in this respect have been deprecated. In fleet manœuvres it may claim adoption for signalling between ship and ship, and at the same time with stations on the coast. It may also find some objective in war. It was understood in Nov. '99 that experiments in this direction were contemplated in South Africa. As in the case of the Röntgen rays, the literature of the subject is advancing greatly; but if any selection may be made, consult "The Work of Hertz and his Successors," by Professor O. Lodge; "Wireless Telegraphy," by R. Kerr; "A History of Wireless Telegraphy, 1838—1899," by J. J. Fahie; and *Journ. Elect. Eng.*, No. 139.

Wolseley, Lord. See under PEERAGE.

WOMEN, HIGHER EDUCATION OF.

The Higher Education of Women has made great advances since the Report of the Royal Commission on Secondary Schools was issued in 1868. The National Union for Improving the Education of Women, formed under the presidency of the Princess Louise, in consequence of that report, founded in '72 the Girls' Public Day School Company, which, with the Church Day Schools Company, has raised the standard of girls' education throughout the land, and prepared the way for the Higher—that is, University and College—Education of Women. These two Companies have now 64 schools and 1200 pupils,

entirely taught and officered by women, many of whom have had a college training. The National Union founded, in '77, the Teachers' Training and Registration Society, out of which has grown the **Maria Grey Training College**, Salusbury Road, Brondesbury (Principal, Miss Alice Woods). The Winkworth Hall of Residence for students in this College was opened in Sept. '99 (Warden, Miss Mabel Case); fees from 36 to 48 guineas per session. The **Cambridge Training College for Women** was incorporated Jan. '93 (Principal, Miss Margaret Punnett), and the **St. George's Training College**, 5, Melville Street, Edinburgh (Principal, Miss M. R. Walker), was opened in '86. Bursaries are provided at all these colleges for students in need of such help. **St. Leonard's School**, **St. Andrews**; **Roedean School**, Brighton; and **Wycombe Abbey**, Bucks, are large residential establishments founded to give to girls similar advantages to those open to boys in our great public schools.

Oxford and Cambridge now offer many facilities to women desiring advanced education. At **Cambridge** the triposes, or honour examinations for the B.A. degree in mathematics, classics, natural science, moral science, history, mediæval and modern languages, law, Semitic languages, Indian languages and theology, have, since '81, been open to women. The conditions of entrance are (1) residence for a specified number of terms (five to thirteen, according to circumstances) either at **Girton** or **Newnham College**, or within the precincts of the University, under the regulation of one or other of these colleges; (2) a pass gained at either (a) certain parts of the higher local examination, or (b) the University Previous examination ("Little Go"), or any examination which ordinarily excuses a member of the University from this. To all women who pass any one or more of these triposes, certificates are formally granted by the University, declaring that they have attained the standard of a first, second, or third class in an honours examination for the B.A. degree; but this degree is not conferred upon them. Candidates who attain a standard equivalent to that required for the ordinary B.A. (or "Poll") degree, receive a certificate to this effect. **Girton College** (Mistress, Miss Welsh) was founded at Hitchin in '69, removed to Cambridge in connection with the Association for Women's Lectures in Cambridge, and incorporated in '72. It now numbers about 115 students, with seven resident women lecturers, a vice-mistress, a junior bursar, and a librarian. Entrance and scholarship examinations are held in London in the months of March and June. The income from the Pfeiffer Bequest of £5000 is devoted to scholarships. Students can attend University lectures in Cambridge, in addition to those provided by the college. The college fees (inclusive of both university and college charges) are £105 per annum. An extension of the College buildings is now ('99) in progress. The South Hall, **Newnham College**, Cambridge (Principal, Mrs. Sidgwick), was opened in '75, and incorporated in '80. The North Hall (Vice-Principal, Miss B. A. Clough) followed in '80, Clough Hall in '88, and the Pfeiffer building in '93; 167 students and 12 resident tutors form the collegiate body. A small isolation hospital is built to receive any cases of infectious illness that may arise. A beautiful and con-

venient library, the gift of Mr. and Mrs. Yates Thompson, has lately been added to the College. An entrance examination is held annually in March at Cambridge in mathematics and languages. Scholarships and exhibitions are awarded yearly to students for the various tripos examinations. No student, unless reading for a tripos examination, with a reasonable prospect of obtaining honours, is allowed to reside at the college for more than two years without special permission. Fees, inclusive of board, lodging, and teaching, are from £25 to £32 per term. Women are admitted by the Council as out-students of the college if they either (a) reside with their parents or guardians in Cambridge, or (b) are not generally resident in Cambridge, but are *bonâ fide* students, pursuing definite study, over thirty years of age, unable to afford the cost of residence in one of the halls, or in other exceptional circumstances, and accustomed to support themselves. Out-students' fees are about £9 per term. Application for admission as out-students should be made to Miss M. G. Kennedy, Shenstone, Cambridge, before Sept. 1st in each year. A scheme of correspondence teaching was inaugurated in '70 by Mrs. Peile, and numbers students in all parts of the world. Information respecting it can be obtained from Miss M. Bateson, 74, Huntingdon Road, Cambridge.

In **Oxford** the principal final honour examinations of the University (in classics, natural science, history, mathematics, jurisprudence, theology, Oriental studies, the degree of B.C.L., and the examinations for the degrees of Bachelor and Doctor of Music), are open to women. In modern languages, where no final honour examination for the B.A. degree is as yet provided by the University, a special women's honour examination is held, with a standard equivalent to that of the University honour degree examinations. The second public examination (pass degree) of the University is open to women, as well as Pass Moderations. Before a candidate can enter for either pass or honours, Responsions must be taken, unless some equivalent (as the Cambridge "Previous," the higher examination of the Oxford and Cambridge Board, the London matriculation, the final pass of the University of Ireland, the Victoria University entrance examination, the Cambridge higher local in two languages of group B and group C, or the Oxford senior local in two languages, and mathematics) has been passed. Graduates of Colleges which are admitted to membership in the Association of Collegiate Alumnae (U.S.A.) are excused this examination if they become candidates for honours at the second examination. Certificates are awarded as the result of the examinations, and in the case of honours the names are entered in the *University Gazette*; but the B.A. degree is not conferred upon women. Communications should be addressed to the Secretary, H. J. Gerrans, Esq., Clarendon Buildings, Broad Street, Oxford. The University, in '97, established in Oxford a professional examination for teachers, and arranged a course of Training in Theory and Practice of Teaching. To both of these women are admitted on precisely the same terms as men (apply to Miss A. J. Cooper, 22, St. John Street). **Somerville College**, Oxford (Principal, Miss Maitland), founded in '79, incorporated '81, the name changed from "Hall" to

"College" '94, has 70 students, 5 resident tutors, and a librarian. There is no entrance examination, but all students are expected to pass "Responsions" before entering the college, unless they have passed one of the examinations accepted as equivalent. Fees, inclusive of board, lodging and teaching, vary from £86 to £92, according to the rooms selected. The college is undenominational in principle. The Council confers certificates showing all the examinations passed by the student, recording the term of residence, and stating that the student has qualified for the Degree. Students who have resided three years and taken honours become members of the College (on payment of a small fee, and by keeping their names on the books) with right of voting at general meetings and elections of Council. **Lady Margaret Hall, Oxford** (Principal, Miss Wordsworth), was also founded in '79. It is conducted on the principles of the Church of England, with provision for the liberty of members of other religious bodies, and numbers about 47 students and 3 resident tutors. Candidates for entrance, who have not yet passed Responsions, or an equivalent, are expected to pass an entrance examination in two foreign languages and elementary mathematics. Scholarships are offered each June. **St. Hugh's Hall, Oxford** (Principal, Miss Moberley), founded in '86, is intended for students unable to bear the expenses of Lady Margaret Hall, and has about 25 students and 1 tutor. The fees for board and lodging, exclusive of tuition, are from £45 to £65 a year. The conditions of entrance are the same as for Lady Margaret Hall. **Lecture arrangements** for women in Oxford are under the management of a joint association for educational purposes, consisting of representatives of the women's college or halls of residence, and of the home students, with the tutors in the principal subjects, and others interested in education. A member of the Hebdomadal Board sits as a member of this association (Secretary, Miss A. M. A. H. Rogers). Unattached students are allowed, under certain conditions, to reside in Oxford under the censorship of Mrs. A. H. Johnson, 8, Merton Street. A system of teaching by correspondence (apply to Mrs. A. H. Johnson) was set on foot in '83, and a scheme of teachers' training is under the management of Mrs. Scott, Merton College. "St. Hilda's" (Lady Resident, Mrs. Burrows), is a Hall of Residence for old Cheltonians and others who may desire a final year or more of study before entering on professional work. Twenty-one students are now in residence. The charges are similar to those at Somerville College and Lady Margaret Hall.

The University of London confers its degrees equally upon men and women. Women students are received at the **Royal Holloway College, Egham**, opened in '87 (Principal, Miss Emily Penrose). The object of the college is to provide the instruction necessary for the London degrees in science and arts, the preliminary M.B., the examinations of the University of Oxford, and of the Royal University of Ireland. Instruction in music, drawing, and painting is provided. The entrance examination, held in September, includes English, foreign languages, and arithmetic. Scholarships are competed for in July. All scholars must read for honours. Other students are under no such restriction. There are 114

students, 8 resident women lecturers, and 12 non-resident professors and teachers. Terms, inclusive of board, lodging, and instruction, are £90 per annum. No student may enter for less than one year, or reside for more than four years, without special leave. **Bedford College, London**, incorporated '49 (Principal, Miss Ethel Hurlbatt), offers scholarships and prepares resident and non-resident students for the London degrees in arts and science. The final courses in Chemistry and Physiology are recognised as qualifying for the first M.B. The College also provides courses for students wishing to pursue continuous study without seeking a degree. Students are also admitted to separate classes. It receives an annual sum of £1200 from the "Grant to the University Colleges of Great Britain." £4000 has also fallen to its share from the Pfeiffer Bequest to be expended in scholarships, and an annual grant of £500 from the Technical Education Board is used for the equipment of the laboratories. Fees for board and residence from £58 to £68 per annum. Tuition fees for the London examinations from £27 to £48 a session. Students are not received into residence under seventeen, and, if necessary, have their acquirements tested by preliminary examination. An art school (Professor George Thomson) is attached to the College, as well as a Teachers' Training Department (Head, Miss H. Robertson, B.A.). With the session of '95-6 there was instituted a complete and scientific course of instruction in Hygiene, to enable women to qualify for the various professional posts in Hygiene now open. Free public lectures are given during the Michaelmas and Lent terms. The teaching staff consists of the Principal, 17 lecturers and 6 assistants. The College celebrated the completion of its fiftieth year of existence in June '99. The Ladies' Department of King's College, Kensington Square (Lady Superintendent, Miss L. M. Faithfull), provides lectures and classes as preparation for the London and Oxford examinations. A residence for students is under the charge of Miss E. Faithfull. **Westfield College, Hampstead**, founded in '82 (Mistress, Miss Maynard), receives about 40 students; but they are not compelled to take the entire course, or to enter for any University examination. Candidates are required to pass an entrance examination in Scripture, English, arithmetic, and geography, with two extra subjects (languages and mathematics), unless they have passed some equivalent. Fees, £105 per annum. Students of University College, London, or of the London School of Medicine for Women, can reside, under collegiate rules, at College Hall, Byng Place, Gordon Square (Principal, Miss Grove).

Victoria University follows the example of London in conferring its degrees upon women. (Secretary of the Women's Department, Miss Edith Wilson, 223, Brunswick Street, Manchester.) A hall of residence (Ashburne House, Victoria Park, Manchester) (Warden, Miss H. Stephen) was opened in Oct. '99. Fees for board and residence 12 to 20 guineas per term of 11 weeks. Three bursaries are offered. A hall of residence for women in Liverpool is open to students. Fees for residence, £40 to £55 per annum. College tuition fees, £20 to £25 per annum (Warden, Miss Dorothea Pease, 163, Edge Lane, Liverpool). The provincial colleges of Birmingham, Bristol, and Nottingham also provide for women (Warden

of the women students at Bristol, Miss Earle). No hall of residence as yet. The University of Durham, since '95, by special Supplementary Charter, grants degrees to women except only in Divinity. A women's hall of residence was opened in Oct. '99 (Warden, Miss Roberts). Scholarships for women students are offered in October of each year. Apply to the Censor of Women Students, Mrs. Ellershaw, 46, North Bailey, Durham. The Durham College of Science at Newcastle-on-Tyne (Secretary, H. F. Stockdale), represents the faculties of science medicine, and engineering in the University of Durham, and is open to students of either sex. A University Hostel for women is open at Eslington Tower, Jesmond, Newcastle-on-Tyne (Mistress, Miss Perry). Fees for board and residence from £30 to £40 per session. In Ireland the Royal University of Ireland (Dublin) offers degrees to women, and also exhibitions and scholarships: Alexandra College, Dublin (Warden, Dr. Dickinson; Lady Principal, Miss White). In Scotland the University of St. Andrews grants the degree of LL.A. to women on the result of examination in the subjects taught in the University, together with history, music, fine arts, æsthetic, modern languages, and the natural sciences. University Hall (Warden, Miss L. I. Lumsden), opened Sept. '96, accommodates 24 students. Fees for board and residence about £60 per annum. Scholarships, value from £40 to £15, are competed for in October. At Edinburgh University (*q.v.*) women are admitted to the Arts classes with the men, and on the same terms as regards academic privilege. The University Hall, 457, Lawnmarket, Edinburgh, inaugurated June '94, is intended for the accommodation of women students of the University, artists, teachers, and others. All particulars of Mrs. Salmon, 8, Ramsay Garden, Edinburgh. **Queen Margaret College, Glasgow** (Hon. Secretary, Miss T. A. Gallo-way), by recent incorporation is now the women's department of the University of Glasgow as a non-resident college for women governed by the University Court and Senate. Women are there prepared for all degrees in arts and medicine of Glasgow. Matriculated students are entitled to vote for the Lord Rector of the University, and women graduates become members of the General Council of the University. For a small fee students can have the use of the University library, with access to the University museum and chapel, and, in part, the use of the laboratories. A large new building for the anatomical department was added to the College in '95, erected by means of a gift of £5000 from the Bellahouston Trust. Queen Margaret Hall, with an average of 25 students, provides at a moderate cost a residence for students attending Queen Margaret College. Clinical work is done at the Royal Infirmary and other local hospitals. Particulars from Mrs. Riddock, 2, Lawrence Place, Dowanhill, Glasgow. Terms for board and residence from £32 to £40 per annum. At the University of Aberdeen a hall of residence is now open in Don Street, Old Aberdeen (Hon. Secretary, Lady Geddes). Average fees for M.A. or B.Sc., £9 9s. per annum. Residence fee, £1 1s. to £1 6s. per week. The Hall is near to the King's College, the seat of the arts classes.

In South Wales the classes of University College, Cardiff, in arts, science, and medicine

are open to students, men and women alike, with scholarships. Women students are received at Aberdare Hall (Principal, Miss Kate Hurlbatt). Terms for board and residence from £30 to £40 per annum. "Normal" students in school management, etc., may reside in Aberdare Hall, and spend the necessary time in teaching in the Board Schools of the town. A school of cookery and a Secondary Training Department is attached to the College. Scholarships are competed for in September. The University College of North Wales (Bangor) gives the same advantages to women as to men in preparation for the London and Welsh degrees and for the medical preliminaries of Edinburgh and Glasgow. A new University Hall for Women Students (Lady Superintendent, Miss M. Maude) was opened in '97. Open entrance Scholarships (from £30 to £10 in value) are offered to men and women alike. **University College, Aberystwith**, prepares for the requirements of the London and Welsh examinations for B.A., M.A., B.Sc., for degrees in medicine, and the entrance examinations of the older universities. Entrance scholarships, open to women, are competed for annually. Alexandra Hall of Residence (Principal, Miss E. A. Carpenter) has rooms for 147 students.

For the special study of medicine, women are eligible for the medical degrees of the University of London (Burlington Gardens, W.), the Royal University of Ireland (Earlsfort Terrace, Dublin), the conjoint examination of the Royal College of Physicians and the Royal College of Surgeons in Ireland (Dawson Street, Dublin), the Colleges of Physicians and Surgeons, **Edinburgh**, the Faculty of Physicians and Surgeons, **Glasgow** (conjoint), the Society of Apothecaries, London, and the University of Durham. It is easier, and takes a shorter time, to pass the colleges than the Universities, but by the regulations ('92) five years instead of four is the required period for which a student must be registered as such. Students are not admitted under the age of eighteen, and, unless matriculation has been taken, a preliminary examination in English, Latin, and one other language, elementary mathematics, and arithmetic, has to be passed before registration. The necessary hospital work in the case of London can be done at the New Hospital for Women, 144, Euston Road, or at the Royal Free Hospital. In Scotland and Ireland women students are admitted to the local hospitals. At the Royal Infirmary of Edinburgh arrangements are made for the clinical education of women, giving accommodation according to the demands of the Triple Qualification Board, £300 having been raised and presented to the Infirmary in recognition of the "fact that women students have been admitted to qualifying instruction in its wards." All particulars and details of study are obtainable from the Secretary, Miss Heaton, **London School of Medicine for Women**, 8, Hunter Street, Brunswick Square, W.C. Valuable scholarships are annually competed for at the London School in September. In addition to College Hall (see above) there are boarding houses for medical students (women) at 3, Endsleigh Gardens, W.C. (Mrs. Greene) (fees, 20 guineas per term of 12 weeks), at 5, Endsleigh Street, W.C. (Mrs. Clarke Kerr), and at 23, Mecklenburgh Square, W.C. (Mrs. Lamborn Cock). As

has been mentioned above, instruction in medicine is given to women by the faculties of the University Colleges at Cardiff, Bangor, Aberystwyth, and Newcastle-upon-Tyne.

Women, International Congress of. This Congress, held in London during the last week of June and the first week of July '99, was a remarkable demonstration of the proportions the women's movement has attained to in recent years. The origin of the Congress was the "Women's Whisky War" in America in '73. Women discovered that intelligent organisation was as necessary as zeal if any permanent reform was to follow their efforts, and the movement for co-operation begun then has gradually so widely developed that every subject in any way affecting women was included in the programme laid before the International Congress at its second meeting in '99. The Countess of Aberdeen presided over the Congress as a whole, but each section had its own president, who took the chair at the various meetings, while specialists in each department were appointed speakers. The sections represented were:—Industrial, Educational, Social, Professional, Political, Artistic, Literary, Dramatic, Handicraft, and others. The Congress carried on its work simultaneously at the Westminster Town Hall, the Church House, Westminster, and St. Martin's Town Hall during the entire ten days of its sittings, and thus not only overtook all the business arranged for, but was also able to accommodate for the most part the crowds of the general public anxious to be present, as well as the large numbers of delegates. These delegates came from every part of the world, and represented either Women's National Councils already in existence or countries where such were in process of formation. Every European tongue was to be heard on the platform, and costume of all nations rendered the assembly a picturesque one. The countries sending delegates included the United States, Canada, Germany, Sweden, Great Britain and Ireland, New South Wales, Holland, Tasmania, France, Switzerland, Belgium, Italy, Russia, Austria and Hungary, Norway, Victoria, South Australia, Queensland, West Australia, the Cape, India, China, Persia, the Argentine Republic, Palestine, and Iceland. In a brief summary such as this, it is impossible even to name all the topics treated of by the Congress. The discussions on literature, agriculture, and handicrafts for women were amongst those most attractive to the outside public. That on the drama brought the largest attendance, it being found impossible to admit all those who wished to be present. The time devoted to social, industrial, and educational subjects was probably the most productive of results, the experiences and ideas interchanged being such as are likely to prove valuable in future efforts at reform in these departments. A notable feature of the Congress was the seal of approval set upon it by Her Majesty the Queen, who invited the delegates to Windsor and was graciously pleased to wish them success in their labours. Special Church services were also held in connection with the Congress on the Sunday of its visit to London. The Congress—which numbers 1,250,000 members, of whom 125,000 are men—will hold its next meetings at Berlin in 1904, with Mrs. May Wright Sewell as president. It may be considered to have represented the highest stage

of development yet reached in the organisation of women in the interests of their own sex.

Women, Organisations for Young. See YOUNG WOMEN, ORGANISATIONS FOR.

Women's Clubs. See CLUBS.

Women's Industrial Council, The, was established in 1894 to organise special and systematic inquiry into the conditions of working women, to provide accurate information concerning these conditions, and to promote such action as may seem conducive to their improvement. The Council is conducted on lines strictly non-sectarian and independent of party, and endeavours to avoid encroaching upon the special province of work of any societies which may affiliate themselves to it. A General Purposes Committee, and Finance, Investigation, Educational, Statistical, Organisations, Legal and Statistical Committees carry out the details of the work, which has included exhaustive inquiries into home-work industries, wage-earning of children of school age, the typing profession, and other women's industries; the establishment of a Central Circulating Library for London Girls' Clubs; and an Association of Trained Charwomen. The Council is promoting the "Bill for the Better Regulation of Home Industries, introduced into the House of Commons in July last by Colonel Denny, Mr. John Burns, and others. Attached to the Council is a large staff of voluntary lecturers upon industrial questions, and free legal advice is given to women and girls on matters connected with industrial law. The Council meets quarterly, the committees generally monthly. Membership is by election of the Council on nomination of two members. The funds are provided by a small income from a trust fund, and by subscriptions and donations. The *Women's Industrial News* (quarterly) is the official organ of the Council. President, The Countess of Aberdeen; Vice-Presidents, Miss Clementina Black, Mrs. Hicks, Mrs. F. G. Hogg, Mrs. R. Phillimore, Mrs. Percy Thompson, Lady Henry Somerset, Mr. Stephen N. Fox, Mr. Herbert Burrows, and Mr. J. A. Baines; Treasurer, Mr. Sydney Buxton, M.P.; Financial Secretary, Mr. Robert S. Garnett; General Secretary, Miss Catherine Webb. Office, 12, Buckingham Street, Strand.

Women's Institute, The, 15, Grosvenor Crescent, Hyde Park, was founded in the spring of '97. It is non-political, and is specially intended as a place of reunion for workers. Under its roof various important departments of work are carried on. Social and musical afternoons, conferences on literary and philanthropic subjects are arranged weekly. The general programme includes lectures, debates, and concerts. In the Reference Library, reliable works on such subjects as domestic economy, hygiene, school boards, education, boards of guardians, etc., may be consulted. There is a General Information Bureau available for non-members as well as members, on payment of a small fee. Research work of all kinds is undertaken by this department. The Institute also trains ladies as secretaries, and has a Secretarial Bureau, from which highly qualified stenographers may be obtained. There is a general agency for members' requirements. Trained lecturers on constitutional history, local government, hygiene, etc., are also sent out from the Institute. The departments include musical, art, and recreation societies. The Institute

also forms a centre for the meeting of representatives of Associated Societies.

Women's Suffrage. The Women's Liberal Federation is the body which in this country most authoritatively supports, amongst organisations having a party character, the claim of women to the suffrage. In May '92, at the annual meeting of the Federation, a resolution was carried instructing the executive committee to promote the parliamentary enfranchisement of women among the other Liberal reforms then before the country. A divergence of opinion occurred over this question, and Mrs. Gladstone, the President, decided not to stand for election again, Lady Aberdeen being chosen in her place. Ultimately the Women's National Liberal Association was formed for the promotion of the official Liberal programme simply, Women's Suffrage not being put prominently in the front of the programme. The Women's Liberal Federation, however, proceeded to emphasise their position at the annual meeting in May '93 by making Object II. of their Constitution read thus:—"To promote just legislation for women, including the local and parliamentary franchise for all women, married, single, or widowed, who possess any of the legal qualifications which entitle men to vote, and the removal of all their disabilities as citizens." There are about 501 associations connected with the Federation, with an aggregate membership of 80,000. In the autumn of '97 a reorganisation of the Women's Suffrage Societies took place. They now all form one National Union of Women's Suffrage Societies, with a representative executive meeting at one or other of the Central Offices in London, viz.: The Central and East of England Society, 20, Great College Street, Westminster, of which Miss Edith Palliser is Secretary, and the Central and Western Society, 39, Queen Victoria Street, of which Mrs. Charles Baxter is Secretary. The Union, which is strictly on a non-party basis, aims at placing Women's Suffrage in such a position that no Government of whatever party shall be able to touch questions relating to representation without at the same time removing the electoral disabilities of women. In the Colonies the movement has made considerable progress, and in New Zealand and South Australia the goal has been reached. In the former the parliamentary franchise was conferred on women Sept. 9th, '93, the municipal franchise being already theirs. In South Australia the Parliamentary vote was extended to women Dec. 18th, '94.

Women Teachers, Joint Agency for, under the management of a committee appointed by the Teachers' Guild, College of Preceptors, Association of Head Mistresses, Association of Assistant Mistresses, and Private Schools' Association. Established to enable teachers of all kinds to find work at moderate cost. Registrar, Miss Agnes G. Cooper; Office, 74, Gower Street, London, W.C.

Wood, General Sir Evelyn, V.C., G.C.B., G.C.M.G., was b. at Cressing in 1838, and entered the Navy in '52. Served in the Crimea, and was severely wounded at the assault on the Redan. In '55 he joined the Army as cornet of the 13th Light Dragoons. Served in India in 17th Lancers, and, while commanding the 1st Regt. of Beatson's Irregular Horse, won the Victoria Cross, '59. Served throughout the Ashantee war. Previous to the Zulu war he joined the Middle Temple, and was called to

the bar '74. After defeating the Zulus at Kambula, he became brigadier-general, and was present at Ulundi. In '79 he met with a triumphant reception in England, and became K.C.B. Served through the Transvaal war as major-general, and was one of H.M.'s Commissioners for settling the Transvaal limits ('81). Created G.C.M.G. Commanded the 2nd Brigade, 2nd division, in the Egyptian expedition, receiving the thanks of Parliament in '82. Raised the Egyptian Army in '83, and served in Nile expedition. From '89 to '93 he commanded the Aldershot district, from '93 till '97 he was Quartermaster-General, and was in Oct. '97 appointed Adjutant-General. He has published a book on his reminiscences of the Crimea, "Cavalry in the Waterloo Campaign," and "Cavalry Achievements." Clubs, Army and Navy, United Service. Address, 23, Devonshire Place, W.

Woods, Rev. William James, B.A. (Lond.), the Secretary of the Congregational Union of England and Wales, commenced preaching in village stations around Leicester, in which town his father was a Congregational minister, and received ministerial training at New College, London, '68-74. He took his B.A. in '72, and on the completion of his college course became pastor of the influential Congregational Church at Spencer Street, Leamington, removing in '81 to Cavendish Chapel, Manchester, one of the largest Congregational Churches in the North of England, and from '58 to '69 the sphere of Dr. Joseph Parker's ministry. While there a temporary breakdown in his health necessitated a voyage to Australia. On his return he published "A Visit to Victoria." In '87 he became pastor of Clapton Park Congregational Church, London, which position he held until, in '92, he succeeded the late Rev. Alexander Hannay, D.D., in his present office. Address: Memorial Hall, Farringdon Street.

Woollens and Worsteds. See TRADE, '99. Worcester, Bishop of. See under PEERAGE.

WORKMEN'S COMPENSATION ACT, '97.

The Legal Aspect.

The Workmen's Compensation Act, '97, is a bold attempt to deal in a large and liberal spirit with the vexed question of Employer's Liability to an injured workman. It has not only wrought extensive changes in the law as it existed prior to the passing of the Act, but it has also introduced principles which are novel in the law of England. There are three periods in the history of the law regulating the liability of an employer to his injured workmen; and the law as it stands to-day is best understood by seeing what the law was in each one of those periods, and by tracing the steps which were taken to alter it. The first period was the period prior to '80, when the liability of an employer to his injured workmen was regulated by the common law of the land alone, and by no statute. The second period was the period between '80 and July 1st, '98, when the liability of an employer to his injured workmen was regulated by the Employers' Liability Act '80, in addition to the common law. And the third period is the present, in which, in addition to the common law and the Employers' Liability Act '80, there has come into force the Workmen's Compensation Act '97.

Period of the Common Law.

Under the common law, as under every law, the employer is liable to an injured workman if the injury is caused by the employer's own personal negligence—which negligence may be either in the active conduct of the work or in the choice of servants to perform the work. In modern conditions of industry it rarely happens that an accident is caused by the personal negligence of an employer while engaged actively in the work; and when it does so happen, the employer is usually so small a man financially that a judgment against him is of no practical value to the injured workman. Equally rarely does it happen that an employer is negligent in the choice of his servants, or in the choice of those to whom he delegates his authority and to whom he leaves the duty of superintendence. Self-interest prevents it. It has, in consequence, almost invariably happened that the negligence upon which the injured workman must base his claim is the negligence not of the employer himself, but of one of the servants of the employer. It followed as a result of this that the legal advisers of the employer began to set up the defence which is known as the **Defence of Common Employment**. This defence is based in principle upon the old Roman doctrine, *Volenti non fit injuria*. It is a well-established rule of law that an employer, or any other individual, is liable for damage arising from the negligence of his servants if the servants when guilty of negligence are about their master's business; because a master is bound to guarantee the public against all damages arising from the negligent acts of his servants, on the ground that it is the master's duty to choose servants who will not be negligent, and to ensure that his business is carried on in a careful manner. It is an equally well-established rule of law that when any individual knows the risks of injury which he is incurring, and nevertheless with that knowledge chooses to incur those risks, he must be presumed to have taken those risks upon himself, and he cannot, if he is injured, recover compensation for his injury. This is the foundation of the doctrine that a man is not liable to his workman for injury caused to that workman through the negligence of a fellow-workman. It is easy to see how much hardship to injured workmen this doctrine entailed, and consequently there sprang up in the country a strong and widespread desire to find some remedy. It was definitely held that this doctrine was the rule of law in '58 by the House of Lords, in the case of *Bartonshill Coal Co. v. Reid*; and almost immediately efforts were made to amend the law, and from '72 onwards the various attempts to abolish the defence of common employment were almost annual. In '79 a Bill was introduced by Lord (then Mr.) Brassey, which was not proceeded with, but which was the foundation of the Bill which, in the following year, became the

Employers' Liability Act, '80.

The principal change wrought by this Act was, that in certain cases an injured workman was put upon the same footing as an injured stranger, and to that extent at least the doctrine of common employment was abolished. The Act enacts that an injured workman shall have the same rights against the employer as

an injured stranger would have if his injury has been caused—(1) by any defect in the ways, works, machinery or plant which has not been discovered or remedied owing to the negligence of the employer, or of some person in the service of the employer who is entrusted by the employer with the duty of seeing that the ways, works, machinery and plant were in proper condition; (2) by the negligence of any person in the service of the employer who has any superintendence entrusted to him whilst in the exercise of that superintendence; (3) by the negligence of any person in the service of the employer to whose orders or directions the workman was bound to conform, and did conform, and where the injury resulted from his having so conformed; (4) by reason of the act or omission of any person in the service of the employer done or made in obedience to any improper or defective rules, bye-laws, or instructions of the employer; (5) by the negligence of any person in the service of the employer who has the charge or control of any signal, points, locomotive engine or train upon a railway. The Act is, however, limited in its scope. It does not apply to servants who are not employed in manual labour—e.g. clerks; nor does it apply to domestic or menial servants or to seamen. The amount of compensation recoverable is limited in amount; and there is no provision in the Act prohibiting employers and workmen from contracting themselves out of the Act. As may well be imagined, the Act was greeted on the one hand by a storm of opposition from the employers, and on the other hand by support, coupled with strongly expressed discontent at its limited scope, from the leaders of labour. Like all measures of progress, it bore in the eyes of some individuals the appearance of a measure of plunder; but it has been tried for eighteen years, and experience has shown that it has not brought ruin upon employers nor disaster upon the trade of the country. It has proved all the more beneficial in that it was partial and tentative in its scope, and was treated as an experiment which, if proved successful, would lead to still greater reforms. It was not long before the representatives of the workmen began to agitate for an extension of the principle of the Act. Their principal demands were that the defence of common employment should be wholly instead of partially abolished; that the amount of compensation which might be awarded to an injured workman should be unlimited; that the Act should be extended to domestic and menial servants and to seamen; that the liability of the employer to compensate the workmen should extend to injuries to health as well as to bodily injuries; and that contracting out of the provisions of the Act should be entirely prohibited. The result of the agitation was that in '86 a **Special Committee** was appointed to inquire into the working of the Act. After a searching inquiry the Committee reported, embodying in their report suggestions for future legislation. The Conservative Government, which was then in power, introduced a Bill to give effect to the resolutions of the Committee, but it was abandoned. The first serious attempt to extend the scope of the Act of '80 was the Bill introduced by Mr. Asquith in '93.

Mr. Asquith's Bill of '93 proposed to make nine very material alterations in the law as it then stood. He proposed—(1) that the defence

of common employment should be entirely abolished; (2) that the liability of the employer should extend to workmen employed by a sub-contractor of the employer; (3) that the liability of the employer should extend to injury to health as well as to bodily injuries; (4) that the provisions of the Act should be extended so as to include clerks, domestic servants, and seamen; (5) that the injured workmen's knowledge of the existence of the defect in the ways, works, machinery or plant by which his injury was caused should not be available to the employer as a defence; (6) that there should be no limit to the amount of compensation which might be awarded to an injured workman; (7) that no notice of the accident should be required; (8) that the limit of time within which an action might be brought should be extended from six months, or twelve months in case of death, to six years in all cases; (9) that contracting out of the provisions of the Act should be absolutely prohibited. The Bill met with great opposition; in the House of Commons from Mr. Chamberlain, who advocated the lines which were afterwards followed in his own Act of '97, and in the House of Lords from Lord Dudley and others on account of the total prohibition of "contracting out." In consequence of the opposition of the Lords, who in that respect adopted the resolution of the Committee of '86, approving of "contracting out" with proper safeguards, the Bill had to be withdrawn. In the meantime the General Election of '95 intervened, and with the return of a Unionist Government to power the agitation for the extension of the Act of '80 revived. The question was taken in hand by Mr. Chamberlain, and the result was the

Workmen's Compensation Act, '97.

The most important changes in the existing law effected by the Act are the total instead of the partial abolition of the defence of common employment, and the elimination of "negligence" from the elements necessary to create the liability of the employer. The Act, being an experiment of very considerable magnitude and importance, has very properly been limited in its application to certain specified trades and industries; but in those trades and industries it applies to every one in the service of the employer, manager, clerk, or manual labourer. The Act makes the employer liable for injury caused to those in his employment by any accident arising out of and in the course of the employment, only excepting those which are due to the serious and wilful misconduct of the injured workman himself. Not only is no negligence necessary to constitute the liability, but even where the greatest possible care has been taken by those concerned the employer is still liable for the results of an unavoidable accident, if it arises out of and in the course of the employment. Moreover, although "contracting out" is allowed under certain conditions, the effect of those conditions is such as to practically prohibit "contracting out" altogether. No scheme for "contracting out" is legal unless passed by the Registrar of Friendly Societies as being as beneficial to the workmen as are the provisions of the Act; the scheme is liable to revision at the termination of limited periods; the scheme and its administration by the employer may be at any time attacked by dis-

contented or ill-disposed workmen, who will thereby cause the employer an infinity of trouble; and no scheme is legal which makes it a condition of the employment that the scheme should be adopted. Moreover the employer is liable for the injuries caused to workmen employed by a sub-contractor, and for injuries caused to his workmen by the act of a stranger; while the employer has a remedy over against the sub-contractor or the stranger, for what that remedy may be worth. The amount of compensation for which the employer is liable is as follows: (a) where death results from the injury a sum varying from £150 to £300 where dependants are left who were wholly dependent upon the dead workman, and any sum up to £300 where dependants are left who were partially dependent upon the dead workman; and if there are no dependants left, a sum not exceeding £10 for medical and funeral expenses; (b) where total or partial incapacity for work results from the injury, a weekly payment not exceeding £1 per week. The great principle underlying the provisions of the Act, as Mr. Chamberlain pointed out, was that the trades and industries of the country should be chargeable with the maintenance of those workmen who were injured in the carrying on of those trades and industries, and with the maintenance of those who were dependent upon the earnings of the injured workmen. To a certain extent, no doubt, the Act has achieved its object. But if the principle underlying the Act is to be carried to its logical conclusion, the provisions of the Act must be extended to all accidents, whether caused by misconduct or not, and to all trades and industries. So far as the Act is concerned the trades and industries of the country are only made chargeable through the instrumentality of the individual employer, because it is the individual employer who is personally responsible to the injured workman. But it remains for the individual employers to devise some means by which the burden of liability may be shifted from their individual shoulders to that of the whole trade or industry.

The Insurance Aspect.

The liability thus imposed upon employers has been met by different kinds of insurance, the bulk of which is transacted by the existing accident insurance companies. In view of the great extension of their business not only did several of such companies increase their capital, but life and fire offices have undertaken employers' liability insurance both under the Workmen's Compensation Act and the Employers' Liability Act, and at common law. These offices are the Sun Life Assurance Society, the Guardian Fire and Life Assurance Co., the Law Union and Crown Fire and Life Insurance Co., the Rock Life Assurance Co., the Scottish Metropolitan Life Assurance Co., the National Assurance Co. of Ireland, the Royal Exchange Assurance Co., the Lancashire Insurance Co., the Yorkshire Fire and Life Insurance Co., and the Manchester Fire Assurance Co.

As the result of a careful investigation of all the available statistics by the managers of many of the first-class offices who undertook to transact insurance under the Workmen's Compensation Act and other parts of em-

employers' liability, a tariff of premiums was prepared which these and a few other offices agreed to adopt. On the other hand, several leading accident insurance companies, such as the Ocean Accident and Guarantee Corporation, the Palatine Insurance Co., etc., determined not to abide by any tariff rates, but to establish premiums of their own, which have always been very much lower for the better class of risks under the Workmen's Compensation Act, except for mines and quarries; but it has been a vexed question whether the **Tariff Offices** are not better ones for the insurance of employers' liability risks generally than the **Non-Tariff Offices**. The leading representatives of the latter state, with much show of reason, that the tariff rates are too rigid, and do not therefore give to those employers the lower rates they are entitled to who employ only the most efficient men and pay the best wages, as well as use only the best ways, works, machinery, and plant. On the contrary, the advocates of the tariff rates system declare that the tariff companies are, as regards the majority of them, in a far stronger financial position, and can therefore be better relied upon to satisfy the claims of employers' liability, than the non-tariff companies. The officials of the former also allege that the unsatisfactory methods adopted by their rival companies in granting preferential and lower rates is both unfair and impracticable, and must entail very heavy losses upon them, while some of the non-tariff offices will probably be financially ruined by the much lower rates they accept. A few months ago the Royal Exchange Assurance Co., the Lancashire Insurance Co., the Yorkshire Fire and Life Insurance Co., and the Manchester Fire Assurance Co., which severally undertook to transact employers' liability insurance under the two Acts referred to, and at common law, entered the list of the non-tariff companies for such insurance.

Catastrophe Risks.

There are many trades in which accidents generally affect single persons, or at most a few. On the other hand, there are those large industries which involve what is called the **Catastrophe Risk**. Collieries, mines, and quarries belong to this class. Respecting these, while the employer is exposed to a full share of the risk of smaller daily hazards, he is subject to the possibility at any time, although he may use the best precaution to avoid accidents in his mine or quarry, of some overwhelming disaster which may kill and disable hundreds of men, and thereby cause him to suffer a crushing liability for death and disablement claims. Again, this distinction equally applies to the manner in which protection against the new liabilities under the Workmen's Compensation Act should be sought, as not only does it render insurance against these risks, as the only means of yearly equalising an expenditure which might otherwise come with dreadful force when it was unprovided for, little short of an absolute necessity; but it raises the most momentous question of the financial strength of the company and companies which grant policies of assurance, because not only may the outlay for death claims in a colliery catastrophe be enormous, but the periodical payments for disablements may last for half a century. The question, therefore, of utmost moment is, firstly, the present financial stability

of the insurance company whose insurance is taken; and, secondly, its chances of endurance in a solvent and prosperous condition through out an indefinite future. To comply with the just requirements of mine and quarry owners and their workmen under these special circumstances, five of the more important life and fire assurance companies, and the same number of leading accident assurance companies, made a mutual arrangement technically termed an **amalgamated pool** for issuing contributory policies, and adopted a good method of re-assurance for sharing this responsibility whereby mine and quarry owners secure their combined protection. Such companies are the following, which are mentioned alphabetically, viz.: the Employers' Liability Assurance Corporation, the Guardian Fire and Life Assurance Co., the Law Accident Insurance Society, the Law Union and Crown Fire and Life Insurance Co., the London Guarantee and Accident Co., the National Assurance Co. of Ireland, the Railway Passengers' Assurance Co., the Rock Life Assurance Co., and the Sun Life Assurance Society. These companies have a combined fund of many millions sterling to meet accident assurance claims. Five differential rates are made for the insurance of colliery accident risks in each of thirty-eight counties in the United Kingdom.

The rates of premium for employers' liability in the different industries are, and will for some years be, experimental, and vary with the experience of the district and of the individual risk. They generally cover all liability under the Workmen's Compensation Act, the Employers' Liability Act, and at common law up to three years' wages not beyond £300. According to the original tariff rates the cost of insurance under the Workmen's Compensation Act was about seven or eight times as much as it was previously charged under the Employers' Liability Act and at common law up to £300.

Rate-Cutting Offices.

All the accident and other insurance companies who refused to abide by the tariff rates for the insurance of employees under the Workmen's Compensation Act undertook this business at very much lower rates than the tariff offices, and in many industries at one third and a quarter of the premiums charged by their rivals, with the result that one office, the Ocean Accident and Guarantee Corporation, secured an enormous income from their low rates, being far in excess of any other company who assured employers' liability risks. These small rates have been still further reduced by the accident departments of the fire insurance companies, which have recently undertaken these risks for the purpose, as has been stated, of increasing their fire insurance business. During the last five months the tariff rates have been reduced by one-third, and since about the middle of Nov. '99 these rates have been suspended so that all the insurance companies who now transact employers' liability assurance charge what rates they like, and these have been further reduced. The catastrophe risks, however, referred to respecting mines and quarries are only undertaken at the original rates agreed upon by the tariff companies so far as such companies are concerned, while even non-tariff companies as a whole will not insure these risks at less rates,

and in several cases they require higher premiums to be paid.

Mutual Combinations of Employers.

In consequence of the very high premiums charged by the tariff offices for insurance under the Workmen's Compensation Act, employers in many large trades have formed mutual associations for insuring employers' liability at much lower rates, but many of these associations have collapsed for want of permanent stability and financial soundness. It is scarcely possible to insure the permanent adherence of any firm to a mutual combination, while unless insurance operations are conducted on an extensive scale so as to secure average results, a run of ill luck involving many cases of permanent disablement or death might easily occur, and cause either the failure of the combination or such excessive rates in order to meet the liabilities as to lead to dissatisfaction with, and dissolution of, the combination. In such an event it is only too probable that individual employers would be left to meet out of their own resources the annual payments to permanently injured workmen arising from accidents during the existence of the combination. The permanent character of workmen's compensation under the new Act makes it especially important for employers to be thoroughly satisfied that the company or the combination by which they are indemnified is not only financially sound now, but that it shows adequate assurance of permanent stability. For these and other reasons it is improbable that mutual combinations will meet with any considerable measure of success.

The chairman of the Ocean Accident and Guarantee Corporation, in his speech at its last annual general meeting, stated as regards these mutual associations, that less employers are joining them "for the very good reason that a responsible member whose desire is naturally to limit his own risk sees that by joining such an association he increases and trebles the same by becoming liable for the heavy risks of his neighbours whose operations he cannot control, and mutual insurers do not care to undertake a liability which may continue during the lives of young annuitants, and be payable by their executors for a period of half a century hence. The better class of mutual insurers are, therefore, rapidly withdrawing from these mutual associations, leaving a residuum of weaker brethren, whose want of capital or inefficiency of works suggests the advisability of inducing others in the trade to share their risks." Again, the many sources of friction, as the too favourable results to careless employers, and the too unfavourable results to careful ones, and trade jealousy and rivalry, etc., have to be considered in estimating whether or not any particular combination among employers has the essential elements of permanent stability.

Employers Taking the Whole Risk of their Liability.

The retention of the risk by the employers themselves is a course that will scarcely commend itself to the majority of business men. The compensation provided for by the Act may amount to as much as £1 per week through the whole after lifetime of the injured workman, or in the event of death, to a sum

not exceeding £300. The possibility of being suddenly called upon to compensate several workmen on this scale is one that no employer would care to permanently incur. The payment of death claims might prove financially inconvenient, and it is by no means unlikely that in the event of an accident happening in the works of an employer known to be uninsured, his credit might be seriously impaired just at a time when he needed it most, for his creditors would be well aware that the claims of workmen constitute a first charge upon the assets of an employer. So again in the case of permanent disablement, the profits of a business for many years to come would be appreciably decreased by the payment of several annuities of £52 each. Thus, even if an employer feels that the rates charged by the majority of the best offices are excessive, it would still be his best course to pay those rates, knowing that thereby he procures insurance that really insures, that accidents in the past will involve him in no liabilities in the future, that competition will bring rates to their right level whether by increasing or decreasing them, and that though for a time the payment of insurance premiums may seem to involve a heavy tax on the employer, yet the burden will in the natural course of things be transferred to the purchasers of the things he sells. In this way the Act will accomplish the beneficial object of protecting the workmen against injury at the expense of the whole body of consumers, to whom the cost of doing so will be quite inappreciable. The number of employers who entirely take their own risk of liability for accidents to their workmen has greatly diminished during the last twelve months.

Contracting-Out Schemes.

The number of these schemes under the Act which has been certified by the Registrar of Friendly Societies appears not to have increased in the same ratio since March '99 as it did previously. The compensation paid to the workmen under some of such schemes exceeds that payable under the statute, and is under other schemes less, and generally provides payment for the first two weeks after accidents occur. They are contributed to partly by the employers and partly by the workmen, but the former generally contribute a far greater share. Several of these schemes are Registered Friendly Societies.

General.

In many manufacturing establishments old men, or those not up to a satisfactory physical standard, are refused employment in these places, while other workmen have been discharged because their presence therein is thought by their masters to imply a greater liability for compensation under the Act than the employment of younger and healthier men. Beyond requiring that reasonable precautions shall be taken to protect workpeople in manufacturing from accidents as a condition of insuring these risks, insurance companies undertake such risks without imposing any condition as to whether the employees should be young or old, strong or infirm, and this practice has no noticeable influence on premiums. The want of a fixed limit for permanent disablement compensation is regarded as a grievance by many insurance companies who undertake employers' liability risks. It is

urged that for specific injuries, specific amounts according to scale should be paid as compensation, whereby the present inequalities of compensation to be paid to old and young on the loss of limbs, etc., by accident would be corrected. Another alleged grievance is that there is a great portion of money wasted in legal proceedings which should have gone in compensation, in consequence of claims being made under Lord Campbell's Act and the Employers' Liability Act, which admit of much litigation on questions which could have been settled by the Workmen's Compensation Act. It is recommended, therefore, that the law should be so reformed that all claims for personal injury to workmen for accidents in the course of their employment should be alone made under the Workmen's Compensation Act, and on the basis there given for ascertaining such compensation.

Wrists. See COMMONS.

Wyndham, Charles, was b. in 1837, and ed. for the medical profession. His *début* as an

actor was at the Royalty Theatre in '62, with Miss Ellen Terry and David James. He then went to America and played at Washington, in conjunction with John Wilkes Booth. He afterwards fought in the Civil War, but returned to England and met with great success. His first London appearance was in '66, and after another American visit, and a provincial tour, he made a great hit at the Royalty in "Wild Oats." He took the management of the Criterion in '76, and thus began a career of brilliant and uninterrupted success. Mr. Wyndham afterwards toured in Germany, Russia, and the United States; and in '96, in celebration of the twentieth year of his management, special performances were given at the Criterion and the Lyceum, in which nearly every actor and actress of note in London took part. He built and opened on Nov. 16th, '99, a new theatre at the corner of Cranbourne Street and Charing Cross Road; and the receipts at the first performance, more than £4000, were given to the Transvaal War Relief Fund. Address: 39, Finchley Road, N.W.

Wyndham, George, M.P., Under Secretary for War. See COMMONS.

Y

YACHTING, '99.

The Marseilles Regatta began the *Mediterranean Season* on Feb. 9th, though there were not many yachts there, the principal winner being *Mildred*, which was known last year as *Eldred*. Toulon Regatta followed, but without much interest attaching to it. Cannes Regatta commenced on Feb. 26th: *Satanita* won the Prix de la Ville de Cannes, also the Prix du Président de la République, the Prix de la Société des Bains de Mer de Monaco, and the Goelet Bennett International Cup, and *Mildred* won the Goelet Bennett Cup for smaller yachts. *Laura* beat *Mildred* for the Prix de l'Union des Yachts Français. The Grand Prix de Monte Carlo, for the coasting match from Cannes to Monte Carlo for larger yachts, was won by *Satanita*, that for smaller by *Mildred*. A match from Monaco to Mentone was won by *Emerald*, *Heartsease* and *Mildred* being second and third. *Mildred* won the Prix de Monte Carlo. The first day of the Monaco International Regatta was spoiled by there being no wind; on the second day *Satanita* beat *Luisa*, *Mildred* won the Prix du Yacht Club de France. The Nice International Regatta began on March 22nd, the Prix de la Ville de Nice was won by *Mildred*. A match on March 23rd, in which *Laura* and *Mildred* and others took part, was won by *Emerald*. The Coupe du Cercle de la Méditerranée was won by *Satanita*, which came in first on both days. On April 1st the chief race was won by *Laura*, and on April 6th, the last day of the Nice regatta, *Mildred* beat *Laura* in a private match. *Mildred* remained in the Mediterranean during the rest of the season. In the Riviera Season *Satanita* won 11 first and 12 second prizes, to the value of £1796. *Mildred* won 25 prizes out of 28 starts—a very good performance. *Laura* won 23 prizes with the same number of starts.

The English Season began with the Channel

Match on May 27th of the New Thames Y.C. from Southend to Harwich, which was won by *Senta*. *Senga* won the prize for the same course for smaller boats. On the 29th *Bona*, now the property of Mr. H. Taylor, won a match against *Rainbow* at the R. Harwich Y.C. Regatta. *Astrild* won the race for those not exceeding 65 feet, *Caprice* the small yacht race. On the second day of the regatta *Bona* again beat *Rainbow*. At the regatta of the R. London Y.C., on June 3rd, *Tutty* won the 52-footer race from *Eelin*; and under the New Thames Y.C. *Tutty* won the first prize, *Bona* being second; *Senga* won that for the smaller boats. On June 5th, at the R. Thames Y.C. Regatta, *Bona* beat *Rainbow*, and *Eelin* beat *Astrild*, *Tutty*, and *Senga*, in the order named, for the 52-footers, and *Senga* won the match for those not exceeding 52-rating. *Creole* beat *Maid Marion* in the small boat race. In the match for the Queen's Cup from the Nore to Dover *Caprice* won the first prize, *Tutty* the second, *Bona* the third. At the R. Cinque Ports Y.C. Regatta, on June 12th, *Bona* beat *Rainbow*, and *Tutty* beat *Astrild*, and *Senga* beat *Penitent* in their respective races. On June 20th, at the R. Cork Y.C. Regatta, *Bona* won the Queen's Cup from *Eelin* and *Astrild*, and on the next day *Eelin* beat *Astrild*, which was disqualified. The race from Dover to Heligoland for the German Emperor's Gold Cup was won by *Charmian*, *Betty* being second. The Clyde fortnight began on June 28th in cold and wet weather: the 52-footer race was won by *Caprice*, on the second day *Eelin* beat *Astrild* in the 65-raters, *Caprice* the 52-footers. At the R. Largs Regatta, on June 30th, *Astrild* beat *Eelin*, and *Senga* beat *Penitent* and *Caprice*. At Mudhook, on July 4th, *Astrild* beat *Eelin*, and *Senga* beat *Penitent*, and on the 5th May won the race for yachts exceeding 52-rating, and *Senga* that for the 52-raters. At the Campbelltown Y.C. Regatta *Bona* beat *Rainbow*, and *Tutty* beat *Astrild*.

and *Eelin*; *Caprice* won the race for the 52-raters. At the Clyde Corinthian Y.C., on July 6th, *Astrild* beat *Eelin* in the 65-raters, and *Senga* won the 52-footers race. At the R. Northern Y.C. Regatta *Bona* beat *Rainbow* in the big boat race, *Astrild* beat *Eelin* in the 65-raters race, and *Caprice* won the smaller boat race. On the second day *Rainbow* beat *Bona*, and *Senga* won the small yachts race. At the Clyde Corinthian Y.C. Regatta, on July 7th, for yachts exceeding 52-rating, *Namara* won. On July 8th, at the R. Clyde Y.C., *Bona* won the race for the large yachts, *Rainbow* winning the Special Cup and second prize. *Astrild* beat *Eelin*, and *Forsa* won the 52-raters match. On the last day of the Clyde fortnight a calm set in, and *Bona* won a drifting match over *Rainbow*, and *Tutty* beat *Astrild*; *Penitent* in her class beat *Senga*. At the R. Cinque Ports Y.C. Regatta *Creole* won the principal prize. At the R. Ulster Y.C. Regatta at Belfast, on July 14th, *Bona*, in the absence of *Rainbow*, which did not cross from Scotland, sailed over for the County Down Cup. *Eelin* won the 65-raters prize, and *Morning Star* the 52-raters. On the next day *Tutty* won the 100-guineas Cup given by Sir Thomas Lipton, *Bona* coming in second, the failing wind proving most disastrous to her. *Senga* won the match for the 52-raters. On July 17th, in the match from Dover to Ostend, *Creole* proved the winner, *Maid Marion* being second.

On July 18th and 19th Sir Thomas Lipton's new yacht, the *Shamrock*, built to compete for the America Cup, had some test matches with the Prince of Wales' yacht *Britannia*; and on the first day in fine racing weather beat her over a 40-mile course by 13 min. 20 secs.; on the second day she also beat *Britannia*, though the race was not actually finished, the latter yacht retiring. On the 18th, at the R. Alfred Y.C. races at Kingstown, *Penitent* was the winner. On the 19th, at the R. Irish Y.C. Regatta, *Tutty* and *Senga* were the winners in their respective classes, and on the 20th, in pelting rain and a N.E. wind, *Tutty* again beat *Bona*. *Caprice* won the 52-raters prize. In a match for the 52-raters at the R. Alfred Y.C. Regatta on July 21st, *Penitent* was the winner. *Maid Marion*, in scarcely any wind, won the race from Ostend to Dover at the Cinque Ports Regatta, on July 22nd. The Coupe de France, the international trophy of the Union des Yachts Français, was sailed for in the Solent between the English 20-ton yacht *Laurea* and the French yacht *Anna*, and was won by the former after she had gained the first two of the three races to be sailed. At the R. Southampton Y.C. Regatta *Tutty* and *Senga* were the winners of their respective classes. The racing at Cowes commenced on July 31st with the regatta of the R. London Y.C., when *Meteor* won the prize for the big boats, *Tutty* that for the next class, and *Penitent* the smaller. The regatta of the R.Y. Squadron began on August 1st, in perfect yachting weather, when the Queen's Cup was won by the German Emperor's *Meteor*, who easily beat *Britannia*. The Emperor's Cup was won by *Gertrude*, and on Aug. 3rd *Meteor* won the Cowes Town Cup. *Senta* won the Australian Cup. The International races for the Seawanhaka Cup was won by the Canadian boat *Glencairn*, which beat *Constance* in the final. At the R. Victoria Y.C. Regatta at Ryde, on Aug. 8th, *Meteor* won the Vice-Commodore's prize, *Senta* won the 65-footers prize, and *Maid*

Marion that for the small boats. On the next day *Meteor* won the Earl of Desart Challenge Cup, *Senta* the 65-footers prize, and *Senga* the small boat race. The Town Cup was won by *Creole* on Aug. 10th, *Penitent* won the prize for the 52-raters. On the last day of the R. Victoria Y.C. Regatta *Meteor* beat *Bona*, *Astrild* won the 65-raters prize, and *Penitent* the 52-footers. At the R. Albert Y.C. Regatta, on Aug. 14th, the principal match in the closing week of the Solent season, the race for the Albert Cup was won by *Bona*, *Tutty* winning the 65-raters prize. On the next day *Meteor* beat *Bona*, and *Eelin* won the smaller boats prize. On the 16th the races were brought to a close by the regatta of the R. Southern Y.C. when *Bona* scored another victory, and *Senta* won the match for the 65-raters. On Aug. 17th *Bona* won the prize for the Channel race from Cowes to Weymouth. *Meteor* ceased to race after the R. Albert Y.C. Regatta was over, and did not proceed west for the later regattas.

The *Shamrock* arrived in America on Aug. 17th, after 17 days' voyage, having been towed about two-thirds of the way by the *Erin*. The R. Dorset Y.C. Regatta began at Weymouth on Aug. 19th, on which day *Britannia* fouled *Rainbow* in the most unfortunate manner, and but for this mishap the latter would have won the race, which, however, fell to the lot of *Bona*. *Senta* and *Penitent* won the races for their respective classes, and *Namara* beat *Brynchild* for the Weymouth Town Cup. The first-class yachts finished their racing at Weymouth, so that at Torquay only the smaller boats competed. Of these *Tutty* won the principal prizes on Aug. 21st and 22nd for the 65-raters, *Brynchild* for the 52-footers. On Aug. 25th at the R. Dart Y.C. Regatta, *Namara* beat *Brynchild*, and *Senta* beat *Tutty*; *Senga* won the 52-footer race. At the Start Bay Y.C. Regatta, on Aug. 26th, *Tutty* again won in her class, as did *Senga* in hers. *Senta* beat *Tutty* at the R. Western Y.C. of England Regatta, and *Penitent* won the 52-footers race. At the Port of Plymouth R. Regatta, on Aug. 30th, *Tutty* won the 52-footers race; and on the next day, at the R. Plymouth Corinthian Y.C. Regatta, *Forsa* beat *Penitent* and *Senga*. The first race between *Shamrock* and *Columbia* was to have taken place on Oct. 3rd, but that and each of the appointed days were too calm or too foggy for racing, and it was therefore decided that the matches should be sailed on any day, whenever an opportunity occurred. On the 16th *Columbia* won easily by more than 10 minutes. On the 17th *Shamrock* carried away her topmast soon after the start, and *Columbia* finished the course alone. On the 19th the wind was too light to allow of a finish, though *Columbia* was leading when the time was up. On the 20th *Columbia* scored her third victory, finishing 5 mins. 17 secs. ahead. This concluded the matches, and *Columbia* won the America Cup.

Yemen. A province of Arabia, which, with the province of Hedjaz, is under Turkish rule. It is bounded on the N. by the Hedjaz, on the N.E. by the Arabian desert, on the S. by the Gulf of Aden, and on the W. by the Red Sea. Area about 77,000 sq. m.; pop. about 3,000,000. The capital of the province is *Sana*, and other important towns are Mocha and Hoslaidah, the coffee of the district finding its outlet at the former town. The chief products are coffee, lentils, wheat, grapes, and fruit, and the country is very fertile. See ARABIA.

YEOMANRY.

The Yeomanry cavalry are raised and serve under the Act of 1804, and are governed by special regulations. Until a few years back the force was composed almost entirely of farmers, the commissions being held by the nobility and landed gentry. The farmer element is unfortunately by no means so prominent as it used to be, and in populous districts is being replaced by men who adopt soldiering because they like it; though the town-bred Yeomanry have not the character or value of their predecessors. The maintenance of the force depends largely upon the patronage of the gentry, and is thus locally subject to vicissitudes. The expenditure upon the force in '99-1900 is £75,000, divided thus: regimental pay, £46,000; regimental allowances, £28,000; miscellaneous, £100. The expenditure upon the force in '98-9 was also £75,000, a reduction on the first head being compensated by additions to the others. The force is organised in regiments, thirty-eight in number, and these again in brigades. The regiments are **assembled annually** for training for eight days. (See ed. '96 for pay.) The force is **liable to be called out** for service in any part of Great Britain in case of threatened invasion or to suppress civil riots. The total establishment of the Yeomanry force on the estimates of '99-1900 is 11,000, exclusive of officers, permanent staff, and sergeant-majors. The enrolled strength is about 1500 below the establishment. **Musketry Training.** The year '93 was the first in which an obligatory course was prescribed. On Jan. 1st, '97, the School of Instruction for Yeomanry and Volunteer Cavalry was abolished, and the work of instructing officers and non-commissioned officers of these forces was charged upon the regiments of regular cavalry, to which officers are to be attached during the period of squadron training. **Yeomanry Cavalry Brigades.** The isolated situation of the Yeomanry regiments, which gave them no cohesion or plan of mobilisation as a fighting force, was long felt to be unsatisfactory; but although something has been done to supply the want, the progress made has been so far inconsiderable. In '93 all the existing regiments made up into squadrons of 100 members, or not less than 70 efficient, were formed into 18 brigades, with the exception of the Pembrokehire Regiment, which, on mobilisation for home defence, was assigned to the Milford Haven defences. Fifteen of the brigades were allotted in this scheme as divisional cavalry for the Home Defence Army, and the remaining three to the garrisons of Portsmouth, the Western District, and Dover and the South Coast defences.

Yonge, (Miss) Charlotte Mary, was b. at Otterbourne, Hants, in '23, and is a daughter of the late Mr. W. C. Yonge, of Otterbourne. Known chiefly by her novels and other books. She has also edited the *Monthly Packet* for thirty years. Her principal novels are: "The Heir of Redclyffe," "Heartsease," and "Dove in the Eagle's Nest"; and she has also published "Cameos of History of England," "Landmarks of History: Ancient, Middle Ages, and Modern," a "History of Christian Names and their Derivation," a "Life of Bishop Patteson," and various other historical and miscellaneous works. Address: Elderfield, Otterbourne.

York, Archbishop of. See under PEERAGE.

York, H.R.H. George Frederick, Duke of 2nd son of T.R.H. the Prince and Princess of Wales, was b. at Marlborough House on June 3rd, 1865, just seventeen months after his elder brother, the late Duke of Clarence. The two brothers were greatly attached to one another all through boyhood, and entered the navy together as cadets June 5th, '77. Two years were spent on the training ship *Britannia*, and then Prince George, accompanied by his brother, started for a three years' voyage round the world on board the *Bacchante*. In May '83 H.R.H. was made midshipman to the *Canada*, which was stationed on the North-American coast. In '85 he was promoted to be lieutenant, after passing his examinations with distinction, and in '90 was given the separate command of the gunboat *Thrush* on the West Indian station. He opened the Jamaica Industrial Exhibition during the same year, and in '91 was made commander. He visited Ireland in October, staying with the late Duke of Clarence in Dublin, but unfortunately contracted a dangerous fever while there. In '92, through the lamentable death of his elder brother, he became the heir to the throne, and took his seat in the House of Lords as Duke of York. In May '93 his engagement to Princess Victoria Mary of Teck was announced. The marriage was celebrated in the Chapel Royal at St. James's Palace (July 6th), and was a most brilliant ceremony, attended by all the members of the Royal Family, by the King and Queen of Denmark, the Czarewitch, and other illustrious foreign guests. The University of Cambridge conferred their Hon. LL.D. degree on the Duke in June '94. A son, Prince Edward Albert Christian George Andrew Patrick David, was born to the royal pair (June 23rd, '94), a second son, Prince Albert Frederick Arthur George, on Dec. 14th, '95, and a daughter on April 25th, '97. During '98 H.R.H. for some time hoisted his pennant on the *Crescent*, attached to the Channel Squadron.

Young Men's Christian Association, The, which has for its object the spiritual, mental, social and physical well-being of young men, was founded in the year 1844, for the purpose of benefiting the young men in the various dry-goods houses in the City of London, the **President**, Sir George Williams, being the chief instigator in its formation. The work rapidly took root, and increased in every direction, until there are at the present time 7226 centres scattered throughout the world, with a **total membership** of 507,614. In the United Kingdom there are 1490 centres, with 105,196 members; whilst in London there are 70 associations, with a roll of 13,000 members. The chief associations in the Metropolis are located at Exeter Hall, Strand; 186, Aldersgate Street, E.C.; 59 and 60, Cornhill, E.C.; Stafford Rooms, Tichborne Street, W.; 17, Camden Road, N.W.; 198, Upper Street, Islington, N.; Worpole Road, Wimbledon; 275, Mare Street, Hackney, N.E.; 4, Kingsland Road, Shoreditch, N.E.; and Conference Hall, Stratford, E. The headquarters of the Y.M.C.A. are at Exeter Hall, Strand, which was purchased and adapted to the requirements of the work in the year '80, at a cost of £61,000. **Secretary of the National Council**, Mr. W. H. Mills; **Secretary of the London Central Association**, Mr. J. H. Putterill.

Young People's Society of Christian Endeavour. In 1881 the first society was established by the Rev. F. E. Clark, D.D., in the Congregational Church of which he was pastor, in Portland, Maine, U.S.A. The object of the Society is stated to be to promote an earnest Christian life among its members, to increase their mutual acquaintance, and to make them more useful in the service of God. The growth of the Society has been phenomenal. In four years there were 11,000 members, five years later 660,000. In '99, eighteen years after its origin, there were 55,813 societies (6350 in the United Kingdom), with a membership of 3,350,000. The Society is inter-denominational, and has been adopted by every section of Protestants. The **Headquarters** in Great Britain are at the Sunday School Union. **Offices**, Ludgate Hill, London, E.C.

Young Women, Organisations for the Benefit of. The two principal organisations which exist in England for the benefit of young women are the Girls' Friendly Society and the Young Women's Christian Association, although there are other societies which aid the work in their respective methods. The **Young Women's Christian Association** numbers about 500,000 young women among its members in all parts of the world. Members include those who belong to the Prayer Union, Associates, Working Members, and Hon. Associates. The subscription, exclusive of fees for Institute membership, is 1s. per annum; but working members subscribe 2s. 6d., and hon. members 5s. and upwards. There are numerous **Institutes and Homes** in London and provincial towns, also at many of the seaside resorts throughout the British Empire, besides many branches which hold meetings in villages, the charge for lodging in the London Homes being from 2s. 6d. to 30s. per week. There is a Teachers' Department, a Nurses' Union, a

Home for Barmaids, and some 20 other departments for meeting the special needs of young women. Freehold premises have been acquired at George Street, Hanover Square, as headquarters of the Association, and a hall to seat 500 has been erected. The Association has two excellent **gymnasias** at 26, George Street, and 14, Finsbury Square, E.C., the Preparation Home for workers. A **World's Y.W.C.A.** has recently been organised, for the union, development, and extension of Y.W.C.A.'s in all lands. Its office is at 26, George Street, Hanover Square, W., and the head offices for the "British National," "London," and "South of England and Wales" work are in the same building.—The **Girls' Friendly Society** (Patron, the Queen; Vice-Patron, the Princess of Wales; Presidents, the Archbishop of Canterbury and the Archbishop of York). It has for its object the banding together in one society of ladies (as associates), now 32,000 in number, girls and young women for mutual help, religious and secular, besides encouraging purity, dutifulness, thrift and fidelity, and providing help in sickness. Branches exist in 1287 places, and members (who number 150,055 from the age of 12 and upwards) are introduced from one branch to another wherever they may go. "Associates" must belong to the Church of England, but no such restriction applies to "members." Associates contribute annually not less than 2s. 6d., members not less than 6d. The organisation extends to various towns of Northern and Central Europe, Australia, New Zealand, India, Africa, and Canada, and in the diocese of Gibraltar. Clubs, classes, homes of rest, registry offices and protected emigration form part of the scheme. See also **UNIVERSITY SETTLEMENTS**.

Yukon. See **NORTH-WEST TERRITORIES**.

Z

Zanzibar Protectorate, The, consists of the island of Zanzibar, area 625 sq. m., pop. 150,000, and the island of Pemba, area, 360 sq. m., pop. 50,000. **Capital**, Zanzibar. The Sultan is Said Hamud bin Mahomed (*q.v.*), and a regular Government is constituted under British control, exercised through the Consul-General. Germany, by the Samoa Agreement (Nov. 14th, '99), renounced her rights of extra-territoriality in Zanzibar from such time as the similar rights possessed there by Great Britain should be abolished. Slavery was abolished in April '97, but the British and Foreign Anti-Slavery Society has since declared that the decree of abolition is a dead letter. **Imports** in '97, £1,399,078; **exports**, £1,189,668. The products are mainly cloves, which form four-fifths of the entire clove crop of the world, chillies, cocoanuts, betel-nuts, grain, and wheat. Ivory, rubber, hides, and gum are also exported from Zanzibar. See **BRITISH EMPIRE** (table), **EAST AFRICA PROTECTORATE**, and **DIPLOMATIC**. **Zola, Emile**, was b. 1840, in Paris. Ed. at the Lycée St. Louis, and began life at Messrs. Hachette's, the distinguished French publish-

ing firm. He first appeared as a novelist in "Les Mystères de Marseilles." "Thérèse Raquin" further exhibited his remarkable power of critical analysis of human nature. "L'Assommoir," perhaps his most popular work, has gone through fifty editions. Author of "Nana," "Pot Bouillé," "La Terre," "La Bête Humaine," and other works. M. Zola was appointed a **Knight of the Legion of Honour** in '88, and elected (April '91) President of the Society of Men of Letters. In '02 he published "La Débâcle," and "Docteur Pascal" in June '93. This book was the final volume of the famous Rougon Macquart series of twenty volumes, and was dedicated to the memory of M. Zola's mother and to his wife. During '94 he published "Lourdes," a love-story, set in the scenery of the famous resort of French pilgrims. "Rome" followed in '96, and "Paris" in '97. During '97 and '98 he took up with splendid courage the cause of Captain Dreyfus, and was in consequence of his action prosecuted by order of the French Government, and after two trials condemned to imprisonment for one year and a fine of 3000 fr. To secure a re-trial

of the case later on, and to avoid injury to the cause of revision, he left the country secretly, and stayed quietly for some time in England. The events in connection with the Dreyfus case during '99 (see FRANCE) fully justified his action. A work written by him during his voluntary exile, "Fécondité," was published in Oct. '99.

Zoological Society of London. The annual report of this Society, which was instituted in 1826 for the advancement of zoology and animal physiology, stated that the number of Fellows on Jan. 1st, '99, was 3185. The number of visitors to the Gardens in '98 was 710,948, as compared with 717,755 in '97. The number of animals in the Society's collection on Dec. 31st, '98, was 2656, of which 818 were mammals, 1363 birds, and 475 reptiles. The additions during '98 numbered 1495, of which 898 were presented, 327 purchased, 103 bred in the Gardens, 435 received on deposit, and 32 obtained in ex-

change. The Gardens in Regent's Park are open from 9 a.m. till sunset, and the Offices and Library from 10 a.m. till 5 p.m., Saturdays 10 a.m. till 2 p.m. **President**, The Duke of Bedford; **Secretary**, Mr. P. L. Sclater, M.A., F.R.S. **Offices**, 3, Hanover Square, W.

Zululand lies to the north-east of Natal, of which it was till '98 a dependency, but of which it now forms an integral part. **Area**, about 12,500 sq. m.; **pop.** 181,000, including 1100 whites. It is well watered and capable of cultivation, with 140 miles of seaboard. St. Lucia Bay, the best harbour, was proclaimed British ('85). Gold and other minerals have been found in no inconsiderable quantities, but they have not been worked as yet. The country was to a certain extent overrun by the Boers during the war with the Transvaal in '99. See BRITISH EMPIRE (table), NATAL and TRANSVAAL (map).

OCCURRENCES DURING PRINTING.

Anglo-American Commission. Mr. Justice Street, Judge of the High Court of Ontario, heard the appeal of the Michigan lumbermen who are lessees of Ontario lumber lands, against the Provincial regulations requiring logs to be sawn in Canada (Nov. 25th), and decided that the regulation was one which the Provincial Legislature was competent to pass. The lumbermen said they would take the case to the Judicial Committee of the Privy Council.

Armenia. The Patriarch complained (Nov. 11th), that the Sultan's Iradé granting reforms was a dead letter.

Austria-Hungary. The Delegations were unable to agree as to the proportions of the common expenditure to be borne by the two countries, mainly because of the attitude of the Slav Clericals. This led to the direct intervention of the Emperor, who told the party leaders that the Reichsrath must carry the various necessary measures then before it. As a result the proportion for Austria was fixed at 65·6 per cent., and for Hungary at 34·4 per cent. (Nov. 22nd).

Bechuanaland Protectorate. Khama repulsed a Boer attack upon him (Nov. 8th), and co-operated heartily with the British forces. Armoured trains at this date commanded the line to within a few miles of Lobatshi.

Bulgaria. The railway line between Rado-mir, Sofia, Roman, Shumla, and Kaspidjan, was opened (Nov. 20th).

Cape Colony. Lord Methuen assumed command of the British forces concentrated at Hopetown, in the north of the Colony, and Sir W. Gatacre arrived at Queenstown (Nov. 18th). By this date Aliwal North, Jamestown, and other places had been occupied by Free State Boers and proclaimed Free State territory. The colonists were urged by the Boer commandant at Colesberg to make common cause with the Republics for the achievement of South African

independence. General Buller, on the other hand, announced that H.M. Government would exact compensation for any injury done to the property of loyal inhabitants, and that the names of disloyal persons would be recorded for future consideration. Nevertheless a considerable number of colonists joined the Boers. Mafeking was reported to be safe, and Commandant Cronje to have left (20th). The High Commissioner issued a proclamation (23rd) denouncing as false the report that the British Government desired or intended to oppress the Dutch inhabitants of the colony. On the contrary, the Government desired the greatest amount of freedom and self-government for English and Dutch alike. Lord Methuen drove the Boers from a strong position near Belmont, about twenty miles north of Hope-town (23rd), and won a complete victory. The British loss was 3 officers killed and 19 wounded, and 55 men killed and 128 wounded. The Guards' Brigade were conspicuous for their magnificent charges. Sixty-four waggons were captured and burnt, and 50,000 rounds of ammunition with 750 shells were blown up. Another action was fought at Enslin, near Graspan, six miles farther north (25th), and there was some desperate fighting before the Boer position was carried, in which the Naval detachment especially suffered heavy loss. Lord Methuen sent a letter to the Boer Commandant requesting him to prevent the Boer wounded from firing on British officers, adding: "To place a white pocket-handkerchief on a rifle and take advantage of your enemy is a cowardly action which neither you nor I can countenance." After "one of the hardest and most trying fights in the annals of the British Army" a force of about 11,000 Boers, which disputed the passage of Modder River, was dislodged (28th) by Lord Methuen's division, Lord Methuen himself being slightly wounded during the fight. The Lord Mayor's Transvaal War Fund

amounted to over £374,000 (Dec. 5th), and the Refugees Relief Fund to over £169,000.

China. The two islands commanding the entrance of the Bay of Kwan-chau-wan, which France had claimed and China had refused to grant, were assigned to France by the Chinese Government (Nov. 20th). Li Hung Chang was appointed Minister of Commerce, and it was announced (Dec. 6th) that the question of tariff revision would soon be raised.

Daily Chronicle. Mr. Massingham (editor) resigned owing to a difference with the proprietor as to the policy to be pursued on the Transvaal question (Nov. 24th).

Diplomatic. Chili. A new Cabinet was formed (Nov. 28th) as follows:—*Premier*, Señor Albano; *Foreign Affairs*, Señor Urmeneta; *Finance*, Señor Salinas; *Justice*, Señor Heriboso; *War*, Señor Matte; *Industry*, Señor Valdes.—**Newfoundland.** Messrs. Bowring and Goodridge took the places of Messrs. Morine and Dawe (Nov. 27th).—**Queensland.** A new Ministry was constituted as follows (Dec. 1st):—*Premier and Chief Secretary*, Mr. A. Dawson; *Attorney-General*, Mr. C. B. Fitzgerald; *Home Secretary*, Mr. H. Turley; *Treasurer and Postmaster-General*, Mr. W. Kidston; *Mines and Education*, Mr. W. H. Browne; *Lands and Agriculture*, Mr. H. F. Hardacre; *Railways and Public Works*, Mr. Fisher.—**South Australia.** A new Ministry was formed (Nov. 30th) in consequence of the resignation of Mr. C. C. Kingston's Cabinet:—*Premier and Treasurer*, Mr. V. L. Solomon; *Chief Secretary*, Mr. J. L. Sterling; *Attorney-General*, Mr. P. M. Glynn; *Agriculture and Education*, Mr. T. Burgoyne; *Commissioner of Public Works*, Mr. Rougsevell; *Commissioner of Crown Lands and Immigration*, Mr. A. Poynton; *Government Whip*, Mr. McDonald.—**Victoria.** Ministry resigned (Dec. 1st), and was succeeded by a Ministry under Mr. McLean as Premier (5th).

Egypt. Colonel Sir F. Wingate found a force of over 2000 Dervishes encamped under Ahmed Fedil at Abu Adil, and at once attacked, killing 400 and taking many prisoners, stores, etc. (Nov. 23rd). The main body, under the Khalifa himself, was overtaken at Om Debrikat (25th), and after a sharp fight, in which the Khalifa, his son and two brothers, Ahmed Fedil, and all the chief emirs, were killed, the entire camp was taken, and some thousands were made prisoners. The only man of note who escaped was Osman Digna.

Engineering. Euphrates Valley Railway. A Constantinople telegram (Nov. 27th) announced that the Porte had granted the concession for the extension from Konieh to Bagdad and Basra to the Anatolian (German) Company.—**Manchester Sewage Disposal.** On Nov. 24th the *Engineer* published an illustrated synopsis

of the report of Mr. Baldwin Latham, Dr. P. F. Frankland, and Mr. W. H. Perkin, the three experts engaged to investigate the whole question. It was in favour of a bacteriological treatment which would produce an affluent which would not only conform to the Mersey and Irwell, but improve the Ship Canal (q.v.)

Germany. The Reichstag after a short debate rejected the motion for the second reading of the Labour or "Penal Servitude" Bill, by an overwhelming majority (Nov. 20th). On the same day the Emperor and Empress with two of their sons paid a visit to H.M. Queen Victoria at Windsor, afterwards going on to Sandringham. Some political importance was attached to the visit.

Labour Movement. The Labour Department of the Board of Trade issued (Nov. 28th) the first of a series of Abstracts of Foreign Labour Statistics, to be published annually in future, dealing with wages, hours of labour, trade disputes, and co-operation.

Literature. Paolo and Francesca (Lane), by Stephen Phillips. The Drama of Yesterday and To-day (Macmillan) by Clement Scott. Sir Arthur Sullivan; Life Story, Letters and Reminiscences (Bowden), by Arthur Lawrence. The Life of Wellington (Sampson Low), by Sir Herbert Maxwell.

London Corporation. Captain Edmund Stanley was appointed City Marshal *vice* Sir Simeon Stuart (Nov. 30th).

London School Board. Mr. Thomas Huggett (Chelsea) died (Nov. 30th).

Natal. General Hildyard from Estcourt attacked the Boers posted on Beacon Hill (Nov. 23rd), with the result that General Joubert began to withdraw his forces from Mooi River towards Ladysmith (26th). Telegraphic communication with Estcourt was restored, and a general advance upon Colenso was ordered. It was announced (28th) that Sir George White had accepted an explanation as to the Boer firing on a British flag of truce.

Obituary.

- Daunt, Major-General W., late Norfolk Regiment, (Nov. 27), 68.
- Colby, Rev. F. T., D.D., F.S.A., rector of Litton-Cheney, near Dorchester, '75-93, (Nov. 27), 72.

Bogota, August 14.—Vice-President Marroquin has been entrusted with the executive power. The following Ministers have been appointed:

General Guillerino Quintero Calderon, Minister of Government and of War; Dr. Pedro Antonio Molina, Minister of the Interior; Dr. Miguel Abadia Mendez, Minister of Public Instruction; Senor Alejandro Guitierrez, Minister of Finance; Dr. Carlos Martinez Silma, Minister of Foreign Affairs.—Reuter.

Society

Animals.

105, JERMYN STREET, LONDON, S.W.

Patrons.

HER MOST GRACIOUS MAJESTY THE QUEEN,
THEIR ROYAL HIGHNESSES THE PRINCE AND PRINCESS OF WALES.

President.

HIS ROYAL HIGHNESS THE DUKE OF YORK, K.G.

THE Education Committee of the Society earnestly appeal to clergymen and ministers of every religious denomination, to bring before their schools and congregations the claims of animals. To cultivate kindness of heart towards inferior creatures is to prepare for the more easy introduction of Christianity.

The Committee are advised that the Fourth Sunday after Trinity is a suitable day for leading the cause of the lower animal creation in the Church of England; because, (1) of the appropriateness of the Collect on that day; (2) in the Epistle to the Romans viii. 3, we shall read that "the whole creation groaneth and travaileth in pain together until now"; and (3) in the Gospel of Luke vi. 36, we shall read that we are commanded to be merciful, as our Father also is merciful." Any time is suitable, however, and this mark applies particularly to Nonconformist Churches of all denominations, where it is desirable to plead the cause of the Society, which is neither sectarian nor political.

Upon this Institution, founded in 1824 (the only one having for its object the protection of dumb and defenceless animals), rests a heavy responsibility. It is earnestly and respectfully submitted, that it has in consequence a strong claim upon the benevolence of the humane and charitable.

The Committee respectfully appeal to the Public to extend a hearty assistance,—

- I. By supplying early information to the Secretary of all acts of cruelty that have been witnessed.
- II. By increasing the revenue of the Society by annual subscriptions, by donations, by testamentary gifts, and particularly by inducing their friends to become members.

Trained Officers are despatched to all parts of the Kingdom. Upwards of 7,500 convictions obtained annually.

The increased operations of the Society have drawn from the funds an amount vastly exceeding the yearly subscriptions. The Committee need much greater assistance, and less such additional support be extended to them, this most righteous cause of humanity must suffer from insufficiency of means to carry out those many urgent measures which every well-wisher of this Society has so deeply at heart. Remittances may be forwarded to

JOHN COLAM, Secretary.

SUPPORTED ONLY BY VOLUNTARY CONTRIBUTIONS.

The labour of other Charities is divided among many Associations; but this Charity stands alone—the Defender of the defenceless—without any assistant.

SUGGESTIONS TO PERSONS MAKING THEIR WILLS.

"I give and bequeath free of Legacy Duty, unto the Treasurer for the time being of a Society called or known by the name of THE ROYAL SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS, established 1824; to be at the disposal of the Committee for the time being of the said Society."

E. R. HANDCOCK, Secretary.

COUNTY FIRE OFFICE,

50, REGENT STREET, W., and 14, CORNHILL, E.C., LONDON
(FOUNDED 1807).

The Distinguishing Feature of this Office is

THE RETURN SYSTEM

On *Ordinary Insurances*, under which Policy-holders who have been insured for Seven years and who continue insured—whether under an Annual or Septennial Policy—become entitled to a RETURN OF 25 PER CENT. of the Premiums they have paid during each Seven Years, provided no loss has arisen under their Policies in that Period.

Insurances on Farming Stocks and on other than *Ordinary Risks* do not participate in the Returns, nor are the Returns given on amounts which, being in excess of its own holding, are not retained by the Office.

Policies may be effected or transferred without any extra expenses.

G. W. STEVENS, } *Joint Secretaries.*
B. E. RATLIFF, }

PROVIDENT LIFE OFFICE,

50, REGENT STREET, W., and 14, CORNHILL, E.C., LONDON
(FOUNDED 1806).

IMPROVED SYSTEM OF BONUS DISTRIBUTION.

BONUSES upon all WITH-PROFIT POLICIES now being issued will be allotted upon a more Popular Plan than hitherto.—Instead of Small Bonuses in the Earlier Years, they will be Larger, and will continue to be more uniform in amount than formerly.

At the Last Division of Profits a **Compound Bonus at the rate of 27s. per cent.** on the Sum Assured was declared for each Premium paid in the 5 Years, and the large Sum of £299,601 carried to next Division of Profits in 1903.

Children's Endowments payable at age 21.

No Medical Examination required. All premiums returned in the event of previous death.

THE CAPITAL, amounting to FIVE MILLIONS, was fully subscribed before the Society commenced business in 1845, and the shares are now held by a body of Shareholders, comprising some of the highest and most influential members of the Legal profession. The success which has attended the operations of the Society is founded on its strong financial position, the eligible character of the risks constituting the bulk of its business, and the promptitude and liberality with which its engagements are met.

LAW LIFE ASSURANCE SOCIETY.

INSTITUTED 1823.

Office :—187, FLEET STREET, LONDON, E.C.

ASSETS ON THE 31st DEC. 1898 - £5,024,360

INCOME FOR THE YEAR 1898 - £547,127

Participating Policies hereafter effected share in 90 per cent. of the total divisible surplus.

EXEMPTION FROM PAYMENT OF PREMIUMS DURING INCAPACITY ARISING FROM ACCIDENT OR BODILY OR MENTAL DISORDER.

In order to meet the requirements of professional men and others whose incomes depend upon their ability to pursue their occupations, the Society has introduced a Scheme of Life Assurance carrying the above privilege in addition to those incorporated in the Society's ordinary policy form. The scheme has recently been extended up to age 65 to Whole-Life Policies at uniform premiums.

SECRETARY—A. E. MANN.

INSPECTOR OF BRANCHES—H. L. RUTTER.

The present Subscribed Capital of the Bank is £14,000,000, in 140,000 Shares of £100 each, held by upwards of 9,200 Shareholders. The sum of £20 has been paid on each Share, thus making the paid-up Capital £2,800,000. The Rest or Surplus Fund is £1,600,000. Current Accounts are opened with, and the usual Banking facilities granted to, persons properly introduced. The Bank takes the Agency of Private Country Banks, Joint Stock Banks, and other Public Companies in England or the Colonies; attends to the purchase and sale of British and Foreign Stocks; collects Dividends on Government Funds, Railway Stock, Foreign and other Securities, payable in England or abroad; acts as Agents for the receipt of Military and other Pay and Allowances; and generally transacts every description of Banking business. Sums of £10 and upwards may be deposited, subject to seven days' notice of withdrawal, or repayable at call. Interest is allowed thereon, according to the class of Deposit, but subject to alteration by public advertisement in the *Times* newspaper. Cheques cannot be drawn against Deposit Accounts, nor will Depositors be entitled to any of the usual Banking facilities in a Current Account. A receipt is given for each deposit, which is not transferable, and must be surrendered on repayment of the amount, according to the conditions printed thereon. Circular Notes of £10, £25, and £50 are issued for the use of Travellers, payable in the principal towns of Europe, Asia, Africa, and America. They are issued free of expense, and are payable by the Agents abroad, at the exchange of the day, without any deduction whatever for commission. Letters of Credit are also granted, payable at all the Chief Towns and Cities abroad. They may be obtained at the Bank in Lothbury, or any of its Branches. The Officers of the Bank are not allowed to receive any Christmas Boxes or Gratuities.

LONDON, November, 1899.

TEMPORARY HOME FOR LOST & STARVING DOGS

BATTERSEA PARK ROAD, and HACKBRIDGE, SURREY.

PATRON: HER MOST GRACIOUS MAJESTY THE QUEEN.
President: HIS GRACE THE DUKE OF PORTLAND.
Treasurer: SIR GEO. S. MEASOM, J.P.

"Bis dat qui cito dat."

Established to give temporary shelter and food to the thousands of dogs cast homeless and friendless upon the streets of London, thus removing a serious nuisance and a source of danger; to restore lost dogs to their owners; to provide good homes for deserted animals, where they will be well cared for; to provide a merciful and painless death for those that are old, injured, diseased, or dangerous. Upwards of 230,000 dogs have been received during the past ten years.

The Home has no subsidy from Government, but relies entirely upon Subscriptions and Donations. Contributions are urgently needed, and will be gratefully received by

HENRY J. WARD, *Secretary*.

"No book of reference has become a classic so quickly or with such good reason as HAZELL'S ANNUAL. . . . It is safe to say that 'HAZELL' is consulted half a dozen times a night in every daily newspaper office."—DAILY CHRONICLE.

THE LONDON CITY MISSION

EMPLOYS 454 MISSIONARIES.

FUNDS MUCH NEEDED.

It is one of the oldest of the Home Missionary Societies, and has ever held fast to its Evangelical principles. Its work is still pioneering, inter-denominational, and subsidiary to that of the Churches.

More than **500,000** men were visited, and vast numbers of them personally dealt with, during the past year. Has 118 Missionaries visiting **MEN** only in Factories, Workshops, etc.

At present there are upwards of 50 districts without any guaranteed support, and about 100 districts for which less than £40 was contributed last year. For every gift of £50 per annum one of the former can be retained, and for sums varying from £5 to £40 per annum the occupation of the partially supported districts can be continued. If friends are unable to contribute the whole sum necessary to maintain a Missionary, they may perhaps be able to offer £10, £5, or smaller sums. These subscriptions will be grouped for particular districts, and will thus remove the very pressing

anxiety of the Committee. Gifts will be gratefully acknowledged by the

Treasurer—F. A. BEVAN; or by the

Secretaries—T. S. HUTCHINSON, M.A., ROBERT DAWSON, M.A.

Offices—3, BRIDEWELL PLACE, LONDON, E.C.

Bankers—BARCLAY & CO., LTD., 54, LOMBARD STREET, E.C.

LONDON MISSIONARY SOCIETY:

SECOND CENTURY OF WORK.

HEADQUARTERS: 14, BLOMFIELD STREET, LONDON, E.C.

THIS Society, founded in September 1795, by a number of Episcopalians, Presbyterians, and Congregationalists, on a broad and catholic basis, from which it has never departed, has completed its first and entered upon its second century of work among the heathen and unenlightened races of the earth.

The Society has had the honour of sending out more than a Thousand Missionaries, not reckoning their wives; among them such distinguished men as John Williams, Moffat, Livingstone, Morrison (the first Protestant Missionary to China), Medhurst, Ellis, Mullens, Gilmour of Mongolia, and Dr. Mackenzie of Tientsin.

Its chief Fields of Labour are: China, from twelve chief centres; North India, the Madras Presidency and Travancore; Madagascar; South Africa; Central Africa; Polynesia; and New Guinea.

It has on its present staff 266 Missionaries, 24 of whom are qualified Medical Missionaries; and 892 Native Ordained Pastors and Evangelists; 2,966 other Native Helpers; 52,803 Church Members; 175,588 Native Adherents; 1037 Schools; 50,613 Scholars; 27 Hospitals, in which 155,293 patients were treated during 1898.

Donations are earnestly solicited, and may be made payable to

REV. A. N. JOHNSON, M.A.,

14, Blomfield Street, London, E.C.

SCHOOL FOR THE INDIGENT BLIND,

ST. GEORGE'S CIRCUS, SOUTHWARK, S.E.

Founded 1799.

Patron: HER MOST GRACIOUS MAJESTY THE QUEEN.

Treasurer: COLONEL B. T. BOSANQUET, J.P.

THIS SCHOOL receives 200 Blind Pupils, between the ages of 7 and 26. They are maintained and clothed FREE OF COST, for a period of Six Years, during which they learn to Read and Write, receive Religious and general Instruction, and are taught a Trade. A few showing real talent are trained to become Organists.

FORMS FOR ADMISSION may be obtained from the Secretary, at the School.

A WORKSHOP is in operation at the Institution, in which they manufacture Mats, Baskets, Brushes, Sashline, etc.

DONATIONS AND ANNUAL SUBSCRIPTIONS are earnestly pleaded for in aid of the extension of the Charity, which may also be assisted by the purchase of Goods made by the Blind Pupils. **Life Subscription, £10 10s. Annual, £1 1s.** All Cheques and P.O. Orders should be made payable to the Rev. ST. CLARE HILL, and crossed "**& Co.**"

Chaplain and Secretary: REV. ST. CLARE HILL, M.A.

FORM OF BEQUEST.

"I devise the following Hereditaments, that is to say (describe them), unto and to the use of the President, Vice-Presidents, Treasurer and Members of the SCHOOL FOR THE INDIGENT BLIND, ST. GEORGE'S CIRCUS, SOUTHWARK, S.E."

THE BAPTIST MISSIONARY SOCIETY.

FORMED IN 1792.

ITS present sphere of Labour embraces, in Asia—Continental India and the Island of Ceylon and Northern China; in Africa—the Upper and Lower Districts of the Basin of the Congo River; in Europe—France and Italy. It also supports the Calabar Institution for Training Native Agency in the Island of Jamaica. It has 168 Missionaries, 403 Evangelists, and 807 Mission Stations, in connection with which there are 19,269 Church Members, and a much larger number of adherents.

Income for the year 1898-99, £75,331 9s. 2d.; expenditure, £79,982 1s. 3d.

Treasurer—W. R. RICKETT, Esq., J.P.

NATIONAL WAIFS' ASSOCIATION

OTHERWISE KNOWN AS

"DR. BARNARDO'S HOMES."

OVER FIVE THOUSAND ORPHAN OR WAIF CHILDREN

**are NOW IN THE HOMES being Maintained, Educated,
and taught Trades under the care of this Association.**

"Christian, Protestant and Evangelical," is the religious motto of the Association. The work is supported by all sections of Christendom, and in its operations all Christian people may, and do, join hands.

Last year **6780** Children (the greatest family in the whole world) were maintained in the Homes.

Applications for urgent cases are received at any hour of the day or night.

Destitute Children of any age or creed, of either sex and of any **nationality**, are eligible.

Deaf or Dumb, Blind or Crippled Children, or those Diseased and already Given Over to Death, are, *if destitute*, always eligible.

The most searching inquiry is made into every application, but **NO REALLY DESTITUTE BOY OR GIRL IS EVER REJECTED**. Each case is determined solely upon its merits, without election and without the intervention of wealthy patrons.

Over **38,605** children have been received since 1866. From **50** to **60** Fresh Cases are admitted weekly during the winter months.

About **1500** Young Children are now Boarded Out in rural districts, under careful supervision.

Technical training in some one of the **fourteen** handicrafts carried on in the Homes is given to every **Lad** capable of receiving it.

All the **Girls** are brought up in Cottages on the family system, and carefully instructed in the various branches of Domestic Service, or in Dressmaking.

10,660 Trained and Tested Children have already been placed out in the Colonies. Of these **98** per cent. have been successful.

Three Lodging Houses and a Night Refuge open in the Metropolis, and **Ten "Ever Open Doors"** in Provincial Towns, are accessible throughout all hours of the day and night to homeless Waifs and Strays seeking temporary shelter.

These Homes actively co-operate with the **N.S.P.C.C.**, and receive **freely** and **at once** all destitute cases recommended by that Society or any of its Branches all over the Kingdom.

In all, these Institutions now comprise **91** distinct Homes, dealing with every age and class of destitute and needy childhood, and **18** Mission Branches.

FUNDS ARE URGENTLY NEEDED FOR FOOD AND MAINTENANCE.

Donations and Subscriptions gratefully received by the Treasurer, **WILLIAM FOWLER, Esq.**; by the Chairman of Council, **HOWARD WILLIAMS, Esq.**; by the Founder and Director, **Dr. THOS. J. BARNARDO**; or by the Bankers, **LONDON AND SOUTH-WESTERN BANK**, and Messrs. **PRESCOTT, DIMSDALE & Co.**

Offices: 18 to 26, STEPNEY CAUSEWAY, LONDON, E.

HOMES FOR LITTLE BOYS,

FARNINGHAM AND SWANLEY, KENT.

Patrons.

THEIR ROYAL HIGHNESSES THE PRINCE & PRINCESS OF WALES.

President.

THE EARL OF ABERDEEN, G.C.M.G.

Vice-Presidents.

The Duke of Argyll, K.G.
The Marquis of Zetland, K.T.
The Earl of Stanhope.
The Viscount Knutsford, G.C.M.G.
Field-Marshal Viscount Wolseley, G.C.B.
The Lord Bishop of Ripon, D.D.
The Hon. W. F. D. Smith, M.P.
Sir James Blyth, Bart.
Sir George Newnes, Bart.

Sir W. H. Wills, Bart., M.P.
Sir Walter Besant, F.S.A.
Sir Patteson Nicholls.
The Ven. the Archdeacon of London.
Rev. R. F. Horton, M.A., D.D.
J. Passmore Edwards, Esq.
George Hanbury, Esq.
Robert T. Turnbull, Esq.

These Homes were the first to abandon the discredited Barrack System, to secure Family Life for the Boys.

THE COTTAGE HOMES AT FARNINGHAM are for 330 Boys, who are Homeless and Destitute. They are placed in families of 30 each, with a Father and Mother to take care of them. They are fed, clothed, and educated, and receive careful, moral, and religious training.

They are taught to be industrious by being employed in Tailoring, Shoemaking, Carpentering, Printing, Breadmaking, Painting, Gardening, and Farming. Situations found for them, where they are looked after as "Old Boys."

Boys are either admitted on payment by benevolent persons of 7s. a week, or can be elected free or on part payment.

THE HOMES FOR ORPHANS at Swanley are designed for 200 Boys, whose mothers need to go out to earn their living. They do what they can towards the support of their own boys, and friends who have known them in better days help them. Every boy admitted to the Orphanage is paid for at the rate of £15 15s. for Boys under seven, and £21 per annum for Boys over seven years of age, for which they are fed, clothed, educated, taught to work, and entirely maintained throughout the year, and many benevolent people are glad in this way to support an Orphan Boy.

These HOMES being *entirely supported by Voluntary Gifts*, the Committee most earnestly appeal for help.

Treasurer.—W. H. WILLANS, Esq., J.P., 3, Copthall Buildings, E.C.

Secretary.—Mr. WILLIAM ROBSON, 25, Holborn Viaduct, E.C.

Bankers.—Messrs. SMITH, PAYNE, & SMITHS, 1, Lombard Street, E.C.

BRITISH ORPHAN ASYLUM, SLOUGH.

Instituted 1827.

Patron, Her Majesty the Queen.

For the Maintenance and Education of Orphans from all parts of the British Empire, of all denominations, whose parents were once in prosperous circumstances. Orphans are admitted by Election, Presentation, and in some cases by purchase, between the ages of 7 and 12, and are retained until 15.

Forms of Application and all particulars may be obtained from the Secretary.

The Committee earnestly appeal for increased support, the Institution being dependent on Voluntary aid. New Annual Subscriptions are much needed. Annual Subscriptions: For One Vote, 10s. 6d.; for Two Votes, £1 1s. Life Subscription: For One Vote, £5 5s.; for Two Votes, £10 10s. Life Presentation, £350.

Bankers: MESSRS. WILLIAMS, DEACON, AND MANCHESTER AND SALFORD BANK, Limited, 20, Birchin Lane, E.C.

Offices: 62, Bishopsgate Street Within, E.C. CHARLES T. HOSKINS, *Secretary*.

INFANT ORPHAN ASYLUM, WANSTEAD.

Patron—HER MAJESTY THE QUEEN.

Bankers—Messrs. WILLIAMS, DEACON & Co.

This Institution maintains and educates the Orphans of persons once in prosperity, from their Earliest Infancy until Fifteen years of age.

It has received 4356 Fatherless Children already. Sixty-two were admitted last year.

Nearly 600 are in the Asylum now.

Elections will be held in May and November this year. Sixty-two Children will be elected.

Forms of Nomination can be obtained at the Office.

Nearly the whole of the Yearly Income arises from Voluntary Contributions. Assistance is therefore urgently needed, and will be thankfully acknowledged.

Life Subscription for One Vote	£5 5 0
Two Votes	10 10 0
"Annual" Subscription for One Vote	0 10 6
Two Votes	1 1 0

Offices: 63, Ludgate Hill, E.C.

HENRY W. GREEN, *Secretary*.

MERCHANT SEAMEN'S ORPHAN ASYLUM, SNARES BROOK.

Instituted 1827.

For the Maintenance and Education of the Destitute Orphans of British Sailors (Officers and Men), from all parts of the world.

2,400 CHILDREN HAVE BEEN ADMITTED. 300 ARE IN RESIDENCE.

The Institution is Unendowed, and Entirely Dependent upon Voluntary Subscriptions and Donations. Funds are urgently required, and will be thankfully acknowledged.

Annual Subscription, with Two Votes £1 1 0 Life Subscription, with Two Votes £10 10 0
 " " " One Vote 0 10 6 " " " One Vote 5 5 0
 And Additional Votes according to the amount Subscribed.

Asylum for the Education of the Deaf & Dumb Children of the Poor, OLD KENT ROAD, SURREY, AND MARGATE, KENT.

Established 1792. Incorporated 1862.

Patron—H.R.H. THE PRINCE OF WALES, K.G.

THIS old and deserving Metropolitan Charity (the first of its kind in Britain) has up to the present time received and educated over 5490 Deaf and Dumb Children coming from all parts of the United Kingdom. With very few exceptions, these children belong to indigent parentage; and have been gratuitously BOARDED, CLOTHED, and SPECIALLY EDUCATED. When their educational term has expired, Apprentices Fees are granted, and during the last 88 years upwards of 2250 former pupils have been Apprenticed to various Trades at a cost to the Charity of upwards of £20,400. Children are admitted from seven to ten years of age, and are retained in the Asylum until they are about 16 years old. 330 Children are now on the books of this Charity. Elections are held in January and July. Life Subscriptions—1 Vote at each Election during life of Subscriber for every £5 5s. Annual Subscriptions—1 Vote at each Election for every 10s. 6d. subscribed annually. Votes for one Election—Votes for a single Election may be purchased at the rate of 4 for a Guinea. CONTRIBUTIONS ARE EARNESTLY SOLICITED. Cheques and Money Orders should be made payable to "The Asylum for the Deaf and Dumb," and crossed "London Joint Stock Bank, Ld., Princes Street, E.C." and may be addressed to the Secretary at the Office.

Office: 93, Cannon Street, City, E.C.

HON. ALBAN G. H. GIBBS, M.P., *Treasurer*,
 FREDERIC H. MADDEN, *Secretary*.

ROYAL ALFRED

AGED MERCHANT SEAMEN'S INSTITUTION.

ESTABLISHED IN 1867.

The ONLY Institution in the United Kingdom, which gives, irrespective of Rank, Creed, or Ports of Service, a HOME or a PENSION to the MERCHANT SAILOR when Old and Destitute.

NATIONAL AND UNIQUE.

H.R.H. THE DUKE OF YORK

(PATRON OF THE INSTITUTION),

When presiding at a dinner festival held on the 17th May, 1899, in aid of the ROYAL ALFRED INSTITUTION, said: "I wish to urge the very strong claim which this Charity has upon us, supporting as it does men who have spent many years of their life at sea. I am able to speak of these men from experience. I know thoroughly the hardships our merchant seamen have to undergo. When we consider the enormous value of our mercantile marine one cannot but feel that any nation having such vast wealth ought to furnish some provision for the merchant seaman when he becomes old, worn out, and no longer able to earn his own living. His pay is small, his life is one of great hardship and exposure in all climates, and he has very few opportunities of saving anything for his old age. Thus it frequently happens that he has nothing to look forward to in his declining years but the workhouse, or the help given by such an institution as the 'Royal Alfred.'"

The "ROYAL ALFRED INSTITUTION" has provided a Home or a Pension for 1,540 poor old Seamen, who else must have ended life in the dreaded Workhouse.

250 approved applicants (aged between 65 and 90) now on the list.

INCREASED ANNUAL HELP URGENTLY NEEDED.

President—R. S. DONKIN, Esq., M.P.

Treasurer—Colonel ROBERT WILLIAMS, M.P., Banker.

The Mission of **The Children's Home** is to rescue children who, through the death, or vice, or extreme poverty of their parents, are in danger of falling into criminal ways. It is therefore at once an **Orphanage** and a **Refuge**.

The Home receives children of any age, or any sect, without election. It is conducted on the Family system; is a Religious and Industrial Institution; is a **Training School for Christian Workers**; and is dependent on Voluntary Contributions.

Within the last thirty years **4,479** children have received the benefits of this Institution. **1076** are now in residence. About **£16** will maintain a child in the Home for a year.

3403 children have now passed through the Home, and there is the greatest cause for thankfulness to God for the present well-being and for the prospects in life of a large majority of this great number.

In connection with this work the **Gordon Hall Mission** is carried on in the East End of London; an agency for the **Protection of Girls** is at work, a refuge being available night and day; a **Servants' Free Registry** is open, and **Lodgings** are provided for respectable young women during the interval between situations; also a **Mission to the Poorest Children** of East London is very successfully carried on. A small number of **Epileptic Children** have already been received. The entire work is greatly in need of more liberal support. The smallest contributions will be thankfully received.

The need of such a work is painfully obvious. Our cities and towns are crowded with children exposed to every evil influence, shut out from all good, and living a life worse than that of savages, and as they grow up they naturally take their places in the ranks of the pauper and the criminal. Yet they may be saved. Hundreds of cases prove that these little ones—some of them mere infants—are susceptible of every elevating influence, and need only the care of a Christian home to develop all that is good in their characters, and fit them for reputable and useful lives.

Collecting Books, Boxes, or Cards will gladly be forwarded to those who are willing to collect in aid of the funds of the Institution.

Cheques and Money Orders should be crossed City Bank, and Orders made payable at General Post Office.

Remittances to be made payable and sent to T. B. STEPHENSON, Bonner Road, London, N.E.

J. PENDLEBURY, *Secretary*

ST. JOHN'S HOSPITAL FOR DISEASES OF THE SKIN,

LEICESTER SQUARE, W.C. FOUNDED A.D. 1863.

ROYAL HOSPITAL

FOR

DISEASES OF THE CHEST,

CITY ROAD, LONDON, E.C.

FOUNDED BY THE FATHER OF HER MAJESTY THE QUEEN.

President—THE LORD ROTHSCHILD.

Treasurer—S. HOPE MORLEY, Esq.

Chairman of the Council—SIR T. ANDROS DE LA RUE, Bart.

Vice-Chairman—The Hon. LIONEL ASHLEY.

THIS Hospital was the first of its kind established in Europe, and has uninterruptedly since 1814 carried on its great work in the midst of the suffering poor of the Metropolis.

It treats annually about 750 In-Patients, who come from all parts of the country, and the attendances of Out-Patients each year number about 25,000.

The Charity's income from all sources does not exceed £3,000, whereas its annual expenditure averages £8,000, leaving an annual deficit of £5,000.

DONATIONS and SUBSCRIPTIONS are earnestly solicited, and may be sent direct to the Treasurer, or to the Secretary,

JOHN HARROLD,

CHARING CROSS HOSPITAL, STRAND, W.C.

President:

MESSRS. HOARE, 37, Fleet Street; MARTIN'S BANK, LD., 68, Lombard Street.

Secretary—ARTHUR E. READE, Esq.

The Governors earnestly solicit assistance for this Hospital, which is mainly dependent on voluntary contributions, and treats annually an average of over

23,000 SICK AND INJURED PATIENTS.

This Hospital also maintains a Convalescent Home at Limsfield, maintaining 50 Beds.

The Assured Income is about - - - - - £1,000.

The Expenditure averages - - - - - £16,000.

ANNUAL SUBSCRIPTIONS and DONATIONS will be most thankfully received by either of the above-named bankers; or by the Secretary, at the Hospital.

FORM OF BEQUEST.

"I give and bequeath to the Treasurer or Treasurers, for the time being, of CHARING CROSS HOSPITAL, London, for the use of that Charity, the sum of free of Legacy Duty, to be paid out of my pure personal estate as soon after my decease as may be possible."

We Help only Those who Desire to Help Themselves.

FUNDS ARE EARNESTLY SOLICITED on behalf of this Reformatory and Preventive Work.

Contributions will be thankfully received and acknowledged by the Secretary, Mr. C. STUART THORPE, to whom all Cheques and Money Orders (crossed "*Barclay & Co.*") should be made payable, and sent to the Offices of the Society.

79, FINSBURY PAVEMENT, LONDON, E.C.

CURATES' AUGMENTATION FUND.

This Society makes grants of £50 a year to Curates who have been more than 15 years in Holy Orders, and are still in full active work.

There are upwards of 7,500 Curates, and more than 1,300 have been ordained more than 15 years.

It is the **only Society of the kind**; it therefore cannot be said that there is any multiplying or overlapping others of a similar character, thus incurring extra offices and set of officials. The Society is worked on the most economical principles consistent with efficiency. In the new organisation just started, called "**The Queen Victoria Clergy Fund**," the claims of the unbeneficed Clergy are not included at all.

This is one of the best Societies in the Country, and **one most needed**. Curates of 25 years' standing get from 30 to 40 per cent. less stipend than those newly ordained. The average stipend of these older Curates is **only £118 a year**, and then they decrease at the rate of £5 every five years.

The Church is multiplying Curates **three times** as rapidly as she is multiplying benefices. More than £8,000 voted last year.

CHURCH COLLECTIONS, SUBSCRIPTIONS, AND DONATIONS THANKFULLY RECEIVED. Cheques, P.O.O., and P. Orders, crossed "*Coutts & Co.*," should be sent to the Treasurers, or to

Office: 2, Dean's Yard, Westminster, S.W.

Rev. J. R. HUMBLE, Secretary.

THE CHURCH COMMITTEE FOR CHURCH DEFENCE AND CHURCH INSTRUCTION.

Presidents—THE ARCHBISHOPS OF CANTERBURY AND YORK.

Chairman of the Executive Committee—THE EARL OF SELBORNE.

Treasurers—SIR F. S. POWELL, BART., M.P., AND SIR CHARLES LISTER RYAN, K.C.B.

Secretary—T. MARTIN TILBY, Esq.

Offices—THE CHURCH HOUSE, DEAN'S YARD, WESTMINSTER, S.W.

Objects.—1. The necessary instruction of the people, in town and country, in all matters connected with the history of the Church, and with her spiritual interest and effectiveness.

2. To combine, as far as possible, men and women of every shade of political and religious opinion in the maintenance of the Established Church, and her rights and privileges in relation to the State.

3. No question touching Doctrine shall be entertained.

The opponents of the Church are rallying their forces, but if they are met by an instructed laity their defeat is certain. Unfortunately the ignorance respecting the history and true position of the Church, which still so largely prevails among Churchpeople, and the misconceptions which are so rife and so diligently fostered elsewhere, constitute the real danger to the great spiritual heritage of the country.

These can only be removed by the dissemination of accurate information respecting the Church, her origin, history, property, and national position. But, to do this systematically and effectively, further organisation throughout the country is required, and for this purpose it is a matter of pressing necessity that a larger income should be assured. Lectures, Publications, and Organisation involve very considerable outlay, and, notwithstanding the economies in administration which are now taking full effect, *increased funds are greatly required.*

Cheques should be drawn in favour of the Secretary, and crossed "Messrs. Hoare & Co."

THE CHURCH OF ENGLAND TEMPERANCE SOCIETY.

Patron—HER MOST GRACIOUS MAJESTY THE QUEEN.

Presidents—THE ARCHBISHOPS OF CANTERBURY AND YORK.

Chairman—THE RIGHT REV. THE LORD BISHOP OF CHICHESTER.

Vice-Chairmen—The Right Rev. BISHOP BARRY, ROBERT SAWYER, Esq.,

E. STAFFORD HOWARD, Esq., J.P.

Treasurers—CHARLES ERNEST TRITTON, Esq., M.P., 8, Finch Lane, E.C.; A. F. HILLS, Esq., Monkhams, Woodford Green, Essex.

Bankers—MESSRS. BARCLAY & Co., Limited, 54, Lombard Street, E.C.

Secretary—F. EARDLEY-WILMOT, Esq., R.N. **Assistant Secretary**—A. F. HARVEY, Esq.

Head Office and Depot: DEANS GATE, 4, THE SANCTUARY, WESTMINSTER, LONDON, S.W.

CONSTITUTION.—The Constitution of the Society is in accordance with recommendations contained in the Reports of the Committees on Intemperance presented to the Convocations of Canterbury and York.

BASIS.—“On Union and Co-operation, on perfectly equal terms, between those who use and those who abstain from intoxicating drinks.”

The Society, through its Diocesan and Parochial organisation is engaged in active work for the prevention of intemperance, and the rescue of the Intemperate by means of its Publications, Lantern, Scientific and other Lectures, Annual Examinations and Competitions for Juveniles and Adults; Legislative Work, Police Court and Prison Gate Missions, Labour Homes and Shelters, the Racecourse and Van Mission, Work among Cabmen, Soldiers, Sailors, Railway Men, etc., etc.

THE WOMEN'S UNION OF THE SOCIETY, in addition to the ordinary Temperance Work of its Members, promotes the Establishment of Inebriate Homes for Women in various parts of the Country, and has recently started an Employment Agency for the assistance of Members of the Society, and of Police Court Mission, and Inebriate Homes rescue cases.

HOMES FOR INEBRIATE WOMEN, Ellison Lodge, Dulwich, and Temple Lodge, Torquay, receive patients at Fees ranging from 7s. 6d. to £2 2s. per week. The Hon. Secretaries, Miss Forsyth, 101, Sloane Street, S.W., and Mrs. Erskine, Mapleton, Torquay, will gladly give information as to vacancies.

For particulars as to LIVERPOOL DIOCESAN HOME apply to Miss WILSON, 317, Parliament Street, Liverpool; and for the WORCESTER DIOCESAN HOME, apply to Miss PARISH, 65, Gillott Road, Birmingham.

Subscriptions and donations to strengthen existing work and to enable the Society to meet its ever-increasing claims, will be gladly received by the Secretary at above address.

NOTICE—Cheques should be payable to “The C.E.T.S. or Order,” and crossed BARCLAY & Co., Limited, “not negotiable”; and Postal and Post Office Orders (also crossed) made payable at G.P.O., LONDON.

N.B.—The most convenient and safe way of paying Annual Subscriptions is by means of a Bank Order.

TIMES.—“HAZELL'S ANNUAL differs from all other books in its design. A most useful and trustworthy work.”

HOME MISSIONS OF THE CHURCH OF ENGLAND.

CHURCH PASTORAL-AID SOCIETY.

INSTITUTED 1836.

FIVE MILLIONS AND A HALF of people in our parishes are indebted to this Society for the presence of additional Clergy, Lay Agents, and Women Workers. The number of Grants has gone up to 893.

THERE ARE STILL MANY urgent applications which cannot be granted for lack of funds.

Secretaries.—Rev. R. G. FOWELL, M.A.; Col. H. S. CLARKE, (late) R.A.; Rev. H. M. SANDERS, M.A.

Offices of the Society.—Falcon Court, 32, Fleet Street, London, E.C.

Bankers.—Messrs. WILLIAMS, DEACON, AND MANCHESTER AND SALFORD BANK, Limited, 20, Birchin Lane, E.C.

SCHOOLS AND COLLEGES.**BEDFORD.**

For Idyllic Short Stories.

For the Special Articles by "J. B."

For a broad, comprehensive History of Religious Work from week to week.

The CHRISTIAN WORLD is conducted under perfect editorial independence, has an incomparable literary staff, and has correspondents in all parts of the world.

THE BEST GUIDE TO THE BEST NEW BOOKS. THE LITERARY WORLD. ESTABLISHED 1867.

EVERY THURSDAY. ONE PENNY. MONTHLY, 6d.

Although published at a penny, this journal is a literary organ of the highest class. Its establishment dates from 1867, when it was founded in order to supply popular reviews of current literature. The newest books in fiction, biography, theology, travel, poetry, art, and science—in fact, in every department of literature—are reviewed in its columns by a staff of experienced writers, including several well known men of letters.

The principal aim of the paper is to afford, as it were, a bird's-eye view of current literature. Critical reviews of all important works are given, sometimes in the form of signed articles.

A feature of THE LITERARY WORLD from its commencement has been the brief illustrative extracts, which of themselves supply interesting reading matter, and, in combination with the comment, enable readers to form a very fair idea of the best new books.

The number of publications annually dealt with in this way is very large, amounting to some thousands.

JAMES CLARKE & CO., 13 AND 14, FLEET STREET, LONDON, E.C.

"Personally we have found the 'Annual' to be of the greatest service, and have on many occasions discovered in its pages facts which we failed to find elsewhere."

PALL MALL GAZETTE.
